due to the recent completion of Norris Dam by the Tennessee Valley Authority (TVA)
location of Oak Ridge and its low population helped keep the town a secret
Oak Ridge was kept an official government secret
it did not appear on maps and was not formally named [until 1949]
until then it was referred to as the Clinton Engineer Works
Clinton Engineer Works location was established within a seventeen-mile long valley
partitioned by several ridges, providing the four major industrial plants natural protection
against disasters -- assuring they wouldn't blow up like a string of firecrackers
United States Army Corps of Engineers began acquiring the Oak Ridge site -- October 1942
unlike the Tennessee Valley Authority (TVA) land acquisitions for Norris Dam
this time the Corps' "declaration of taking" was much more swift and final
many residents came home to find eviction notices tacked to their doors
most were given six weeks to evacuate, although several had as little as two weeks
some were even forced out before they received their compensation
(even so, construction on the facility and employee housing
would not be completed until [April 1944])
Although the residents of the settlement grew from about 3,000 in 1942 to about 75,000 [1945]
and despite the fact that the K-25 uranium-separating facility by itself covered forty-four acres
and was the largest building in the world at that time, the secret was maintained
Clinton Engineer Works was surrounded by guard towers and a fence with seven gates
all workers wore security badges

LIST OF RATIONED GOODS INCREASES

Fuel oil, kerosene and rubber footwear were rationed -- October 1942
Medicines such as penicillin were rationed by a triage committee at each hospital -- October

GORDON HIRABAYASHI GOES TO TRIAL

U.S. District Court in Seattle found Hirabayashi guilty of violating the exclusion orders
and breaking curfew resulting in a ninety-day jail sentence -- October 20, 1942
Gordon Hirabayashi appealed the verdict to the U.S. Supreme Court
which was asked to rule on the legality of the exclusion order, the curfew order,
and Public Law 503 which authorized evacuation of American Japanese
Associate Supreme Court Justice William O. Douglas concurred with the majority
to uphold Japanese wartime internment
(but over the course of his career he grew to become a leading advocate of individual rights)

REPUBLICANS MAKE GAINS IN THE STATE ELECTION

State voters went to the polls -- November 3, 1942
Results in the races for U.S. House of Representatives showed vast gains for Republican candidates
Congressman Fred B. Norman, Republican -- Third District was elected
(he will serve one term before being defeated)
Congressman Hal Holmes, Republican -- Fourth District

was elected to the first of eight terms in office -- [1943-1959]
Congressman Walter F. Horan, Wenatchee Republican -- Fifth District
his popularity resulted in his being elected to eleven terms in office -- [1943-1965]
In the state legislature Republicans made large gains
although the Democrats maintained their majority
ten Senate seats shifted as Democrats dropped from thirty-seven to twenty-seven members
while Republicans increased from nine to nineteen
eleven seats shifted in the state House of Representatives
Democrats dropped from sixty-eight to fifty-seven
as Republicans increased from thirty-one to forty-two

RATIONING IS EXPANDED TO PRESERVE WAR MATERIELS AND CONTROL INFLATION

Meat, lard, shortening and oils, cheese, butter, margarine, dried fruits, canned milk,
firewood and coal, jams, jellies, fruit butter and processed foods (canned, bottled, and frozen)
were added to the list of rationed items -- November 1942
having guests for dinner meant weeks of saving blue and red ration points
Nylon and silk were rationed for use in making parachutes and gun powder bags
women bought 55-cent bottles of leg paint from Woolworths to draw mesh lines on their legs
Coffee was rationed nationally in part because of German U-boat attacks on shipping from Brazil
consumption was limited to one pound every five weeks per person [November 29, 1942]
this was about half of normal consumption
(Stoves were rationed [December 1943])
Many retailers welcomed rationing because they were already experiencing shortages of many items
due to rumors and panics, such as flashlights and batteries after Pearl Harbor

NEKKEI RESIDENTS ATTEMPT TO ADAPT TO THE NEW LIFE

Life at the Minidoka Japanese Internment Camp varied only by season
scorching heat and billowing clouds of dust harassed detainees in the summer
freezing cold, snow and wind attacked the inmates in winter
sagebrush was everywhere
American Japanese farm hands, most of them former Camp Harmony inmates
harvested twenty-five percent of Idaho's sugar beet crop -- November 1942
earning the expressed gratitude of Idaho's farmers
Aside from the regimented life and lack of privacy,
Minidoka functioned, as much as possible, like any self-sustaining town
Block Managers served as representatives to the administration and helped facilitate policies
residents would also report problems to them, such as lost and found articles,
leaky roofs or broken windows
Areas for recreation and relaxation were made available
there were nine baseball diamonds
swimming in the North Side Canal was popular that summer but the water in the canal was swift
after a drowning accident, the internees built two swimming pools
internees beautified their surroundings
Minidoka had a landscaped park and picnic area

they designed gardens that included trees, flowers and shrubs within the camp
residents constructed a gym for indoor activities in the [winter]
and a small pond became an ice skating rink
Those American Japanese who wanted to work could find a job at the camp's placement office
they staffed the mess halls and provided various other services to the residents
Minidoka had a library, a 196-bed hospital, fire stations, a newspaper, bands, choirs,
orchestras and cultural activities
some internees worked in agriculture, livestock production, and light manufacturing
to produce food and garments for the camp
other American Japanese farm hands harvested twenty-five percent
of Idaho's sugar beet crop -- November 1942
earning the expressed gratitude of Idaho's farmers

EDUCATION WAS IMPORTANT AT CAMP MINIDOKA

Camp Minidoka had two elementary schools
its high school opened in November 1942 with an enrollment of 1,225
(Class of [1943] had 188 graduating seniors)
Japanese college students had their educations abruptly suspended
however, a very limited college education program had begun modestly in the assembly centers
U.S. Army opposed Japanese student relocation for education on national security grounds
sufficient restrictions were imposed to limit participation to very few colleges and universities
students had to document that their financial resources were adequate to pay for college
and undergo cumbersome FBI intelligence checks
Far more former Nisei UW students prepared their college applications while at Minidoka
than had made the attempt while in Camp Harmony
[1943-1945] would see more than 4,000 students enter inland colleges and universities,
including several hundred who transferred from the University of Washington

J. ROBERT OPPENHEIMER SELECTS THE SITE OF THE LOS ALAMOS LABORATORY

Oppenheimer selected a flat mesa near Santa Fe, New Mexico to locate the laboratory -- November
it had been the site of a private boys' school -- Los Alamos Ranch School
engineers were concerned about the poor access road and the water supply
but otherwise they felt that it was an ideal location

LOS ALAMOS, NEW MEXICO BECOMES A SCIENTIFIC BOOM TOWN

Los Alamos Laboratory was built on the site of the school, taking over some of its buildings
while many others were erected in great haste
Oppenheimer assembled a group of the top physicists which he referred to as the "luminaries"
he badly underestimated the size of the project
during the Manhattan Project, Los Alamos grew from a few hundred people in 1943
to over 6,000 [1945] including many Nobel Prize-winning scientists
Location of the nuclear laboratory was a complete secret
its only mailing address was a post-office box, number 1663, in Santa Fe, New
although the lab maintained a working relationship with the University of California (UC)

only Secretary-Treasurer Robert Underhill, a member of the UC administration, who was in charge of wartime contracts and liabilities
knew the exact purpose and location of the Los Alamos laboratory
even University of California President Robert Sproul did not know
(Work at the Los Alamos laboratory culminated in the creation of three atomic devices)

USS WASHINGTON, BB-56, SERVES IN THE PACIFIC THEATER

(After one month in dry dock, USS *Washington*, BB-56, headed for the Pacific [August 23, 1942] she joined Task Force 17 and began escorting supply ships traveling to and from Guadalcanal)

USS *Washington* continued escort duties until mid-November 1942

when American intelligence determined the Japanese Navy was preparing to attack the U.S. fleet at Guadalcanal and would attempt to land reinforcements to push the Americans off the island

USS *Washington* and five other ships headed for the waters off Savo Island -- November 13, 1942 with the intention of intercepting the Japanese force

when Japanese reconnaissance planes spotted the U.S. task force their ships diverted course to force a confrontation with the Americans

BATTLE OF SAVO ISLAND TAKES PLACE AT NIGHT

USS *Washington*, BB-56, spotted a large contact on her radar

she opened fire with her 16-inch guns --just after midnight November 15, 1942

After attacking the Japanese cruiser *Sendai*, *Washington* faced the Japanese battleship *Kirishima* in the first combat between battleships in the Pacific Theater

in seven minutes, the *Washington* hit the *Kirishima* nine times with her 16-inch guns and another forty times with her five-inch guns

Kirishima would not survive the engagement

set aflame and racked by explosions, *Kirishima* was scuttled by her crew

Japanese destroyer *Ayanami* also was sunk by the *Washington*

Last major Japanese naval thrust at Guadalcanal had been turned back

Washington survived the battle without damage,

but she was the only American capital vessel to do so;

USS *Wakle* and *Preston* were both sunk

battleship USS *South Dakota* was severely damaged

Washington was the only American battleship to singly defeat another capital ship during the war

Being the only American battleship remaining active in the Pacific Ocean,

USS *Washington* remained active in the Solomon Islands campaign

for five weeks the USS *Washington* patrolled the waters serviced by her fleet escort vessels

she set a record steaming 31,494 miles for seventy-nine consecutive days

she fueled destroyers fifty-nine times and fueled herself sixteen times

(she set sail for Pearl Harbor and an overhaul [April 1, 1943])

ADVANCES ARE MADE IN ATOMIC RESEARCH

As construction was underway at Oak Ridge, Tennessee and Los Alamos, New Mexico theoretical work was being conducted at Columbia University, at Chicago University

and at universities in California
Physicist Enrico Fermi supervised the design and assembly of an “atomic pile”
(code for an assembly that in peacetime would be known as a “nuclear reactor”)
Dr. Fermi began his experiment to create a nuclear chain reaction
below the squash courts under the west grandstand of the University of Chicago football stadium
more than fifty people in attendance -- 9:45 a.m. December 2, 1942
There was only speculation as to what might happen after the chain reaction began
but it was believed an uncontrolled chain reaction would result in a nuclear explosion
for safety if the chain reaction threatened to get out of control and the On/Off switch failed
there was a weighted safety rod that would automatically trip if neutron intensity got too high,
there was also a hand-operated backup device to extract the safety rod if necessary
in addition, three members of a “suicide squad” stood ready to douse the reactor with water
lastly “SCRAM” (safety control rod ax-man) was put into place if all else failed
this was a top staffer wielding an ax to cut the rope and drop the safety rod through the pile
Dr. Fermi’s nuclear pile achieved “critical mass” and began a sustained nuclear reaction at 3:25,
Fermi shut it down at 3:53 -- those twenty-eight minutes changed the world
(Dr. Enrico Fermi is widely regarded as one of the leading scientists of the 20th Century
with J. Robert Oppenheimer, he is frequently referred to as “the father of the atomic bomb”)

GENERAL GROVES SELECTS A CONTRACTOR TO BUILD THE PLUTONIUM PLANT

General Lester Groves selected DuPont Corporation, the giant chemical and engineering company,
as the prime contractor to build a plutonium production complex to develop a second fuel source,
plutonium-239, for an atomic bomb
DuPont was offered a standard “cost plus fixed fee” contract,
but company President Walter S. Carpenter, Jr. wanted no profit of any kind
he asked for the proposed contract to be amended to explicitly exclude the company
from acquiring any patent rights
this was accepted, but for legal reasons a nominal fee of one dollar was agreed upon
Company President Carpenter further agreed to withdraw from atomic energy after the war
(DuPont finished the contract ahead of schedule and asked to be released from the contract early
33 cents on the dollar was returned to the federal government)

NEEDED PLUTONIUM PRODUCTION PLANT IS DIFFICULT TO LOCATE

There were concerns that in the event of a major nuclear accident
Clinton Engineer Works Oak Ridge, Tennessee was too close
to the major population center of Knoxville, Tennessee
Federal officials selected three men who were charged with finding a site that met these criteria
Army Colonel Franklin T. Matthias, and DuPont engineers Gilbert Church and A. E. S. Hall met
to determine the criteria necessary to locate a plutonium production plant -- December 1942
because of the extremely hazardous substances involved,
federal officials decided it must be located in the West
away from the population centers of the East Coast and Midwest
it would be necessary for the site to have room for a “hazardous manufacturing area”
to be at least twelve by sixteen miles in area

with no towns over 1,000 people within twenty miles
and no highway or railroad within ten miles
vast amounts of fresh water and dependable electrical supplies also were necessary

WOMEN JURORS ARE ONCE AGAIN UNDER ATTACK

Besides being provided an exemption from jury duty for being a woman
as mandated in the [1911] law

sometimes women were excluded from jury duty in Washington for more mundane reasons
no women served as jurors in Yakima County due to a complete lack of restroom facilities
to take care of mixed juries

placing women on juries was evidently not worth the cost of the plumbing

Yakima built a new courthouse (presumably with more than one restroom) -- 1942

Yakima court clerk placed an ad in the newspaper asking women

to volunteer to add their names to the jury list

this “opt-in” procedure was a mirror image of the “opt-out” procedure then in the law

Case of *W.E. Roche Fruit Co. v. Northern Pacific Railway* was heard in Yakima -- December 1942

W.E. Roche Fruit Company objected that volunteer jurors were not to be trusted

but the Washington State Supreme Court held that the opt-in method for women jurors

substantially complied with the statute and that the appellant had not shown prejudice

by the presence of female volunteers on the jury

However, a more significant point was missed by State Supreme Court

regardless of how the [1911] statute was applied or misapplied an unrepresentative jury pool

was created that did not match the vision of justice given by the territorial prosecutor

in *Rosenkrantz v. Territory of Washington* [1884]: **“It is the right of every citizen**

possessing the necessary qualifications under the law to fully participate in the administration of the laws by which he or she may be governed, and to deny it is to take away one of the valuable prerogatives of citizenship. It is a right as well as a duty which cannot be taken from any class of person who under the law possesses the necessary qualifications.

“It is the right also of every person who is or may be charged with a violation of the laws to have such charge made and tried by a grand and petit juries of his peers, selected in the manner provided by law from all the persons who are electors and householders. This is the protection of the innocent as well as the terror of the guilty.”²⁸¹

POTENTIAL LOCATION FOR THE PLUTONIUM PRODUCTION PLANT IS SELECTED

Three-man search team visited the dry plains along the Columbia River

west of the small towns of White Bluffs, Hanford, and Richland -- late December 1942

Army Colonel Franklin T. Matthias, and DuPont engineers Gilbert Church and A. E. S. Hall

unanimously recommended the Hanford site **“...as being far more favorable in virtually all respects than any other.”²⁸²**

²⁸¹ Aaron H. Caplan, “The History of Women’s Jury Service in Washington,” *Washington State Bar News*, March 2005, P. 20.

²⁸² Michele Stenehjem Gerber, *On the Home Front*, P. 12.

NEW RATION BOOKS ARE ISSUED TO REPLACE RATION BOOK ONE

War Ration Book Two was issued -- January 1943

this time the books had four pages of blue and four pages of red stamps

inside the cover was printed the warning: **“This book is the property of the United States Government. It is unlawful to sell or give it to any other person or to use it or permit anyone else to use it, except to obtain rationed goods for the person to whom it was issued. Persons who violate Rationing Regulations are subject to \$10,000 fine or imprisonment, or both.”**

(Book Three was issued [October 1943] and contained brown stamps which were used for butter, cheese, lards and fats)

(Book Four was issued [late 1943])

this book had eight pages of 384 stamps in blue, red, green and black

stamps were also lettered A through Z

green stamps were used along with blue stamps

for foods like juice, baby food and bottled fruit

red stamps were used for meats

black stamps were used as “spares”

in the event that more adjustments were made in the food rationing program

each item in a store would have a price and a corresponding coupon value

customers were required to pay for the rationed food *and* turn in the coupon points)

(Most ration restrictions did not end until [August 1945])

sugar rationing did not end until [October 31, 1947])

BUSINESSES HELP WITH RATIONING

Sears Roebuck and Company's 1943 catalog contained a list of all rationed farm equipment and told the reasons for and benefits of rationing -- even chicken wire fencing was rationed

Wartime 1943 edition of *American Woman's Cook Book* contained revised recipes

that provided substitutes for rationed products and gave advice on dealing with food shortages

All forms of automobile racing were banned including the Indianapolis 500

sightseeing driving was banned, too

LOCATION OF THE PLUTONIUM PRODUCTION PLANT IS AGREED UPON

General Leslie R. Groves visited the proposed Hanford site

he agreed with the decision of the three-man search team -- January 1943

in addition to security advantages provided by the isolated location, the Columbia River

could supply sufficient water to cool the reactors that would produce the plutonium

POLITICAL PHILOSOPHY OF FEDERAL GOVERNMENT LEADERS BEGINS TO CHANGE

As military costs escalated, so did the federal deficit and spending for social expenditures plummeted demands of war provided an excuse to abolish segments FDR's New Deal -- January 1943

Conservative politicians had fought against these agencies for years

but now that FDR was focused on winning a war instead of reforming society

they could slash funding for CCC, WPA, and National Youth Administration (NYA)

Congress had intended for these programs to be permanent to help those Americans

who suffered job discrimination -- even during favorable economic conditions

liberals in the U.S. Senate for example introduced legislation
to broaden coverage provided by Social Security
and another bill to provide comprehensive national health care
but the U.S. House of Representatives often ignored such measures in favor of military spending
With the elimination of many New Deal programs, poverty expanded in the nation
even with rising wages for many Americans
one federal committee reported that twenty million Americans
were on the border of subsistence and starvation
one-quarter of all employed Americans earned less than 64¢ an hour
while skilled workers often earned \$7 or \$8 an hour
demise of the New Deal was especially hard on African Americans, women, and the elderly
many saw this as putting the poor “back in their place”

WAR IN ASIA AND EUROPE CHANGES AMERICA AND AMERICANS

War accelerated the growth of executive power

President Franklin Roosevelt and his advisors, more than Congress,
seemed to drive the nation’s domestic and foreign agenda
furthermore, the U.S. Supreme Court refused to hear cases
that challenged this increase in executive authority

Federal government increased the power of the presidency and the government’s significance
number of civilian employees working for the federal government

rose from one million [1940] to nearly four million [1945]

at the same time, Washington D.C. expenditures grew from \$9 billion to \$98.4 billion

As the federal government continued to cut funding for social programs

composition of government leadership began to change

many idealists in Roosevelt’s “brain trust” became frustrated with cuts of the social safety net
they left their posts in droves

business executives with good managerial skills but little interest in social reform

quickly filled this political vacuum in the administration

Business Week magazine reported cheerfully: **“The war has placed a premium on business talents rather than on ‘brain-trusters’ and theoreticians. Businessmen are moving up in the New Deal Administration and are replacing the New Dealers as they go.”**

Relationship between the military and business rapidly expanded

(although not yet identified as the “Military-Industrial Complex”)

an intimate relationship arose between big business and the military’s expenditures on defense

during the war, the average *daily* expenditure on military contracts was \$250 million

which expanded American industrial capacity almost beyond belief

small companies disappeared as two-thirds of government contracts

went to America’s one hundred largest corporation

World War II helped to solidify the strength of organized labor

and to cement the intimate relationship between big business and big government

so that all three groups exercised power to meet the needs of the war

Big business also entered agriculture establishing “corporate farms” in the place of family farms

although the nation’s farm population declined 17% [between 1940 and 1945]

industry realized that the Army urgently needed of essential war materials and foodstuffs even more than it needed soldiers
better weather, improved fertilizers, adoption of modern farm machinery and scientific farming combined to lead to the consolidation of small farms into large agri-businesses
which actually increased agricultural production in the United States with fewer workers
America developed a more urban, technologically sophisticated society
federal government expanded its role in research and development in a wide variety of projects, from the manufacture of artificial rubber to the construction of the atomic bomb
U.S. also became more urbanized, as the six largest cities gained two million new inhabitants and fifteen million Americans moved from rural areas to the cities

CITY OF VANPORT, OREGON IS AN EXPERIMENT IN SOCIAL DEVELOPMENT

Vanport and East Vanport were home to 40,000 people working at three Kaiser shipyards along the Columbia River in Washington and Oregon
Because Vanport was outside Portland city limits, the Housing Authority of Portland (HAP) created its own informal and unofficial city government
Multnomah County Sheriff's Department provided law enforcement
Social workers set up tenant councils, but HAP limited them to advisory functions
HAP was cautious about a proposal for a community newspaper
it was feared any problems in the community would be accentuated
at the same time, Vanport contained a core of progressive and left-leaning activists who had some success in organizing tenants to seek improvements
J.L. Franzen, former city manager for Oregon City, administered an independent fire district as the second-largest city in Oregon, Vanport had shopping centers, a 150-bed hospital and recreation centers and programs
it also had a 750-seat movie theater that offered three double features movies a week
HAP oversaw creation of a school district that provided classroom instruction and nurseries
twenty-four-hour a day care was provided by the school district
for the children of working parents
day care services came with dinner and breakfast for children aged two to twelve
there also were prepared meals that working women could pick up on their way home from work

HOWEVER, VANPORT IS RACIALLY SEGREGATED

Vanport was the largest public housing project in the nation
it was composed of about forty percent African Americans
Vanport became a site for social innovation and a lightning rod for racial prejudice
establishment of Vanport coincided with an unprecedented influx of African Americans
Oregon had a population of fewer than 1,800 blacks [1940] and more than 15,000 [1946]
most of Oregon black residents lived in Vanport and other segregated housing districts
(Oregon from the time of the pioneers had been influenced by southern immigrants:
•former-Oregon Territory Governor Democrat Joe Lane was presidential candidate
John C. Breckenridge's choice for his vice-president
in the first election against Abraham Lincoln [1860]
talk of forming a Pacific Republic sympathetic to the South centered around Joe Lane;

- Oregon [during the 1920s] had one of the largest and most active chapters of the Ku Klux Klan outside of the Deep South)

Housing Authority of Portland (HAP) never had any explicit policy advocating segregation nonetheless, de facto segregation was the norm

Vanport's black residents found integrated schools but segregated medical facilities

they also faced nasty incidents when the sheriff's office

tried to enforce informal segregation of recreational facilities

because it was claimed that "mixed usage" might lead to trouble

HAP stated that the clearly marked color lines in Vanport and at smaller war-housing projects were the result of free choice among available apartments

but, in fact, tenants were steered to different sections on the basis of race

(Complaints were not raised about the segregation situation in Vanport until [1944])

pressure from Eleanor Roosevelt and others forced HAP to place blacks into "white" areas

however, word of the decision quickly spread

sixty-three white residents signed a petition demanding a reversal of the policy

black-white tensions remained a part of Vanport life

as well as a problem when these residents visited Portland)

TOWN OF McCLEARY, WASHINGTON ESTABLISHES A GOVERNMENT

Community voters approved incorporation and elected a mayor, treasurer and city councilmen

McCleary was incorporated in the state of Washington as a fourth-class city -- January 9, 1943

it covered an area of 1.8 miles and had a population of approximately 1,200

To provide a stable tax-base for the newly incorporated town,

Simpson Logging Company insisted the plywood and door plants be included within city limits

giving the town's treasury an enormous tax boost

since the houses and buildings were in such poor condition,

Simpson arranged with real estate agent Frank Smith to arrange for property ownership

to be transferred to Henry McCleary's former tenants

as soon as they had paid rent for eighteen months

Smith also was given the listings for all vacant properties in town

ALASKA COMMAND BUILDS UP TROOPS TO COUNTER THE JAPANESE OCCUPATION

Although continually restrained by the greater importance and more pressing needs for troops

in the Solomon Islands and New Guinea Campaigns, U.S. Army forces in the Alaska Command

reached 94,000 soldiers -- January 1943

By then an additional thirteen military bases had been built in Alaska -- many in the Aleutian Islands

with an unopposed American Army landing on Amchitka Island -- January 11, 1943

Alaska Command forces were now within fifty miles of Japanese held Kiska Island

GOVERNMENT OF THE TOWN OF McCLEARY, WASHINGTON BEGINS TO FUNCTION

Pride of ownership instilled an incentive in the residents to clean up the town

Simpson repaired McCleary's water supply which had been located within the door plant

a local dam was improved and a new reservoir rose behind it

both the town and the mills were placed on separate chlorinated systems

Grays Harbor County Auditor administered the oaths of office
to the first elected officials of McCleary -- January 12, 1943
(Simpson Logging Company over the next four decades
eventually exhausted its supply of old growth timber
environmental regulations and economics forced the company to close all plants in McCleary
except the door manufacturing operation [1985])

BAD WEATHER IN THE PACIFIC NORTHWEST HAMPERS WAR PRODUCTION

Puget Sound area was hit by a cold snap that produced the worst cold weather in twenty years
war production ceased in the region and stores closed

Snow began falling throughout the Puget Sound area -- January 15, 1943

but for security reasons weather reports in the media were restricted by the U.S. Army
however, The *Seattle Post-Intelligencer* had some fun with the restrictions: “**The**

thermometer

**changed its position more than somewhat Friday night and a lot of restricted military information
fell in the streets of Seattle and vicinity early yesterday morning. The stuff looked like cornflakes,
but for a few more hours, at least, we are not permitted to tell you whether it was cornflakes or not.
We are not even permitted to tell you whether Lawrence C. Fisher, the weather man, reported for
work yesterday morning with his great coat buttoned up to his neck. Mr. Fisher dresses with
considerable caution these days, realizing that the amount and type of his attire may serve to tip off
some skulking foreign agent of the weather possibilities within the forbidden interval.”**

WEATHER CONDITIONS AROUND PUGET SOUND WORSENS

Bad weather took it toll as war plants, including the Boeing Company at Boeing Field and in Renton,
and shipyards in Seattle and Bremerton, ran out of natural gas and lost electric power

Assembly lines ground to a halt and idle workers went home -- January 19, 1943

stores closed early

fire departments were swamped with emergency calls from overheated furnaces and stoves

Seattle City Light and Puget Sound Power & Light reported that snow and ice broke power lines,

Queen Anne Hill, parts of Ballard, and all of the war industries on Harbor Island fell to darkness

entire Puget Sound Power & Light service area east of Lake Washington lost power

cold contracted steel on Seattle's Spokane Street drawbridge leaving it stuck open

trolleys powered by electric lines could not be rerouted

other trolley runs were cancelled because stalled automobiles blocked routes

employees who depended on transit could not get to work,

food could not be delivered to grocery stores and rail service was delayed

WINTER STORMS CONTINUE TO CRIPPLE THE REGION

Seattle schools and those in surrounding districts closed -- January 20, 1943

temperatures fell to six degrees Fahrenheit and snowfall increased -- January 21

high winds added to the discomfort and the University of Washington cancelled classes

ferries were unable to land on Vashon Island marooning residents there

Seattle City Light brought in additional linemen from Spokane to assist in repairs

many linemen worked thirty-six hours straight

no fatalities were reported but eleven youngsters were injured,
one critically, in sledding accidents
(After three days the Army re-imposed its restrictions on weather reporting
which indicated an end to the emergency was in sight [January 23, 1943])

WOMEN NAVY PERSONNEL ARRIVE AT SANDPOINT NAVAL AIR STATION

WAVES (Women Appointed for Voluntary Emergency Service)
served as members of the women's branch of the U.S. Navy
Four officers and seven enlisted women, all graduates of the first training course for women
at Cedar Falls, Iowa arrived at Sand Point -- January 21, 1943
they took up their duties in communications, the control tower, recreation, ship's services
and in the Officer of the Day's office

WAR DEPARTMENT ORGANIZES AN ALL-NISEI MILITARY UNIT

Despite their incarceration, most of the American Japanese remained intensely loyal to the U.S.
Little more than six months after the internment of American Japanese had begun,
U.S. War Department called for 1,500 Nisei (second generation) American Japanese citizens
to volunteer for military service in the Army -- January 28, 1943
original cadre of troops was composed of American Japanese ROTC members from Hawaii
who were formed into the 100th Infantry Battalion

442nd REGIMENTAL COMBAT TEAM COMES INTO BEING

All-volunteer Hawaiian American Japanese 100th Infantry Battalion
was expanded into the 442nd Regimental Combat Team which was activated -- February 1943
this all volunteer American Japanese combat unit became legendary for its heroism
their motto was: "Go For Broke"
Enlisted personnel was composed entirely of Americans of Japanese ancestry
born in the United States
all of the men were citizens of the United States
very few had ever been to Japan and most of them could not speak Japanese

SECRET IN THE WASHINGTON DESERT

Under Secretary of War Robert P. Patterson gave his approval to the Hanford site -- February 9, 1943
\$5 million was allocated for the acquisition of 40,000 acres of land in the area
Federal government secretly appraised and condemned the property within the project area
800 square miles -- more than a third of a million acres
or an area nearly half the size of the state of Rhode Island

GRAND COULEE DAM GENERATES ELECTRICITY AND CONTROVERSY

Grand Coulee Dam's reservoir, Lake Roosevelt, extended up the Columbia to the Canadian border
water storage and regulation agreements with Canada were necessary
Columbia River Treaty, which had been in discussion between the U.S. and Canada,
was seen as the solution
because of World War II power generation was given priority over irrigation

- all of the Columbia River's flow would be necessary to meet the demands of war
 But the generation and distribution of electric power created (and still generates) controversy:
- who should have a right to dictate how water should be stored and released behind the dams;
 - Bonneville Power Administration (BPA) was required by law to give preferential treatment to public systems of municipal light and power plants when selling power;
 - should BPA regulate its power supplies even if its orders are in conflict with the demands of flood control and irrigation?
 - should BPA expand its market to foster rural co-operatives and public utility districts in direct competition with private power companies?
 - should BPA continue research into the development of new industries using electric power and dictate the location of new plants -- with all that this implies to civic planning?
 - with billions of kilowatts of power under its control, should BPA concern itself with management issues or labor policies -- how progressive should these policies be?

WAR MAKES DEMANDS ON WASHINGTON'S SCHOOL SYSTEM²⁸³

World War II could have seen the deterioration of the state education system -- 1943
 Superintendent of Public Instruction Pearl Wanamaker made headlines by opposing (and winning) the argument against war industry demands that high school students be allowed to work full time
 Wanamaker recognized the need to address the wartime demand for training skilled educators teachers were in short supply due to losses to the military
 school districts faced the growing demands of a burgeoning enrollment of war babies this required such stop-gap measures as rehiring retirees and emergency certification of teachers with incomplete degrees
 these necessities led to larger scale re-evaluations and modernization of professional certification requirements and teacher-training
 (Superintendent of Public Instruction Pearl Wanamaker completed these reforms between [1944] and [1948])

EXPERIMENTAL BOEING XB-29 SUPERFORTRESS CRASHES

Veteran Boeing test pilot Edmond T. "Eddie" Allen and a crew of ten technicians and engineers flew the second XB-29 from Boeing Field for a series of routine engine tests twenty minutes into the flight -- late morning February 18, 1943
 Allen radioed that he had an engine fire and was returning to land
 With repairs completed, Allen took the XB-29 aloft for testing when a fire again erupted as the airplane narrowly missed downtown Seattle skyscrapers on its return to Boeing Field, two crewmen bailed out but their chutes could not deploy in time
 Giant XB-29 bomber "pancaked" onto the Frye Packing Plant just short of Boeing Field
 Allen and the remaining eight crewmen aboard were killed
 Fortunately, most Frye employees were on their lunch break when the factory burst into flames
 Army Private Sam Morris, a newly enlisted African American from Florida, was later hailed as a hero for helping to rescue several workers from the conflagration

²⁸³ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

official records reported nineteen workers died on the ground

LOCAL RESIDENTS LIVING AT THE PROPOSED HANFORD SITE ARE MOVED

White Bluffs, Washington on the west side of the Columbia River had a population of about 430 when the Federal government condemned the whole town and bought all of its structures eleven buildings dating back to an [1850] Hudson's Bay Company post were torn down three other building were allowed to remain standing:

- one began as an [1850] cavalry remount station was converted to a blacksmith's shop;
- First Bank of White Bluffs [1909] was a masonry building and difficult to destroy;
- Bruggeman's Warehouse and pump house [1922] was a stone and cement structure

Federal government relocated some 1,500 residents of White Bluffs, Hanford and vicinity as well as Wanapum Indians and other tribes using the area -- by February 23, 1943 this land became part of the site of the Hanford project

BAINBRIDGE ISLAND NEKKEI ARE MOVED TO MINIDOKA, IDAHO

Because of constant conflicts with the internees from Terminal Island in Los Angeles all of the Bainbridge Island, Washington American Japanese residents who were interned at the California Manzanar Relocation Center were transferred to Minidoka, Idaho at their own request -- 1943 Camp Minidoka's peak population reached 9,397 -- March 1, 1943 it became Idaho's third largest city

Last group of 500 evacuees to arrive at the camp

were forced to sleep in mess halls, laundry rooms, or any available bed space waiting in line for many daily functions, especially meals, was common

Minidoka was considered a model environment because of its relatively peaceful atmosphere and a population that got along well with the administration

because it was not within the Western Defense Command restricted area, security was somewhat lighter than at most other internment camps

Agriculture remained an important part of internment life

cropland at Camp Minidoka was increased from 350 acres to 420 acres

also, because of the shortage of farm labor during the war, American Japanese at Minidoka were a valuable labor source for southern Idaho's agricultural-based economy

(during the 1943 harvest 2,400 Minidoka residents worked on farms outside the camp alongside German prisoners of war who lived in their own camps nearby

Minidokans were given credit for saving the 1943 sugar beet crop in western Idaho and they played a critical role in helping Idaho's agricultural industries support of the war effort by doubling their wartime production)

FEDERAL GOVERNMENT EXPANDS THE HANFORD AREA TO BE CONDEMNED

Federal officials held a mass meeting to notify property owners in White Bluffs, Hanford and vicinity that their land was being taken for a government project -- March 6, 1943

residents were given thirty days to move

because of the secrecy surrounding the atomic bomb,

they were told only that the project involved the war effort

Residents organized some protests but eventually complied
however, many challenged the low appraised prices the government set on their property
It was difficult to find new homes and farmland in the area
some of the displaced residents would soon resent the newcomers
who flocked to build the mysterious massive project

REGION NEAR HANFORD AND RICHLAND BECOME PART OF THE SECRET IN THE DESERT

Towns of Hanford and Richland along the banks of the Columbia River had about 300 people in each
another 500 people or so lived in the surrounding vicinity
Town of Hanford was condemned by the Federal government
to make way for the Hanford atomic site
residents were given a thirty day eviction notice -- March 9, 1943
Most buildings were destroyed with the notable exception of the high school
which was used during the war as the construction management office
(it can still be seen on the Hanford tour bus operated by the U.S. government)
During the condemnation process, a dispute arose with farmers over compensation for crops
which had already been planted before the land was acquired
where schedules allowed, the Army allowed the crops to be harvested,
but this was not always possible
(land acquisition process dragged on and was not completed until after the end
of the Manhattan Project [December 1946] but these disputes did not delay work)

UNITED STATES DEFENDS ALASKA'S ALEUTIAN ISLANDS

Imperial Japan planned to send a supply convoy to their foothold on the Aleutian Islands
off the coast of Alaska
When the U.S. discovered the plan using the code-breaking ULTRA device,
it was decided to send a heavy cruiser, a light cruiser and three destroyers
to intercept the Japanese fleet
Japanese convoy was intercepted and combat ensued -- March 27, 1943
because of the remote location of the battle neither fleet had air or submarine assistance
this was one of the few engagements exclusively between surface ships in the Pacific Theater
and one of the last pure gunnery duels in naval history
although superior Japanese fire-power inflicted heavy damage on the American ships
Japan's fleet chose to withdraw without delivering a knockout blow

UNITED MINE WORKERS UNION (UMW) GOES OUT ON STRIKE

Complaints from AFL-CIO union members about being forced to sign no-strike pledges
became louder and more bitter but pledge to the federal government was not abandoned
For much of the war the United Mine Workers Union (UMW) maintained their independence
rather than unify with the American Federation of Labor-Congress of Industrial Organizations
UMW's contract to mine bituminous coal had expired -- spring 1943
UMW President John L. Lewis demanded a pay increase of two dollars a day
with pay to begin when the men entered the mine rather than when they began to work
in defiance of the federal government, Lewis refused to appear at a War Labor Board hearing

to attempt to resolve the issues
UMW miners began a strike
President Franklin Roosevelt seized the bituminous coal mines
he named Interior Secretary Harold Ickes as administrator and the men went back to work

WOMEN'S ARMY AUXILIARY CORPS (WAAC) ARRIVES IN THE PACIFIC NORTHWEST

Women's Army Auxiliary Corps (WAAC) officers and forces were not part of the regular army
women officers could not command male personnel
they received less pay than their male counterparts
they did not receive overseas pay, veterans' medical benefits, or death benefits
African American women who served were trained and maintained in separate platoons
Twenty-five WAACs arrived at Fort Lawton to perform non-combatant duties -- April 1943
they were led by Lieutenant Ida Stoller and Lieutenant Dorine Goldberg
their status in the army caused resentment among the women
as expressed by twenty-two-year-old Auxiliary Specialist (equivalent to Private)

Alma Denham: **"I'm ranked as a cook's helper in the Army, but in civilian life, I was a truck driver. Drove anything they'd give me up to a ten-ton job. I thought the Army would be able to use that experience, so I joined the Army, and what did they do? Instead of assigning me a truck to drive, they assign me as a cook's helper."**²⁸⁴

(Women's Auxiliary Army Corps (WAAC) were brought into the regular army
as the Women's Army Corps (WAC) [July 1943] -- rank and pay disparities were resolved
ultimately, 150,000 women served as WAACs and WACs during World War II)

CONSTRUCTION BEGINS ON MANHATTAN ENGINEER DISTRICT'S HANFORD FACILITY

Construction workers arrived from every state
except from Tennessee where the Oak Ridge Atomic Works were located
all knew they were making a secret weapon -- all were sworn to secrecy
none knew exactly where they were or what the ultimate project was to be
Colonel Franklin T. "Fritz" Matthias directed all of the construction work
he supervised the construction of the places where workers would live
he organized recreational activities like baseball leagues and built auditoriums
so that workers would have something to do when they were not on the job
he made sure that businesses like barber shops, banks, and grocery stores got built
and that other important buildings like schools and churches were constructed
he was in charge of building three nuclear reactors and the many other facilities
needed to make plutonium fuel for atomic bombs
Army Corps of Engineers broke ground for Camp Hanford to house construction workers -- April 6
at the remote, isolated semi-desert Hanford site -- isolation provided for both secrecy and security

CAMP HANFORD HOUSES CONSTRUCTION WORKERS

Hanford construction camp was located along the Columbia River adjacent to the village of Hanford
it started with tents, but eventually there were over 800 barracks, 600 Quonset huts

²⁸⁴ James R. Warren, *The War Years: A Chronology of Washington State in World War II* (Seattle: History Ink, 2000)

and a trailer camp with 4,300 people
an auditorium that could hold 4,000 dancers was built in thirty days
there were eight large, almost identical, mess halls which had no paint inside
and the outside was covered with tar paper
there fifty tons of food was served per meal at a price of sixty-nine cents for all you could eat
Mess Hall #1 could feed 3,456 people at a single setting
fabulous amounts of food was served to the construction workers
an estimated 14,000 gallons of milk and 800,000 eggs were served each day
when turkey was provided, fifteen tons were put on the table at one meal
even though there was plenty of food, the work at Hanford was demanding
normal work week was fifty-four hours during the six day work week
pay was good and overtime was paid after forty hours of work per week

WORK BEGINS ON THE HANFORD ATOMIC PLANT

U.S. Army Corps of Engineers began construction of the massive and top secret
Hanford Engineer Works along the Columbia River in Benton County
Although it was not possible to accurately predict the size and scope of the project -- April 1943
construction of the Metallurgical Laboratory and the first full-sized nuclear reactors began
It was estimated 25,000 workers were needed at the Atomic plant (in fact, a conservative number)
half of whom were expected to live on-site
Weather was often either extremely hot or cold and always dirty and dusty
because so many native plants were being ripped up in the massive construction
sometimes there was so much dust in the air that visibility was less than one hundred yards
large dust storms were called "termination winds"
because of the number of workers that would quit and leave Hanford after each storm

CONSTRUCTION BEGINS ON THE GOVERNMENT CITY OF RICHLAND, WASHINGTON

Colonel Fritz Mathias also supervised construction of a new "government city" at Richland
DuPont laid out a town to house the families of Hanford employees during and after the war
Richland became a gated community of 17,500 people with restricted access
but it looked more like a typical wartime American boomtown than did Oak Ridge, Tennessee
because its military profile was lower
physical security elements like high fences, towers and guard dogs were less evident

MANUFACTURE OF PLUTONIUM REQUIRES VAST AMOUNTS ELECTRICITY AND WATER

Plutonium must be manufactured
vast dependable amounts of electrical power was necessary to refine plutonium
also, atomic reactors required huge quantities of fresh water for cooling
Columbia River and Grand Coulee and Bonneville dams provide all that was necessary

PROCESS TO MANUFACTURE ATOMIC FUEL IS DEVELOPED

Once operational, uranium slugs would be irradiated (exposed to radiation)
by an atomic pile (such as the "B" Reactor) at the Hanford facility
Next the uranium slugs would be dropped into nearby pools of water

these highly-radioactive slugs would be moved from the pools by remote-controlled rail cars to be taken to a storage facility five miles away
After a period of time the radioactive slugs (fuel rods) made their way from the storage area to their final destination at one of the two enormous chemical separation plants where minute amounts of Plutonium-239 were extracted
this became the fuel for an atomic bomb
Producing plutonium from uranium was a complicated and costly experiment to transform uranium to plutonium-239 for an atomic bomb
required an abundance of electric power and water for cooling the reactors
scientists could squeeze a dime-sized pellet of plutonium from two tons of uranium
vast amounts of plutonium were needed to construct a bomb
Hanford atomic plant used the Columbia River's waters for coolant
and the river's energy was transformed into electricity by Bonneville and Grand Coulee dams to drive its three atomic piles and four chemical separation plants

CONSTRUCTION BEGINS ON THE HANFORD ENGINEER WORKS

U.S. Army and its lead contractor, the DuPont Company, began work on three production reactors that produced plutonium fuel rods for the bombs
Colonel Franklin T. "Fritz" Mathias was responsible for the construction of the Atomic works a facility to produce uranium slugs and perform tests
Plans called for three water-cooled atomic piles (nuclear reactors) to be built about six miles apart on the south bank of the Columbia River
these were designated by the letters "B," "D," and "F"
("B" Reactor was the first large-scale plutonium production reactor in the world)
Isotope chemical separation plants, "200-West" and "200-East," were to be constructed in pairs
200-West was comprised of two separation facilities: "T" and "U" units,
200-East complex also was to be composed two separation facilities: "B" and "C"
isotope separation produced successively higher concentrations of the desired radioactive isotope
each stage enriched the product of the previous step further before being sent to the next stage
tailings from each stage were returned to the previous stage for further processing
separation plants 200-West and 200-East were to produce radioactive slugs and perform tests
they were located nearly twenty miles southeast of the three nuclear piles
this was believed to be a safe distance between the separation plants
and production facility

442nd REGIMENTAL COMBAT TEAM RECEIVES TRAINING FOR COMBAT

Men of the 442nd Regimental Combat Team trained for combat -- May 1943 [through February 1944]
442nd members excelled at maneuvers and learned to operate as a team
Family members of many of these soldiers remained in the internment camps that they themselves had just left
approximately 1,000 internees from Minidoka enlisted in the military
Nisei soldiers from the Puget Sound area earned one of the very best military service records for gallantry and bravery of any ethnic group in the nation

CASE OF GORDON HIRABAYASHI REACHES THE U.S. SUPREME COURT

Gordon Hirabayashi's refusal to follow the Army's orders to report to an internment camp was argued before the U.S. Supreme Court -- May 1943
in a unanimous ruling reported the next month, the justices denied his appeal after the solicitor general argued successfully that incarceration of 120,000 American Japanese was a "military necessity" in an opinion written by Justice William O. Douglas (which he later publicly regretted) he noted:
"We cannot sit in judgment of the military requirements of that hour."²⁸⁵
Gordon Hirabayashi, who had been released from jail pending the outcome of the appeal process, was ordered back to prison to complete his sentence
(In one of several historic American Japanese internment cases brought in the [1980s], Hirabayashi challenged these decisions in [1986] and [1987], his exclusion and curfew convictions were overturned)

UNITED STATES PREPARES TO RETAKE THE ALASKAN ISLANDS

With Imperial Japan's supply lines to the Aleutian Islands severed
U.S. naval commanders decided to recapture the Aleutian Islands
in an attempt to expel occupying Japanese forces
Battleships *Pennsylvania* and *Idaho* began bombarding Attu's Chichagof Harbor -- May 11, 1943
U.S. troops were landed at three places on the island shore at the same time
Difficulties hampered the operation
Japanese troops controlled the ridges and the valley passes
those American troops available for an assault were inadequately equipped for northern warfare
their lightweight clothing was inappropriate for the environment
they had no previous combat experience
to make matters worse, the army and navy had not coordinated their attack plans
by the time the details were resolved and the operation was launched
Japanese occupiers were expecting them

ATTU ISLAND IS RETAKEN BY AMERICAN FORCES

An intense twenty-day battle of almost constant fighting brought heavy casualties to both the Japanese and American forces
American dead numbered 549
casualties, half from frostbite or other cold related injuries, totaled more than 3,000
Imperial Japan abandoned Attu Island in the Aleutians -- May 30, 1943
by the battle's end, nearly all 2,351 members of the Japanese garrison had been killed
a few of the survivors committed suicide rather than be captured

"ROSIE THE RIVETER" BECOMES A NATIONAL HERO

(During the World War II effort women made up 36% of the nation's total workforce [1945]
although women took on male dominated trades

²⁸⁵ Roger Daniels, *Asian America: Chinese and Japanese in the United States since 1850*, P. 276.

they were expected to return to their everyday housework once men returned from the war
“Rosie the Riveter” the title of a [1942] song that celebrated her effort and good work
popular big band leader Kay Kyser made it a national hit

Westinghouse Company’s War Production Coordinating Committee to create a series of posters
to inspire workers in the war effort [1942]

one of these posters became the famous “We Can Do It!” poster of artist J. Howard Miller
showing a young woman in work clothes operating a lathe in a factory)

Artist Norman Rockwell’s image of “Rosie the Riveter” received mass distribution
on the cover of the *Saturday Evening Post* -- May 29, 1943

Rockwell’s illustration features a brawny woman named “Rosie” taking her lunch break
with a rivet gun on her lap and beneath her boot a copy of Hitler’s manifesto, *Mein Kampf*

“Rosie the Riveter” inspired a social movement that increased the number of working women
although the image of “Rosie the Riveter” reflected the industrial work of welders and riveters

most working the women filled non-factory positions in every sector of the economy

collective experiences of these women proved to themselves and to the nation

that they could do a “man’s job” -- and could do it well

white and black women working side by side encouraged a breaking down of social barriers
and a healthy recognition of diversity

(African Americans were able to lay the groundwork for the postwar civil rights revolution
by equating segregation with Nazi white supremacist ideology)

Conditions were sometimes harsh and pay was not always equal

men averaged \$54.65 per week in a wartime plant -- women about \$31.50

even so, women quickly responded to “Rosie the Riveter” who convinced them

they had a patriotic duty to enter the workforce

Rosie the Riveter/World War II Home Front National Historical Park was dedicated

on the site of one of the Kaiser shipyards in Richmond, California [October 25, 2000]

although a fictional character, “Rosie the Riveter” continues to serve as a national inspiration

BOEING COMPANY BRINGS IN WOMEN PRODUCTION WORKERS

Women arrived in Seattle from all over the United States

to help Boeing build airplanes for the war effort -- June 1943

While training for their jobs the workers lived in temporary housing

in the Denny Regrade area of Seattle

these barracks were built by the Federal Housing Administration

Well trained and highly skilled women production workers joined the forces of “Rosie the Riveter”

WAR EFFORT DEMANDS LABOR UNIONS CHANGE THEIR ORGANIZATION

Encouraged by the federal government, all of the major labor unions grew stronger during the war
pressure was put on employers to recognize unions to avoid the turbulent struggles

that had erupted over labor recognition in the [1930s]

Unions were generally able to obtain union job security through negotiation and arbitration

workers also won added benefits, such as vacation pay

which had been available to only to a few workers in the past

at the same time the wage gap between higher skilled and less skilled workers narrowed

Bargaining on a national basis while restraining local unions from striking
tended to enlarge the bureaucracy of the Congress of Industrial Organizations (CIO) unions
some, unions such as the United Steelworkers, had maintained centralized organizations
in which authority for major decisions resided at the top
by contrast, the United Auto Workers (UAW) had always been a grassroots organization
but under the guidance of the federal government during the war years
UAW attempted to rein in its maverick local leaderships
CIO had to confront deep racial divides within its membership
particularly in the UAW plants in Detroit where white workers sometimes struck
to protest the promotion of black workers to production jobs
also, shipyards in Alabama, mass transit unions in Philadelphia and steel plants in Baltimore
experienced adverse race relations
CIO leadership in more racially tolerant unions such as the Packinghouse Workers,
National Maritime Union (NMU), Transportation Workers
and the United Auto Workers (UAW) even in Detroit undertook serious efforts
to suppress hate strikes and to educate their membership
CIO leaders continued to support the Roosevelt Administration's tentative efforts to remedy
racial discrimination in war industries through the Fair Employment Practices Commission
reform minded CIO union leaders contrasted their relatively bold attack on racial problems
with the timidity and racism still existing in the American Federation of Labor (AFL)
CIO unions also were more progressive in dealing with gender discrimination in wartime industry,
where many more women workers were being employed in nontraditional jobs
unions that represented large numbers of women workers before the war
maintained a fairly good record of fighting discrimination against women
it was important that the wages of these women be kept high
so that returning veterans would get high wages
but still, most union leaders saw women only as temporary wartime replacements
for men in the military

UNITED MINE WORKERS UNION (UMW) CALLS FOR ANOTHER STRIKE

Negotiations with Interior Secretary Harold Ickes, acting administrator of bituminous coal mines,
resulted in failure and no agreement could be reached
UMW President John L. Lewis resumed the coal miners' strike
but this time it was against the federal government -- June 11, 1943
there was great public outrage against Lewis and the striking coal miners
When the federal War Labor Board ordered Lewis sign the proposed contract
Lewis called it a "yellow dog" contract and refused to sign -- but the men returned to work
President Franklin Roosevelt threatened to draft the miners into the Army if they struck again

CONGRESS PUNISHES LABOR UNIONS

As a result of the on again-off again United Mines Workers (UMW) strike led by John L. Lewis
Congress passed the War Labor Disputes (Smith-Connally) Act
this authorized the President to take over factories needed for the war effort
or plants where war production had ceased because of a labor dispute

HANFORD ATOMIC WORKS IS LARGER THAN THE OAK RIDGE, TENNESSEE FACILITY

DuPont saw the need for two primary projects to be developed at Hanford
four separation facilities in which plutonium was extracted
one atomic plant to house two atomic piles (nuclear reactors)
Labor shortages and lack of final blueprints at Hanford forced DuPont
stop work on the chemical separation facilities -- progress was limited
to digging two huge holes in the ground --1943
work force concentrated its efforts -- summer 1943
on making preparations to construct the 100-B pile (atomic reactor)

POPULATION OF HANFORD BOOMS

Construction workers built more than 500 structures including three atomic reactors, laboratories,
chemical separation buildings, fuel fabrication facilities, administrative offices
and underground storage tanks to hold radioactive waste
workers constructed 386 miles of vehicle road, 158 miles of railroad, fifty miles of power lines,
four electric substations and hundreds of miles of fencing
an extensive guard and patrol system was maintained at the work site
passes were required and identification badges must be worn by everyone
Hanford boomed to 41,269 construction workers residing there -- July 1943
city's only bank had twenty-three windows just for Friday pay checks;
Hanford operated a fleet of over 900 buses (more than the city of Chicago)
that carried workers between their housing and the construction sites;
Hanford general delivery post office was the largest in the world
(Eventually, 51,000 people lived in the construction camp making it the state's fourth-largest city
39,000 workers lived in barracks and another 12,000 occupied tent-trailers)
during the two year building effort almost 140,000 people worked on the Atomic Project
and created the urban area of Tri-Cities
only a handful of those involved in construction could guess the deadly purpose of their worksite)

U.S. ARMY INVADES KISKA ISLAND IN ALASKA'S ALUETIAN ISLANDS

Once Attu Island was recovered from the Japanese, the recapture of Kiska Island began
day after day American airplanes bombed the island
An Allied landing force of 34,436, including 5,300 Canadians, massed for an invasion
this invasion force landed only to find the island abandoned except for one small dog
Japanese had decided that their position in Kiska Island was vulnerable after the fall of Attu
their troops had successfully been removed under the cover of fog
as the last Japanese foothold in the Western hemisphere was abandoned
Army Air Force had bombed the deserted positions for almost three weeks
Allied casualties during the operation nevertheless numbered 313
these casualties were the result of booby traps set out by the Japanese, disease, or frostbite
in the unopposed landing twenty-four Americans and Canadians,
who mistook one another for the enemy, were killed by friendly fire
(Aleutian Islands were fortified and bases were manned by Americans)

bombing raids were made on Japan's Kurile Islands from Aleutian Islands' airfields until the end of the war)

CONSTRUCTION BEGINS ON THE HANFORD ENGINEER WORKS COOLING PLANTS

Ground breaking for the water-cooling plant for the 100-B pile (atomic reactor) began -- August 27 (less than two weeks before Italy's surrender to the Allies) of the three water-cooling plants constructed at Hanford this one was the westernmost²⁸⁶

JULIUS ROBERT OPPENHEIMER IS SELECTED TO HEAD THE SECRET WEAPONS LAB

General Leslie Groves selected J. Robert Oppenheimer to head Manhattan Engineer District's secret weapons laboratory at Los Alamos, New Mexico -- September 1943

Groves' choice came as a surprise to many

Oppenheimer was not known to be politically aligned

with the conservative military establishment

nor was he thought to be an efficient leader of large projects

even Groves was concerned about the fact that Oppenheimer did not have a Nobel Prize

thus he well might not have the prestige necessary to direct his fellow scientists

However, General Groves was impressed by Oppenheimer's grasp of the practical aspects

such as designing and constructing an atomic bomb -- and by the breadth of his knowledge

his training as a military engineer would be vital in the interdisciplinary project

that would involve physics, chemistry, metallurgy, ordnance and engineering

Groves also detected in Oppenheimer a driving ambition

that would be necessary to push the project to a successful conclusion

Formulas for refining uranium and putting together a working atomic bomb

were created by some of the greatest minds of the time

chief among the people who unleashed the power of the atom was J. Robert Oppenheimer

who oversaw the project from conception to completion

J. ROBERT OPPENHEIMER LEADS AMERICA'S SECRET WEAPONS LABORATORY

Born in New York City [April 22, 1904] to wealthy Jewish textile importer Julius S. Oppenheimer, and painter Ella (Friedman) Oppenheimer

Robert was raised in New York in an area known for luxurious mansions and town houses

He majored in chemistry at Harvard University but was also required by the university to study

history, literature, and philosophy or mathematics to earn his Bachelor's Degree

this tall, thin chain smoker was plagued throughout his life by periods of depression

he often neglected to eat during periods of intense thought and concentration

Robert graduated as a member of the Phi Beta Kappa honor society

he entered graduate school in chemistry but he was drawn to experimental physics

he earned his Doctor of Philosophy degree graduating *summa cum laude* at age 23 [March 1927]

Robert Oppenheimer studied with several leading physicists in Europe

where he published more than a dozen papers in the new field of quantum mechanics

he accepted an associate professorship from the University of California, Berkeley

²⁸⁶ www.atomicheritage.org

Like many young intellectuals [in the 1930s], he was a supporter of social reform
however, he never openly joined the Communist Party ,but he did give money to liberal causes
by way of acquaintances who were alleged to be Party members
When he joined the Manhattan Project in 1942, he wrote on his personal security questionnaire
he was **“a member of just about every Communist Front organization on the West Coast”**
(when questioned about this later he said it was a joking overstatement)

JOHN L. LEWIS' UNITED MINE WORKERS (UMW) GOES BACK ON STRIKE

Dispute over a two dollar a day pay increase with pay beginning when the men entered the mines
continued to be unresolved as both the miners and federal government refused to budge
With no labor agreement in place, half a million bituminous coal miners led by John L. Lewis
once again walked off the job -- October 22, 1943
again defying the government, outraging public opinion
and strengthening the hand of anti-union Congressmen
this strike closed down steel mills for two weeks during the height of the war
lack of coal led to power shortages which threatened to cripple the war effort
Federal officials called the strike illegal and ordered the miners back to work
only 15,000 workers returned
Newspapers condemned the miners as traitors
public opinion was extremely angry -- they demanded new, tough anti-union laws
President Roosevelt, a traditional ally of labor, felt he had no choice but to seize the mines
he once again placed Interior Secretary Harold Ickes in charge
Newspapers condemned the miners as traitors
these strikes and threats of strikes made mine leader John L. Lewis a much hated man
and led to legislation hostile to unions

UNITED MINE WORKERS (UMW) RETURN TO WORK

United Mine Workers (UMW) ended their successful twelve-day strike -- November 3, 1943
miners won an increase of a dollar and a half a day
but it was to be taken in the form of fringe benefits and a shorter lunch period
rather than as a direct wage increase in wages

MOSES LAKE, WASHINGTON IS HOME TO AN AIR FORCE BASE

Moses Lake Army Air Base was activated -- November 24, 1942
as a temporary World War II training center
482nd Fighter Squadron conducted twin-engine P-38 Lightning fighter training here
396th Bombardment Group became a second unit to train at the base
when heavy bomber training for the B-17 Flying Fortress was undertaken
for the 592nd, 593rd, 594th and 595th Bombardment Squadrons
(Moses Lake Army Air Base was renamed Larson Air Force Base [May 1950]
in honor of Yakima native Major Donald A. Larson who had flown fifty-seven missions
over Germany in his P-47 Thunderbolt fighter he had dubbed *Mary Queen of Scotts*
shot down and killed, he is buried in the Ardennes American Cemetery, Belgium)

USS WASHINGTON, BB-56, RETURNS TO COMBAT

USS *Washington* left Pearl Harbor in support of the aircraft carrier USS *Yorktown* -- November 1943 as the carrier attacked the Gilbert and Marshall Islands [November 1943-February 1944]
USS *Washington* provided support for the American invasion of Makin Island -- November 26, 1943 (next she bombarded the Japanese-held island of Nauru [December 8]
they she bombarded the Kwajalein Atoll, Marshall Islands
in preparation for an American invasion [January 30, 1944])

CHINESE EXCLUSION ACT IS REPEALED

(Chinese Exclusion Act had passed Congress [May 6, 1882] and had remained in effect
its purpose was to exclude Chinese immigration to the United States
all Chinese laborers who came in after [November 17, 1880] were to be deported
all the Chinese in the U.S. before that date were registered and given certificates
recording their names, age, occupation, physical markings on their bodies and more)
Chinese Exclusion Repeal Act (also known as the Magnuson Act) is signed -- December 17, 1943
this legislation sponsored by Washington State Representative Warren G. Magnuson
permitted Chinese immigration to the United States for the first time since [1882]
Chinese people already in the U.S. could become citizens
for the first time since the Naturalization Act of [1790]
this act also opened the door to [1946] legislation admitting Filipino and Indian immigration
(Throughout his thirty-six-year career in Congress, Warren Magnuson championed
improved relations with China regardless of the political party in power
impact of the Magnuson Act continues to be far-reaching
Chinese Americans entered into professions traditionally closed to them
medicine, engineering and corporate business
Wing Luke was elected to the Seattle City Council [1962]
becoming the first Chinese American on the U.S. mainland to hold such a post
Ruby Chow became the first Asian American elected to the King County Council [1974]
many Washingtonians of Asian descent occupy leading roles in politics, business and academia
including Gary Locke, the first Chinese American state governor in the United States
first Chinese American to hold a U.S. Cabinet seat, Secretary of Commerce [2009]
first Chinese American to serve as an Ambassador to a foreign nation: China [2011])

U.S. NAVAL TORPEDO STATION AT KEYPORT, WASHINGTON DEVELOPS NEW WEAPONS

Torpedoes began changing in the 1940's, demanding newer and more refined methods of testing
studies which eventually resulted in an acoustic range on Hood Canal were begun -- January 1944
(Applied Physics Laboratory of the University of Washington
became associated with Keyport [1944])
this partnership resulted in eventual development and operation of the 3D Tracking Range
on Dabob Bay not far from the Hood Canal Range²⁸⁷

HANFORD GROWS INTO A CITY

²⁸⁷ Lisa Poole with Dianne Robinson, *Torpedo Town U.S.A.*, P. 51.

Tarpaper metropolis numbered 51,000 rough and ready inhabitants
some 13,500 of these people lived in trailers
There was not much recreation available for workers
at the time, under Washington law a person must be seated to be served liquor
beer joints were so popular men sold their seats at high prices to late arrivers
workers drank more beer in eight hours than Seattle (eight times as big) consumed in a day
betting was a major pastime although this not always a skilled effort
men with easy money to wager bet \$10 or \$20 on which of two flies would move first

CHEMICAL SEPARATION OF PLUTONIUM IS UNDERTAKEN²⁸⁸

DuPont began work on four separation facilities in which plutonium was to be extracted -- early 1944

- 200-West separation facility contained two plants designated Plants “T” and “U”
- 200-East separation facility was to contain Plants “B” and “C”
where Uranium-238 was converted into U-235

these would be located approximately ten miles south of the atomic reactors
as this was believed to be a safe distance in the event of a disaster

These separation facilities at Hanford were massive scaled-up versions
of the works previously constructed at the Oak Ridge, Tennessee facility
both atomic plants contained separation and concentration buildings
ventilation systems were provided to eliminate radioactive and poisonous gases
both facilities also contained waste storage areas

USS WASHINGTON, BB-56, SUFFERS COLLISION DAMAGE

While maneuvering in the darkness USS *Washington* collided with the USS *Indiana*
after that battleship’s captain made a navigational error
both ships were significantly damaged
Washington’s bow suffering sixty feet of crumpled plating -- February 11, 1944
USS *Washington* headed back to Pearl Harbor for temporary repairs
then continued on to the Puget Sound Naval Ship Yard at Bremerton, Washington

UNITED STATES BUREAU OF RECLAMATION EXPANDS BEYOND IRRIGATION

Yakima irrigation system served 412,000 acres which included six reservoirs -- 1944
this change from semi-arid land to irrigated farmland represented much more
than capitalization, specialization, intensification, productivity, and variety
it also represents cities where desert once existed, trade, income and productive life styles

Dams on the Columbia River and its tributaries provide multi-services:
hydroelectric power, reclamation of desert land, flood control, improved navigation
and wild-life refuges for recreational use

BONNEVILLE POWER ADMINISTRATION INCREASES PRODUCTION

Six of the proposed eighteen generators at Grand Coulee Dam had been installed -- February 1944
To increase output in an effort to meet war needs

²⁸⁸ Atomic Heritage Foundation: www.atomicheritage.org.

Grand Coulee and Bonneville dams combined to generate two and half time the power possible by Bonneville Power Administration alone
overall efficiency of all units was also increased

WORK ON THE HANFORD ATOMIC PILE (REACTOR) BEGINS²⁸⁹

Work on atomic pile 100-B (the nuclear reactor) itself began -- February 1944
where enriched Uranium-235 was to be placed and the controlled chain reaction was to occur
plutonium-239, highly enriched uranium, was a by-product of the chain reaction
more plutonium-239 is produced than can be used in the chain reaction
this excess could be used as a new fuel source or must be stored in safe keeping
producing plutonium-239 in useful quantities for the first time
was a major part of the Manhattan Project
(disposal of plutonium waste from nuclear power plants and dismantled nuclear weapons
is a nuclear-proliferation and environmental concern to this day)
(Base of the nuclear reactor and its shield were completed [mid-May]
it took another month to place the graphite pile
and install the top shield on pile 100-B [mid-June 1944])

HANFORD CONSTRUCTION PROJECTS ARE ENORMOUS

Separation facilities and the nuclear pile at the Hanford Engineering Works
consumed an incredible amount of materials:

- 221 carloads of stainless steel;
- 748,000 cubic yards of concrete was poured;
- 160 million board feet of lumber were used;
- 8,000 pieces of construction equipment was employed

construction went on amid official secrecy but thousands of men and women
and countless train loads of equipment could not just disappear
into the wastes of Eastern Washington without being noticed
Federal officials asked newspaper publishers and radio stations to voluntarily censor the work
members of the media generally complied,
although some references to the massive project were published
local and state officials were not given information about the huge complex being constructed
even most federal officials did not know about the plutonium production project
(only after the first atomic bomb dropped on Japan did local residents
and people around the world learn something of the work being done at Hanford,
as the U.S. government released the first official account of the Manhattan Project)
Total construction cost of the Hanford facility was \$230 million

MINIDOKA INTERNMENT CAMP BECOMES A FARMING RESOURCE

Farmland at Minidoka grew to about 740 acres -- 1944
in addition to providing food for American Japanese residents,
this camp was able to feed some of the other camps as well

²⁸ www.atomicheritage.org

growing plots were divided by use
several varieties of vegetables, including potatoes, beans and onions
were grown in the fields just outside of the fenced residential areas
alfalfa, clover, barley and oats also were grown
to the east of the fenced area were cattle, hog and chicken farms
(Also, by the time the assembly center period ended [1945], nearly 1,600 hard-working volunteers
from half a dozen centers worked the sugar beet fields of the American West)

STATE PROGRAM TO TAKE JAPANESE AMERICAN PROPERTY

Plans to transfer titles of real property owned by Japanese were drawn up -- 1944
procedures to take their land was conducted through law suits
directed by the State Attorney General who acted in cooperation with the state's counties
this plan was legal because the State Constitution prohibited aliens from owning land
except under certain specific conditions
Proceeds from the sale of Japanese land went into the school fund

POLITICAL AGENDA IN WASHINGTON, D.C. CHANGESE AS THE WAR PROGRESSES

Washington State's Homer T. Bone faced another election to the U.S. Senate
he had broken his hip [1939] and at age 61 had lost some of his fire
he was considering retirement and returning to Tacoma to practice law
President Franklin D. Roosevelt, in spite of earlier political clashes between the two men,
nominated Senator Bone to the West Coast's Ninth Circuit Court of Appeals -- April 1, 1944
U.S. Senate unanimously approved the nomination the same day
However, Senator Bone delayed resigning from the U.S. Senate
to prevent Republican governor Arthur B. Langlie from appointing a Republican to the seat
Bone's heir-apparent was popular, four-term U.S. Representative Warren G. Magnuson

MINIDOKA INMATES MAINTAIN SOME RESENTMENT TOWARD THEIR CAPTORS

When the War Department reopened the draft [January 1944]
it seemed that Minidokans would provide little resistance -- but tensions were already on the rise
Resentment over the draft hit a climax -- April 1944
six of the fifty-seven internees called for induction into the Army did not show up
these six were arrested and taken to Boise
they were put in the Ada County Jail to await their trials

OAK RIDGE TENNESSEE PRODUCTION PLANTS BEGIN OPERATION

Under authority of the U.S. Army Corps of Engineers' Manhattan Engineer District
buildings K-25, S-50, and Y-12 plants were each built to separate U-235 from the natural U-238
X-10 site was established as a pilot plant
for production of plutonium-239 using a Graphite Reactor
only a very limited amount of plutonium-239 was anticipated
During the construction of magnets necessary for the separation process, a shortage of copper
forced Manhattan Engineer District to borrow 14,700 tons of silver bullion
from the U.S. Treasury to be used as a substitute for electrical conductors

for the electromagnet coils
an appalled Director of the Treasury attempted to explain
that silver was measured in Troy ounces; not tons -- the delivery was made anyway

ALL-JAPANESE AMERICAN 442nd REGIMENTAL COMBAT TEAM IS READY FOR COMBAT
(Chief of Staff of the U.S. Army General George Marshall inspected the regiment [March 1944]
442nd packed up [April] and the men boarded ships destined for Europe -- May 1, 1944
442nd Regimental Combat Team was a self-sufficient fighting force
they fought with uncommon distinction in Italy, southern France and Germany

BOEING B-29 "SUPERFORTRESS" GOES INTO SERVICE FOR THE UNITED STATES

Boeing's B-29 was a very advanced bomber for the time
it included features such as a pressurized cabin, an electronic fire-control system
and remote-controlled machine-gun turrets
Although the B-29 was designed as a high-altitude daytime bomber
it actually flew more low-altitude nighttime incendiary bombing missions
(this was the primary aircraft in the American firebombing campaign
against the Empire of Japan in the final months of World War II
it also carried the atomic bombs that destroyed Hiroshima and Nagasaki)
Eventually, the U.S. government spent \$3 Billion building B-29s
B-29 project required almost unprecedented organizational efforts
by the U.S. Army Air Forces, several major private contractors and labor unions
hundreds of thousands of workers labored in four major factories to produce the airplane

AMERICAN AIRCRAFT PRODUCTION IS THE SINGLE LARGEST FINANCIAL WAR COST

More than \$45 billion was spent -- almost a quarter of the \$183 billion spent on war production
a staggering two million workers produced over 125,000 aircraft
(Unlike many other World War II-era bombers, long after the war ended B-29s remained in service
as they were deployed during the Korean War
and performed various roles throughout the [1950s]
B-29s would not be retired from service until [June 21, 1960])

BOEING EXPANDS TO MEET THE NATION'S NEEDS

In addition to the original manufacturing Plant 1 in Seattle
additional production facilities were constructed in Renton, Bellingham, Chehalis, Aberdeen,
two in Tacoma, and a second plant in Seattle
50,000 people produced \$600 million worth of airplanes -- 1944
this was ten times the value of all of the Seattle industry in [1939]
Boeing was always striving to improve its product
it had developed a retractable landing gear, voice radio communication to the ground,
automatic pilot, and de-icing equipment to name only a few innovations

D-DAY -- THE INVASION OF EUROPE BY ALLIED TROOPS BEGINS

D-Day was originally scheduled for [June 5] but the weather did not cooperate

this invasion was pushed back to June 6, 1944.

D-Day invasion involved 5,000 ships carrying men and vehicles across the English Channel as well as 800 airplanes that dropped over 13,000 men on parachutes another 300 planes dropped bombs on German troops defending the beaches over 100,000 Allied troops made it to shore that day

Most difficult landing of D-Day was at Omaha beach which had been assigned to American troops navigation problems resulted in many men drowning before they reached land Omaha Beach also had the largest number of German troops and the fighting was fierce (it is Omaha Beach battle that is reenacted in the opening of the movie *Saving Private Ryan*) Success of D-Day was a death knell for the Germans.

Adolf Hitler was forced to fight a two-front war against the Russians on the East and the Americans, British, Canadians, and French underground on the West (within a year, Hitler committed suicide, and the war in Europe was over)

USS WASHINGTON, BB-56, RETURNS ONCE AGAIN TO COMBAT

After significant repair work at Puget Sound Naval Shipyard, Bremerton

USS *Washington* returned to the Pacific Theater -- June 1944

With the occupation of the Gilbert and Marshall Islands [early 1944],

Americans focused their attention in their “island-hopping” campaign in the Central Pacific on the Mariana Islands whose airfields were within bomber range of Japan

USS *Washington* bombarded Japanese positions on Saipan and Tinian -- June 13, 1944

BB-56 shelled Saipan again in preparation for the U.S. landing on the island -- June 15

Washington and the rest of the American fleet faced a massive aerial attack from the Japanese during the Battle of the Philippine Sea -- June 19

Japan launched nearly 400 planes in what became known as the “Marianas Turkey Shoot,”

USS *Washington* BB-56 escaped unscathed

SERVICEMEN’S READJUSTMENT ACT (G.I. BILL) PASSES CONGRESS

G.I. Bill, as it was commonly referred to, passed Congress -- June 22, 1944

this law was created to prevent a repetition of the “Bonus March”

conducted by World War I Veterans [1932]

and a relapse into the Great Depression after World War II ended

This was an omnibus bill that provided free college or vocational education

for returning men and women World War II veterans commonly referred to as G.I.s

in addition one year of unemployment compensation was guaranteed

one provision of the G.I. Bill was the “52–20 clause” that provided all former service personnel \$20 a week for 52 weeks a year while they looked for work

less than twenty percent of the money was distributed

as most returning servicemen quickly found jobs or pursued higher education

G.I. Bill also provided many different types of loans for returning veterans to buy homes and start businesses

including zero down payment and low interest rates for home loans for servicemen

millions of American families could move out of urban apartments

and into suburban homes previously owned only by the wealthy and upper class

(Since the original act, the term has come to include other veteran benefit programs created to assist veterans of subsequent wars as well as peacetime service)

WORK ON THE HANFORD ATOMIC PROJECT IS PROGRESSING

Pile 100-B was almost complete as was the first chemical separation plant (“T” unit) -- July 1944
(two more months would be required to wire and pipe the nuclear pile [August-September]
and to connect it to the various monitoring and remote control devices)

“Pile D” was at the halfway point -- July 1944

“Pile F” was not yet under construction

SECRET WEAPONS LAB OPENS AT LOS ALAMOS, NEW MEXICO

Dr. J. Robert Oppenheimer, head of the team of nuclear scientists conducting atomic experiments,
moved his operation to Los Alamos, New Mexico -- August 1944

Dr. Enrico Fermi became chief of the physics department

Manhattan Project's goal was to build an atomic bomb

PRESIDENT ROOSEVELT SPEAKS TO THE NATION BY RADIO FROM BREMERSON

While campaigning for his fourth term President Franklin Roosevelt made his second visit
to the Puget Sound Naval Base in Bremerton, Washington -- August 12, 1944
where he addressed workers and a nationwide radio audience

For more than a year the president had delivered his speeches while seated
because of his polio-weakened legs

On this occasion FDR decided to speak standing up, to dispel rumors of his failing health
unfortunately, in the year since he had last used his leg braces, FDR had lost considerable weight
as a result, his braces no longer fit him and gave him little or no support at the podium

FDR compensated by using his arms for support

although this strained his arms and required a tremendous amount of effort

during his speech the president appeared tired and drawn

by the time the 35-minute speech ended, FDR was having severe pain radiating to both shoulders

It was feared the president had sustained a heart attack

an electrocardiogram and white blood cell count, made within an hour of the event,

it showed “No unusual abnormalities”

RIOT TAKES PLACE AT FORT LAWTON, SEATTLE

Fort Lawton was used as a Prisoner of War (POW) camp to house
more than 1,000 German POWs

and approximately 5,000 Italian POWs en route to Hawaii for imprisonment

An African American company stationed at Fort Lawton had just received orders -- August 14, 1944
to ship out to the war zone the next morning

an intoxicated black soldier and three companions crossed paths with three Italian POWs
who may have also been drinking -- just after 11 p.m.

words were exchanged and a black soldier rushed forward

with one punch an Italian knocked the American out cold

as the POWs retreated to their barracks, the word went out among the American troops

about the confrontation
Several black soldiers, including Private Samuel Snow, ran after the Italians
swinging boards from a fence they had broken down
Italians, who were in their bunks for the night, heard rocks and bricks
being thrown against the windows of their dark quarters
they assumed they were being attacked and began running -- some jumping out of windows
in the melee, both Italians and United States soldiers were injured
Hearing the commotion, dozens of black soldiers came out of their barracks
responding to a “whistle” calling them to defend their fellow soldiers
untrue rumors began to circulate that one American was dead
assuming they were being attacked by the Italian POWs, dozens of black soldiers
armed with rocks, fence posts and a couple of knives headed into the Italian area
Caucasian Military Police Officer Private Clyde Lomax was responsible for patrolling the area
he was on the scene almost immediately
Lomax loaded the most severely injured American soldier into his jeep
after a delay, Private Lomax transported the injured soldier to the post’s most remote hospital
Private Clyde Lomax had disappeared for at least two hours
Lomax also failed to request back up from fellow military policemen
or to notify the chain of command of the severity of the situation
More than forty minutes passed before a contingent of military policemen arrived
but by then dozens of men had been injured
most seriously injured, all of them Italian prisoners-of-war, were transported to hospitals
one Italian spent sixteen months recovering from his injuries
military policemen restored order, but chose not to take any of the soldiers into custody
(they later claimed it had been too dark to identify any of the participants in the riot)

BODY OF POW GUGLIELMO OLIVOTTO IS DISCOVERED AT FORT LAWTON

Private Clyde Lomax accompanied by a black military policeman drove his jeep
to a distant gully at the base of Fort Lawton’s Magnolia Bluffs -- 5:00 a.m. August 15
there the body of Italian POW Guglielmo Olivotto was discovered
hanging by a noose on the obstacle course
By sunset on the day Olivotto’s body was discovered
Fort Lawton commanding officer Colonel Harry Branson had ordered all evidence destroyed
no fingerprints were secured, no footprints saved, no weapons were properly catalogued
when Branson tried to ship the black soldiers to San Francisco that same day,
he was countermanded after a subordinate reported his attempt to the Pentagon
When reports of the riot and lynching reached the Pentagon, General Elliot Cooke was sent to Seattle
he was charged with determining who, if anyone, had failed to prevent the riot and lynching
in a classified report to Inspector General Virgil L. Peterson, General Cooke concluded
that the Fort Lawton commander had botched the initial criminal investigation,
he recommended Colonel Harry Branson’s demotion and/or reassignment
Cooke characterized Private Lomax as a “coward” and ordered that he be court-martialed
for abandoning his post during the riot and lynching

LYNCHING AT FORT LAWTON REMAINS IN THE NEWS

Riot and lynching was front page news in Seattle, and became a major story across the United States newspaper accounts in the coming days attributed the riot to the resentment of the black soldiers toward the Italian Prisoners of War due to their seemingly lenient and congenial treatment these stories were based on hearsay gathered in a bar days later and on similar dubious sources United States Army sent its best young prosecutor, Lieutenant-Colonel Leon Jaworski to conduct an investigation which lasted two months (Jaworski eventually distinguish himself as one of the century's best-known American lawyers culminating in his appointment as special prosecutor in the investigation of the Watergate scandal and the winning litigant in United States v. Nixon)

LEON JAWORSKI CONDUCTS AN INVESTIGATION OF EVENTS AT FORT LAWTON

General Elliot Cooke was not responsible for helping Jaworski with the criminal investigation, but prosecutor Jaworski was given access to all of Cooke's interrogations and conclusions During weeks of interrogations, Leon Jaworski's investigators offered immunity to several soldiers who would agree to testify -- but most refused five black soldiers agreed, however, to testify for the prosecution in exchange for immunity (six decades later all five were said to have grudges against many of the men they accused) most Italian prisoners of war were unable to identify a single black soldier citing the darkness and confusion for their indecision two, however, offered confident identifications of dozens of American soldiers those two became Jaworski's main witnesses (decades later both were shown to have been identified previously as unreliable security risks by officers of the Military Intelligence Corps)

CHARGES WERE BROUGHT IN THE FORT LAWTON RIOT AND MURDER CASE

After weeks of investigation, Jaworski charged forty-three African American soldiers with rioting this was the largest number of defendants in a single U.S. Army trial during World War II rioting provided a maximum penalty of life imprisonment three of the men, Luther Larkin, Arthur Hurks and William Jones were also charged with first-degree murder in the hanging death of Italian POW Guglielmo Olivotto all three faced a possible death sentence All of the defendants collectively were provided just two lawyers who were given just ten days to prepare their cases (lead defense attorney William Beeks later became a federal judge he was assisted by Howard Noyd, a former football player from Iowa) without much time, defense lawyers decided to focus most of their energy on keep the soldiers from the gallows

PAUL TUTMARC ESTABLISHES A NEW PARTNERSHIP

Tutmarc's marriage broke up --1944

he married one of his young guitar students, Bonnie Buckingham²⁹⁰
they began playing country music at rural dancehalls, urban nightclubs
and on KOMO radio as a duo, or a trio or as part of KVI's full band, *The Wranglers*

ENRICO FERMI ACTIVATES THE FIRST HANFORD ATOMIC PILE (ATOMIC REACTOR)

Physicist Dr. Enrico Fermi placed the first uranium-235 slug
into atomic pile 100-B -- September 13, 1944
loading the slugs and taking measurements took a full two weeks
Final checks on the pile were uneventful -- scientists could only hope that these were accurate
because once the pile was operational the intense radioactivity
would make maintenance of its many components impossible

MADIGAN ARMY MEDICAL CENTER OPENS

This military hospital began operation at Fort Lewis near Tacoma -- September 22, 1944
this facility was named in honor of Colonel Patrick S. Madigan
who was an assistant to the U.S. Army Surgeon General from [1940 to 1943]
he was known as "The Father of Army Neuropsychiatry"
(today Madigan Army Medical Center is one of nation's largest military hospitals)

THIRTY-EIGHT JAPANESE AMERICAN MEN REFUSE THE DRAFT

Thirty-eight Minidoka Draft resisters were in jail -- end of summer 1944
all were arraigned in federal court on draft evasion indictments
most of the lawyers ordered to represent the resisters did little or nothing to help them
Jurors convicted all of the internees over a period of thirteen days
those who had entered guilty pleas received eighteen-month sentences
all others were sentenced to three years and three months in prison and a \$200 fine
they were sent to the federal penitentiary at McNeil Island, Washington

ATOMIC THEORY BECOME REALITY

First DuPont Company atomic reactor 100-B went critical -- September 27, 1944
with atomic scientist Enrico Fermi present, Hanford's first reactor started producing plutonium
from just after midnight September 27, 1944 until approximately 3:00 a.m. September 28
the pile ran without incident at a power level higher than any previous chain reaction
(although at only at a fraction of design capacity)
operators were elated, but their excitement turned to astonishment
when the power level began falling after three hours
it fell continuously until the pile ceased operating entirely -- evening of September 28, 1944
by the next morning, September 29, the reaction began again
it reached the previous day's level and then dropped again
Soon three water-cooled graphite reactors changed uranium slugs into plutonium-239
miles away three chemical separation plants handled the final processing

²⁹⁰ Peter Blecha, HistoryLink.org, Essay 7479, September 18, 2005.

HOW TO DETONATE THE A-BOMB PROVIDED ANOTHER PROBLEM YET TO BE SOLVED

How to achieve critical mass (when an explosion occurs) was only scientific speculation
experimental work was conducted at Los Alamos, New Mexico
J. Robert Oppenheimer led eminent scientists who designed and built the atomic bomb
Oppenheimer, because of his radical college years
he had a difficult time receiving the security clearance needed for his work as director
Manhattan Project was completed in just fifteen months
weapons-grade uranium-235 from Oak Ridge, Tennessee and plutonium from Hanford
was delivered to Los Alamos, New Mexico to be deployed in atomic bombs

DRY-DOCKING CORPORATION IN BALLARD

Received a contract to construct twenty ships of the tuna-clipper type -- October 1944
these were used for carrying perishable vegetables and frozen meats to the Southwest Pacific
for use by the military and civilian population

USS WASHINGTON SUPPORTS U.S. MARINE LANDINGS

1st Marine Division and 81st Infantry Division landed on Peleliu and Angaur
in the Palau Island chain -- October 10, 1944
USS *Washington* bombarded enemy positions near the beaches in support of the landings

ELECTION DAY IS HELD ACROSS THE NATION

While President Franklin Roosevelt remained in office
he chose a new Vice-President as his running mate -- then U.S. Senator Harry S Truman
President Franklin D. Roosevelt ran for an unprecedented fourth term in office -- November 5, 1944
his Republican opponent was Thomas E. Dewey in a face-off of two former New York governors
as expected, Roosevelt won in a landslide receiving support from thirty-six of forty-eight states
he gathered 53.4% of the popular vote and 432 electoral votes to ninety-nine
In the race for Washington Governor,
former U.S. Representative Democrat Monrad C. (Mon) Wallgren
defeated Republican incumbent Arthur Langley
(Governor Mon Wallgren will serve one term [1945-1949])
U.S. Representative Warren G. Magnuson, ran for Homer T. Bone's U.S. Senate seat
he defeated Harry P. Cain for the position
Washington State's Congressional Delegation saw several changes in office-holders:
two Democratic U.S. Representatives were elected:
•Hugh De Lacy, president of the left-wing Washington Commonwealth Federation,
replaced First District Congressman Warren G. Magnuson
•Charles R. Savage, former state representative and political activist,
replaced Third District Republican Congressman Fred B. Norman
In state races for the legislature
Democrats increased their numbers in the state senate from twenty-seven to thirty-two
House of Representatives seats fell from forty-two to thirty-six

USS WASHINGTON, BB-56, SUPPORTS PREPARATIONS TO INVADE THE PHILIPPINES

As the Americans prepared to invade the Philippines, USS *Washington* escorted carrier strike forces as they attacked Japanese bases across the Pacific -- November 5, 1944 [to February 1945]
Okinawa, Luzon, Indochina, Hong Kong, Canton and the Japanese Home Islands

U.S. SENATOR HOMER T. BONE RESIGNS HIS SEAT

Lame-duck Governor Arthur Langlie was forced to provide Democrat Warren G. Magnuson an early appointment to the unfinished term of United States Senate in Senator Homer T. Bone thus giving Washington's new U.S. Senator a seniority advantage over Arkansas' newly-elected Senator William Fulbright who would not be seated until the beginning of Congress [January 1945]
("Maggy" will serve in the U.S. Senate for thirty-seven years rising to the pinnacle of power)
(Judge Homer T. Bone retired from the bench as a full-time judge [1956]
a year after his wife Blanche passed away, but he served intermittently until [1968]
when he returned to Tacoma where he died [April 12, 1970]
The Seattle Times, one a Bone nemesis, noted with regret in a eulogistic editorial that **"No public power dam in this country ever was named for Homer Truett Bone."**
although he had been a consistently strong advocate for public power)

TRIAL OF THE FORT LAWTON SOLDIERS

Nine-member court-martial officers convened the largest and longest U.S. Army court-martial of World War II at Seattle's Fort Lawton -- November 16, 1944
forty-three black U.S. soldiers were charged with rioting -- three faced the death penalty trial continued six days a week and all day on Thanksgiving
Defense attorney William Beeks eventually discovered for the first time that prosecutor Jaworski had gained access to General Elliot Cooke's confidential report to the U.S. Army Inspector General
citing concerns of wartime security, Jaworski repeatedly refused to give the report to the defense despite a prosecutorial obligation to do so -- the court refused to intervene
Beeks never learned about General Elliot Cooke's criticism of Branson, Lomax and others although this information would likely have discredited most of Jaworski's main witnesses
Leon Jaworski even called Clyde Lomax to testify against the black soldiers
After five weeks, the longest United States Army court-martial of World War II, officers of the court found twenty-eight of the forty-three defendants guilty of rioting
in addition two, Luther Larkin and William Jones, were found guilty of manslaughter sentences ranged from six months to twenty-five years at hard labor
all but one defendant was issued a dishonorable discharge at the completion of their sentences
Because it was a capital case, an automatic appeal was sent to the U.S. Army's Board of Review all appeals were rejected without elaboration
(At the end of World War II, President Harry Truman was eager to establish his reputation as being helpful to veteran servicemen so because so many servicemen were in jail, he began issuing annual "Christmas clemencies" reducing sentences for thousands of soldiers included were the "Fort Lawton twenty-eight"
last Fort Lawton defendants, including Luther Larkin and William Jones, left prison but the story continued beginning in [1986])

EXECUTIVE ORDER 9066 REVOKED

After his reelection, President Franklin Roosevelt canceled the Japanese evacuation order
U.S. Army announced the termination of Japanese Internment
and the closing of the camps -- December 17, 1944 (to be effective [January 2, 1945])
Japanese who returned to their homes often were greeted with hostility

U.S. ARMY AIR FORCE 509th COMPOSITE GROUP IS FORMED

Composite group of B-29s was secretly assembled -- December 17, 1944
to develop the means of delivering a secret weapon by airplane
against targets in Germany and Japan
because the flying squadrons of the group consisted of both bomber and transport aircraft,
it was designated as a “composite” rather than a “bombardment” unit
509th was placed under the command of twenty-nine-year-old Colonel Paul Tibbets
who flew the B-29 *Enola Gay*

COLONEL PAUL TIBBETS BEGINS TRAINING THE 509th COMPOSITE GROUP

Special B-29s dubbed “Silverplate” airplanes had undergone extensive modifications
they were fitted with British single-point bomb releases mounted in the forward bomb bay
so that additional fuel tanks could be carried in the aft bay bomb bay
new crew position, called the “weaponeer station” was installed in the cockpit
with a panel to monitor the release and detonation of the bomb
509th Composite Group was composed of fourteen Silverplate B-29s by December 1944
During training a 10,000-pound bomb loaded with high explosives was dropped
these were nicknamed “pumpkin” bombs because of their shape and orange color
they were the same size and shape of the first atomic bomb to be delivered: “fat man”
Colonel Tibbets emphasized high-altitude flying, long-range navigation and the use of radar
this training program was specifically designed to prepare the crews
for a high altitude release of the bomb including an escape maneuver
that would avoid the shock wave that could damage or destroy the aircraft
initial training operations identified numerous other modifications necessary to the mission
critically important was reducing the overall weight of the airplane to offset its heavy payload

FIRST CHEMICAL SEPARATION BUILDING BEGINS OPERATION AT HANFORD

(200-West units had been finished [early October 1944])
200-West’s first Separation Building, “T,” began operation -- December 26, 1944
Building “T” was so large the workers who built it
nicknamed it the “Queen Mary” after the famous ocean liner
this was a massive canyon-like structure 800 feet long, 65 feet wide, and 80 feet high
interior had an eerie quality as operators behind thick concrete shielding
manipulated remote control equipment
by looking through television monitors and periscopes from an upper gallery
this building contained forty huge process pools
even with massive concrete lids on the process pools,
precautions against radiation exposure were necessary

which influenced all aspects of the plant's design

THE PHILIPPINES AGAIN COME UNDER ATTACK

U.S. transport, bombardment and escort carrier groups left their bases on Leyte -- January 2-5, 1945
to support the U.S. landings on the island of Luzon

there were six battleships, sixteen escort carriers, ten cruisers and many destroyers,
landing craft and transports vessels of all kinds
several of the cruisers and destroyers were Australian

Japanese in the area detect the American movement [January 3]

midget submarines, Kamikaze planes and small surface ships began their attack

U.S. Escort aircraft carrier *Ommaney Bay* is badly damaged by a Kamikaze pilot [January 4]
she has to be abandoned

Escort carrier and land-based forces began an attack on the Kamikaze airfields on Luzon

between seventy and eighty Japanese aircraft are destroyed at the cost of twenty-eight airplanes

Two U.S. escort carriers, two cruisers and several smaller ships were damaged. -- January 5, 1945

cruiser *Boise*, with General MacArthur aboard, has a narrow escape from a torpedo attack
one Japanese destroyer was sunk by U.S. planes

AMERICAN NAVY ENTERS LINGAYEN GULF IN THE PHILIPPINES

Admiral Jesse B. Oldendorf's battleship groups enter Lingayen Gulf -- On January 6, 1945
to begin the preliminary bombardment -- the fleet came under heavy attack

one minesweeper was sunk and two battleships, four cruisers and six destroyers are damaged

Japanese attacks continue but these are less effective -- January 7

two escort carriers were hit and the cruiser *Australia* was hit for the second time

last surface engagement of the Pacific campaign takes place -- night of January 7- 8

when a single attacking Japanese destroyer was sunk by four U.S. ships

U.S. TROOPS LAND ON LUZON AT LINGAYEN GULF

Four Infantry divisions lead the assault -- January 9, 1945

Japanese commander there decided not to contest the landing grounds

but continued Japanese air attacks hit the Battleship *Mississippi* (BB-41) and two cruisers
several landing craft and transport ships were damaged in an attack that night

U.S. forces streamed ashore on Luzon as the beachhead reached several miles wide and deep
(Infantry fighting and naval action continued for several months)

WASHINGTON'S NATIONAL SENATOR RESIGNES TO BECOME GOVERNOR

U.S. Senator Monrad C. Wallgren, Democrat, having been elected governor
resigned from the U.S. Senate after six years in that office

and eight years in the U.S. House of Representatives -- January 10, 1945

Hugh B. Mitchell, Everett Democrat, was appointed by newly-elected Governor Mon Wallgren
to fill Senator Wallgren's vacant Senate seat -- January 1945

Mitchell had been executive assistant to Senator Wallgren [since 1933]

Mitchell joined newly appointed U.S. Senator Warren G. Magnuson

U.S. NAVY NEEDS A BASE TO STORE AMMUNITION FOR THE PACIFIC THEATER

(U.S. Navy purchased 7,676 acres of land on the Hood Canal near the town of Bangor for approximately \$18.7 million [1942]
construction on the U.S. Naval ammunition magazine began [June 5, 1944])
Naval Support Base Bangor became a site for shipping ammunition to the Pacific Theater of Operations during World War II -- January 1945
(It would continue on operation through the Korean War and the Vietnam War until the Navy announced the selection of the Bangor base as the home port for the first squadron of *Ohio*-class Trident Fleet Ballistic Missile submarines [January 1973]
Trident Submarine Base was officially activated [February 1, 1977]
Naval Base Kitsap includes the Strategic Weapons Facility Pacific which provides maintenance, spare parts, and spare nuclear warhead storage of the Trident ballistic missiles that are carried by the nuclear submarines
this Trident submarine base is the sole base for the U.S. Pacific Fleet, while the U.S. Atlantic Fleet Trident submarine base is at Kings Bay, Georgia)

JAPANESE AMERICAN INTERNEES ARE ALLOWED TO RETURN TO THE WEST COAST

War Department began allowing internment camp inmates to return to the West Coast -- January 1945
(Camp Minidoka officially closed [October 23, 1945]
Bureau of Reclamation sold the camp's land to war veterans for homesteading farmhouses and irrigated fields occupied much of the former site
(By proclamation, President Bill Clinton established the seventy-two acre former camp as the Minidoka Internment National Monument [January 17, 2001]
this site became the 385th National Monument in the National Park Service [September 26, 2001])

SAUL HAAS EXPANDS HIS SEATTLE RADIO BUSINESS

Saul Haas' interest in radio had resurfaced during World War II
he tried unsuccessfully to wangle a war correspondent's ticket to the South Pacific
Shortly after Senator Magnuson took office [1945], Saul Haas left the Collector of Customs job he was replaced by longtime Magnuson associate Howard MacGowan

QUESTION OF HOW TO DETONATE AN ATOMIC BOMB REMAINS UNANSWERED

Two detonation methods were to be attempted at the Los Alamos, New Mexico atomic laboratory to find a successful "trigger" mechanism
one method involved driving a pile of nuclear material down a "gunbarrel" into a second pile
explosion would occur when critical mass was reached
or there would be a "nuclear fizzle"
second method involved surrounding nuclear material with a ring of explosives
plutonium would be compressed by implosion and critical mass would thus be achieved
no one knew if either method or both would be successful so the scientists decided to try both
It was decided to conduct two tests:
a Uranium bomb would be detonated using the "gunbarrel" method

a Plutonium bomb would be triggered by implosion
That led to one remaining unanswered question: “how powerful would the atomic blast be?”

SOVIET TROOPS MAKE ADVANCES IN POLAND

After bombings, revolts and fighting in the street, Warsaw, Poland lay in ruins
this city was swiftly taken by the Soviet Army and the demolition ended -- January 17, 1945
Soviet troops liberated Krakow, Poland -- January 18, 1945

AUSCHWITZ IS LIBERATED BY SOVIET TROOPS

Auschwitz Concentration and Extermination Camp was the largest German concentration camp
in reality Auschwitz was a network of forty-eight Nazi concentration and extermination camps
located about thirty miles west of Krakow, Poland
those deported to Auschwitz included 150,000 Poles, 23,000 Gypsies,
15,000 Soviet prisoners of war, about 400 Jehovah’s Witnesses
and tens of thousands of people of diverse nationalities
up to three million prisoners had died there
2.5 million people were gassed and another 500,000 died of disease and starvation
forced labor, infectious disease, individual executions and medical experiments
Auschwitz was liberated by Soviet troops -- January 27, 1945
(now commemorated around the world as International Holocaust Remembrance Day)
(Poland founded a museum on the site of Auschwitz [1945]
more than 29 million visitors have passed through the iron gates)

HANFORD SHIPS PLUTONIUM TO LOS ALAMOS, NEW MEXICO

First delivery of plutonium paste for conversion to metallic plutonium
was made to the U.S. government sixteen months after Atomic Project had begun
Hanford Commandant Colonel Franklin Matthias left Hanford for Los Alamos -- February 2, 1945
he personally escorted a flask of 100 grams of plutonium worth \$4 Billion to California
this was transported by ambulance led by six jeeps with marines riding shotgun
followed by six more jeeps with marines
World’s total supply of plutonium was next transported from California
on to Los Alamos, New Mexico
this was enough material for two atomic bombs

YALTA CONFERENCE IS HELD TO REESTABLISH WAR-TORN EUROPE

Allied political leaders met to re-draw national boundaries in Europe after the war was concluded
heads of government of the United States, the United Kingdom and the Soviet Union
were represented by President Franklin D. Roosevelt, Prime Minister Winston Churchill,
and General Secretary Joseph Stalin -- February 4-11, 1945
it was agreed that Germany would be divided into three occupation zones
free elections would be held in all countries occupied by Nazi Germany
Stalin further agreed to provide France a fourth occupation zone
if it was formed out the American and British zones
However, the “Big Three” leaders did not resolve the vast array of issues

that would result from the end of the war
these unresolved issues would result in a “Cold War” -- as opposed to a “Hot (shooting) War”
(Within a few years, with the Cold War dividing the continent,
Yalta became a subject of intense controversy -- to some extent, it has remained controversial

SECOND CHEMICAL SEPARATION BUILDING IS COMPLETED AT HANFORD

Both scientific work and construction continued at Manhattan Engineering District’s Hanford site
200-East Separation Plant “B” was finished -- February 1945
(however, the 200-East’s “C” Separation Plant was never built)

JAPANESE LAUNCH INCENDIARY BALLOONS TOWARD THE UNITED STATES²⁹¹

(Imperial Japanese Army experimented with free-floating balloons
that could carry bombs against the enemy [beginning in 1933]
Imperial Japanese Navy developed a rubberized silk balloon
Japanese Army came up with a paper model made up of 600 panels assembled by schoolgirls)
an incendiary device was suspended below the envelope
as many as 9,000 balloons were sent aloft from the Japanese island of Hokkaido
to catch the jet stream to set in American forest fires, which would siphon
manpower and resources away from the war effort [November 1944]

In the initial attack twenty-eight incendiary balloons discovered in Washington
landed seven miles north of Spokane -- February 12, 1945
two additional unexploded bombs are discovered and neutralized
there are few fires and no one was injured in Washington
probably the most serious damage in Washington occurred when a balloon hit power lines
causing a black out at the secret nuclear weapon works at Hanford

CORREGIDOR IS ATTACKED BY AMERICAN AND FILIPINO TROOPS

Since the battle for Luzon began [January 2] 3,200 tons of bombs were dropped on Corregidor
Two U.S. battalions, one seaborne and one dropped by parachute,
landed on Corregidor Island in Manila Bay -- February 16, 1945
but a bitter struggle soon developed among the tunnels and gun emplacements on the island
U.S. troops are quickly reinforced

Bataan area of Luzon was captured by the Allies [February 21]
but fighting on Corregidor continued -- as does the battle of Manila
U.S. forces attacking Manila stepped up their offensive after a fierce U.S. bombardment
Japanese resistance was strong and the fighting very fierce
(Fighting on Corregidor came to an end [February 26, 1945]

U.S. troops found more than 5,000 Japanese dead on the tiny island
and others had been trapped in the bombings)

BATTLE OF IWO JIMA BRINGS USS *WASHINGTON* (BB-56) INTO ACTION

USS *Washington* was called upon to support the invasion of Iwo Jima

²⁹¹ David Wilma and Kit Oldham, HistoryLink.org, Essay 7220, January 26, 2005.

by bombarding Japanese positions on the island -- February 22, 1945
More than 30,000 Marines of the 3rd, 4th, and 5th Marine Divisions landed on the beach of Iwo Jima which began a major thirty-five day long battle for the island -- February 19 to [March 26, 1945] initial wave of Marines was not hit by Japanese fire for quite some time
as Marine patrols advanced surrounded by deathly silence, they became somewhat unnerved many of the Marines speculated that naval artillery and air bombardment of the island had killed all of the Japanese troops that were expected to be defending the island
After the first wave of Marines reached a line of Japanese bunkers
Japanese machine gunners opened fire at almost point-blank range inflicting heavy Marine losses eight U.S. Sherman M4A3R3 medium tanks equipped with a flamethrowers were deployed they proved to be very effective

BATTLE OF IWO JIMA CONTINUES

During the battle the historic photograph *Raising the Flag on Iwo Jima* was taken -- February 23, 1945
it depicted five Marines and a U.S. Navy corpsman
raising the flag of the United States atop Mount Suribachi
of the six men shown in the photograph, three did not survive the battle

WOMEN NAVY PERSONNEL FILL MANY POSITION AT SAND POINT NAVAL AIR STATION

322 enlisted WAVES ((Women Appointed for Voluntary Emergency Service) and thirty-six officers were stationed at Seattle's and Point -- March 1945
they were assigned to every aeronautical department including: control tower operator, metalsmith, aviation machinist, parachute rigger, storekeeper, photographer's mate, corpsman, driver, Link celestial navigation trainer operator, pharmacist's mate, radio operator, post office specialist, low pressure chamber operator and switchboard operator
An official report described the WAVES' quarters as follows:

“The cubicles are painted dusty pink and the two lounges are beautifully decorated with comfortable furniture and draperies. The girls are enjoying the large recreation room in the basement which they cleverly decorated themselves, carrying out a nautical theme. The room has [a] juke box, ping-pong table, and adjoining snack bar. The girls can entertain men there certain nights of the week.”

WASHINGTON COMMONWEALTH FEDERATION (WCF) DISBANDS²⁹²

Delegates from sixth-six Washington Commonwealth organizations met at the Eagles Aerie Room in Seattle
WCF Executive Secretary Tom Rabbit called on the Ninth Annual Convention to vote for dissolution of the left-wing political organization that had long supported Democrats

CONSTRUCTION AT THE HANFORD WORKS COMES TO AN END

Construction was declared complete and the construction workers vanished -- March 1945 leaving only technical and security personnel behind to operate the highly secret facility

²⁹² David Wilma, HistoryLink.org, Essay 2722, October 9, 2000.

RIVER AND HARBOR ACT OF 1945 ADDRESSES THE SNAKE RIVER

Columbia River Basin in the United States contained three dams on the main stem and twenty others on various tributaries

all completed during the first forty years of the 20th Century

For years those living near the Snake River had dreamed of opening the river to make it navigable to the Pacific Ocean

this dream grew to include utilizing dams to provide inexpensive electric power

Congress passed the River and Harbor Act -- March 2, 1945

this authorized the Lower Snake River Project

which involved construction of four dams along the Lower Snake River in Washington state

Ice Harbor Dam completed [1961], Lower Monumental Dam completed [1961],

Little Goose Dam [1963] and Lower Granite Dam [July 1965]

Prime mover for funding was Washington's U.S. Senator Warren G. Magnuson

who foresaw water and cheap electricity would provide energy for production of aluminum, growing wheat, apples and potatoes (and today, manufacturing microchips)

ALLIES FORCES IN EUROPE MOVE TOWARD BERLIN, GERMANY

British and Canadian forces in the north crossed the Rhine River

into the German industrial heartland of the Ruhr District -- March 22, 1945

American troops in the south were advancing toward the Rhine -- late March

BATTLESHIP WASHINGTON, BB-56, ENGAGES IN THE BATTLE FOR OKINAWA

USS *Washington*, BB-56, fired her heavy guns against Japanese emplacements on Okinawa

in support of the anticipated invasion of the island by U.S. Marines -- March 24 to [April 19]

She would remain in the area of Okinawa for the remainder of the fight on the island

INVASION OF OKINAWA ISLAND BEGINS

After a long campaign of island hopping, the Allies were approaching Japan

they planned to use Okinawa, a large island only 340 miles away from mainland Japan,

as a base for air operations for the planned invasion of Japanese mainland

Four divisions of the U.S. 10th Army and two Marine Divisions

launched the initial attack -- Easter Sunday April 1, 1945

this invasion was supported by the heaviest concentration of naval gunfire

ever expended to support an amphibious landing

it was also supported by amphibious assaults and tactical air force strikes

most of the fighter planes, small dive bombers and precision bombing strike aircraft

were U.S. Navy carrier-based airplanes

Seven major Japanese suicide strikes (*kamikaze* attacks) were attempted

involving more than 1,500 Japanese airplanes

in addition, manned torpedoes were piloted by suicide attackers

U.S. Navy sustained more casualties in this operation than in any other battle of the war

HANFORD ATOMIC WORKS OPENS A SECOND CHEMICAL SEPARATION BUILDING

“B” Plant followed “T” Plant as the second Chemical Separations Building to go into production

“B” Plant was slightly smaller than the first separation plant -- spring 1945

In the “Queen Marys” bismuth phosphate carried the plutonium

through the long succession of process pools

solution coming out of “T” and “B” Plants went through a bulk reduction process

in which a 330-gallon batch of plutonium was reduced to eight gallons

Next stage in plutonium extraction, isolation, was performed in a more typical laboratory setting

with little radiation present -- pure plutonium nitrate was the end product

isolation was the final step in the process where a paste containing the plutonium was produced

ADVANCES CONTINUE ON THE EUROPEAN FRONT

German forces in Italy were withdrawing north

they were relentlessly pressed by the American and British (Commonwealth) forces

as they advanced across the River Po and into the foothills of the Alps -- April 5, 1945

Poland had fallen to advancing Soviet forces which were massing to cross the Oder River

with Berlin, fifty-one miles to the west as their objective -- mid-April 1945

To the west, Hitler watched the Allies defeat his forces from his command post

DEATH OF PRESIDENT FRANKLIN D. ROOSEVELT IMPACTS THE WORLD

Vice President Harry Truman had lunch with his friend Senator Warren G. Magnuson²⁹³

it was the senator’s fortieth birthday -- April 12, 1945

together they returned to the Senate Chamber for the afternoon session

where Vice-President Truman presided

After the close of the day’s responsibility, Truman and Magnuson retired downstairs

to attend a session of House Speaker Sam Rayburn’s “board of education” meeting

poker and liquor, as usual, had been placed in preparation for the session

Vice President Truman was called from the card game to the White House -- 5:30 p.m.

he was informed President Roosevelt had suffered massive cerebral hemorrhage

he had died while vacationing in Warm Spring, Georgia -- April 12, 1945

Vice President Harry S Truman was sworn in as President

SOVIET TROOPS BEGIN BOMBARDMENT OF BERLIN

Soviet artillery shells had started falling on the capitol of Germany -- April 21, 1945

At the afternoon situation conference in the bunker -- April 22

Hitler suffered a total nervous collapse when he was informed that his instructions

to move to the rescue of Berlin had not materialized

Hitler openly declared for the first time the war was lost and blamed his generals

he announced he would stay in Berlin until the end and then shoot himself

SOVIET ARMY SURROUNDS BERLIN

Encirclement of Berlin was complete -- April 25, 1945

secure radio communications among German units had been lost

²⁹³ Shelby Scates, *Warren G. Magnuson*. P. 115.

command staff in the Berlin headquarters bunker depended on telephone lines
for passing instructions and orders and on public radio for news and information

CONFERENCE TO DEVELOP THE UNITED NATIONS IS HELD IN SAN FRANCISCO

World War II Allied government officials saw the need to develop an international organization
to attempt to assure peace in the world

it was obvious the world could not afford a third world war -- especially a nuclear holocaust
League of Nations, a similar effort, had failed after World War I
due in large part to lack of support by the United States

At the urging of President Franklin D. Roosevelt San Francisco was the location of the gathering
all five Allied nations of World War II met to create a new world organization

France, the Republic of China, the Soviet Union, the United Kingdom and the United States
attended a Conference on International Organization -- April 25, 1945

FDR had coined the term "United Nations" as a term to describe the wartime Allied powers
Goals for the new organization were to facilitate cooperation in international law,
international security, economic development, social progress, human rights
and to achievement world peace

COLONEL PAUL TIBBETS DECLARES THE 509th COMPOSITE GROUP READY FOR COMBAT

Men, planes and equipment moved from their training base at Wendover, Utah
to their new home: North Field, Tinian Island in the Marianas Chain only 1,450 miles from Japan
entire group had arrived and once again began intensive training -- April 26, 1945

Mission profile as it was developed called for:

- weather scout airplanes to precede the strike force by an hour
they would report weather conditions in code over each proposed target;
- strike force itself consisted of a bombing aircraft
aircraft commander was responsible for all decisions in reaching the target and the bomb
commander (weaponeer) was responsible for all decisions regarding dropping of the bomb;
- a second blast instrumentation aircraft which would fly the wing of the strike aircraft
it would drop instruments by parachute into the target area;
- a third camera ship would carry scientific observers;
- a final one "spare" aircraft would accompany as far as Iwo Jima to take over carrying the bomb
if the strike aircraft encountered mechanical problems

COLONEL PAUL TIBBETS DECLARES THE 509th COMPOSITE GROUP READY FOR COMBAT

Men, planes and equipment moved from their training base at Wendover, Utah
to their new home: North Field, Tinian Island in the Marianas Chain only 1,450 miles from Japan
after the entire group had arrived they once again began intensive training -- April 26, 1945

Mission profile as it was developed called for:

- weather scout airplanes to precede the strike force by an hour
they would report weather conditions in code over each proposed target;
- strike force itself consisted of a bombing aircraft
aircraft commander was responsible for all decisions in reaching the target
weaponeer (bomb commander) was responsible for all decisions

regarding dropping of the bomb;

- a second blast instrumentation aircraft would fly off the wing of the strike aircraft it would drop instruments by parachute into the target area;
- a third camera ship would carry scientific observers;
- a final one “spare” aircraft would accompany as far as Iwo Jima to take over carrying the bomb if the strike aircraft encountered mechanical problems

Secrecy of these airplanes and their mission was complete -- as illustrated by two incidents:

- en route to Tinian [June 4, 1945] the B-29 *Great Artiste* made a stop at Mather Field, near Sacramento, California where the base commanding general attempted to enter the aircraft to inspect it
he was warned away by an airplane guard who aimed a carbine at his chest
- courier Second-Lieutenant William A. King was transporting the plutonium core of the Fat Man bomb aboard a C-54 Skymaster transport airplane to the island of Tinian his airplane made a refueling stop at Hickam Field, Hawaii [July 24, 1945] where a colonel commanding a combat unit returning to the United States learned the Skymaster had only one passenger
the colonel attempted to enter the C-54 to requisition it as transport for his men
he was prevented from doing so by King who aimed his .45 caliber pistol at the officer

ADOLF HITLER LEARNS OF THE DEATH OF ITALY’S BENITO MUSSOLINI

After midnight Hitler married his mistress Eva Braun in a small civil ceremony in a map room within the command bunker -- April 29, 1945

Hitler hosted a modest wedding breakfast with his new wife

News arrived of the execution of Hitler’s ally Italian dictator Benito Mussolini -- April 29, 1945

Mussolini’s body and that of his mistress Clara Petacci had been strung up by their heels

later they were cut down and laid in the gutter where vengeful Italians reviled them

It is probable that these events strengthened Hitler’s resolve

not to allow himself or his wife to be made “a spectacle of” as he had earlier written

PACIFIC NORTHWEST IS HIT BY AN EARTHQUAKE

North Bend, Washington, along the western edge of the Cascade Mountains was the earthquake epicenter -- April 29, 1945

Most severe damage was reported to include a broken North Bend water main and damaged chimneys bricks were dislodged in a dozen or more homes in the Cle Elum area, one boy in Roslyn was struck on the head by a falling brick

Forest Rangers at the Mount Si Ranger Station, near North Bend

witnessed the earth buckle and heave

tons of rock crashed down Mount Si’s 4,000-foot cliffs

ADOLF HITLER COMMITS SUICIDE

Hitler then took his secretary to another room and dictated his last will and testament

he signed these documents and then retired to bed -- 4:00 a.m. April 30, 1945

With the Soviets less than 500 yards from the command bunker

Adolf Hitler committed suicide by gunshot -- April 30, 1945

his wife Eva committed suicide with him by ingesting cyanide
That afternoon, in accordance with Hitler's prior instructions,
their remains were carried up the stairs through the bunker's emergency exit,
doused in gasoline and set on fire in the Reich Chancellery garden outside the bunker
(Soviet archives recorded that their burnt remains were recovered and interred in several locations
until they were again exhumed, cremated and the ashes scattered [1970])

ANOTHER JAPANESE INCENDIARY BALLOON ATTACK CLAIMS AMERICAN LIVES²⁹⁴

An Oregon Sunday School class was on a picnic near Klamath Falls -- May 5, 1945
Sunday school teacher Elyse Winters and the children discovered one of the devices
it exploded killing her and Jay Gifford, Edward Engen and Sherman Shoemaker, all age 13
Joan Patzke, age 13 and her brother Dick Patzke, age 14
In all, 342 balloons, bombs, and fragments turned up all over the western U.S., Canada and Alaska
people found more evidence of the balloon campaign for years after the war
Grays Harbor Sheriff's Deputy Mike Kilgore found the remains of one device near Montesano
he turned his find over to U.S. Navy authorities
Japan scrapped the program where there were no reports of damage caused by the balloons
voluntary news embargoes by the press kept stories from circulating
Japan's balloon campaign did prove to be problematic for the U.S. and Canadian military
which had to redeploy air defense and other assets to chase balloons

GERMAN LEADERSHIP SIGNS AN UNCONDITIONAL SURRENDER ARMISTICE

World War II in Europe came to an end at Rheims, France --2:41 a.m. May 7, 1945
unconditional surrender of the German armed forces
was signed by *Generaloberst* Alfred Jodl on behalf of the German High Command
Grand Admiral Karl Dönitz signed as President of the new German government
General Walter Bedell Smith signed on behalf of the Western Allies
Ivan Susloparov signed on behalf of the Soviets
French major general François Sevez signed as the official witness
But the surrender ceremony was full of controversy since the Rheims ceremony
was arranged by the Western Allies without the consent of the Soviet government
shortly after the surrender was signed the Soviets announced their representative in Rheims
had no authority to sign this document
in addition, it was discovered that the document signed in Rheims
was different from the draft prepared earlier which had been approved by the Big Three
to complicate matters, part of German home defense forces refused to lay down their arms
they continued to fight in Czechoslovakia
finally, it has been stated in a German radio broadcast
that the Germans had made peace with the Western Allies -- but not with the Soviets
Soviets government argued that the surrender should be represented as the most important in history
Soviet leadership insisted the act of surrender document signed in Rheims
should be considered "a preliminary protocol of surrender"

²⁹⁴ David Wilma, HistoryLink.org, Essay 7220, January 26, 2005.

Allies government officials agreed another surrender ceremony should take place in Berlin
a second Act of Military Surrender was signed shortly before midnight -- May 8, 1945
at the seat of the Soviet Military Administration in Berlin
Victory in Europe Day (V.E. Day) is celebrated on May 8

VICTORY IN EUROPE IS CELEBRATED AROUND THE WORLD

After the defeat of Hitler's Nazi Third Reich, celebrations erupted throughout the western world
in the United Kingdom more than one million people celebrated in the streets
to mark the end of the European part of the war

London held a two-day celebration

crowds massed in Trafalgar Square and up The Mall to Buckingham Palace
King George VI and Queen Elizabeth, accompanied by Prime Minister Winston Churchill
appeared on the balcony of Buckingham Palace before the cheering crowds
Princess Elizabeth (the future Queen Elizabeth II) and her sister Princess Margaret
were allowed to celebrate by wandering anonymously among the crowds

Victory celebrations in Canada were marred by the Halifax Riot

as the celebration of the World War II rapidly declined into a rampage
by several thousand servicemen, merchant seamen and civilians, who looted the city
blame was placed on lax naval authority and a combination of bureaucratic confusion,
insufficient policing and hostility between the military and civilians fueled by the presence
of 25,000 servicemen who had strained Halifax's wartime resources to the limit

In the United States saw crowds gather in American cities

such as Chicago, Los Angeles, Miami, and especially in New York City's Times Square
but the celebration was muted

President Harry S Truman, who turned sixty-one that day, gave a bittersweet radio address
he dedicated the victory to the memory of his predecessor Franklin D. Roosevelt

flags remained at half-mast for the remainder of the thirty-day mourning period

Americans were still fighting an enemy in the Pacific Theater

and appalling losses were being suffered on Iwo Jima and Okinawa

while deeply grateful the European War was over, the nation prepared for the horrors of fighting
an enemy that used suicide as a weapon and was preparing to fight to the last man

442nd REGIMENTAL COMBAT TEAM LIVES UP TO ITS MOTTO: "GO FOR BROKE"

442nd had served in Italy and France

these American Japanese had not been trusted to fight in the Pacific Theater

After proving themselves more than loyal Americans, the unit was later assigned to the Orient

by war's end they had served in the European, Pacific and China-Burma-India Theaters

These soldiers became one of the most highly decorated units in the entire history of the U.S. Military

4,419 men were killed, wounded or missing

of these seventy-three were from Camp Minidoka -- the largest of all of the camps in the U.S.

4,000 men who initially arrived in Europe [April 1943] had to be replaced nearly 3.5 times

in total, about 14,000 men served in the unit

they earned twenty-one Medals of Honor; 9,486 Purple Hearts

and an unprecedented eight Presidential Unit Citations

seventy-three of these soldiers from Camp Minidoka died in combat
this was the largest casualty number of all of the internment camps)
twenty-one Medal of Honor recipients -- two were from Camp Harmony

- William K. Nakamura of Seattle killed in combat near Castellina, Italy [July 4, 1944]
he single-handedly destroyed an enemy machine gun emplacement
and later volunteered to cover his unit's withdrawal
he was killed while attacking another machine gun nest which was firing on his platoon
- James K. Okubo of Anacortes served as a combat medic near Biffontaine, France
he carried wounded soldiers to safety and treated over two dozen men
despite intense enemy fire [October 28, 1944]
one week later he again braved enemy fire to rescue a man from a burning tank
he died at age forty-seven in a traffic accident

A TARGET FOR THE FIRST ATOMIC BOMB IS SELECTED

Target Committee at Los Alamos, New Mexico led by J. Robert Oppenheimer,
recommended Kyoto, Niigata, Hiroshima, Yokohama, and the arsenal at Kokura
as possible targets

Hiroshima, a civilian target of 380,000 people, was described as **“an important army depot and port of embarkation in the middle of an urban industrial area. It is a good radar target and it is such a size that a large part of the city could be extensively damaged. There are adjacent hills which are likely to produce a focusing effect which would considerably increase the blast damage. Due to rivers it is not a good incendiary target.”**²⁹⁵ -- May 10-11, 1945

Goal of the attack was to convince the Imperial Japanese government to surrender unconditionally
in accordance with the terms of the Potsdam Declaration

BATTLE OF OKINAWA COMES TO AN END

Despite their tremendous numerical superiority, it took the U.S. Army and Marines eighty-two days
to secure the island of Okinawa [April 1] to June 23, 1945
this was one of the longest and one of the costliest of the war
over 13,000 American lives and over 57,000 other casualties including combat exhaustion
Japanese attempts to defend the islands cost them an estimated 120,000 dead
about 7,000 Japanese uncharacteristically surrendered at the end
civilian population of Okinawa also suffered greatly as about 150,000 were killed

USS WASHINGTON, BB-56, LEAVES THE COMBAT ZONE

(USS *Washington*, BB-56, left Okinawa --[early June 1945])
she steamed for repairs left and arrived at Puget Sound Naval Ship Yard -- June 28, 1945
(she would still be in dry dock when the Japanese surrendered on [August 15, 1945])
(Having won fifteen battle stars during World War II, the USS *Washington*, BB-56,
served a brief time as a transport ship before being decommissioned [June 27, 1947]
(USS *Washington* was sold for scrap [May 24, 1961])
USS *Washington* had established a remarkable war record:

²⁹⁵ Target Committee minutes, Los Alamos, New Mexico May 10-11, 1945

- she steamed 289,609 miles during World War Two;
- she fired 3,535 rounds of 16-inch shells, 28,062 rounds of 5-inch projectiles and over 350,000 rounds of 20-millimeter machine gun bullets;
- she shot down twelve enemy planes, bombarded ten enemy islands and repelled fifty-three air attacks;
- she sank the Japanese battleship *Kirishima* -- the only U.S. Navy capital ship to best an enemy capital ship during the war
- she damaged three enemy cruisers and a destroyer, oil tanker and several transports more combat tonnage than any U.S. Battleship in WWII;
- she was never hit or did she lose a man to the enemy)

PROJECT TRINITY (ATOMIC TEST) IS CONDUCTED IN NEW MEXICO

Work at the Los Alamos laboratory culminated in the creation of three atomic devices

Hanford's first delivery of atomic material culminated in the construction of the world's first two atomic bombs

fuel from Oak Ridge, Tennessee was used in the third device

It was decided to test the trigger mechanism using Hanford plutonium circled by a ring of explosives if critical mass could be achieved, a nuclear detonation would occur

scientists at Los Alamos, New Mexico would find out if "The Gadget" (bomb's code-name) was going to be the colossal dud of the century or, perhaps, an end to the war

Testing took place at Alamogordo, New Mexico

"The Gadget" ushered in the Atomic Age -- 5:29:45 a.m. Mountain War Time July 16, 1945

blast of history's first nuclear explosion fueled with Plutonium 239 was beyond belief

resulting blinding flash was visible 200 miles away

scientists reported it was the "light of a thousand suns"

astonishingly, a blind girl saw the flash 120 miles away

light of the explosion turned orange as the atomic fireball began shooting upwards

at 360 feet per second, reddening and pulsing as it cooled

this fireball reached one mile in diameter and eight miles into the atmosphere

an ominous mushroom cloud of radioactive vapor materialized at 30,000 feet

beneath the cloud, all that remained of the soil at the blast site

were pieces of jade green radioactive glass created by the heat of the atomic reaction

In all, over \$2 billion was eventually spent on the atomic project

and over 125,000 people were involved

In a "cover" story, U.S. Army announced that an ammunition dump had exploded

security for the project was so complete that Hanford workers did not know

they had played a part

SCIENTISTS WERE CONFUSED BY WHAT THEY HAD PRODUCED

After witnessing the explosion, its creators had mixed reactions

physicist Isidor Rabi felt that the equilibrium in nature had been upset

humankind had become a threat to the world it inhabited

J. Robert Oppenheimer, although ecstatic about the success of the project,

quoted a remembered fragment from the Bhagavad Gita:

“I am become Death,” the destroyer of worlds.”

Ken Bainbridge, the test director, told Oppenheimer: “Now we’re all sons of bitches.”
After viewing the results several participants signed petitions
against unleashing the monster they had created -- but their protests fell on deaf ears

PRESIDENT HARRY TRUMAN IS IN POTSDAM, GERMAN FOR A CONFERENCE OF ALLIES

Germany had surrendered but the war with Japan continued
atmosphere at Potsdam between the Soviet Union and the West was often acrimonious
Stalin took an increasingly hard line on issues regarding Soviet control in Eastern Europe
this provoked the new American president and the new British prime minister
to harden their own stance toward the Soviet leader

While preparing for the conference President Truman learned of the successful nuclear test
he received a Top Secret telegram from Washington, D.C. -- evening of July 16, 1945

**“Operated on this morning. Diagnosis not yet complete but results seem satisfactory
and already exceed expectations.”²⁹⁶**

POTSDAM CONFERENCE OPENS TO IMPLEMENT NEW EUROPEAN BOUNDARIES

Potsdam Conference was the last of the wartime summits among the Big Three allied leaders
it was held in a historic suburb of Berlin in Potsdam -- July 17-[August 2, 1945]
Representing the United States, the Soviet Union and Great Britain respectively
were Harry Truman, Josef Stalin and Winston Churchill who was replaced midway
by Clement Atlee after he was successfully elected British Prime Minister

ALLIES DEMAND SURRENDER FROM IMPERIAL JAPAN

Potsdam Conference issued a Proclamation to the Japanese Imperial government -- July 26, 1945
Japanese officials immediately recognized that Potsdam proposal was far more lenient
than was generally expected and much softer than the terms imposed on Germany
which was never offered any terms at all
Japanese peace faction of the Japanese government tried to persuade Emperor Hirohito
this offer meant that unconditional surrender would not be imposed
military faction considered the document proof that America’s will to fight had eroded
they demanded unequivocal rejection to solidify morale inside Japanese Army ranks
Japanese Emperor Hirohito rejected the offer

WINSTON CHURCHILL IS REPLACED AS BRITISH PRIME MINISTER

British Prime Minister Winston Churchill had led his nation through the war to achieve victory
but the principals of his Conservative Party had taken a back seat
Labour Party members and the British media vilified the pre-war Conservatives
as appeasers of Hitler who had failed to re-arm Britain after World War I
Labour members, even during World War II proposed a comprehensive package of social reforms
including social security, a national health service and full employment

²⁹⁶ Ferenc Morton Szasz, *The Day the Sun Rose Twice: The Story of the Trinity Site Nuclear Explosion July 16, 1945*, P. 145.

War in Europe had come to an end on Victory in Europe (V.E.) Day [May 8, 1945]
Great Britain had a general election -- July 26, 1945
in a sweeping Labour Party victory Prime Minister Winston Churchill was replaced
by Labour Party Prime Minister Clement Attlee
Winston Churchill resigned immediately

BOMBING OF HIROSHIMA, JAPAN

“Silverplate” B-29 Superfortress named *Enola Gay*
piloted by Group Commander Lieutenant Colonel Paul Tibbets, Jr.
left the island of Tinian near Saipan on its 1,700-mile flight -- 2:45 a.m. August 6, 1945
Colonel Tibbets flew at low altitude on automatic pilot
his primary target was Hiroshima where the 2nd Japanese Army stood ready
to defend against an expected Allied invasion of their homeland
Enola Gay was carrying “Little Boy” a 9,700-pound uranium-fission neutron bomb
twenty-nine inches in diameter and ten feet long
fueled by nuclear material from Oak Ridge, Tennessee
it delivered the equivalent of 15,000 tons of TNT
Colonel Tibbets climbed to 31,000 feet as the *Enola Gay* neared the target area
weather over the target was satisfactory
commander (weaponer) Major Thomas Ferrebee, was able to use a visual approach
Hiroshima was attacked as the bomb was released from 31,000 feet
it took forty-three seconds for the device to reach the point above a hospital
where it detonated -- 8:15:17 a.m. Monday, August 6, 1945
blast created a blinding flash -- then a fireball with temperatures of at least 360,000°F
winds reached a velocity between 400 and 600 miles per hour
the bomb destroyed 4.7 square miles of the city
100,000 people killed immediately -- 40% of the city’s population
50,000 more died later of fall out and injuries
all hospitals in the city were destroyed or seriously damaged

COMPARISON OF HIROSHIMA BOMB AND MODERN BOMB

<u>1945</u>	<u>TODAY</u>
Total destruction: one mile	Total destruction: nine miles
Light destruction: three and a half miles	Light destruction: thirty miles

PRESIDENT HARRY S TRUMAN’S ANNOUNCES THE ATOMIC BOMBING

President Truman faced the task of telling the press about the exploding a revolutionary new weapon
unleashing extraordinary destructive power over a Japanese city
his immediate challenge was to explain this was the action of a dominant military power
while at the same time it was consistent with American decency and concern for human life
Truman’s message to the nation was a routine press release only a thousand words long
issued while the President was at sea a thousand miles away -- August 6, 1945
returning from the Potsdam conference Assistant Press Secretary Eben Ayers
read the president’s announcement to about a dozen members of the national press corps

in an atmosphere was so casual that reporters had difficulty grasping the significance of the message: **“Sixteen hours ago an American airplane dropped one bomb on Hiroshima, an important Japanese Army base. That bomb had more power than 20,000 tons of TNT. ...The Japanese began the war from the air at Pearl Harbor. They have been repaid many fold. ...It is an atomic bomb. It is a harnessing of the basic power of the universe.”** However, the official narrative was built on a half-truth

Hiroshima did contain an important military base used as a staging area for Southeast Asia but the bomb was dropped above the very center of a city of 350,000 there was no mention of the effects of radiation although officials knew they were horrendous thus the image of just a bigger bomb remained in the press Almost without exception newspaper editorials endorsed the use of the bomb against Japan many sounded the theme of revenge first raised in the Truman announcement most of them emphasized that using the bomb was merely the logical culmination of war Soldiers, sailors, marines, air force personnel, parents, spouses, children and other relatives were boisterous in their support of the bombing -- soon their loved ones would be home Yet no response was received from the Imperial Japanese government

SOVIET UNION DECLARES WAR ON IMPERIAL JAPAN

Soviet Union Russian Foreign Commissar Vyacheslav Mikhailovich Molotov informed the Japanese Ambassador to Moscow, Naotake Sato, a declaration of war would come into operation the following day Russians lost no time in executing their declaration Soviet leaders were anxious to acquire Japanese territory as rapidly as possible exactly 24 hours after Mr. Molotov had seen the Japanese Ambassador in Moscow Secretary General Josef Stalin issued his first official report on the progress of the Asian war he stated the Manchurian frontier had been crossed in many places -- evening August 9

AMERICA PREPARES TO DROP A SECOND ATOMIC BOMB

Three potential targets for a second atomic attack were selected: Kokura, Kyoto and Niigata, Japan Niigata was considered to be too distant from Tinian Island to be considered further Kyoto was withdrawn because of its religious associations Nagasaki was added to the list of potential targets Americans were left with just two targets: Kokura and Nagasaki Kokura was the location of a major Mitsubishi Arms Manufacturing Plant and arsenal which provided an important target for an attack Nagasaki was a major shipbuilding city and a large military port but it had been bombed five times in the previous twelve months thus any damage caused by an atomic bomb would have been difficult to assess also, because the city had spread across hills and valleys the impact of a powerful bomb could be dissipated Kokura, Japan became the primary target

SECOND ATOMIC BOMBING MISSION BEGINS

Whereas the *Enola Gay* had a relatively uneventful journey to the target at Hiroshima

this second mission was more difficult

Major Frederick C. Bock gave up his pilot seat in the B-29 Superfortress *Bockscar* to fly the accompanying instrument airplane *Great Artiste* which was used to measure and photograph the devastating explosion
Mission pilot was Major Charles Sweeney who flew the *Bockscar* (today *Bockscar* is on display at the Air Force Museum near Dayton, Ohio)
crew of *Bockscar* gathered for their takeoff from Tinian Island -- 3:40 a.m. August 9, 1945
flight commander, Major Sweeney, found that one of the fuel pumps was not working
800 gallons of aviation fuel had to sit in its fuel tank as useless weight
Bockscar carried the atomic bomb dubbed "Fat Man" -- a Hanford plutonium-fueled device
this version of "The gadget" was detonated by a circle of sixty-four detonators that would drive pieces of plutonium together into a supercritical mass
"Fat Man" weighed about 10,000 pounds and was ten feet eight inches long
it had the explosive capacity of about 20,000 tons of high explosives
Sweeney was give orders that only a visual run was allowed -- not a run guided by radar
by the time *Bockscar* got near to Kokura, its primary target,
it was clear that bad weather would save the city which was covered by clouds
Major Sweeney made three runs over the city but could find not break

TARGET FOR THE SECOND ATOMIC ATTACK IS CHANGED

Lack of fuel forced Major Sweeney to move to his only other target -- Nagasaki
Bockscar only had enough fuel for one run over the city and not enough to fly back to Tinian
it would have to land at Okinawa
Weaponer on *Bockscar* was Navy Commander Frederick Ashworth who told Sweeney
that radar would have to be used if Nagasaki was covered in clouds -- it was
Most of Sweeney's bombing run was begun using radar
but at the last minute a break in the cloud was found by the bomb weaponer
at 28,900 feet, "Fat Man" was dropped -- 11:02 a.m. local time Thursday, August 9, 1945
because of the cloud cover the bomb missed its intended detonation point

RESULT OF THE HAGASAKI ATOMIC BLAST

"Fat Man" was a very effective bomb -- its blast was bigger than "Little Boy's"
but its impact was reduced by the natural topography of the city
an area about 2.3 miles by 1.9 miles was destroyed but other parts of the city were saved
curiously, the city's train service was not interrupted
fire damage that followed Hiroshima did not occur because many parts of Nagasaki
were broken up by water -- fire simply could not cross these gaps and they burned out
Nagasaki was well served with good bomb shelters and surrounding hills had tunnels available
so the city had been targeted for bombing several times before
but the city's 286,000 residents had become accustomed to air raid sirens
most of the inhabitants did not heed the warning
Horrific injuries suffered at Hiroshima were also witnessed at Nagasaki
unlike Hiroshima the city's medical facilities were not totally destroyed
but nobody was capable of coping with those who were injured in the blast

death and injury in Nagasaki and the surrounding areas depended on where you were at the time
people just three and a half miles from ground zero
were protected from the blast by a mountain
as in Hiroshima, many thousands in Nagasaki died in the nuclear blast
thousands more died later from related blast and burn injuries
after the immediate impact of the bomb had dissipated hundreds more died
from mysterious ailments (which we now associate with radiation poisoning)
no one knew what to do to help the victims

(In later reports estimates of death and destruction varied greatly:

- U.S. Strategic Bombing Survey [1953] put the number of deaths at 35,000, wounded at 60,000 and 5,000 missing;
- Japanese [1960] put the number of dead at Nagasaki at 20,000 and wounded at 50,000;
- Nagasaki Prefectural Office later put the figure for deaths alone at 87,000 with 70% of the city's industrial zone destroyed)

NATIONS OF THE WORLD EXPERIENCE AN ATOMIC WORLD

Plutonium fuel for one more atomic bomb remained in the pipeline at Los Alamos, New Mexico

General Leslie Groves ordered all shipments of atomic material be stopped -- August 13, 1945

From President Harry S Truman's perspective the United States had been spared the need to invade the Japanese homeland with an estimated cost of 500,000 to one million casualties

Japanese citizenry had been spared having to face life between two warring armies

From a different point of view, U.S. Senator Warren G. Magnuson

summed up his perspective in a letter: **"We [have reached] a new stage of political and international affairs. Politically we are still in the horse and buggy days compared with developments in science and machines. With high speed airplanes and the atomic bomb, the theory of national barricades no longer exists. We must evolve."**²⁹⁷

JAPAN SUFFERES ENORMOUS LOSSES

(After apparently ignoring the Potsdam Declaration, Japan had experienced a series of disasters

Hiroshima was attacked with a nuclear weapon [August 6, 1945]

fast-moving Soviet troops invaded Manchuria [August 8, 1945]

this shattered any expectation that Japan's large army could hold back her enemies

Nagasaki suffered from an atomic bomb [August 9, 1945])

These events demonstrated that the "prompt and utter destruction"

promised by the Potsdam Declaration was now at hand

Imperial Japanese Emperor Hirohito held several difficult meetings of his chief officials

before he decided to end the War by accepting the Allies' terms

JAPANESE EMPEROR HIROHITO SURRENDERS TO THE ALLIES

Emperor Hirohito's decision to surrender was announced in Japan -- afternoon of August 14, 1945

Emperor Hirohito spoke to his people in a short radio address

it was the first time most Japanese people had ever heard his voice

²⁹⁷ Shelby Scates, *Warren G. Magnuson*. P. 118.

because of the International Date Line for the United States this was 7:00 p.m. Eastern War Time (4:00 p.m. in the West) August 14, 1945

President Harry Truman read a message to 140 million Americans: **“I have received this afternoon a message from the Japanese government...I deem this...full acceptance of the Potsdam Declaration...the unconditional surrender of Japan.”**

(it was announced a formal singing event was scheduled for [September 2, 1945])

KOREAN PENINSULA IS DIVIDED INTO NORTH AND SOUTH KOREA

Korean Peninsula was ruled by Japan from [1910] until the end of World War II following the Japanese surrender the Allies divided the peninsula along the 38th Parallel United States troops occupied the southern portion -- the Republic of Korea Soviet troops occupied North Korea

IMMEDIATELY CELEBRATIONS SWEEP ACROSS THE NATION

From New York City's Times Square where the famous celebratory photograph entitled *The Kiss* was taken (and published a week later in *Life* magazine) photographer Alfred Eisenstaedt in his book *From The Eye of Eisenstaedt* set the scene: **“I was walking through the crowds on V-J Day, looking for pictures. I noticed a sailor coming my way. He was grabbing every female he could find and kissing them all — young girls and old ladies alike. Then I noticed the nurse, standing in that enormous crowd. I focused on her, and just as I'd hoped, the sailor came along, grabbed the nurse, and bent down to kiss her. Now if this girl hadn't been a nurse, if she'd been dressed dark clothes, I wouldn't have had a picture. The contrast between her white dress and the sailor's dark uniform gives the photograph its extra impact.”**

PEOPLE OF WASHINGTON STATE ALSO TAKE PART IN THE CELEBRATIONS

Immediately the people of the state of Washington begin to celebrate at the Boeing facilities a plant-wide voice boomed over the loudspeakers **“Stop all machinery; come down from your ladders.... It's official -- the war is over.”** it was remembered that **“Everyone ran to the parking lot.” “Cars were streaming out of the lot, honking their horns. You've never heard so much noise. It was very emotional.”**

As noted in the *Seattle Star*: celebration sweeps over Seattle **“like a hurricane”** August 15, 1945 Under the full-page *Seattle Post-Intelligencer* banner headline: **“PEACE”**

was an article written by Stub Nelson

“Perched precariously atop a bubbling cauldron for four days, the lid on Seattle's pent-up emotions blew sky high a few minutes after 4 o'clock yesterday.

Promptly, a two-day holiday--covering today and tomorrow--was proclaimed.

There began and continued far into the night one of the greatest celebrations in Seattle's time, increasing steadily in volume and tempo.

Now it is real--the most dramatic hour of tense, anxious waiting are over.”

Stub Nelson's article accompanied by photographs continued over several pages

POST-WAR TRANSITION AT BOEING

It was estimated Boeing airplanes

had shot down sixty per cent of all enemy aircraft destroyed by bombers in Europe

and had dropped fifty-nine per cent of the bombs released over Germany
Army orders for Boeing B-29s dropped from 122 per month --August 1945
to twenty-two per month
Boeing laid off 20,000 workers and lines formed at state unemployment offices
Boeing, however, signed a \$25 million contract with Pan-American World Airways
to make twenty "377" "Stratocruisers" for civilian use -- August 1945
these were eighty-passenger luxury transport planes based on the B-29 military plane
and weighed sixty-seven tons each

ARMISTICE BETWEEN THE ALLIES AND IMPERIAL JAPAN IS SIGNED

Officials of the government of Imperial Japan formally and unconditionally surrendered to the Allies
on the deck of the Battleship USS *Missouri* (BB-63) in Tokyo Bay -- September 2, 1945
this became known as V.J. Day (Victory over Japan) in the United States
(V.J. Day is celebrated in the United Kingdom [August 15])

Five American battleships along with many aircraft carriers, cruisers, destroyers, frigates, sloops,
submarines, mine sweepers and other ships were present

Two copies of the Instrument of Surrender documents were signed
one copy for Japan and one copy for the Allies

Japanese signed the Instrument of Surrender document first -- 9:04 a.m. local time
signing on behalf of Emperor Hiorhito and the Japanese Government
was Foreign Minister Mamoro Shigemitsu

Japanese general Yosshijiro Umezu signed for the Imperial General Headquarters

Signing for the Allied Powers -- 9:08 a.m. were:

- Supreme Commander for the Allied Powers, General Douglas MacArthur;
- Lieutenant-General Jonathan M. Wainwright, defender of Bataan and Corregidor;
(he returned to the Philippines to receive the surrender of the local Japanese commander)
- Lieutenant-General Arthur E. Percival, British commander at Singapore
at the time of the Japanese conquest of that base

Representatives for the other Allied Powers then signed at 9:12 a.m. in the following order:

- Fleet Admiral Chester W. Nimitz, for the United States;
- General Hsu Yung-Chang, for the Republic of China;
Admiral Sir Bruce Fraser for the United Kingdom;
- Lieutenant-General Kuzma Nikolaevich Derevyanko for the U.S.S.R.;
- General Sir Thomas Blamey for Australia;
- Colonel Lawrence Moore-Cosgrave for Canada;
- Major-General Jacques LeClerc for France;
- Admiral C. E. L. Helfrich for the Netherlands;
- Air Vice-Marshal L. M. Isitt for New Zealand

AMERICANS PAY A HIGH PRICE FOR WAR

Destruction of World War II had caused the loss of 405,399 Americans dead
670,846 more were wounded

Washington state suffered the loss of 4,147 killed

(this compared to 877 killed in Washington State during World War I)

EUROPE IS DEVASTATED BY WORLD WAR II

Europe was ravaged by years of conflict during the war
millions of people had been killed or wounded
industrial and residential centers in England, France, Germany, Italy, Poland, Belgium
and in other nations lay in ruins
transportation infrastructure was in shambles
because agricultural production had been disrupted by war
much of Europe was on the brink of famine
United States was the only world power that was not significantly damaged

SAUL HAAS EXPANDS HIS RADIO HOLDINGS

(Saul Haas made it to Europe in 1945 where he witnessed the celebration of Victory in Europe Day
he reported on postwar Europe for Seattle's KIRO and for *The Portland Oregonian*)
With the war over, Saul Haas refocused his energy on radio broadcasting
technology exploded as FM offered higher-quality reception than AM radio
Haas obtained an FM license and experimented briefly with broadcasting on public buses
but settled for "simulcasting" (simultaneous broadcasting) KIRO's AM programs on FM
he also acquired AM stations in Spokane and in Boise, Idaho
in an effort to build a Northwest network which did not materialize

"BRING HOME THE BOYS" IS THE IMMEDIATE RESPONSE FROM THE HOME FRONT

Approximately 36,800 Washington men and women in the armed forces were mustered out of service
by the first week in October 1945
about 11,000 more were expected to get their discharge papers by the end of the month
Fort Lewis was designated as the separation center for returning troops arriving at Seattle
twenty ships docked at Seattle's waterfront during the first two weeks in November 1945
bringing about 22,000 soldiers home to the states
western railroads and buses were stressed to the limit
(Private Byron Williams of Seattle, was the 75,000th soldier discharged
on [December 7, 1946] -- exactly four years to day from the attack on Pearl Harbor²⁹⁸
by the beginning of 1946, almost half a million service personnel
passed through the ports of Seattle, Tacoma and Portland

UNITED NATIONS COMES INTO BEING

When the United Nations Charter was ratified the five permanent members of the Security Council
France, the Republic of China, the Soviet Union, the United Kingdom and the United States
and by a majority of the other forty-six signatories
that composed the General Assembly
United Nations officially came into existence -- October 24, 1945
United Nations' governmental organization is based on five principal departments
Security Council, U.N. Secretariat, General Assembly, Economic and Social Council (ECOSOC),

²⁹⁸ Cecil Dryden. *History of Washington*. P. 292.

and the International Court of Justice
(originally there were six departments but the Trusteeship Council suspended operations [1994]
when Palau, the last remaining UN trustee territory, gained its independence)

UNITED NATIONS GIVES A VOICE TO NATIONS THROUGHOUT THE WORLD

United Nations Secretariat carried out the diverse work of the United Nations

United Nations Secretariat provides studies, information and facilities
needed for agency meetings

and carries out tasks as directed by the U.N. Security Council, the U.N. General Assembly,
the U.N. Economic and Social Council and other U.N. bodies

United Nations Secretariat is administered by the Secretary-General

who is elected by the General Assembly

Secretary-General's duties include helping resolve international disputes,

administering peacekeeping operations, organizing international conferences,
gathering information on the implementation of Security Council decisions
and consulting with member governments regarding various initiatives

Secretary-General is assisted by international civil servants worldwide

United Nations Charter provides that staff be chosen by application

of the "highest standards of efficiency, competence, and integrity,"

with due regard for the importance of recruiting on a wide geographical basis

Secretary-General may bring to the attention of the Security Council any matter

that in his or her opinion may threaten international peace and security

United Nations Security Council is charged with maintaining peace and security among countries

it is made up of fifteen member states that hold veto power over substantive

but not procedural resolutions

thus then can block adoption but cannot block the debate of an unacceptable resolution

five permanent members are on the U.N. Security Council

China, France, Russia, the United Kingdom and the United States

ten non-permanent members are selected on a regional basis for a two-year term

they are voted in by the other General Assembly members

while other departments of the United Nations can only make "recommendations"

Security Council members have the power to make binding decisions

known as "United Nations Security Council resolutions"

United Nations General Assembly is the main deliberative assembly for the U.N.

it is composed of all United Nations member states

it meets during regular yearly sessions under a president elected from among the member states

all members have the opportunity to address the assembly

during a two-week period at the start of each session

traditionally, the Secretary-General makes the first statement

followed by the president of the assembly

each member country has one vote in the General Assembly

for important proposals such as recommendations on peace and security;

election of members to agencies; admission, suspension, and expulsion of members;

and, budgetary matters

two-thirds majority of those present and voting is required for passage
all other questions are decided by majority vote

apart from approval of budgetary matters, resolutions are not binding on the member-states
UN's Economic and Social Council (ECOSOC) coordinates economic, social and related programs
fourteen specialized agencies, functional commissions and five regional commissions
have been developed to oversee efforts to improve the lives of people in need
across the world

UN's International Court of Justice (today located in the Peace Palace in The Hague, Netherlands)
is the primary judicial organ of the United Nations
its purpose is to adjudicate disputes among states
this court has heard cases related to war crimes, illegal state interference and ethnic cleansing,
among others, and continues to hear cases

UN's International Court of Justice (today located in the Peace Palace in The Hague, Netherlands)
is the primary judicial organ of the United Nations
its purpose is to adjudicate disputes among states
this court has heard cases related to war crimes, illegal state interference and ethnic cleansing,
among others, and continues to hear cases

ANOTHER INTERNATIONAL COURT ADMINISTERS JUSTICE FOR MOST SERIOUS CRIMES

International Criminal Court [ICC] was created through international discussions
initiated by the General Assembly and began operating [2002]
it is the first permanent international court charged with trying those
who commit the most serious crimes under international law,
ICC is functionally independent of the UN in terms of personnel and financing,
but there is a "relationship agreement" between the ICC and the UN
that governs how the two institutions regard each other legally

AFTER WORLD WAR II AMERICA IS THE WORLD' ONLY SUPERPOWER

World War II had helped America's economy recover
United States now possessed the atomic bomb and was the most powerful nation in the world
America also showed a willingness to use its new weapon
which was extremely frightening to nations without nuclear capability
Because of the length of time FDR served as President (twelve years, one month and eight days)
he was the only president many Americans remembered in office
United States also found itself with a new leader: virtual political unknown President Harry S Truman
had served as Franklin Roosevelt's vice president for eighty-two days
a former U.S. Senator from Missouri, Truman's main qualifications for the vice presidency
seemed to be that he did not take controversial stances and never angered anyone
Roosevelt and Truman shared little in common in terms of their background and political style
FDR was from one of the most prominent families in America
he had been educated at Harvard University and Columbia Law School
Truman came from a mid-Western family of modest means, fought in World War I,
held various odd jobs and had earned his law degree by attending night school

AMERICA MAKES THE ADJUSTMENT FROM WAR TO PEACE

America emerged from the Second World War with a strong economy and relatively few casualties this war, however, devastated other nations on both sides of the struggle

in the Soviet Union the number of casualties in Germany's 872-day siege of Leningrad [September 8, 1941-January 27, 1944] by itself exceeded the total wartime deaths of the British and Americans combined

America's economy became unsettled

economic philosophies ranging from assertive capitalism to active labor agitation competed strikes were frequent as workers tried to make up for wages lost during the war

Conflicts surfaced inside the labor movement

between the conservative American Federation of Labor (AFL) and more liberal Congress of Industrial Organizations (CIO)

WASHINGTON STATE FACES A POST-WAR TRANSITION

Natural resources were still the focus of the state's economic development

80% of manufacturing in the state centered in five major groups:

- lumber,
- food processing,
- paper manufacturing,
- transportation,
- primary metals

United States and Washington State should have been on the verge of an economic boom wartime privation and separation had ended

there was pent-up demand for consumer goods

war plants were available for use by private companies to manufacture consumer goods

However, management was not industry-minded

business leaders lacked entrepreneurship

research and development was only half-hearted

With the end of war, union "no-strike" pledges ended

negotiations usually went smoothly -- there were only occasional strikes

picket lines warned fellow workers and consumers of a labor dispute

most unions supported each other

END OF THE WAR EFFECTS VANPORT, OREGON

After the war, Vanport lost more than half of its population as many war-time workers left the area

With the victory civic leaders debated Vanport's future

it provided ready housing for returning veterans,

but many leaders hoped to demolish the apartments to make room for industrial development

Housing Authority of Portland (HAP) hoped to establish a comprehensive industrial development in place of a "troublesome blighted area"

However, the influx of returning World War II veterans began to arrive at Vanport

to attract veterans and their families, HAP opened Vanport College

(today's Portland State University) with 1,924 students

Many who stayed in Vanport were African Americans who found it difficult to secure other housing

Vanport gained a whispered reputation for welfare clients and crime
although the recorded crime rate was no higher than Portland's

GENERAL JONATHAN MAYHEW WAINWRIGHT IS A NATIONAL HERO

General Wainwright served in World War II Pacific Theater under General Douglas MacArthur as the senior field commander of Filipino and U.S. forces
he was responsible for resisting the Japanese invasion of The Philippines [December 1941-1942]
his men regarded him as a "fighting" general who was willing to get down in the foxholes
his efforts ended with the surrender of the Philippine Island of Corregidor [May 6, 1942]
After General Wainwright's surrender of Corregidor
about 4,000 of the 11,000 American and Filipino prisoners of war
were marched through the streets of Manila, Philippines to incarceration
General Wainwright won the respect of all who were imprisoned with him
Throughout his captivity he had agonized over his decision to surrender Corregidor
he felt that he had let his country down
when he was released from prison the first question he asked was
what did the people back in the United State think of him
he was amazed when told he was considered a hero
General Jonathan Wainwright received his fourth star shortly after the Japanese surrender
he was honored in New York City with a ticker-tape parade
in Washington, D.C., he received the Congressional Medal of Honor
our nation's highest military honor
(although General Douglas MacArthur opposed the honor for General Wainwright)
Wainwright's Medal of Honor citation read: **"(He) Distinguished himself by intrepid and determined leadership against greatly superior enemy forces. At the repeated risk of life above and beyond the call of duty in his position, he frequented the firing line of his troops where his presence provided the example and incentive that helped make the gallant efforts of these men possible. The final stand on beleaguered Corregidor, for which he was in an important measure personally responsible, commanded the admiration of the Nation's allies. It reflected the high morale of American arms in the face of overwhelming odds. His courage and resolution were a vitally needed inspiration to the then sorely pressed freedom-loving peoples of the world."**

WALLA WALLA NATIVE SON RETURNS HOME A HERO²⁹⁹

General Jonathan Mayhew Wainwright IV was born at Fort Walla Walla [August 23, 1883]
the third child of Lieutenant Robert Powell Page Wainwright Josephine Serrell Wainwright
General Jonathan Wainwright was celebrated -- Saturday, November 10, 1945
not be outdone by New York City or Washington, D.C.,
Walla Walla prepared a parade, speeches, and opportunities to pose for pictures
Official activities began with a morning press conference
and then a downtown parade attended by large crowds despite cold weather
following the parade the general gave a speech encouraging Victory Loan bond purchases
That afternoon he received an honorary Doctor of Laws degree from Whitman College

²⁹⁹ Duane Colt Denfeld, Ph.D., HistoryLink.org, Essay 9212, November 18, 2009.

he toured the Veteran's Hospital housed at the former Fort Walla Walla
there he gave a talk to assembled patients
he had one more stop, a talk at the Army's McCaw General Hospital in Walla Walla
An evening dinner at the Grand Hotel had local prominent individuals attending
including two other local heroes who received special attention
Captain Harold Hendricson [1919-1992] recipient of the Silver Star for valor
First Lieutenant Leroy A. Bastron [1915-1979] who had been awarded
the Distinguished Service Cross for extraordinary heroism

HONORS CONTINUE FOR GENERAL WAINWRIGHT

Armistice Day renamed Veterans Day [in 1954] -- Sunday November 11, 1945
saw General Jonathan Wainwright deliver a speech at Whitman College's Borleske Stadium
he called for maintaining a strong military
Following the speech, Mayor Herbert G. West presented him with a new Ford
that community members had purchased for him
this vehicle had a special license plate easily recognized by residents during his ten-day tour
its license plate read: VJ 8-1945 JMW
(Victory over Japan, [August 1945], Jonathan M. Wainwright)
After the Walla Walla ceremonies, the Wainwrights toured the Pacific Northwest
then traveled to the East Coast, with a stop in Detroit where the Ford Motor Car Company
replaced the new Ford with a more expensive Lincoln
(General Wainwright assumed command of the U.S. Fourth Army
headquartered at San Antonio, Texas [January 1946] -- he retired [August 1947]
General Jonathan Mayhew Wainwright died of a stroke at San Antonio [September 2, 1953]
he is buried in Arlington National Cemetery near the graves of his parents
when his wife Adele Wainwright died [1970] she was buried next to him)

LAKE CHELAN IS THE SCENE OF A TRAGIC ACCIDENT³⁰⁰

During a snow storm a Lake Chelan School District school bus
carrying twenty students and a woman, skidded off South Lakeshore Road
and plunged down a thirty-foot embankment into Lake Chelan -- November 26, 1945
the woman and five youngsters managed to escape through broken windows
they reached the shore but the driver and fifteen students drowned in the icy waters
two bodies were recovered soon after the accident,
however, the bus and remaining fourteen victims disappeared
U.S. Navy divers, after searching for a week, finally found the school bus
it was sitting precariously on a ledge in more than 200 feet of water
Bus was carefully hoisted to the surface,
but it contained the bodies of only four students and the driver
Lake Chelan had a reputation of never yielding its dead
and the bodies of the missing nine victims were never be recovered
It was the worst school-related accident in Washington state history

³⁰⁰ Daryl C. McClary, HistoryLink.org, Essay 7645, February 14, 2006.

PUBLIC UTILITIES EXPAND DURING THE WAR YEARS

Number of public utility distributors had grown to eighty-seven -- end of 1945

sale of energy by PUDs had increased by more than 400%

Meanwhile the number of privately owned utilities in the state decreased

from sixty-two to thirty-one -- their sales had increased only about 60% from pre-war years

After World War II, the growing demand for electricity

sparked interest in constructing another power plant supported by the Grand Coulee Dam

one major obstacle to an additional power plant was the inconsistent flow of the Columbia River

during low flow periods the river flow was only ten percent of the maximum spring run-off

as it was, only nine out of the dam's eighteen generators could run year-round

while the remaining nine operated for less than six months a year

HANFORD ENGINEER WORKS CONTINUES TO OPERATE

Civilian Atomic Energy Commission took over from the Army Corps of Engineers -- January 1, 1946
plutonium manufacture at Hanford became partially a peacetime operation

After hostilities ceased, production at Hanford was cut back as the town became virtually uninhabited
except for guards and fire-prevention crews

AIRPLANE INDUSTRY IS HIT BY A LOSS OF MILITARY CONTRACTS

When World War II ended the U.S. government cancelled most of its orders for bomber aircraft
which had been a mainstay of the aircraft industry including Boeing

industry production dropped from 96,000 airplanes [1944] to 1,330 military aircraft -- 1946

employment in the industry fell from a wartime high of 988,700 employees [July 1944]

to 754,200 -- January 1946

Boeing layoffs rose from 20,000 to 70,000 employees

on the day the Boeing plants closed, attorney William M. Allen somewhat hesitantly
took over as company president

Companies like Boeing turned to the commercial market to try to replace military orders

as well as attempting to find ways to diversify into entirely non-aeronautical activities

such as building automobiles

at this time wind-tunnel data discovered in Germany after the war ended helped Boeing engineers

design the nation's first multiengine, swept-wing jet bomber -- the XB-47

UNITED NATIONS MEETS FOR THE FIRST TIME

First meeting of the fifty-one nations of the United Nation's General Assembly took place
in Westminster Central Hall in London -- January 10, 1946

U.N. Security Council met for the first time in London,

this meeting adopted the rules of procedure used by that body -- January 17, 1946

Trygve Lie of Norway was elected the first Secretary General -- February 1

CHANGE COMES QUICKLY TO HANFORD

Most construction workers building the Hanford Atomic Works plant had departed [by August 1945]

but the population in the vicinity remained substantially higher than it had been before the war

planned community of Richland had a population of around 15,000 at war's end
nearby towns, including Pasco and Kennewick, had also expanded considerably
With few exceptions, fission weapons since the end of World War II used plutonium -- not uranium
Oak Ridge, Tennessee plants were either shut down
or converted to other nuclear weapons production processes
Hanford continued to be the primary U.S. production facility for plutonium intended for weapons
However, the future of Hanford remained uncertain
as the United States debated the future of atomic weapons and their role in world affairs

HENRY KAISER HELPS HIS OLD HOME TOWN

With the close of the war, entrepreneur Henry Kaiser constructed factories state-wide
which produced cement, magnesium, iron and steel
Federal government invited private companies to take over its plants
at war-surplus prices a fraction of the original costs
Henry J. Kaiser, the self-made sixty-three-year-old industrialist,
signed a lease for the government's Spokane and Vancouver aluminum plants
at a fraction of the original costs-- 1946
Kaiser paid \$458,000 the first year
however, two billion tons of aluminum were already held in strategic stockpiles
and thousands of warplanes were destined for scrap -- metals market appeared to be grim
in addition the virtue of Spokane's remoteness now appeared to be a liability
Fortune magazine called the move "Henry's folly"
(Henry Kaiser netted \$5.3 million in profit the first year
and the demand for peace-time aluminum grew)

EARTHQUAKE HITS PUGET SOUND

An earthquake centered under Lakewood Center between Tacoma and Olympia
rocked the Puget Sound region
causing an estimated \$250,000 in damage -- 7:18 p.m., February 14, 1946
this quake was felt over an area measuring 165,000 square miles
Seattle's land fill waterfront and tideland industrial area suffered the most damage

PACIFIC COAST PROFESSIONAL BASEBALL REACHES "AAA" STATUS

Advanced level of baseball played on the West Coast was recognized
major league baseball upgraded Pacific Coast League's (PCL) status to "AAA" -- 1946-[1951]
Pacific Coast League developed into one of the premier regional baseball leagues in the nation
although never recognized as a true major league, the quality of play was considered very high
PCL produced a number of outstanding players, including such future major-league stars as
Joe DiMaggio, Ted William, Tony Lazzeri, Paul Waner, Earl Averill, Bobby Doerr
and Ernie Lombardi
many PCL stars went on to play in the major leagues,
but teams in the PCL were often successful enough that they could offer competitive salaries
and avoid being outbid for their stars' services by the major leagues
some players made a career out of the Pacific Coast League

in addition, many major league players came to the PCL to finish their careers

PEARL WANAMAKER IS AN EDUCATIONAL REFORMER OF INTERNATIONAL NOTE³⁰¹

Superintendent of Public Instruction Pearl Wanamaker sponsored the state matching-fund program for local school building construction

she also increased teachers' salaries in every budget she proposed to the legislature

Although she always made sure she was in control, she restructured the State Board of Education changing the composition of board members from professional educators to lay citizens

Pearl Wanamaker had a high national profile -- and knew how to use it:

- she served a term as president of the National Education Association -- 1946-[1947]
- she made time to appear on many national platforms and in many publications to advocate for progressive education policies,
- she received honorary degrees from colleges and universities all over the country

Washington's Superintendent of Public Instruction was named by General Douglas MacArthur to the U.S. Education Mission to Japan

she traveled to that country to study their education system -- 1946 [and again in 1950]

she made proposals for post-war demilitarization and reorganization of Japan's schools

Wanamaker championed and got such innovations in American schools as community colleges, nursing schools and special education for handicapped children and exceptional children alike

Pearl also made enemies in the education community

by separating vocational training from other two-year college educational opportunities

REVIEW OF CIVIL WAR IN CHINA

Chinese Civil War [1927-1949] was fought between

Chiang Kai-shek's Republic of China Kuomintang (KMT or Chinese Nationalist Party)

and Mao Zedong's Red Army led government of Communist China

this Civil War had been set aside to meet outside threats from Japan during World War II

During the last month of World War II Soviet forces launched the mammoth attack

on the Japanese forces occupying Manchuria, China

this operation destroyed the fighting capability of the Kuomintang Army

by the end of World War II the Soviet Union occupied all of Manchuria

With the close of World War II, China's full-scale civil war resumed-- 1946

under the terms of the Japanese surrender dictated by the United States

Japanese troops were ordered to surrender to Kuomintang (KMT) troops

but not to the Communist invaders who were present in some of the occupied areas

KMT had no forces in Manchuria so 700,000 Japanese troops surrendered to the Soviet Union

Chiang Kai-Shek ordered Japanese troops to remain at their post to receive the Kuomintang and not surrender their arms to the Communists

First post-war Chinese peace negotiation was attended by both Chiang Kai-shek and Mao Zedong

both sides stressed the importance of a peaceful reconstruction,

but the conference did not produce any concrete results

battles between the Nationalist Chinese and Communist Chinese continued

³⁰¹ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

even as the peace negotiation was in progress

“COLD WAR” (AS OPPOSED TO A “HOT” WAR) BECOMES INTERNATIONAL POLICY

Winston Churchill in a speech in Fulton, Missouri -- March 5, 1946

spoke of an “iron curtain” dividing Europe into Communism and capitalism

Senator Warren Magnuson disagreed with the English Prime Minister

“I’m a great personal admirer of Churchill, but I can’t agree with his proposal for an Anglo-American military alliance. International disputes should be ironed out through the United Nations.... I’m against appeasement, but we’ve got to understand the vast differences between our governments. Talk that we may be on our way to World War III must stop. Governments reflect people and if they [people] want war, they’ll find it. We must talk peace and work for it -- this can’t be accomplished through fear, suspicion and war talk.”³⁰²

U.S. AIR FORCE STRATEGIC AIR COMMAND (SAC) BEGINS OPERATION

Strategic Air Command (SAC) was created to provide long range bombing capabilities anywhere in the world

SAC was in charge of United States land-based strategic bomber aircraft and land-based intercontinental ballistic missiles (ICBM) and America’s strategic nuclear arsenal -- 1946-[1992]

SAC also controlled aerial refueling tanker aircraft to refuel the bombers in flight, strategic reconnaissance aircraft, command post aircraft, and [until 1957] fighter escorts

LABOR-MANAGEMENT RELATIONS LEADS TO STRIKES AFTER WORLD WAR II

Prices on goods and products long unavailable because of the war shot upward -- 1946

Wage-price controls were lifted and no-strike pledges were discontinued

workers negotiated or struck for wage increases -- employers blamed unions for inflation

During the year after V-J Day [1946] more than five million American workers were involved in strikes lasting on average four times longer than those during the war

TEAMSETER LEADER DAVE BECK IS VERY POPULAR IN SEATTLE

Labor strikes and internal labor warfare had diminished during the war years

Brotherhood of Teamsters Union was active in the movement to maintain labor unity

Dave Beck successfully campaigned to amend the union’s constitution to create the post of executive vice-president

Dave Beck came to be regarded as a respectable citizen of Washington State

his popularity in Seattle rose dramatically -- 1946

he was on the State Parole Board, the Seattle Civil Service Commission and the University of Washington Board of Regents

ten years after he sued *The Seattle Times* for defamation, that paper would say, **“Many are wishing that there could be more Dave Becks in the national labor picture.”** -- 1946

BELLEVUE SQUARE COMES INTO EXISTENCE

³⁰² Shelby Scates, *Warren G. Magnuson*. P. 127.

One of the nation's first suburban shopping centers was opened by developer Kemper Freeman under the name "Bellevue Shopping Square" -- 1946
its anchor store was Seattle-based Frederick & Nelson
which was affiliated with Chicago's Marshall Field & Company
Mall's name was shortened to "Bellevue Square"
New York City's JC Penny opened a second department store [1955]
Seattle-based Nordstrom, then a local shore store, opened [1958] before adding apparel
Nordstrom Best became the third major anchor [1966]
(Today, Bellevue Square offers in the vicinity of 180 retail stores and restaurants
it also offers concierge services, valet parking, and children's play areas)

AFRICAN AMERICAN PROFESSIONAL BASEBALL COMES TO SEATTLE³⁰³

West Coast Negro Baseball League was owned by Abe Saperstein
who also owned the Harlem Globetrotters basketball team
six teams, including the Los Angeles White Sox, San Francisco Sea Lions, Portland Rosebuds,
Oakland Larks and Seattle Steelheads planned to play 110 games that season
using Pacific Coast League baseball stadiums while the home teams were on the road
Seattle Steelheads also played games in Tacoma, Spokane, Bellingham and Bremerton
Seattle manager Paul Hardy destroyed the original West Coast Negro Baseball League
he was a catcher for the Chicago American Giants
but he signed with Seattle before being released by his old team
as a result the West Coast Negro Baseball League banned its teams from Seattle
West Coast Negro Baseball League disbanded after two months
teams were reorganized under new names to barnstorm (play exhibition games)
in the U.S. Midwest and in Latin America

U.S. SENATOR WARREN G. MAGNUSON LOBBIES THE ARMY AIR FORCE

U.S. Senator Magnuson began discussions with the United States Army Air Forces
to buy a jet-powered long-range B-47 Bomber being developed by Boeing
Army Air Forces announced it ordered two prototypes for a new multi-engine, jet-powered bomber,
Boeing's XB-47 -- June 5, 1946
however, fear that Seattle was vulnerable attack by enemy long-range bombers
led the Army Air Forces to propose the airplane be built in Wichita, Kansas
in which case Seattle would lose another 15,000 jobs

SPOKANE INDIANS BASEBALL TEAM'S BUS CRASHES³⁰⁴

Western International League resumed following three years without baseball during World War II
Spokane Indians team left Ferris Field, their home park, aboard a Washington Motor Coach bus
on a road trip that began in Bremerton -- 10 a.m. June 24, 1946
two of the team's players traveled separately in their own vehicle
Team bus stopped in Ellensburg for lunch

³⁰³ David Wilma, HistoryLink.org, Essay 2444, May 22, 2000.

³⁰⁴ Ann M. Colford, HistoryLink.org, Essay 7959, September 23, 2006.

during that time the bus driver took the bus into a garage for some quick repairs
while eating infielder Jack Lohrke received a message

he had been recalled by the Pacific Coast League's San Diego Padres
he hitchhiked back to Spokane

Two-lane U.S. Highway 10 crossed Snoqualmie Pass at that time -- June 24, 1946
as dusk approached the bus climbed the pass in a driving rain
an eastbound black car crossed the center line about four miles west of the summit
Bus driver Glen Berg swerved the bus toward the right shoulder

but the car sideswiped the front corner of the bus which skidded on the wet roadway,
veered off the pavement and took out 125 feet of the protective barrier along the road
before careening over the edge and falling an estimated 300 to 500 feet into the ravine below
in the descent, the bus rolled three times throwing several players out through broken windows
it came to rest right side up and burst into flames

Six team members died at the scene -- another was dead on arrival at King County Hospital in Seattle
next day one of the team's pitchers died from his injuries
two days after the accident the team catcher, who had been seriously burned, also died
eight of the nine dead players had served in the military during World War II

PACIFIC NORTHWEST IS HIT BY ANOTHER EARTHQUAKE

An earthquake struck Vancouver Island, on the Coast of British Columbia, Canada
with a magnitude of 7.3 -- 10:15 a.m. Sunday June 23, 1946

this earthquake was Canada's largest historic onshore earthquake
shaking was felt from Prince Rupert, British Columbia to Portland, Oregon
however, severe damage was restricted because there were no heavily populated areas
near the epicenter located northwest of Courtenay, B.C.

Damage in Seattle was restricted to industrial buildings
built on filled ground in the Duwamish River valley
and on the former tide-flat area at the south end of Elliott Bay
heavy damage in Seattle also occurred to waterfront structures built on pilings
Olympia's fire trucks were moved to the street due to fear that the building would collapse
firehouse doors were nearly jammed because of distortion suffered during the earthquake
Tacoma suffered less spectacular damage than in Seattle or Olympia
but six fires were started when chimneys cracked during ground shaking

BOEING SIGNS A SECOND CONTRACT WITH THE U.S. ARMY AIR FORCES

Boeing was issued a contract for \$1.7 million -- June 28, 1946
to build a full-scale mock-up of a new XB-52 and do preliminary engineering and testing
Design evolved from a straight-wing aircraft powered by six turboprop engines
to the final prototype YB-52 with eight turbojet engines and swept wings
built to carry nuclear weapons for Cold War-era deterrence missions
with a pay-load of up to 70,000 pounds of atomic or conventional weapons
(Production was six years into the future as extensive design and construction changes were tested
Stratofortress [as it was named by the Air Force] took its maiden flight [April 1952])

JAPANESE AMERICAN BEGIN RETURNING HOME FROM THE RELOCATION CENTERS

War Relocation Authority had administered the American Japanese ten relocation centers
120,213 American Japanese were held in custody in internment camps
5,981 new American citizens were born and 1,862 people had died
War Relocation Authority closed its offices -- June 30, 1946
American Japanese began returning home from internment camps and World War II
about two-thirds of the state's prewar Japanese property was returned to the owners
However, American Japanese were prohibited from buying or selling land
if they had not declared their intention to become citizens
those involved in such a transaction became subject to criminal punishment
all land owned by non-citizen aliens was forfeited to the State
some of the resident aliens received federal compensation for property losses
through relocation

MOTHER CABRINI IS NAMED AMERICA'S ONLY CATHOLIC SAINT

(Mother Francesca Xavier Cabrini was beatified and given the title "Blessed" [November 13, 1938])
she was elevated to sainthood by Pope Pius XII -- July 7, 1946
Saint Frances Xavier Cabrini (America's only Catholic saint) is the patron saint of immigrants
miracles attributed to her involve the restoration of sight
to a child who had been blinded by excess silver nitrate in the child's eyes
and healing a terminally-ill member of her congregation)
(Saint Frances Cabrini School in Lakewood, Washington was founded [1953])
Catholic high schools and Cabrini College in Radnor, Pennsylvania carry her name
several hospitals and medical centers around the world are named in her honor
as does a housing project in Chicago
Cabrini Mission Foundation is committed to advancing St. Frances Xavier Cabrini's
mission and legacy of healing, teaching, and caring around the world
National Shrine of Saint Frances Xavier Cabrini was dedicated [1955]
as part of Mother Cabrini High School in Manhattan, New York
street to the west of the shrine was renamed Cabrini Boulevard in her honor
Milan, Italy's beautiful Central Railroad Station is named Stazione Francesca Cabrini)

PRESIDENT HARRY TRUMAN VISITS WASHINGTON

President Harry S Truman was in need of a vacation
U.S. Senator Warren Magnuson, Governor Mon Wallgren and President Truman
went fishing on Puget Sound on the official state boat -- summer 1946
Magnuson later confided he feared adverse publicity if they returned with no fish
**"so we did procure two or three good salmon -- like women on their ages, I'll never
admit whether I caught them myself, or whether I helped someone else pull them in."**³⁰⁵
on their return to Olympia, Truman was photographed grinning ear to ear
he showed a fish as though he had caught it himself -- he hadn't
being skunked after hours of trying, Truman took a nap

³⁰⁵ Shelby Scates, *Warren G. Magnuson*. P. 127-128.

Magnuson had spotted a nearby fishing boat operated by a Scandinavian out of Ballard
Washington's senior U.S. senator purchased two newly-caught salmon
Truman got his picture in the newspapers with a twenty-pound fish
(Years later at a political rally in Ballard
Senator Magnuson was approached by the Norwegian fisherman who alleged
that Magnuson almost destroyed his marriage
Maggy asked how he could have done that
the fisherman replied explained he had been sharply questioned one day
when he returned home with no fish
he told his wife he had sold the day's catch
to the Senator, the Governor and the President of the United States
after hearing this tale, his wife accused him of spending too much time
in the Leary Street tavern or, even worse, of lying)

HANFORD CHANGES MANAGING COMPANIES

DuPont Company relinquished its contract as operator-manager -- September 1946
at the request of the federal government General Electric
assumed management of the Hanford Works
under the supervision of the newly created Atomic Energy Commission
As the Cold War began, the United States faced a new strategic threat
from the rise of the Soviet Union's nuclear weapons program

STATE ELECTION RESULTS IN A REPUBLICAN LANDSLIDE

With the end of World War II it was state legislative Democrats out and Republicans in
this was an abrupt change
after fourteen years of Franklin D. Roosevelt's "New Deal"
and two years Truman's "Fair Deal" had generated enormous federal growth
(Hugh B. Mitchell had been appointed to the U.S. Senate [January 10, 1945]
to fill the vacancy created by the resignation of Monrad "Mon" Wallgren
when he became governor of the state)
in the November 5, 1946 off-year election, U.S. Senator Mitchell lost his bid for the office
as former Tacoma mayor Republican Harry P. Cain won the seat
Following the pattern of change in the Congressional election -- November 5, 1946
Republican Party won every available House seat in Congress representing Washington
except that held by Second District Democrat Representative Henry Jackson
First District candidate Republican Homer R. Jones, Bremerton
defeated incumbent Democrat Hugh De Lacy
Jones served one term in the First District [1947-1949]
Second District Democratic Congressman Henry Jackson retained his seat in Congress
Republican candidate Fred Norman of Raymond
defeated the incumbent Democrat Charles R. Savage
to take back his seat in the Third District
(Savage had previously defeated Norman for the seat two years previously [1944])
Fourth District Republican Hal Holmes retained his Fourth Congressional District Seat

Fifth Congressional District Representative Republican Walter Horan retained his seat
Congressman Thor C. Tollefson, Republican of Tacoma
replaced Sixth District Democratic Congressman John M. Coffee
(U.S. Representative Tollefson served nine terms [1947-1965])
U.S. Senator Warren G. "Maggy" Magnuson and U.S. Representative Henry "Scoop" Jackson
were the only Democrats left representing Washington State in the national capital
Races for state legislative seats showed the same results -- November 5, 1946
Democratic control of state politics began to slip
State Senate seats shifted from thirty-two Democrats to twenty-three
as Republicans acquired twenty-three seats up from fourteen
this left the State Senate in a deadlock
with Democrat Lieutenant-Governor Vic Meyers possessing the deciding vote
State House of Representatives saw the Democrats lose the majority
as they dropped from sixty-three to twenty-eight
Republicans leaped from thirty-six state representatives to seventy-one

REPUBLICAN ALBERT F. CANWELL IS ELECTED TO THE STATE LEGISLATURE

One of the newly elected state House of Representatives members was Republican Albert F. Canwell
who served as a Freshman representative from Spokane's Fifth Legislative District
before entering politics he had been an itinerant worker, a deputy sheriff, a printer,
and an occasional newspaper employee
once elected he set about making good on his campaign pledge
"to do something about the Communist situation"
he would soon make a name for himself

PLANE CRASH ON MOUNT RAINIER³⁰⁶

Six Curtis Commando R5C transport planes carrying more than 200 U.S. Marines
departed from San Diego on a six-and-a-half hour, non-stop flight
to Naval Air Station Sand Point in Seattle -- December 10, 1946
These aircraft, flying entirely by instruments at an altitude of 9,000 feet,
encounter heavy weather over southwest Washington
four turned back and landed at Portland Airport
one managed to land safely in Seattle
but the sixth plane carrying thirty-two Marines vanished
it had flown into the side of 14,410 feet high Mount Rainier
Search-and-rescue aircraft, hampered by continuing bad weather, are unable to fly for a week
ground searches prove fruitless
after two weeks the search for the missing aircraft was suspended
(Mount Rainier National Park Ranger discovered the wreckage on South Tahoma Glacier [July 1947]
search parties examined the debris and confirm that it is the missing Curtis Commando
four weeks later, the bodies were found high on the face of the glacier
but extremely hazardous conditions forced authorities to abandon plans to remove them

³⁰⁶ Daryl C. McClary, HistoryLink.org, Essay 7820, July 29, 2006

all thirty-two U.S. Marines remain entombed forever on Mount Rainier
to this day this remains Mount Rainier's greatest tragedy)

SEVERE FLOODING HITS THE GREEN RIVER VALLEY³⁰⁷

Rising flood waters caused hundreds of families near Kent to leave their homes
dairymen moved their herds from valley pastures to higher ground
Flooding in the Green and White River valleys were common occurrences
almost always during the months of [November] or December
warm Chinook winds from the north melted heavy mountain snowfalls and caused heavy rain
as usual, the disaster renews discussions of a flood control dam
needed high upstream on the Green River
Flooding that year was greater than most
causing the river to rise over its banks and spread throughout the flat valley
warnings were issued -- afternoon December 11, 1946
ranking officers of the state patrol, the army and navy, and the sheriff's office
rushed to Kent to prepare for evacuation
U.S. Army brought thirteen amphibious trucks, known as "ducks"
these were a familiar vehicle to valley residents
Red Cross organized cots and blankets
throughout the flood the second floor of the Kent City Hall became a temporary home
for more than 100 men, women and children
other families were taken in by neighbors who lived on higher ground
St. James Episcopal Church became the site of a 24-hour-a-day canteen
in five days, 3,000 meals were served to evacuees, soldiers, police officers, and volunteers
snacks were prepared around the clock
Flood waters hit their peak and downtown Kent became a lake -- December 12
some businesses were able to keep most of the water out with sandbags and pumps
but many suffered from damaged property and merchandise
it took weeks for the water to go down

DISCUSSIONS OF A DAM ON THE GREEN RIVER BEGIN ANEW³⁰⁸

(U.S. Army Corps of Engineers had surveyed the flood problem of the valley [1930s]
they intended to build a dam a few miles upstream from Auburn
but the plan was opposed by fishing interests due to the damage to spawning fish
next World War II intervened in Army Corps of Engineers efforts to develop new plans)
Army engineers were brought back for consultation following the 1946 flood
they recommended construction of a storage dam at Eagle Gorge
far to the east into the Cascade Mountains
(Congress adopted the Eagle Gorge Dam as a federal project [1950]
advanced planning continued throughout most of the decade)

³⁰⁷ Alan J. Stein, HistoryLink.org, Essay 3574, September 17, 2001

³⁰⁸ Alan J. Stein, HistoryLink.org, Essay 3574, September 17, 2001

U.S. SENATOR HUGH B. MITCHELL RESIGNS FROM OFFICE

Democratic U.S. Senator Hugh B. Mitchell had not won his bid for reelection
he resigned his position before his term of office was up -- December 25, 1946
Mitchell's successor, Republican Senator Harry P. Cain, was appointed to the U.S. Senate seat
as his replacement by Democratic Governor Mon Wallgren
U.S. Senator Hugh B. Cain was sworn into office early
prior to his term in the U.S. Senate Cain had served as Mayor of Tacoma
in that position he was seen as a progressive or even a liberal
Senator Cain was an orator and a writer of exceptional ability
he was known for his colorful, if convoluted, style of speaking
(After serving three terms in the U.S. Senate he was widely viewed
as a defender of the civil liberties of individuals accused of being security risks
and as a community activist and moderate Republican
today Senator Cain is primarily remembered
for his very conservative and often highly controversial views as a member of the Senate)

GENERAL GEORGE MARSHALL IS APPOINTED SECRETARY OF STATE

President Harry Truman named five-star General George C. Marshall to the post -- January 1947
writing in his diary on January 8, 1947, the president said, "**Marshall is the greatest man of World War II. He managed to get along with Roosevelt, the Congress, Churchill, the Navy and the Joint Chiefs of Staff and he made a grand record in China. When I asked him to [be] my special envoy to China, he merely said, 'Yes, Mr. President I'll go.' No argument only patriotic action. And if any man was entitled to balk and ask for a rest, he was. We'll have a real State Department now.**"

COLD WAR BECOMES A FEARED REALITY

British government lacking men and money informed Washington, D.C.
that Great Britain could no longer play the role of world power -- early in 1947
they publicly announced their withdrawal from Ceylon and Burma
they privately informed the U.S. State Department
of their intention to withdraw from Greece and Turkey
they gave notice they would turn over Palestine to the United Nations
Great Britain's announcements ended America's flirtation with isolationism
as America's Fear of Communism grew the United States Communist Party
diminished in importance to near political impotence

ATOMIC ENERGY COMMISSION EXPANDS THE HANFORD FACILITY

Residents of the Tri-Cities of Richland, Pasco and Kennewick were not really certain
they could depend on Hanford for jobs until the federal government
United States decided to rely heavily on its nuclear arsenal as a deterrent in the Cold War
newly created Civilian Atomic Energy Commission announced plans to expand Hanford
to produce nuclear weapons by building more atomic reactors
and accelerating the pace of plutonium production
Hanford underwent several significant expansions

in this second burst of growth which lasted (through [1955] or so)

Hanford became the nation's main supplier of fissionable material for bombs
five new plutonium production reactors, two new chemical reprocessing plants
and eighty-one underground waste storage tanks were constructed within a ten-year period
Hanford generated an ever-increasing amount of plutonium
as well as high levels of radioactive and chemical wastes,
some was "stored" on the Hanford site
and some was released into the atmosphere, the Columbia River and surrounding lands
(classified documents released in the [1980s] revealed there had been
many extensive releases of radioactivity into the air, water and ground
at Hanford during and after the World War II years
lengthy and involved efforts to clean up the extensive contamination at the site got underway
as did lawsuits by "downwinders" and others affected by the contamination
only after the collapse of the Soviet Union [early 1990s]
were most of the major facilities at Hanford deactivated)

IRRIGATION OF EASTERN WASHINGTON BECOMES A PRIORITY

Federal money became available for construction of improvements to irrigation systems -- 1947
two types of irrigation companies existed:

- speculator companies combined irrigation and land speculation
because their profits centered on increased land values
they were interested in irrigating company land first
- water right companies that attached value to the water -- not the land
their huge costs demanded quick returns
so they were often bought out by speculator companies

Commercial development rapidly expanded as investors and speculators were attracted
by the prospect of increased property values
large irrigation systems under single management provided the necessary water to farmers
land owners benefited from the availability of water
land companies benefited as the land became productive and increased in valuable

PUBLICALLY OWNED NORTHWEST PUBLIC POWER ASSOCIATION NEEDS TO EXPAND

Public power had strong backing from organized labor and farm organizations
Public power agencies recognized they faced a crisis
there was no surplus of federal power in the Northwest
no cushion to absorb the rapidly expanding loads of the future

WASHINGTON WATER POWER COMPANY EXPANDS TO MEET INCREASED DEMAND

Washington Water Power (WWP) was a private water and electric power development company
owned by shareholders
WWP was faithfully supported by the *Spokesman-Review* newspaper
as the private company fought with public power companies and the Grand Coulee Dam projects
Washington Water Power desperately needed to increase its level of power generation
end of World War II brought increased demand for electrical power

WWP was not prepared to meet that demand so the company undertook temporary measures such as increasing storage capacity on Coeur d'Alene Lake, raising flashboards atop several dams to extend the height, channel at Chelan was deepened, height of Long Lake was increased -- but all of these efforts fell short

PUBLIC-PRIVATE POWER COMPANY FUED IS RENEWED

Public power agencies had a preference and priority to use Columbia River power but they could not prosper in a region whose normal growth was stunted by power shortages Recognizing this fact, publicly-owned Northwest Public Power Association joined with private utilities of the region in support of regional welfare -- February 4, 1947 a statement of policy declared **"...that the economic development of the Northwest is directly dependent upon the continuing construction by the federal government of multiple-purpose projects on the Columbia River and its tributaries. The utilities of this region have planned their operations and proceeded under the assumption that the federal government has undertaken the responsibility for developing and marketing the hydroelectric energy of the Columbia River.... A total of 1,565,000 kilowatts of new generating capacity will be needed by November 1, 1953, to keep abreast with growing demands in the area."**³⁰⁹

Washington Water Power found itself engaged in not one, but two battles
first to build new generating capacity
second to remain an investor-owned utility)

SERVICEMEN'S READJUSTMENT ACT OF [1944] (G.I. BILL) REACHED ITS PEAK USAGE

G.I. Bill accounted for more than 50% of all college enrollments -- 1947
2.2 million Veterans were in college or universities
3.5 million more vets attended other schools
an additional 1.4 million underwent on-the-job training
and 690,000 Veterans were in farm training
Veterans Administration backed more than 2 million home loans, including 563,000 in 1947 alone
U.S. government guaranteed repayment of the home loan and kept interest rate down

VANCOUVER BARRACKS IS CLOSED BY THE FEDERAL GOVERNMENT

(Hudson's Bay Company had established Fort Vancouver [1822]
this facility became the property of the United States
Columbia Barracks was established [May 13, 1849]
by Captain John S. Hatheway and two companies of the 1st U.S. Artillery
this post served Oregon and Washington territories
during the early years of the Oregon Trail)
(Columbia Barracks was renamed Fort Vancouver for the second time [July 13, 1853]
this Fort Vancouver continued to protect pioneers crossing the continent
and played a central role in the Indian Wars of the [1850's, 1860's and 1870's])
(Next the fort became Vancouver Barracks [April 5, 1879])

³⁰⁹ *Power Unlimited* published by the Northwest Public Power Association, P. 17.

when the 3,019-acre post became the U.S. Army Headquarters for the region
Vancouver Barracks was used during World War II
 as a staging area for the Seattle Port of Embarkation
 it had billeting space for 250 officers and 7,295 enlisted persons)
Vancouver Barracks was abandoned as a military post -- 1947
(Congress designated Fort Vancouver and Vancouver Barracks as a National Monument [1948]
 it became a National Historic Site [1961]
 Congress added 366 acres that included Fort Vancouver [1996])

WASHINGTON LEGISLATURE REACTS TO THE “RED SCARE” OF THE COLD WAR

On the day before adjournment of the state legislative session
Freshman State Representative Republican Albert Canwell making good on his campaign pledge
 “to do something about the Communist situation”
 pushed through House Concurrent Resolution No. 10
 to create a new legislative committee
“Joint Legislative Fact-Finding Committee on Un-American American Activities” was created
 to investigate the presence of Communists in state politics -- March 8, 1947
 when many believe that Communists were infiltrating all levels of government
House Concurrent Resolution No. 10 passed during the “Red Scare”

 it read in part: **“Whereas, these are times of public danger; subversive persons and groups are endangering our domestic unity, so as to leave us unprepared to meet aggression, and under cover of the protection afforded by the Bill of Rights these persons and groups seek to destroy our liberties and our freedom by force, threats, and sabotage, and to subject us to the domination of foreign power; and**

Whereas, recent announcements by responsible officers of the federal government indicate the seriousness of the problem. J. Edgar Hoover, Director of the F.B.I. recently said: ‘During the past five years, American Communists have made their deepest inroads upon our national life. Their propaganda, skillfully designed and adroitly executed, has been projected into practically every phase of our national life. The Communist influence has projected itself into newspapers, books, radios, and the screen, some churches, schools, colleges, and even fraternal orders have been penetrated....’

Whereas, State legislation to meet the problem and to assist law enforcement officers can best be based on a thorough and impartial investigation by a competent and active legislative committee... [which] shall investigate the activities of groups and organizations known or suspected to be dominated or controlled by a foreign power, which activities effect the conduct of this state, the functioning of any state agency, unemployment relief and other forms of public assistance, educational institutions of this state supported in whole or in part by state funds, or any political program.”³¹⁰

Committee members were charged with investigating groups and individuals that **“foment internal strife, discord and dissension; infiltrate and undermine the stability of our American institutions; confuse and mislead the people, and impede the normal progress of our state and nation either in war time or a peace time economy.**

³¹⁰ Melvin Rader, *False Witness*. P.212.

Albert Canwell became the committee chairman of what became known as the Canwell Committee and was its chief inquisitor

WASHINGTON STATE LEGISLATURE IMPOSES A LOYALTY OATH

Loyalty oaths were common during the Cold War era
forty-two and more than 2000 local jurisdictions adopted laws
which required such oaths from public employees
Washington's legislators approved a loyalty oath requirement -- March 8, 1947
for state employees and teachers who must swear loyalty to the federal and state governments
and renounce all other forms of government
(this law along with amendments remained in place until [1956])

FEDERAL GOVERNMENT IMPOSES A LOYALTY PROGRAM

Concerned with Soviet subversives penetrating and infiltrating the United States government
using American citizens who had sworn oaths of allegiance to foreign powers during war time
President Harry S Truman instituted a Loyalty Program -- March 21, 1947
loyalty oaths and background investigations were required of persons
suspected of membership in organizations
that advocated violent and anti-democratic programs
these oaths were repeatedly challenged in court on the grounds that they violated
both the freedom of speech and the freedom of association
United States Supreme Court avoided addressing these issues

CONGRESS PASSES THE LABOR-MANAGEMENT RELATIONS ACT

Republicans in Congress had the votes to "curb the power of big labor" -- April 11, 1947
(National Labor Relations Act (NLRA) had passed Congress [1935]
informally known as the Wagner Act, labor unions were able to require workers to join them)
as a response to the rising union movement and Cold War hostilities,
Congress amended the NLRA
Congress wrote the Labor-Management Relations Act (informally the Taft-Hartley Act)
this bill was introduced in Congress by Senator Robert Taft of Ohio
and Congressman Fred Hartley of New Jersey
this sweeping change to the NLRA was business' reply
to the post-World War II labor organizing upsurge

TAFT-HARTLEY ACT RESTRICTS UNION ACTIVITIES

Employers were said to have a constitutional right to express their opposition to join unions
so long as they did not threaten employees with reprisals for their union activities,
or promise benefits as an inducement to refrain from joining
Taft-Hartley Act was seen as a method of demobilizing the labor movement
by imposing limits on labor's ability to strike and by prohibiting radicals from union leadership:

- Congress held unions accountable for a breach of contract;
- Congress required unions to make financial reports;
- Congress held union leaders to an oath that they were not Communist Party members

Many union members wanted to keep their “closed” (union members only) shops which required that only members of the union were allowed to work on the job they argued that union members paid union dues to receive union benefits and protections so all employees should be required to pay their fair share for the services they received

Taft-Hartley declared closed shops agreements unlawful

but did permit closed shops under certain conditions

Taft-Hartley identified a list of unfair labor practices:

- it forbid “hot” (non-union) cargo disputes;
- it outlawed “secondary boycotts” which forbid members of the union from honoring picket lines of another union unless both unions worked for the same contractor;
- it required unions give sixty days’ notice before striking

Taft-Hartley permitted states to pass anti-union shop agreements

which allowed closed shops only if state law allowed and a majority of workers voted for it further, this law requires that all workers must be represented by the union regardless of whether they were union members or not

“Right-to-work” (non-union workers) state laws flourished -- especially in the South

these prohibited union rules allowing only members on the job site

unions opposed these state laws as they believe the laws were intended to keep unions weak

Taft-Hartley also gave the United States President the power to seek an injunction

which would order strikers back to work

for the first time Federal injunctions against strikes could be imposed

Taft-Hartley required an eighty-day “cooling off” period where employees must report for work

if the strike created a national emergency involving national health or safety

Taft-Hartley forbade unions to make contributions to candidates in Federal elections

Amendments to the original Taft-Hartley Act also gave employers the right to file a petition

asking the National Labor Relations Board to determine

if a union represented a majority of the company’s employees

they also allowed employees to petition either to decertify their union,

or to invalidate union security provisions of any existing collective bargaining agreement

Labor leaders called it the “slave-labor bill”

President Harry S Truman argued that it was a “dangerous intrusion on free speech”

and that it would “conflict with important principles of our democratic society”

Truman vetoed the Taft-Hartley Act

DOROTHY STIMSON BULLITT PURCHASES KING RADIO

Dorothy Bullitt, widow of Democratic Party leader Scott Bullitt, bought a small AM radio station

KEVR’s call letters were changed to KING (for King County, Washington)

this was the beginning of her broadcast empire

(she received a license for an FM station, KING-FM, the next year [1948]

and King television station Channel 5 [1949])

CHANGE IN WASHINGTON CONGRESSIONAL REPRESENTATION

Third District Republican Congressman Fred B. Norman suffered from a cardiac condition

he had worked on farms, in logging camps, sawmills, shingle mills, and shipyards [1901-1922]

Fred Norman had served in the State House of Representatives [1919-1920]
he engaged in the wholesale and retail tobacco and candy business [since 1922]
Norman had served as member of the State Senate [1925-1935]
Congressman Fred B. Norman was found dead in his Washington, D.C. residence -- April 18, 1947
sixty-five-year-old U.S. Representative from Raymond, Washington
was first elected to Congress [1942] -- he served one term [1943-1945]
he lost his bid for re-election when he was defeated by Democrat Charles R. Savage [1944]
but Congressman Fred B. Norman reclaimed his federal House of Representatives seat
in the [1946] Republican sweep
Republican Russell V. Mack, the owner and publisher of the *Hoquiam Daily Washington* newspaper
was appointed to the vacant seat by Governor Mon C. Wallgren
(Congressman Mack will hold office for six terms [1947-1961])

SECRETARY OF STATE GEORGE MARSHALL ANNOUNCES A PLAN TO AID EUROPE

Just a few months after George Marshall's appointment as Secretary of State
State Department leadership, with expertise provided by George Kennan and William Clayton,
developed the European Recovery Program (ERP) or "Marshall Plan"
Marshall Plan was intended primarily to rebuild the economies and spirits of Western Europe
George Marshall shared the proposal with the world in a speech at Harvard -- June 5, 1947
Secretary of State George Marshall was convinced that the key
to restoration of political stability in Europe laid in the revitalization of its national economies
he insisted that it was up to the countries of Europe to decide what they needed
further, he saw political stability in Western Europe
as a key to blunting the advances of Communism in that region

CONGRESS OVERRIDES THE PRESIDENT'S VETO

Both houses of Congress re-passed the Labor-Management Relations Act (Taft-Hartley Act)
over the president's veto by a two-thirds vote of both bodies
Taft-Hartley Act went into effect -- June 23, 1947
(in spite of his strong stance in opposition, President Truman subsequently imposed the measure
twelve times during his presidency)

WORLD'S FIRST FLYING SAUCERS ARE REPORTED NEAR MT. RAINIER³¹¹

While flying in his private airplane near Mount Rainier
en route from Chehalis, Washington, to his home in Boise, Idaho
Kenneth Arnold was startled by a bright light -- 3 p.m. June 24, 1947
he described nine mysterious high-speed objects along the crest of the Cascade Range
"flying like a saucer would"
they appeared metallic and measured about fifty feet across
they were roughly circular in form except for one crescent-shaped object
he watched them for approximately two minutes until they disappeared over Oregon
During a refueling stop in Pendleton, Oregon, Kenneth

³¹¹ Walt Crowley, HistoryLink.org, Essay 5336, March 1, 2003

Arnold described his experience to *East Oregonian* newspaper editor Nolan Skiff
he said the vehicles flew in an undulating formation
“like a saucer would if you skipped it across the water”³¹²
they weaved in and out of the mountain peaks at speeds approaching 1,400 miles per hour
Skiff’s report of Arnold’s encounter with “nine bright saucer-like objects”
was picked up by the Associated Press and made national headlines [June 26, 1947]
Arnold’s report made international headlines
hundreds of similar accounts of flying saucers locally and across the nation were reported

AN EXPLODING FLYING SAUCER IS REPORTED OVER MAURY ISLAND³¹³

Shortly after Kenneth Arnold’s [June 24, 1947], encounter with “flying saucers”
Tacoma timber salvager Harold Dahl reported an explosion [June 21, 1947]
of a giant doughnut-shaped “flying saucer” had occurred near Maury Island in Puget Sound
Dahl reportedly observed six large doughnut-shaped vehicles
one appeared distressed and spewed chunks of debris that rained on his boat
Harold Dahl’s son was injured and his dog was killed by the debris
Dahl also said that a mysterious “man dressed in a black suit” had menaced him
and had fogged his photographs of the incident
After taking shelter on Maury Island, Dahl returned to Tacoma
where he showed the evidence to his employer, Fred Crissman
Crissman offered two fragments of the alleged “Unidentified Flying Object” (UFO)
to pulp science fiction magazine publisher Ray Palmer
Ray Palmer hired Kenneth Arnold, the first observer of a flying saucer, to investigate
Arnold called in two U.S. Army specialists who had followed up on his own UFO report
these soldiers took a box of evidence for examination but they were killed
when their B-25 airplane crashed en route from Tacoma
to San Francisco [August 1, 1947]
Tacoma Times reported that the plane might have been “sabotaged or shot down”
to prevent inspection of its cargo
FBI immediately began an investigation of the whole incident
Dahl and Crissman confessed that they had fabricated the flying saucer story
their “debris” consisted of bits of scrap and pumice from a Maury Island beach
U.S. Army and crash survivors confirmed that the plane wreck was caused by an engine fire
(Despite these findings, the dramatic “Maury Island Mystery” spawned persistent rumors
that “men in black” and a government conspiracy were suppressing the truth about flying saucers
Seattle Museum of the Mysteries arranged for an analysis of debris
recovered from the B-25 crash
preliminary findings indicated that mineral remains
were ordinary igneous rocks or, possibly, fragments of a meteor [April 2007])

FIRST PUBLISHED PHOTOGRAPHS OF A FLYING SAUCER APPEARS

³¹² Walt Crowley, HistoryLink.org, Essay 5336, March 1, 2003.

³¹³ Walt Crowley, HistoryLink.org, Essay 2068, January 1, 2000.

Off-duty U.S. Coast Guard Yeoman Frank Ryman,
standing in his yard in Lake City north of Seattle³¹⁴
snapped the first photograph of an alleged “flying saucer” -- afternoon July 4, 1947
which showed a small bright disc against a dark sky
(it was published by the *Seattle Post-Intelligencer* the following morning)
Ryman’s photo made front page news amid a rash of UFO sightings
triggered by press reports of Kenneth Arnold’s encounter
with nine flying “saucer-like” objects over the Cascades [June 24, 1947]
(later analysis concluded that Ryman had photographed a weather balloon)

DAVE BECK ADVANCES IN THE RANKS OF THE BROTHERHOOD OF TEAMSTERS

Beck marshaled his forces and defeated a proposed dues increase to fund new organizing efforts
subsequently, he was named Executive Vice-President of the Teamsters International -- 1947
this was a post which was created specifically for him
Brotherhood of Teamsters grew into the largest union in the nation with over one million members
Beck worked to organize national departments of the teamsters for each craft
much like the old American Federation of Labor (AFL)
garage workers, cannery workers, laundry workers, truckers, and many others
made up their own section of the Teamsters Union

MARSHALL PLAN TO AID EUROPE GOES INTO EFFECT

Nations of Europe led by Great Britain and France met in Paris
to discuss their need for economic aid from the United States
sixteen nations, including Germany, became part of the program
country by country they shaped the assistance they required in direct financial aid
with administrative and technical assistance provided by the United States
in addition, Greece and Turkey were given military assistance
Marshall Plan nations were assisted greatly in their economic recovery
European nations received nearly \$13 billion in American aid
which initially resulted in shipments of food, staples, fuel and machinery from the U.S.
later investments were made in the industrial capacity of Europe

BOEING CONVERTS THE MILITARY B-29 SUPERFORTRESS TO CIVILIAN USE

Boeing’s 377 Stratocruiser was a large long range airliner built after World War II
it was developed from the B-29 Superfortress used for troop transport and bomb loads
Stratocruiser’s first flight took place -- July 8, 1947
This aircraft was powered by four piston engines
but it had surprisingly low fuel consumption for the era
because it had a pressurized cabin, a relatively new feature to transport aircraft at the time,
it was able to cruise at about 32,000 feet where the air is considerably thinner
Boeing President William M. Allen promised to start hiring people back
as soon as airlines ordered the luxurious Stratocruiser

³¹⁴ Walt Crowley, HistoryLink.org, Essay 871, February 8, 1999.

Boeing's 377 Stratocruiser had two decks -- most Stratocruisers had economy seats on both decks but the upper deck was primarily for economy class customers while the lower deck held a VIP lounge and bar once the plane reached cruising altitude passengers could walk down and get a drink airlines were able to make transoceanic flights easier and faster with the new aircraft which made scheduled trips to places like Hawaii Unfortunately, the elegant Stratocruiser was not the hoped-for financial breakthrough for Boeing B-377 did not have great reliability as she experienced chronic problems with the extremely complex-cylinder R-4360 engines and the associated propellers only fifty-six Stratocruisers were built for airlines this was not quite enough to pull the company out of its post-war slump

U.S. ARMY AIR CORPS BECOME THE U.S. AIR FORCE

While aboard the presidential aircraft *Sacred Cow*, President Harry S Truman signed the National Security Act -- July 26, 1947 establishing the United States Air Force as a separate service under the National Military Establishment (renamed the Department of Defense [1949] as instructed, the Air Force **“shall be organized, trained and equipped primarily for prompt and sustained offensive and defensive air operations. The Air Force shall be responsible for the air forces necessary for the effective prosecution of war except otherwise assigned and, in accordance with integrated joint mobilization plans, for the expansion of the peacetime components of the Air Force to meet the needs of war.”**

FEDERAL HOUSE UN-AMERICAN ACTIVITIES COMMITTEE ATTACKS THE FILM INDUSTRY

Congress's anti-Communist investigative committee achieved its greatest fame and notoriety with its investigation into the Hollywood film industry -- October 1947 Federal House Un-American Activities Committee began to subpoena screenwriters, directors and other movie professionals to testify about their own or others suspected membership in the Communist Party, their association with Communists, or their support of Communism Committee hearings centered on the question: **“Are you now or have you ever been a member of the Communist Party of the United States?”** ten of the first group of film industry witnesses to be questioned decided not to cooperate they cited their First Amendment rights of free speech and free assembly witnesses who were determined not to cooperate with the Committee claimed their Fifth Amendment protection against self-incrimination while this usually protected them from a contempt of Congress citation it was considered grounds for dismissal by many government and private industry employers as one witness put it, it was possible to become known as a “Fifth Amendment Communist” also, the legal requirements for Fifth Amendment protection were such that a person could not testify about his own association with the Communist Party and then refuse to “name names” of colleagues with Communist affiliations

thus many faced a choice between “[a] crawl through the mud or to be an informer”
“Hollywood Ten” as they were called, were sentenced to prison for contempt of Congress
two of the ten were sentenced to six months -- the rest to a year [November 24, 1947]

HOLLYWOOD REACTS TO THE SENTENCING OF THE “HOLLYWOOD TEN”

Eric Johnson, President of the Motion Picture Association of America, issued a press release
on behalf of the heads of the major studios: **“We will not knowingly employ a Communist or a
member of any party or group which advocates the overthrow of the government of the United
States....”**³¹⁵

this capitulation marked the beginning of the “Hollywood Blacklist”
despite the fact that hundreds would be denied employment,
studios, producers and other employers
did not publicly admit a Blacklist even existed

AIRLINER CRASH AT SEA-TAC KILLS NINE³¹⁶

Alaska Airlines Douglas C-54 charter airliner with twenty-five passengers and three crewmembers
left Anchorage bound for Seattle [November 27]

but because of bad weather and mechanical problems the flight was delayed at Yakutat
for two days and at Annette Island, Alaska for one day

Foggy conditions impeded efforts to land at Paine Field and Boeing Field -- November 30, 1947
C-54 charter made a third try -- this time at Sea-Tac Airport -- approximately 2:25 p.m.

four-engine Douglas airliner landed from the northeast and ran off the end of the runway
it collided with an automobile on the Des Moines Road
six people were dead at the scene and another three died in the hospital

An investigation by the Civil Aeronautics Board found that the pilot approached the runway too high
he had not properly lined up with the runway
pilot was assessed a penalty of \$1,000 for violations of Civil Air Regulations

BOEING TESTS ITS FIRST JET BOMBER³¹⁷

Boeing’s prototype XB-47 represented the revolutionary B-47 “Stratojet” family of jet bombers
maiden flight took off from Boeing Field -- December 17, 1947
with test pilot Bob Robbins at the controls

(Design of the B-47 began in [1943] as the first practical jet engines were being perfected)
postwar development of the jet bomber was assisted by insights gained from
captured German jet aircraft research data -- particularly experiments with swept wings
which permitted higher speeds ultimately breaking the sound barrier (supersonic speeds)

XB-47 was a strategic bomber with six jet engines slung in pods below backward swept wings
speeds of almost 600 miles per hour and a range of 4,000 miles would be achieved
this airplane featured rocket-assisted takeoff and the ability to deliver nuclear weapons
(U.S. Air Force ultimately ordered more than 2,000 B-47s between 1947 and [1956])

³¹⁵ Frank Manchel, *Film Study: An Analytical Bibliography*, Volume 4, P. 2286.

³¹⁶ David Wilma, HistoryLink.org, Essay 3067, March 06, 2001.

³¹⁷ Walt Crowley, HistoryLink.org, Essay 3564, September 14, 2001.

RED SCARE EXPANDS BEYOND THE FEDERAL UN-AMERICAN ACTIVITIES COMMITTEE

Private loyalty-review boards and anti-Communist investigators began to appear on the scene to fill the growing demand in some industries to certify that their employees were above reproach use of these private services were sought by companies concerned about the sensitivity of their business, or those that felt particularly vulnerable to public opinion for a fee teams would investigate employees and question them about their politics and affiliations at these hearings the subject would usually not have a right to the presence of an attorney and, like the Federal House Un-American Activities Committee itself, an interviewee might be asked to defend himself or herself against accusations without being allowed to cross-examine the accuser

Private investigative agencies kept cross-referenced lists of leftist organizations, publications, rallies, charities and the like as well as lists of individuals who were known or suspected Communists these companies created and maintained various Blacklists to bar suspects from employment Right-Wing publications kept track of Communist and leftist organizations and individuals newsletters such as *Counterattack* and *Confidential Information* were distributed as were books such as *Red Channels* which claimed to document Communist influence in radio and television

GENERAL GROVES WAS A DIFFICULT MAN WITH WHOM TO WORK

General Leslie R. Groves, Jr. accomplished the task for building and testing an atomic bomb and contributed mightily to the Pacific Theater campaign against Imperial Japan as head of the Manhattan Engineer District Project however, he paid a high personal price Army Chief of Staff General Dwight Eisenhower evaluated his performance -- January 30, 1948 Eisenhower recounted a long list of complaints received about Groves pertaining to his rudeness, arrogance, insensitivity, contempt for the rules and maneuvering for promotion out of turn General Leslie R. Groves, Jr. retired at the rank of Lieutenant-General -- February 29, 1948 he became a vice president of the Sperry Rand Corporation and acquired a host of military awards and citations (he suffered a fatal heart attack [July 13, 1970])

UNITED NATIONS ATTEMPTS TO WITHDRAW FROM KOREA

United Nations passed a resolution that troops would be removed from Korea after a successful election scheduled for [scheduled for November 14, 1947] could be held President Harry Truman ordered the withdrawal of U.S. troops from Korea -- April 8, 1948 However, failure to hold the free election throughout the Korean Peninsula [1948] deepened the division between the two sides North Korea established a Communist government 38th Parallel separated the two Koreas as efforts to reunite the nation ended in failure tensions intensified -- cross-border skirmishes and raids persisted)

BOEING COMPANY EXPERIENCES LABOR DIFFICULTIES

Being forced to lay-off many of their employees due to the loss of military contracts
had a detrimental effect on the workers

Boeing employees went on strike over the issue seniority -- April 1948
more than 14,800 Machinist union members virtually shut down production
they were not members of the American Federation of Labor (AFL)
so did not enjoy national support from organized labor

STATE HOUSE OF REPRESENTATIVES ALBERT CANWELL LOOKS FOR COMMUNISTS

State Joint Legislative Fact-Finding Committee on Un-American American Activities
which became known as the "Canwell Committee"
held many hearings looking for Communist influences
on the second floor of the Seattle Field Artillery Armory
(today's Seattle Center House on the Seattle Center grounds) -- spring (and summer) 1948
State Republican Representative Albert Canwell focused committee members' attention
on the Washington Pension Union -- a left-wing remnant of the Great Depression
and on the Building Service Employees' Union, the Seattle Repertory Theatre,
and the University of Washington faculty

BRIEF REVIEW OF TURMOIL IN THE MIDDLE EAST

(When the Ottoman Empire joined the Central Powers in World War I [April 1915],
Great Britain's communications with India via the Suez Cana was threatened)
(Great Britain had long dominated political conditions on the Arab Peninsula [beginning in 1916]
its conquest of Palestine was part of a British strategy aimed at expanding its Middle East Empire
also establishing a land bridge between the Mediterranean Sea and the Persian Gulf
was necessary to provide for British defense of its interests in India
and protect against invasion from the north by Russia
this land bridge also provided an alternative to the Suez Canal
Great Britain made two potentially conflicting promises regarding the Arab Peninsula:
•Britain promised independence for an Arab country covering most of the Arab Middle East;
•it also promised to create and foster a Jewish national home in Palestine)

NEW JEWISH STATE OF ISRAEL DECLARES ITS INDEPENDENCE

Washington's U.S. Senator Warren Magnuson urged President Harry S Truman to recognize
an independent state of Israel on behalf of Jewish Holocaust survivors of World War II
President Truman decided to grant recognition to Israel
where, in antiquity, the Kingdoms of Israel and Judah had once been located
in a portion of what was known as the British Mandate of Palestine -- May 14, 1948
in honor of the occasion, the American League for a Free Palestine held a banquet
at the Waldorf Astoria Hotel in New York
Senator Warren Magnuson was the featured speaker
in recognition of his efforts to establish the new Jewish nation
it was proposed that Magnuson become America's first Ambassador to Israel
War in Israel erupted

over the next few days Egypt, Trans-Jordan, Iraq, Libya, Sudan, Lebanon and Syria invaded Israel

MORE IMPROVEMENTS COME TO MCNEIL ISLAND FEDERAL PENITENTIARY³¹⁸

Honor farm at McNeil Island was designated as an official Federal Work Camp, this separate institution from the penitentiary was used for nonviolent first offenders and prisoners with sentences of one year or less remaining --1948 eventually, more than 1,000 minimum-custody inmates were living in the camp this camp was almost a self-contained small urban community providing the manpower, skills and trades needed to operate and maintain the island in addition, the inmates raised their own chicken, beef, and pork; operated a dairy, maintained a huge poultry house; grew potatoes, carrots, beans, and cabbage, and ran an apple orchard

Construction began on the McNeil Island community center and school -- 1948 (school was conducted for the first time on the island during the [1952-1953] school year)

DAVE BECK USES BOEING TO ADVANCE HIS POSITION IN THE TEAMSTERS UNION

Using the Boeing strike as an organizing tool, Dave Beck announced that Teamsters would seek to represent the workers at Boeing he formed the Aeronautical Workers and Warehousemen Helpers Union Local 451 in an effort to raid the independent Machinists Union of their membership -- May 28, 1948 Beck and Boeing officials made a secret agreement Boeing would hire Local 451 members -- essentially hiring Teamsters as scabs and strikebreakers in the Machinist's strike

HEAVY RAIN AND HIGH TEMPERATURES CAUSES FLOODING

(Army Corps of Engineers worked on revising and expanding its original [1929] "308" Report to develop dams on the Columbia River as all of its tributaries these revisions became known as the "Main Control" Plan Congress had authorized the Columbia Basin Project [1943] to provide for dams on the Columbia but, talk of irrigating Eastern Washington did not get very far as most people were apathetic) Torrential rain fell in the Cascade Mountains -- May 1948 tons of melting snow were flushed downstream as temperatures rose in Idaho, Bonners Ferry on the Kootenai River, Wallace on the Coeur d'Alene River, and Lewiston on the Snake River were ravaged by flood in Washington both Wenatchee and Yakima on the Columbia River were devastated as were dozens of smaller towns swollen by weeks of heavy rain, the Columbia River at Portland crested fifteen feet higher than its flood plain -- water was held back only by dikes then the dikes protecting Vanport, Oregon crumbled -- 4:17 p.m. Memorial Day, 1948 Columbia River breached the Northern Pacific Railway embankment water filled sloughs and low spots and then backfilled the low-lying city

³¹⁸ Daryl C. McClary, HistoryLink.org, Essay 5238, April 17, 2003.

rising water tumbled automobiles
it swirled Vanport's wooden apartment buildings off their foundations like toy boats
18,500 residents had only thirty-five minutes to escape

Flood damage in Washington, Oregon and Idaho was extensive:

- thirty-eight hundred homes were destroyed;
- fifty-two lives were lost throughout the basin;
- damage was estimated at a hundred million dollars;
- hardest hit of all was Vanport where the flood killed fifteen and left thousands homeless
refugees crowded into Portland but for more than a thousand people race was problem
African Americans could find housing only in the growing ghetto in North Portland
unfounded but persistent rumors in the African American community
said that the Housing Authority of Portland (HAP) had deliberately withheld warnings
and that Vanport concealed a much higher death toll

ARAB-ISRAELI WAR COMBATANTS REACH A TRUCE

1948 Arab-Israeli War remained under way until a truce was reached -- June 11, 1948
(fighting resumed [July 8] and stopped again [July 18] before it restarted [mid-October]
and finally ended [July 24, 1949] with the signing of an armistice with Syria
by then Israel had retained its independence and increased its land area by almost 50%)

CANWELL COMMITTEE CONVENED ITS SECOND ROUND OF ANTI-COMMUNIST HEARINGS

Joint Legislative Fact-Finding Committee on Un-American Activities was called to order
by Republican State Representative Albert F. Canwell -- just after 10:00 a.m. July 19, 1948
at Seattle's 146th Field Artillery Armory (in today's Seattle Center)
committee members focused on "subversive activities at the University of Washington"
Chairman Canwell announced, **"Before we proceed, I wish to state that we will proceed
with proper dignity here; no demonstrations will be tolerated, no speeches from the audience; any
violation of that...will be summarily dealt with."**

this was the first nationally published hearing seeking out Communists
In five days of hearings forty University of Washington professors were subpoenaed to appear
eleven were called before the committee and interrogated
those accused were given no opportunity to call witnesses in their defense
or to challenge the validity of damaging statements given before the committee
also called before the committee were Burton and Florence James
who together founded the Repertory Playhouse at the university
both refused to testify if they were Communist or not
Burton James was cited for contempt of the committee and sentenced to thirty days in jail,
but the sentence was suspended because he was ill -- he died three weeks later
Florence James was cited for contempt and fined \$125

PUNISHMENT IS INFLICTED WITHOUT A CRIME BEING COMMITTED

Six of the eleven University of Washington professors summoned by the Canwell Committee
were subjected to public attack

Three of these professors admitted their past membership in the Communist Party:

- Melvin Jacobs, Anthropology Department;
- Garland Ethel, English Department;
- Harold Eby, English Department

Three others refused to testify before the committee:

- Ralph Gundlach, Psychology Department was found to be in contempt of the committee for refusing to testify -- he was given thirty days in jail
- Herbert Phillips, Philosophy Department refused to testify not on the grounds he would testify against himself (being a Communist is not a crime) but because it would violate his personal principles
- Joseph Butterworth, English Department used the Fifth Amendment not because he would be testifying against himself but because the U.S. Constitution guarantees that people have the right to associate with anyone they want and to speak the way they want he was cited for contempt by the committee

ALGER HISS IS ACCUSED OF BEING A COMMUNIST AGENT

Alger Hiss was an American lawyer, federal government official, author and lecturer he was involved in the establishment of the United Nations as a U.S. State Department employee and as a United Nations employee

He was accused of being a Soviet spy

by the Congressional House Un-American Activities Committee former Communist Party member Whittaker Chambers testified under subpoena -- August 3, 1948

that Alger Hiss had secretly been a Communist while in federal service Hiss categorically denied the charge

Chambers repeated his claim on nationwide radio -- Hiss filed a defamation lawsuit during the defamation trial, Whittaker Chambers produced new evidence

that indicated he and Hiss had been involved in espionage for the Soviet Union

Hiss was indicted by a federal grand jury on two counts of perjury -- a civil (not criminal) charge in fact, his indictment stemmed from Whittaker Chambers' alleged espionage activities

Chambers admitted to being a spy but as a cooperating government witness he was never charged Hiss's civil trial ended in a mistrial because the jury was unable to reach a unanimous verdict

ANNA LOUISE STRONG RETURNS TO THE UNITED STATES FROM THE SOVIET UNION

American Dr. Strong had lived in the Soviet Union with her husband who was a Soviet official she had written books and articles praising the Communist government

However, distressed by developments in the USSR, Dr. Strong returned to the United States -- 1948 but she soon traveled back to her home in the Soviet Union

DAVE BECK'S RISE TO POWER IN THE TEAMSTERS UNION IS UNSTOPPABLE

Members of the American Federation of Labor (AFL) Executive Council universally condemned Dave Beck's Teamsters organizing

Aeronautical Workers and Warehousemen Helpers Union Local 451 during the Boeing strike

AFL Executive Council met to take action against Beck -- August 1948
day before the meeting, Teamster International President Dan Tobin privately told associates
that he would renounce his support of Dave Beck
however, in a secret meeting with his followers on the West Coast that same afternoon
Beck confronted Tobin with the information that Beck's long-time enemy,
mafia supported Detroit Teamsters Union leader Jimmy Hoffa, had allied with Beck
Dave Beck now had more than enough votes on the Teamsters executive board
to overrule Dan Tobin if he tried to fire Beck
At the AFL meeting the next day, Dan Tobin was forced to defend Beck's actions in the Boeing strike
Tobin was unwilling to embarrass AFL Vice President Dave Beck
and create a confrontation within the Teamsters -- which he would undoubtedly lose
AFL Executive Council condoned the Teamster raid on the independent Boeing Machinists Union
(Boeing Aeronautical Workers and Warehousemen Helpers Union Local 451
ended its strike [September 1948])

HOW TO DEAL WITH FLOODING ON THE COLUMBIA RIVER IS UNCLEAR

A few months after the disastrous [May] Columbia River flooding
Army Corps of Engineers issued a revised "308" Report
calling for construction of flood control dams on the Columbia River
Differing regions had differing needs
people living in the Flathead Valley of Montana knew that raising the height of the Kerr Dam
just seventeen feet would improve the efficiency of the entire Columbia storage system
consequently this project was urgently recommended by the planners
but the development would also drown one of the loveliest sections of farmland
in the mountain West
Two dozen or more state and federal agencies could not agree
on how to deal with essentially related problems regarding lumbering and soil erosion, irrigation,
salmon restoration and everything else remotely connected with water
some believed it would be more efficient to unify everything
under a single Columbia Valley Authority modeled after the Tennessee Valley Authority
others question if such colossal power could be safely entrusted to any one agency
Federal Department of Interior jumped into the act with ideas of its own
(over the years the competing Bureau of Reclamation and the Army Corps of Engineers
had developed plans for no less than 495 power, flood control, irrigation, navigation,
recreation, anti-pollution, and fishery proposals
that blanketed every stream in the Northwest
several of the plans were in conflict -- many overlapped)
When emphasis shifted from hydroelectric power generation to flood control
water-starved people of Washington Big Bend Country
wondered whether the original purpose of the Grand Coulee Dam had not been forgotten
Gradually priorities were established and work began on a complex of storage reservoirs and canals
which potentially would bring more than one million acres under cultivation
capable of supporting, so its boosters contend, at least one hundred thousand people

UNIVERSITY OF WASHINGTON INVESTIGATES COMMUNISTS ON CAMPUS

University of Washington Dr. Raymond B. Allen, President filed charges -- September 8, 1948
professors Joseph Butterworth and Herbert Phillips and Ralph Gundlach had refused to testify
before the Joint Legislative Fact-Finding Committee on Un-American Activities
in addition, professors Melvin Jacobs, Garland Ethel and Harold Eby had admitted
their past membership in the Communist Party but had refused to name others
University President Raymond Allen named a faculty committee
to determine who would face dismissal
Communist Party membership was not grounds for dismissal in the University's tenure code
but the administration tried to claim "good behavior" and "efficient and competent service"
called for in the code could be interpreted broadly by the committee

CANWELL COMMITTEE BECOMES NATIONAL NEWS

Canwell Committee became a model for subsequent investigations of "un-American" activities
on both the state and national levels
as other state legislatures and congress began to look for radicals
numerous universities followed the University of Washington example
and began their own searches for Communists in the halls of academe
Cold War Red Scare gained momentum
many individuals accused of being Communists lost their jobs
organizations considered subversive were forced to close and disband

LEFT-WING WASHINGTON COMMONWEALTH FEDERATION COLLAPSES

Many powerful Washington state politicians
had initially courted the Washington Commonwealth Federation WCF (WCF)
some had achieved high office
including U.S. Senator Warren G. Magnuson and Governor Albert Rosellini
now liberal politicians avoided or renounced their affiliations
as the WCF became a target of the Canwell Commission
and other investigations of "un-American activities"
longtime WCF leader Howard Costigan recanted his association with the Communist Party
(he later became a star witness
for U.S. Senator Joseph McCarthy's investigation of Communists)

PACIFIC NORTHWEST HAS VAST ELECTRIC POWER RESOURCES

Pacific Northwest boasted of its power system
eighty-six major hydroelectric projects provided electricity to the Pacific Northwest
twelve multipurpose dams generated electric power
per-capita production within the region was twice that for the average American
electric rates for the Pacific Northwest were one-half the national average
thirteen thousand miles of high-voltage transmission lines were in operation
ninety-five per cent of all farms in the Columbia Basin were electrified
whereas only 72.8 per cent of the farms in the United States were electrified
an additional thirty-two major irrigation dams maintained a constant supply of water

3,800,000 acres were under irrigation in the Columbia Basin³¹⁹
But bragging was not enough as power shortages were experienced -- 1948 [and 1949]
demand for electricity in the region and nation had grown significantly
regional needs had not been met since the start of World War II
perception that supplies of federal hydroelectric power were inexhaustible were altered
Paul J. Raver, Bonneville Power Administrator noted: **“For several years in the future
there will be practically no reserves [of] generating capacity, major transmission lines, or
substation equipment.”**³²⁰
he predicted a critical shortage of electric power would continue
until [1954]“at the earliest”

PUBLIC POWER VERSUS PRIVATE POWER ARGUMENT BEGINS ANEW

Utility planners began to realize alternative sources of power would be necessary
to satisfy future demand for electricity in the region
plans were laid to expand both private and public utilities in the immediate future
Publicly-owned Bonneville Power Administration (BPA) laid plans
for construction of many new dams and installations in the Pacific Northwest
additional generating equipment was anticipated -- provided public funds were available
proponents of public power attempted to give BPA a key role in developing new power supplies
but Congress had denied BPA the authority to construct new generating facilities
Private power companies such as Puget Sound Power and Light Company
and Washington Water Power had their own blueprint for the future
they argued **“...we already have a giant, coordinated program of development well
under way [one calling for an outlay of two and one-half billion dollars]. No [public utility] could
ever be as democratic or make any faster progress than the present system....”**³²¹

PRESIDENT HARRY S TRUMAN ADVOCATES FOR PUBLIC POWER

Idea was revived of creating a super agency much like the Tennessee Valley Authority (TVA)
proposed Columbia Valley Authority (CVA) would control development of the Columbia River
this became part of President Truman’s reelection platform
CVA was a financial threat to investor-owned private utilities
Washington Water Power and Puget Sound Power and Light were the most dominate
Phil Weyerhaeuser, heir to and boss of the giant timber company, described the proposal
as “Communism on the Columbia”
Spokane Spokesman-Review cried “totalitarianism”
Seattle Times labeled it “socialism”
CVA failed to win approval in Congress

PUGET SOUND POWER AND LIGHT COMPANY CONTINUES TO EXPAND

Puget Sound Power and Light Company (PSP&L) was a privately-owned utility

³¹⁹ Oscar Osburn Winther, *The Great Northwest*. P. 383.

³²⁰ Oscar Osburn Winther, *The Great Northwest*. P. 382.

³²¹ Oscar Osburn Winther, *The Great Northwest*. P. 383.

it continued to acquire many small western and central Washington power plants
Consolidation and expansion was justified on the theory that bigger systems provide better service
and at a lower cost to consumers -- 1948

Company spokesmen noted PSP&L had “...rebuilt the distribution system in nearly every
community served, standardizing poles and construction, increasing copper and providing voltage
regulation.”³²²

LACK OF FIRM POLITICAL DIRECTION IS DISPLAYED ON ELECTION DAY

National election results stunned the American public -- November 2, 1948

most historians viewed the presidential election as the greatest upset in American history
virtually every prediction (with or without public opinion polls) indicated
incumbent Harry S Truman would be defeated by Republican Thomas E. Dewey
Truman won overcoming a split in his own party

Conservative Democrat (Dixiecrat) Strom Thurmond carried only four states in the South
Truman’s election to the presidency in his own right reflected the public’s appreciation
for the elimination of price controls
and the reuniting of labor behind the Democratic Party

Truman’s political “coattails” resulted in Democrats regaining control of both houses of Congress

Truman’s election confirmed the Democratic Party’s status as the nation's majority party
State election results saw Republican Governor Arthur B. Langlie return to the governor’s mansion
when he replaced Governor Mon Wallgren who had previously beaten Langlie four years before
Governor Langlie served two terms in office but not in succession’

Only one change took place in Washington’s Congressional delegation

Congressman Hugh B. Mitchell, Seattle Democrat was elected to two terms -- [1949-1953]

he replaced Republican Congressman Homer R. Jones in the First Congressional District

Republicans gained control of both houses of the state legislature

in the State Senate nine votes crossed the isle

as Republicans held twenty-seven of forty-nine seats

in the State House of Representatives Republican dominated sixty-seven seats to thirty-two

WASHINGTON STATE VOTERS APPROVE AN ALTERNATIVE TO COUNTY GOVERNMENT

Historically, the role of counties has been to serve as an administrative arm of the state

counties maintain and provide courts and law enforcement, build roads, conduct elections

and assess and collect property taxes under the supervision of elected and appointed officials

Legislators passed Washington State Constitutional Amendment 21 and referred it to the voters

this amendment was passed by a 53.44% to 47.56% majority -- November 2, 1948

this amend

two forms of county government “commission” and “charter” were available to counties

Commission government, which most counties have, consists of a legislative body

of three to five elected board members who run as members of a political party

County Commissioners are the legislative body and also perform executive functions

other elected county officials: a clerk, treasurer, sheriff, assessor, coroner and auditor

³²² Oscar Osburn Winther, *The Great Northwest*. P. 372.

have specific tasks and share in the administrative work
county sheriff serves as the County Executive when necessary
county prosecuting attorney and superior court judges are also elected
all charter counties have adopted initiative and referendum powers
Home Rule Charter government can provide for any necessary county officers
but it cannot affect the election of the prosecuting attorney, the county superintendent of schools,
judges of the superior court, justices of the peace, or the jurisdiction of the courts
Home Rule Charter Governments fall into one of two categories:

•Council-Elected Executive form:

- county executive elected by the voters serves as the head of the county executive branch
county executive has the power to veto legislation which may be overridden
by the county council with a two-thirds majority vote or greater
county executive proposes policies to the council,
executes policies adopted by the council,
prepares a budget and has responsibility for general administration of the county
county executive appoints and may dismiss department heads
usually with the consent of the county council
- county council, the legislative branch of county government, is elected by the voters
they enact ordinances, adopt the budget and exercises oversight over the administration
- judges of the judicial branch of county government are elected by the voters

•Commission/Council-appointed Administrator form

- an elected body, county commission or county council,
retains policy-making, legislative, and budget-adoption functions
however, the council or commission delegates all or some of its administrative authority
to an appointed professional administrator (county manager)
who serves at the pleasure of the council or commission

King County was the first to implement the Home Rule Charter form of government [1969]

ALBERT CANWELL HAS A SHORT POLITICAL CAREER

State Republican Representative Albert Canwell and two other committee members
lost their bids for reelection -- 1948

Canwell left his seat in the State House of Representatives to run for a State Senate position
after only one term in the state legislature -- his loss ended his political career

(Although Albert Canwell's political career was short-lived,

his commitment to anti-Communism was lifelong

he quickly announced that he was a candidate for the U.S. Senate [1950]

but failed to make it through the primary as the Republican candidate

Canwell ran for U.S. House of Representatives [1952] and [1954]

and for governor [1968] -- but lost every time

his record of public office consisted of a two-year term in the state House of Representatives

but for much of his life he continued to collect information on alleged Communists

as part of his private security and consulting business

Canwell made headlines again [1962] when he was sued for libel

by State Representative John Goldmark

Canwell claimed both Goldmark and his wife Sally were former Communists
Albert Canwell spent the remaining years of his life in Spokane, where he died [April 1, 2002])

TELEVISION COMES TO SEATTLE

KRSC-TV aired Seattle's first TV broadcast -- November 25, 1948
those few residents who owned TV sets
watched the West Seattle-Wenatchee Thanksgiving football game
but television was poised to revolutionize broadcasting, popular culture and politics
(Dorothy Bullitt, widow of Scott Bullitt, bought the station [1949]
she changed the call letters to KING-TV (named after King County)
this station became the foundation of her KING properties Northwest broadcasting empire)

DAVE BECK REORGAINZES THE INTERNATIONAL TEAMSTERS UNION

Beck won approval of a significant reform of the Teamsters Union's internal structure
he proposed sixteen divisions organized around each of the major job categories
in the union's membership -- December 1948
Nearly 1,000 Teamster leaders attended the conference
in which Dave Beck's restructuring plan was debated and approved -- Dan Tobin did not

ACCUSED COMMUNIST PARTY MEMBERS ARE PUT ON TRIAL

Eleven leaders of the Communist Party were charged
under the Alien Registration Act or Smith Act -- January 17, 1949
which set criminal penalties for advocating the overthrow of the United States
and required all non-citizen adults residents to register with the government
Ten of the defendants were given sentences of five years in prison
and the eleventh was sentenced to three years
All of the attorneys for the defense were cited for contempt of court
and were also given prison sentences

CANWELL COMMITTEE GIVES ITS FINAL REPORT TO THE STATE LEGISLATURE

Joint Legislative Fact-Finding Committee on Un-American Activities
had been chaired by Spokane's State Representative Albert Canwell
who dedicated himself to exposing Communists in the state
Canwell had fail to win reelection to the legislature

Listed among the results of the committee's efforts was **“an index file of approximately 40,000 subjects dealing with Communists, their Front Organizations and activities and related materials”**³²³

this vast array of material was taken by the Washington State Patrol for safe keeping
three safes containing the material was were removed
from the Committee's Seattle headquarters to the Legislative Building in Olympia
where they were placed in a locked room
key to the locked room was then placed in safe-deposit vault that could not be opened

³²³ Melvin Rader, *False Witness*. P.162.

without being authorized by President of the Senate and state Speaker of the House
who must both be present when the material was retrieved

UNIVERSITY OF WASHINGTON BOARD OF REGENTS TAKE ACTION

Six weeks of faculty committee hearings were closed to the public
committee members could not reach any conclusion regarding the tenure code violations of
Joseph Butterworth and Herbert Phillips and Ralph Gundlach
but they unanimously agreed that Melvin Jacobs, Garland Ethel and Harold Eby
not be dismissed although they admitted to having belonged to the Communist Party
University of Washington President Allen overruled the committee
he recommended Butterworth, Phillips and Gundlach be fired
Joseph Drumheller, head of U of W Board of Regents and the other Regents
acted against the six accused professors -- January 22, 1949
Three professors who had voluntarily left the Party were made to sign disclaimers
they were put on probation for two years by the university
Three members of the faculty, Butterworth, Phillips and Gundlach, who had refused to testify
before the Joint Legislative Fact-Finding Committee on Un-American Activities
were summarily discharged without severance pay
two later admitted to being Communists -- Joseph Butterworth and Herbert Phillips
Ralph Gundlach denied ever having been a Communist
Three other professors, Melvin Jacobs, Garland Ethel and Harold Eby, remained employed
but they were forced to sign an affidavit that they were not members of the Communist Party
and were placed on probation for two years

NUMEROUS FACULTY MEMBERS ARE THREATENED WITH DISMISSAL OR SANCTIONS

One faculty member, Melvin Rader a brilliant and much loved professor of philosophy,
proved he was falsely accused of participating in a Communist meeting
this accusation had been made by a professional anti-Communist witness
(*Seattle Times* reporter Ed Guthman, won that paper's first Pulitzer Prize for National Reporting
his [1950] articles proved that the Washington State Un-American Activities Committee
subverted evidence that cleared University of Washington professor Melvin Rader
of false charges of being a Communist
later Guthman became an aide to Attorney General Robert Kennedy)
(University of Washington Professor Melvin Rader wrote an account of the accusations against him
in his book, *False Witness* [1969] which was an indictment of a society he saw as more interested
in scapegoats than in truth
he offered a warning to those who would sacrifice individual rights and freedom
to achieve political ends)

NORTH ATLANTIC TREATY ORGANIZATION COMES INTO BEING

European nations of Belgium, the Netherlands, Luxembourg, France, and the United Kingdom
signed a mutual defense pact (Treaty of Brussels [March 17, 1948])
however, participation by United States was thought necessary
to counter the military power of the USSR

North Atlantic Treaty was signed in Washington, D.C. -- April 4, 1949
this included the five Treaty of Brussels states plus the United States, Canada, Portugal, Italy,
Norway, Denmark and Iceland
all of whom agreed that an armed attack against any one of them
would be considered an attack against them all
they agreed that if an armed attack occurred each of them would assist the member being attacked
with whatever action each nation deemed necessary, including the use of armed force,
to restore and maintain the security of the North Atlantic area
however, the treaty did not require members respond with military action against aggressors
although obliged to respond, each nation maintained the freedom to choose its response
popular support for the Treaty was not unanimous
some Icelanders began a pro-neutrality, anti-membership riot [March 1949]
Creation of NATO brought about some standardization of allied military terminology, procedures,
and technology which in many cases meant European countries adopted U.S. practices
aircraft marshalling signals were standardized
so that any NATO aircraft could land at any NATO base
other standards such as the NATO phonetic alphabet made their way into civilian use

EARTHQUAKE HITS NEAR OLYMPIA

Violent upheaval occurred along a fault line near Olympia -- 11:55:54 a.m. April 13, 1949
quake lasted for twenty seconds and hit 7.1 on the Richter scale of ground motion
it was strong enough to knock both needles off the seismograph drums at the U of W
Ground settling caused significant damage to both new and old buildings in the region
some of Olympia's industrial area, built on fill extending into Puget Sound, settled five inches
Olympia proper experienced a major break to its natural gas lines
but there was no crippling interruption of service
Damage to the State Capitol building and other older structures in the complex was severe
due to the lack of lateral bracing and the collapse of brick and stone facing
cracks formed in the Legislative Building and damaged the cupola atop the building's dome
significant seismic upgrades were made
original fifteen-ton stone cupola was replaced with a 800-pound aluminum cap
Washington schools sustained a disproportionately high level of damage during the 1949 quake
thirty schools in the state, normally serving 10,000 students, were damaged
fatalities and injuries to school pupils would have been much higher
had many Puget Sound schools not been vacant because of spring vacation
In Centralia forty percent of business buildings and houses were damaged
In Chehalis, four schools, the City Hall, the library, and the courthouse were considerably damaged
although all were built on solid ground
Washington State Training School for Boys, in Chehalis, sustained severe damage
when a gable collapsed
Wood frame buildings were usually undamaged except for failures of brick fireplaces and chimneys
fireplaces and chimneys extending above the roof were a principal hazard to frame residences
that were subjected to strong ground motion
it was estimated that more than 10,000 chimneys in northwestern Washington required repair

seventy-five percent of the chimneys in Chehalis had to be replaced
Fortunately, fire was not a major problem in either the 1949 earthquake
even though numerous water mains broke
in Olympia twenty-four breaks were reported in water mains
which resulted in a temporary closing of the business district
Centralia's gravity-fed water system was badly damaged
in Tacoma water mains broke because of landslides and the settling of tide flats
one sixty-inch main water broke at the Seattle city reservoir

Power failures occurred

in Seattle swinging transmission lines touched causing circuit breakers to trip
in Tacoma, the transformer banks at the Bonneville Power Plant substation needed to be realigned
in Chehalis electric power service was disrupted for about two hours

In Seattle most of the earthquake damage was concentrated

in areas of filled ground and along the waterfront
especially in the Pioneer Square area where there were many older masonry buildings
Seattle's natural gas distribution system broke at nearly 100 locations primarily because
gas mains separated from connecting pipes where the pipes were buried in fill ground
(three Seattle schools were later torn down and another was rebuilt)

Damage was extensive in the Puget Sound region

eight people died and many more were injured
millions of dollars damage to schools, public buildings and private business occurred
fire escapes were ripped from their moorings -- church towers swayed
damaged lift bridges in Seattle and Tacoma would not open and close
but destruction to the State highway system was minor
due mainly to ground settlement and a few small slides onto roadways and railway tracks
mopping up continued for days -- repairs went on for years

ANNA LOUISE STRONG IS ONCE AGAIN IN THE SOVIET UNION

Once again she grew disenchanted with the starvation conditions she encountered in the USSR
which were imposed on the land owning peasant (kulaks) by Premier Joseph Stalin
Anna Louise Strong was arrested in Russia as an American spy and was banished from the country
she moved back to Seattle but was not greeted with acceptance --1949
(Dr. Anna Louise Strong moved to the Peoples Republic of China at age 72 [1958]
she was one of few Westerners to gain the admiration of Mao Zedong
she made several return trips to the United States
Dr. Anna Louise Strong remained in Peking [Beijing] until her death [1970])

EARTHQUAKE ROCKS BRITISH COLUMBIA'S QUEEN CHARLOTTE ISLANDS

One of the greatest earthquakes in Canadian history
was recorded by seismometers -- August 22, 1949
it occurred on the ocean bottom Island north of Vancouver Island
just off the rugged coast of Graham Island
This was one of the world's greatest earthquakes
it reached a magnitude 8.1 on the moment magnitude scale

shaking was felt throughout British Columbia, parts of Washington, Oregon, Alaska
Alberta and the Yukon Territory
Queen Charlotte Islands earthquake was caused by a rupture on the Queen Charlotte Fault
which formed part of the boundary between the Pacific and North American tectonic plates
this fault runs from northern Vancouver Island, west of the Queen Charlotte Islands,
up to the Gulf of Alaska
Although nobody was killed in this earthquake, people and animals were knocked off their feet
cars were bounced around -- there were landslides and other damage
in the port city of Prince Rupert, B.C. windows were destroyed and buildings swayed
chimneys crumbled, and an oil tank collapsed in the Queen Charlotte Islands at Cumahewa Inlet

SOVIET UNION TESTS AN ATOMIC DEVICE OF ITS OWN

President Harry S Truman made headlines when he announced -- September 1, 1949
that the Soviet Union had secretly tested a nuclear weapon several weeks earlier
Truman did not explain how the United States had detected the test
Fear of Communist world domination intensified immediately and overwhelmingly
as a general atmosphere of paranoia swept across America
Two “superpowers” had become engaged in an epic struggle for world domination
which would last for a generation
Mutual loathing and fear were fueled by industrialists seeking wealth,
military leaders seeking purpose and politicians seeking power
Neither superpower was aware the remainder of the world’s population now lived in fear
of *both* the United States and the Soviet Union
and lacked any means to protect or defend themselves -- the world was, indeed, changed

HYDROPLANE IS SUCCESSFULLY TESTED ON LAKE WASHINGTON³²⁴

A hydroplane, a racing boat designed to ride above the water instead of plowing through it,
was successfully tested for the first time on Lake Washington -- October 1, 1949
This hydroplane’s team consisted of Boeing engineer Ted Jones, boat builder Anchor Jensen
and Seattle auto dealer Stan Sayres
Experimenting with design changes to make the craft more stable in the water
design of *Slo-Mo-Shun III* proved to be practical
then the more successful *Slo-Mo-Shun IV* was built
(*Slo-Mo IV* set the world speed record of more than 165 miles per hour
at the [1950] Gold Cup Races in Detroit and brought hydro racing to Seattle [1954]
Gold Cup race became the centerpiece of Seattle’s annual Seafair celebration)

CHINESE CIVIL WAR COMES TO AN END

Chiang Kai-shek’s Republic of China Kuomintang government
collapsed under the weight of its own corruption -- October 10, 1949
Mao Zedong and his Communist Red Army was a stronger, more dedicated force

³²⁴ David Wilma, *Hydroplane is successfully tested on Lake Washington*, HistoryLink. org, Essay 2106, January 1, 2000.

Chiang Kai-shek was forced to flee mainland China to the coastal island of Taiwan (Formosa)
he took with him most of the national treasury -- much of it supplied by the United States
there he created the state of Nationalist China which was immediately recognized by the U.S.
as the official government of China

Chairman Mao Zedong founded the People's Republic of China which controlled mainland China
Right Wing critics of President Truman charged he had "lost China"
because of Communists in the State Department and other administration branches

PUGET SOUND TRACTION, LIGHT & POWER COMPANY COMES TO AN END

Former interurban transportation company faced its demise when federal anti-trust regulators
forced the company to sell off its remaining interurban bus services -- late 1940s

(Seattle voters [1950] narrowly authorized City Light to acquire

Puget Sound Traction, Light & Power's remaining assets and services within the city limits
thus ending nearly a half-century of political and economic public-private competition)

(Local urban planners and reformers made repeated attempts to recreate a regional rail transit system
to counteract suburban sprawl and growing traffic congestion

King County voters were not convinced and rejected various mass transit plans
in [1958], [1962], [1968], and [1970])

1950-1959

BONNEVILLE POWER ADMINISTRATION PROVES TO BE A GREAT RESOURCE

Grand Coulee Dam's eighteen primary electrical generators were located in the left and right powerhouses in addition, three service generators were located in the left powerhouse all of these generators were in operation generating 2,280 megawatts of power by 1950 The financial success of the organization was noted in an article in the *Longview Daily News* -- January 11, 1950

"...In the case of one of the biggest public enterprises in the Northwest -- the Bonneville Power Administration -- there is something of a substitute for competition that keeps that vast business striving for a good record. That something is the necessity for congressional approval of its annual budget and the expenditures it makes for improvements and extensions to the power distribution system.

"As a result Bonneville is not above tooting its own horn when it has something to toot about and we do not blame it in the least. Bonneville points with some pride to the fact that it recently paid a \$2 million surplus into the treasury, thereby advancing repayments on its indebtedness about 10 years ahead of date due.

"Bonneville Dam itself cost \$87,500,000 and \$59,000,000 of that was to be repaid from power revenues. Already power has paid back on that indebtedness \$31,208,000 including interest and operating expenses. The huge network of transmission lines cost \$133,000,000. And power revenues have paid back on that indebtedness \$27,400,000.

"Keeping ahead of its debts has been possible for Bonneville despite the fact that its wholesale rate of \$17.50 per kilowatt year -- the lowest in the nation -- has not been increased."³²⁵

NEWSPAPERS IN THE STATE REFLECT THE OPINION OF THEIR EDITORIAL STAFFS

Seattle Star was pro-Democratic in its politics -- folded (August 13, 1947)
Seattle Times was pro-Republican in its politics
Seattle Post-Intelligencer's only concern was Americanism (anti-Communist)
Spokane Spokesman-Review was the mouthpiece of private power companies
Tacoma-News Tribune expanded into radio, KTNT AM and FM (1948)
and television (1953) KTNT Channel 11 (now KSTW)

ALGER HISS FACES ANOTHER TRIAL

Accused Communist agent Alger Hiss was tried a second time -- January 1950 he could not be tried for the crime of espionage because the statute of limitations had expired however, the high-level State Department official was convicted of two civil counts of perjury having perjured himself in earlier testimony when he denied he was a Communist before the House Un-American Activities Committee Alger Hiss received two concurrent five-year sentences -- he eventually served three and a half years

³²⁵ Oscar Osburn Winther, *The Great Northwest* P. 378.

U.S. SENATOR JOSEPH McCARTHY MAKES ACCUSATIONS OF TREASON

After the fall of China to the Communists (1949) U.S. Senator Joseph McCarthy (R-Wisconsin) addressed the Women's Republican Club in Wheeling, West Virginia -- February 2, 1950 he denounced officials in the Roosevelt-Truman administrations as traitors he produced a piece of paper which he claimed contained a list of 205 known Communists who were currently working for the federal Department of State This speech resulted in a flood of press attention for Senator Joe McCarthy it established a path that made him one of the most recognized politicians in the United States

FARM SURPLUSES HURT AMERICAN FARMERS

After the end of World War II water for irrigation in Eastern Washington turned thousands of acres of wasteland into productive farm land On the West side of the Cascades, further diking and ditching along North Puget Sound gave farmers access to more land With increased acreage, better equipment, and improved farming techniques farmers nationwide produced so much food that surpluses began to build up prices for farm products began to fall rapidly American farmers had been too successful prices for harvested foods fell below the cost of production Most Americans enjoyed the low prices reflected in grocery stores and supermarkets while hundreds of small farms went bankrupt every year and were purchased by large corporations Control of production by the Federal Government became necessary to protect farmers from falling prices the number of acres which could be planted was limited sometimes farmers were paid not to plant at all -- to keep prices up

OLD TIME LOGGING COMES TO AN END

Logger Stewart H. Holbrook

composed a suitable requiem for the passing of an era -- 1950's

"...The logging railroads were the first to go. I have ridden the locomotives or the cars of 290-odd privately owned logging railroads in four states and one province. How many remain I do not know, but they cannot number more than half a dozen for the whole area. Trucks did away with them.

"The great pounding steam donkeys, too, were driven out buy the internal combustion engine fed on gasoline or diesel oils. When the old-time whistle punk yanked his signal wire, the steam donkey responded with a startled cry of a quality to alert the most sluggish mind. And when it was running, it emitted sound and smoke and steam and cinders in satisfying profusion. Small, smooth quiet diesel engines did away with the donkeys.

"As late as the early 1940's trees were felled by muscular men who stood on springboards notched in the trunks and pulled the long glittering blade of a crosscut (saw). They were mostly of Scandinavian origin -- big blond men with sweeping mustaches who worked by the bushel, inch or mile, as piecework was called. Perfection of the power chainsaw drove the big Scandies from the

woods. Either that, or they learned to operate a chainsaw, a rig that will down a giant in less time than it took to set a springboard or handwork.”³²⁶

HENRY KAISER IS THE OWNER-OPERATOR OF SPOKANE’S KAISER ALUMINUM

After leasing the aluminum facility from the federal government for six years

he now owned the Spokane aluminum plant outright --1950

Fortune magazine, which had ridiculed Kaiser’s initiative, now declared: **“Not since the rise of Henry Ford has an industrial figure come so far in so short a time.”³²⁷**

Kaiser’s mills produced more than aluminum ingots

they created well-paying blue-collar jobs, paid taxes and nurtured community goals

Kaiser organized Kaiser Permanente health care for his workers and their families

U.S. SENATOR WARREN G. MAGNUSON FUNDS MEDICAL RESEARCH AND WINS FRIENDS

Senator Magnuson asked the President of Pepsi Cola Bottling Company John Teeter

for a donation for Swedish Hospital in Seattle

Teeter responded with a \$25,000 donation to **“a fine institution with an excellent staff”³²⁸**

Magnuson pushed into the federal budget \$37 million for cancer research

and an additional \$29 million for heart research

Medical institutions, donors and patients alike adored Warren G. Magnuson

NORTHGATE MALL OPENS AS SUBURBS INCREASE IN POPULATION

Originally known as “Northgate Center” this suburban shopping center

it was designed by Seattle architect John Graham, Jr.

to be built on a cranberry bog as a rival to Bellevue Square

Northgate Center, developed by Allied Stores, the parent company of The Bon Marche (Macy’s),

it was the first regional shopping center in the United States to be described as a mall

it featured two rows of stores facing each other across a covered pedestrian walkway

it also the first mall to have public restrooms

at forty acres, this was the largest shopping center in North America at that time

and the concept was copied across the nation

Northgate Center began business with eighteen stores -- April 21, 1950

(Redmond sculptor Dudley C. Carter designed and carved the 59-foot cedar totem pole [1952]

that decorated the grand entrance to the central retail corridor, known as the “Miracle Mall”)

BOEING DEVELOPS THE KC-97 STRATOTANKER FOR THE U.S. AIR FORCE

B-29 “Superfortress” had been adapted by Boeing engineers into the troop-carrying C-97

this in turn was adapted into a propeller-driven refueling tanker: the KC-97

with the development of in-air refueling the long time a dream of airmen became a reality

United States Air Force began operating the KC-97 when it purchased 816 from Boeing -- 1950

it was equipped with the necessary tanks, plumbing and “flying boom”

³²⁶ W. Storrs Lee. *Washington State*. P. 473.

³²⁷ *Spokesman Review*, February 17, 2002.

³²⁸ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*. P. 158.

its enormous upper deck was capable of accommodating oversize cargo
and could be accessed through a very large right-side door
transferrable jet fuel was contained in tanks on the lower deck
both decks were heated and pressurized for high altitude operations

KOREAN SPLIT ESCALATES INTO OPEN WAR

North Korean forces invaded the southern Republic of Korea -- June 15, 1950
this was the first significant armed conflict of the Cold War
when President Harry Truman was informed of the invasion -- June 20, 1950
he called Senator Warren Magnuson and small group of U.S. Senators to the White House
United Nations Security Council demanded North Korea stop its attack and return to its borders

SEOUL, CAPITAL OF THE REPUBLIC OF KOREA, FALLS TO NORTH KOREAN SOLDIERS

Successfully marching into South Korea, North Korean troops captured Seoul
bridges across the Han River dividing the warring halves were destroyed
most of South Korea's best army, along with their equipment, was trapped on the north side

PRESIDENT HARRY S TRUMAN COMMITS AMERICAN TROOPS

President Truman ordered American troops into South Korea
with the support of the United Nations and fighting under the U.N. flag -- June 30, 1950
without receiving (or even seeking) a declaration of war from Congress
General of the Army Douglas MacArthur, commander of the World War II Pacific Theater,
was appointed commander of United Nations military forces in South Korea
at the same time he retained his command of American forces in Japan
where he spent most of his time -- seldom visiting Korea
Lieutenant-General Walton H. "Bulldog" Walker, a veteran of World War II,
took command of all of the American troops in the field
he also served as senior advisor to the Republic of Korea's Army

EFFORT IN KOREA IS GOING BADLY FOR THE UNITED NATIONS FORCES

As North Korean troops advanced southward American and South Korean armies were in full retreat
defenders were pushed back to the "Pusan Perimeter" around the port of Pusan
General Walton H. Walker issued his famed *Stand or Die* order -- July 29, 1950

"We are fighting a battle against time. There will be no more retreating, withdrawal or readjustment of the lines or any other term you choose. There is no line behind us to which we can retreat... There will be no Dunkirk, there will be no Bataan. A retreat to Pusan would be one of the greatest butcheries in history. We must fight until the end... We will fight as a team. If some of us must die, we will die fighting together... I want everybody to understand we are going to hold this line. We are going to win."

General Walker's strategy was to conduct a "mobile defense" in which a small portion of his force held a thin screen forward while the bulk of his force was held in reserve for a counterattack
this mobile defense strategy did not exist in the Army's operations manual in 1950
Walker lacked subordinate corps headquarters support -- he was a one-man show
Finally the "Pusan Perimeter" defensive line was established along the Naktong River -- August 1

Pusan Perimeter held against North Korean troops
Korean Peninsula was saved from evacuation
although hard fighting continued around Pusan

UNITED NATIONS TROOPS COUNTER-ATTACK TAKES PLACE IN KOREA

Joint Task Force Seven, more than 320 warships including four aircraft carriers, carried the nearly 70,000-man force into the dangerous tides of Inchon Harbor far in the rear of attacking United Nations armies at the front under cover of a heavy naval bombardment and fighter aircraft -- September 15, 1950
Marines landed 100 miles behind the North Korean lines and began the fight toward Seoul
American troops cut North Korean supply lines and hampered their retreat
this was a masterstroke conceived and directed by General Douglas MacArthur
(within two weeks, the North Korean army was largely destroyed or made ineffective
total destruction of North Korea's military power seemed near at hand)

U.S. SENATE ATTEMPTS TO MAKE THE COMMUNIST PARTY ILLEGAL

Trial of Alger Hiss convinced many politicians of the usefulness of congressional committees in uncovering Communist subversion
Congress passed the Subversive Activities Control Act or McCarran Act
(named after its prime sponsor, U.S. Senator Pat McCarran [D-Nevada])
this made membership in the American Communist Party a crime
punishable by ten years in prison and a \$10,000 fine
President Harry S Truman vetoed the Bill -- September 22, 1950
in his veto message the president noted that it **“would betray our finest traditions”** as this law attempted to **“curb the simple expression of opinion”** he went on to argue that the **“stifling of the free expression of opinion is a long step toward totalitarianism.”**

U.S. SUPREME COURT JUSTICE WILLIAM O. DOUGLAS TURNS TO WRITING

With little hope remaining to be elected president and not feeling fulfilled as a Supreme Court Justice
Yakima-raised Douglas turned to writing as he published *Of Men and Mountains* -- 1950
he wrote of his love for the mountains: **“My home is at 2000 feet elevation. Mount Adams is 12,307 feet. Though it towers nearly two miles above me, I may not see it for hours on end as I travel this mountain area, for the trail is usually beneath a ridge. Yet when I travel there I almost felt the presence of the mountain. I am filled with the expectancy of seeing it from every height of land, at every opening of a canyon. And the sight of its black basalt cliffs, crowned with white snow, both set against a blue sky, is enough to make a man stop in wonderment. Sometimes as I travel around Mount Adams counterclockwise from the south I will be in the canyon of the Klickitat River for twenty miles or more. As the dirt road crosses a shoulder of a ridge, I may get a fleeting glimpse of Mount Adams -- perhaps only a view of its rounded dome. But even that is enough to lift the heart.”**³²⁹

When I first traveled Mount Adams, as a boy, all its alpine meadows had pristine beauty. But today one who takes the circle trip finds at the northwest corner of the mountain exquisite meadows

³²⁹ W. Storrs Lee. *Washington State*. P. 487.

practically ruined by sheep. Dust has taken the place of bunch grass; pounding hoofs have torn up protective root systems; the slopes, heavy with the smell of sheep scat, promise to become an awful dust bowl, where spring runoffs create ugly gullies. This northwest corner is in the public domain. The north and east belong to the Indians, who exploit it greatly by allowing the white man to graze sheep and cattle there. Both areas are severely pounded, robbing this Mount Adams country, that was almost sacred to me, of much of its great glory.”³³⁰

SECOND TACOMA NARROWS BRIDGE OPENS TO TRAFFIC

Construction was completed at a cost of \$14 million -- October 14, 1950

this second bridge was wider -- four lanes rather than two

it was open on the sides with an open roadbed

considerably more arch was provided in the middle of the bridge

(today the Tacoma Narrows Bridge is the fifth longest suspension bridge in North America

as shown by the statistics:

- top of the tower: 650 feet above Puget Sound,
- total length: 5,979 feet,
- suspension section: 5,000 feet,
- center span: 2,800 feet,
- center span above the water: 187.5 feet,
- width of roadway: 49 feet,
- width of sidewalks: 3 feet 10 inches,
- diameter, main suspension cable: 20.25 inches,
- weight of main suspension cable: 5,441 tons,
- weight sustained by cables: 18,160 tons,
- tower height above piers: 467 feet,
- weight each tower: 2,675 tons,
- East pier height: 265 feet,
- East pier weight: 65,000 tons,
- West pier height: 215 feet,
- West pier weight: 52,000 tons

COMMUNIST CHINESE TROOPS ATTACK THE UNITED NATIONS FORCES

Deep in North Korea Mao Zedong's Communist Chinese troops came out of the hills

near Unsan, North Korea to assault surprised U.S and South Korean soldiers

dusk November 1, 1950

thousands of Chinese attacked from the north, northwest and west against the scattered forces

they swarmed around the flanks and over defensive positions

U.N. soldiers attempted to pull out but the Chinese had established a roadblock to their rear

that forced them to abandon their artillery as the men took to the hills in small groups

only a few scattered survivors made it back

Communist Chinese attacks continued until all was quiet again in Korea-- November 6

when United States generals began to prepare to once again take the offensive

³³⁰ W. Storrs Lee. *Washington State*. P. 489.

NATIONAL ELECTION IS HELD

Elections took place -- November 7, 1950

before his fall from glory General Douglas MacArthur took a toll on Democrats nationally

Democrats were tainted with by Republicans with charges of treason

eight United States Democratic Senators lost their seats

in California liberal Helen Douglas lost to Republican Richard Nixon

some Republican pundits believed better campaign use of Joe McCarthy

would have won control of the Federal House and Senate for Republicans

Washington State voters once again established the historic pattern of electing

voters in Washington remained loyal to their occupational interests

farmers and businessmen in eastern Washington consistently voted Republican

urban and suburban laborers in the western half usually voted Democrat

neither the Democrats nor the Republicans could gain control of both state houses

and the governorship

U.S. Senators Warren G. Magnuson (D) and Henry P. Cain (R)

were not up for reelection

Washington's congressional delegation remained four Republicans and two Democrats

as the incumbents were reelected to office

Republican Arthur B. Langlie lived in the governor's mansion

results in the Washington legislature were mixed for the two political parties

in the State Senate Republicans fell from twenty-seven to twenty-one seats

while Democrats increased from nineteen to twenty-five and a majority

in the State House of Representatives Democrats lost thirteen seats dropping from 67 to 54

while Republicans added those seats to bring their numbers up from 32 to 45

GENERAL MACARTHUR ORDERS KOREA "CARPET" BOMBED

General MacArthur ordered a wasteland be created between the fighting

front and the Chinese border

he wanted every **"installation, factory, city, and village"**³³¹ over thousands of square miles

destroyed from the air starting at the Manchurian border and progressing south

Seventy-nine B-29s dropped 550 tons of incendiaries on Sinuiju, North Korea -- November 8, 1950

"removing [it] from off the map"³³²

Hoeryong, North Korea was next napalmed **"to burn out the place"**³³³

within two weeks **"a large part of [the] North West area between Yalu River and south to enemy lines is more or less burning"** -- soon the area would be a **"wilderness of scorched earth"**³³⁴

FEDERAL CIVIL DEFENSE ADMINISTRATION IS CREATED

President Harry S Truman issued an executive order creating the new agency -- December 1, 1950

³³¹ MacArthur Archives.

³³² MacArthur Archives.

³³³ MacArthur Archives.

³³⁴ MacArthur Archives.

while the task of averting nuclear war fell largely within the realms of military and foreign policy
surviving a war became the central mission of civil defense planners
Congress and policymakers recognized the impossibility of providing absolute protection
from the horrors of nuclear weapons
instead, educating Americans to protect themselves from nuclear weapons
became the focus of civil defense policy
Schools were central to the Civil Defense program
in addition to start and dismissal and fire drill bells, school bells added a new signal
to warn of the impending disaster of a nuclear holocaust
Student “Duck and Cover” drills were proposed as protection against the effects of a nuclear blast
from the early 1950s (into the 1980s)
school children were told this was supposed to protect them in the event of a nuclear attack
which, it was noted, could come at any time without warning
immediately after they saw a flash, students had to stop what they were doing
and get on the ground or under some cover such as a table or desk, or at least next to a wall
and assume the fetal position lying face-down, covering their head with their hands
they were to close their eyes and wait for instructions
(assuming any were forthcoming)
Proponents of Duck and Cover argued that thousands of lives could be saved through this precaution
because without it students would run to the windows to find the source of the big flash
during this time a shock wave would shatter the glass shredding onlookers
Opponents of the drill retorted that only fear was being taught to young people

GENERAL DOUGLAS MACARTHUR COMMENTS TO THE PRESS

General MacArthur was asked by a reporter -- December 1, 1950
if the restrictions on operations against Chinese forces on the far side of the Yalu River
were **“a handicap to effective military operation”**³³⁵
he replied that they were indeed **“an enormous handicap, unprecedented in military
history”**³³⁶

PRESIDENT TRUMAN REACTS TO STATEMENTS FROM GENERAL MACARTHUR

In reaction to General MacArthur’s statements to the press
President Harry Truman issued a directive requiring all military officers and diplomatic officials
to clear with the State Department all but routine statements before making them public
MacArthur received legal advice the directive did not apply to his correspondence or conversations
(he continued to make similar remarks in statements to the press)

GENERAL MACARTHUR CALLS FOR THE USE OF ATOMIC WEAPONS

General Douglas MacArthur said that he wanted a commander’s discretion
to use atomic weapons in Korea -- December 9, 1950
MacArthur submitted a list of targets for which he required twenty-six atomic bombs

³³⁵ Michael D. Pearlman, *Truman and MacArthur*, P. 170.

³³⁶ Michael D. Pearlman, *Truman and MacArthur*, P. 170.

he also wanted four additional bombs to drop on North Korean invasion forces
and four more for destruction of concentrations of enemy air power

CONGRESS PASSES THE SUBVERSIVE ACTIVITIES CONTROL ACT OVER TRUMAN'S VETO

Anti-Communist fervor was bi-partisan as ten Democratic U.S. Senators voted
to uphold the Subversive Activities Control Act or McCarran Act -- December 21, 1950
one section of the law established a committee to investigate people who were suspected
of engaging in subversive activities or otherwise promoting establishment
of a "totalitarian dictatorship" -- Fascist or Communist
another section required Communist organizations to register with the U.S. Attorney General
members of these groups could not become citizens
and in some cases were prevented from entering or leaving the United States
Subversive Activities Control Act tightened alien exclusion and deportation laws
and allowed for the detention of dangerous, disloyal, or subversive persons
in times of war or "**internal security emergency**"
those found in violation Subversive Activities Control Act could lose their citizenship in five years
President Truman called the Subversive Activities Control Act "**the greatest danger to freedom of
speech, press, and assembly since the Alien and Sedition Law of 1798**"
he denounced the law as a "**mockery of the Bill of Rights**"
and a "**long step toward totalitarianism**"
(in fact, major provisions of the act were found to be unconstitutional [1965] and [1967])

U.S. SENATE CREATES A SPECIAL SUBCOMMITTEE TO INVESTIGATE COMMUNISTS

Subversive Activities Control Act or McCarran Act authorized a special U.S. Senate subcommittee
to Investigate the Administration of the Internal Security Act and Other Internal Security Laws
this subcommittee was commonly known as Senate Internal Security Subcommittee (SISS)
or the McCarran Committee

SISS or McCarran Committee was to investigate and study:

- administration, operation and enforcement of the Subversive Activities Control Act (1950)
and other laws relating to espionage, sabotage and other threats to internal security
- extent, nature and effects of subversive activities in the United States

SISS was granted the power to subpoena witnesses and require the production of documents

this committee was considered by some to be the U.S. Senate equivalent
to the older U.S. House of Representatives Un-American Activities Committee

SISS Chairman was Senator Patrick McCarran (D-Nevada)

under his leadership, committee members began to investigate:

- formulation of U.S. foreign policy in Asia;
- scope of Soviet activity in the United States;
- subversion in the Federal Government,
especially in the Department of State and Department of Defense;
- the United Nations;
- youth organizations;
- television, radio, and entertainment industry;
- telegraph industry;

- the defense industry;
- labor unions;
- educational organizations

GENERAL WALKER IS KILLED IN A JEEP ACCIDENT IN KOREA

Lieutenant-General Walton H. “Bulldog” Walker was killed on his way to the war front to award battle citations to the British Commonwealth Brigade

his jeep crashed into a truck taking his life at age sixty -- December 23, 1950

General Walton H. Walker is buried in Arlington National Cemetery

Lieutenant-General Matthew Ridgeway was named Supreme U.N. and U.S. commander in Korea under the command of General Douglas MacArthur

GENERAL MATTHEW RIDGEWAY TAKES COMMAND IN KOREA

General Ridgeway was not intimidated by the demeanor of his superior, General Douglas MacArthur who was the overall commander of UN forces in Korea

MacArthur gave Ridgeway latitude in operations he had not given his predecessor

One of Ridgeway’s first acts was to restore the soldiers’ confidence in themselves:

- he reorganized the command structure;
 - he also replaced officers who did not send out patrols to identify enemy locations;
 - he removed “enemy positions” from commanders’ planning maps
if there had been no recent contact verify that the enemy was still there;
 - he established a plan to rotate out those division commanders
who had been in action for six months and to replace them with fresh leaders;
 - he sent instructions (not orders) to commanders at all levels that they were to spend more time
at the front lines and less time in their command posts in the rear;
- these steps had an immediate positive impact on morale

UNITED NATIONS TROOPS IN KOREA ARE AGAIN UNDER ATTACK

Chinese Communist forces and North Korean troops renewed their offensive -- January 3, 1951

Seoul, the capital of South Korea, was abandoned to the Communist advance

General Matthew Ridgeway ordered the air force to hit the North Korean capital of Pyongyang

“with the goal of burning the city to the ground with incendiary bombs”³³⁷

(this happened in two strikes on January 3 and 5, 1951)

General Ridgeway was able to stabilize the United Nation’s line of defense -- January 14, 1951

HANFORD ATOMIC WORKS DOES ITS PART FOR THE COLD WAR

United States Army was spending \$6 million a year to develop nuclear weapons -- 1951

more than 16,000 people were employed at the Hanford site -- 1951

this was the second largest industrial plant in the Pacific Northwest -- following Boeing

TWENTY-SECOND AMENDMENT SETS THE TERM OF OFFICE FOR THE PREISDENT

Ever since George Washington’s decision not to seek a third term

³³⁷ *New York Times*, December 13, 1950 and January 3, 1951.

this was cited as evidence the founders saw a two-term limit as a defense against a monarchy
it became the accepted practice to serve only two terms in the presidency
prior to Franklin D. Roosevelt, few Presidents attempted to serve for more than two terms
Ulysses S. Grant sought a third term (1880) after serving from (1869) to (1877)
but he narrowly lost the Republican Party's nomination
Theodore Roosevelt succeeded to the presidency after William McKinley's assassination
he was elected to a full term in his own right (1904) -- he served from (1901) to (1909)
he sought to be elected to a (non-consecutive) term (1912) but lost to Woodrow Wilson
Franklin D. Roosevelt became the only president to be elected to a third term (1940)
his supporters cited the war in Europe as a reason for breaking with precedent
he won a fourth term in the (1944) election
he suffered a cerebral hemorrhage and died (1945)
thus, Franklin D. Roosevelt was the only President to have served more than two terms
At least in part due to the long-lasting presidency of the "New Deal" leader,
Congress passed a proposed Constitutional Amendment (March 27, 1947)
it was ratified by twenty-nine states as then required for implementation -- February 27, 1951
In essence, the amendment stated:
no person shall be elected to the office of the President more than twice
(efforts to repeal the amendment have been attempted by both political parties
ever since [1985] when Republican President Ronald Reagan became ineligible for reelection

TRIAL OF ALLEGED COMMUNIST AGENTS BEGINS

(Husband and wife American Communists Julius and Ethel Rosenberg
and Communist Morton Sobell were arrested on charges of stealing atomic bomb secrets
for the Soviets [1950])
Trial of the Rosenbergs and Sobell began -- March 6, 1951
prosecution's primary witness, David Greenglass, stated that his sister Ethel
typed notes containing U.S. nuclear secrets in the Rosenberg apartment (September 1945)
these notes apparently contained little that was relevant to the Soviet atomic bomb project
some people suggest Ethel was indicted along with Julius so that the prosecution
could use her to pressure Julius into giving up the names of others who were involved
Greenglass also testified that he turned over to Julius Rosenberg a sketch of the cross-section
of the "Fat Man" atomic bomb dropped on Nagasaki, Japan
during their testimony both Rosenbergs refused to name anyone else as Communists
each asserted their Fifth Amendment rights to not incriminate themselves
whenever they were asked about involvement in the Communist Party
or with its members

GENERAL MACARTHUR ISSUES ONE STATEMENT TO THE PRESS TOO MANY

President Harry Truman was seeking an end to the Korean Conflict
he was preparing to present a cease-fire proposal to the Communist Chinese
General Douglas MacArthur issued a public statement that ended the opportunity
in his message MacArthur reported: **"...Red China, of such exaggerated and vaunted military power, lacks the industrial capability to provide adequately many critical items necessary to the**

conduct of modern war. He [sic] lacks the manufacturing base and those raw materials needed to produce, maintain and operate even moderate air and naval power, and he cannot provide the essentials for successful ground operations.... These military weaknesses have been clearly and definitely revealed since Red China entered upon its undeclared war in Korea. Even under the inhibitions which now restrict the activity of the United Nations forces and the corresponding military advantages which accrue to Red China, it has been shown its complete inability to accomplish by force of arms the conquest of Korea.”³³⁸

(Truman would later report that **“I was ready to kick him into the North China Sea, I was never so put out in my life.”³³⁹**

MacArthur had spoken on his own authority without regard to the president’s foreign policy in open defiance of his orders from the President and as Commander in Chief it was a direct challenge to the authority of the President under the Constitution)

TRIAL OF THE ALLEGED COMMUNIST AGENTS COMES TO AN END

Julius and Ethel Rosenberg were convicted of transmitting or attempting to transmit information “relating to the national defense” to a foreign government -- March 29, 1951 both were sentenced by Federal Judge Irving Kaufman (April 5) to be executed Ethel’s brother, David Greenglass, who supplied the stolen documents to Julius, served ten years of his fifteen-year sentence before being released Harry Gold, who had been the courier for Greenglass and had identified the Communist agents served fifteen years in Federal prison because of his cooperation Communist Morton Sobell served seventeen years and nine months of a thirty-year sentence before being released

PRESIDENT TRUMAN DISCUSSES GENERAL MACARTHUR WITH FOUR TOP ADVISORS

President Harry Truman held a meeting in his office with Secretary of Defense John Marshall, Chairman of the Joint Chiefs of Staff Omar Bradley, Secretary of State Dean Acheson and Averell Harriman then leading the Marshall Plan to rebuild Europe -- April 6, 1951 what to be done about General Douglas MacArthur was the topic for discussion Harriman was emphatically in favor of firing MacArthur Bradley opposed it Marshall asked for more time Acheson was personally in favor of relieving MacArthur but did not disclose it (President Truman held additional meetings with his advisors Joint Chiefs of Staff met to discuss what to do about General MacArthur)

PRESIDENT TRUMAN FIRES GENERAL DOUGLAS MACARTHUR

President Truman drafted an order to General Douglas MacArthur -- April 11, 1951 which was issued under Chairman of the Joint Chiefs of Staff Omar Bradley’s signature:

“I deeply regret that it becomes my duty as President and Commander in Chief of the United States military forces to replace you as Supreme Commander, Allied Powers; Commander

³³⁸ James, D. Clayton, *1941–1945, Vol. 2*, P. 586

³³⁹ Davis McCullough, *Truman*, P. 998.

in Chief, United Nations Command; Commander in Chief, Far East; and Commanding General, U.S. Army, Far East.

“You will turn over your commands, effective at once, to Lt. Gen. Matthew B. Ridgway. You are authorized to have issued such orders as are necessary to complete desired travel to such place as you select.”³⁴⁰

SENATOR WARREN MAGNUSON RECEIVES A HERO’S WELCOME IN JAPAN

Senator Magnuson pioneered trade relations between Seattle and the defeated World War II enemy he went to Japan as Seattle’s good will ambassador in an effort to develop international trade In Tokyo, General Douglas MacArthur his wife were at a luncheon at the American embassy held for Senator Warren Magnuson and Northwest Airlines’ William Stern -- April 11, 1951 when one of the general’s aides entered the room he informed Mrs. MacArthur of a message from the president -- she informed the general

PUBLIC RESPONSE TO THE FIRING OF MACARTHUR WAS IMMEDIATE AND FEROCIOUS

An avalanche of mail and messages were sent to the White House by the public almost all were in support of General Douglas MacArthur news of MacArthur's relief was greeted with shock in Japan U.S. Senator Robert Taft (R-Ohio) called for immediate presidential impeachment proceedings what support Truman enjoyed was largely based on the principle of civilian control of the military

GENERAL DOUGLAS MACARTHUR RETURNS TO THE UNITED STATES

General MacArthur flew back to a country he had not seen in years in San Francisco he received a parade that was attended by 500,000 people MacArthur was greeted on his arrival at Washington National Airport -- April 19, 1951 by the Joint Chiefs of Staff and General Jonathan Wainwright President Truman sent General Harry H. Vaughan as his representative this was viewed by some as a slight as Vaughan was seen as a corrupt crony of the president by the public and professional soldiers alike

GENERAL MACARTHUR ADDRESSES A JOINT SESSION OF CONGRESS

MacArthur, hero of World War I and World War II where he won the Congressional Medal of Honor, gave his farewell address before Congress -- April 19, 1951 it was one of the great moments in early television and offered him a unique opportunity to tell his side of the story -- he did not disappoint MacArthur ended his speech: **“I am closing my 52 years of military service. When I joined the Army, even before the turn of the century, it was the fulfillment of all of my boyish hopes and dreams. The world has turned over many times since I took the oath on the plain at West Point, and the hopes and dreams have long since vanished, but I still remember the refrain of one of the most popular barrack ballads of that day which proclaimed most proudly that "old soldiers never die; they just fade away."**

³⁴⁰ MILITARY SITUATION IN THE FAR EAST, HEARINGS Before the COMMITTEE ON ARMED SERVICE and the COMMITTEE ON FOREIGN RELATIONS, UNITED STATES SENATE EIGHTY SECOND CONGRESS, P. 3179.

“And like the old soldier of that ballad, I now close my military career and just fade away, an old soldier who tried to do his duty as God gave him the light to see that duty.

“Good Bye.”³⁴¹

PUBLIC OPINION REGARDING GENERAL MACARTHUR RUNS STRONG

As a result of their support of President Truman, the Joint Chiefs were viewed as politically tainted
U.S. Senator Robert Taft (R-Ohio) regarded General Omar Bradley in particular with suspicion
because of Bradley’s focus on Europe at the expense of Asia

In response to the public outcry in support of General MacArthur, the Pentagon issued a press release
that noted **“the action taken by the President in relieving General MacArthur was based
upon the unanimous recommendations of the President’s principal civilian and military advisers
including the Joint Chiefs of Staff.”³⁴²**

WASHINGTON STATE FERRY SYSTEM BEGINS OPERATION³⁴³

Washington State Ferries took control of the privately-owned Puget Sound Navigation Company
which operated the Black Ball Line on the Sound

Much of the ferry-riding public felt that the privately owned system constituted a monopoly
passengers had suffered through shutdowns and rate hikes

Angry citizens convinced lawmakers to step in and let the state run the ferry system
to assure it would be more accountable to the public

After a years-long battle Washington bought out most of the fleet and operations
from Puget Sound Navigation

Small ceremonies were held in various cities on the route
and at the grave of Chief Seattle in Suquamish

Governor Arthur Langlie and Highway Director William Bugge were in attendance

Ferry *Enetai* made the last run of the Black Ball line

she docked at Bremerton and dropped off her passengers at 2:30 a.m. June 1, 1951

then the Black Ball flag was lowered from her mast for the last time

Official changeover occurred at 3:00 a.m.

ferry *Vashon* began her regular run at 5:20 a.m. from Lofall in Kitsap County

she was the state first ferry in operation

Passengers noticed little difference as schedules remained the same

so did a large majority of ferry workers who came over directly from the Black Ball Line

some may have noticed the orange smokestacks were in the process of being painted green,

but the rest of each ship looked the same as it did every morning

truly observant listeners may have noticed that the signature landing call blown on the whistle

was now one long blast followed by a short instead of one long and two shorts

³⁴¹ Torricelli, Robert G, Carroll, Andrew, Goodwin, Doris Kearns, In Our Own Words: Extraordinary Speeches of the American Century, P. 185-188.

³⁴² Appendix to the Congressional Record, P. A3193.

³⁴³ Alan J. Stein, HistoryLink.org, Essay 5081, January 20, 2003.

BOEING B-47 STRATOJET BOMBER IS USED BY THE STRATEGIC AIR COMMAND

Boeing's B-47 Stratojet was a long-range, six-engine jet-powered medium bomber built to fly at high subsonic speeds (below the sound barrier) and at high altitudes it was primarily designed to drop nuclear bombs on the Soviet Union
B-47s became the mainstay of the U.S. Air Forces' Strategic Air Command -- June 1951 it carried America's nuclear weapons during the 1950s and (early 1960s)
B-47s remained in use as a bomber until (1965)
Boeing's B-47s was adapted to a number of other missions including photo reconnaissance, electronic intelligence and weather reconnaissance
(it remained in service in these capacities until [1969]
but it never saw combat as a bomber)

CONSTRUCTION BEGINS ON THE COLUMBIA BASIN IRRIGATION PROJECT

After World War II attention was focused on irrigation of farmlands in addition to generating electricity, Grand Coulee Dam, unlike Bonneville Dam, was also conceived as part of a vast irrigation project to transform thousands of acres of parched, sagebrush-covered land in central Washington into a garden that boosters hope in time would support half a million people
(in fact, those expectations were exceeded as today the population leaped to 1,403,000 and taxable wealth in the Pacific Northwest expanded by \$3,000,000,000)
Grand Coulee was a canyon carved out by the Columbia River during the last Ice Age
North Dam was constructed directly to the west and above Grand Coulee Dam and rock-faced, earth-filled Dry Falls Dam to the south enclosed the Grand Coulee
twelve massive pumps capable of lifting 4,300,000 gallons of water a minute were housed in an immense pumping plant
these pumps lifted water uphill 280 feet from Franklin Delano Roosevelt Lake behind Grand Coulee Dam and dumped it into the Grand Coulee
now enclosed by the two dams -- June 4, 1951
(this portion of the irrigation project was built at a cost of \$222,674,000)
Grand Coulee held twenty-seven-mile long Frank Banks Lake named for the U.S. Bureau of Reclamation project manager
water ran from Banks Lake ran by gravity into the Columbia Basin Project
a vast irrigation network made up of several thousand miles of waterways, ditches tunnels, siphons and concrete canals constructed at a cost of \$435,743,000 to carry water to the Big Bend Irrigation District
this water was used for the reclamation project
that irrigated 1,200,000 previously unfarmed acres
(Irrigation began when six of the twelve pumps were installed and the filling of Banks Lake was undertaken 1951 through [1953])

AN UNSETTLING PATTERN DEVELOPS IN KOREA

Fighting centered on patrolling and small clashes of arms
truce talks began in the "Joint Security Area" -- June 10, 1951
an agreement was quickly reached in almost all areas,

with the exception of a prisoner-exchange

United Nations forces refused to return prisoners who did not want to be repatriated
(Communists broke off the talks [August 23, 1951])

As the fighting continued, United States and the United Nations poured men, equipment and money
into the effort to stop the fall of South Korea and the spread of Communism

U.S. SENATOR WARREN MAGNUSON LINKS SEATTLE WITH JAPAN

Senator Magnuson pushed for a trade fair in Seattle to open commerce
with America's defeated World War II enemy

Senator Magnuson conducted talks with the U.S. State Department
and coordinated discussions with the Senate Finance Committee

to gain an exemption from duty fees for Japanese goods shipped to Seattle for the fair
Seattle's Japan Trade Fair was held for two weeks -- June 1951

this was the nation's first opportunity to exhibit Japanese goods since the (1930s)
city of Seattle provided support for the effort as a **“goodwill gesture on the part of the people of
Seattle to the people of Japan”**³⁴⁴

Magnuson said the fair was good for the nation and “great for Seattle”

(in fact, Seattle became the primary Northwest port of entry for Japanese products

this trade remained a mainstay of the city's economy for the balance of the century)

DAVE BECK ADVANCES IN THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS

International Teamster President Dan Tobin was under fire from his executive board
reform leader Tom Hickey of the Teamsters in New York City

ran for a position on the executive board --1951

Tobin needed Dave Beck's support to prevent Hickey from being elected

Beck refused to give it -- weakening Tobin's powerful control of the union

HANK KETCHAM IS THE FATHER OF THE CARTOON FEATURE *DENNIS THE MENACE*

Henry King “Hank” Ketcham was born in Seattle (March 14, 1920)

when he was six years old, his father had a guest over for dinner who was an illustrator

after dinner he showed Hank his “magic pencil” and drew some illustrations

Hank was hooked and soon his father set up a small desk where he could draw

in the closet of his bedroom

after graduating from Queen Anne High School (1937),

Hank attended the University of Washington but dropped out after his first year

he hitchhiked to Los Angeles and went to work as an animator for Walter Lantz Productions

after drawing cartoons featuring Woody Woodpecker,

Ketcham took a job with Walt Disney Studio

Hank Ketcham launched a comic strip --1951

Dennis the Menace was based on his own four-year-old son Dennis

Dennis the Menace would be featured in newspapers across the nation 1951-(1994)

when he retired from drawing the daily page and took up painting full time

³⁴⁴ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*. P. 158.

MARSHALL PLAN TO ASSIST EUROPE COMES TO AN END -- 1951

During the four years the Marshall Plan was operational (1948) through June 1951 more than \$13 billion in U.S. economic and technical assistance was given to help the recovery of the European countries that had joined in the Organization for European Economic Co-operation this aid also was offered to the Soviet Union and its allies, but they did not accept it European economies grew at an unprecedented rate economic prosperity in Europe was led by the coal and steel industries (these helped to shape what we know now as the European Union this economic and political union is composed of independent member states located primarily in Europe)

U.S. SENATE INTERNAL SECURITY SUBCOMMITTEE (SISS) BEGINS ITS INVESTIGATIONS

SISS, also known as the McCarran Committee, spent a year investigating Owen Lattimore editor of the Institute of Pacific Relations journal *Pacific Affairs* Institute of Pacific Relations offered forum for discussion of problems and relations between the nations of the Pacific Rim other members of the Institute of Pacific Relations staff (the so-called China Hands) accused of “losing China” to the Communists also were investigated -- July 25, 1951 some people accused the IPR leadership of spying for the Soviet Union There was nothing to support Senator McCarran’s accusation that Lattimore was “a conscious and articulate instrument of the Soviet conspiracy” (Lattimore later was charged with perjuring himself before the McCarran Committee [1952] many of these charges were rejected by a federal judge one of the witnesses against Lattimore confessed to perjury and the case was dropped [1955]) (it was widely believed the pressure of the investigation triggered the suicide of United Nations Assistant Secretary General Abraham Feller [November 13, 1952])

WHITE PASS OPENS TO TRAFFIC

U.S. Highway 12 across the Cascade Mountains via White Pass opened -- August 1951 (while the highway route had been designated as early as [1916], this road did not open until 1951) White Pass is the southernmost pass in the state climbing the mountains to a height of 4,500 feet eastward, it descends following the Tieton River into the Yakima Valley U.S. Highway 12 connected Aberdeen, Washington with Detroit, Michigan

KING-TV BROADCASTS LIVE LOCAL NEWS³⁴⁵

Charles H. Herring Jr. stood in front of a KING-TV studio camera at the launch of television’s first news program in the Pacific Northwest only a few thousand television sets were in the KING-TV signal area

³⁴⁵ Frank Chesley, HistoryLink.org, Essay 7688, March 14, 2006.

viewers watched the grainy, black-and-white images flickering on their eight-inch screen
on the only television newscast west of Minneapolis and north of Los Angeles
KING-TV was inventing television as it went along and set a high standard for national TV
Dorothy Bullitt, a newcomer to broadcasting, had bought the station (in 1949)
she felt a strong obligation to public service and wanted her stations to serve her hometown
KING-TV's news department was in an old store on Queen Anne Hill
Charles Herring's "Early Edition" was originally sponsored by Alka-Seltzer
voicing the commercial was part of his job
Herring was news director and anchorman
"Early Edition" consisted of a fifteen-minute broadcast
since there were no teleprompters and the broadcast was live, Herring wrote his own copy
an excellent reader, he needed only occasionally to glance at his copy
cameraman Ed Racine shot 16-milimeter film for local coverage
telexed photos wire service photos were used for wider-ranging stories

CHARLES HERRING -- POINEER TELEVISION NEWSCASTER

Chuck Herring was a farm boy from the Walla Walla area who attended Washington State College
but he graduated cum laude from Whitman College [1944]
he worked for a radio station in Walla Walla while attending Whitman
Herring serviced during World War II with the U.S. Navy in the Pacific theater
he worked for two years in radio news at KJR in Seattle before joining KING-TV
(Herring left KING-TV [1967] and operated radio station KAPY-AM in Port Angeles with his wife
at age 83 Herring died of cancer in Seattle [January 23, 2006])

EDWARD R. MURROW ENTERS THE FIELD OF TELEVISION

After returning to America from London and World War II, Edward R. Murrow was surprised
to find that his overseas reports had made him a star at home
he was approached to host a weekly television program:
See It Now ran from -- November 18, 1951-(July 7, 1958)
Television was in its infancy and Murrow and his associate, Fred Friendly,
had to learn the process of filmmaking and editing on the job
using the primitive television equipment
Murrow's love of hometown America led him to seek out stories of ordinary people
he presented their stories in such a way that they often became powerful commentaries
on political or social issues
See It Now consistently broke new ground in television journalism

CHANGES ARE MADE AT GRAND COULEE DAM

Congress authorized \$125,000 to conduct a feasibility study on a third power plant -- 1952
(this study was completed and offered two recommended locations for the facility [1953]
nine more 108 Megawatt generators were recommended
but these would only be able to operate in periods of high water
overall maximum capacity of the dam's power facilities was increased to 7,079 Megawatts

COLUMBIA BASIN IRRIGATION PROJECT BEGINS TO PROVIDE WATER TO THE DESERT

Irrigation waters of the Columbia Basin irrigation project began to flow from the Grand Coulee Reservoirs to about 5,800 acres in the vicinity of Pasco -- 1952 irrigation pump generating plant contained six pump-generators with a capacity of 314 Megawatts when pumping water into Banks Lake they consume 600 MW of electricity

LIFE ON THE FRONT LINE IN KOREA CONTINUES TO BE DANGEROUS

An absence of grand offensives and sweeping movements did not mean the life of a soldier was less dangerous in 1952 than it had been in (1951)

Communist gunners hurled over 6,800 shells a day at United Nations positions during particularly hotly contested actions, Communist gunners occasionally fired as many as 24,000 rounds a day

UN artillery returned fire at five-, ten-, and sometimes even twenty-times that rate

Not a day went by when Communist and UN soldiers did not clash somewhere along the front line

TRUCE TALKS CONTINUE IN KOREA WITHOUT RESULTS

Another round of truce talks began -- March 1952 (which lasted until [July 1953])

more than thirteen thousand American troops were killed, wounded or captured during that time

United Nations forces were not permitted to advance or capture any significant new territory

but the Main Line of Resistance (MLR) was to be held at all costs

since both sides had already indicated their willingness to settle the conflict

roughly along the current front lines, neither side had any incentive to risk a major offensive

IMMIGRATION AND NATIONALITY (McCARRAN-WALTER) ACT PASSED CONGRESS

This act, named in part after its author Patrick McCarran (D-Nevada)

maintained the quota system already in place in for limits on newly arriving nationalities

and the regions of the world from which they emigrated

it established a preference system which determined the desirability of ethnic groups

and placed great importance on labor qualifications

three types of immigrants were defined:

- immigrants with special skills or relatives of U.S. citizens who were exempt from quotas and who were to be admitted without restriction;
- average immigrants whose numbers were not supposed to exceed 270,000 per year;
- refugees who were admitted due to dire circumstances

President Truman vetoed the Act because he regarded the bill as “un-American” and discriminatory

in his veto message said: **“Today, we are ‘protecting’ ourselves as we were in 1924, against being flooded by immigrants from Eastern Europe. This is fantastic...We do not need to be protected against immigrants from these countries -- on the contrary we want to stretch out a helping hand, to save those who have managed to flee into Western Europe, to succor those who are brave enough to escape from barbarism, to welcome and restore them against the day when their countries will, as we hope, be free again....These are only a few examples of the absurdity, the cruelty of carrying over into this year of 1952 the isolationist limitations of our 1924 law. In no**

other realm of our national life are we so hampered and stultified by the dead hand of the past, as we are in this field of immigration.”³⁴⁶

PACIFIC COAST LEAGUE BASEBALL ACHIEVES NEW STATUS

PCL became the only minor league in history to be given the “Open” classification designation
this was step above the “AAA” level -- 1952
and limited the rights of major league clubs to draft players from the PCL
it was seen as a step toward the circuit becoming a third major league
Consistently, eight teams took the field in competition
Hollywood Stars, Los Angeles Angels, Oakland Oaks, Sacramento Solons, San Diego Padres,
San Francisco Seals, Portland Beavers and the Seattle Rainiers
Shift to the Open classification came just as minor league teams from coast to coast
suffered a sharp drop in attendance primarily because major league games appeared on television

U.S. SENATOR WARREN G. MAGNUSON LANDS A HUGE CONTRACT FOR BOEING

Senator Magnuson convinced Air Force General Hap Arnold to purchase additional B-17s
Maggy also fought against cuts in B-29 production
Boeing was producing Boeing’s B-47 medium bomber for the Strategic Air Command
already, the B-47s successor, the B-52, was in the development phase at Seattle’s Boeing plant
while it was an effective tanker, Boeing’s KC-97’s slow speed and low operational altitude
made refueling operations with jet aircraft complicated
U.S. Senator Magnuson visited with President Harry Truman
and proposed B-52s be constructed in Seattle
Maggy’s relationship with the President kept production of the B-52 Bomber in Seattle

PEARL WANAMAKER FIGHTS OFF HER DETRACTORS³⁴⁷

Superintendent of Public Instruction Pearl Wanamaker fended off several attempts to curb her clout
at the height of her power her budgets and policies were seldom defeated -- 1952-(1956)
she punished those who tried to inhibit her reforms
When Republican Governor Arthur Langlie tried to put a freeze on state spending
Wanamaker, facing a bumper crop of war babies starting school,
fought him and Republican legislators, demanding, **“Where are you going to put the
children, in the deep freeze?”** (*Seattle Post-Intelligencer*, March 19, 1953)
Pearl Wanamaker’s demand for educational reform cost the state a lot of money
but she knew how to get funding and spared no Populist tactic to gain more
she spoke out in effective sound bites guaranteed to make the newspapers all over the state
Look magazine (1954) called her a **“ruthless fighter”** for school budgets,
and quoted a legislator who fumed, **“She drives right into your home town and tells
your constituents you’re voting against their kids.”**
But her enemies piled up over the years:
legislators in both political parties, but especially conservative and rural Republicans,

³⁴⁶ The Department of State Bulletin, Volume 27, Part 1, P. 80.

³⁴⁷ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

taxpayer groups, Washington State Grange, Seattle Chamber of Commerce,
Governor Langlie, vocational educators, Catholic and private schools
and others attacked her

BOEING CONSIDERS A NEW COMMERCIAL JET AIRCRAFT

Boeing Company began research and development on its newest jet airplane
the design phase was complete -- early 1952
Boeing's board of directors approved the program to build the jet -- April 1952
Boeing was experienced at selling to the military, but had not enjoyed that success with civil airliners
commercial market was dominated by Douglas Aircraft Company
which was adept at meeting the needs of airlines
by refining and developing its extensive range of propeller-driven aircraft
airlines remained unconvinced of the design because Boeing had no experience with jet transports
and at the time was enjoying great success with its piston engine aircraft
Boeing decided that the only way to overcome the commercial suspicion of the jet (and of itself)
was to show them a completed aircraft

BOEING B-52 STRATOFORTRESS TAKES ITS MAIDEN FLIGHT

Boeing B-52 was a long-range, subsonic (below the speed of sound), jet-powered strategic bomber
designed and built by Boeing to be operated by the United States Air Force
B-52 Stratofortress was built to carry nuclear weapons for Cold War-era deterrence missions
it took its maiden flight -- April 15, 1952

GENERAL MARK CLARK TAKES KOREAN COMMAND FROM GENERAL RIDGEWAY

When General Clark took command -- May 12, 1952
he kept United Nations offensive operations to a minimum to avoid unnecessary casualties
Communist commanders simply waited for the United Nations' will to erode away
Raids, patrols, bombardments and attacks with only limited objective were the order of the day
both sides contented themselves with making light jabs rather than attempting a knockout blow
As peace talks dragged on, outposts were fought over, gained or lost, regained and relost,
for well over a year -- always at the cost of lives
This period of defensive war was sometimes referred to as the Outpost War
since most of its battles were fought along the whole width of the Korean Peninsula
around outposts ranging up to 5,000 yards in front of the Main Line of Resistance (MLR)
outposts were usually located on high ground where observers
controlled and conducted raids
or on ground that could be used to assault United Nations outposts or the MLR

COLUMBIA BASIN WATER FESTIVAL IS CELEBRATED³⁴⁸

Grant, Adams, and Franklin counties celebrated the Columbia Basin Water Festival -- May 22, 1952
in recognition of the first irrigation water sent from the Grand Coulee Dam region
through canals and siphons to the Columbia Basin to irrigate 66,000 acres

³⁴⁸ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

Ten cities in the three counties scheduled ten days of events

Sally Johnson of Soap Lake was voted queen of the festival

Phyllis Elaine Pfeifer Brown of Wilson Creek, Irene Snyder of Quincy,
and Dolores Larreau of Moses Lake were her princesses

Festivities kicked off at Pasco, in Franklin County as a large crowd gathered at Liberty Theater there Governor Arthur B. Langlie gave the opening speech a jubilee parade marched through downtown Pasco with 121 bands participating began -- 2:30 p.m.

Republican Presidential candidate Harold Stassen rode in the parade

Stassen and Langlie later gave speeches at a Kennewick dinner
evening activities concluded at the Pasco athletic field with a musical presentation and dance

MOSES LAKE, WASHINGTON WAS THE SCENE OF THE HIGHLIGHT OF THE FESTIVAL³⁴⁹

Moses Lake conducted a publicity stunt -- the construction of a "Farm-in-a-Day"
to be completed between midnight May 25-midnight May 26

Local labor unions, businessmen, soldiers and neighbors from around Moses Lake
agreed to volunteer

most of the volunteers worked throughout the full twenty-four hours to complete the project

Success was owed in large part to the cooperation among contractors, union members,
government agencies and cities

some 150 to 200 American Federation of Labor (AFL) union men participated,
fifty-five local contractors and subcontractors furnished equipment free of charge,
forty-five suppliers donated building materials,
twenty military men from nearby Larson Air Force Base donated their labor
none were below the rank of major,
farm implement companies and dealers donated equipment to the farm
and loaned other equipment to prepare the land for planting

At midnight a bomb went off signaling the beginning of the stunt

under floodlights three hundred workers swarmed out to erect a home, barn, and outbuildings
one crew unloaded trucks, another assembled frames and yet another erected posts
wind hampered the first four hours of work as the volunteers were chilled
and everything was covered in dust

meanwhile, sixteen pieces of heavy equipment cleared and leveled eighty acres of sagebrush
eighteen tractors following closely behind pulling disks, harrows and drills

By noon, half of the farm's eighty irrigable acres had been planted

sprinklers were laid and water came to the freshly plowed ground an hour or two later

It was a publicity stunt to be sure

but it also was a symbol, too, compressing a century's hopes down to a few hours

Big Bend Country had been a region big with promise -- now it could come to fruition

FARM-IN-A-DAY IS AWARDED TO DONALD DUNN

Local dignitaries conducted a ceremony on the hill overlooking the brand new farm

Brigadier General Howard Bowman, commander from nearby Larson Air Force Base,

³⁴⁹ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

attended the ceremony and milked the family cow
U.S. Bureau of Reclamation Commissioner Michael W. Straus and Washington's congressmen
presented the deed for the property to Donald Dunn -- mid-afternoon of May 26, 1952
Dunn won the newly-completed \$75,000 farm in a drawing held exclusively for war veterans
his farm contained 120 acres donated by the Northern Pacific Railway
eighty acres had been put under cultivation by volunteers
At dusk Donald Dunn, a farm-implement salesman from Yakima, his wife and two children
stood blinking inside a completely furnished new seven-room farmhouse
they were still not quite sure what had happened to them
(Later, Donald Dunn would share his story of success during his first year on the farm
he planted 16.5 acres in potatoes, which averaged seventeen tons to the acre valued at \$13,143.55
twenty-one acres planted in beans yielded 21.5 hundredweight bags per acre, for about \$3,000
ten acres of oats, yielding 55.5 bushels per acre worth about \$693.75
ten acres of alfalfa yielded forty-five bales per acre for \$450
six acres of grass, his smallest plot, of six acres yielded thirty-five bales per acre for \$210)

ADDITIONAL ACTIVITIES OF THE COLUMBIA BASIN WATER FESTIVAL CONTINUE³⁵⁰

Grant County was to receive the most benefit from the new irrigation system
Quincy, Washington held its annual Canal Day -- May 26, 1952
The Old and The New parade entertained young and old alike along Main Street
there was a novelty show with horseback trick riding, a jack rabbit derby, a treasure hunt
and a dinner at the Quincy Grange Hall
another highlight was a large carnival with thirty concessionaires
that night, residents and visitors attended a street dance
frolicking to Bud Meyers and his twelve piece band
fireworks capped the evening

SOAP LAKE CONTINUES THE FESTIVITIES³⁵¹

Soap Lake, Washington began a showing of the *Grand Coulee Cavalcade* -- May 27, 1952
which ran for six days (ending June 1)
this event depicted the history of humankind and irrigation since earliest times
about 700 people, mostly students, participated
Soap Lake also hosted a golf tournament with seventy-two golfers participating

EPHRATA, WASHINGTON PARTICIPATES IN THE COLUMBIA BASIN WATER FESTIVAL³⁵²

Festivities began in Ephrata and lasted five days -- May 28-(June 1), 1952
locals and visitors alike gathered for the opening ceremony of the *Little World's Fair*
Memorial Day was celebrated with a special parade
veterans groups and members of the surrounding Elks lodges participated
Spokane's Shriners' Patrol Band made a special appearance

³⁵⁰ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

³⁵¹ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

³⁵² Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

in addition to local dignitaries, leaders in reclamation from several countries sat on the dais
Mexico, Iran, Turkey, Nepal, Pakistan, Burma, Thailand, India, Australia, Haiti, El Salvador,
The Philippines, Formosa, Indonesia, French Indo-China, and Iraq were each represented
Each of Ephrata's Little World's Fair five days featured a different theme:

- May 28 -- All Nation's Day;
- May 29 -- Industrial Day featured a lunch
with the undersecretary of the U.S. Department of the Interior Richard D. Searles as speaker
- May 31 -- Pacific Northwest Day;
- June 1 -- Flying Farmers Day

Ephrata's fair was billed as the only fair where a pilot could taxi over to a hotdog stand
two carnivals entertained the crowds at the Ephrata air base
visiting dignitaries attended a dinner at the local Rotary Club
with National Reclamation Association President C. P. Peterson

MOSES LAKE FEATURES A GREAT VARIETY OF ACTIVITIES³⁵³

Residents of Moses Lake and its visitors were very busy -- May 29, 1952
choices of activities included a rodeo, county fair, fashion show, children's show,
outdoor square dance, and performances by the Wenatchee High School band

MEMORIAL DAY WAS CELEBRATED THROUGHOUT THE COLUMBIA BASIN³⁵⁴

Memorial Day (in those days) was celebrated on Friday -- May 30, 1952
Ephrata held a special parade and flag ceremony
performances included the choir from the Moses Lake
Church of Jesus Christ of Latter-Day Saints
Gonzaga University's Homecoming was celebrated in connection with the Little World's Fair
Soap Lake held a large outdoor Catholic Mass at the Grand Coulee Amphitheater
Bishop Joseph P. Dougherty of Yakima spoke at the Mass
Bishop Charles D. White of Spokane served the Mass
Moses Lake City Park was the location of the city's memorial celebration
American Legion and Veterans of Foreign Wars both brought color guards
Larson Air Force Base sent a ceremonial firing squad
former World War II army chaplain and superintendent of Samaritan Hospital Virgil Jackson
gave the address
local high school band members performed
Moses Lake's Junior Legion team played in a doubleheader baseball game at the high school
against the Empire Furniture team
made up of players from Spokane's Gonzaga High School

ANOTHER GRAND HIGHLIGHT OF THE COLUMBIA BASIN WATER FESTIVAL IS HELD³⁵⁵

Now that Grant County had water, people were eager to start working the land

³⁵³ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

³⁵⁴ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

³⁵⁵ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

but not all acreage was irrigated as yet and the demand outpaced supply of irrigated land
potential land buyers had to put their names into a drawing
winners were chosen by the drawing of lots
homesteads range from ten to one hundred and sixty acres of rich, fat land,
eminently suited to intensive cultivation
Othello, Washington was the site of land drawing -- May 31, 1952
forty-two names were drawn from 7,000 submitted
for the privilege of purchasing designated acreage
but it is not cheap land
several thousand dollars were needed to bring a farm into production
primary source of income proved to be raising specialized crops
that could not have been marketed from so remote a place before the days of rapid transport
such as dairy products, asparagus, choice fruits and the like
On the same day, Coulee City, Washington began a two day Frontier Days festival
which included a parade and rodeo
there was also a dance at the high school gymnasium
In Ephrata, residents and visitors could choose from several events
including an oratorical contest, pet show, shrine parade and festivities, fashion show and dance

LAST DAY OF THE COLUMBIA BASIN WATER FESTIVAL ARRIVES³⁵⁶

Columbia Basin cities celebrated the final day of the Columbia Basin Water Festival -- June 1, 1952
Moses Lake had seen an estimated 44,000 people during the Farm-in-a-Day construction alone
Ephrata's Little World's Fair came to an end
Soap Lake hosted the largest interdenominational church service in the state
sponsored by the Washington and Northern Idaho Councils of Churches
to conclude its Grand Coulee Cavalcade which featured 700 singers from across the state
united in a single choir
Festival attendees had celebrated the irrigation of the Columbia Basin's first 66,000 acres
(over the next decade, more and more acreage received water
eventually approximately 550,000 acres in Grant, Adams and Franklin counties
received water through an extensive network of canals, siphons, and reservoirs
that originated above Grand Coulee Dam in Banks Lake

IMMIGRATION AND NATIONALITY ACT PASSES OVER THE PRESIDENT'S VETO

McCarran-Walter Act was passed over the President Truman's veto -- June 27, 1952
by votes 278 to 113 in the U.S. House of Representatives and 57 to 26 in the U.S. Senate
This law allowed the federal government to deport immigrants or naturalized citizens
who were engaged in subversive activities
and allowed suspected subversives to be barred from entering the country
former Communist Party members and "fellow travelers" were to be denied on entry
this Act was used to exclude many prominent individuals (until it was amended [1990])

³⁵⁶ Elizabeth Gibson, HistoryLink.org, Essay 8114, April 12, 2007.

VETERANS' ADJUSTMENT ACT FOR KOREAN CONFLICT VETS PASSES CONGRESS

Earlier success of the (1944) Servicemen's Readjustment Act (G.I. Bill) prompted Congress to offer similar measures to the veterans of the Korean Conflict

President Harry S Truman signed by The Veterans' Adjustment Act -- July 16, 1952

Korean War vets were entitled to twenty-six weeks of unemployment benefit at \$26 a week to support their education and training, veterans received a fixed monthly sum of \$110 from which they had to pay for their tuition, fees, books and living expenses

TEAMSTERS UNION PRESIDENT DAN TOBIN ANNOUNCES HIS RETIREMENT

Seventy-seven-year-old Dan Tobin was the International Brotherhood of Teamsters president he had led the union in strikes, jurisdictional battles and membership expansion since (1907)

Tobin announced that at the completion of his term as president he would retire -- September 4, 1952 he asked Dave Beck to lead the union as its new president

Beck was easily the state's most powerful man in national politics

As the Teamsters Union's annual convention neared, Dan Tobin changed his mind about retiring he and his supporters formed a draft Tobin for president movement

designed to undercut Dave Beck's control of the convention delegates

SPOKANE'S CATHERINE MAY SELECTED AS A REPUBLICAN LEGISLATIVE CANDIDATE³⁵⁷

Catherine Dean May, a former high-school English teacher and radio broadcaster

had entered politics when she launched a campaign for an open seat in the state legislature (1952) she filed for the office at the urging of her husband, James O. May

who was a Yakima real-estate agent and president of the local Young Republicans Club she proved she had a number of strengths as a political candidate:

- she came from a prominent local family;
- she developed a large constituency of listeners as the host of a popular noontime radio show that was aimed at women;
- she proved to be a natural campaigner

She handily won the Primary Election --September 11, 1952

since Yakima had not sent a Democrat to the legislature for two decades,

her victory in the general election, two months later, was something of a formality

SEATTLE'S SEAFARING UNIONS GO ON STRIKE

Sailors' Union of the Pacific; Marine Firemen, Oilers, Watertenders and Wipers, Marine Cooks and Stewards walked off the job

they shut down the city's waterfront in an internal fight over jurisdiction

Marine Firemen feared the Sailors' Union of the Pacific was after their engine room jobs

Marine Cooks and Stewards feared both of the other unions

Marine Firemen, Marine Firemen, Oilers, Watertenders and Wipers

armed with tire irons and baseball bats, patrolled the docks around the clock

concerned the Sailors' Union of the Pacific would try to take over their jobs below deck

Senator Warren Magnuson dispatched Max Kempelman to find out what the strike was about

³⁵⁷ Cassandra Tate, HistoryLink.org, Essay 8834, November 13, 2008.

eventually, with Maggy's help, the dispute was resolved with no jobs snatched away

UNITED NATIONS (UN) BUILDING OPENS IN MANHATTAN, NEW YORK

United Nations Building and its seventeen-acre complex in Manhattan, New York City opened beside the East River -- October 9, 1952

four of the five principal departments are located at the main United Nations Headquarters
International Court of Justice is located in The Hague, Netherlands
while other major agencies are based in the UN offices at Geneva, Switzerland,
Vienna, Austria and Nairobi, Kenya
additional UN institutions are located throughout the world

DAVE BECK IS ELECTED INTERNATIONAL BROTHERHOOD OF TEAMSTERS PRESIDENT

As the International Brotherhood of Teamsters Convention opened -- October 14, 1952

Dave Beck submitted a resolution to the convention asking Dan Tobin to remain as president in a public display of support for the seventy-seven-year-old president but privately Dave Beck forced Tobin to refuse the offer
Beck threatened to strip Tobin of his pension and benefits if the movement to retain him as Teamster president failed

Dan Tobin decided to retire -- he was well compensated for his decision
his pay was elevated from \$30,000 to \$50,000 (1952 dollars)

and the executive board was authorized to pay him this salary for life
As further humiliation, Dan Tobin nominated Dave Beck for president at the convention Beck was elected by acclamation

Dave Beck pushed a number of changes through the convention intended to make it harder for a challenger to build the necessary majority to unseat a president or reject his policies

NATIONAL AND STATE ELECTIONS ARE HELD

Republican Dwight David Eisenhower, the former (five-star) General of the Army, was elected President -- November 4, 1952

he promised to extricate the U.S. from the Korean Conflict

(when that was accomplished, America settled down to enjoy the spoils of victory earned by the success of World War II fighting)

Eisenhower was characterized by Senator Magnuson as the **"caretaker of the status quo"**

Maggy noted regarding his presidency that **"[President Eisenhower] told the colonel to tell the sergeant to tell the private and that was that. He didn't send up any legislation."**³⁵⁸

President Eisenhower's election was part of a Republican landslide that swept the nation
Washington State's U.S. Senators were:

- Warren G. Magnuson who was not up for reelection
- Henry "Scoop" Jackson won a landslide election to the National Senate -- November 4, 1952 after twelve years in the national House of Representatives
Senator Jackson will serve the senate until his death in (1983)
Magnuson-Jackson partnership became an unprecedented national political powerhouse

³⁵⁸ Shelby Scates, *Warren G. Magnuson*. P. 198.

In the state offices

Republican Governor Arthur Langlie retained his office defeating Democrat Hugh B. Mitchell long-serving Lieutenant-Governor Vic Meyers was defeated by Republican Emmett Anderson

Changes are made in the state' congressional Delegation

Democrat Hugh B. Mitchell chose to run for the governorship rather than for reelection

Seattle Republican Thomas M. Pelly was elected to the First Congressional District

Republican Alfred Westland replaced Henry Jackson in the Second Congressional District

Republicans Russell V. Mack (Third District), Hal Holmes (Fourth District)

Walter Horan (Fifth District) and Thor Tollefson (Sixth District) all were reelected

Democrat Donald Hammer Magnuson (no relation to Senator Warren Magnuson)

was elected to the new "At-large" congressional seat

Legislative races reflected the Eisenhower landslide as Republicans captured both legislative houses

Republican Party gained four seats in the State Senate

winning the majority twenty-five seats to twenty-one Democrat seats

exactly the reverse of four years earlier

in the State House of Representatives Republicans also captured the majority

fifty-eight seats to forty-one for the Democrats

CATHERINE DEAN MAY BECAME A LEGISLATIVE RISING STAR

Catherine Dean May was one of nine women elected to the 99-member State House of Representatives

(she was re-elected, with only token opposition, in [1954] and [1956])

As a legislator, Catherine May consistently voted with the conservative wing of her party:

- she opposed state support of education on the grounds that it would lead to socialism;
- she favored private for-profit power companies over public utilities;
- she voted to cut state welfare payments;
- she remained staunchly conservative on state fiscal matters

However, Catherine May also lead several reforms for the state of Washington

she sponsored a (1955) bill that became the legal foundation for public television in the state

she voted (1957) to relax several so-called "blue laws," regulating the sale of liquor

including one that restricted the sale of alcoholic beverages to women

SENATE INTERNAL SECURITY SUBCOMMITTEE (SISS) GETS A NEW CHAIR

After the Republican landslide election

provided the Republican Party a majority of U.S. Senate seats -- November 1952

William Jenner (R-Indiana) took over the Senate Internal Security Subcommittee (SISS) chair from Patrick McCarran (D-Nevada)

(When the Democrats regained control in the U.S. Senate (1955),

James O. Eastland, D-Mississippi, became chairman of the SISS

he held the position until the subcommittee was abolished [1977])

BOEING BEGINS PRODUCTION ON A COMMERCIAL JET AIRPLANE

In a walled-off section of Boeing's Renton plant production of the new commercial jet airliner was under way -- November 1952

To keep the concept of the jet airlines secret from competitors
there was no certification request and no production line
most of the parts were custom built
airplane's interior was not fitted with a cabin
rather it consisted of a basic plywood lining that was used to house the test instrumentation
which was required for the flight test program
Because this was the first of a new generation of passenger jets,
Boeing wanted the aircraft's model number to emphasize the difference
from its previous propeller-driven aircraft which bore 300-series numbers
also, the 400-, 500- and 600-series were already used by missiles and other products,
so Boeing decided that the jets would bear 700-series numbers
with the first number being the 707
to further confuse the competition, Boeing changed the airliner's designation
this airplane was numbered "367"
and the prototype airplane was referred to simply as the "80" or "Dash-80"

U.S. AIR FORCE DOUGLAS C-54 "SKYMASTER" CRASES IN TACOMA³⁵⁹

En route from Fairbanks, Alaska the Air Force transport airplane flown by a crew of seven
was carrying thirty-two servicemen and their dependents
after striking two tall fir trees while attempting to land in thick fog at McChord Air Force Base
the plane crashed into an open field (now Wards Lake Park)
in South Tacoma -- 12:48 a.m. November 1952
Only survivors were a twenty-three-year-old airman, Curtis Redd, who was a passenger
eight-year-old Joseph M. Iacovitti who lost his parents, two brothers and a sister
crew member Airman Bobby R. Wilson, age twenty, was taken to a hospital
where he died from internal injuries and burns
Three other families were entirely wiped out in the fiery crash

ANOTHER AIR FORCE TRANSPORT AIRPLANE CRASHES³⁶⁰

One of the worst air disasters in Washington history occurred when a Douglas C-124 "Globemaster"
transport plane en route to Kelly Air Force Base near San Antonio, Texas
crashed at Larson AFB in Moses Lake, Washington -- December 20, 1952
Shortly after takeoff the plane lurched to the side and the left wing tip hit the ground
before the plane exploded in a fireball
Most of the passengers were Air Force personnel
from Korea or Northwest bases on their way home for Christmas
some of the 121 passengers escaped by running out of the rear of the plane
but most of the people in the cavernous main passenger compartment and cockpit
were caught in the wreckage and fire
rescue teams worked for hours to look for survivors and recover bodies
final death toll was placed and eighty-seven

³⁵⁹ Daryl C. McClary, HistoryLink.org, Essay 8803, October 17, 2008.

³⁶⁰ Jim Kershner, HistoryLink.org, Essay 8352, November 2, 2007

An investigation showed the crash was caused by “locked” controls at takeoff,
(but whether this was pilot error or mechanical malfunction remained in dispute)
at the time, this was the worst disaster in aviation history

U.S. SENATOR HENRY M. JACKSON TAKES OFFICE

Henry M. “Scoop” Jackson was sworn into the U.S. Senate -- January 20, 1953
(Jackson was the most consistently successful vote-getter in the state’s history
following six terms [twelve years] in the House of Representatives,
he was elected to the Senate [1952] -- he won six Senate elections by sizeable margins
Senator Jackson did not take his popularity for granted
he frequently returned home from Washington D.C. to visit the state and meet constituents
although he was not an outstanding public speaker,
he was an excellent one-on-one campaigner, with a remarkable memory for
voters’ names and important personal information
he always campaigned hard and sought substantial victories
Jackson was a staunch “Cold War liberal” throughout his political career
he steadfastly advocated for increased military spending
and maintaining a hard line against the Soviet Union
he supported civil rights, the labor movement, and increased social welfare programs
including national health insurance
he was admired for his personal integrity and clean-cut political image
(Senator Henry M. Jackson ran twice, unsuccessfully, for the Democratic presidential nomination))

PRIVATE POWER-PUBLIC POWER FEUD SURFACES AGAIN

President Dwight D. Eisenhower reopened the private-public power dispute
in his inaugural address -- January 20, 1953
he outlined a “partnership policy” in which public power agencies and private firms
would cooperate in the development of power generating facilities
this program was not successful
but it did trigger a strong lobbying effort in opposition by public power interests

STATE UTILITIES ARE EMPOWERED TO FORM JOINT OPERATING AGENCIES

Legislators enacted a law allowing public utilities to form “Joint Operating Agencies” -- 1953
in an effort to resolve the private-public power dispute
and to assure the electric power needs of the region would be met

SENATOR JOE McCARTHY LEADS AN ANTI-COMMUNIST WITCH HUNT

U.S. Senate Permanent Subcommittee on Investigations (PSI) had been formed (1952)
as a subcommittee of the Senate Internal Security Subcommittee (SISS)
U.S. Senator Joseph McCarthy (D-Wisconsin) was named chairman of the PSI
he greatly increased the number of investigations and number of witnesses called
in attempting to ferret out Communists -- 1953-(1954)
Senator McCarthy conducted headline-grabbing inquiries
into allegations of Communist subversion and espionage in the U.S. government

and in the defense industries -- March to (July) 1953
Senator McCarthy first examined allegations of Communist influence
in the Voice of America radio broadcast system
this was one of the world's most trusted sources for news and information
from the United States and around the world
he also held hearings on possible Communist infiltration of the Department of State,
the U.S. Information Libraries, the U.S. Printing Office and the U.S. Army Signal Corps
Closed executive sessions of the PSI were held prior to the public hearings
many of the witnesses later testified in public sessions, but some appeared only in closed sessions
meeting transcripts revealed that Senator McCarthy was often the only senator present
Interrogations were largely conducted by McCarthy's chief counsel, Roy Cohn,
and by the subcommittee's unpaid "chief consultant," G. David Schine
interrogators probed the witnesses on their beliefs, families, and past associations
some witnesses cooperated while some refused to testify -- generally citing the Fifth Amendment
Senator McCarthy frequently threatened witnesses with prosecution for "Contempt of Congress"
(but all cases later were either thrown out of court or overturned on appeal
no one who appeared before McCarthy's subcommittee was imprisoned
for anything related to their testimony
however, many lost their jobs for declining to answer the subcommittee's questions)

"McCARTHYISM" SWEEPS ACROSS THE UNITED STATES

McCarthyism was the practice of making accusations of disloyalty, subversion, or treason
without proper regard for evidence
It was characterized by heightened fears of Communist influence on American institutions
and espionage by Soviet agents
It was often claimed that the American Communist Party did not allow any member to resign
thus anyone who had been a member, even for a short time decades before,
could be considered suspect
many of the McCarthyism hearings and trials featured testimony
provided by former Communist Party members who spoke as expert witnesses
In the McCarthy era thousands of citizens were accused of being Communist or sympathizers
they became the subject of aggressive investigations and questioning
before government or private-industry panels, committees and agencies
primary targets of such suspicions were government employees,
those in the entertainment industry, educators and union activists
suspicions were often accepted despite inconclusive or questionable evidence
often the level of threat posed by a person's real or supposed leftist associations or beliefs
was greatly exaggerated
Many people suffered loss of employment and/or destruction of their careers;
some even suffered imprisonment
most of these punishments came about through trial verdicts later overturned,
as the laws used to gain conviction were later declared unconstitutional
the legal procedures used would come into general disrepute
McCarthyism was a widespread social and cultural phenomenon that affected all levels of society

it was the source of a great deal of debate and conflict in the United States
McCarthyism's abuses included speeches, investigations, and hearings of Senator McCarthy himself;
various anti-Communist activities of the Federal Bureau of Investigation (FBI)
under Director J. Edgar Hoover;
and Hollywood blacks associated with hearings that had been conducted
by the U.S. House of Representatives Un-American Activities Committee
Washington Senator Warren Magnuson was a card playing and drinking buddy of Senator McCarthy
Maggy noted: **"I knew McCarthy real well when he came to the Senate [1946]. He was an
Irishman with a sense of humor. A grand guy. In fact we had a summer place that we rented
together in Virginia Beach, both of us bachelors. We'd go down there together. We were great pals.
Then, all of a sudden, he got involved in this communist thing and he completely ignored me. He
never threatened me and I suppose it was because of our prior relationship. He didn't turn on his
pal. He ignored me. Something possessed him."**³⁶¹

KOREAN CONFLICT CONTINUES TO INFLICT DAMAGE

On-again off-again peace talks resumed -- March 30, 1953
savage fighting continued at outposts along the Main Line of Resistance [MLR]
artillery on both sides exchange hundreds of thousands of artillery rounds
(several outposts fell but U.S., U.N. and South Korean soldiers re-took them
and held against determined assaults by North Korean and Chinese Communists [April 1953])

DAVE BECK IS ELECTED TO THE AMERICAN FEDERATION OF LABOR EXECUTIVE BOARD

International Brotherhood of Teamster President Dave Beck
was elected to the Executive Council of the American Federation of Labor (AFL) -- 1953
he became a vice president of the AFL
Beck was described as a practical man with a business rather than a social philosophy

SHELL OIL COMPANY CHOOSES ANACORTES FOR A NEW OIL REFINERY³⁶²

Shell Oil announced its location for a new refinery
in the *Anacortes American* newspaper -- June 2, 1953
a special edition of the paper covered the front page with the news: "Shell Picks Local Site"
Big Oil and the economic prosperity it would bring was enthusiastically embraced
Shell's refinery (along with a second one opened by Texaco Oil Company
at the same location [1958])
would revitalize the Anacortes economy and change the identity of the town
that had been built on lumber, fishing and canning

EXECUTION OF COMMUNISTS AGENTS JULIUS AND ETHEL ROSENBERG

Julius and Ethel Rosenberg were put to death in the electric chair -- June 19, 1953
these were the first and only executions of civilians for espionage in United States history
Decision to execute the Rosenbergs was (and still is) controversial

³⁶¹ Shelby Scates, *Warren G. Magnuson*. P. 148.

³⁶² Phil Carter, HistoryLink.org, Essay 9874, July 6, 2011.

in part because the other Communist spies who were caught by the FBI offered confessions and were not executed
Hysteria concerning Communists had both an immediate and a lasting effect
many innocent scientists, including some who were virulently anti-Communist, were investigated simply for having the last name “Rosenberg”
(Decoded Soviet cables, codenamed “VENONA” [1995] supported courtroom testimony that Julius Rosenberg acted as a courier and recruiter for the Soviets, but cast doubt on the level of Ethel’s involvement³⁶³
(*The New York Times* in an editorial on the 50th anniversary of the execution (June 19, 2003) wrote: “The Rosenberg’s case still haunts American history, reminding us of the injustice that can be done when a nation gets caught up in hysteria.”)
Twenty-three other leaders of the Communist Party were indicted -- 1953 including Elizabeth Gurley Flynn, a founding member of the American Civil Liberties Union many were convicted on the basis of testimony that was later admitted to be false
(As the Red Scare continued, 140 leaders and members of the Communist Party were charged under the law [by 1957] -- ninety-three were convicted)

COMMUNIST CHINESE TROOPS ATTEMPT ANOTHER PUSH SOUTH

Communist China sent three armies, about 100,000 troops, on the attack -- June 1953
South Korean soldiers were forced to fall back several thousand yards before United Nations artillery firing about 2.7 million rounds drove the attackers off -- June

SEATTLE TIMES GOES ON STRIKE³⁶⁴

Seattle Times newspaper suspended publication for -- July 16, 1953
when writers and editors of American Newspaper Guild, Local 82 Seattle-Tacoma Chapter went on strike demanding a 7.3 percent wage increase while the paper countered with a 3.5 percent offer
250 writers and editors were joined in the walkout by five other craft unions representing web pressmen, mailers, stereotypers, photoengravers and typographers whose contracts with the *Times* and the *Seattle Post-Intelligencer* had expired approximately 700 *Seattle Times* employees were affected
(*Seattle Times* paper resumed publication after contracts were signed with all bargaining units ninety-four day strike ended [October 19, 1953])

TALKS ARE CONCLUDED IN KOREA

(Truce talks began again -- this time in earnest [July 10, 1953])
only a threat by President Eisenhower to use nuclear weapons finally brought about an armistice
After three years, one month, and two days of fighting an Armistice was signed -- July 27, 1953
Korean War officially ended
United States suffered 33,327 deaths and 102,000 wounded
558 of those killed were from the state of Washington

³⁶³ *Associated Press at MSNBC*. September 17, 2008. <http://www.msnbc.msn.com/id/26761635>.

³⁶⁴ Dave Wilma, HistoryLink. org, Essay 2853, November 21, 2000.

cost of the war was over \$18 billion
United Nations contingents lost 17,000 men
half of the U.S. and U.N. dead were killed after truce talks had begun
it is estimated North Korea lost about four million people including civilians
Two Washington men received the Congressional Medal of Honor:
•Marine PFC Walter C. Monegan, Jr. of Seattle was killed (September 20, 1950)
after destroying several North Korean tanks with a rocket launcher
•Army Master Sergeant Benjamin F. Wilson (1922-1988) of Vashon Island
led a bayonet attack against Chinese forces (June 5, 1951)
he was wounded as he protected his men during the withdrawal
Under the terms of the cease-fire, Korea would be divided at the 38th parallel
as it had been the day the North Koreans had attacked
(37,000 U.S. troops remain stationed in South Korea to maintain the cease fire)
(Chinese troops completely withdrew from North Korea [October 26, 1958]
however, more than 200 violations of armistice were noted up to [1959])

U.S. SUPREME COURT JUSTICE WILLIAM O. DOUGLAS COMES UNDER ATTACK

Justice Douglas' behavior generated great criticism of his private life
he scandalized some when he divorced Mildred and married Mercedes Davidson
who was eighteen years younger than he -- 1953
she had left her husband for the justice
it was the first divorce in the Supreme Court's history
(Douglas then proceeded to acquire the Court's second and third divorces as well
he left Mercedes and married 23-year-old Joan Martin five days later
he married Cathy Heffernan, a 22-year-old college student and waitress in Portland
three weeks after Douglas's divorce from Joan was final
they remained married until his death)

HENRY J. KAISER EXPANDS HIS FINANCIAL EMPIRE

(Kaiser Permanente Federal Credit Union had been founded [1952]
to serve employees of Kaiser Foundation Hospitals, the Permanente Medical Group, Inc.
and Kaiser Foundation Health Plan, Inc.)
Kaiser Federal Bank was originally founded as a credit union
to serve the employees of the Kaiser Foundation Hospitals in Los Angeles, California -- 1953
Henry J. Kaiser launched an automobile company, Kaiser Motors -- 1953
he saw a future in aluminum car parts
he manufactured the Kaiser *Henry J* to compete with standard-priced automobiles
and he developed the *Kaiser-Frazer* which sold as a luxury car
Kaiser purchased Willys-Overland which manufactured the Jeep line of utility vehicles
he changed the company name to Willys Motors and built Jeeps for both work and recreation

SOME LABOR UNIONS ARE CHARGED WITH CORRUPTION

Charges of corruption and ties with the Mafia had surfaced during the long-term presidency
of International Brotherhood of Teamster Dan Tobin (1907-1952)

these charges had not disappeared when Dave Beck became president of the union
Teamsters were not the only union in the American Federation of Labor (AFL)
and Congress of International Organizations (CIO) charged with corruption by any means
International Longshoremen's Association (ILA) which represented East Coast stevedores
was also under suspicion as were others
Teamsters had long desired to bring all shipping and transportation workers into their union
so that no product could be moved anywhere in the U.S. without it being touched by Teamsters
As the ILA came under increasing attack for permitting corruption in its locals,
union president Dave Beck sought to bring the ILA into the Teamsters Union
American Federation of Labor (AFL) ousted the ILA -- September 1953
then formed the International Brotherhood of Longshoremen-AFL (IBL-AFL)
to represent longshoremen on the East Coast and Great Lakes

LOCAL BASEBALL HERO FRED HUTCHINSON BECOMES A MAJOR LEAGUE MANAGER

When Fred Hutchinson joined the Detroit Tigers baseball team as a pitcher (1946-1953)
his team's fortune dropped from perpetual contender to last place in the American League
Tigers owners fired their manager and hired Hutch who at age thirty-two was still an active player
Hutchinson was selected based on his leadership skills -- 1953
Hutch served for the next 2½ years as a playing manager
however, a change in the front office forced Hutch out as manager
his sixteen-year association with the Detroit Tigers came to an end (1954)

EDWARD R. MURROW OFFERS A NEW KIND OF TELEVISION REPORT

After the success of Murrow's television show, *See It Now*,
he and Fred Friendly developed a second television program, *Person to Person* 1953-(1961)
Person to Person developed out of Murrow's belief that human beings are innately curious
especially regarding the private lives of public people,
or the extraordinary in the most ordinary environment -- a person's home 1954
Murrow, sitting comfortably in the studio, informally greeted two guests a week
and conducted two fifteen minute interviews as they visited with guests from their own homes
they chatted about the everyday activities of their lives
these interviews avoided politics and detailed discussion of current events
Ed Murrow believed the more general the question, and frequent the change of topic,
the more satisfying the process of revealing different facts about the well-known figure
Murrow and the camera did not confront guests with questions constituting an inquiry
guests were permitted to direct the conversations
(almost every year, for nine years, informal chats placed the show in the top ten programs
However, *Person to Person* increasingly became a battleground inside and outside CBS'
over the function of television news, the ethics of peering into private lives for profit,
and Murrow's journalistic integrity and the organizational control of the network's image
Murrow and *Person to Person* received frequent criticism
Fred Friendly, Murrow's producer of *See it Now*, accused Murrow of capitalizing
on work pioneered by Friendly on *See it Now*
respected television critics argued that television demanded more substance and depth

than was provided by petty, aimless chatter -- especially from Edward R. Murrow even Murrow's supporters complained the series diverted his valuable time and energy from other projects, and added an unnecessary burden to his schedule Both Edward R. Murrow (and later host Charles Collingwood) demonstrated respect for the public figure in a private setting and avoided emotional confrontation (*Person to Person* stands as a vital example of television's potential for personal, individualized communication)

EDWARD R. MURROW TAKES ON SENATOR JOSEPH McCARTHY

Milo Radulovich was a lieutenant in the Air Force reserve in Dexter, Michigan a Serbian, he had had been discharged from the Air Force on the grounds that his father and sister were Communist sympathizers he was accused of maintaining a "close and continuing relationship" in violation of Air Force regulations

Murrow made the decision to investigate the case of Milo Radulovich and broadcast the result on his television program *See It Now*

See It Now aired -- October 20, 1953

Murrow's program outlined the elements of the case and cast doubt on the Air Force's decision within a short while, Milo Radulovich was reinstated this one edition of *See It Now* marked a change in the face of American journalism and a new age in American politics

After Murrow had exposed the removal of Lieutenant Milo Radulovich from the Air Force for his "close and continuing relationship" with his Communist father and sister Senator Joseph McCarthy began preparing an attack on Edward R. Murrow

MEMBERSHIP RAIDS BY UNIONS CONTINUES TO CAUSE LABOR STRIFE

Teamster President and American Federation of Labor (AFL) Executive Board member Dave Beck continued to lead raids on the membership of longshore unions raiding by the Teamsters was such a serious issue that it prompted the AFL and Congress of Industrial Organizations (CIO) to sign a no-raid agreement after decades of refusing to do so -- December 1953

Dave Beck initially refused to sign the agreement

he threatened to take the Teamsters out of the AFL if he was forced to adhere (Three months after the pact was signed, Teamsters agreed to submit to the terms of the agreement shortly thereafter, the AFL adopted Article 20 of its constitution, which prevented its member unions from raiding one another)

AMERICA LAUNCHES THE FIRST NUCLEAR SUBMARINE

U.S.S. Nautilus (SSN-571) was launched by the U.S. Navy -- January 21, 1954

it was named after the submarine in Jules Verne's *Twenty Thousand Leagues Under the Sea* it featured a nuclear power plant instead of the usual combination of diesel engines and battery-powered electric motors

Nautilus was capable of remaining underwater without surfacing to recharge the batteries and without refueling

U.S. Navy leaders realized the military importance of the Arctic Ocean in the Cold War
Arctic was covered with ice the year around, but navigation under the ice was a possibility
Nautilus was ordered to transit the North Pole underwater
on a Top Secret mission dubbed, ironically, Operation Sunshine
(*Nautilus* was decommissioned [1980] and designated a National Historic Landmark [1982]
she has been preserved as a museum of submarine history in Groton, Connecticut
where she receives some 250,000 visitors a year)

U.S. SENATOR JOSEPH McCARTHY RECEIVES POPULAR SUPPORT

Many ordinary Americans became convinced that there must be “no smoke without fire”
they lent their support to McCarthyism
one Gallup poll found that 50% of the American public supported McCarthy
while 29% had an unfavorable opinion of the senator -- January 1954
McCarthyism was supported by a variety of groups, including the American Legion
and various anti-Communist organizations including militantly anti-Communist women’s groups
such as the American Public Relations Forum and the Minute Women of the U.S.A.
they organized tens of thousands of housewives into study groups, letter-writing networks,
and patriotic clubs that coordinated efforts to identify and eradicate subversion
Although far-right radicals were the bedrock of support for McCarthyism, they were not alone
there was a broad “coalition of the aggrieved” that found McCarthyism attractive
or at least politically useful
Common themes united these coalitions in their resistance of “internationalism:”
•opposition to social welfare provisions, particularly programs established by the New Deal;
•opposition to efforts to reduce inequalities in the social structure of the United States;
•elimination of the United Nations was high on their agenda
Another focus of McCarthyism concerned the expansion of public health services
particularly vaccination, mental health care services and fluoridation
all of these were deemed by some to be Communist plots to poison or brainwash Americans

FEAR OF COMMUNISTS GRIPPED MANY AMERICANS

Those who sought to justify McCarthyism did so by imposing their characterization of Communism,
and American Communists in particular, on the minds of the public
Proponents of McCarthyism said the American Communist Party
was so completely under the control of Moscow, Union of Soviet Socialist Republics
that any American Communist was inevitably a puppet of the Soviet Union
as FBI Director J. Edgar Hoover put it in a speech:
“Communist members, body and soul, are the property of the Party.” (1950)
Not just arch-conservatives were swayed by such characterizations
leaders of the American Civil Liberties Union ejected founding member Elizabeth Gurley Flynn
her membership in the Communist Party disqualified her as a civil libertarian (1940)

DARING ROBBERY TAKES PLACE IN SEATTLE

Safe Deposit boxes were located in a bank vault just two blocks from Seattle police headquarters
at the time of the robbery most of the officers were attending the annual Policeman’s Ball

Robbers used acetylene torches to cut through the thin steel door of the vault office
then attacked the eight inch thick brick wall using picks, sledgehammers and air guns
torches were next used to cut through two inch steel walls
When they broke through, 1,640 safe deposit boxes were ready for the picking -- February 23, 1954
thieves chiseled the boxes open one at a time where they discovered
jewels, raw gold, negotiable bonds and cash dating back to the days of the pioneers
estimates of loss ranged from \$200,000 to \$500,000
but, for tax reasons, many victims not willing to admit what they had lost

McCARTHYISM RACES ACROSS THE NATION

Senator Joseph McCarthy was fanning the flames generated by the Red Scare
he accused General George Marshall and lesser figures of "coddling communists"
he even implied treasonous intent
McCarthy threatened his critics with Communist accusations
only President Eisenhower could silence McCarthy -- an action he refused to take

SHOW-DOWN OCCURS BETWEEN SENATOR McCARTHY AND EDWARD R. MURROW

Edward R. Murrow for several years had been collecting material
about U.S. Senator Joseph McCarthy and his Senate Investigating Committee
Murrow began assembling a television program to expose the senator
Murrow showed his scathing attack aimed at anti-Communist fire brand Sen. Joseph McCarthy
on *See It Now* -- March 9, 1954
for one half hour McCarthy's own words and pictures painted a damning portrait of a fanatic
using film of bullying witch hunts against those he accused of being Communist
Senator McCarthy demanded a chance to respond, but his rebuttal only sealed his fate
See It Now's timing and its persuasive power broke the Senator's hold over the nation
however, the program caused a rift with CBS -- *See It Now* was discontinued
When he was presented the Freedom Award for the broadcast
Murrow said: **"There is a false formula for personal security being peddled in our marketplace. It is this, although no so labeled: 'Don't join anything. Don't associate. Don't write. Don't take a chance on being wrong. Don't espouse unpopular causes. Button your lip and drift with the tide. Seek the ease and luxury of complete equanimity, by refusing to make up your minds about issues that wiser heads will one day decide.' This product, if it be bought by enough people, leads to paralysis."**

Ed Murrow went on to write several books about his war experiences

U.S. SENATOR JOSEPH McCARTHY INVESTIGATES THE UNITED STATES ARMY

Senator McCarthy's Senate Permanent Subcommittee on Investigations (PSI) began an investigation
into the United States Army -- April 1953 to (June 1954)
First to be investigated was the Army Signal Corps laboratory at Fort Monmouth, New Jersey
McCarthy gathered some headlines with stories of a dangerous spy ring among Army researchers
but ultimately nothing came of this investigation
McCarthy next turned his attention to the case of a U.S. Army dentist
who had been promoted to the rank of major despite having refused to answer questions

on an Army loyalty review form
McCarthy's handling of this investigation, including insults directed at a brigadier general,
eventually led to the Army-McCarthy Hearings

ARMY-McCARTHY HEARINGS ARE CONDUCTED ON TELEVISION

Army- McCarthy Hearings were held for the purpose of investigating conflicting accusations
between the United States Army and U.S. Senator Joseph McCarthy (D-Wisconsin)

Army accused chief committee counsel Roy Cohn of pressuring the Army
to give preferential treatment to a former McCarthy aide and a friend of Cohn's
McCarthy counter-charged that this accusation was made in bad faith
in retaliation for the senator's recent aggressive investigations
of suspected Communists and security risks in the Army
charges and counter-charges were traded back and forth for thirty-six days
all carried out in front of a nationwide television audience

Official outcome of the hearings was inconclusive,

but television exposure of the Wisconsin senator's antics proved fatal to the Red Baiter
because millions of Americans watched the senator attack career military men and women

(In less than a year, U.S. Senator Joseph McCarthy was censured by the Senate for his conduct
and his position as a prominent figure in the anti-Communism quest was essentially over)

public sentiments favoring McCarthyism weakened
court decisions challenging the tactics of McCarthyism also speeded the decline
Senator Joseph McCarthy did not recover from the humiliation -- died three years later [1956])

U.S. HOUSE UN-AMERICAN ACTIVITIES COMMITTEE MEETS IN WASHINGTON STATE

Congressional House Un-American Activities Committee held hearing in Seattle

Barbara Hartle, a former Northwest Communist, cited the names of scores of people
for having been Communists or having Communist affiliations

However, the House hearing were overshadowed by the Army-McCarthy Hearings

being conducted by Senator McCarthy's Senate Permanent Subcommittee on Investigations (PSI)
playing on televisions across the nation at the same time

FALL OF THE FRENCH EMPIRE IN INDOCHINA

After the defeat of the French army at the fifty-five-day Battle of Dien Bien Phu -- May 7, 1954

France's resolve to carry on the war shattered

3,000 French soldiers had been killed and 8,000 wounded

Vietnamese losses were even higher: 8,000 dead and 12,000 wounded

French leaders negotiated a ceasefire agreement with the leaders of Viet Minh (Vietnam)

under the terms of the 1954 Geneva Accord which ended the Indochina War

independence was granted to Viet Minh, Cambodia and Laos

COUNTRY OF VIET MIHN IS SPLIT ALONG THE 17th PARALLEL

Viet Minh was temporally split into two provisional states: North and South

Vietminh became the government of North Vietnam and Communist forces organized there
non-Communist forces regrouped in South Vietnam which became a separate state

Vietnamese nationalists were angered by the division
some Communists moved into South Vietnam to fight to re-unify the nation
they became known as the National Liberation Front for South Vietnam (NFL) or Vietcong
(NLF was officially abolished [1977])

Free elections were promised by a (July 1954) Geneva Conference to establish a unified nation
(these elections did not take place)

BOEING ROLLS OUT A SUCCESSFUL NEW COMMERCIAL JET AIRCRAFT

Boeing's first successful commercial aircraft in the post-war era was the 367-80, called the Dash 80
this airplane combined the features of the military B-47 and B-52 with a large cabin size

Boeing began testing on its revolutionary new airplane -- May 15, 1954

Boeing's mis-designated 367-80 undertook a series of taxi trials
(in one incident, the port landing gear collapsed [May 22] causing damage to the airframe
this was quickly repaired)

additional problems were found with the engines and brakes which, on one occasion,
failed completely during landing causing the aircraft to overshoot the runway
this damage also was quickly repaired

BACKGROUND TO THE CIVIL RIGHTS MOVEMENT

After the close of the Civil War (1865) the question of how to bring the former Confederate States
back into the Union remained unresolved

battles between Democratic President Andrew Johnson and a Radical Republican Congress
invariably ended in victory for the president

Radical Republicans won sweeping congressional victories (1866)

many Republicans were elected to congress that they could override presidential vetoes

"Radical Reconstruction" began (1867) when the Republican members of Congress
removed the civilian governments in the South

and put the former Confederate States under the rule of the U.S. Army
new elections were held in which the freed slaves could vote

but former Confederate leaders were denied the vote and could not run for office

Radical Reconstruction remained in place until (May 1, 1877) when federal troops were removed
marking the end of the Reconstruction period for the South

"Post-Reconstruction" returned control of state governments in the South to the white southerners
during this period the white-dominated Democratic Party regained political control over the South
Lincoln's Republican Party, the party most blacks belonged to, shrank to insignificance
as black voter registration was suppressed

Jim Crow laws went into effect in the South ensuring public facilities were racially segregated

(Jim Crow was a fictional theatrical black-faced character demeaning to Negroes)

black Americans were limited to "separate but equal" facilities and services

violence against blacks increased

this racial discrimination remained virtually intact into the (1950s)

As they sought better opportunities, blacks resisted the Jim Crow laws

through lawsuits, new activist organizations, political redress and labor organizing

National Association for the Advancement of Colored People (NAACP) (1909)

fought to end race discrimination through litigation, education and lobbying
Southern Democrats worked to disenfranchise African Americans
passing laws to make voter registration and election rules more restrictive
political participation by most blacks and many poor whites began to decrease
Ten of the eleven former Confederate States
adopted new state constitutions or amendments (1890-1910)
that effectively disfranchised most blacks and tens of thousands of poor whites
through a combination of poll taxes, literacy and comprehension tests
residency and record-keeping requirements
situation for blacks outside the South was only somewhat better
although discrimination in housing and jobs was well documented

U.S. SUPREME COURT RULES ON SCHOOL SEGREGATION

Virginia's educational system was segregated (spring 1951)
black students at Moton High School decided to take a stand against two things:
•the overcrowded conditions at the school,
•the unsuitable physical conditions of their school
National Association for the Advancement of Colored People (NAACP)
joined the students in their battle against school segregation
this became one of the five cases that made up the *Brown v. Board of Education* case
in which the plaintiffs charged separate public schools for black children and white children
was unconstitutional

U.S. Supreme Court handed down its decision -- May 17, 1954
regarding *Brown v. Board of Education of Topeka, Kansas* striking down school segregation
it stated in part: **"...the policy of separating the races is usually interpreted as denoting the inferiority of the Negro group."**

MAJOR LUMBER STRIKE PARALYZES WASHINGTON'S LUMBER INDUSTRY

Sawmills of the Northwest were silenced -- June 21, 1954
by a strike which affected most plywood plants and virtually all lumber mills
over one hundred thousand American Federation of Labor (AFL) over their wages
and Congress of Industrial Organizations workers walked off the job
state-wide production was cut almost in half
(An agreement would eventually be reached after a report was submitted by a fact-finding committee
appointed by the governors of Oregon and Washington -[September 9, Labor Day, 1954]
full production was not reached until late in [September])

TACOMA SCHOOL SOCIAL WORKER MARGARET JEAN SCHUDDAKOPF IS QUESTIONED

Margaret Schuddakopf was the sister of Donald N. Wheeler who was a proud lifelong Communist³⁶⁵
Jean Schuddakopf was subpoenaed to appear at the televised hearings in Seattle
of the Committee on Un-American Activities of the U.S. House of Representatives
she refused to answer questions regarding her membership in the Communist Party

³⁶⁵ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

she invoked her fifth amendment rights as had all of the other local witnesses -- June 1954

PRESIDENT EISENHOWER ADDRESSES THE NEED FOR AN INTERSTATE HIGHWAY

Public roads and highways had been long considered (and disregarded) by members of Congress

President Franklin D. Roosevelt repeatedly expressed interest

in the construction of a network of toll superhighways

as a way of providing more jobs for people out of work

he thought three east-west and three north south routes would be sufficient

President Eisenhower had long held in an interest in an interstate highway system

he had seen the need for this vital transportation link in time of war

and could only guess at the economic value in trade during peacetime

Vice President Richard M. Nixon attended the Governors Conference at Lake George, New York,

he spoke of President Eisenhower's Grand Plan (a \$101 billion program)

to create a highway system in which the Federal, State and local governments

each assumed its appropriate role in financing and developing highways -- July 12, 1954

Nixon indicated that the President wanted the Governors' ideas on the subject

Some states tried to bridge the funding gap by building toll roads,

but as the trucking industry battled the railroads for nationwide shipping dominance,

truckers rebelled at increasing toll fees

It was proposed the President's Advisory Committee on a National Highway Program

was to work with the Governors and the Interagency Committee

to develop a plan for submission to Congress

General Lucius Clay, Chairman of the Board of the Continental Can Company,

was proposed as the chairman for the "Clay Committee"

President Eisenhower appointed Seattle's Dave Beck headed the Teamsters Union

to serve on a federal committee

Clay Committee was directed to undertake a detailed study of specific nationwide highway needs

BOEING'S 367-80 (OR DASH 80) TAKES FLIGHT

Boeing's 367-80 (actually the 707) took its maiden flight -- July 15, 1954

Dash 80 was a gamble as Boeing sank \$16 million of the company's profits into its development

just two years after the company board of directors had approved the project

and eighteen months after the start of construction

Dash 80 became the model for both the KC-135 Stratotanker

and Boeing's first commercial jet airliner -- the Model 707-120

but the success of the venture contributed to the commercial development of the Boeing Company

TACOMA DISTRICT CONFRONTS SOCIAL WORKER MARGARET JEAN SCHUDDAKOPF

School Social Worker Jean Schuddakopf met with the Tacoma School District³⁶⁶

to discuss her testimony before the Congressional Committee on Un-American Activities

In that conference the Tacoma School Board ruled that Schuddakopf

had satisfied legal employment requirements by signing the required loyalty oath

³⁶⁶ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

they announced no action would be taken against her -- July 21, 1954
she remained under contract with the school district

TACOMA SCHOOL SOCIAL WORKER MARGARET JEAN SCHUDDAKOPF IS SUSPENDED³⁶⁷

Pierce county superintendent of public schools bowed to intense pressure
brought by the American Legion and others at raucous public meetings
two members of the Tacoma School Board stated
that by refusing to answer questions before a Congressional committee
Schuddakopf had brought public criticism and disrepute on herself and her employers
She was suspended from working in the public schools of Pierce County -- August 21, 1954

McNARY DAM AND LOCK IS CONSTRUCTED

(Bills for the construction of a dam on the Columbia were introduced into Congress
as early as [1931]
construction began [1947])
originally, the dam was to be named Umatilla Dam, but the Flood Control Act [1945]
but the dam was renamed in honor of Senator Charles L. McNary of Oregon
who had died the previous year)

McNary Lock and Dam project was substantially completed -- 1954

it was operated by the U.S. Army Corps of Engineers,
to provide for slackwater navigation, hydroelectric power generation, recreation,
wildlife habitat and incidental irrigation

McNary Dam is 1.4-miles long and rises to a height of approximately 183 feet above bedrock
its 1,310-foot-long spillway contains twenty-two gates

McNary Lock is located on the Washington side of the Columbia River,
this single lift lock is eighty-six feet wide and 683 feet long

the lock lifts vessels ninety-two feet high -- one of the highest lock lift on earth
there are two fish ladders, one on each shore of the dam, for salmon and steelhead passage

McNary Dam flooded the Umatilla Rapids forming a reservoir called Lake Wallula
that extends sixty-four mile up the Columbia River to the Hanford Site
Lake Wallula also extended up the Snake River (to Ice Harbor Dam)
and covered the original Fort Walla Walla

McNary Dam is unique in that it has two additional turbines whose purpose is to power the dam itself
these two "station service" turbines are capable of providing only about three Megawatts
compared to the seventy Megawatts for the other fourteen turbines
these two turbines alternate service duty to provide the dam with energy
to improve navigation

McNary Dam is entirely self-sustaining
if some large event caused the entire grid to go down,
McNary would be key in getting it back up

President Dwight D. Eisenhower dedicated the Columbia River's McNary Dam
located near Umatilla, Oregon and Plymouth, Washington -- September 23, 1954

³⁶⁷ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

(Full power production was reached [February 1957]) when McNary powerhouse's fourteen units of 70,000 kilowatts each began to turn out a total capacity of 980,000 kilowatt

ARTISTS OF THE NORTHWEST ARE DISCOVERED

Life Magazine did an article on "The Mystic Painters of the Northwest" -- September 28, 1954 which featured Morris Graves, and included Guy Anderson, Kenneth Callahan and Mark Tobey this article cast them into the national limelight as members of the Northwest School of Art Morris Graves born (August 28, 1910) was raised and came to maturity in the Pacific Northwest he was a self-taught artist with a natural understanding of color and line his early work was in oils and focused on birds touched with strangeness they appeared either blind, or wounded, or immobilized in webs of light Graves was greatly influenced by a short visit to Japan (1930) where he studied Zen Buddhism this mystic understanding radically altered his artistic style he adopted elements of Chinese and Japanese art including the use of thin paper and ink in his drawing of birds, pine trees and waves Graves moved to Edmonds (1936) before he found the shell of a burned-out house near La Conner in the Skagit River delta (1937) he invited his friend Guy Anderson to share it Graves' insights as a "**citizen of the world**" contrast starkly with his pastoral beginnings Guy Anderson was born in a rural house near Edmonds, Washington (November 20, 1906) he was introduced to Asian art at age six when he saw Japanese prints in a collection owned by his first grade teacher, Mabel Thorpe Jones Anderson was intrigued with other cultures he was particularly struck by Northwest Coast Native American carvings with their soft-cornered squares and egg-shaped eyes, flashes of color were set against woody earth browns these juxtapositions of shape and color sank deep into his consciousness Anderson's local themes were offset by a concern with man's place in the wider universe nude human figures were very often central to his artistic renditions Anderson's painting technique was largely self-taught when he exhibited his work in a group show at the Fifth Avenue Gallery (1929) nineteen-year-old Morris Graves, who lived nearby, sought him out at his studio both of them immediately hit it off as they shared common ground in their interests in painting and philosophy Anderson introduced Graves to the use of oil paints abstract Expressionist painter Guy Anderson spent the better part of his life in La Conner where he found inspiration from the vast skies and natural settings of beaches there he gathered rocks and driftwood that he displayed around his rustic home natural beauty of the Pacific Northwest was always a powerful inspiration for this painter Kenneth Callahan was born (October 30, 1905) in Spokane Callahan traveled extensively through Europe, Latin America, and the U.S. as a longshoreman in his studies (in the 1920s) he was especially influenced by the social realism of famous Mexican mural painters and by abstract art Callahan in the (1920s) was doing mainly realistic paintings of working people

his use of color was muted to depict the Northwest mist in the air,
these muted tones were contrasted with splashes and shapes of pure color or calligraphs
he was deemed one of the leading artists of the Pacific Northwest school
he painted and sold paintings from his studio on the south fork of the Stillaguamish River
near Granite Falls in Snohomish County
Callagan spent twenty years working as a curator at the Seattle Art Museum (SAM)
William Cumming (born March 24, 1917) was the youngest artist of the Northwest School
when Bill was seven, the family moved to Tukwila, Washington
where he graduated from Foster High School (1934)
with no chance of going to college and outraged by what he viewed
as the blatant injustices of capitalism, Cumming became a Communist Party member
Cumming began painting with the Works Progress Administration (WPA) in Seattle
he used light and shadow to create form in broad strokes of contrasting vibrant colors
body language is a key element in his work
he noted he could recognize a friend down the road just by the gait and posture
without ever seeing the face -- later in his career faces were obscured by shadows
his career was interrupted several times by his political beliefs and bouts with tuberculosis
Mark Tobey, born (December 11, 1890) was a renowned artist and founder of the Northwest School
he had begun his professional career as a commercial artist in Chicago
before he struck out for New York to paint to please himself
Tobey arrived in Seattle (1922) and attended the University of Washington
where he met Chinese painter Teng Kuei who introduced Tobey to Eastern penmanship
this began Tobey's exploration of Chinese calligraphy
Tobey studied art briefly but like others of the Northwest School he was primarily self-taught
in the (1920s and 1930s) Mark Tobey traveled the world visiting Europe, Asia, and the Near East
before he returned to Seattle (1938)
he drew inspiration from many cultures of East and West, from cities, nature and science
Tobey relished painting a favorite subject: the Pike Place Market
Mark Tobey created art that broke new ground
senior in age and experience, he had a strong influence on many other artists
as he became the most noted among the "mystic painters of the Northwest"

PUYALLUP INDIANS ARE ARRESTED FOR ILLEGAL FISHING ON THE PUYALLUP RIVER

General policy of the federal government regarding the Indian population gradually became
an effort to end tribal identity and organization and assimilate Indians into the general population
Washington State officials followed the changes in federal policy and began to enforce
all state laws, including fishing regulations, on Native Americans and non-Indians alike
Some individual Native Americans did fish illegally -- most simply for economic reasons
however, to challenge a (1934) state law that outlawed the use of fixed nets in rivers
some, like Robert Satiacum of the Puyallup Tribe, fished illegally
in an effort to generate a legal case against the State of Washington
Satiacum graduated from Lincoln High School in Tacoma (1947) where he was a star athlete
Robert Satiacum and James Young of the Puyallup tribe put a net in the Puyallup River
in full view of Tacoma's rush hour traffic -- November 11, 1954

Satiacum and Young were arrested for using nets to catch salmon and steelhead

DAVE BECK'S TEAMSTERS CONTINUE TO RAID OTHER UNIONS FOR MEMBERS

(After American Federation of Labor (AFL) expelled

International Longshoremen's Association [ILA] from their organization,

Beck's Teamsters planned to raid the expelled ILA union

Beck undertook a campaign to form the International Brotherhood of Longshoremen [IBL] on the East coast and the Great Lakes [1953])

Dave Beck planned to bring the IBL into the American Federation of Labor (AFL) -- early 1955 and may even have hoped to seize control of the IBL as the IBL-AFL

but the election of Mafia (mob) associate Anthony "Tough Tony" Anastasio

as an International Longshoremen's Association (ILA) vice president

forced Dave Beck to end the effort

Even as Beck backed away from any ILA takeover, Mafia follower Jimmy Hoffa secretly negotiated a major package of financial and staff aid to the International Longshoremen's Association (ILA) he then went public with the deal

American Federation of Labor (AFL) threatened to expel the Dave Beck's Teamsters if he aided the expelled International Longshoremen's Association (ILA)

Dave Beck fought Hoffa over the International Longshoremen's Association (ILA) aid package (Beck won, but was forced stop Teamster efforts to take over the ILA or the IBL-AFL [1956])

Longshoremen were not the only union members the Teamsters sought to take over

Teamsters also attempted to merge with the Mine, Mill & Smelter Workers -- 1955

this effort also failed

Teamsters next raided the Congress of Industrial Organizations (CIO)

Brewery Workers Union -- 1955

this resulted in fierce protests by the CIO

U.S. SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS GET A NEW CHAIRMAN

U.S. Senator John L. McClellan (D-Arkansas) became the chairman

of the U.S. Senate Permanent Subcommittee on Investigations

McClellan continued extensive hearings of the Army Signal Corps at Fort Monmouth, New Jersey

he also added new inquiries relating to Communist activities in the United States

he investigated business activities and alleged improper activities

by Eisenhower Administration appointees and political associates

McClellan's subcommittee even investigated members of congress: U.S. Senator Joseph McCarthy

Senate leader Lyndon Johnson (D-Texas) knew he had a loose cannon in the U.S. Senate

Johnson met with his long time friend U.S. Senator Warren G. Magnuson, "**Lyndon came to me and said 'don't you think we should do something about that fellow?' I said, 'sooner or later we've got to.' I had little hope that he'd get better and sort of repent. He didn't. He got worse. Johnson decided to go ahead. We had a [Democratic] Policy Committee meeting and decided to turn it [McCarthy's conduct] over to Senator John McClellan's investigations sub-committee.**"³⁶⁸

³⁶⁸ Shelby Scates, *Warren G. Magnuson*. P. 166.

STATE LEGISLATURE VOTES TO RELINQUISH THE CANWELL COMMITTEE FILES

(State legislature's Joint Legislative Fact-Finding Committee on Un-American Activities chaired by State Representative Albert Canwell had completed its investigations when the chairman did not win reelection [1948])

Federal Bureau of Investigation (FBI) demanded all information be turned over to them -- February 1955

as required, the storage room containing the investigation results was unlocked in the presence of the speaker of the house, president of the state senate, lieutenant governor and two representatives of the FBI since the combination for only one of the three locked safes was known the state called in a safe expert to open the two additional safes it was discovered that two of the safes yielded only a few dusty papers and books and the remaining safe was completely empty

STATE HOUSE OF REPRESENTATIVES INVESTIGATES THE MISSING RECORDS

State House of Representatives voted unanimously to conduct an investigation of the missing records

Albert Canwell was subpoenaed to appear before a special State House Hearing held in the House of Representatives legislative chamber -- February 21, 1955

Former State Representative Albert Canwell admitted he had destroyed a large portion of the records to protect his sources of information

and to prevent the evidence from falling into the wrong hands

CLAY COMMITTEE REPORTS AN INTERSTATE HIGHWAY PLAN TO CONGRESS

General Lucius Clay's Advisory Committee on a National Highway Program (Clay Committee) endorsed heavy reliance on federal funds to finance interstate freeway construction

this became crucial to Congressional approval of Eisenhower's highway construction bill

President Eisenhower forwarded the Clay Committee report to Congress -- February 22, 1955

in his transmittal letter, he acknowledged

the **“varieties of proposals which must be resolved into a national highway pattern”**

he wrote that the Clay Committee' proposal would

“provide a solid foundation for a sound program”

he also said: **“Our unity as a nation is sustained by free communication of thought and by easy transportation of people and goods. The ceaseless flow of information throughout the republic is matched by individual and commercial movement over a vast system of interconnected highways crisscrossing the country and joining at our national borders with friendly neighbors to the north and south.”**³⁶⁹

BOEING LEADS THE ARMS RACE WITH THE SOVIET UNION WITH A NEW ROCKET

Boeing launched its first rocket: the Bomarc long-range anti-aircraft missile³⁷⁰ -- February 24, 1955 this weapon had been under development in secret since (1949)

³⁶⁹ U.S. Department of Transportation Federal Highway Administration, Highway History, *Original Intent: Purpose of the Interstate System 1954-1956*, <https://www.fhwa.dot.gov/infrastructure/originalintent.cfm>

³⁷⁰ Walt Crowley, HistoryLink.org, Essay 3566, September 14, 2001.

Supersonic Bomarc missile was Boeing's rocket-powered weapon
designed and produced by the company -- it was aimed by a computer guidance system
(This vehicle was the forerunner of other rocket projects
such as the Minuteman InterContinental Ballistic Missile [ICBM]
and the Saturn V booster that delivered the first humans to the moon)

USS *MISSOURI* (BB-63) IS RETIRED INTO THE "MOTHBALL FLEET" IN BERMERTON
Battleship *Missouri* (known as the *Mighty Mo*) was the last battleship built by the United States
she was the site of the surrender of the Empire of Japan which ended World War II

BB-63 was launched from New York Naval Shipyard (January 29, 1944)
sponsored by Miss Margaret Truman (daughter of Senator Harry Truman)
she was commissioned (June 11, 1944)

Last of the Iowa-class battleships *Missouri* was 888 feet in overall length with a 108-foot beam
in the water she displaced 45,000 tons

she was powered by four 53,000-horsepower main engines
and she carried eight 1,250-Kilowatt turbo electric generators

Missouri carried most of the facilities that would be found in a small city
300 miles of electric cable and ninety miles of piping were installed
418,000 square feet of deck space served a war compliment of 2,700 personnel

Battleship *Missouri* was heavily armed

nine 16" (50 caliber) machine guns in three triple gun turrets
twenty 5" (38 caliber) machine guns mounted in ten twin mounts
forty-nine 40 MM (70 caliber) anti-aircraft cannons
eighty 40 MM anti-aircraft guns in twenty quadruple mounts

which fired a 16" projectile using a propelling charge weighing approximately 1-½ tons

After the Korean Conflict where she provided seaborne artillery support

BB-63 was decommissioned and placed in the United States Navy reserve fleet
in the Naval Inactive Ship Maintenance Facility on Sinclair Inlet -- February 26, 1955
to await further service

When she arrived at Bremerton, *Missouri* was moored at the last pier of the reserve fleet berthing
she was very close to the mainland

USS *Missouri* served as a popular tourist attraction logging about 180,000 visitors per year
who came to view the "surrender deck" where a bronze plaque memorialized the spot
where Japan surrendered to the Allies
there was an accompanying historical display
that included copies of the surrender documents and photos
just outside the gates civilians sold souvenirs and other memorabilia

(Nearly thirty years passed before *Missouri* returned to active duty -- she was reactivated [1984])

high cost of operating the Iowa-class battleships

and the labor-intensive maintenance requirements led to the retirements of the fleet

Iowa (BB-61), *New Jersey* (BB-62), *Missouri* (BB-63), *Wisconsin* (BB-64)

Illinois (BB-65) whose construction was cancelled with the end of World War II

she was scrapped on the shipway [1958],

Kentucky (BB-66) was never completed

more modern and more powerful cruisers and destroyers of today's Navy
also led to their final decommissioning as well

WASHINGTON AMENDS ITS LOYALTY OATH REQUIREMENTS

Loyalty oaths were common throughout the nation during the Cold War era
between (1947) and (1956), forty-two states and more than 2,000 local jurisdictions adopted laws
requiring such oaths from public employees
in (1951) the Washington Legislature imposed a loyalty oath requirement for all state employees
this statute was amended to require employees to swear
that **"I am not a subversive person."** --1955

according to the law, a **"subversive person"** was: **"any person who commits, attempts
to commit, or aids in the commission, or advocates, abets, advises or teaches by any means any
person to commit, attempt to commit, or aid in the commission of any act intended to overthrow,
destroy or alter, or to assist in the overthrow, destruction or alteration of, the constitutional form of
the government of the United States, or of the state of Washington, or any political subdivision of
either of them by revolution, force, or violence; or who with knowledge ... becomes or remains a
member of a subversive organization."**³⁷¹

Civil libertarians were opposed to the loyalty oath requirement, particularly on university campuses
where they believed that having to swear such an oath suppressed academic freedom
and led to conformity of thought

Soon after the 1955 "I am not a subversive person" amendment to the loyalty oath was enacted
Washington American Civil Liberties Union (ACLU) brought its first challenge
to the loyalty oath statute on behalf of two University of Washington professors,
Howard Nostrand (Romance Languages) and Max Savelle (American History)
ACLU obtained an injunction prohibiting enforcement of the loyalty oath
while the case was pending

(however, after seven years of complicated legal maneuvering in state and federal courts,
United States Supreme Court dismissed that case and dissolved the injunction [1962])

SAUL HAAS ACHIEVES SUCCESS WITH HIS RADIO STATION

KIRO's radio license in Seattle required the station to make public-service announcements
Saul Haas took that requirement seriously

KIRO developed a community series titled *Democracy is You* as a local public service
KIRO won the National Association of Broadcasters prestigious Peabody Award -- May 1955
which rewarded excellence in radio broadcasting
by recognizing quality and outstanding achievement
Peabody is the electronic media industry's most competitive honor

FRED HUTCHINSON RETURNS TO SEATTLE

After serving 2½ years as player-manager for the Detroit Tigers baseball team Hutch returned home
he joined with high school pal Dewey Soriano who was now the Rainiers' general manager

³⁷¹ Kit Oldham, HistoryLink.org, Essay 5200, February 14, 2003.

together the two Franklin High grads rebuilt the team
they led Seattle to a 95-77 record and yet another Pacific Coast League pennant -- 1955

BOEING DELIVERS ITS B-52 TO THE U.S. AIR FORCE

Boeing's B-52 Stratofortress was America's first long-range, swept-wing heavy bomber
it was built to replace the World War II era Boeing B-29
Boeing's B-52s long-range, subsonic (below the speed of sound), jet-powered strategic bomber
began its service to the U.S. Air Force with the Strategic Air Command [1955]
Stratofortress was a large aircraft: 159 feet long with a 185-foot wingspan
it was powered by eight Pratt & Whitney turbofan jet engines
that generated a cruising speed of 650 miles per hour
and attain an altitude of more than 50,000 feet
B-52s could carry thirty-five tons of bombs approximately 9,000 miles without refueling
they were primarily designed to carry nuclear weapons
before intercontinental ballistic missiles, B-52s flown by the U.S. Strategic Air Command
were the country's first line of defense against surprise attacks during the Cold War
When refueling in mid-air, the B-52 bomber was forced to lower its flaps and rear landing gear
to slow the aircraft enough to be able to receive fuel
Superior performance of the B-52 at high subsonic speeds and relatively low operating costs
kept the Stratofortress in service despite the development of later aircraft
(the B-52 marked its 50th anniversary of continuous service [2005])

CONSTRUCTION BEGINS ON THE FIRST LOWER SNAKE RIVER PROJECT

Ice Harbor Dam Project, part of the Columbia River Basin system of dams,
is located in Walla Walla and Franklin counties
eight miles northeast of the town of Burbank, Washington and twelve miles east of Pasco
its name comes from a tiny bay where boats once tied up to wait
for upstream ice-jams to break up
Construction began -- June 1955
main structure and three generators were completed (1961)
(with an additional three generators finished [1976])
Lake Sacajawea, named for the young woman who guided the Lewis and Clark Expedition West
formed behind the dam and stretches thirty-two miles upstream
to the base of the Lower Monumental Dam
Single-lift navigation lock is eighty-six feet wide and 675 feet long

HENRY J. KAISER DEVELOPS THE U.S. TERRITORY OF HAWAII

Kaiser sold his automobile industry and expanded into real estate in Hawaii --1955
he constructed one of the first luxury hotels in the islands: Kaiser Hawaiian Village Hotel
(now known as the Hilton Hawaiian Village)
he used advertising to attract thousands of tourists
(Henry Kaiser spent much of his later years in Honolulu
he developed an obsession with perfecting its urban landscape
Henry J. Kaiser died at the age of eighty-five in Honolulu, Hawaii [August 27, 1967])

CAMPAIGN OF CIVIL RESISTANCE TO SOUTHERN JIM CROW LAWS BEGINS

Invigorated by the victory of *Brown v. Board of Education* (Decided May 17, 1954)
but frustrated by the lack of any change
and faced with organized resistance in the South by proponents of racial segregation
private citizens increasingly rejected gradualist, legalistic approaches to desegregation
African Americans adopted a combined strategy of direct action with nonviolent resistance
(known as civil disobedience) which gave rise to the Civil Rights Movement (1955–1968)
acts of nonviolent protest and civil disobedience produced crisis situations
between activists and government authorities

BOEING INTRODUCES A NEW COMMERCIAL JET AIRPLANE

Boeing had been working on a prototype jet known as the Dash-80 which first flew (July 1954)
this would become the Boeing 707 passenger jet³⁷²
Test pilot Alvin M. “Tex” Johnston stunned the crowd at the Seafair Gold Cup hydroplane race
he flew the new airplane over the crowd watching the hydroplane race on Lake Washington
flying at more than 400 miles per hour just 400 feet above the water,
Johnston suddenly started to climb and the Dash-80’s swept-back wings
rotated over and under the plane as the 128-foot-long, 160,000-pound aircraft rolled
even flying upside down for a short time
then Johnson did it again
thus ushering of the Boeing Company into the age of modern commercial jets
Boeing President William Allen was escorting potential customers at the hydroplane race
they were seeing the jet for the first time
after the stunt the shocked Allen asked a guest with a heart problem if he could borrow his pills
but the potential jet buyers were duly impressed with what the airplane could do

STATE LEGISLATURE GRANTS PUDs THE AUTHORITY TO SELL BONDS

(Legislators had enacted a law allowing Public Utility Districts (PUDs)
to form joint operating agencies [1953])
Washington’s legislature now amended the law to allow groups of two or more cities or PUDs
to form joint operating agencies with the authority to sell bonds to finance their projects -- 1955

CONSTRUCTION ON CHIEF JOSEPH DAM IS COMPLETED

U.S. Army Corps of Engineers completed construction on Chief Joseph Dam -- August 28, 1955
the dam spanned the 1.5 mile wide Columbia River at Bridgeport Washington
on the upper Columbia River about eighty miles upstream from Wenatchee, Washington
Chief Joseph Dam was named in honor of the Nez Perce chief
who spent his last years in exile on the Colville Indian Reservation
Because it is upriver from Grand Coulee Dam which has no fish ladder
Chief Joseph Dam also has no fish passage thus blocking access to about 670 miles
of the Columbia River (including the Canadian portion)

³⁷² Patrick McRoberts, HistoryLink.org, Essay 390, November 25, 1998.

and all the associated tributaries where salmon historically spawned
Reservoir behind the dam ran up the Columbia River fifty-one miles
Bridgeport State Park, on the lake, is adjacent to Chief Joseph Dam
At the request of the U.S. Bureau of Reclamation, outlets on either side of the dam
were provided to provide for local irrigation needs
(Installation of the first sixteen generators was not completed until [1958]
eleven additional turbines were installed between [1973] and [1979]
height of the dam and lake were raised ten feet
making Chief Joseph Dam's 2,620,134 kilowatts capacity second only to Grand Coulee Dam
electricity is marketed by the Bonneville Power Administration)

TWO PUYALLUP INDIANS ARE CONVICTED OF ILLEGAL FISHING

Robert Satiacum and James Young of the Puyallup tribe were convicted
in Pierce County Justice Court of violating of state fishing regulations
Bob Satiacum and Jim Young appealed to Pierce County Superior Court -- October 20, 1955
their convictions were thrown out because the state had not presented evidence
that the regulations being enforced were necessary for the conservation of the fish run
this led to years of legal disputes over fishing rights, as well as to "fish-ins" to protest state laws
State of Washington appealed the Superior Court ruling to the Washington State Supreme Court

CHARTER AIRLINER CRASHES IN SEATTLE³⁷³

Seventy-four servicemen who had just arrived in Seattle from Korea -- November 17, 1955
took off from Boeing Field in Seattle aboard a chartered Douglas DC-4
operated by Peninsula Air Transport -- it was bound for Billings, Chicago, and Newark
After leaving Boeing Field -- just after midnight
one of the four engines appeared to falter as the airplane lost altitude
charter plane hit a tree and a power pole before coming to rest in the Riverton neighborhood
south and west of Boeing Field
Twenty-seven people were killed in the crash -- forty-seven passengers survived
two homes were badly damaged but no one on the ground was injured
Peninsula Air Transport had had its license to operate suspended for a time (the previous summer)
at the time of the crash it was the subject of hearings by the Civil Aeronautics Board
for overloading its airplanes and overworking its pilots

ROSA PARKS QUIETLY PROTESTS ALABAMA'S JIM CROW LAWS

Rosa Parks, secretary of the Montgomery NAACP chapter, refused to give up her seat
on a Montgomery, Alabama public bus to make room for a white passenger
she was arrested, tried, and convicted for disorderly conduct and violating a local ordinance
After word of the incident spread in the Montgomery black community,
fifty African American leaders
led by a young Baptist minister named Martin Luther King, Jr.
formed the African American Montgomery Improvement Association

³⁷³ Dave Wilma, HistoryLink.org, Essay 2853, November 21, 2000.

they organized the Montgomery Bus Boycott
and demanded more humane treatment of passengers from the bus system
Lack of success resulted in the African American Montgomery Improvement Association
boycotting the bus system for 381 days -- bus revenues dipped by 80%
until a federal court ordered Montgomery's buses desegregated (November 1956)
This protest made twenty-six-year-old Rev. Dr. Martin Luther King, Jr. a national figure
his eloquent appeals to Christian brotherhood and American idealism
created a positive impression on people both inside and outside the South

AFL AND CIO MERGE INTO A SINGLE LABOR UNION

American Federation of Labor (AFL) and the Congress of Industrial Organizations (CIO)
had represented most of the organized labor members in the United States
both organizations worked to enhance their ties with political leaders
and to build a national membership base
talks had been attempted for more than twenty years to combine their efforts
leadership of both the AFL and CIO realized that a united front was necessary
to achieve a stronger future for organized labor
former AFL and CIO leaders had retired from office or had passed away
George Meany was elected president of the American Federation of Labor (1952)
Walter Ruther was elected president of the Congress of Industrial Organizations (1952)
after many long discussions and abundant assurances on both sides
that the autonomy of individual unions would be respected
an accord was reached -- they would merge into a single labor organization
jurisdictional disputes were at an end
New York City was the location of a convention of both the AFL and CIO -- December 5, 1955
delegates represented more than sixteen million union members
CIO President Walter Ruther nominated George Meany for the AFL-CIO presidency
Ruther took a seat on the AFL-CIO Executive Council

SCHOOL SOCIAL WORKER MARGARET JEAN SCHUDDAKOPF APPEALS HER SUSPENSION

Jean Schuddakopf appealed her suspension by the Pierce County school superintendent³⁷⁴
to Superintendent of Public Instruction (SPI) Pearl Wanamaker
who took no action until -- December 22, 1955?
which was after the expiration of the 1954-1955 school year that ended in (May)
SPI Wannamaker held that the suspension was improper
she reversed the action of the county superintendent
In the super-heated atmosphere of the Senator Joseph McCarthy's
U.S. Senate Permanent Subcommittee on Investigations (PSI) Hearings
this decision made banner headlines and editorial page comments across the nation
Pearl Wanamaker, her office and family were flooded with abusive mail and telephone calls

STATE SUPERINTENDENT OF PUBLIC INSTRUCTION IS UNDER ATTACK

³⁷⁴ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

Superintendent of Public Instruction Pearl Wanamaker was a fiercely outspoken advocate of Federal Aid to education which was a hot topic for discussion among politicians and others³⁷⁵ Pearl led the fight to place a federal aid to education plank in the final report of the White House Conference on Education -- January 1956

she insisted such the aid must be provided without government control over curriculum Wanamaker's activism at the White House Conference got a great deal of media attention

Fulton Lewis, Jr. a national right-wing radio commentator

and supporter of anti-Communist U.S. Senator Joseph McCarthy (D-Wisconsin),

criticized the very high-profile role Wanamaker placed at the conference

he attacked how she conducted herself as Washington's Superintendent of Public Instruction In a broadcast over the Mutual Broadcasting Network -- January 6, 1956

Fulton Lewis, Jr. confused Pearl Wanamaker with Margaret Jean Schuddakopf

he claimed Pearl's brother had fled behind the Iron Curtain and renounced his citizenship when he was apprised of his error, Lewis expressed his horror

he apologized on air and in a telegram -- but Wanamaker was not appeased

Pearl Wannamaker filed suits in both state and federal courts throughout the country

one Washington D.C., jury gave her \$145,000 -- Lewis countersued

(this was to drag on for years in courts around the country

and never ceased to get media attention)

Always controversial, Pearl Wanamaker was denounced from pulpits

for insisting that state and federal constitutions

forbade parochial school students from using public-school buses

courts backed her view, but Seattle Catholics and Lynden's Dutch Reformed church members bitterly blamed her for failing to bus their students to and from school

JOHN GOLDMARK -- CATTLE RANCHER WITH A DEGREE FROM HARVARD LAW SCHOOL

(John Goldmark was born to a prominent family of Austrian-Jewish descent [October 7, 1917]³⁷⁶

his mother, Ruth Ingersoll Goldmark, died just after she gave birth to her only child

young John attended various Quaker boarding schools

before graduating from Haverford College, near Philadelphia, Pennsylvania

he enrolled in the Harvard Law School where he served on the *Law Review*

and graduated with honors)

(John went to work in Washington, D.C. for the Office of Price Administration [1942]

there he met Irma "Sally" Ringe

she had attended medical school for a year before she had to drop out and find work

Sally had joined the Communist Party in the depths of the Great Depression [1935]

she paid her dues and attended meetings for six years -- until she met John

Hitler's secret alliance with Stalin [May 3, 1939]

changed the minds of millions of Communists in both the United States and Europe)

(After they were married [1942], John expressed his negative feelings toward the Communist Party

Sally took him aside and told him that she was a member

³⁷⁵ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

³⁷⁶ Jim Kershner, HistoryLink.org, Essay 9858, July 22, 2011.

they went ahead with their plans to marry anyway
like these millions of others, Sally lost interest in the Communist Party and dropped out
she later testified that she quit the Party [1943])
(John went into officer's training and was commissioned as a Navy ensign [December 1942]
he returned to Washington, D.C. where he received bomb-disposal training
their child, Charles, was born [January 1944]
shortly afterward, John was sent to the South Pacific where he served in New Guinea,
Australia, and the Philippines disarming bombs while under fire)
(John Goldmark was discharged from the U.S. Navy at the end of the war
he dreamed of starting a new life farming in the Pacific Northwest
he and Sally loaded little Charles into their car and drove west
he took work as an orchardist in White Salmon, Washington
their second son, Peter, was born [August 1946])
(John Goldmark began searching for land he could call his own
he found it in a remote region of Okanogan County
he bought a rocky, partly timbered ranch [1947] and began his new life as a cattle rancher
twenty-five miles up a dirt road from the town of Okanogan, Washington
John's Navy officer's sword held a place of honor over the fireplace)
(John Goldmark threw himself into cattle ranching and into public life in Okanogan County
he became involved in the Washington State Grange, the Wheat Grower's Association
and the Rural Electrification Board
he purchased an airplane and earned a pilot's license for his periodic trips to Seattle [1949]
he started a chapter of the Young Democrats
and was elected the president of the state organization [1951]
Goldmark maintained that ranchers and poor farmers of the Columbia River area
had a right to affordable electricity from hydroelectric generators)

SALLY GOLDMARK IS CALLED TO TESTIFY ABOUT HER COMMUNIST PAST

United States House Un-American Activities Committee subpoenaed Sally Goldmark³⁷⁷
to testify before a committee hearing in Seattle --1956
wife of the state Democratic Party liberal leader John Goldmark
was questioned in "executive session"
afterward, she believed that everyone was satisfied and that the subject was closed

POTENTIAL SELLING OF FEDERAL POWER SOURCES IS CONSIDERED BY CONGRESS

Advocates of public power companies and utilities had reason to fear
that the Tennessee Valley Authority (TVA), the leading federal public power installation,
would be sold to private interests to be operated by for profit companies
This concern led to an effort to form a publicly operated "joint operating agency" in the Northwest
to replace the Bonneville Power Authority (BPA) if it were privatized -- 1956
Private power companies across the nation began an intense lobby campaign in Congress
to privatize public power

³⁷⁷ Jim Kershner, HistoryLink.org, Essay 9858, July 22, 2011.

WASHINGTON TRI-CITIES REGION SUFFERS AN ECONOMIC SLUMP

After the end of World War II and the demand for nuclear energy diminished

Tri-cities of Richland, Pasco and Kennewick had experienced the loss of jobs

Some believed what was needed was a federal building to make the Tri-cities area appear permanent

U.S. Senator Warren Magnuson was contacted about the scheme

he noted: **“It takes fifteen years to get a federal building authorized and appropriated.”**³⁷⁸

supporters of the plan explained that Tri-cities might not last that long

Maggy went to work making political contacts to push the project ahead

something happened behind Maggy’s closed senate office door

two weeks later the senator said, **“Hanford is at the top of the list for a federal building.**

Missoula doesn’t want one.”³⁷⁹

(this new federal building was dedicated in [1964])

(This boost from Senator Magnuson paid off

Hanford Atomic Works was at its peak production from 1956 [to 1965]

over the entire forty years of operation, the site produced about fifty-seven tons of plutonium as it supplied the majority of the 60,000 weapons in the U.S. nuclear arsenal)

FRED HUTCHINSON MAKES A NAME FOR HIMSELF AS A BASEBALL MANAGER

After winning the (1955) Pacific Coast League pennant as manager of the Seattle Rainiers

Fred Hutchinson took a job managing the St. Louis Cardinal -- 1956

he led them from the cellar to a third place finish

Hutch’s popularity in St. Louis resulted in a new nickname “The Big Bear”

given to him by Cardinal broadcaster Joe Garagiola

Hutchinson’s unsmiling expression also led Garagiola to joke that Hutchinson

was “really happy inside, only his face didn't know it.”

(however, a disappointing [1958] season saw him replaced as manager)

BOEING 377 STATATOCRUISER CHASHED INTO PUGET SOUND

Northwest Orient Airlines plane carrying thirty-two passengers and six crew members to New York³⁸⁰ experienced severe buffeting by the wind and reduced power -- April 2, 1956

Unable to reach McChord Air Force Base, the plane landed in the water just off Vashon Island

where the tail broke off and aircraft sank after fifteen minutes afloat

An Air Force rescue plane on a training mission responded and saved eleven people

two boys in a rowboat from nearby Maury Island also rescued survivors

but five people died in the disaster

Cause of the accident was traced to an improper setting of the cowl flaps by the flight engineer

U.S. SUPREME COURT RULES ON THE TACTICS OF McCARTHYISM

³⁷⁸ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*. P. 200.

³⁷⁹ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*. P. 200.

³⁸⁰ David Wilma, HistoryLink.org, Essay 3698, February 20, 2002.

Professor Harry Slochower taught at Brooklyn College before he was fired by New York City for invoking the Fifth Amendment

when McCarthy's U.S. Senate Permanent Subcommittee on Investigations Committee (PSI) questioned him about his past membership in the Communist Party

In *Slochower v. Board of Education*, the United States Supreme Court prohibited such actions in its ruling it stated: **"...we must condemn the practice of imputing a sinister meaning to the exercise of a person's constitutional right under the Fifth Amendment.... The privilege against self-incrimination would be reduced to a hollow mockery if its exercise could be taken as equivalent either to a confession of guilt or a conclusive presumption of perjury."** -- April 9, 1956

(Other Supreme Court decisions, *Yates v. United States* [1957] and *Watkins v. United States* [1957] curtailed the power of congressional committees such as:

- the House Un-American Activities Committee;
 - the Senate Internal Security Subcommittee (SISS) or McCarran Committee;
 - and Senator McCarthy's Senate Permanent Subcommittee on Investigations
- in *Kent v. Dulles* the U.S. Supreme Court halted the State Department from using the authority of its own regulations to refuse or revoke passports based on an applicant's Communist beliefs or associations [1958])

McCARTHYISM IS NOT DEAD IN AMERICA

McCarthyism might seem to be of interest only as a historical subject but the political divisions it created in the United States continue to make themselves known portions of the massive security apparatus established during the McCarthy era still exist loyalty oaths are still required by the California Constitution for all officials and employees of the government of California this is very problematic for Quakers and Jehovah's Witnesses whose beliefs preclude them from pledging absolute loyalty to the state at the federal level, a few portions of the McCarran Internal Security Act are still in effect some equate the Patriot Act (2001) with the Alien Registration Act or Smith Act (1940)

TEAMSTERS UNION IS EJECTED FROM THE AFL-CIO

International Brotherhood of Teamsters President Dave Beck's continued membership raids and an ever-worsening corruption scandal led the American Federation of Labor-Congress of Industrial Organizations (AFL-CIO) to eject the Teamsters AFL-CIO President George Meany was worried that corruption scandals which plagued the Teamsters and a number of other unions at the time might lead to harsh regulation of unions in general or even the withdrawal of federal labor law protection President George Meany began an anti-corruption drive in the AFL-CIO -- April 1956 new rules were enacted by the labor federation's executive council that provided for the removal of vice presidents engaged in corruption as well as the ejection of unions considered corrupt

U.S. AIR FORCE BEGINS TO PHASE OUT BOEING KC-97 STRATOTANKERS

Strategic Air Command (SAC) began phasing out the KC-97 in favor of the KC-135 – 1956
fewer and fewer KC-97s continued to operate in the Air Force Reserve
and the Air National Guard

KC-97 was finally retired completely (1978)

Boeing KC-135 Stratotanker provided aerial refueling services to military aircraft (1957)
its design was based on the Boeing 707 -- it was the Air Force's first jet-powered refueling tanker
Boeing's Stratotanker was initially assigned to refuel strategic bombers in midair
(but was used extensively in the Vietnam War and Operation Desert Storm
to extend the range of US F-104 and F-4 fighters and B-52 bombers
as far-flung bombing targets were brought within reach
and fighters could spend hours rather than minutes at the front
Strategic Air Command was deactivated [1992])
Boeing KC-135 s one of only six military fixed-wing aircraft
to attain over fifty years of continuous service

REPUBLICANS SEEK AN END TO THE FRANKLIN ROOSEVELT'S NEW DEAL

Republicans demand for change focused on the "morally bankrupt" nature of the Democratic Party
nowhere was this better defined than in the campaign for the U.S. Senate seat
of Washington's Warren G. Magnuson

Republican Governor Arthur Langlie set out to destroy the senator
in a political pamphlet titled: *The Myth That Is Magnuson*³⁸¹

"Once upon a time there was a senator who loved the purr of a Cadillac, the genial clink of ice-cubes late at night, the beguiling flutter of a petticoat. Sometimes, however, these 'hobbies' were so pressing that it was hard to attend to the affairs of state in Washington, D.C. [Magnuson's career was characterized as] ...absolutely Hollywoodian, with guys, dolls and gangsters and an unsuccessful marriage and all the other elements of a cheap film production."

Senator Magnuson countered with a partial list of his accomplishments:

- he had cosponsored and pushed bills to give statehood to Alaska and Hawaii;
- he proposed constitutional amendments to give equal rights to women;
- he proposed bills to create a Civil Rights Commission and to outlaw lynchings;
- he proposed bills to construct McNary, The Dalles and Chief Joseph dams on the Columbia River;
- he led the fights for Hungry Horse, The Dalles, Ice Harbor and Detroit dams on the Snake, Pend Oreille, Clark Fork and Flathead rivers;
- he pushed through bills to give federal aid to education, to improve Social Security, to establish National Institutes of Health, to research cancer, heart disease and communicable diseases;
- he cosponsored the Fisheries Act and created the U.S. Fisheries Commission

PEARL WANAMAKER'S CAMPAIGN FOR REELECTION IS VERY DIFFICULT

Pearl Wanamaker was seeking her fifth term as Washington's Superintendent of Public Instruction³⁸²

³⁸¹ Shelby Scates, *Warren G. Magnuson*. P. 168.

³⁸² Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

Fulton Lewis, Jr.'s broadcast and the rehashing of the Jean Schuddakopf affair
put a sensational edge on what was becoming a perfect storm
for Wanamaker's critics, political enemies and voters with change on their minds
Spokane State Senator Lloyd J. Andrews, a fruit rancher with one year as a teacher for experience
conducted an effective election campaign focusing on change
Wanamaker ran her customary campaign flying high above her opponent
she rarely even acknowledged his existence
Republican Andrews said the Superintendent of Public Instruction's office
needed to be run on sound business principles and fiscal accountability
he campaigned pointing to the anti-Communist winds buffeting Wanamaker
he called for a return to teaching history and civics in "the American Way"
he put flags and patriotic symbols in his ads for election for State Superintendent of Schools
Andrews charged that Wanamaker was out of the state too much
he said he could deliver more for less of the taxpayers' money
Pearl Wanamaker had been accused of running a political "machine" and being a "dictator"
since her first Superintendent of Public Instruction election (1940)
reports of her sharp tongue and "strong-arm tactics" were repeated

NATIONAL INTERSTATE AND DEFENSE HIGHWAYS ACT IS SIGNED INTO LAW

Washington State Legislature had adopted a plan for a Tacoma-Seattle-Everett "toll superhighway"
other projects included a second Lake Washington floating bridge, a bridge across Puget Sound,
expansion of Highway 99 to four lanes, widening of the Snoqualmie Pass Highway,
and access roads for the Columbia Basin region of Eastern Washington
state highway department announced plans for the Seattle freeway
which involved cutting a wide swath through the middle of the city including downtown
Washington State's Supreme Court declared the toll road idea unconstitutional --1956
however, this problem was resolved that same year
by massive funding from the federal Defense Highways Act
President Dwight Eisenhower signed the act creating the national interstate highway system
which provided for the federal government to provide ninety percent of the funding
for a nationwide network of limited-access roads -- June 29, 1956
funds became available for construction of the Seattle Freeway -- the future Interstate 5
Construction consumed 6,600 parcels of land -- 4,500 of them in Seattle
most property owners cooperated in the condemnation proceedings
However, some concerned residents began to speak up against the cost of the project
including former mayor and city engineer George F. Cotterill
and the Chamber of Commerce tollway committee
however, public pressure for better highways overcame the opponents

SERVICEMEN'S READJUSTMENT ACT (G.I. BILL 1944) COMES TO AN END

Funding for the G.I. Bill, as it was commonly referred to came to an end -- July 25, 1956
educational opportunity program had cost the federal government \$14.5 billion
but U.S. Treasury, it was estimated, receives two to eight times as much in income tax
as it paid out in education benefits

G.I. Bill low-cost loans for veterans to purchase homes resulted in a housing boom
By the time the original G.I. Bill serving World War II veterans ended--July 1956
7.8 million Veterans had participated in an education or training program
2.4 million Veterans had home loans backed by the Veterans' Administration

CHANGE COMES TO THE CASCADE RAILROAD TUNNEL AND SKYKOMISH

After the installation of a ventilation system in the Cascade Tunnel -- July 31, 1956
diesel engines could be used through the tunnel instead of electric engines
This was the beginning of the end of the glory days of railroading in Skykomish, Washington
at one time eight passenger and mail trains a day stopped in Skykomish
some of the finest trains in America: the *Great Northern Flyer*, the *Oriental Limited*,
The Cascadian, the *Western Star* and the *Empire Builder*
a local train affectionately known as the *Dinky* that traveled to Seattle in the morning
and returned to Skykomish in the evening
(business district was nearly destroyed by a fire [December 1970]
all passenger service to Skykomish ended [May 1971])

TEAMSTER INTERNATIONAL PRESIDENT DAVE BECK COMES UNDER INTERNAL ATTACK

Teamster Executive Council member Jimmy Hoffa perceived Dave Beck to be weak
within the Teamsters Union a major battle broke out over whether to charter new locals
media attention led to inquiries by the U.S. Department of Justice

TELEVISION BECOMES THE DOMINANT MASS MEDIA

Advances in television productions and products
changed how Americans and the world communicated
more and more families brought culture, sports, news, theater, education and entertainment
into their homes -- endless hours were filled, especially by children, watching television
what was portrayed on television became accepted as normal
family, school, neighborhoods, the nation and the world were only partly based in reality
People began to accept what they heard and saw on television
local, state and world news coverage and programs such as *See it Now* and *You Are There*
made viewers eye witnesses to events
In addition to fact-based television, entertainment programs were very popular
Disneyland and *The Ed Sullivan Show* were featured on Sunday evenings
situation comedy (sit-coms) portrayed idealized families who were watched and copied
I Love Lucy, *The Honeymooners*, *Father Knows Best*, *The Adventures of Ozzie and Harriet*
daytime programming featured "soap opera" shows which ran for decades on television
some continued their storyline from earlier radio shows:
The Brighter Day, *The Romance of Helen Trent*, *Guiding Light*, *Ma Perkins*
others were original to television:
As the World Turns, *The Edge of Night*, *Love of Life*, *Search for Tomorrow*

WILLIAM E. BOEING PASSES AWAY

After suffering from a long period of failing health

Bill Boeing was cruising Puget Sound on his yacht *Tacomite*
just three days before his 75th birthday he died of a heart attack -- September 28, 1956
Boeing's son, William Boeing, Jr., told the *Seattle Post-Intelligencer* his father
had **“pursued his curiosity, studied things carefully, and never dismissed the novel”**

CONSTRUCTION BEGINS ON ROCKY REACH DAM AND POWER PLANT

Chelan County Public Utility District (PUD) built Rocky Reach Dam on the Columbia River
this 3,800-foot long with an average height of 162 feet cost of \$275,000,000
Located seven miles upriver from Wenatchee to provide power production and flood control
reservoir impounded by the dam is known as Lake Entiat
This project was financed through the sale of revenue bonds
by pledging future revenues generated by the project to repay debt -- no tax money was used
included were the relocation of a rail line, highways, land acquisition,
relocation of the Town of Entiat, Washington and financing
one special feature is a unique fish ladder and counting device that photographs as it counts
each fish that passes the six-foot high window in the viewing room
forty-two mile long reservoir, the town nearby, and the river all share the name of Entiat
an Indian word for “rapid water”

Construction of the dam and powerhouse with seven generating units began -- October 2, 1956
generating capacity of first phase would be 1,215,000 kilowatts
first task was to install cofferdams to seal off from the river flow during low water
in the area designated for the spillway
first phase of the \$273.1 million project was financed with a \$23.1 million bond issue
(completed [November 1, 1961])
this project provides energy for more than seven million people throughout the Pacific Northwest
(Second phase of the Rocky Reach Dam project adding four more generating units began [1969]
and increased the number of electrical generators from four to ten)

JIMMY HOFFA CHALLENGES DAVE BECK FOR CONTROL OF THE TEAMSTERS UNION

Hoffa began challenging Beck on various union decisions and policies -- 1956
hoping to unseat him as General President in the regularly scheduled (1957) union elections
believing he needed additional votes to unseat Beck mobster Jimmy Hoffa
met with fellow gangster Johnny Dio in New York City -- October 1956
they conspired to create as many as fifteen “paper locals” to boost Hoffa's delegate totals
when these paper locals applied for charters from the international union,
Hoffa's political foes were outraged by the fraudulent plan
Hoffa's attempt to challenge Beck caused a major national scandal

REPUBLICANS SWEEP DEMOCRATS OUT OF OFFICE

Incumbent President Dwight D. “Ike” Eisenhower ran at the head of the Republican ticket
on the National Republican Party campaign line: “liberty against socialism”
in a rematch with Democratic challenger Adlai Stevenson
“I Like Ike” campaign buttons were seen everywhere
“Ike” had presided over a nation at peace with the world for four years

nuclear arms and weapons buildup against Moscow and Beijing were good for business
Eisenhower presided over a massive buildup of American NATO forces
and reinstalling the West German army to avoid a Communist military invasion of Europe
Eisenhower overwhelmingly defeated Stevenson gaining 57.37% of the popular vote
and 86.1% of the electoral votes -- November 6, 1956
U.S. Senator Warren G. Magnuson, in a bitter campaign, crushed Governor Arthur Langlie
Langlie received a majority vote in only one county: San Juan
Democrat Albert D. Rosellini, was elected to the governorship vacated by Arthur Langlie
(Rosellini served two terms [1957-1965])
Former Lieutenant-Governor Vic Meyers later ran successfully for Washington Secretary of State
(he served two terms in that office)
Washington's Congressional Delegation, all Republicans but one, were reelected
Democrat Donald Magnuson, Washington's At-large Congressman, retained his seat
Long-term Superintendent of Public Instruction Pearl Wanamaker was defeated
attacks by right-wing radio, newspapers, parochial and private schools
all frustrated by her policy of not funding school transportation for their students,
fell on fertile ground
bitter campaign between Wanamaker and Lloyd Andrews for Superintendent of Public Instruction
was never close -- at age 57, Pearl Wanamaker lost her race for a fifth term
by 164,845 votes -- a substantial margin
Washington's legislature ran counter to the national trend
in the State Senate, Democrats gained nine seats to hold a thirty-one to fifteen majority
House of Representatives saw the Democrats add six seats to their majority
holding a fifty-six to forty-three seat edge

PEARL WANAMAKER'S CAREER AS AN EDUCATIONAL REFORMER ENDS³⁸³

Washington's Superintendent of Public Instruction Pearl Wanamaker's term in office (1941-1957)
was marked with progressive programs, modern reforms and a great deal of controversy
She began as a public school teacher in a one-room school house
then turned to public service by winning the office of Island County school superintendent
Wanamaker ran for and won three (non-consecutive) terms in the State House of Representatives
she was appointed to and then was re-elected to the State Senate
She became the most powerful Superintendent of Public Instruction in the state's history
her years in the non-partisan office addressed World War II educational and vocational needs
and addressed the demands for a swelling World War II **"baby boom"**
she managed the consolidation of the rural public school system
Pearl Wanamaker led the state into the modern educational era
state support for education in her tenure increased from eleven percent of the state's budget
to more than fifty percent;
Washington's Superintendent of Public Instruction Pearl Wanamaker's term in office
was marked with progressive programs, modern reforms and a great deal of controversy
she is credited with creating such progressive innovations as school nursing programs,

³⁸³ Michael Hood, HistoryLink.org, Essay 9171, September 26, 2009.

junior high schools, community colleges, vocational schools
and programs for challenged and exceptional children;
she served as president of the National Education Association (NEA)
and fought for federal aid to education;
(Pearl Wanamaker died at the age of eighty-five [1984])

JOHN GOLDMARK IS ELECTED TO THE STATE LEGISLATURE

John ran as a Democrat for State House of Representatives seat in Okanogan County³⁸⁴ -- 1956
affordable rural electricity became his campaign theme
Although a Democrat in a heavily Republican region,
he was elected by a three-to-two margin
much to the surprise of the county's dominant Republican establishment

WASHINGTON'S VOTERS DECIDE THE FATE OF TWO INITIATIVES

Boeing introduced Initiative 198 -- a "right-to-work" proposal
in an effort to outlaw union shop agreements -- 1956
which required all employees hold membership in a union to represent them in bargaining
Tacoma's Industrial Conference Board blanketed the area with campaign literature
in support of the initiative:
petitions addressed "**occupant**" were mailed for signing with return postage envelope
unionists mailed back packages of junk, wooden boxes, and scrap iron
all at Industrial Conference Board expense
Boeing's Right-To-Work Initiative was overwhelmingly defeated 68.14% to 31.86%

WASHINGTON SCIENTIST RECEIVES THE NOBEL PEACE PRIZE FOR PHYSICS

Dr. Walter Brattain, raised in Tonasket, Washington, shared the Nobel Prize for Physics³⁸⁵
with two other scientists working at the Bell Telephone Laboratories in Murray Hill, New Jersey
for their invention of the transistor which revolutionized electronics
by replacing the vacuum tube with a smaller, cheaper and more reliable means
of amplifying electric signals -- December 10, 1956

(Walter Houser Brattain was born in China [1902]
his father was a teacher in a Chinese boys' school
his family moved to a farm near Tonasket [1913] before his father bought the Tonasket Flour Mill
because Tonasket High School was not accredited,
Walter attended his senior year on Bainbridge Island
he attended Whitman College in Walla Walla and graduated [1924]
before earning a master's degree from the University of Oregon
he earned a doctorate from the University of Minnesota
Brattain began working with semiconductors at the Bell Laboratories [1939]
with two other scientists, he discovered the transistor effect
they demonstrated the first transistor [December 23, 1947]

³⁸⁴ Jim Kershner, HistoryLink.org, Essay 9858, July 22, 2011.

³⁸⁵ David Wilma, HistoryLink.org, Essay 7613, January 18, 2006,

transistors were the foundation of the Japanese *Regency* pocket radio
which sold for \$49.95 and was immensely popular
Dr. Walter Brattain retired to Seattle and died there [1987])

JOHN GOLDMARK SERVES IN THE STATE LEGISLATURE

John Goldmark served three terms in the state House of Representatives from 1957 to (1962)
he made a splash as the freshman who flew to Olympia -- in his own airplane
He immersed himself in budget and taxation issues
he helped lead the fight for public power against the interests of private electric companies

LEGISLATURE CREATES WASHINGTON PUBLIC POWER SUPPLY SYSTEM (WPPSS)

Washington Public Utility Districts (PUDs) were authorized by the Washington State Legislature
to form Joint Operating Agencies that paved the way
for Washington Public Power Supply System (WPPSS) (pronounced Whoops)
WPPSS was organized as a municipal corporation and had the same status as a city or a county
it was therefore entitled to preference under federal power law
and was also entitled to have income from its bonds exempt from federal income taxation
Seattle City Light, the largest public utility in the state, signed on with sixteen other utilities
to insure the availability of electric power in the future
WPPSS formed to build larger generating plants to produce more electric power -- January 31, 1957
this system was run by directors who were commissioners from the member utilities
(Public utility districts' membership has expanded and contracted over the years)

WASHINGTON LEGISLATORS CHANGE STATE FISHING LAWS

Washington State Legislature adopted laws that extended its power over reservation lands -- 1957
although fishing rights were specifically exempted
state officials frequently stressed the equality of Native Americans and other citizens
(to the detriment of Native Americans)
they also emphasized that restrictions on Indian fishermen
were part of the state's progressive policies of conservation

AFL-CIO IMPOSES NEW RULES ON UNION LEADERS

AFL-CIO proposed a new rule which would bar labor union officers of the federation
from continuing to hold office if they exercised their Fifth Amendment rights
in a corruption investigation -- January 1957
Teamster President Dave Beck opposed the new rule -- January 31, 1957
but the Ethical Practices Committee of AFL-CIO instituted the rule over his objections
Beck retaliated against the AFL-CIO by promising more membership raids on their affiliated unions
if the Teamsters were ousted
Beck's opposition to the AFL-CIO policy prompted a successful move
by AFL-CIO President George Meany to remove Dave Beck from AFL-CIO Executive Council
on grounds of corruption

U.S. SENATE FORMS A COMMITTEE TO INVESTIGATE LABOR UNION CORRUPTION

Growing strength of the labor movement increasingly concerned the federal government
AFL-CIO (American Federation of Labor and Congress of Industrial Organizations)
and the United Brotherhood of Teamsters all became increasingly powerful
Select Committee on Improper Activities in Labor and Management was formed by the U.S. Senate
U.S. Senator McClellan's Permanent Subcommittee on Investigations
joined forces with members of the U.S. Senate Committee on Labor and Public Welfare
to investigate labor racketeering
Select Committee on Improper Activities in Labor and Management
was chaired by U.S. Senator John L. McClellan (D-Arkansas)
it became popularly known as the "McClellan Committee"
committee members included U.S. Senators John F. Kennedy and Barry Goldwater
Goal of the McClellan Committee was to investigate allegations of corruption and abuse of power
in the country's labor unions -- especially in the International Brotherhood of Teamsters
which was one of America's largest and strongest unions
Select Committee on Improper Activities in Labor and Management
was given broad subpoena and investigative powers
Senator McClellan hired as the subcommittee's chief counsel and investigator
attorney, Robert F. "Bobby" Kennedy -- U.S. Senator John Kennedy's younger brother

McCLELLAN COMMITTEE FOCUSES ON THE BROTHERHOOD OF TEAMSTERS

Select Committee on Improper Activities in Labor and Management
opened U.S. Senate hearings -- February 26, 1957
Chairman John L. McClellan focused attention on the Teamsters Union with an investigation
into union corruption, criminal infiltration and illegal activities
Select Committee on Improper Activities in Labor and Management Chief Council,
Robert "Bobby" Kennedy, began looking into corruption in the Teamster's union -- 1957
investigators focused on Teamster President Dave Beck
and Teamster Executive Council member Jimmy Hoffa
it was claimed loans to Teamster President Beck and other union officials
(and their businesses) cost the union more than \$700,000
both Dave Beck and Jimmy Hoffa were subpoenaed to testify before the investigative committee
Dave Beck fled the country to avoid the committee's subpoenas
Televised hearings were watched by 1.2 million American households
as the committee detailed the Teamsters' misuse of union funds
and exposed union ties to labor racketeers and organized crime
this exposure elevated to national prominence
U.S. Senators John F. Kennedy (D-Massachusetts) and Barry Goldwater (R-Arizona)
Bobby Kennedy was actually surprised that he found what he termed "corruption" by Dave Beck
part of the controversy concerned Beck's Seattle home on Lake Shore Drive in Sheridan Park
Teamster tradition allowed the national labor union president to work out of his home city
Beck had owned the house long before he was elected general president of the Teamsters
Teamsters bought Beck's home from him and allowed Beck to live in it rent-free

CONSTITUTIONAL AMENDMENT XXII LIMITS THE TERM OF OFFICE FOR THE PRESIDENT

Amendment XXII to the Federal Constitution was passed by Congress
and approved by the required three-quarters of the states -- February 27, 1951
Section 1 demands no president can serve more than two full terms in office
(a vice president who serves less than two years of his predecessor's term
is allowed another two terms of his own)

DAVE BECK TESTIFIES BEFORE THE McCLELLAN COMMITTEE

Dave Beck returned from his self-imposed exile to testify before the committee -- March 6, 1957
when he appeared before the Select Committee on Improper Activities in Labor and Management
Dave Beck was harshly interrogated by committee counsel Robert F. Kennedy
regarding \$322,000 missing from the union treasury
initially Beck refused to address the allegations
he invoked his Fifth Amendment right against self-incrimination 117 times
but then he broke his silence and denounced the committee's inquiry
McClellan Committee next turned its focus to Jimmy Hoffa and other Teamsters officials
testimony and evidence was presented that alleged widespread corruption
in Hoffa-controlled Teamster locals
evidence was unearthed of a mob-sponsored plot in which Oregon Teamster unions
would seize control of the state legislature, state police, and state attorney general's office
through bribery, extortion and blackmail
Repeated harsh questioning resulted in Jimmy Hoffa
repeatedly invoking his constitutional right against self-incrimination
failure to get a conviction led to Hoffa's fame rising to national prominence
But Robert Kennedy's investigation tarnished the reputations of at least two people:
Dave Beck and Robert Kennedy

CELILO FALLS DISAPPEARS

Army Corps of Engineers began construction on The Dalles Dam and lock (1952)
The Dalles Dam and Lock are located three miles east of The Dalles, Oregon
about forty-seven miles upriver from Bonneville Dam
Construction of the dam and lock was completed -- March 10, 1957
260-foot high dam stretches 8,875 feet across the Columbia River
its 1,380-foot-long spillway contains twenty-three gates
its powerhouse contains fourteen 78,000 kilowatt generators
to produce up to 1,743,000 kilowatts of electricity
and eight 85,975 megawatt generators to produce another 1.7798 kilowatts of electricity
The Dalles single-lift lock, 650 feet long and eighty-six feet wide, lifts and lowers traffic 87.5 feet
Behind The Dalles Dam, the reservoir named Lake Celilo runs twenty-four mile up the Columbia
it reaches the foot of the John Day Dam
Lake Celilo submerged the Columbia River's Celilo Falls and several great works of nature
hundreds of observers gathered to watch -- March 10, 1957
as the rising water covered Indian fishing platforms and the ancient Indian village of Celilo
an economic and cultural hub of Indians in the region
and the oldest continuously inhabited settlement in North America

also covered by water is the thirteen-mile long portage railway
and the \$14,500,000 Dalles-Celilo Canal (completed in [1915])

JIMMY HOFFA CONTINUES ATTEMPTS TO OUST DAVE BECK AS TEAMSTER PRESIDENT

Even as the McClellan Committee conducted its investigation,
Jimmy Hoffa continued to charter “paper locals” to boost Hoffa’s convention delegate totals
Jimmy Hoffa was arrested for allegedly trying to bribe a Senate aide -- mid-March 1957
Hoffa denied the charges, but the arrest triggered additional investigations
charges of wiretapping by Hoffa quickly followed
more arrests and indictments followed over the next few weeks

DAVE BECK CONTINUES TO TESTIFY BEFORE THE McCLELLAN COMMITTEE

Initially, Teamsters Union members did not believe the charges and strongly supported Dave Beck
but after confronted by the growing list of allegations of wrong-doing
many rank-and-file Teamsters withdrew their support and called for Beck to resign
Beck made his final appearance before the McClellan Committee
under harsh questioning by committee chief council Robert “Bobby” Kennedy
Dave Beck admitted he received interest-free loans from the Teamsters
of between \$300,000 and \$400,000 which he had never repaid
(or, as the committee chair believed, a misappropriation of \$320,000 in union funds)
Dave Beck took the Fifth Amendment sixty-five times
Another scandal regarding a loan of \$200,000 from the Fruehauf Trailer Company of Detroit surfaced
Beck claimed he had repaid the loan in full

TEAMSTERS PROVIDE DAVE BECK WITH A LEGAL DEFENSE FUND

Immediately after his testimony before the McClellan Committee -- late March 1957
Dave Beck won approval from the Teamsters Executive Council to establish a \$1 million fund
to defend himself and the union from the committee’s allegations
member outrage at the expenditure was significant
permission to establish the fund was quickly withdrawn

SAUL HAAS BUYS A SEATTLE TELEVISION STATION³⁸⁶

Saul Haas expanded his Queen City radio operation to include television
he battled both Puget Sound Broadcasting (KVI) and KXA, Inc. to secure a broadcast license
Puget Sound Broadcasting accused Haas of Communist sympathies
in rebuttal he offered his old *Union Record* clippings that showed that he had editorialized
against “Communist hostility to bona fide labor organizations”
Saul Haas was granted a broadcast license -- 1957

BONNIE TUTMARC SURPASSES PAUL TUTMARC’S FAME

Paul and Bonnie Tutmarc’s marriage broke up
as she sought to advance her musical career in Hollywood

³⁸⁶ Frank Chesley, HistoryLink.org, Essay 5632, January 7, 2004.

she adopted the stage name of “Bonnie Guitar” and her Top-10 hit *Dark Moon* -- 1957
launched a long string of national hits that made her the most successful country star
ever to come from the Pacific Northwest³⁸⁷
(Paul Tutmark continued teaching nearly up until his death from cancer on [September 23, 1972])

McCLELLAN COMMITTEE CONTINUES ITS INVESTIGATION INTO UNION CORRUPTION

United States Senate Select Committee on Improper Activities in Labor and Management
continued to conduct extensive hearings regarding Dave Beck and the Teamsters Union
Teamster members’ anger continued to grow
Dave Beck’s majority support on the Teamster Executive Council vanished
Dave Beck again was called before the McClellan Committee -- early May 1957
their investigation showed additional interest-free loans
other potentially illegal and unethical financial transactions were exposed
based on these revelations, Dave Beck was indicted for income tax evasion -- May 2, 1957
These new discoveries made by Robert Kennedy and the McClellan Committee
increased the anger of rank-and-file Teamster members
sometimes toward Dave Beck and sometimes toward the investigative committee

AFL-CIO CALLS DAVE BECK TO APPEAR BEFORE THEM

AFL-CIO Ethical Practices Committee conducted a hearing of its own -- May 1957
Dave Beck was ordered to appear and answer questions
AFL-CIO President George Meany could not guarantee Beck that if he answered questions
he would not subpoenaed by the Senate Labor Committee
Beck refused to answer questions from the ethics committee

DAVE BECK ANNOUNCES HE WILL NOT SEEK REELECTION AS TEAMSTER PRESIDENT

Because he refused to answer the questions of the AFL-CIO Ethical Practices Committee
Dave Beck was removed from the AFL-CIO Executive Council
support for Beck among the Teamster membership evaporated
Dave Beck’s legal troubles forced him to announce -- May 25, 1957
that he would decline to seek the Teamster presidency (in October)

U.S. SUPREME COURT RULES LABOR OFFICIALS HAVE CONSTITUTIONAL PROTECTION

United States Senate Select Committee on Improper Activities in Labor and Management
continued its investigation into the leadership activities of Teamsters and other unions
as a result of these investigations U.S. Supreme Court issued a landmark ruling -- June 10, 1957
in *Curcio v. United States* (1957)
union officials could exercise their Fifth Amendment Rights against self-incrimination
further, union officials could not be forced to divulge the location of union records

STATE SUPREME COURT RULES ON THE CASE OF ILLEGAL INDIAN FISHING

Puyallup Indians Robert Satiacum and James Young were represented in court by Wing Luke

³⁸⁷ Peter Blecha, HistoryLink.org, Essay 7479, September 18, 2005.

(who later became Seattle's first Asian city council member
and the first Asian in the nation to win an elected position)
In *State v Satiacum* as a result of a 4-4 tie among the justices upheld
dismissal of the convictions of tribal members fishing in violation of state law -- July 1, 1957
but the Supreme Court failed to decide the treaty fishing rights granted to Native Americans
four members of the Supreme Court supported treaty fishing rights and four did not
thus no decision was handed down
Satiacum and Young's case encouraged other tribal members to assert their tribal fishing rights

JIMMY HOFFA ANNOUNCES HE WILL SEEK THE TEAMSTER PRESIDENCY

McClellan Committee investigation of more than twenty union leaders
in fact, strengthened Jimmy Hoffa's leadership in the Teamsters Union
because the investigators failed to get a conviction
despite additional indictments, Jimmy Hoffa announced
he would seek the Teamsters Union presidency (at the October election) -- July 19, 1957
Hoffa's announcement created chaos among the Teamsters Union leadership
Rank-and-file member support for Hoffa was strong
but there were some attempts to organize an opposition candidate

SOUTHERN CHRISTIAN LEADERSHIP CONFERENCE (SCLC) IS ESTABLISHED

Southern Christian Leadership Conference (SCLC) was established -- August 9, 1957
to coordinate the action of local protest groups throughout the South
115 African American leaders laid the groundwork for a civil rights crusade
under the leadership of Dr. Martin Luther King, Jr., the organization
drew on the power and independence of black churches to support its activities
SCLC's first major campaign, the Crusade for Citizenship, began
its efforts were sparked by a civil rights bill then pending in Congress
SCLC's objective was to register thousands of disenfranchised voters
in time for the (1958) and (1960) elections
SCLC sought to establish voter education clinics throughout the south
Funding for the effort came in small donations from churches and large sums from private donors

ELVIS PRESLEY VISITS THE PACIFIC NORTHWEST

Rock star Elvis Presley performed in Vancouver, British Columbia, Spokane and Tacoma³⁸⁸
before drawing the biggest crowd for a single performer in Seattle
to that time -- September 1, 1957
an estimated crowd of 16,200 (ninety percent of them teenage girls)
police described the crowd as reasonably well behaved
Seattle's show began with *Heartbreak Hotel* and ended with *Hound Dog*
according to *The Seattle Times* Presley, shook, shivered, slumped, slouched and staggered
though a forty-five minute set that kept the crowd on its feet and screaming
from the first note to the last

³⁸⁸ Cassandra Tate, HistoryLink.org, Essay 3440, July 10, 2001.

after the last number Presley quickly disappeared through a gate in the right field fence
in his rented Cadillac

LITTLE ROCK, ARKANSAS PUBLIC SCHOOLS ARE DESEGREGATED

Although Arkansas was a relatively progressive Southern state
its governor, Orval Faubus, called out the National Guard
to prevent entry to the nine African American students who had sued for the right
to attend an integrated Little Rock Central High School -- September 4, 1957
these nine students were chosen to attend Central High because of their excellent grades
only one of the nine students showed up as the others were warned by telephone of the danger
she was harassed by white protesters outside the school
police had to take her away in a patrol car to protect her
President Dwight D. Eisenhower was determined to enforce the orders of the Federal courts
Eisenhower federalized the National Guard and ordered them to return to their barracks
he then deployed elements of the 101st Airborne Division
to Little Rock to protect the black students

(For several following days, all nine students had to carpool to school
they were escorted by military personnel in jeeps
they had to pass through a gauntlet of spitting, jeering whites to arrive at school on their first day
they put up with harassment from fellow students for the rest of the year
federal troops escorted the students between classes, but still the students were harassed
they were attacked by white students when the soldiers were not around
only one of the Little Rock Nine, Ernest Green, got the chance to graduate
after the (1957–1958) school year was over, the Little Rock school system decided
to shut public schools completely rather than continue to integrate
other school systems across the South followed suit)

CIVIL RIGHTS ACT OF 1957 PASSES CONGRESS

While the state governments are empowered establish rules for voter registration and elections
the federal government can assure the constitutional right to vote for federal officers
such as the president, vice-president and members of Congress
Civil Rights Act of 1957 was signed into law by President Eisenhower -- September 9, 1957
this was the first civil rights legislation enacted by Congress
since the period of post-Civil War Reconstruction following the American Civil War
this law had passed the U.S. House of Representatives with a vote of 270 to ninety-seven
U.S. Senate voted in favor sixty to fifteen
Goal of the 1957 Civil Rights Act was to ensure that all Americans could exercise their right to vote
since the late Nineteenth Century in the South, discriminatory voter registration rules and laws
had disfranchised most blacks
Although the federal government appeared committed to the Civil Right Movement,
U.S. government had difficulty enforcing the law -- black voting had increased only by 3% (1960)

AFL-CIO THREATENS TO EXPELL THE BROTHERHOOD OF TEAMSTERS

AFL-CIO voted to expel the International Brotherhood of Teamsters -- September 25, 1957

if the union did not institute reforms within thirty days
Dave Beck refused to institute any reforms

SENATOR WARREN MAGNUSON LEADS IN THE CIVIL RIGHT MOVEMENT

Washington's U.S. Senator Warren Magnuson led in the battle for Civil Rights
as he stated in communication with constituents back home: **"I have either been the original or co-sponsor of all the civil rights bills which have been before Congress since I first came here. You may be assured that my concern for individual liberties shall continue and that my efforts to guarantee them shall not abate. The limitations of my office allow no more."**³⁸⁹

JIMMY HOFFA IS ELECTED PRESIDENT OF THE TEAMSTERS UNION

Dave Beck was under federal indictment
as the International Brotherhood of Teamsters convention opened
Jimmy Hoffa was duly elected Teamsters Union General President -- October 4, 1957
Hoffa's opponents asked a federal judge to postpone the election,
but the request was granted only temporarily
Jimmy Hoffa was to take office (in December) -- Dave Beck offered to retire early
Hoffa was barred by a federal district court from taking power
unless he was acquitted in his wiretapping trial
this ruling was upheld by a court of appeals
(but the wiretapping trial ended in a hung jury [December 19, 1957])

SHOCK AND FEAR GRIPS AMERICANS

Sputnik, the first artificial satellite to be put into orbit around earth,
was launched into space by the Soviet Union -- October 4, 1957
Sputnik's launch came as an unnerving surprise to the people of the United States
it circled the earth at an amazing 18,000 miles per hour orbiting the planet every 96.2 minutes
sending back radio signals monitored by amateur radio operators around the globe
although the meaning of the messages remained unknown outside of the Soviet Union
radio signals continued for twenty-two days wreaking havoc
with imaginations in every nation but especially in America
(to great relief the signals stopped [October 26] when the batteries died)
by contrast, America had made no progress in space exploration
since launching the first animals (fruit flies) into space (1947)
(Sputnik I fell back to earth [January 5, 1958] creating a fireball in the thin atmosphere above earth)

"RACE FOR SPACE" BETWEEN THE TWO SUPERPOWERS BEGINS

Sputnik's launch ushered in new a era of political, military, technological and scientific developments
and marked the start of the "Space Age"
"Race for Space" took on real meaning for Americans
who visualized on their private telescopes, their own eyes and in their minds
the sight of the ominous, blinking enemy satellite unfettered and alone in space

³⁸⁹ Shelby Scates, *Warren G. Magnuson*. P. 190.

had no rival in heaven or on earth
Americans felt inferior and powerless to thwart the Communist threat

INTERNATIONAL BROTHERHOOD OF TEAMSTERS UNION IS SUSPENDED BY THE AFL-CIO

Although he won the Teamsters Union president's election,
Jimmy Hoffa was considered as corrupt as Dave Beck
this led the AFL-CIO to suspend the Teamsters Union -- October 24, 1957
AFL-CIO president George Meany offered to keep the Teamsters within the AFL-CIO
if Hoffa resigned as president
Hoffa refused (and the formal expulsion occurred [December 6, 1957])

BOEING ROLLS OUT ITS 707 COMMERCIAL JET AIRPLANES

Boeing's Renton plant produced the first commercial Boeing 707-120 -- October 28, 1957
(major orders had launched the new airplane
Pan American Airways ordered twenty 707-121 planes [October 13, 1955]
American Airlines ordered thirty 707-123 planes shortly thereafter)
(After a period of testing and certification, Boeing 707-120 took its first flight [December 20, 1957])
(Boeing's Renton Plant would continue to build the 707 series of jet planes
when the last Boeing 707 rolled out of the manufacturing facility [April 1991]
1,011 Boeing 707s had been delivered)

AMERICAN FEAR OF SOVIET SPACE DOMINANCE INCREASES DRAMATICALLY

Sputnik II was successfully launched into space by the Soviets -- this time carrying a live passenger
Laika, a female mixed-breed dog occupied a private compartment
in the cone-shape capsule with a base diameter of 6.6 feet
Sputnik II also contained a regeneration and temperature control system for the cabin
several other compartments held scientific instruments and a programming unit,
a telemetry system for measuring things at a distance,
radio transmitters sent engineering and biological data back to earth
Although Sputnik II did not contain a television camera
that did not stop the Soviets from portraying TV images of dogs misidentified as Laika
Sputnik II detected the Earth's outer radiation belt above the far northern latitudes,
but the significance of the elevated radiation was not realized

DAVE BECK GOES ON TRIAL IN SEATTLE ON CRIMINAL CHARGES

Beck appeared in a Seattle Superior Courtroom -- November 12, 1957
he faced grand larceny, embezzlement and labor racketeering charges
for taking \$1,900 from the sale of a union-owned Cadillac and keeping the money
day after day city, state and national news media provided blanket coverage of the trial
Charles Z. Smith was the young King County deputy prosecutor who designed the state's case
(he was named to the Washington State Supreme Court [1988])

FEDERAL PROSECUTORS CALL IN A GRAND JURY TO INVESTIGATE DAVE BECK

Federal Grand Jury was empaneled in Seattle to investigate federal charges against Dave Beck

prospective jurors arrived at the federal courthouse -- November 12, 1957
the same day Dave Beck faced a state jury
Anyone present in the Superior Court courtroom at the beginning of Beck's state trial was excused
remaining fifty-two potential members were examined by the court and counsel at length
only fourteen prospective grand jurors were excused
eight admitted to a bias or a pre-formed opinion as to Beck's guilt
six others suggested they might be biased or might have formed an opinion
several other potential jurors were dismissed for cause or other concerns
most of the jurors selected for the trial jury had been exposed to publicity regarding the case
each indicated that they were not biased, had formed no opinion as to guilt,
and would enter the trial with an open mind disregarding anything they read about the case

DAVE BECK IS FOUND GUILTY OF CRIMINAL CHARGES IN STATE COURT

Beck was found of grand larceny -- November 23, 1957
King County Superior Court Judge George H. Revelle and Prosecutor Charles O. Carroll
both recommended that Beck serve three years of a possible fifteen year sentence

DAVE BECK APPEALS HIS STATE COURT CONVICTION

Defense Attorneys for Dave Beck claimed the conviction in King County was invalid
under the Due Process and Equal Protection Clauses of the Fourteenth Amendment
because constant adverse publicity was circulated by the news media in Seattle
where he was indicted and tried:

- a grand jury was unfairly impaneled and instructed during his state trial;
- federal prosecutors had acted improperly when meeting with the federal grand jury;
- Beck's motions for a change of venue and for continuances were erroneously denied

(United States Supreme Court denied the claim)

AMERICA'S SPACE PROGRAM IS UNSUCCESSFUL

Proposals to place an artificial satellite into orbit around the Earth were presented
by the United States Air Force, the United States Army, and the United States Navy
Air Force proposal was not seriously considered -- Atlas missile development was years away
Army Ballistic Missile Agency under former-German scientist Dr. Wernher von Braun
had suggested using a modified Redstone rocket in what became the Juno project
Navy proposed designing a rocket system based on the Viking rocket system
An effort by the U.S. Navy to launch Vanguard-T3 with an embarrassingly small 3.5-pound payload
was shown on television -- December 6, 1957
it ended in failure as the Viking rocket exploded on the launch pad
this deepened America's dismay over the nation's position in the Space Race
No other effort to enter space was made that year

U.S. AIRFORCE B-52 CRASHES AT FAIRCHILD AIR FORCE BASE NEAR SPOKANE³⁹⁰

Giant B-52 Stratofortress was taking off on a training mission -- 4:00 p.m. December 12, 1957

³⁹⁰ Daryl C. McClary, HistoryLink.org, Essay 9857, September 4, 2011.

eyewitnesses reported that as the aircraft left the runway it made an abnormally steep climb
at approximately 2,000 feet fire started coming from the jet engines
pieces of metal began flying off the engine cowlings and mounts
aircraft stalled, executed an abrupt, right wingover and appeared to level off
at approximately 500 feet, the plane nosedived and crashed in a wheat stubble field
one mile west of the base
exploding jet fuel sent a large column of smoke into the sky
Impact of the crash almost disintegrated the aircraft -- wreckage was strewn for hundreds of yards
Air Force declined to say whether the crashed B-52 was carrying nuclear weapons
eight of the nine crewmen aboard were killed
miraculously the tail gunner, Gene I. Graye, survived the accident with only minor injuries
(Investigators later found the crash was caused by faulty wiring in an electric motor
that controlled the horizontal stabilizer which directed the climb
this time the aircraft did the opposite of what the pilot intended)

AMERICA LAUNCHES A SATELLITE OF ITS OWN

U.S. Army's four-stage Redstone rocket dubbed Juno-1
was developed by former-German scientist Wernher von Braun
this rocket was used to launch a 30.66-pound satellite, Explorer-1,
from Cape Canaveral (today's Cape Kennedy), Florida into orbit -- January 31, 1958
Explorer-1 was the first spacecraft to detect the Van Allen radiation belt
which is composed of electrically charged particles held in place by the earth's magnetic field
(Explorer-1 ceased transmission of data on May 23, 1958)

PROGRESS TOWARD LABOR UNION PEACE IS MADE

James Riddle "Jimmy" Hoffa assumed the Teamsters Union presidency -- February 1, 1958
he served as a union organizer from (1932) to (1975)
he was the union's General President from 1958 until his disappearance (1975)
he played a major role in the growth and development of the union
which eventually became the largest single union in the United States
with over 1.5 million members during his terms as its leader
International Brotherhood of Teamsters under President Jimmy Hoffa began talks
with leaders of the International Longshoremen and Warehousemen (ILWU) -- January 1958
limited contract negotiations coordination was reached by both unions in Northern California
(this effort was expanded as agreements to present joint demands, pursue joint negotiations
and strike jointly [1960])
(cooperation paid off handsomely with vastly improved wages, benefits and working conditions)

FAMOUS WASHINGTON STATE AUTHOR PASSES AWAY

Betty MacDonald's first book, *The Egg And I* debuted (October 3, 1945)³⁹¹
this loosely autobiographical novel told of her days as a young bride
on a chicken ranch in the Chimacum Valley on the Olympic Peninsula

³⁹¹ Paula Becker, HistoryLink.org, Essay 8261, August 14, 2007.

and the activities of her thinly disguised (some said too thinly disguised) neighbors
war-weary readers were drawn to her self-deprecating humor and witty prose
but Betty's humor wasn't kindly, nor homey, nor friendly

The Egg And was everywhere

an abridged three-part version appeared in the *Atlantic Monthly* magazine

The Reader's Digest published an abridged version

The Egg And I went on to sell more than three million copies in hardback alone
with editions in thirty-two languages

Betty MacDonald also wrote the six-book children's series *Mrs. Piggle Wiggle*

Mrs. Piggle-Wiggle is a small lady who lives in an "upside-down" house

in a lively neighborhood inhabited mainly by children who have bad habits

Mrs. Piggle-Wiggle provided parents with a cure for problems their children's bad habits

Born Anne Elizabeth Campbell Bard, Betty MacDonald passed away in Seattle at age forty-nine
after suffering from cancer -- February 7, 1958

SAUL HAAS' KIRO TELEVISION STATION BEGINS BROADCASTING

Channel 7 went on the air -- February 8, 1958

CBS networks powerful lineup included *The Ed Sullivan Show*, *The Red Skelton Show*,
Gunsmoke, *Perry Mason* and *Leave it to Beaver*

(Saul Haas sold KIRO, Inc. [1964] to the Bonneville Broadcasting Corporation,
a subsidiary of the Church of Jesus Christ of Latter-day Saints

Saul Haas remained as chairman of the board until his death [1972])

KING-TV DEBUTS ITS TEENAGE DANCE SHOW: *SEATTLE BANDSTAND*

Seattle Bandstand broadcast live every Saturday afternoon from 1 p.m. until 3 p.m. (through 1962)³⁹²

this program was a televised teen-dance show modeled after Dick Clark's very popular
national program *American Bandstand* broadcast from Philadelphia (beginning in [1952])

Seattle Bandstand was launched -- Saturday March 16, 1958

the production made use of three cameras at the station's studios

broadcasting was live (dancing, lip-syncing singers and promotional ads were all features)

area teens would write to request tickets to participate by dancing to the *Top-10* songs

which were referred to on the show as the "King Size 10"

This weekly two-hour television program was an instant favorite of Northwest youth

teenagers swamped the station begging to be included in the show

so too did local record distributors who wanted to promote the new records they were pushing

local dance and concert producers did likewise, as they offered to bring touring teen stars

to the studio to lip-sync their latest hit and plug an upcoming dance or concert

Seattle Bandstand eventually helped launch the hit-making careers of several area teen-bands

AMERICA'S SUCCESS IN SPACE IS VERY LIMITED

U.S. Navy's second Vanguard-TV3 failed to orbit a three-pound satellite (February 5, 1958)

U.S. Army's Army Redstone Juno-1 rocket failed to launch Explorer-2 into orbit

³⁹² Peter Blecha, HistoryLink.org, Essay 8430, December 22, 2007

as the fourth stage of the Jupiter-C rocket failed to ignite (March 5, 1958)
U.S. Navy's Vanguard-TV3 successfully lifted Vanguard-1, a 2.25 satellite
into orbit -- March 17, 1958
U.S. Army's Explorer-3, a twenty-one pound satellite, was launched into orbit -- March 26, 1958
(However, the next three U.S. Navy attempts to launch a satellite all ended in failure
Vanguard TV5 [April 28, 1958], Vanguard SLV-1 [May 27] and Vanguard SLV-2 [June 26])

DREAMS OF A THIRD MAJOR LEAGUE ARE LOST

It had long been the hope of the Pacific Coast Baseball League that they would be allowed
to compete on an equal footing with the National League and American League
However, when the New York Giants moved to San Francisco
and Brooklyn Dodgers moved to Los Angeles -- 1958
(and won the World Series as the Los Angeles Dodgers [1959])
the future of three leagues in baseball was finished
Pacific Coast League did not recover from major league baseball moving west
PCL's flagship teams, the Hollywood Stars and the San Francisco Seals
and the Los Angeles Angels were forced to relocate to smaller markets
(today's Los Angeles Angels [established 1961] is an expansion team that took the name)
Pacific Coast League reverted to "AAA" classification -- 1958
soon it diminished in the public eye to nothing more than just another minor league
(Of the cities represented in the PCL in its heyday, only Salt Lake City and Sacramento remain
and these are represented by different franchises than those that originally called these cities home
Oakland Oaks had moved to Canada [1956] two years before the arrival of the Giants
San Diego Padres and Seattle Rainiers were displaced by Major League teams [1969])

AMERICA'S FIRST NUCLEAR SUBMARINE VISITS THE PACIFIC NORTHWEST

USS *Nautilus* was on its way to carry out a Top Secret mission -- Operation Sunshine
to cross the North Pole submerged
she arrived in Everett and spent the night there -- June 2, 1958³⁹³
Next day, *Nautilus* carried a load of dignitaries and journalists to Seattle and docked at Pier 91
when a leaking condenser unit was discovered, the secret mission to the North Pole was at risk
but security concerns and time restraints made repairs through usual channels impossible
experts hit on the idea of using Bar's Leak, an automotive stop-leak product
developed to stop radiators from leaking,
crewmen were ordered to change into civilian clothing
sailors fanned out across Seattle in taxicabs to buy cans of Bar's Leak at local service stations
they returned with 140 quarts -- half were poured into the condenser and the leak stopped

USS NAUTILUS SET OUT ON ITS SECRET MISSION TO SAIL UNDER THE NORTH POLE

U.S. Navy's submarine *Nautilus* cast off from Seattle's Pier 91 and headed north
on America's first voyage under the North Pole -- just after midnight on June 9, 1958³⁹⁴

³⁹³ Dave Wilma, HistoryLink.org, Essay 3739, April 3, 2002.

³⁹⁴ Dave Wilma, HistoryLink.org, Essay 3739, April 3, 2002.

while running on the surface of Puget Sound, the crew painted over the large numbers displayed on the sail (conning tower) and the bow to conceal the sub's identity
At the time the Arctic floor had not been mapped
in the Chukchi Sea, the nuclear submarine ran into heavy ice and a shallow bottom
this mission was forced to be abandoned

U.S. SPACE PROGRAM ACHIEVES ANOTHER SUCCESS -- AND SEVERAL FAILURES

U.S. Army's Army Explorer-4 carried a 37.16-pound satellite into orbit -- July 26, 1958
(but Explorer-5 failed to lift a 37.16-pound into orbit [August 24, 1958])
(U.S. Navy's Vanguard SLV-3 also failed to enter orbit [September 26, 1958]
this final failed attempt ended the U.S. Army's Juno program)
Each of few successes were received with great celebration among the participants
and the nation as a whole

USS NAUTILUS CROSSES UNDER THE ARCTIC ICE CAP

U.S. Navy's submarine *Nautilus* successfully crossed the Arctic, completely under water
after ninety-six hours and 1,830 miles submerged under the ice,
USS *Nautilus* surfaced in the Greenland Sea -- August 5, 1958
This event received worldwide publicity and changed the complexion of the Cold War
crew of the *Nautilus* was celebrated with a tickertape parade in New York City
President Dwight D. Eisenhower awarded the *Nautilus* the Presidential Unit Citation

WASHINGTON'S FIRST WOMAN CONGRESSIONAL CANDIDATES FILES FOR OFFICE

After Republican incumbent Congressman Otis H. "Hal" Holmes announced his retirement,
Spokane's state legislator, Catherine Dean May decided to launch a campaign
for the Fourth District Congressional seat -- summer 1958
Fourth Congressional District was the largest in the state at that time
covering twelve southeastern counties³⁹⁵
Despite little name recognition outside the Yakima area, May won the Republican primary election
however, in contrast to her legislative campaigns,
where the contest was pretty much settled during the primary election,
she faced an uphill battle in the general election
Catherine May's opponent was Democrat Frank LeRoux,
who was a wealthy wheat farmer and businessman from Walla Walla
(LeRoux had come very close to defeating Congressman Holmes two years earlier
which gave him name recognition in the Congressional District)
in addition he had considerable support from Senator Warren G. Magnuson and Democrat leaders
State Republican Central Committee considered Catherine May "a lost cause"
they provided no financial support to her campaign
Yakima Women's Republic Club raised a little money for her
by selling 1,588 cans of pudding for \$1 each
unable to afford motel rooms when she campaigned in the far corners of the district

³⁹⁵ Cassandra Tate, HistoryLink.org, Essay 8834, November 13, 2008.

she slept in the homes of local Republicans
Catherine May was articulate, personable and accommodating
she won support in the largely non-union Fourth District by endorsing a right-to-work initiative
to ban union membership as a condition for employment
she appealed to farmers by pledging to advocate the continuation of farm price supports
LeRoux was well known but not widely liked -- he seemed stiff and cold
May, in contrast, projected warmth and affability

U.S. SENATOR HENRY JACKSON FACES A DEMOCRATIC CHALLENGER

In Washington's Democratic Primary election Senator Jackson faced
peace activist and frequent unsuccessful candidate for various offices Alice Franklin Bryant³⁹⁶
Bryant reflected the views of a small minority of the Democratic Party
that opposed the military build-up -- especially of nuclear weapons
Jackson strongly supported a build-up of nuclear arms as a deterrent against Soviet aggression
U.S. Senator Henry Jackson firmly defeated his primary challenger -- August 19, 1958
he won all thirty-nine counties by a vote of 334,862 to Bryant's 55,200

U.S. HIGHWAY 101 GENERATES PUBLIC OPPOSITION

Environmentalist and United States Supreme Court Justice William O. Douglas
led seventy-two people on a hike along the Olympic coast
at the farthest point west in the 48-contiguous states³⁹⁷
(Douglas had previously spearheaded an eight-day [1954] hike along the C & O Canal
on the Potomac River between Washington, D.C., and Cumberland, Maryland,
to stop a proposed parkway that would have destroyed the canal's historic towpath)
conservationists like Justice Douglas were opposed to the expansion of U.S. Highway 101
which would destroy the wild coastline portion of Olympic National Park
other members of the hiking party included Wilderness Society president Harvey Broome,
National Parks Association president Sigurd F. Olsen
and Olympic National Park superintendent Daniel B. Beard
Lake Ozette was the campground used before setting out from Cape Alava
they continued south to Rialto Beach
this twenty-two mile hike crossed the longest unbroken piece of primitive coastline
in the United States outside of Alaska or Hawaii (which were not yet states)
People who supported the road construction project
were invited to participate in the hike -- none came
members of the press were there, but since they saw no opponents to the road they saw no story
Hikers took three days to travel from Cape Alava before they arrived at Rialto Beach
there they were confronted by sign-carrying pro-road protesters
Larry Venable and his eleven-year-old son, Tony
Venable was a Port Angeles resident and manager for Black Ball Freight Service
he also served as the president of the Washington State Good Roads Association

³⁹⁶ Kit Oldham, HistoryLink.org, Essay 5583, November 1, 2003.

³⁹⁷ Paula Becker, HistoryLing.org, December 29, 2010.

and was a director for the Automobile Club of Washington
the pair displayed signs saying: **“Bird Watchers Go Home”**
“We Own This Park Too, We Want a Shoreline Road,”
“Super Highways for 47 states but Primitive Areas For Us,”
“Fifty Million U.S. Auto Owners and Their Families Like Scenery, Too!”

Larry Venable and his son made the story of the hike for conservation news
if they had not been there, the press would have paid no attention
(It cannot be stated as fact that the protest hike was responsible for stopping the road proposal,
but the coastal strip remained intact)

NATIONAL DEFENSE EDUCATION ACT PASSES CONGRESS

National Defense Education Act (NDEA) was influenced
by the Soviet launch of the Sputnik satellites
this launch shook the American belief that the United States was superior in math and science
to all other countries
U.S. citizens feared that schools in the USSR were superior to American schools
NDEA coincided with an acute shortage of mathematicians in the United States
industry, including defense, was absorbing mathematicians
who should have been at high schools and universities teaching the next generation
also, newly developing computers created a demand for mathematicians as programmers
computers shortened the lead time between the development of a new mathematical theory
and its practical application -- thereby making programmers more valuable
Congress reacted to the shortage of mathematicians by passing the NDEA
to bring U.S. schools up to speed -- September 2, 1958
it provided funding to United States education institutions at all levels
NDEA authorized funding for four years of college at an increasing rate each year
for example, funding increased on eight program titles from 183 million dollars (1959)
to 222 million (1960)

WASHINGTON’S FIRST WOMAN SUPERINTENDENT OF PUBLIC INSTRUCTION DIES

Former Superintendent of Public Instruction Josephine Corliss Preston
was the third woman to serve as President of the National Education Association
at the same time she held several positions:
•Washington Superintendent of Public Instruction,
•President of the Washington State Board of Education,
•she served on the National Women’s Executive Committee for the Republican Party³⁹⁸
At age eight-five this dedicated educator passed away in Renton -- December 12, 1958

TWO U.S. AIRFORCE B-52s COLLIDE

Two Boeing B-52 Stratofortresses numbers 60-661 and 60-681
from the 92nd Bomb Wing, 327th Bomb Squadron were returning to Fairchild Air Force Base

³⁹⁸ Karen Blair, HistoryLink.org, Essay 9706, March 27, 2011.

after having spent the day on routine training³⁹⁹
Both bombers were making practice landing approaches to Runway 23
aircraft 661 was flying under VFR (visual flight rules) under the supervision of the control tower
airplane 681 was flying under the guidance of a radar ground control approach unit,
as it was practicing an ILS (instrument landing systems) approach
Communication became scrambled
when bomber 681 dropped below the glide path on final approach
the pilot was told to pull up, execute a right turn, and go around
pilot of bomber 661 was advised by the control tower regarding what the second B-52 was doing
he then radioed back, “Roger tower, tell him to turn the other way”
661 then banked to the right
Several seconds later both giant B-52’s collided -- 6:20 p.m. on Monday, September 8, 1958
above the community of Airway Heights and busy Sunset Highway (U.S. Highway 2)
about five miles west of Spokane and two-and-a-half miles northeast of Fairchild
both planes plummeted to the ground from a height of approximately 1,000 feet
disintegrating and burning as they fell
fortunately, neither of the bombers was carrying nuclear weapons
Seconds after the collision, six crewmen managed to eject from the planes
their bright orange and white parachutes opening automatically -- three survived
thirteen other crewmen, including three of the crewmen who ejected, were killed
hundreds of pieces of disintegrating aircraft rained down, hitting buildings and falling on roads
some pieces landed as far as two miles south of Sunset Highway
luckily, nobody on the ground was injured by the crash
and only minimum damage to property in Airway Heights occurred
(*Fairchild Times*, the base newspaper, later reported the results of the investigation
in the column “Command Lines”

Colonel Donald E. Hillman, 92nd Bomb Wing Commander, wrote: **“This accident was caused by a series of errors that compounded to a point where correction was impossible. At several points during these final moments, a correction could have been made and the collision averted. But the compounding of errors continued and the point of recall was gone forever. All of us are deeply aware of our great loss in the recent crash of two of our aircraft. In terms of monetary value, the planes alone represented a \$16,000,000 investment. The loss of so many fine men cannot be measured in any terms. The tragic part is that it was absolutely avoidable.”**

This incident was the worst disaster in Strategic Air Command’s B-52 bomber operation history

NATIONAL AERONAUTICS AND SPACE ADMINSTRATIONS IS CREATED

President Dwight Eisenhower signed the National Aeronautics and Space Act
establishing NASA -- October 1, 1958
NASA became the agency of the United States government responsible for the nation’s
civilian space program and for aeronautics and aerospace
NASA’s missions can be divided into unmanned and manned categories
manned missions receive the most public attention

³⁹⁹ Daryl C. McClary, HistoryLink.org, Essay 8561, April 29, 2008.

unmanned missions can support manned missions by testing equipment for manned flights and can be efforts carrying scientific equipment into space they have explored most of the solar system, brought telescopes for deep space exploration into orbit around the Earth and launched and operated satellites for studying the Earth itself

BOEING 707 TAKES ITS FIRST COMMERCIAL FLIGHT

First airline to operate the Boeing 707 was Pan American World Airways which inaugurated transatlantic jet service from New York to London -- October 26, 1958 ushering in a new era in the history of passenger aviation 111 passengers, the largest number ever to board a single regularly scheduled flight, made a stopover in Newfoundland coach fares were \$272 -- about the same as the fare for a piston-engine flight across the Atlantic Boeing's new jet transport reduced the size of the world by fifty per cent

DEMOCRATS WIN CONVINCING VICTORIES IN ELECTION⁴⁰⁰

This off-year (no candidate for the presidency) showed no change in Washington national officials Henry M. Jackson easily retained his seat in the U.S. Senate Senator Warren G. Magnuson was not up for reelection Five of the states Republican Congressmen retained their offices Republican Catherine Dean May replaced 4th Congressional District Republican Hal Holmes to become Washington's first woman Congresswoman Democrat Donald H. Magnuson shifted from an At-large position to represent the 7th District In the state legislature, three new seats were added in the State Senate Democrats captured won these elections and also took away one Republican Senate seat to capture a thirty-five to fourteen majority in the State House of Representatives ten Republican seats went to the Democrats giving the majority party a sixty-six to thirty-three majority

AN INITIATIVE TO RESTRICT LABOR RIGHTS FAILS AT THE POLLS

Boeing made a second effort to place restrictions on labor agreements -- Initiative 202 (this same proposal was first attempted and failed before [1958]) Initiative 202 was filed and enough signatures were once again gathered to qualify for the ballot notation on the ballot text read: "**RESTRICTING LABOR AGREEMENTS An act declaring void any agreement hereafter made or extended which requires membership in or payment to a labor organization as a condition of employment.**" this proposal was again defeated 63.73% to 36.27% -- November 4, 1958

ALASKA BECOMES THE FORTY-NINTH STATE IN THE UNION

(Alaska was purchased from Russia [March 30, 1867] when Secretary of State William H. Seward wrote a check for \$7.2 million -- about two cents an acre

⁴⁰⁰ Kit Oldham, HistoryLink.org, Essay 5583, November 1, 2003.

Alaska was referred to as “Seward’s Folly” and “Seward’s Icebox”
by those opposed to the purchase
Alaska went through several administrative changes
before becoming an organized territory [May 11, 1912]
Washington’s U.S. Senator Henry M. Jackson used his position
as chair of the Interior Committee’s Subcommittee on Territories to lead the fight for a bill
granting statehood to Alaska
Congress passed the Alaska Statehood Act [1958]
which expanded the United States beyond the forty-eight continuous states)
President Dwight D. Eisenhower signed the formal statehood document -- January 3, 1959
United States’ flag showed forty-nine stars
supporters referred to Alaska as “The Last Frontier” and “The Land of the Midnight Sun”
State of Alaska is about one-fifth the size of the continental states
larger than Texas, Montana and California combined
it reaches to the west so far that the International Date Line had to be bent
to keep the state all in the same day
it is the only state that extends into the Eastern Hemisphere

CATHERINE DEAN MAY IS SWORN INTO CONGRESS⁴⁰¹

Washington’s Congresswoman Catherine May was sworn into office -- January 3, 1959
(her twelve years as a United States Representative proved to Washingtonians
that a woman could successfully represent the interests of her constituents, make laws
and comprehend “non-female” topics such as military defense, atomic energy
and the national budget)
she was the first member of Congress from Washington state to win a coveted seat
on the House Agriculture Committee -- she held that position throughout her tenure
(later she was also appointed to the joint House-Senate Atomic Energy Committee)
When Congresswoman May was there, Congress was firmly a men’s club
women representatives were denied access to the House gym and the House swimming pool
they were excluded from all-male golfing parties at the Burning Tree Country Club
and from the all-male meetings of the Marching and Chowder Society
women could not even go out on the balcony behind the Speaker’s office
there were no women staff members anywhere to be seen
no women pages, no women in the doorkeeper’s office or in the parliamentarian’s office,
there were no women Capitol Police officers
**“The attitude of a lot of women when I got there was, ‘Aren’t we lucky they let us in
here?’”⁴⁰²**

Catherine May maneuvered in this environment with an approach
that was **“gentle, reasonable, and non-threatening”⁴⁰³**

⁴⁰¹ Cassandra Tate, HistoryLink.org, Essay 8834, November 13, 2008.

⁴⁰² National Public Radio interview with Colorado Representative Democrat Pat Schroeder, 2008.

⁴⁰³ Patricia Graham Pidcock, *Catherine May: A Political Biography*,” (Ph.D. diss., Washington State University, 1992/ P.190.

(In office, Catherine May took pains to distance herself from outspoken feminists
she was a quiet leader in the campaign to provide women with equal rights
she co-sponsored the Equal Pay Act of [1963] that President Kennedy signed into law
she introduced a bill to ban sex discrimination in jury selection [1966]
she was also a co-sponsor of the proposed Equal Rights Amendment [ERA],
and introduced it to each new session of Congress (between [1959] and [1970])
ERA was finally approved by Congress [1972]
but failed to win ratification by the necessary number of states)

STATE REPRESENTATIVE JOHN GOLDMARK IS ACTIVE IN DEMOCRATIC POLITICS

John Goldmark rose in the Democratic legislative leadership ranks
he was considered one of the most prominent members of the party's liberal wing
he supported the establishment of a Washington State Art Commission
he was also a strong supporter of the American Civil Liberties Union (ACLU) -- 1959
and sponsored a bill drafted by the ACLU -- 1959
to strengthen due process and free speech rights in union affairs
he became a member of the ACLU's state committee

GREEN RIVER FLOODING DEVASTATES THE VALLY AROUND KENT

For years flooding in the Green and White River valleys were common occurrences⁴⁰⁴
floods almost always occurred in (November or December) when warm "Chinook winds"
(a warming wind from the ocean flowing into the interior regions of the Pacific Northwest)
melted the heavy snowfall in the mountains and also caused heavy rain
Work had begun on the construction of Howard A. Hanson Dam -- February 1959
which was located in Eagle Gorge several miles to the east of the valley
this storage dam, when completed, would put an end to the almost annual flooding

McCLELLAN COMMITTEE FORCES REFORMS ON THE LABOR MOVEMENT

United States Senate Select Committee on Improper Activities in Labor and Management
exposed widespread corruption in the Teamsters Union
its investigation resulted in several indictments against Dave Beck and Jimmy Hoffa
for fraud and other crimes
McClellan Committee uncovered scandals that affected not only the Teamsters
but also several other unions as well
more than a few top labor union leaders were prosecuted
this disgrace seriously damaged the reputation of organized labor in America
Robert F. "Bobby" Kennedy's political career was under way
Revelations by the McClellan Committee directly led to passage of strict new federal legislation
regulations directed at policing labor unions were enacted
Labor-Management Reporting and Disclosure Act (or the Landrum-Griffin Act) -- 1959
established, for the first time, close regulation of unions by the federal government:
•union elections had to meet federal requirements;

⁴⁰⁴ Alan J. Stein, HistoryLink.org, Essay 3575, September 19, 2001.

- annual financial reports had to be presented to the Labor Department;
- convicted criminals were banned from holding union office;
- union members were protected against coercive labor practices

FORMER TEAMSTERS UNION PRESIDENT DAVE BECK FACES FEDERAL CHARGES

Dave Beck entered a federal district courtroom in Tacoma to face two criminal indictments:

- income tax evasion involving \$240,000 in back income taxes for the years (1950-1953) and assisting with the filing of a fraudulent (1950) tax return for the Joint Council 28 Building Association (Teamsters headquarters in Seattle at Denny and Taylor);

- allegedly selling a (1952) Cadillac belong to the Teamsters and keeping the \$1,900

Federal District Court Judge George H. Boldt in Tacoma found Dave Beck

guilty on four counts of tax evasion and two counts of falsifying the union tax forms

(however, the charge of income tax evasion involving \$240,000 [1950-1953] was dismissed)

Dave Beck appealed his conviction

COUNTY ZONING LAWS ARE STRENGTHENED

(Because of procedural difficulties, King County's zoning efforts were called into doubt [July 1958] when a Superior Court judge ruled that the county

had not followed the state's [1935] Planning Commissions Act⁴⁰⁵

within three weeks of the ruling King County adopted a new comprehensive zoning plan and code State Legislature guided by King County planning officials approved a new Planning Enabling Act that provided additional zoning authority -- March 8, 1959

this outlined a set of procedures for counties to regulate land development

its purpose was to encourage more effective land use planning

State's new Planning Enabling Act:

- gave counties an option to establish a Planning Department in addition to a Planning Commission to carry out planning and zoning activities;
- it called for creation of a Board of Adjustment to consider applications for zoning permits;
- it defined, and established specific requirements for:
 - "comprehensive plans" to coordinate land-use planning and drafting of regulatory controls;
 - "official controls" which demanded maps of the areas affected by zoning regulations ;
 - "circulation element" that showed major transportation routes

DAVE BECK GOES TO FEDERAL PRISON

former Brotherhood of Teamsters President Dave Beck

had been nudged from office by Jimmy Hoffa (1957)

Beck was convicted on six counts of income tax evasion -- March 9, 1959

he was sentenced in Tacoma federal court by Judge George H. Boldt

to five years at McNeil Island Federal Penitentiary and fined \$60,000

plus \$10,961.52 in court costs

(Beck remained in prison until he was pardoned by President Gerald Ford [May 1975])

⁴⁰⁵ Kit Oldham, HistoryLink.org, Essay 7741, May 2, 2006.

HEART RESEARCH TAKES A GREAT LEAP FORWARD

(Pioneering cardiovascular surgeon Dr. Lester R. Sauvage, a native of Wapato, Washington⁴⁰⁶ became interested in the then-new field of blood vessel grafts
as a researcher at the University of Washington's School of Medicine beginning [1950]
Dr. Sauvage's research and his residency were interrupted during the Korean Conflict [1952]
when he was drafted into the Army Medical Corps
he was assigned to Walter Reed Army Medical Center in Washington, D.C.
where he designed and directed a study involving inserting grafts into pigs' aortas
to repair damaged blood vessels caused by gunshots or other injuries)
After completing his military service Dr. Sauvage returned Seattle
there he joined the cardiovascular team at Providence Hospital (now Swedish Medical Center)
Dr. Sauvage developed artificial grafts to create detours, or bypasses,
around obstructions in coronary arteries
Dr. Sauvage established the Reconstructive Cardiovascular Research Laboratory in Seattle
he and others working at the facility began working on important contributions
to the development of coronary artery bypass surgery
now the most common kind of operation done on the heart
(Reconstructive Cardiovascular Research Laboratory in Seattle this would later become
the Hope Heart Institute, named after supporter comedian Bob Hope)
(Today the Hope Heart Institute is one of the Northwest's
leading cardiovascular research and education centers
it sponsors a variety of programs aimed at preventing, as well as treating, heart disease)

STATE SUPREME COURT HEARS THE MARGARET JEAN SCHUDDAKOPF CASE

Washington State Supreme Court took up the case of Jean Schuddakopf's (1954) suspension
from teaching in Pierce County by the Pierce County superintendent of schools
its ruling was issued -- May 28, 1959

“It appears to me (sic) that the plaintiff herself was unable to perform her contract through no fault of the defendant School District because on the date when the contract was to begin, she had no right to teach in Pierce County. Lacking that right she was unable to tender performance.

“... [Jean Schuddakopf] may have been blameless in law and in fact for her inability to tender performance...and for more than a year thereafter, nevertheless she did fail and no reason exists for requiring the [Tacoma School District] to pay for that which it did not receive.”

Tacoma historian Dr. Ron Magden noted: **“The Schuddakopf case demonstrated the weakness of educators in preserving academic freedom in the classroom....The air of suspicion generated by the superpatriots destroyed morale among educators from the kindergarten level through high school. Intimidated instructors worried about what they said and to whom they said it. No one knew who the FBI informers might be.”**⁴⁰⁷

⁴⁰⁶ Cassandra Tate, HistoryLink.org, Essay 7639, February 22, 2006.

U.S. SENATOR HENRY M. JACKSON INVESTIGATES NATIONAL SECURITY

Washington State's Senator Jackson was appointed chairman of the powerful

Senate Subcommittee on National Security and International Operations -- July 1959

this gave Washington's Junior Senator unsurpassed insight

into workings of the Pentagon and the State Department

Jackson's subcommittee set a high standard for scholarly yet practical research into a complex subject over a wide range of topics:

- committee's basic charter was to investigate how well the government was organized to plan and implement national security policies in the nuclear age
- it explored policy-making at the Presidential level;
- it studied the roles played in foreign policy by the Secretary of State and American ambassadors, the National Security Council and the Bureau of the Budget;
- it investigated interdependence of foreign policy, nuclear strategy and military technology

Many recommendations by the committee were put in place

to improve the quality and effectiveness of decision-making

LOCAL BASEBALL HERO FRED HUTCHINSON MANAGES THE CINCINNATI REDS

Hutch once again returned to Seattle and the Rainiers

which at the time was the top farm club of the Cincinnati Reds -- 1959

but the heyday of the Seattle Rainiers was in decline

He was called up from their Seattle Rainier farm club

to manage the struggling Cincinnati Reds and improved their league standing -- 1959

BRIEF HISTORY OF HAWAII

First known settlers of the Hawaiian Islands were Polynesian voyagers

who arrived sometime in the Eighth Century from either Southeast Asia or the South Pacific

English navigator, Captain James Cook, sighted the island of Oahu (1778)

he named the entire archipelago the Sandwich Islands after his good friend John Montagu

Fourth Earl of Sandwich

European sailors and traders exposed the Polynesians to smallpox, venereal disease, liquor, and Western technology -- especially cannons and guns

Early in the 18th Century, American traders came to Hawaii to exploit the sandalwood

found in the islands which was much valued in China at the time

Americans become active in Hawai'i (native name for the islands)

protestant Methodist-Episcopal missionaries arrived from the United States (1818)

sugar cane growing and refining industry was introduced to Hawaii (1830s)

American missionaries and planters brought about great political, economic, cultural, and religious changes in Hawaiian life

Mid-1800's saw the arrival of Chinese contract laborers and of the first Japanese immigrants

Hawai'i continued to grow as an international port of call -- especially for whalers

Death of King Kamehameha V who had no heirs, (December 11, 1872)

was resolved when the Hawai'i legislature elected a "constitutional monarch"

during this unstable period, a treaty was signed with the United States (1876)
that guaranteed Hawai'i an American sugar market
this treaty was renewed (1887) with a clause leasing Pearl Harbor to the United States
American expatriates and sugar planters supported by a division of U.S. Marines
deposed Queen Liliuokalani, the last reigning monarch of Hawai'i (1893)
Republic of Hawaii was established as a U.S. protectorate (1894)
Spanish-American War (1898-1901) fanned expansionist feelings in the United States
strategic location of Pearl Harbor gave proponents of annexing Hawaii
an excuse for American growth
formal transfer of sovereignty took place (August 12, 1898)
Hawaii was organized into a formal United State Territory (1900)
beginning a period that witnessed a steady growth in U.S. military buildup, tourism
and creation of a pineapple canning industry by James D. Dole
During World War II, Hawaii became firmly ensconced in the American national identity
following the surprise Japanese attack on Pearl Harbor (December 1941)
also the record of bravery compiled by Nisei troops of the 100th Infantry Battalion
of the 442nd Regiment on the European front did a great deal to allay the mistrust
some felt about the loyalties of Japanese-Hawaiians
Hawaii also bore a disproportionate burden during the Korean conflict
as they suffered more casualties per capita than any of the other states
Hawaiians pressed for statehood but Congress was reluctant
partly because of racial antipathy
and partly because of fears that Hawaii's powerful
International Longshoremen's and Warehousemen's Union was Communist-controlled
U.S. House of Representatives passed a statehood bill (1947), but the U.S. Senate refused to follow

HAWAII BECOMES THE FIFTIETH STATE IN THE UNION

Not until after Alaska became the 49th State, did Congress vote to let Hawaii enter the Union
President Eisenhower signed the statehood bill (March 18, 1959)
Next the question of statehood was put to the Hawaiian electorate
Hawaiian's voted for statehood by a 94% favorable vote (June 17, 1959)
Once again Washington's U.S. Senator Henry M. Jackson used his position as chair
of the Interior Committee's Subcommittee on Territories to lead the fight in the U.S. Senate
for a bill granting statehood to Hawaii
Hawaii became the 50th State in the Union -- August 21, 1959

PROGRESS IS MADE IN CONTROLLING THE COLUMBIA RIVER

(Canadian and U.S. governments agreed to begin studies
for potential future joint development of dams along the Columbia River (1944)
planning efforts were slow until the (1948) Columbia River flood caused extensive damage
from Trail, British Columbia, to Cathlamet, Washington
and completely destroyed Vanport, the second largest city in Oregon
increased interest in flood protection and the growing need for power development,
initiated eleven years of discussions and alternative proposals

for construction of dams in Canada

Both governments issued a report that recommended principles for negotiating an agreement and apportioning the costs and benefits -- 1959

FLOODING RAINS SWELL THE GREEN RIVER

Sandbags were placed in front of businesses, rowboats were readied for launch in front yards, and rescue workers prepared for the worst

Green River crested 4.7 feet about flood level near Kent -- 4:00 p.m., November 24, 1959

water surged through the Green River Valley breaking through dikes

sections of road were washed out

worst washout damage occurred north of the City of Kent's sewage treatment plant

where 200 feet of Russell Road broke off and was carried away by the current

this break created a channel for water to flood toward the west,

thousands of acres of farmland were threatened

dairy farmers, used to the yearly routine, moved their cattle to high ground

Hundreds were forced to flee from their homes -- riverfront homes bore the brunt of the damage

some had two feet of water running through the ground floor

Rearing ponds at Soos Creek Fish Hatchery were flooded

as hundreds of thousands of fingerlings escaped

U.S. Army rushed in two helicopters and amphibious trucks, known as "ducks"

some cattle, up to their bellies in water, had to be flown out

Flood water took weeks to dissipate -- damage costs were estimated at \$1,557,500

King County was declared a disaster area and federal assistance was requested

dairy farmers in the valley continued to suffer

over the next few months milk production dropped between twenty and thirty per cent

crop farmers lost valuable topsoil -- or gained large amounts of silt and sand

uprooted trees, fences, and wreckage filled fields throughout the valley

at the construction site of the Howard A. Hanson dam upstream in the Cascade Mountains

the newly built coffer dam was destroyed

AMERICA BEGINS ITS PROGRAM TO LAUNCH A MANNED SPACE VEHICLE

Project Mercury was America's first major undertaking to put an astronaut in space

three objectives for the Mercury Program were identified:

- place a piloted spacecraft into orbital flight around Earth,
- observe human performance in such conditions,
- recover the human and the spacecraft safely

In preparation to reach these goals, Project Mercury launched four unmanned attempts

first propelled Sam, a monkey, fifty-five miles into the atmosphere

on an eleven minute six second flight -- December 4, 1959

this capsule was recovered in the Atlantic Ocean by the USS *Borie*

with the space craft and monkey intact

BOMB SHELTERS ARE PROPOSED AS A PROTECTION AGAINST NUCLEAR HOLAUCAST

West Virginia's hills 250 miles southwest of Washington, D.C. became the location

of a \$14 million fallout shelter for members of congress

it was kept stocked with dried foods, first aid kits and water until the Cold War began fading
(in the late [1980s] and early [1990s])

Wall Street investors said the bomb shelter business could gross up to \$20 billion in the coming years
(if there would be coming years)

Survival stores around the nation sold air blowers, filters, flashlights, batteries,
fallout protection suits, first aid kits and water

General Foods and General Mills sold dry-packaged meals as underground rations

Families with well stocked shelters lived with the fear that after a nuclear attack

they would be invaded by an army of friends and neighbors

who had neglected to build bunkers of their own

many ordered contractors to construct their shelters in the dead of night

so nosy neighbors would not see

Officials of Eisenhower's administration, after seeing the results of numerous atomic bomb tests,

had a fairly realistic idea of how difficult it would be to survive a nuclear bomb blast

they continued, however, to disseminate somewhat dubious survival information,

primarily to give the American public a sense of hope and control over their own lives

they also believed that a public confident of surviving an atomic war

would support the federal government's decision to increase its own atomic arsenal

even though its existence could provoke a nuclear war with the Soviet Union

1960-1969

SEATTLE'S DOLTON RECORDS DISTRIBUTES THE NORTHWEST ROCK SOUND

Dolton Records in Seattle Dolton was the brainchild of Bob Reisdorff, sales manager at Seattle's top independent record wholesaler, in partnership who joined with the Seattle's leading country/pop star: Bonnie Guitar
Bonnie knew music and sound engineering⁴⁰⁸

Dolton Records scored half-dozen international hits for local teen bands such as the *Fleetwoods*, *Frantics*, *Little Bill and the Bluenotes*, and the *Ventures* -- 1959-1960
Reisdorff and Bonnie could not agree on the direction their label would take
Dolton Records moved to Hollywood and opened up room for new labels to emerge

JERDEN RECORDS IN SEATTLE RELEASES RECORDS BY FAMOUS RECORDING ARTISTS

Gerald B. "Jerry" Dennon quit college to work for KOIN-TV in Portland [1956]
he was soon hired by BG Record Service to push records to area shops and radio stations⁴⁰⁹
Jerden Music, Inc. started out based in Dennon's apartment on Seattle's Queen Anne Hill
he and Bonnie Guitar began scouting for talent
Bonnie performed a solo gig at Vancouver, Washington's Frontier Room -- early 1960
she discovered a teen vocal trio, *Darwin and the Cupids* with a *Fleetwood*-style sound
Seattle's mighty KJR to Vancouver B.C.'s C-FUN were supported the newly-discovered group
Jerden Music was off to a fine start
and then *Darwin and the Cupids* quickly faded from view

CENSUS DATA SHOWS THE FULL EFFECTS OF THE POST-WAR "BABY BOOM"

This newest census report was the first to mail a questionnaire to all United States households to be filled out in preparation for personal interviews by census takers⁴¹⁰
Census data clearly illustrated the huge migration from rural areas to the suburbs and urban areas
America's total population increased by twenty percent over [1950]
and the "Baby Boomer" generation aged 0-14
showed a remarkable forty-two percent increase
data also showed the median incomes of women and minorities lagged seriously behind that of white males
Washington State's 1960 population was 2,853,214, an increase of 474,251 or 20 percent over [1950]
the state's male population of 1,435,037 was down 1.1 percent [from 1950]
while the state's female population of 1,418,177 was up 1.1 percent [from 1950]
Washington State was overwhelmingly Caucasian (96.4 percent) with 2,751,675 white residents

⁴⁰⁸ Peter Blecha, *Jerden Records (1960-1969): When the Seattle Music Biz Got Serious*, HistoryLink.org, Essay 84, December 26, 2007.

⁴⁰⁹ Peter Blecha, *Jerden Records (1960-1969): When the Seattle Music Biz Got Serious*, HistoryLink.org, Essay 84, December 26, 2007.

⁴¹⁰ John Caldbeck, *1960 census: First census to show full effects of post-World War II baby boom in Washington state; urban areas grow in population, rural areas contract*, HistoryLink.org, Essay 9341, *1960 census*, March 18, 2010.

140,243 Washingtonians had been born in Canada, 75,104 in Germany, 74,633 in Norway, 68,148 in the United Kingdom, and 58,000 in Sweden

Asia was the homeland of 1.1 per cent (30,753) of Washingtonians

black residents composed less than one percent of the state's population

American Indian, Eskimo, Aleuts made up just over one-half of one percent

“other” constituted the remaining residents

Washington's four most heavily populated counties showed increases in residents:

- King: 935,014-- up twenty-eight percent
- Pierce: 321,590 -- up seventeen percent
- Spokane: 278,333 -- up twenty-six percent
- Snohomish: 172,199 -- up fifty-four percent

Washington's major cities were Seattle (557,087), Spokane (181,608) and Tacoma (147,979) other urban centers were Yakima (43,284), Everett (40,304), Bellingham (34,688),

Vancouver (32,464) and Bremerton (28,922)

Schooling was important to most of the people of Washington

median number of grades completed was 12.1

93 percent of all children between 14 and 17 years of age were enrolled in school

184,282 (12.1) percent of the population had one to three years of college

146,852 (9 percent) had four years of college or more

Median income (the mid-point of all incomes listed from top to bottom) including married couples was \$6,225

median income all males: \$4,626

median income all females: \$1,311

median income nonwhite males: \$1,551

median income nonwhite females: \$1,292

OWNERSHIP OF LAND BY ALIENS IS STILL IN DISPUTE

Although then-U.S. Representative Warren G. Magnuson had sponsored his [1943] Magnuson Act that repealed federal laws excluding Chinese immigration that dated back to [1790]

Washington was one of the last states in the country with racist alien land laws still intact

Washington State's Constitution prohibited land ownership by residents who were ineligible for citizenship

Washington State law specifically targeted Chinese and Japanese residents,

but also impacted Native Americans, South Asians, Koreans and many other groups

Washington State was part of a broader national movement underway for over a decade to remove racist statues from state laws

Japanese American Citizens League (JACL) was determined to see the discriminatory alien land laws repealed

JACL with support from the Republican and Democratic parties, the Seattle City Council, and even the American Legion, Washington Association of Realtors and Washington State Grange lobbied the state legislature

to change the state's constitution restricting land ownership

Legislators referred a proposed state constitutional amendment to the voters for their approval Senate Joint Resolution No. 4 would repeal state law banning land ownership by aliens

supporters of the repeal movement anticipated an easy ballot win

U.S. GOVERNMENT WORKERS ARE GRANTED THE RIGHT TO ORGANIZE COLLECTIVELY

President John Kennedy signed Executive Order #10988 giving government workers the right to bargain collectively with their employers
this order set Washington State teachers to work organizing to negotiate contracts with their local school district employers -- January 17, 1962

PROJECT MERCURY LAUNCHES A SECOND MONKEY INTO THE ATMOSPHERE

Miss Sam was launched aboard *Little Joe*, a Redstone Atlas D rocket -- January 21, 1960 in a test of the Mercury space capsule to test an emergency escape mechanism
Miss Sam survived the eight minute thirty-five second flight in good condition
(Five more flights without using animals were undertaken before the first next effort to launch an animal was attempted more than a year later)

SIT-INS SPREAD THROUGH THE SOUTHERN STATES

Civil Rights Movement received an infusion of energy with a student sit-in at a Woolworth's store in Greensboro, North Carolina -- February 1, 1960 when four students from North Carolina Agricultural & Technical College, an all-black college, sat down at the segregated lunch counter to protest Woolworth's exclusion policy
they had purchased small items in other parts of the store and kept their receipts then sat down at the lunch counter and asked to be served after being denied service, they produced their receipts and asked why their money was good everywhere else at the store but not at the lunch counter
protesters such as these were encouraged to dress professionally, to sit quietly and occupy every other stool so that potential white sympathizers could join in
Other sit-ins soon took place in Richmond, Virginia, Nashville, Tennessee, and Atlanta, Georgia

CONGRESSMAN RUSSELL V. MACK DIES ON THE HOUSE OF REPRESENTATIVES FLOOR

Washington Republican Russell V. Mack died of cardiac arrest on the floor of the U.S. House of Representatives at age fifty-eight -- March 28, 1960 his seat in Congress would remain vacant until the [November 8, 1960] election

CIVIL RIGHT MOVEMENTS BECOMES MORE AGGRESSIVE

Mass actions took over the Civil Right Movement --1960 to [1968]
churches, the centers of black communities, local grassroots organizations, fraternal societies, and black-owned businesses all mobilized volunteers to participate in broad-based actions
this was a more direct and potentially more rapid means of creating change than the traditional approach of mounting court challenges
protests and civil disobedience including boycotts, sit-ins, marches, Freedom Rides and other nonviolent events swept through the South
Activist leaders held a conference at Shaw University in Raleigh, North Carolina which led to the formation of the Student Nonviolent Coordinating Committee (SNCC)

SNCC took the tactics of nonviolent confrontation further -- to the freedom rides designed to protest and bring attention to the discriminatory treatment of blacks
Demonstrators focused not only on lunch counters but also on parks, beaches, libraries, theaters, museums, and other public places
after being arrested, student demonstrators made “jail-no-bail” pledges, to call attention to their cause and thereby saddle their jailers with the financial burden of prison space and food
(by the end of [1960] sit-ins spread to every southern and border state and even to Nevada, Illinois and Ohio
sometimes brute force was used to physically escort the demonstrators from the lunch facilities)

STUDENTS FOR A DEMOCRATIC SOCIETY (SDS) ENTERS THE PROTEST MOVEMENT

Colleges and universities in America had more students than ever before
these institutions often tried to restrict student behavior to maintain order on the campuses
To combat this, many college students became active in causes that promoted free speech, student input in the curriculum, and an end to archaic social restrictions
Students for a Democratic Society (SDS) was the best-known national student organization
it had emerged from labor-supported organizations that dated back to [1905]
University of Michigan’s Ann Arbor campus held its first SDS meeting -- 1960
attended by students looking for an alternative to the stifling Cold War politics
Early SDS members took their inspiration from the civil rights movement organizing in the South
many of its activists were involved with voter registration and other civil rights campaigns

CIVIL RIGHTS ACT OF 1960 PASSES CONGRESS

Weak [1957] Civil Rights Act was strengthened by the Civil Rights Act of 1960
this federal law established federal inspection of local voter registration rolls
and introduced penalties for anyone who obstructed attempts to register to vote or to vote
Eighteen Southern Democratic U.S. Senators attempted to block passage of the bill with a filibuster
(an exceptionally long speech or series of speeches sometimes lasting days
in an effort to block a bill from passing)
these senators divided into three teams of six to continually speak on the Senate floor
thus blocking a vote on the bill
each member would only have to speak for four hours every three days
this resulted in the longest filibuster in U.S. history
before Senate Majority Leader Lyndon Johnson (D-Texas)
ended the effort after 125 hours and 31 minutes of almost constant talk
When the vote was taken, the U.S. Senate passed the bill seventy-nine to eighteen
U.S. House of Representative members voted in favor 328 to seventy-four
the act was signed into law by President Dwight Eisenhower -- May 6, 1960

BIRTH CONTROL PILL IS APPROVED BY THE FOOD AND DRUG ADMINISTRATION

After four years of clinical trials, birth control pills became available -- May 9, 1960
ten-milligram dose of *Enovid* could be purchased by women but only with a doctor’s prescription

Searle Drug Company, the developer of the pill, recommended that women take one tablet daily for twenty days each month
one month's supply cost \$10.80

Birth control pills were nearly 100 percent effective
but they came with some severe side effects including life-threatening blood clots
(further research found the approved dose was ten times too high)

Society faced a new dilemma regarding moral, social ethical and financial issues
feeling that ranged from relief to outrage were expressed in conversations, discussions, disputes, arguments and fights between individuals, among groups of people and organizations

MOTHER OF A FUTURE PRESIDENT GRADUATES FROM MERCER ISLAND HIGH SCHOOL⁴¹¹

Stanley Ann Dunham was born in Wichita, Kansas [November 29, 1942]

she was the only child of Stanley and Madelyn (Payne) Dunham

her father wanted a boy so badly that he named her Stanley

Stanley Dunham's family moved to Seattle [1955] as their daughter approached her 13th birthday

Stanley Ann was known as Stanley during her teenage years

she attended 8th grade at Eckstein Middle School in Seattle's Wedgwood neighborhood

her name, Stanley, caused her no small amount of frustration during her youth

When the Dunhams learned of a new high school opening on Mercer Island [1956]

they moved to the island in Lake Washington

At Mercer Island High School Stanley Ann Dunham, was smart and curious

she was intellectually mature beyond her years

she had a sharp wit and a comfortable sense of self-assuredness

many of Dunham's classmates at first viewed her as "different" in an endearing sort of way

she had questions regarding the staid [1950s] culture then being challenged by young people

Stanley Ann enjoyed going to coffeehouses in the University District

to talk about jazz music and the value of learning from other cultures

she also enjoyed foreign films at the Ridgmont Theatre near Green Lake in Seattle

But Stanley also found her niche at Mercer Island High School

like most girls she went to some of the sock hops, sleepovers, and boys' basketball games

however, she was most comfortable with the intellectual crowd at the high school

Two teachers gave their students assignments that regularly upset their parents

and led to "mothers' marches" protests against these teachers

English teacher Val Foubert assigned controversial texts such as *Atlas Shrugged*,

The Organization Man and Margaret Mead's writings on homosexuality

but he was almost acceptable when compared to the philosophy teacher, Jim Wichterman

who had his class read *The Communist Manifesto*

and questioned the existence of God in his classes

when intellectually challenged, these students would gather in a hallway

known as "anarchy alley" to discuss and debate the importance of challenging social norms

and questioning authority

⁴¹¹ Phil Dougherty, *Stanley Ann Dunham, mother of Barack Obama, graduates from Mercer Island High School in 1960*, Essay 8897, Stanley Ann Dunham... HistoryLink.org, January 22, 2009.

Stanley Ann Dunham was a frequent participant in these gatherings
 The senior Stanley Dunham, not known for staying put, found another job in Hawaii
 Stanley Ann did not want to go but her father insisted
 they moved the day after she graduated from Mercer Island High School
 Now known as Ann Dunham she enrolled in the University of Hawaii
 she soon met Barack Obama, a Kenyan, in a Russian-language class
 they married [February 1961] not telling their friends until afterward
 at age eighteen Ann gave birth to Barack Hussein Obama II in Honolulu [August 4, 1961]
 News of the mix-race marriage and baby shocked Stanley Ann's friends in Seattle
 she had not had a steady boyfriend in high school and had not seemed interested in children
 she even declined babysitting jobs although nearly all of her girlfriends did babysit
 Soon after Barack was born, Mrs. Obama returned to Seattle with her new son
 Ann enrolled at the University of Washington [1962] but their stay in Seattle was short
 she and her son returned to Hawaii although her husband had gone by then
 to continue his education at Harvard University in Boston
 he planned to return to his native Kenya with his family
 Stanley Ann felt otherwise and filed for divorce [1964]
 Ann married Lolo Soetoro [1967]
 shortly after their marriage, the family moved to Indonesia for several years
 interested in craftsmanship, weaving and the role of women in cottage industries,
 her research focused on women's work on the island of Java
 and blacksmithing in Indonesia
 they had a daughter, Maya [1970]
 Ann began shuttling back and forth between Indonesia and Hawaii in the [1970s]
 leaving young Barack to be raised by her parents in Hawaii
 during this time Stanley Ann seems to have found herself
 Stanley Ann completed her Ph.D. at the University of Hawaii [1992]
 she served as an American anthropologist
 who specialized in economic anthropology and rural development
 and worked in Indonesia to build a microfinance program
 to enable small, credit-poor entrepreneurs to get loans
 Ann was diagnosed with ovarian and uterine cancer [mid-1990s]
 she spent her final months in Hawaii, and died there [November 7, 1995]
 twenty-two days short of her fifty-third birthday
 Her son, Barack Hussein Obama II, was elected the first
 African American President of the United States [November 2008]
 Barack Obama referred to his mother as **“the dominant figure in my formative years ... The values she taught me continue to be my touchstone when it comes to how I go about the world of politics.”**⁴¹²

UNIVERSITY OF WASHINGTON IMPROVES KIDNEY DIALYSIS TECHNOLOGY

While a machine had been invented [in 1939] that cleansed the blood as kidneys do,

⁴¹² *Tim Jones, Barack Obama: Mother not just a girl from Kansas, Chicago Tribune: P. 1 March 27, 2007.*

the process was an impractical substitute for human kidneys
likewise, kidney transplants were still highly experimental⁴¹³

One of the major obstacles to ongoing dialysis had been that the veins and arteries of patients could not withstand the frequent abuse of intravenous punctures

Researchers at the University of Washington invented several important improvements -- 1960

Dr. Belding Scribner, a kidney specialist, devised a shunt or cannula
this was a mechanical extension of blood vessels made of Teflon
to which equipment could be connected

The first test of Dr. Belding Scribner's cannula was on Boeing machinist Clyde Shields
no prior testing on animals had taken place
(today this would not be possible under federal guidelines)

Dr. Albert Babb, a professor of nuclear engineering,
and Wayne Quinton, a biomedical technician and instrument builder,
teamed up with Scribner to reduce the size of dialysis equipment by developing
an automatic system that mixed tap water with the dialysis concentrate
one single unit could service five beds simultaneously
this team also eliminated the need for a separate blood pump,
relying instead on the patient's own bloodstream

These inventions improved the efficiency of kidney dialysis machines and reduced their size
tens of thousands of patients whose kidneys had failed would have died of uremia
with the new technology and dialysis equipment they could now be kept alive

As was the accustomed practice, neither the doctors nor the University of Washington
took out a patent on these improvements
thus allowing them to be used quickly and economically throughout the world

(Still the need for dialysis was so acute and the treatment so expensive
that an anonymous committee was empaneled to decide which patients would receive dialysis
at a cost of \$10,000 a year
first home dialysis patient was high school student Caroline Helm [1965]
the committee had rejected her for in-hospital treatment)

CONSTRUCTION BEGINS ON SEATTLE'S EVERGREEN POINT FLOATING BRIDGE

Construction on a second floating bridge across Lake Washington began -- August 1960
Seattle would have another connection, State Route 520, with Eastside communities⁴¹⁴
(first bridge, the Lake Washington Floating Bridge, had opened [1940])

Evergreen Point Floating Bridge is 1.4 miles long and crosses from Union Bay
to Evergreen Point in the city of Medina

This bridge took three years to complete

SENATOR WARREN G. MAGNUSON ADDRESSES THE ISSUE OF ALIEN LAND OWNERSHIP (Washington's senior U.S Senator had supported repeal of the federal Chinese Exclusion Act [1943])

⁴¹³ David Wilma, *University of Washington researchers improve kidney dialysis technology*, HistoryLink.org, January 1, 2000.

⁴¹⁴ Greg Lange, January 14, 1999, *Evergreen Point Floating Bridge construction starts*, HistoryLink.org, Essay 689, January 14, 1999.

in a speech in support of the effort in Washington to repeal the state's alien land laws he stated: **“I am convinced that these anti-alien land laws helped substantially to create the prejudices which were fanned by hysteria in 1942 into an incident that has been described as ‘our worst wartime mistake.’ I have referenced to the mass military evacuation of 110,000 persons of Japanese ancestry, regardless of citizenship, age, or sex from their homes into interior internment camps.”**⁴¹⁵

GREEN RIVER VALLEY RESIDENTS REACT TO ANNUAL FLOODING

In response to the [1959] flood, King County voters approved two bond issues of \$5 million each in both 1960 and [1964]

Using these funds River Management Program (was created to control flooding in the Green River Valley

(River Management Program waged an aggressive and wide-ranging flood control program throughout the 1960s and [1970s] until the bond funds were exhausted in the [1980s]

work on the Howard A. Hanson Dam was not completed [until 1962]

but even its partial construction prevented another potential flood [Christmas Day, 1961])

PRESIDENTIAL CANDIDATE JOHN F. KENNEDY PROPOSES THE PEACE CORPS

When U.S. Senator John Kennedy was on the campaign trail seeking the presidency

he addressed a University of Michigan rally of 5,000 students -- 2:00 a.m. October 14, 1960

challenging them to contribute two years of their lives

to help people in the developing countries of the world

Within weeks of his inauguration, President Kennedy signed Executive Order 10924

which established the Peace Corps on a temporary basis

R. Sargent Shriver was appointed by the president to be the first Director of the Peace Corps

during his tenure [March 1961-February 1966] programs were deployed in fifty-five countries using 14,500 volunteers

U.S. AND CANADIAN GOVERNMENTS AGREE TO DEVELOP THE COLUMBIA RIVER

(U.S. and Canadian and governments agreed to begin studies for potential future joint development of dams in the Columbia River basin [944]

planning efforts were slow until [1948] when a Columbia River flood

caused extensive damage from Trail, British Columbia, to Cathlamet, Washington

and completely destroyed Vanport (the second largest city in Oregon)

increased interest in flood protection, and the growing need for electric power development

initiated eleven years of discussions and alternative proposals

for construction of dams in Canada which ended in an agreement regarding costs [1959])

With a preliminary understanding in hand, formal negotiations began [February 1960]

United States and Canada signed a ten-year pact -- October 19, 1960

to create Columbia River hydro power and flood control projects

NATIONAL ATTENTION IS FOCUSED ON CUBA

⁴¹⁵ Warren Magnuson, “Proceedings and Debates of the 86th Congress, Second Session,” UW Special Collections.

Soviet Union Premier Nikita Khrushchev declared his support of the Communist government in Cuba
In response to an anticipated political threat only ninety miles off the southern shore of the U.S.
President Dwight Eisenhower ended all exports to Cuba except nonsubsidized foodstuffs,
medicines and medical supplies -- October 19, 1960

U.S. SENATOR WARREN G. "MAGGY" MAGNUSON'S QUIET DILEGENCE WON HIM FRIENDS

Warren G. Magnuson served as Washington State's First District Congressman for eight years
and the state's senior U.S. Senator for thirty-six years

Maggy (as he was known by the voters) never sought a formal leadership role
he believed the real work, and his greatest influence, was on the committees of the U.S. Senate
where drafting legislation and back room lobbying for votes achieved results

Senator Magnuson served as Chair of Foreign and Interstate Commerce Committee
which had jurisdiction over a wide range of subjects such as the Coast Guard, highway safety,
interstate commerce, marine safety and fisheries, merchant marines, space sciences,
sports and transportation infrastructure

in addition his committee regulated interstate transportation, pipelines and aviation
and consumer products and services

Senator Magnuson became a high-ranking member of the powerful Senate Appropriations Committee
which is the largest committee in the U.S. Senate with thirty members

it has jurisdiction over all discretionary (not mandated by law) spending in the U.S. Senate
Appropriations Committee Chair has enormous power to bring home special projects
(sometimes referred to as "pork barrel spending") for his or her state
as well as having the final say on other Senator's appropriation requests

under Magnuson's leadership Washington State received

nearly one sixth of public works appropriations, even though it ranked 23rd in population

His friend President John Kennedy said of him: **"He [Magnuson] speaks on the Senate floor so quietly that few can hear him. He looks down at his desk...he comes into the Senate late in the afternoon...he is hesitant about interrupting other senators. When he rises up to speak most other senators have left. He sends a message up to the chair and everyone says 'what was it?' and Maggie says 'it's nothing important.' And Grand Coulee Dam is built!"**⁴¹⁶

(in fact, Grand Coulee Dam was the only dam on the Columbia River
not directly attributable to Maggy's political prowess)

Kennedy continued: **"When Maggy went to Congress half the state was sagebrush and wasteland. The Columbia River ran unharnessed to the sea. There was no atomic energy plant at Hanford, no aluminum plants, no upriver navigation. Today there are millions of acres of new fertile farmland, 50,000 men at work in aluminum mills. The great waters have been harnessed."**⁴¹⁷

U.S. SENATOR HENRY M. "SCOOP" JACKSON SERVED HIS STATE AND NATION

Henry M. Jackson served as Washington State's junior U.S. Senator for over thirty years

he was a Cold War Anti-Communist Democrat and supporter of a strong military for America
he believed that evil should be confronted with power

⁴¹⁶ Shelby Scates, Warren G. Magnuson and the Shaping of Twentieth-Century America, P. 202

⁴¹⁷ Shelby Scates, Warren G. Magnuson and the Shaping of Twentieth-Century America, P. 203.

Jackson criticized President Eisenhower not spending enough on national defense and called for more Inter-Continental Ballistic Missiles (ICBMs) in the national arsenal he was a strong supporter of nuclear weapons being developed by the United States Democrats who supported a strong international presence for the United States have been called “Scoop Jackson” Democrats his opponents derided him as “the Senator from Boeing” because of demands for military spending on advanced weapons systems Jackson was often criticized for his support of the Vietnam War and his close ties to the defense industries of his state However, Senator Jackson also opposed the excesses of “Red Baiting” carried out by Wisconsin Democratic U.S. Senator Joseph McCarthy who had traveled to Washington State to campaign against Jackson Jackson boasted one of the strongest records on Civil Rights during the civil rights movement he supported both the [1957] Civil Rights Act, and the [1964] Civil Rights Act Jackson was made chairman of what became the Committee on Energy and Natural Resources (he held this position until [1981]) A good friend to Israel and the Jewish people, Senator Jackson helped refugees, particularly minorities and specifically Jews, emigrate from the Soviet Union he was one of the leading proponents of increased foreign aid to Israel Senator Henry Jackson twice ran for president [1972] and [1976] his campaigns were noted for the hostile reception they received from the left wing of the Democratic Party and on the national stage he suffered from a lack of charisma President Ronald Reagan called Henry Jackson “one of the greatest lawmakers of our century” when posthumously awarding Senator Jackson the Presidential Medal of Freedom [1984] President Reagan noted: **“Scoop Jackson was convinced that there’s no place for partisanship in foreign and defense policy. He used to say, ‘In matters of national security, the best politics is no politics.’ His sense of bipartisanship was not only natural and complete; it was courageous. He wanted to be President, but I think he must have known that his outspoken ideas on the security of the Nation would deprive him of the chance to be his party’s nominee in 1972 and ’76. Still, he would not cut his convictions to fit the prevailing style. I’m deeply proud, as he would have been, to have Jackson Democrats serve in my administration. I’m proud that some of them have found a home here.”**⁴¹⁸

WASHINGTON’S TWO U.S. SENATORS FORM AN EFFECTIVE TEAM

Friends and Democratic colleagues Warren G. “Maggy” Magnuson and Henry M. “Scoop” Jackson became arguably the most effective senatorial team in the nation’s history they possessed divergent styles but were compatible in vision they were always of like mind when it came to upholding the interests of their state Senators Magnuson and Jackson came into national prominence they gained national recognition as skillful politicians

⁴¹⁸ “What Would Scoop Jackson Say?” Archived September 29, 2007, at the [Wayback Machine](#), Fact-O-Rama, [Cybercast News Service](#).

who were renowned for their ability to work together
Both were the product of Northwest populism from the [1930s]
dedicated to seeking the public good, they were firm believers in public schools and public power
both were skeptical of political power that became concentrated in either the Left or the Right
both used their great personal political power to advance issues important to them
Magnuson advocated for health and human services including federal spending for projects
Jackson supported the Pentagon and public defense including increasing federal spending
Both appealed to separate characteristics within the voters

Maggie, the earthy carousing good guy to have a drink with, saw the world in shades of gray
he stayed in the background and allowed himself to be underestimated
he possessed a forgiving nature which allowed him to develop and maintain political friends
on both side of the aisle in the U.S. Senate
his close friend Irv Hoff noted: **“Magnuson never did much research. He reached decisions from his gut -- his intuition.”**⁴¹⁹

Scoop was the sober, alert at daybreak home at night, solid citizen
he liked to be the center of attention
he maintained a black and white understanding of issues
he seemed never to forgive a slight -- an insult would fester for years
his close friend Irv Hoff noted: **“Scoop had to study, to read everything about a subject and get all the facts before he reached a decision.”**⁴²⁰

Senator Magnuson and Jackson’s effectiveness can be summed up by the fact
Washington State benefitted from \$1 billion in military-industrial payrolls -- 1960
while Oregon’s military-industrial workers earned \$65 million
Maggy and Scoop also worked behind the scenes
for money for dams, health care, military (especially for Boeing)
and Century 21: the Seattle World’s Fair [1962] and Expo 74: the Spokane World’s Fair

NATIONAL ELECTION IN NARROW WINS FOR THE DEMOCRATIC PARTY

While the nation narrowly elected Democrat John F. Kennedy the thirty-fifth president
by a popular plurality vote of 49.7% to 49.6% -- Kennedy received 303 Electoral votes to 219
Washington voters supported Republican Richard Nixon although U.S. Senator Henry Jackson
had been a leading contender to be Kennedy’s Vice-President
when Senator Lyndon Johnson was named the Vice-Presidential candidate
Jackson accepted the National Chairmanship of the Democratic Party
and helped Kennedy and Johnson win the narrow victory
Democrat Albert Rosellini narrowly defeated Republican challenger Lloyd Andrews for governor
by a margin of 50.34 percent (611,987 votes) to 48.87 percent (594,122 votes)
Washington’s Congressional delegation saw only one change forced by the death of Russell V. Mack
neither Warren G. Magnuson nor Henry M. Jackson were up for reelection to the U.S. Senate
five incumbent Republicans and one Democrat, kept their seats in Congress
Seventh District Democratic Congressman Don Magnuson remained in office

⁴¹⁹ Shelby Scates, Warren G. Magnuson and the Shaping of Twentieth-Century America, P. 209.

⁴²⁰ Shelby Scates, Warren G. Magnuson and the Shaping of Twentieth-Century America, P. 209.

although his margin of victory was so slim it required a recount -- he won only 139 votes
State Representative Julia Butler Hansen appeared on the November ballot twice
in Washington's Third Congressional District:

- first to replace the deceased Congressman Republican Russell V. Mack
- second as the Democratic candidate for the Southwest Washington District

Mrs. Hansen won both elections and served as Washington's second Congresswoman
following her former Olympia roommate, Republican Catherine May from Yakima
In the state legislature Democrats picked up one seat in the senate capturing thirty-six
Republicans grew by seven seats in the House of Representatives
but Democrats retained the majority of seats fifty-one to forty-eight

JULIA BUTLER HANSEN IS ELECTED WASHINGTON'S SECOND CONGRESSWOMAN

Julia Caroline Butler was born [June 14, 1907] in Portland, Oregon
to Wahkiakum County Sheriff Donald Butler and his wife Maude (Kimball), a schoolteacher
she attended public school in Washington before entering Oregon State College [1924–1926]
and graduated from the University of Washington with a BA in home economics [1930]
Julia began her political career as a member of the Cathlamet, Washington city council
where she served [from 1938-1946]
she married lumberman Henry Hansen [July 1939]
Julia served in the Washington State House of Representatives from [January 1939-November 1960]
she was one of the most powerful women legislators in Washington state history
at various times while in office she chaired the education, highways and elections committees
she helped develop was the state's extensive ferry system
Julia served as the first woman House Speaker *Pro Tempore* [1955-1960]
she also managed a title and casualty insurance business [1958 to 1961]
and helped to raise her only child, David, and Henry's adopted son Richard
Julia was known in the state Legislature, usually affectionately, as **“The Lady of Cathlamet,”**
“Madam Queen,” and **“The Little Old Lady in Logging Boots”**⁴²¹
Elected to Congress from the Third District Julia Butler Hansen served seven terms in office
she was never seriously challenged in her bids for reelection
winning from fifty-seven percent to seventy percent of the vote
Hansen was named chairman of the Interior subcommittee [1967]
she devoted most her remaining Congressional career to the budgets of the Forest Service,
National Park Service, Bureau of Land Management, Bureau of Reclamation,
fisheries management, Bureau of Indian Affairs,
National Endowment for the Arts and Humanities,
and the U.S. Trust Territories: Virgin Islands, Guam and Samoa

ALIEN LAND OWNERSHIP REMAINS IN DISPUTE

Supporters of Senate Joint Resolution No. 4 to change the state constitution restriction
banning land ownership by aliens
were shocked by its overwhelming defeat: only 466,750 votes for to 565,250 against

⁴²¹ Frank Chesley, *Hansen, Julia Carolyn Butler (1907-1988)*, HistoryLink.org, Essay 8650, July 1, 2008.

Japanese American Citizens League (JACL) attributed the loss to several factors:

- Seattle-Tacoma area support failed to materialize;
- a last minute whisper campaign said repeal would relieve aliens from paying property taxes
it was too late to counter the rumor with the truth
- most significant was a latent prejudice against aliens
that found expression inside the voting booth

Japanese American Citizens League (JACL) was determined to see the alien land laws repealed
JACL's Committee on Abolishing Restrictions on Land Ownership quickly reorganized

U.S. SUPREME COURT ENDS SEGREGATION OF PUBLIC TRANSPORTATION

In *Boynton v. Virginia* the conviction of an African American law student for trespassing
he had been attested for sitting in a restaurant identified as "whites only" in a bus depot
his conviction was overturned by a U.S. Supreme Court decision -- December 5, 1960
Supreme Court held that racial segregation in public transportation was illegal
because such segregation violated the Interstate Commerce Act
which broadly forbade discrimination in interstate passenger transportation
(Enforcement of this decision would be tested many times by "Freedom Riders"
in Virginia, North Carolina and South Carolina)

U.S. AND CANADA SIGN THE COLUMBIA RIVER TREATY

(After eleven years of discussions and alternative proposals regarding construction of dams in Canada
formal negotiations apportioning the costs and benefits began [February 1960])

Columbia Treaty was signed -- January 17, 1961

by President Dwight Eisenhower and Canadian Prime Minister John Diefenbaker
(however, this treaty was not implemented until over three years later

when further negotiations resulted in:

- a protocol to the treaty that clarified and limited some treaty provisions;
- an agreement that established and clarified treaty related rights and obligations
was reached between Canada's federal government and British Columbia,
- Canadian right to downstream U.S. power benefits under the treaty
was sold to United States electric utilities for a period of thirty years)

PRESIDENT-ELECT JOHN KENNEDY PREPARES FOR HIS INAUGURATION

John F. Kennedy spent the day before his inauguration -- January 19, 1961
with his wife and children and his father
and one other special guest, Washington's U.S. Senator Warren G. Magnuson

They swam in the Atlantic and chatted

Caroline played piggyback on Maggy's shoulders
neither man ever revealed what they discussed⁴²²

Senator Magnuson, at Kennedy's urging, stayed overnight
next day he flew to Washington, D.C. with the President-elect to attend the inaugural

⁴²² Kit Oldham, *Magnuson, Warren G. (1905-1989)*, HistoryLink.org, Essay 5569, October 12, 2003.

BOEING BUILDS AIR FORCE ONE

Several aircraft have been used as Air Force One since the creation of the presidential fleet any Air Force aircraft flying the president carries the radio call sign Air Force One It was under John F. Kennedy that presidential air travel officially entered the jet age Boeing's 707 SAM (for Special Air Missions) 26000 was the first jet in the military executive fleet specifically built for presidential use and the first to be earmarked for the chief executive from its first day in service SAM 26000 (designated 2-6000 in Air Force parlance) was the primary transport for Presidents Kennedy, Johnson and Nixon -- 1962 to [1972] (After President John Kennedy's assassination Vice President Lyndon Johnson was sworn into office aboard SAM 26000 before take-off to return to Washington, D.C. Mrs. Kennedy accompanied her fallen husband from Dalles aboard SAM 26000 to accommodate the casket four seats were removed from the passenger compartment as President Kennedy was laid to rest in Arlington National Cemetery, fifty fighter jets flew overhead, followed by SAM 26000 SAM 26000 served as backup aircraft for Presidents Ford, Carter, Reagan, George H.W. Bush, and Clinton after a newer 707 was added to the fleet [1972-1998] over its years of service, SAM 26000 flew Kennedy to Berlin and Ireland, Nixon to China, Kissinger to secret Vietnam peace talks, Congressional leaders back to Washington, D.C. during the Cuban Missile Crisis and Queen Elizabeth II on a West Coast tour)

PROJECT MERCURY LAUNCHES A THIRD MONKEY INTO THE ATMOSPHERE

Ham, a chimpanzee, was launched into suborbital flight aboard a Mercury-Redstone rocket Ham's flight last sixteen minutes thirty-nine seconds -- January 31, 1961 He was not merely a passenger, but also performed tests in space whose results led directly to a manned flight

PRESIDENT JOHN F. KENNEDY CONFRONTS THE ISSUE OF CIVIL RIGHTS

During the years preceding his election to the presidency, John F. Kennedy's voting record in the U.S. Senate on issues of racial discrimination had been scant Kennedy openly confessed to his closest advisors that during the first months of his presidency, his knowledge of the civil rights movement was "lacking" For the first two years of the Kennedy administration, attitudes to both the president and his brother, Attorney General Robert F. Kennedy, were mixed African Americans viewed the Kennedy administration with suspicion still, many had a strong sense that there was a new age of political dialogue beginning many of the early positions on Civil Rights were Robert Kennedy's -- not the president's President Kennedy came to share his brother's sense of urgency on the matter Dr. Martin Luther King and the Southern Christian Leadership Conference (SCLC) initially regarded the efforts of the Kennedys as an attempt to control the movement and siphon off its energies but they came to find the efforts of the brothers to be crucial Robert Kennedy's conversations with King and others led to electoral reform and suffrage Dr. King saw that black Americans had to actively engage not only in protests

but in political dialogue at the highest levels
Attorney-General Robert Kennedy became his brother's key advisor on matters of racial equality
With a very small Democratic majority in Congress, the president's ability to move ahead
relied on a balancing game with the Senators and Congressmen of the South

CONSTITUTIONAL AMENDMENT XXIII PROVIDES WASHINGTON, D.C. REPRESENTATION

Amendment XXIII to the Federal Constitution was passed by Congress
and approved by the required three-quarters of the states -- March 29, 1961
Electoral College, [as designed in 1787], granted votes only to states
Washington, DC, is not a state
this Amendment granted people who lived in the District of Columbia
three presidential electors in the vote for President

AMERICA IS ONCE AGAIN DEFEATED AND FRIGHTENED IN THE RACE FOR SPACE

Cosmonaut, Colonel Yuri Gagarin was a twenty-seven-year-old Soviet Air Force pilot
who became both the first human to travel into space and the first to orbit the earth
making a 108-minute orbital flight in his Vostok-1 spacecraft -- April 12, 1961
the Soviets kept their program under wraps, announcing each success only after it happened
Americans were shocked and dismayed by yet another defeat in space

AMERICA INVADES CUBA'S BAY OF PIGS

Bay of Pigs Invasion was an unsuccessful action by Cuban exiles from the United States
who were trained by the U.S. Central Intelligence Agency (CIA) to invade southern Cuba
with support and encouragement from the U.S. government
this was an attempt to overthrow the Communist Cuban government of Fidel Castro
Bay of Pigs invasion was launched less than three months
after John F. Kennedy assumed the presidency in the United States -- April 17-19, 1961
main invasion landing took place at a beach located at the mouth of the bay
invading troops immediately came under heavy fire
Cuban airplanes strafed the invaders, sank two escort ships
and destroyed half of the exile's air support
bad weather also hampered the ground force,
which had to work with soggy equipment and insufficient ammunition
Within three days Cuban armed forces, trained and equipped by Eastern Bloc nations
defeated the invading combatants -- some of the exiles escaped to the sea
while the rest were killed or rounded up and imprisoned by Castro's forces
American-trained operatives remained in captivity for twenty months
Disaster at the Bay of Pigs had a lasting impact on the Kennedy Administration
in a negotiated deal, Castro eventually settled on \$53 million worth of baby food and medicine
in exchange for the prisoners
Attorney General Robert F. Kennedy made personal pleas
to pharmaceutical companies and baby food manufacturers for contributions
For the next fifty years relations between Castro's Cuba and the United States remained strained

PRESIDENT KENNEDY IS CONCERNED ABOUT THE U.S. SPACE PROGRAM

President John F. Kennedy sent a memo to Vice President Lyndon B. Johnson asking him to look into the state of America's space program and into programs that could offer the United States the opportunity to catch up (Johnson responded about one week later that the United States needed to do much more he recommended that a piloted moon landing was far enough in the future that it was likely that America could achieve it first

FREEDOM RIDERS DESCEND ON THE SOUTH

To test the U.S. Supreme Court decision in *Bouton v. Virginia* [December 5, 1960] members of the Congress of Racial Equality (CORE) organized the first "Freedom Ride" Civil Rights activists left Washington, D.C. -- May 4, 1961 on a passenger bus bound for New Orleans During this (and other Freedom Rides) activists traveled by bus through the Deep South integrating seating on the bus and desegregating bus terminals including restrooms, restaurants and water fountains That proved to be a dangerous mission one bus was firebombed, forcing its passengers to flee for their lives On other occasions, FBI informants reported that Theophilias Eugene "Bull" Connor who was Birmingham, Alabama's Public Safety Commissioner gave Ku Klux Klan members fifteen minutes to attack an incoming group of freedom riders before having police "protect" them several riders were severely mob violence in Anniston and Birmingham, Alabama temporarily halted the ride Student Nonviolent Coordinating Committee (SNCC) activists from Nashville, Tennessee brought in new riders to Birmingham, Alabama to continue the journey at the Greyhound Bus Station in Montgomery, Alabama a mob charged another bus load of riders, one passenger was knocked unconscious a *Life* Magazine photographer was hit in the face with his own camera a white university student was beaten and his teeth knocked out Freedom riders continued their rides into Jackson, Mississippi arriving -- May 24, 1961 they were arrested for "breaching the peace" by using the "white only" facilities (More freedom rides were organized by many different organizations in excess of 300 Freedom Riders had been jailed in Mississippi by the end of summer)

AMERICA'S PROJECT MERCURY LAUNCHES AN ASTRONAUT INTO SPACE

American naval aviator, test pilot, flag officer, and NASA astronaut Alan Shepard became the second person, and the first American, in space this launch was seen live on television by millions -- May 5, 1961 Shepard was propelled into space by a Redstone rocket aboard the Mercury capsule *Freedom 7* unlike Soviet Cosmonaut Yuri Gagarin's 108-minute orbital flight, Shepard stayed on a suborbital flight trajectory after fifteen-minutes the flight ended in a splashdown in the Atlantic Ocean east of the Bahamas

it was retrieved by the aircraft carrier USS *Lake Champlain*
while Gagarin's flight was strictly automatic, Shepard had some control
over the *Freedom 7* spacecraft -- in particular adjusting his altitude
(Ten years later, at age forty-seven and the oldest astronaut in the program,
Alan Shepard commanded the Apollo XIV Mission [January 31-February 9, 1971]
piloting the "Lunar Lander" to the most accurate landing of the Apollo missions
he became the fifth person to walk on the Moon
during the mission he hit two golf balls on the lunar surface)

PRESIDENT KENNEDY ANNOUNCES THAT AMERICA WILL GO TO MOON

President John F. Kennedy announced before a special joint session of Congress
a dramatic and ambitious goal of sending an American safely to the moon
before the end of the decade -- May 25, 1961

he announced to Congress: **"I believe this nation should commit itself to achieving the goal, before this decade is out, of landing a man on the Moon and returning him safely to Earth. No single space project in this period will be more impressive to mankind, or more important in the long-range exploration of space; and none will be so difficult or expensive to accomplish."**⁴²³

Project Apollo was begun by the National Aeronautics and Space Administration (NASA)
to accomplish the goal

ROUTE OF INTERSTATE-5 THROUGH SEATTLE LEADS TO PROTESTS

Seattle was faced with the dilemma of how to complete Interstate-5⁴²⁴

selection of a route without dividing the city in two was strongly debated and protested
planners could see I-5 would not provide enough capacity to carry people through the city
while slicing through the city's center would destroy
tens of thousands of home and businesses

State and city officials envisioned a freeway master plan

featuring two additional expressways -- one on each side of I-5
that would run north and south the length of Seattle

additional east-west arterials every mile would tie the system into a massive grid

To implement the master plan, the design for the eastern expressway was released to the public

R.H. Thomson Expressway (Reginald Heber Thomson had served as Seattle's city engineer)

R.H. Thomson would run east of the freeway and connect with I-5 in the south at Boeing Field

it would head north (roughly following today's Martin Luther King Jr. Way)

in effect, "cutting a trench" through the middle of Seattle's Central District

and destroying thousands of homes and businesses

its intersections, located only at major arterials, would have created a wall

of traffic and concrete between the Central District and Lake Washington

it would continue along the western shore of Lake Washington (at that time underdeveloped)

toward Lake City Way and the north end of Lake Washington

Washington Park Arboretum would have to be destroyed

⁴²³ President John F. Kennedy Delivered in person before a joint session of Congress May 25, 1961.

⁴²⁴ *Jeff Stevens, Hit the Highway, Freeway.* Radical Seattle Remembers.com, 2010.

in addition to arterial crossings every mile,
major interchanges would be constructed at I-90 and the 520 bridge
First Hill Improvement Association complained about the "open ditch" 1961
and tried to get the freeway covered with a park
approximately 100 people marched along the freeway route with a police escort
in support of a lid -- June 5, 1961

HOOD CANAL FLOATING BRIDGE CONNECTS THE OLYMPIC AND KITSAP PENINSULAS

Depth of the water made construction of support columns prohibitively expensive
salt water and tidal flow complicated the problems facing engineers in building this bridge
Design and planning process for the Hood Canal Bridge took nearly a decade
some engineers questioned the use of floating pontoons on salt water
especially where tide fluctuations varied as much as eighteen feet
others saw the funneling effect of the Hood Canal water flow
might magnify the intensity of winds and tides
Pontoons for the bridge were fabricated in Seattle -- during fabrication two of the pontoons sank
when they were towed into place and anchored, sea conditions in the Hood Canal were too severe
pontoons were moved to a nearby bay until a better method of attaching could be devised
Architects and the contractor decided the design was faulty
a new contractor was hired and the design modified -- his system seemed to work
World's only floating bridge on salt water carried Washington State Route 104 across Hood Canal
at 7,869 feet it is the longest floating bridge in the world on a saltwater tidal basin
it was the second floating bridge ever to be constructed and opened -- August 12, 1961
Hood Canal Floating Bridge became a vital link for local residents, commuters, freight haulers,
and recreational travelers
it has had a major impact on economic development in eastern Jefferson County
(Hood Canal Floating Bridge was officially named in honor of William A. Bugge [July 12, 1977]
he was appointed Director of the Washington State Department of Highways [January 1949]
and had been a leader in the planning and construction of the bridge)

CONSTRUCTION BEGINS ON THE SECOND LOWER SNAKE RIVER PROJECT

Lower Monumental Dam Project was the second dam of Columbia River Basin system
after the Ice Harbor Dam Project [1955-1961]
Lower Monumental Dam is located six miles south of the town of Kahlotus, Washington
Construction began at the head of Lake Sacajawea -- June 1961
Lower Monumental Dam features eight spillway gates
its power house contained three generators were completed [1969]
with an additional three generators finished [1981]
Lake Herbert G. West extends twenty-eight miles upriver to the base of Little Goose Dam
single-lift navigation lock is eighty-six feet wide and 666 feet long

JOHN KENNEDY AGAIN ANNOUNCES HIS COMMITMENT TO GO TO THE MOON

In a speech at Rice University in Houston, Texas regarding the America's Space Effort
President John F. Kennedy said -- September 12, 1961

“We choose to go to the moon. We choose to go to the moon, we choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard, because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one which we intend to win, and the others, too.”⁴²⁵

LOCAL HERO FRED HUTCHINSON MANAGES IN THE WORLD SERIES

Fred Hutchinson faced a crucial season -- 1961

his Cincinnati Reds were projected as a second division team lagging well behind
defending world champion Pittsburgh Pirates, the [1959] champion Los Angeles Dodgers
and strong San Francisco Giants, St. Louis Cardinals and Milwaukee Braves teams

Cincinnati Reds were led by National League Most Valuable Player Frank Robinson
and a rapidly maturing Vada Pinson -- both stunned the league

Fred Hutchinson made his second trip to the World Series

(his first trip had been as a pitcher for the Detroit Tigers [1940])

Hutch's Reds fell to a New York Yankee team featuring right fielder Roger Maris,
pitcher Whitey Ford and switch-hitting center fielder Mickey Mantle

(who won the [1965] Fred Hutchinson Award as the major league baseball player
who best exemplified Hutch's honor, courage and dedication on and off the field)

SNCC BEGINS REGISTERING BLACK VOTERS IN THE SOUTH

Student Nonviolent Coordinating Committee (SNCC) leaders organized community groups
to capture a share of political power in Mississippi -- fall 1961

their efforts were met with violence by state and local lawmen, and the Ku Klux Klan
beatings, hundreds of arrests and even the murder of a protestor were the result

PUBLIC SYMPATHY TURNS TOWARD THE FREEDOM RIDERS

Public support for the freedom riders led the Kennedy administration to order

the Interstate Commerce Commission to issue a new desegregation order -- November 1, 1961

passengers were permitted to sit wherever they chose on the bus

“white” and “colored” signs came down in bus terminals

separate drinking fountains, toilets, and waiting rooms were consolidated

lunch counters began serving people regardless of skin color

EXEMPTION FROM JURY DUTY FOR WOMEN IS UPHOLD NATIONALLY

Difficulties with equal representation of men and women on juries

was taken up -- November 20, 1961

“by the United States Supreme Court in *Hoyt v. Florida* where a woman accused of murdering her philandering husband with a baseball bat pleaded temporary insanity. Mrs. Hoyt's attorneys believed that the gender-charged facts of the case made female jurors particularly

⁴²⁵ Amy Stamm, “We Choose to Go to the Moon and Other Apollo Speeches,” Smithsonian National Air and Space Museum, July 17, 2019.

important, but the Florida jury statute summoned men for duty while calling only those few women who had affirmatively opted in. The result was an all-male jury, but the Supreme Court was untroubled. “Despite the enlightened emancipation of women,” said the Court, “woman is still regarded as the center of home and family life.” As a result, “a State, acting in pursuit of the general welfare, [may legitimately] conclude that a woman should be relieved from the civic duty of jury service unless she herself determines that such service is consistent with her own special responsibilities.”⁴²⁶

PRESIDENT JOHN KENNEDY DELIVERS A MAJOR POLICY SPEECH

U.S. Senator Warren G. Magnuson had served in Congress for twenty-five years

President Kennedy arrived in Seattle to celebrate the anniversary -- November 16, 1961

Democratic Governor Albert Rosellini rode in an open convertible in a twenty-car

presidential motorcade that left from Boeing Field down Seattle 's 4th Avenue

along a fifteen-block long “Welcome Lane” from Jefferson Street to Stewart Street

where spectators overflowed the streets and threw confetti from buildings

twenty-six different bands welcomed the president

Kennedy’s presidential caravan arrived at the University of Washington’s Hec Edmundson Pavilion

(now Alaska Airlines Arena) to give his speech -- November 16

United States and the Soviet Union were at the height of the Cold War struggle:

- United States Central Intelligence Agency (CIA) had organized 1,400 armed Cuban exiles in a failed attempt to invade Cuba at the Bay of Pigs [April 1961]

Cuban President Fidel Castro responded by publicly aligning Cuba with the Soviet Union;

- East Germany had constructed a five-foot-high concrete wall

dividing Berlin into Eastern and Western sectors [August 20, 1961]

“Checkpoint Charlie” was the only passage connecting the two parts of the city;

- at the wall American and Soviet tanks confronted each other at Checkpoint Charlie for sixteen hours [October 28, 1961];

- Soviet Union began conducting aboveground nuclear tests

detonating perhaps fifteen bombs [during September 1961]

United States responded with underground nuclear tests of its own;

Soviets detonated a 50-megaton H-bomb [end of October]

local newspapers advised Seattleites how to construct and stock

personal nuclear fallout shelters

Two separate groups of protestors demonstrated on campus

but they were probably not seen by the president

about twenty University of Washington students and residents picketed

to keep the United States out of Cuba

they held signs that read: “FAIR PLAY FOR CUBA,”

“NO MORE SUGAR TRUST INVASIONS,”

and “DON'T FIGHT FOR UNITED FRUIT”

another group of about seventy-five who called themselves “Women Marching for Peace,”

⁴²⁶ Aaron H. Caplan, “The History of Women’s Jury Service in Washington,” *Washington State Bar News*, March 2005, P. 20.

many pushing baby buggies, picketed near Hec Edmundson Pavilion carrying signs that read:
“PEACE FOR OUR CHILDREN,” “MAN MUST PUT AN END TO WAR,”
“END NUCLEAR TESTS NOW” and
“MR. PRESIDENT, PLEASE STOP NUCLEAR TESTING”

both groups handed out leaflets

This was President Kennedy’s first policy speech delivered on the West Coast since his inauguration

The New York Times reported the address noting, in part: **“Regents, members of the faculty, students, ladies and gentlemen: It is a great honor on behalf of the people of the United States to extend to you congratulations on the centennial anniversary of this University which represents 100 years of service to this state and country. This University was founded when the Civil War was already on, and no one could be sure in 1861 whether this country would survive. But the picture which the student of 1961 has of the world, and indeed which our citizens have of the world, is infinitely more complicated and infinitely more dangerous. In 1961 the world relations of this country have become tangled and complex.**

“One of our former allies has become our adversary and he has his own adversaries who are not our allies. We must work with certain countries lacking in freedom in order to strengthen the cause of freedom. [Note: This is a reference the Soviet Union, which was an American ally during World War II, and the American policy of supporting autocratic anti-Soviet regimes.]

“We find some who call themselves neutral who are our friends and sympathetic to us, and others who call themselves neutral who are unremittingly hostile to us. We cannot, as a free nation, compete with our adversaries in tactics of terror, assassination, false promises, counterfeit mobs, and crises. We cannot, under the scrutiny of a free press and public, tell different stories to different audiences, foreign and domestic, friendly and hostile. We cannot abandon the slow process of consulting with our allies to match the swift expediciencies of those who merely dictate to their satellites. ... We possess weapons of tremendous power, but they are least effective in combating the weapons most often used by freedom’s foes: subversion, infiltration, guerilla warfare, and civil disorder. We can send arms to other peoples just as we can send them the ideals of democracy in which we believe. But we cannot send them the will to use those arms or to abide by those ideals.

“In short, we must face problems which do not lend themselves to easy or quick or permanent solutions. And we must face the fact that the United States is neither omnipotent nor omniscient -- that we are only 6 per cent of the world’s population and that we cannot impose our will upon the other 94 per cent of mankind -- that we cannot right every wrong or reverse each adversity, and that, therefore, there cannot be an American solution to every world problem.

“These burdens and frustrations are accepted by most Americans with maturity and understanding. They may long for the days ... when the atomic bomb was ours alone, or when much of the industrialized world depended upon our economic resources and aid. But they know that those days are gone, and that gone with them are the old policies and the old complacency. ...

“...[T]here are others who cannot bear the burden of a long twilight struggle [and] lack confidence in our long run capacity to survive and succeed. ... There are two groups of these frustrated citizens, far apart in their views yet very much alike in their approach.

“On the one hand are those who urge upon us what I regard to be the pathway of surrender -- appeasing our enemies, compromising our commitments, purchasing peace at any price, disavowing our arms, our friends, our obligations. If their view had prevailed, the world of free choice would be smaller today.

“On the other hand are those who urge upon us what I regard to be the pathway of war: equating negotiations with appeasement and substituting rigidity for firmness. If their view had prevailed, we would be at war today, and in more than one place.

“It is a curious fact that each of these extreme opposites resembles the other. Each believes that we have only two choices: appeasement or war, suicide or surrender, humiliation or holocaust, to be either Red or dead. ...

“The essential fact that both of these groups fail to grasp is that diplomacy and defense are not substitutes for one another. Either alone would fail. A willingness to resist force, unaccompanied by a willingness to talk, could provoke belligerence -- while a willingness to talk, unaccompanied by a willingness to resist force, could invite disaster.

“But as long as we know what comprises our vital interests and our long-range goals, we have nothing to fear from negotiations at the appropriate time, and nothing to gain by refusing to take part in them. At a time when a single clash could escalate overnight into a holocaust of mushroom clouds, a great power does not prove its firmness by leaving the task of exploring the other's intentions to sentries or those without full responsibility.

“Nor can ultimate weapons rightfully be employed, or the ultimate sacrifice rightfully demanded of our citizens, until every reasonable solution has been explored. ‘How many wars,’ Winston Churchill has written, ‘have been averted by patience and persisting good will! How many wars have been precipitated by firebrands!’

“If vital interests under duress can be preserved by peaceful means, negotiations will find that out. If our adversary will accept nothing less than a concession of our rights, negotiation will find that out. With respect to any future talks on Germany and Berlin, for example, we cannot, on the one hand, confine our proposals to a list of concessions that we are willing to make. Nor can we, on the other hand, advance any proposals which compromise the security of free Germans and West Berliners, or endanger their ties with the West.

“No one should be under the illusion that negotiations for the sake of negotiations always advance the cause of peace -- If they are made a mere forum for propaganda or a cover for aggression, the processes of peace have been abused.

“But it is a test of our national maturity to accept the fact that negotiations are not a contest spelling victory or defeat. They may succeed, they may fail. But, they are likely to be successful only if both sides reach an agreement which both regard as preferable to the status quo, and agreement in which each side can consider that its own situation has been improved, and this is most difficult to obtain.

“But, while we shall negotiate freely, we will never negotiate freedom. ... [F]or the first time since the ancient battles between Greek city-states, war entails the threat of total annihilation of everything we know, of society itself. For to save mankind's future freedom, we must face up to any risk that is necessary. We will always seek peace -- but we will never surrender.

“In short, we are neither ‘warmongers’ nor ‘appeasers,’ neither ‘hard’ nor ‘soft.’ We are Americans, determined to defend the frontiers of freedom, by an honorable peace if peace is possible, but by arms if arms are used against us.

“And if we are to move forward in that spirit, we shall need all the calm and thoughtful citizens that this great University can produce, all the light that they can shed, all the wisdom that they can bring to bear. It is customary, both here and around the world, to regard life in these United States as easy. Our advantages are many. But more than any other people on earth, we bear

burdens and accept risks unprecedented in their size and their duration, not for ourselves alone but for all who wish to be free. No other generation of free men in any country has ever faced so many and so difficult challenges -- not even those who lived in the dark days of 1861 when this great University was founded.

“This nation was then torn by war. This territory had only the simplest elements of civilization. And this city had barely begun to function. But a university was one of their earliest thoughts -- and they summed it up in the motto that they adopted [for the University of Washington]: ‘Let There be Light.’ What more can be said today, regarding all the dark and tangled problems that we face than, ‘Let there be light.’ And to accomplish that illumination, the University of Washington shall hold high the torch.” (*The New York Times*, [November 17, 1961])

PROJECT MERCURY LAUNCHES A FOURTH MONKEY INTO THE ATMOSPHERE

Enos, a chimpanzee, was launched into a two-orbit flight aboard a Mercury-Atlas-5 rocket
his trip into space lasted three hours twenty minutes and fifty-nine seconds -- November 29, 1961
Enos was originally scheduled to complete three orbits, but he was brought back after the second orbit because the spacecraft was not maintaining proper attitude
According to observers, Enos, jumped for joy and ran around the deck of the recovery ship enthusiastically shaking the hands of his rescuers
Enos’s flight was a full dress rehearsal for the next Mercury effort -- a manned launch

NATIVE AMERICANS ARRESTED FOR ILLEGAL FISHING ON THE NISQUALLY RIVER

Three Nisqually Indians, Raleigh Kover, Jack Simmons and Ernest Gleason, Sr., were arrested along with other Indians for fishing steelhead with nets on the Nisqually River -- January 6, 1962
Kover, Simmons and Gleason were sentenced to thirty days in the county jail, suspended on condition they refrain from illegal fishing (using nets) for a period of three years
Melvin Iyall, a Nisqually Indian, and four other Indians were arrested -- January 1962 for allegedly fishing without the sanction of the [1855] Medicine Creek Treaty
Iyall sued and asked for a judgment of \$156,000 from five state officials
Fishing rights controversy centered on who held fishing rights under century-old Indian treaties

AMERICA’S PROJECT GEMINI BEGINS

U.S. civilian space agency, National Aeronautics and Space Administration (NASA), established Project Gemini (named after its two-man crew) to develop space travel techniques in support of the goal of landing on moon -- January 3, 1962
this was the second phase of America’s space exploration program after Project Mercury
Gemini achieved missions long enough for a trip to the Moon and back, it perfected extra-vehicular activity (working outside a spacecraft) and orbital maneuvers necessary to achieve rendezvous and docking with another vehicle
(All ten manned Gemini flights between [1965] and [1966] were launched from Cape Canaveral [Cape Kennedy], Florida using the Titan II launch vehicle)

CONFLICT IN VIETNAM ESCALATES

U.S. helicopters flown by U.S. Army pilots ferry 1,000 South Vietnamese soldiers

to sweep a Vietcong stronghold near Saigon -- January 12, 1962
This was America's first combat mission against the Vietcong

U.S. GOVERNMENT WORKERS ARE GRANTED THE RIGHT TO ORGANIZE COLLECTIVELY

President John Kennedy signed Executive Order #10988 giving government workers
the right to bargain collectively with their employers
this order set Washington State teachers to work organizing to negotiate contracts
with their local school district employers -- January 17, 1962

AMERICA ESCALATES IT'S EFFORT IN VIETNAM

Operation "Ranchhand" was implemented to clear vegetation alongside Vietnamese roads
making it more difficult for the Vietcong to conceal themselves for ambushes
As the war continues, the scope of Ranchhand increased
vast tracts of forest were sprayed with the herbicide "Agent Orange"
containing the deadly chemical Dioxin developed by Dow Chemical Company
Vietcong guerrilla trails and base areas were exposed
and crops that might feed Vietcong units were destroyed

MISSISSIPPI CIVIL RIGHT ACTIVISTS UNITE

Opposition to black voter registration was so intense in Mississippi that Civil Rights activists
decided they had to unite to achieve any success
Representatives of Student Nonviolent Coordinating Committee (SNCC),
Congress of Racial Equality (CORE)
and the National Association for the Advancement of Colored People (NAACP)
formed the Council of Federated Organizations (COFO) -- February 1962

JOHN GLENN BECOMES THE FIRST AMERICAN TO ORBIT THE EARTH

An Atlas launch vehicle propelled a Mercury spacecraft, *Friendship 7*
into Earth orbit -- 7:47 a.m. (Pacific Time) February 20, 1962
Astronaut John H. Glenn, Jr., became the first American to orbit Earth
he journeyed around the planet three times in 4 hours, 55 minutes, and 23 seconds
During the flight only two major problems were encountered:
•apparently a steering jet clogged forcing Glenn to abandon the automatic control system
and manually fly the mission using the electrical "fly-by-wire" system;
a signal (later found to be false) from a faulty switch in the heat shield circuit indicated
the clamp holding the shield had been prematurely released thus during re-entry the retro-pack
(braking system) was not jettisoned but remained attached to the space vehicle
as a safety measure to hold the heat shield in place in the event it had loosened
Friendship 7 was recovered by the destroyer USS *Noa*
800 miles southeast of Bermuda -- 1:43 p.m. (Pacific Time) February 20, 1962
lookouts on the destroyer sighted the main parachute at an altitude of 5,000 feet
Noa had the spacecraft aboard twenty-one minutes after landing
astronaut John Glenn remained in the spacecraft during pickup
John Glenn was an immediate hero in America

SEATTLE PHYSICIAN PERFECTS THE HEART DEFIBRILLATOR

Seattle cardiovascular surgeon Dr. Karl William Edmark between [1959] and 1962 perfected a heart defibrillator that delivered an electrical shock to a fibrillating heart (one that has stopped pumping blood and is in spasm) if this spasm cannot be stopped the person dies within three or four minutes Edmark's key contribution was to construct a direct current (rather than alternating current) defibrillator which was much more effective and much safer this device has been described as **“perhaps the most dramatic medical innovation to emerge from the Northwest”**⁴²⁷

PREHISTORIC REMAINS ARE DISCOVERED IN EASTERN WASHINGTON⁴²⁸

Archeological interest in several caves and rockshelters in the cliffs above the Palouse River began when rancher John McGregor of Hooper, Washington, invited WSU archeologist Dr. Richard Daugherty to investigate the area near the confluence of the Palouse and Snake rivers [1952] although the site was described as “productive,” funding was not available for further research the area remained uninvestigated To complicate matters, construction of Lower Monumental Dam began [1961] Dr. Daugherty and his colleagues at WSU received a modest federal grant to survey the archeological resources in the Palouse River Canyon one of the areas to be flooded by the dam --1962 while tents were being set up for the excavation team, Dr. Daugherty took two students on a field trip to look at a rockshelter on a nearby ranch owned by Roland J. Marmes What became known as the Marmes Rockshelter was obviously a rich archeological site this rockshelter was basically an alcove, forty feet wide and twenty-five feet deep located beneath an overhanging ledge of basalt researchers theorized that humans first discovered it while on foraging expeditions not long after the last great Ice Age (110,000 to 10,000 years ago) finished carving out the scablands of Eastern Washington evidence of consistent human use over thousands of years suggested the rockshelter was a “tethered” site: a regional base that people returned to regularly In the first season of excavation, the researchers found numerous storage pits in the shelter, some lined with fragments of mats made from grasses or reeds cool temperatures and consistent humidity made the shelter useful as a cache for food numerous traces of plant foods and animal bones suggested access to abundant food relatively few fish bones were recovered perhaps because of the limits of the methods used by the excavators, or perhaps because fish runs had not yet recovered from the muddy waters of the Ice Age By the end of the first season, the researchers had also found the partial skeletons

⁴²⁷ Priscilla Long, *Seattle physician Karl William Edmark perfects heart defibrillator between 1959 and 1962*, HistoryLink.org, Essay 2005, October 1, 1999.

⁴²⁸ Cassandra Tate, *Marmes Rockshelter*, HistoryLink.org, Essay 7970, October 5, 2006.

of eleven individuals including three (two adults and an infant)
that were located in a strata of earth that had been covered by a layer of ash
produced by the eruption and collapse of prehistoric Mount Mazama in southern Oregon
more than 6,500 years ago
radiocarbon dating of shells and other organic material found next to these remains
indicated that they were about 8,000 years old
among the oldest found up to that point anywhere in the West

UNITED CIVIL RIGHTS ACTIVISTS BEGIN REGISTERING VOTERS IN MISSISSIPPI

Historically, voting registrars used a literacy test to keep blacks off the voting roles
by creating standards that even highly educated people could not meet
Council of Federated Organizations (COFO) began a voter registration drive
in the Mississippi Delta region -- spring 1962
in response, employers fired blacks who tried to register
and landlords evicted them from their homes
At McComb, Mississippi their efforts were met with fierce opposition
arrests, beatings, shootings, arson and murder
but even so, the voter registration campaign spread across the state
Similar voter registration campaigns were begun with similar responses
in Louisiana, Alabama, Georgia and South Carolina

HOWARD A. HANSON DAM PROTECTS THE GREEN RIVER VALLEY FROM FLOODING

Howard A. Hanson Dam was formally dedicated -- May 12, 1962
this dam was named for Seattle attorney and state legislator Howard A. Hanson
who campaigned long and hard for the project.
Howard A. Hanson Dam brought an end to major flooding events in the Green River Valley

DAVE BECK APPEALS HIS FEDERAL CONVICTION

U.S. Ninth Circuit Court of Appeals in San Francisco
heard Dave Beck's appeal of his federal and state convictions income tax evasion
Beck argued in the case of the union-owned Cadillac
it was a matter of misunderstanding and clerical error which had been corrected
Federal Court of Appeals upheld the guilty verdict -- May 14, 1962
however, the court did cut his prison sentence in half
state authorities allowed Beck to serve his state sentence concurrently with his federal sentence

UNIVERSITY OF WASHINGTON AGAIN IMPOSES A LOYALTY OATH

After seven years of complicated legal maneuvering in state and federal courts [1955-1962]
U.S. Supreme Court dismissed the case challenging loyalty oaths and dissolved the injunction
thus permitting state agencies to require their employees sign a loyalty oath
University Board of Regents announced --May 1962
that all employees were required to sign the oath by [October 1, 1962]
those who did not would be dismissed as of [October 31, 1962]
teaching faculty were also required to sign an additional oath, based on a [1931] state statute

that was applicable to all teachers who must swear to “**support the constitution and laws of the United States of America and of the state of Washington, and ... by precept and example promote respect for the flag and the institutions of the United States of America and the state of Washington, reverence for law and order, and undivided allegiance to the government of the United States.**”⁴²⁹

REQUIREMENT TO SIGN A LOYALTY OATH AGAIN GOES TO COURT

In response to the University Board of Regents’ newest loyalty oath requirement, the Washington American Civil Liberties Union (ACLU) and the UW chapter of the American Association of University Professors brought a new lawsuit in federal district court that challenged loyalty oaths -- June 6, 1962 this was brought as a class action in which more than sixty UW faculty members, staff and students eventually joined as plaintiffs defendants in the case were members of the University of Washington Board of Regents, University President Charles E. Odegaard and Washington State Attorney General John J. O’Connell

This case became known as *Baggett v. Bullitt*

because the first named plaintiff was mathematics professor Lawrence W. Baggett, and the first named defendant was Board of Regents member Dorothy Bullitt the well-known Seattle civic and business leader who founded and ran King Broadcasting Company among other faculty members challenging the oath were University of Washington professors Howard Nostrand and Max Savelle, (who had brought an earlier challenge regarding the requirement to sign an “**I am not a subversive person**” oath [1955]) historian Giovanni Costigan, geographer Rhoads Murphey, and philosophy professor Melvin Rader who was president of the Washington ACLU chapter [1961]-1962 (Rader earlier had successfully fought the Washington Legislature’s Fact-finding Committee on Un-American Activities (also known as the Canwell Committee [1949])

Because of the *Baggett v. Bullitt* law suit, no oaths were required and no employees were dismissed even after the [October 31, 1962] deadline to sign the loyalty oath had passed

DAVE BECK ENTERS FEDERAL PRISON ON McNEIL ISLAND

Dave Beck entered prison -- June 20, 1962
Beck said to reporters waiting with him in Steilacoom for the ferry to McNeil Island’s penitentiary

⁴²⁹ Kit Oldham, *U.S. Supreme Court strikes down loyalty oaths for Washington state employees on June 1, 1964*, HistoryLink.org, Essay 5200, February 14, 2003.

“What was it General MacArthur said at Corregidor? ‘I’ll be back.’ Well, that goes for me, too. You don’t have to fall down just because you’ve been knocked down. What matters is, do you get up again?”⁴³⁰

During his time in prison he worked as an apple canner and wrote his memoirs
his wife, Dorothy, died while he was serving his sentence

WITCH HUNTS FOR COMMUNISTS IN AMERICA COMES TO AN END

Private loyalty-review boards and anti-Communist investigators were held financially accountable
for personal losses due to the investigation

One victim of Hollywood Blacklisting carried out under McCarthyism was John Henry Fault
who was the host of a CBS afternoon radio comedy show and was a leftist activist for his union
the American Federation of Television and Radio Artists

John Henry Fault was investigated by AWARE, Inc.,

one of the private firms that examined individuals for signs of Communist “disloyalty”

Fault was found by AWARE to be unfit -- he was fired by CBS Radio

John Henry Faulk decided to sue AWARE [1957]

U.S. Supreme Court decided in favor of John Fault: *John Henry Fault v. Aware Inc.* -- June 28, 1962

this ruling made private Blacklisters and those who used their services

legally liable for the professional and financial damage they caused

although some informal blacklisting continued,

private “loyalty checking” agencies soon were a thing of the past

SEATTLE SCHOOL DISTRICT IS SUED FOR RACIAL DISCRIMINATION

Seattle’s population was racially divided with the Lake Washington Ship Canal as the dividing line
north the Ship Canal was primarily white

south of the line was primarily African American

for example, fifty-one percent of the students in Garfield High School were black [1961]

compared to 5.3 percent of the students in the district as a whole⁴³¹

National Association for the Advancement of Colored People (NAACP) filed suit
against the Seattle School Board --1962

in an effort to achieve the racial balance demanded by U.S. Supreme Court

in *Brown v Board of Education* [1955])

(NAACP’s lawsuit was settled out of court [1963] when the School Board adopted a program

to allow students to voluntarily transfer from one school to another to ease racial imbalances)

DISCRIMINATION IN SEATTLE IS BROUGHT TO THE CITY GOVERNMENT’S ATTENTION

Seattle Mayor Gordon S. Clinton appointed a Citizen’s Advisory Committee on Minority Housing
committee members recommended a city ordinance to prohibit discrimination

they also recommended the creation of a twelve-member human rights commission

to carry out that mission -- July 1962

(Mayor Clinton and the Seattle City Council delayed action on the recommendations for a year)

⁴³⁰ Ross Reider, *Beck, Dave (1894-1993), Labor Leader*, HistoryLink.org, Essay 2972, February 14, 2001.

⁴³¹ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002.

REPEAL OF ALIEN LAND OWNERSHIP RESTRICTIONS EFFORTS ARE AGAIN ORGANIZED

After the initial effort to change the state's constitution to remove alien land ownership restrictions ended in defeat at the polls by Washington voters [November 8, 1960]

an education program for the voters was undertaken to explain the need for change
in addition, a letter campaign targeting European consulates, especially Scandinavians, noted:
“It is certain that many of these Scandinavians, probably several thousand, have bought their own homes or other property, in good faith, without realizing that they have done so in technical violation of the land law, and thus in all probability have a faulty title to their property.”⁴³²

U.S. Senator Warren Magnuson added his support to the measure in a speech to Congress
in opposition to the alien land laws, he said, **“We are aware of the warning by the late (U.S. Supreme Court) Justice Robert H. Jackson that discriminatory laws are ‘like a loaded weapon ready for the hand of any authority that can bring forward a plausible claim of an urgent need.’ In other words, so long as there is legal sanction...in another time of hysteria and hate it may be used as the pattern for discrimination against an American minority. No American can be secure in his civil rights so long as legal justification for bigotry remains in the statutes.”**⁴³³

SOVIET NUCLEAR MISSILES ARE SENT TO COMMUNIST CUBA

Soviet Union dispatched a fleet of commercial cargo ships
filled with nuclear missiles, launchers and anti-aircraft guns, all under false manifests,
across the Atlantic Ocean to Fidel Castro's Cuba ninety miles from Florida -- summer 1962
forty thousand Soviet soldiers and technicians began clandestinely erecting an extensive array
of armed missile sites aiming their nuclear-tipped medium range ballistic missiles at the U.S.
Soviet Premier Nikita Khrushchev and his key military advisors
thought that missiles would remain unnoticed (until November)
when he planned to suddenly reveal them to the United States as an unalterable fact
this plans was nearly successful
Concerned the Soviets might attempt to introduce offensive weapons into Cuba
U.S. surveillance of the heavy volume of Russian shipping bound for Cuba
led to increased U-2 spy plane overflights
First photographic proof of surface-to-air missile use in Cuba was obtained -- August 29, 1962
which showed a cruise missile launch site that could be used against invading forces

STATE REPRESENTATIVE JOHN GOLDMARK'S REELECTION BID ENDS IN DEFEAT

Politics in Okanogan County heated up -- especially for a Democrat in Republican country⁴³⁴

John Goldmark, seeking his fourth term in the State House of Representatives,
was attacked by the *Tonasket Tribune*, a small town far-right newspaper
whose masthead banner proclaimed:

“THIS IS A REPUBLIC, NOT A DEMOCRACY—LET'S KEEP IT THAT WAY!”

Ashley Holden, editor and publisher of the *Tonasket Tribune*,

⁴³² William Mambu, Seattle JACL letter to Consulates and Other Foreign Government representatives in Seattle.

⁴³³ Warren Magnuson, “Proceedings and Debates of the 86th Congress, Second Session,” UW Special Collections.

⁴³⁴ Jim Kershner, *Goldmark, John E. (1917-1979)*, HistoryLink.org, Essay 9858, July 22, 2011.

was a decades-long opponent of public utility districts
and a supporter of the Washington Water Power Company
a private utility company being replaced by new Public Utility Districts (PUDs)
Holden railed against John and Sally Goldmark in a series of publications entitled *The Vigilante*
one article was titled *Irma Ringe and the Washington State Legislature*
was co-written by Ashley Holden and Albert Canwell,
former chairman of the State Un-American Activities Committee,
it talked about the wife of a state legislator with a **“startling past”** as a Communist ⁴³⁵
although the legislator remained unnamed, many people knew
that Irma Ringe was actually the maiden name of Sally Goldmark

Holden next wrote a *Tonasket Tribune* editorial that called Goldmark **“a tool of a monstrous conspiracy to remake America into a totalitarian state which would throttle freedom and crush individual initiative”**⁴³⁶

he continued in that vein as he noted John Goldmark was **“the idol of the Pinkos and ultra-liberals who infest every session of the legislature”**⁴³⁷

After the rightwing attack against his wife as a Communist
State Representative John Goldmark was defeated in the Democratic primary election
by a three-to-one margin -- September 1962
Democrats in the state were shocked and John Goldmark was irate

SOVIET THREAT IN CUBA IS ADDRESSED BY PRESIDENT KENNEDY

President John Kennedy held a press conference -- September 13, 1962

“I have a preliminary statement.... There has been a great deal of talk on the situation in Cuba in recent days both in the Communist camp and in our own, and I would like to take this opportunity to set the matter in perspective....

“...If Cuba should ever attempt to export its aggressive purposes by force or the threat of force against any nation in this hemisphere, or become an offensive military base of significant capacity for the Soviet Union, then this country will do whatever must be done to protect its own security and that of its allies.

“We shall be alert, too, and fully capable of dealing swiftly with any such development. As President and Commander in Chief I have full authority now to take such action, and I have asked the Congress to authorize me to call up reserve forces should this or any other crisis make it necessary.”⁴³⁸

CONGRESS ACTS TO EMPOWER THE PRESIDENT

U.S. Senate voted eighty-six to one to sanction the use of force, if necessary, **“to prevent the creation or use of an externally supported offensive military capability endangering the security of the U.S.”**

Six days later the U.S. House of Representatives passed this same resolution

by a vote of 384 to seven -- September 27, 1962

COLUMBUS DAY WINDSTORM HITS THE PUGET SOUND REGION⁴³⁹

Columbus Day storm began its path as Typhoon Freda which formed in [late September 1962] as it traveled to the Northeast it regenerated and picked up speed in the South Pacific it weakened into an extratropical storm near the Aleutian Islands

before it veered south toward the U.S West coast

Columbus Day storm peaked on [October 5]

no other climatological event of this size and intensity had ever occurred before in the written history of the Pacific Northwest -- and none has since

California was hit by the storm -- October 11, 1962

game six of the World Series being played in San Francisco's Candlestick Park was delayed power was knocked out along the entire northern coast of the state, giant redwood trees toppled from the forces of the winds before leaving the state, the storm killed seventeen people

Oregon was hit hard as wind gusts at Cape Blanco were clocked at close to 150 miles per hour, two section of Pacific High School to be torn away in nearby Port Orford

in Corvallis winds destroyed the anemometer and the weather station began to rip apart

Portland was hit by wind measured at over 120 miles per hour falling trees, power and phone lines gusts blew windows out of buildings and tore the roofs off homes wood, glass and other chunks of debris flew everywhere

As the storm entered Washington, wind gusts were clocked at 175 miles per hour -- October 12, 1962

four people died in Vancouver, two from falling trees and two others from heart attacks

100 mile per hour winds hit along the Washington coast

in Longview, sixteen people were injured by flying debris, and the city's civic center collapsed

Storm reached Olympia shortly after 6:00 p.m.

on the Capitol grounds, the historic George Washington elm,

grown from a cutting from the original George Washington tree, uprooted and fell

two people were killed in Yelm by a falling tree

one man died in Milton when he touched a downed power line

Tacoma lost power in virtually every part of the city -- streets were blocked by falling trees

Along Highway 99 between Tacoma and Seattle billboards lay broken and trees lay in the road lights went out at Sea-Tac Airport

Ferry runs were cancelled on Puget Sound

as smaller vessels raced through choppy waters looking for moorage

Seattle was hit by the center of the storm around 7:00 p.m.

Seattle World's Fair officials closed the Coliseum worried the glass windows might blow out throughout the fairgrounds, loudspeakers blared

that winds up to eighty miles per hour were expected shortly

Space Needle closed the lines for the elevators

but diners in the Eye of the Needle Restaurant were allowed to finish their meals

⁴³⁹ Alan J. Stein, *Columbus Day windstorm ravages Puget Sound region on October 12, 1962*, HistoryLink.org, Essay 5325, August 5, 2012.

Science Pavilion's Gothic spires swayed noticeably
Around the fairgrounds, trees snapped, banners ripped, signs were torn apart
people began leaving the fairgrounds, many using their umbrellas
to protect their faces from flying debris
some decided to stay and flocked to the Food Circus
where they listened to weather reports on their transistor radios
officials closed the exposition -- 9:15 p.m.
but allowed those in the Food Circus to stay if they lived south of Seattle,
where storm damage was worse
although power outages were being reported throughout Seattle, the lights at the fair stayed on
Columbus Day Storm continued to devastate the region
communities east of Lake Washington were plunged into darkness
grandstand at Issaquah's Memorial Stadium lost its roof
near North Bend a Puget Sound Power and Light meter reader was killed
when a tree fell on the truck
As the storm moved north, the winds abated slightly but were no less deadly
in Snohomish County a worker at the Sultan Dam was killed by a falling tree
eighty mile per hour gusts were measured in Bellingham
before the storm moved into British Columbia where it killed five people
Clean-up from the storm started the next day
Oregon suffered the greatest hardship with initial damages estimates of over \$150 million
more than 150 families lost homes, and more than one billion board-feet of lumber toppled
fourteen people in Oregon lost their lives, mostly from falling trees and flying debris
in Washington, Pacific Northwest Bell reported that west of the Cascade Mountains
36,000 telephones out of service
train service between Seattle and Portland was delayed
until fallen trees could be removed from the tracks
electrical crews spent days restoring power to nine Western Washington counties
Columbus Day Storm of 1962 was the most powerful windstorm to hit the West coast
in modern times -- more than fifty people were killed in storm-related events
damage costs went into the hundreds of millions of dollars

THE MOST DANGEROUS TWO WEEKS IN HISTORY

While Soviet tankers were en route to Cuba, American U-2 spy planes and CIA photo analysts
detected several Medium Range Ballistic Missiles on Cuban soil
it was noted the sites for these nuclear missiles were still under construction
through the first three weeks of October Congress demanded President Kennedy act
In the weeks that followed, both nations stood at the brink of nuclear holocaust
never before in history has the world come closer to a general nuclear war

PRESIDENT KENNEDY CONVENES A GROUP OF ADVISORS

President Kennedy demanded that Cuba be completely covered by U-2 photography,
seven additional missile sites are found -- October 18, 1962
Several courses of action are discussed by the president and his advisors:

- Do Nothing: JFK felt that this would risk our alliances and our country in the long term;
- Diplomatic Pressures: Proposed a secret ultimatum to Khrushchev;
(this was quickly considered to be too belligerent)
- Secret Approach to Castro: This ignored the fact the missiles were under Soviet Control;
- Invasion: Was advocated by the Joint Chiefs of Staff and was ultimately considered a last resort;
- Air Strike: JFK leaned toward this option which he saw as far cleaner than an invasion;
- Blockade: This became more attractive as other alternatives were investigated

President Kennedy set the course of action -- October 20, 1962

in a nationally televised address to the nation, the president presented

photos of low-altitude reconnaissance flights showing Soviet activity

this new dimension in reporting allowed detailed and pinpoint analysis of military activity

President Kennedy announced a quarantine of Cuba

president signed a proclamation to quarantine Cuba -- 7:03 p.m. October 23, 1962

in an unprecedented display of hemispheric solidarity,

the Organization of American States (OAS) approved the U.S. quarantine

quarantine went into effect 10:00 a.m., Eastern Daylight Time, October 24, 1962

Challenges by the Soviet Ambassador to the United Nation -- October 25

led U.S. delegate Adlai Stevenson to present to the Security Council

hard photographic evidence of Russian deployment of missiles in Cuba

Enforcing the quarantine, U.S. destroyers stopped, boarded and inspected the *Marcula*

a dry-cargo ship of neutral registry under Soviet charter sailing to Cuba -- 6:00 p.m. October 26

CUBAN MISSILE CRISIS BECOMES CRITICAL

Soviet Premier Nikita Khrushchev publicly proposed a settlement

that would include removal of U.S. missiles from Turkey -- 9 a.m. October 27, 1962

At the height of the crisis,

U.S. Air Force Major Rudolf Anderson, Jr., piloting a U-2 spy plane,

was brought down by a Soviet SA-2 surface-to-air missile

low-altitude pilots report being fired on by Cuban anti-aircraft weapons

all of the missile sites are now considered capable of launching missiles

President Kennedy gave the Soviets an ultimatum that the missiles must be removed -- October 27

U.S. Air Force and U.S. Navy were prepared to strike Soviet bases in Cuba

U.S. Army and U.S. Marines were positioned to invade the island

Attorney General Robert Kennedy met with Soviet Ambassador Anatoly Dobrynin -- 7:45 p.m., EDT

Kennedy emphasizes the urgency of a settlement and reached an understanding

regarding the missiles in Turkey

In a message to President Kennedy broadcast over Radio Moscow at 9:00 a.m., EDT October 28

Premier Khrushchev agreed to remove "the weapons which you describe as offensive"

in return for assurances that the U.S. would not invade Cuba

Soviet missiles were hurriedly loaded as deck cargo and removed from Cuba -- November 1, 1962

EUROPE ANNOUNCES DEVELOPMENT OF A FASTER THAN SOUND AIRPLANE

To the surprise of many, European airplane manufacturers

announced the *Concorde* -- November 1962

this supersonic transport (SST) airplane would exceed the speed of sound in flight
In spite of marginal economics, nationalistic and political arguments,
President of France Charles de Gaulle led support for the project
This announcement set off something of a wave of panic in other countries -- especially the U.S.
it was widely believed that almost all future commercial aircraft would be supersonic
and it looked like the Europeans would start off with a huge lead

ANOTHER ATTEMPT IS MADE TO REPEAL RESTRICTIONS ON ALIEN LAND OWNERSHIP

Senate Joint Resolution No. 21 to repeal the prohibition of alien land ownership
from the State Constitution went to a vote of the people -- November 6, 1962
Although it received more than seventy endorsements
including several from influential union leaders,
the measure again failed -- this time by a narrow margin: Yes: 400,839 to No: 428,276
Japanese American Citizens League (JACL) once more attributed the results to prejudice
voter turnout in King County, the most liberal county in Washington State, was disappointing
concerns surfaced within the JACL that it was not possible to succeed under their leadership
some felt that to achieve victory perhaps a white organization would have to lead the effort
JACL and its supporters decided to sit out the [1964] election

PRESIDENT JOHN F. KENNEDY CANCELS THE BLOCKAID OF SOVIET SHIPS

After further negotiations, Premier Khrushchev agreed to remove
Soviet warplanes stationed in Cuba -- November 20, 1962
Ultimately, the Cuban Missile Crisis was the result of miscalculation, misinterpretation
and misjudgment at the highest levels of government
Records now available to us demonstrate that once Kennedy and Khrushchev
sorted out their national interests and saw the collision course they both had set out upon
stark realization, followed by clear reasoning steered both nations and the world
away from the brink of mutually assured destruction

CIVIL RIGHTS CHANGES COME SLOWLY

Progress was being made by the Kennedy Administration toward achieving Civil Rights -- but slowly
legislative initiatives were being implemented
housing rights, safe conditions at the ballot box
and pressure on courts to prosecute racist criminals
Attorney General Robert Kennedy led the effort to demand change:
•his office threatened corrupt white Southern judges with disbarment,
•interstate transportation was desegregated
Robert Kenney became consumed with the Civil Rights movement
(and carried it forward in his own [1968] bid for the presidency)
dire need for political and administrative reform had been driven home on Capitol Hill
by the combined efforts of the Kennedy brothers, Dr. Martin Luther King,
Vice-President Lyndon Johnson and other Civil Rights leaders

U.S. SENATOR HENRY M. JACKSON BECOME A POWERFUL COMMITTEE CHAIR

Washington's junior senator, Henry Jackson, became chair of the Senate's Interior Committee -- 1963
he shepherded passage of much of the significant environmental legislation of the 1960s
(the Wilderness Act [1964] protected nine million acres of wilderness land
and created the procedure for protecting additional land by designating it as wilderness
other bills established national seashores and protected wild and scenic rivers
Jackson won passage of bills creating North Cascades National Park
in North Central Washington and Redwood National Park in California [1968])

U.S. SENATORS MAGNUSON AND JACKSON REPRESENT WASHINGTON'S INTERESTS

Divergent in style but compatible in vision, the two senators provided Washington State
with almost unprecedented attention in the nation's capital
They occasionally disagreed on national issues, most notably defense policy,
but were almost always of like mind when it came to upholding the interests of their state
Defense spending increased after the Cuban missile crisis
Scoop and Maggy made sure Washington got its share
Washington's shipyards and military installations grew rapidly
but Boeing grew even more rapidly
(eighty percent of Boeing's contracts were military [1965])
Jackson always cringed when he was called "the senator from Boeing")
together they became known as the "Gold Dust Twins"
for their ability to attract federal money and valuable legislation for their constituents
and for their ability to work together

STATE LEGISLATORS FURTHER CONSTRICT NATIVE AMERICAN RIGHTS

State laws were changed to extend state civil jurisdiction (even without tribal consent)
over specified lands and some specific activities on all Indian reservations -- 1963
state enforcement officials made numerous arrests and confiscated boats and fishing equipment
this expansion of state law drew the Washington State Civil Liberties Union
into the battle over Indian rights

BOEING DEVELOPS ITS SECOND COMMERCIAL JET AIRPLANE

Boeing's 727 followed the 707
it was a mid-size, narrow-body three-engine jet airliner
which could carry between 149 and 189 passengers depending on the seating configuration
it was capable of operating out of restricted length runways and smaller airports
Boeing's 727 took its first flight -- February 9, 1963
to help create interest Boeing sent the plane on a 76,000-mile tour of twenty-six countries
this created enormous enthusiasm in the airplane as more than 1,800 were sold
(many more than the 250 727s Boeing had originally planned to build)

FEDERAL DISTRICT COURT GRANTS AN INJUNCTION AGAINST UW LOYALTY OATH

Three-judge panel of the district court rejected the challenges to the loyalty oath laws⁴⁴⁰
filed by the Washington American Civil Liberties Union ACLU
and the UW chapter of the American Association of University Professors
but kept the injunction in effect pending an appeal to the U.S. Supreme Court -- February 9, 1963

HANFORD SITE ON THE COLUMBIA RIVER RECEIVES IMPROVEMENTS

Hanford Site in 1963

was home to nine nuclear reactors along the Columbia River,
and five reprocessing plants on the central plateau
with more than 900 support buildings and radiological laboratories around the site
extensive modifications and upgrades were made to the original three World War II reactors
number underground waste tanks was increased to a total of 177

(Hanford was at its peak production [from 1956 to 1965])

over the entire forty years of operations, the site produced about fifty-seven tons of plutonium
which supplied the majority of the 60,000 weapons in the U.S. arsenal)

PACIFIC NORTHWEST THEME SONG RECEIVES NATIONAL ATTENTION

Portland teen-club, the Chase, featured a house-band called the *Kingsmen*

who cut a version of the Northwest hit *Louie* -- May 1963

Seattle's Jerden Music, Inc. began pushing the record⁴⁴¹

it sold millions upon millions of copies

and earned Gold Record Awards for Jerden's Jerry Dennon and the *Kingsmen*

(along the way became a global garage-rock phenomenon that is still honored today)

BIRMINGHAM, ALABAMA CIVIL RIGHTS CAMPAIGN

Civil Rights leaders decided to focus on Birmingham, Alabama with one goal
desegregation of Birmingham's downtown merchants

Leaders' efforts were helped by the brutal response of local authorities

in particular political leader Commissioner of Public Safety Theophilus Eugene "Bull" Connor

he had lost a recent election for mayor but refused to accept the new mayor's authority

Birmingham effort campaign planned a variety of nonviolent methods

including sit-ins, kneel-ins at local churches, and a march to the county courthouse

to mark the beginning of a drive to register voters

Birmingham city leaders, however, obtained an injunction barring all such protests

convinced that the order was unconstitutional, the campaign leaders defied it

they prepared for mass arrests -- Dr. King elected to be among those arrested -- April 12, 1963

while in solitary confinement in jail, King wrote his famous *Letter from Birmingham Jail*

on the margins of a newspaper since he had not been allowed any writing paper

supporters appealed to the Kennedy administration which intervened to obtain Dr. King's release

⁴⁴⁰ Kit Oldham, *U.S. Supreme Court strikes down loyalty oaths for Washington state employees on June 1, 1964*, HistoryLink.org, Essay 5200, February 14, 2003.

⁴⁴¹ Peter Blecha, *Jerden Records (1960-1969): When the Seattle Music Biz Got Serious*, HistoryLink.org, Essay 8441, December 26, 2007.

LAST COAL MINE IN ROSLYN, WASHINGTON CLOSES

Roslyn's black population of coal miners had begun to decline along with departing white miners [1920s] until the town's overwhelmingly white population dwindled to just over 1,000 -- 1963 (By the early 1970s only one African American family remained in the town, the Cravens William Craven was elected mayor of Roslyn [1976]and served as mayor until [1980] he became the first black mayor in the history of Washington State)

CIVIL RIGHT CAMPAIGN IN BRIMINGHAM, ALABAMA IS AT RISK OF FAILING

Civil Rights campaign was faltering because the movement was running out of demonstrators who were willing to risk arrest more than one thousand students skipped school --May 2, 1963 to meet at the 16th Street Baptist Church to join the demonstration in excess of six hundred were arrested and jailed Another thousand students gathered at the church the next day when they started marching, Bull Connor unleashed police dogs on the young people then turned the city's fire hoses water streams on them television cameras broadcast nation-wide scenes of water from fire hoses knocking down children and dogs attacking individual demonstrators Widespread public outrage led the Kennedy administration to intervene an agreement was announced to desegregate downtown lunch counters and public accommodations a committee was created to eliminate discriminatory hiring practices, to arrange for the release of jailed protesters and to establish regular means of communication between black and white leaders Parts of the white community reacted violently they bombed the Birmingham home of Dr. King's brother, Reverend A. D. King and the Gaston Motel, which housed the unofficial headquarters of the Civil Rights effort

AN AMERICAN ORBITS THE EARTH

Astronaut Gordon Cooper was launched into space aboard *Faith 7* -- 8:04 a.m. EST, May 15, 1963 twenty-two orbits of earth were completed in eighty-eight and a half minutes Gordon Cooper landed *Faith 7* just four miles from the aircraft carrier USS *Kearsarge* the prime recovery ship was located seventy nautical miles southeast of Midway Island in the Pacific Ocean -- May 16 Having successfully accomplished all of its goals, Project Mercury was ended

STUDENTS FOR A DEMOCRATIC SOCIETY (SDS) BECOMES ACTIVE IN WASHINGTON

Students for a Democratic Society (SDS) formed a chapter at the University of Washington -- 1963 other colleges had SDS chapters of their own at Western Washington University in Bellingham, at Central Washington University in Ellensburg and Washington State University in Pullman

PRESIDENT JOHN KENNEDY CALLED FOR A NEW U.S. AIR TRANSPORTATION PROGRAM

President Kennedy introduced the National Supersonic Transport (SST) program

in a speech at the US Air Force Academy -- June 5, 1963

These airplanes would be capable of carrying passengers faster than the speed of sound
basic principal behind the SST was that its fast flight would allow them to fly
more trips than a subsonic aircraft leading to higher utilization

ALABAMA GOVERNOR GEORGE WALLACE ATTEMPTS TO STOP SCHOOL INTEGRATION

Civil Rights Movement continued to expand with protesters leading non-violent demonstrations
hundreds of students from the North went to participate in voter drives and community organizing
intense media coverage and a violent backlash following the murders of three civil rights workers
near Philadelphia, Mississippi contributed to national support for civil rights legislation

Governor Wallace attempted to block the integration of the University of Alabama -- June 11, 1963

President Kennedy sent a military force to make Governor Wallace step aside
which allowed the enrollment of two black students

that evening, the president addressed the nation on television and radio

he called for a new Civil Rights Bill saying: **“I am, therefore, asking the Congress to enact legislation giving all Americans the right to be served in facilities which are open to the public -- hotels, restaurants, theaters, retail stores, and similar establishments. This seems to me to be an elementary right. Its denial is an arbitrary indignity that no American in 1963 should have to endure, but many do.”**⁴⁴²

SOVIET UNION SENDS ANOTHER COSMONAUT INTO ORBIT

Cosmonaut Valery Bykovsky rode the space vehicle Vostok-5 into space -- June 14, 1963

it was originally intended that he would orbit for eight days

but due to elevated solar flare activity details of his mission changed many times

An unpleasant problem developed with the spacecraft's waste collection system

making conditions disagreeable for the cosmonaut

he was eventually ordered back after five days

this still remains the record for solo manned flight in Earth orbit

Another difficulty encountered was that, as had occurred twice before, the re-entry module

failed to separate cleanly from the service module when it was time for Bykovsky to come home

(After orbiting the Earth eight-two times,

Cosmonaut Valery Bykovsky landed the Vostok-5 in Kazakhstan, Soviet Union [June 19, 1963])

SEATTLE HOLDS ITS FIRST CIVIL RIGHTS MARCH

While Civil Rights events in the Deep South were reaching a crescendo

cities west of the Mississippi River remained, for the most part, complacent⁴⁴³

Not so in Seattle where several leading black clergymen including Rev. Mance Jackson

led a march of some 1,000 persons, both black and white, from the Central Area down Pine Street
toward downtown for a scheduled noon rally at the Westlake Mall -- June 15, 1963

This march was organized by local officers of the Congress Of Racial Equality (CORE)
and the National Association for the Advancement of Colored People (NAACP)

⁴⁴² Public Papers of the Presidents of the United States: John F. Kennedy, 1963.

⁴⁴³ Jeff Stevens, *Seattle's First Civil Rights March*, Radical Seattle Remembers.com, 2010.

to protest delays in implementing proposed efforts to eliminate discrimination
At Westlake Mall, Rev. Jackson, pastor of Seattle's Bethel Christian Methodist Episcopal Church
gave a rousing address pointing out local discrimination in housing, education, and employment
Other black leaders from Seattle also spoke at the rally challenging the city to do better by blacks
including the Rev. John Adams, pastor of the First African Methodist Church
Still, Seattle continued its lukewarm response to discrimination

SOVIET UNION ONCE AGAIN SHOCKS AMERICA

Cosmonaut Valentina Tereshkova had been selected from more than four hundred applicants,
and then out of five finalists, to pilot the Soviet Union space vehicle, Vostok-6
a civilian, she had been a textile-factory assembly worker and was an amateur parachutist
After a flawless two-hour countdown and a faultless launch -- June 16, 1963
Tereshkova became the first woman and the first civilian to fly into space
America was again shocked into disbelief by the success of the Soviets
following so closely behind the success of Vostok-5
During her three-day mission, Valentina performed various tests on herself
to collect data on the female body's reaction to spaceflight
although Tereshkova experienced nausea and physical discomfort for much of the flight
she maintained a flight log and took photographs of the horizon
which were later used to identify aerosol layers within the atmosphere
Valentina and Cosmonaut Valery Bykovsky communicated with each other by radio
at one point Vostok-6 and Vostok-5 approached each other to within three miles
(Valentina Tereshkova orbited the earth forty-eight times and spent almost three days in space
this was more flight time than of all-American astronauts who had flown before her combined
after circling the Earth forty-eight times she landed completing her mission [June 19])

CIVIL RIGHTS ACTIVIST IN SEATTLE BEGIN TO PRESSURE CITY HALL FOR ACTION

Seattle Civil Rights leaders organized a march on City Hall demanding "open housing" -- July 1, 1963
banning racial discrimination in real estate sales and rentals

Roughly 400 marchers descended upon the Fifth Avenue plaza of the Seattle Municipal Building
where a city council meeting on open housing was scheduled for that day
high-school and college-age protesters circulated a flyer, which read in part: "**As citizens of**

**Seattle and members of the Central District Youth Club, we feel humiliated by the slow process of
the City of Seattle to adopt open housing. We are past the stages of patience, we also are past the
stage of committees and subcommittees. We want open housing today.**"⁴⁴⁴

About thirty-five members of the Central District Youth Club, both African American and whites,
entered the mayor's office with the intention of occupying it as a form of protest

(this sit-in lasted twenty-four hours and ended peacefully)

Some 300 additional protestors filled the City Council Chambers

they squeezed into a room with a seating capacity of 175

Seattle Mayor Gordon Clinton spoke in favor of the human rights commission

several clergyman involved with the march expressed their impatience with the lack of progress

⁴⁴⁴ Jeff Stevens, *Seattle's First Civil Rights March*, Radical Seattle Remembers.com, 2010.

on the open housing issue
These demonstrations proved to be successful as the city council
committed to creating a human right commission
(and drafted an open housing ninety days later)
(Seattle voters would defeat the open housing ordinance [March 1964]
but the ordinance was finally passed directly by the city council [April 1968])⁴⁴⁵

CONSTRUCTION BEGINS ON THE THIRD LOWER SNAKE RIVER PROJECT

Little Goose Dam Project is part of the Columbia River Basin system of dams
located nine miles northeast of the town of Starbuck, and twenty-five miles north of Dayton
Construction began on the project began -- June 1963
after Ice Harbor Dam Project [1955-1961] and Lower Monumental Dam Project [1961-1969]
Little Goose Dam Project consisted of the powerhouse, navigation lock and two fish ladders
which provided navigation, hydroelectric generation, recreation and incidental irrigation
Little Goose Dam was 2,655 feet long with an effective height of ninety-eight feet
its 512-foot-long spillway featured eight fifty-foot by sixty-foot gates
Lake Bryan, named for Doctor Enoch A. Bryan, was formed behind the dam
it stretches to the base of Lower Granite Dam thirty-seven miles upstream
Little Goose project included a single-lift navigation lock eighty-six feet by 668 feet
with a fifteen-foot minimum depth
and two fish ladders for passing migratory fish
Little Goose Dam project was open to navigation [May 1970]

SECOND LAKE WASHINGTON BRIDGE LINKS SEATTLE WITH MEDINA, WASHINGTON

(First Lake Washington floating bridge, the Lacey V. Murrow Bridge, that carried I-90 traffic
had opened [July 2, 1940])
Evergreen Point Floating Bridge carried SR 520 traffic across Lake Washington
on the longest floating bridge on Earth at 7,497 feet -- August 28, 1963
built as a four-lane toll bridge at a cost of \$21 million
after three years of construction, it opened -- August 28, 1963
providing easy access from Seattle to Eastside communities
such as Bellevue, Kirkland and Redmond
Evergreen Point Floating Bridge was renamed the Governor Albert D. Rosellini Bridge [1988]

CIVIL RIGHTS MARCH ON WASHINGTON, D.C. TAKES PLACE

Civil Rights leaders led marchers in Washington, D.C.
from the Washington Monument to the Lincoln Memorial
this march was a collaborative effort of all of the major civil rights organizations,
the progressive wing of the labor movement,
and other liberal organizations -- August 28, 1963
Marchers had a list of six official goals:
•meaningful civil rights laws,

⁴⁴⁵ Jeff Stevens, *Seattle's First Civil Rights March*, Radical Seattle Remembers.com, 2010.

- a massive federal works program,
- full and fair employment,
- decent housing,
- the right to vote,
- adequate integrated education

National media attention greatly contributed to the march's national exposure and impact more than five hundred cameramen, technicians, and correspondents from the major networks covered the event -- they framed how their audiences saw and understood the march

Impact of the "March on Washington" was obvious for all to see
 an estimated 200,000 to 300,000 demonstrators gathered in front of the Lincoln Memorial where Dr. Martin Luther King, Jr. delivered a seventeen minute speech titled *I Have a Dream*

Afterward, Dr. King and other civil rights leaders met with President Kennedy at the White House Kennedy administration appeared sincerely committed to passing a far-reaching Civil Rights bill but was not clear that the votes in Congress would be there to deliver on the promise

BAPTIST CHURCH IS BOMBED IN BRIMINGHAM, ALABAMA

Four members of the Ku Klux Klan planted a box of dynamite with a timed fuse under the steps of the Sixteenth Street Baptist Church
 early Sunday morning September 15, 1963
 the bomb exploded at 10:22 a.m. killing four girls who had been attending Sunday school classes
 Denise McNair age 11, Addie Mae Collins 14, Carole Robertson 14 and Cynthia Wesley 14
 twenty-two other people were injured by the blast

A witness identified one suspect who was arrested and charged with murder and possession of a box of 122 sticks of dynamite without a permit
 (at trial, he was found not guilty [On October 8, 1963]
 the case remained unsolved until Bill Baxley was elected attorney general of Alabama he requested the original Federal Bureau of Investigation files on the case
 and discovered a great deal of evidence that had not been used in the original trial
 the bomber was re-tried at age 73, found guilty and sentenced to life imprisonment where he died)

The killing of the four girls marked a turning point in the Civil Right Movement and the nation and contributed to support for passage of a new Civil Right Act

PRESIDENT JOHN F. KENNEDY IS ASSASSINATED

President John Fitzgerald Kennedy, campaigning for reelection traveled from Fort Worth, Texas to Dallas aboard Air Force One
 he arrived at Dallas' Love Field about 11:30 a.m. (Central Time) November 22, 1963

It was decided the motorcade would be routed through the city
 Kennedy and his wife were in the backseat of the presidential limousine,
 Texas Governor John Connally and his wife sat in front of them
 Vice President Lyndon Johnson was riding two cars behind the president in the motorcade

Presidential motorcade reached Dealey Plaza, in downtown Dallas about 12:30
 Dealey Plaza is a large, basin-like square where three roads converged
 and carried traffic toward the Triple Underpass that led to the I-35 freeway

President's limousine entered the plaza and moved slowly along Houston Street,
then took a left turn right in front of the Texas School Book Depository building
What happened next was documented by movie buff Abraham Zapruder
who was filming the motorcade with an 8 mm movie camera
President Kennedy could be seen waving to the crowd when he was hit by something
he brought his hands to his neck
Texas Governor John Connally started to turn and he was hit in the chest
then a fatal shot struck the president in the head
Presidential limousine raced to Parkland Memorial Hospital
where the president was pronounced dead -- 1:00 p.m. (Central Time)

NEWS OF THE ASSASSINATION RACES ACROSS THE NATION AND WORLD

Lyndon Baines Johnson (LBJ) took the oath of office on board Air Force One
just before it departed from Love Field -- 2:38 p.m. (Central Time)
News of the assassination raced across the nation and the world
in Washington, D.C. Senator Warren Magnuson's staff member Stan Barer
entered the Senator's office: **"I was in the Capitol cafeteria when word came, about 11:30
a.m. (Eastern Time) I rushed to Magnuson's office. The door was open. I went inside. The senator
was by himself, seated at his desk, tears running down his face. I said, 'Senator, I'm very sorry.' He
said, 'It's so sad.' That was all. He just sat there crying, terribly hurt. I left the office."**⁴⁴⁶

COURT RULINGS GO AGAINST NATIVE AMERICANS

Based on federal law, the U.S. Court of Appeals upheld the illegal fishing verdict
against Puyallup Indian Robert Satiacum -- 1963
although the Washington State Supreme Court had struck down his conviction under state law
Washington State Supreme Court ruled in *Washington v. McCoy*
that the state had the power to regulate tribal fishing for conservation purposes -- 1963
further, Judge Robert H. Jaques issued a temporary restraining order
barring Indian from netting fish in the Puyallup River
Native Americans carrying signs marched on Olympia -- December 23, 1963
Governor Albert Rosellini invited them into his office and listened to their complaints,
but, showing little sympathy, he sent them away with only a dismissal

FRED HUTCHINSON IS STRIKEN WITH CANCER

(After winning the National League pennant
and losing the World Series to the New York Yankees [1961]
Hutch led the Cincinnati Reds to a third place finish in the National League [1962]
and a fifth place finish [1963]
tragically, an off-season [1963] medical examination revealed malignant tumors
in Hutchinson's lungs, chest and neck -- the prognosis was grim)
Cincinnati Reds made their manager's illness public -- January 3, 1964

⁴⁴⁶ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*, P. 233.

JOHN AND SALLY GOLDMARK SUE FOR LIABLE

Former Democratic legislator John Goldmark and his wife Sally sued *Tonasket Tribune* editor Ashley Holden and former Republican legislator Albert Canwell, who served as chairman of the State Un-American Activities Committee, for liable asking for \$225,000 in damages Goldmarks claimed that they had been libeled as Communists or sympathizers “with malice and permanently”

Goldmark liable suit trial was held in Okanogan County it was presided over by King County Judge Theodore S. Turner⁴⁴⁷ trial lasted for forty-three days -- it was sharply political from the beginning Ashley Holden stood by his articles at times the testimony became a personal attack on John, and especially, Sally Goldmark her interest in folk music was cited as evidence of her Communist sympathies Holden’s defense attorney asked her if the Communist Party approved of “**mixed nude swimming parties**”⁴⁴⁸ taken aback, she replied that she had no idea

Republican state representative (later U.S. Senator) Slade Gorton testified on behalf of the Goldmarks he told the jury that John Goldmark had an “excellent” reputation in the legislature he noted that he never heard any hint that Goldmark was tied to any Communist causes and that there were certainly “more liberal” Democrats in the legislature

Defendants brought in a number of anti-Communist experts, including some ex-Communists, to testify to the enormity of the Communist conspiracy

Defense attorneys closed their case by saying the defendants did not conspire to defame Goldmark they simply worked to defeat a political candidate

they also explained that citizens should have the “**right to criticize any public official without being hauled into court**”⁴⁴⁹

In his closing arguments, Goldmarks’ attorney William L. Dwyer said the case was about fairness

“**I don’t think in this state there has ever been such an example of people going so far and acting so viciously to ruin a man’s name.**”⁴⁵⁰

Jury awarded verdicts to the Goldmarks on five of the nine claims in the case -- January 22, 1964 \$40,000 in damages were awarded -- one of the largest libel verdicts in Washington history

Ashley Holden had the largest portion of the award levied against him for his “monstrous conspiracy” editorial and other stories all three of the other defendants were also found liable on various claims

Goldmarks were described as “**exuberant**” and called it a “**great vindication**”⁴⁵¹

verdict in favor of the Goldmarks made national news as *Time* magazine ran a story and *The Washington Post* in Washington, D.C.

ran an editorial in support of the decision of the jury

⁴⁴⁷ Jim Kershner, *Goldmark, John E. (1917-1979)*, HistoryLink.org, Essay 9858, July 22, 2011.

⁴⁴⁸ *Spokane Daily Chronicle, Future Damaged, Goldmark Claims*, December 6, 1963.

⁴⁴⁹ *Spokane Daily Chronicle, Goldmark Jury Deliberates*, January 18, 1964.

⁴⁵⁰ *Spokane Daily Chronicle, Goldmark Jury Deliberates*, January 18, 1964.

⁴⁵¹ *Spokane Daily Chronicle, “Libel Jury Sets \$40,000 in Suit” by Goldmarks*, January 22, 1964.

Defendants who lost immediately called for a new trial

CONSTITUTIONAL AMENDMENT XXIV PROTECTS VOTING RIGHTS

Amendment XXIV to the Federal Constitution was passed by Congress
and approved by the required three-quarters of the states -- January 23, 1964

Section 1 states: **“The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay poll tax or other tax.”**

poll taxes, charged in some states since the time of Reconstruction to stop some from voting,
became illegal in federal elections

(U.S. Supreme Court extended the protection against poll taxes to include state elections
citing the equal protection clause of the Fourteenth Amendment to the U.S. Constitution [1966])

WASHINGTON STATE PRIMARY ELECTION LAWS AGAIN COME UNDER CHALLENGE

For many years, Washington was the only state with a Blanket Primary system
to select Primary Election political party candidates to move to the General Election
this system allowed for cross-over voting as all candidates for both parties were listed
Leaders in both political parties challenged the Blanket Primary several times

Republicans in their state platform recommended replacing the Blanket Primary
with an “Open Primary” system -- 1964

Democrats did the same thing two years later [1966]
voters in an “Open Primary” need not identify their party affiliation
but must select either the Republican or Democrat ballot
and vote only for that party’s candidates

State Labor Council representatives testified before the Legislature
on behalf of an Open Primary law [1977]

Blanket Primary was again challenged in court based on U. S. Supreme Court rulings
made after the decisions in the *Anderson v. Millikin* case [1936]

State Supreme Court ruled newer cases all dealt with primary laws that restricted participation
and did not apply because the Blanket Primary “encourages and facilitates participation”
(*Heavey v. Chapman*) [1978]

hearings were held in the Washington State Senate on alternatives to the blanket primary [1979]
(However, Washington Blanket Primary Election law was changed
when the U.S. Ninth Circuit Court of Appeals ruled the Blanket Primary unconstitutional [2003]
because voters were not required to affiliate with a specific political party
and that violated the political parties’ right of free association)

ANOTHER PLAN TO EXPAND U.S. HIGHWAY 101 GENERATES PUBLIC OPPOSITION

Bureau of Outdoor Recreation recommended the construction of a forty-mile “scenic route”
through the Olympic Peninsula wilderness area between Ruby Beach and Cape Alva
United States Supreme Court Justice William O. Douglas announced a second hike

to replicate his previous effort [August 1958]⁴⁵²
Bureau of Outdoor Recreation quickly backed down announcing that their final recommendation would be for improvements to State Route 9C between Aberdeen and Queets and construction of a new road between Forks and Lake Ozette
Olympic Park Associates announced that they had no objections to that plan
Justice Douglas went ahead with his hike anyway
159 people joined William O. Douglas on a fifteen-mile “reunion” hike
this time the route ran from the Hoh River north along the ocean coastline to La Push
in the end, no new road was constructed

COMMERCIAL FISHING IN WASHINGTON STATE EXPANDS DRAMATICALLY

(Non-Indian salmon fishing soared [after World War II])

there were hundreds of commercial gillnetters and purse seiners by the late [1950s])

Many types of bottom fish such as rock cod, ling cod, sea bass and red snapper were caught by large ocean-going fishing boats called trawlers

these expensive boats carried a huge bag-shaped net

with weights attached to keep it near the bottom of the ocean

steel doors at the mouth of the net swing open to scoop up the fish

as the net was dragged along

when the net was pulled in, the fish were removed

one type of bottom fish, halibut, was especially wanted by Washington fishermen

this fish was caught by using a main fishing line often a mile in length

main line had shorter lines with hooks attached to it at regular spaces

these were frequently drawn in and the halibut removed

(because of over-fishing, halibut must now be conserved)

albacore tuna became the newest species of fish to be taken along the Washington coast

tuna was not harvested until (World War II) created an added demand for sea food

two methods of catching the fish have developed:

- oldest method of fishing tuna was trolling with hook and line

however, it was very expensive for amount of fish that can be caught by this method;

- chumming used live bait thrown overboard to attract the tuna

which are then caught on feathered hooks called squids or jigs

size of the harvest varies greatly from year to year

Net fishing varies according to the depth of water being fished

in shallow water, such as around Puget Sound, reef nets were used

two boats anchored fifty to one hundred feet apart with a net stretched between them

fisherman climb ladders attached to the stern of the boat

to watch for salmon swimming into the net

when the net was pulled up, a gaffhook or dip net was used

to take the salmon from the net

because of the limited area which could be fished in this manner

⁴⁵² Paula Becker, *Conservationists William O. Douglas, Polly Dyer, and others begin a 22-mile hike along the Olympic coastline to protest proposed road construction on August 19, 1958*, Essay 9672, HistoryLing.org, December 29, 2010.

reef netting became less popular
gill netting was a second approach to net fishing used in deeper water than reef netting
long rectangular net was set in the water like a fence
top of the net was held at the surface with a series of floats
while weights held down the bottom of the net
when a fish swam into the net, the head passed through the mesh but body could not
when the fish attempted to swim backward, its gills became caught in the net
after a length of time, the net was drawn up and the fish pulled out of the net
larger fishing boats with a greater range of travel carried purse seine nets
seine (net) was set out in a circle near the fishing boat by use of a smaller boat (skiff)
top of the seine was held up by use of floats
but the weighted bottom of the net had a line woven through it
that served as a drawstring
when the seine (hopefully) circled around a school of fish, the drawstring was pulled
which closed the bottom of the net and the seine was then pulled aboard the fishing boat
where the catch removed

INDIANS SUFFER BECAUSE OF OVER FISHING

Although non-Indian commercial fishermen caught salmon by the millions of tons
in the Pacific Ocean and Puget Sound, ironically, much of the public blame
was attributed to “Indian lawlessness”

In fact, the tribes fished only the rivers and caught only what was left over
by the state’s own figures, Indians captured less than five percent of the harvestable salmon
tribes claimed the real culprits in the salmon’s decline were commercial fishing, dams, and
logging (research would eventually prove them right)

WASHINGTON STATE OFFICIALS IGNORE THE RIGHTS OF NATIVE AMERICANS

For years, the State of Washington regarded the [1854-1855] Indian Treaties irrelevant
Washington State insisted it could impose its fishing regulations on Indian tribes
without regard for the treaties that had been signed by the United States government
Indian property was destroyed and hundreds of arrests were made
Indians became increasingly determined to fight for what was rightfully theirs

NATIVE AMERICAN ACTIVISTS MOVE TO THE FOREFRONT

Throughout the 1960s, declining salmon runs and aggressive enforcement of state fishing policing
forced Puget Sound tribes to become militant
Native American determination reflected broader changes in the country
African American and Latino communities, Martin Luther King and Caesar Chavez
led movements pressing government for fairness and justice
social beliefs and the very culture of the nation were changing

NATIVE AMERICANS ESTABLISH THEIR OWN CIVIL RIGHTS PROTEST GROUP

Nisqually tribal leaders said the treaties gave them the right to fish as they always had
but the state insisted that its authority to regulate fish and game was the controlling law

Janet McCloud was selected as the leader of Survival of the American Indian Association (SAIA) other founding members included Donald McCloud, Al and Maiselle Bridges, Billy Frank Sr., and Billy Frank, Jr. who were residents of Frank's Landing on the Nisqually River -- 1964 SAIA was a radical group dedicated to resolving Indian fishing rights issue through civil disobedience this group also intended to resist the cultural assimilation of Native Americans through education and cultural activities and to defend Indian treaty rights Hank Adams, a Sioux and Assiniboine Indian, joined Northwest Native Americans in their protests (Adams, a gifted athlete and student leader during high school had moved to California he became involved in politics and actively supported John Kennedy's Administration) he refused induction into the U.S. Army until the federal government made good on all treaties with the American Indians -- 1964 Adams' role in SAIA was to coordinate publicity and to help organize protests SAIA had few resources but raised \$50 with a fish-bake to retain attorney Jack Tanner who was the regional director of the NAACP in Tacoma (Tanner later became a federal court judge) throughout the course of the long campaign, Tanner defended many of the Native Americans

INDIANS HOLD A "FISH IN" AT FRANKS LANDING ON THE NISQUALLY RIVER

State regulations prohibited the use of nets and traps even though these were traditional Native American methods of taking fish from rivers and streams Indians insisted on their rights guaranteed by [1854-1855] treaties with the federal government whenever tribal members fished for salmon and steelhead trout off their reservation, they were subject to state law and to arrest and prosecution Native Americans protested the denial of their treaty rights by fishing in defiance of state law National Indian Youth Council (NIYC) organized a "fish-in" -- March 2, 1964 NIYC members participated in civil rights marches in Alabama and Mississippi and in freedom rides in the American South they applied their knowledge of activism and civil disobedience to tribal issues Inspired by the sit-ins of the civil rights movement, Actor Marlon Brando Episcopal clergyman John Yaryan from San Francisco and Puyallup tribal leader Bob Satiacum fished for salmon in the Puyallup River without state permits Brando and Yaryan were arrested by Game Department officials -- Satiacum was not an estimated 200 Indians waiting on the river bank scowled at the Game Department officials Pierce County's Prosecutor refused to file charges and Brando and Yaryan were released

NATIVE AMERICANS MARCH ON OLYMPIA

Marlon Brando led a group of about 1,000 Native Americans and supporters in a march on Olympia Brando and some of the leaders had a meeting with Governor Albert Rosellini -- March 3, 1964 Sympathetic articles appeared in local newspapers describing the natives' time in jail it was also noted that three American Civil Liberties Union (ACLU) lawyers now assisted Indian defense attorney Jack Tanner

NATIVE AMERICAN PROTESTORS RECIEVE EXCELLANT REPRESENTATION

Attorney Jack Tanner handled his cases adroitly

he assisted Billy Frank with filing complaints and allegations of police brutality during arrests
Fish-ins were used throughout the 1960s to dramatize racial discrimination, pride in native heritage,
and to assert native treaty rights

As the fish-ins expanded, many more arrests were made, overwhelming Tanner and his staff
other attorneys including Alva C. Long made their services available *pro bono*
to demonstrate their support for the cause of civil rights

VIETNAM BECOMES A BATTLEFIELD OF THE COLD WAR

Fears abounded that the fall to Communists of China [1949] and Korea [1953]
was only the beginning of a domino effect that would expand to include Vietnam, Laos,
Cambodia, Thailand, Malaysia, Indonesia, Burma and India
this became known as the “Domino Theory”

Vietnam became a battlefield of the Cold War

President Kennedy’s Administration supported South Vietnam’s Premier, Minister Ngo Dinh Diem
however, bad leadership, corruption, and political promotions kept that nation’s military weak
Nikita Khrushchev and Soviet Union Communists supported
North Vietnam’s political leader: Ho Chi Minh

AMERICA’S PARTICIPATION IN VIETNAM INCREASES ONCE AGAIN

North Vietnamese offensive in Laos

prompted two aircraft carriers to be deployed off the Vietnamese coast

President John Kennedy agreed to finance an increase in the size of the South Vietnamese Army
he also agreed that 1,000 U.S. military advisors would be sent to help train the South’s Army
neither of these decisions were not made public

as they broke the agreements made at the [1954] Geneva Agreement

American air power in Southeast Asia was massively reinforced -- April-[June] 1964

Conflict in Vietnam continued as a threat to change the Cold War into a Hot War

ANTI-VIETNAM WAR PROTESTS TAKE PLACE

American military advisors began to develop the army of South Vietnam

as a continual and increasing number of U.S. troops were dispatched to train the weak forces there

Unrest simmered on college campuses across the nation

students were becoming increasingly involved in a number of social and political movements
including the Civil Rights Movement, the Women’s Rights Movement,
and the Anti-War Movement

In the first major student demonstration against military escalation,

hundreds of students marched through Times Square in New York City -- May 2, 1964

while another 700 marched in San Francisco

smaller marches took place in Seattle and Madison, Wisconsin

(Twelve young men in New York City burned their draft cards (beginning with [May 12])

In the beginning of the Anti-war Movement, some African Americans did not want to participate
because of loyalty to President Johnson for pushing Civil Rights legislation

U.S. SUPREME COURT STRIKES DOWN A PORTION OF WASHINGTON’S LOYALTY OATH

(Washington's [1955] oath requiring all state employees to swear they are not "subversive persons" and the [1931] statute requiring teachers to swear to promote respect for government institutions had been challenged in federal court in *Baggett v. Bullitt* [June 6, 1962])

United States Supreme Court heard the appeal and ruled in a 7-2 decision -- June 1, 1964 that **"...the oath requirements and the statutory provisions on which they are based are invalid on their face because their language is unduly vague, uncertain and broad."**⁴⁵³

it noted under the [1955] statute, it might be subversive to teach known Communist Party members or to participate in international academic conferences that included Communist scholars and under a [1931] statute, it could be deemed disloyal to criticize the design of the state flag, or the work of a judge, court, commission or other government institution

U.S. Supreme Court concluded these laws violated due process rights and thus were unconstitutional following the *Baggett v. Bullitt* decision, similar loyalty oaths in other states were also declared unconstitutional

(Washington's last loyalty oath, which was imposed on candidates for public office, was declared invalid by the Washington Supreme Court [1974])

CIVIL RIGHTS EFFORT MOVES TO ST. AUGUSTINE, FLORIDA

St. Augustine on the northeast coast is the oldest city in the nation founded by the Spanish [1565]

St. Augustine became the center of national attention in 1964 when local activist and dentist

Dr. Robert B. Hayling picketed segregated organizations in the city

he and three companions were brutally beaten by the Ku Klux Klan -- June 11, 1964

Ku Klux Klan "Nightriders" shot into homes belonging to blacks

teenagers Audrey Nell Edwards, JoeAnn Anderson, Samuel White and Willie Carl Singleton

spent six months in jail and reform school after sitting in at a local Woolworth's lunch counter

newspaper publicity of the event led to nationwide protests

"The St. Augustine Four" were released after the governor of Florida stepped in

Dr. Hayling and other activists urged the Southern Christian Leadership Conference

to come to St. Augustine -- northern college students responded during (Spring Break)

also, four prominent Massachusetts women came to lend their support

three were the wives of Episcopal bishops

Mrs. Mary Parkman Peabody, Mrs. Esther Burgess and Mrs. Hester Campbell

Mrs. Peabody, 72-year-old mother of the governor of Massachusetts was arrested

for attempting to eat in an integrated group

the fourth activist, Mrs. Florence Rowe, was the wife

of a vice president of John Hancock Insurance Company

St. Augustine caught the attention of the world

in a follow-up rally, St. Augustine, Florida was the scene of the largest mass arrest

of Jewish rabbis in American history while they were conducting a pray-in

CIVIL RIGHTS ACT OF 1964 PASSES THE U.S. SENATE

⁴⁵³ Kit Oldham, *U.S. Supreme Court strikes down loyalty oaths for Washington state employees on June 1, 1964*, HistoryLink.org, Essay 5200, February 14, 2003.

President Lyndon Johnson was instrumental in securing passage of the Civil Rights Act of 1964 that made racial discrimination and segregation illegal
U.S. House of Representatives had previously passed their version of the Civil Rights Act by a vote of 290 to 130 [November 19, 1964]
Once again Southern Senators blocked consideration of the bill by threatening filibusters after considerable parliamentary maneuvering and fifty-four days of filibuster in the U.S. Senate finally the Civil Rights Act of 1964 came to a vote -- June 19, 1964
on the front page of the *Washington Post* newspaper that day was a photograph showing both black and white swimmers in Monson Motel in St. Augustine, Florida as the motel manager poured acid into the water
U.S. passed the measure seventy-one to twenty-nine, but with an amendment forcing the House of Representatives to vote to agree with the change [June 30]

CIVIL RIGHTS ACTIVISTS INVADE MISSISSIPPI

Civil Rights leaders brought nearly 1,000 activists to Mississippi most of them white college students to join with local black activists to register voters, teach in “Freedom Schools,” and organize the Mississippi Freedom Democratic Party
Many of Mississippi’s white residents deeply resented the outsiders and efforts to change their society state and local governments, police, the White Citizens’ Council and the Ku Klux Klan used arrests, beatings, arson, murder, spying, firing, evictions, and other forms of intimidation to oppose the project and prevent blacks from registering to vote or achieving equality
Three civil rights workers disappeared -- June 21, 1964
James Chaney, a young black Mississippian and plasterer’s apprentice and two Jewish activists
Andrew Goodman, a Queens College anthropology student;
Michael Schwerner, a Congress of Racial Equality (CORE) organizer from Manhattan
they were found weeks later murdered by the Klan
some of them members of the sheriff’s office
these murders sparked public outrage

CIVIL RIGHTS ACT OF 1964 GOES INTO EFFECT

President Lyndon Johnson signed the Civil Rights Act of 1964 into law -- July 2, 1964
discrimination in employment practices and public accommodations based on “**race, color, religion, sex or national origin**” was banned
this law authorized the United States Attorney General to file lawsuits to enforce the new law and nullified state and local laws that required such discrimination
African Americans who had been barred from registering to vote finally had an alternative to taking suits to local or state courts

RACE RIOTS ERUPT IN NEW YORK CITY AND PHILADELPHIA

One of the first major race riots took place in Harlem, New York -- July 16, 1964
fifteen-year-old James Powell, who was black, was shot by an Irish-American police officer for allegedly charging him armed with a knife -- it was found that Powell was unarmed
black citizens demanded the police officer’s suspension

hundreds of young demonstrators peacefully marched to the local police state the next day
New York police department did not suspend the shooter
Neighborhood residents in New York City, frustrated by racial inequalities,
looted and burned property that was not owned by blacks
Bedford-Stuyvesant, a major black neighborhood in Brooklyn, erupted next
Philadelphia, Pennsylvania was also the scene of rioting

FRED HUTCHINSON'S HEALTH IS FAILING

Fred Hutchinson nevertheless managed the Reds through -- July 27, 1963
when he was hospitalized
(He returned to the dugout [August 4] but could only endure nine more days
before he turned the team over to his first-base coach -- one day after his 45th birthday)
(Frederick Charles Hutchinson passed away of cancer [November 12, 1964]
a decade later the Fred Hutchinson Cancer Research Center was built in his name
this facility went on to achieve world-wide prominence)
(*Seattle Post-Intelligencer* named Fred Hutchinson
Seattle's athlete of the 20th Century [December 24, 1999])

1964 PRESIDENTIAL CAMPAIGN

Democrat incumbent president Lyndon Baines Johnson (LBJ) the former U.S. Senate majority leader
and vice president under John F. Kennedy sought to be elected in his own right
Republican U.S. Senator Barry Goldwater stood in the way -- 1964
Goldwater offered Americans "a choice, not an echo"
however, shortly before the Republican Convention, he alienated most moderate Republicans
by his vote against the Civil Rights Act of 1964
which Johnson championed and signed into law
Johnson positioned himself as a moderate and succeeded in portraying Goldwater as an extremist
Goldwater had a habit of making blunt statements about war, nuclear weapons and economics
these were used turned against him
most famously, the Johnson campaign broadcast a television commercial
that became known as the "Daisy Girl" ad which featured a little girl
picking petals from a daisy in a field, counting the petals, which then transitioned
into a launch countdown and a nuclear explosion
this ad responded to Goldwater's advocacy of "tactical" nuclear weapons use in Vietnam
During the campaign, Johnson's position on Vietnam appeared to lean toward de-escalation
which. sharply contrasted with Goldwater's more militant views
Voters increasingly viewed Goldwater as a right wing extremist candidate

SOUTH VIETNAMESE COMMANDOS TAKE OFFENSIVE ACTION

South Vietnamese commandos attacked two small North Vietnamese islands
in the Gulf of Tonkin -- night of July 30, 1964
U.S. destroyer *Maddox*, an electronic spy ship, 123 miles south was ordered
to electronically simulate an air attack
to draw North Vietnamese boats away from the commandos

GULF OF TONKIN INCIDENT IS REPORTED OFF THE COAST OF NORTH VIETNAM

Two American destroyers, the USS *Maddox* and USS *Turner Joy* were stationed in the Tonkin Gulf they reported they were under attack

by a North Vietnamese Navy Torpedo Squadron -- August 2, 1964

These two attacks became known as the Gulf of Tonkin Incident

U.S. Naval Communication Center in the Philippine Islands which received the fateful message questioned whether any second attack had actually occurred

it was very possible that no attack had taken place that night)

None-the-less, President John retaliates against North Vietnam six hours after the initial report

American jets bombed two naval bases and destroyed a major oil facility

two U.S. planes were downed in the attack

PRESIDENT LYNDON JOHNSON ESCALATES AMERICA'S EFFORT IN VIETNAM

Two days later both ships again reported being under heavy attack -- August 4, 1964

Turner Joy fired approximately 220 3-inch and 5-inch shells at radar controlled surface targets

As the U.S. entered the final three months of political campaigning for the 1964 elections -- August 4

President Johnson ordered a retaliatory air strike on North Vietnamese torpedo boat bases

in a television address to the American public that same evening

he announced that U.S. naval forces had been attacked

Johnson requested approval of a resolution "expressing the unity and determination

of the United States in supporting freedom and in protecting peace in Southeast Asia"

TONKIN GULF RESOLUTION IS PASSED BY CONGRESS

In what was characterized as the heat of battle, congress took up a joint resolution to escalate the war

U.S. House of Representatives voted give the president the power to take whatever actions

he saw as necessary to defend southeast Asia -- 416-0 in favor

U.S. Senate voted eight-eight to two -- August 7, 1964

only senators Wayne Morris (D-Oregon) and Ernest Gruening (D-Arkansas) voted no

President Lyndon Johnson signed the bill into law -- August 10, 1964

Tonkin Gulf Resolution gave U.S. President Lyndon B. Johnson authorization to use

"conventional" military force in Southeast Asia without a Congressional declaration of war

this authorized the President to use armed American forces in Vietnam

(and may have constituted a declaration of war as required in the U.S. Constitution)

(whether or not the Tonkin Gulf Resolution was a declaration of war

still remains under dispute by many people

Congress took no other action to escalate the war)

BEATLES PLAY THE SEATTLE CENTER COLISEUM

"**Beatlemania**" swept Seattle days before the arrival of the "**Fab Four**"⁴⁵⁴

Woolworth's Department Store sold Beatle wigs, Beatle "Bobbin' Head" dolls, trading cards

⁴⁵⁴ Greg Lange and Alan J. Stein, *Beatles play at the Seattle Center Coliseum on August 21, 1964*, Essay 5435, HistoryLink, org, March 17, 2003.

and record albums, proclaiming “It’s a mad fad, dad” in their advertisements
Security was increased at Seattle’s Edgewater Inn Hotel, where the Beatles stayed
plywood fence 350-foot-long covered in barbed wire was erected
arrangements were made for the harbor patrol to prevent Beatle fans
from approaching the building by boat
English rock musicians the Beatles give their first concert in Washington State -- August 21, 1964
they played to 14,300 screaming fans
stage was raised twelve feet for the Beatles’ protection
scalpers sold the \$5 tickets for \$30
That evening the opening acts took to the stage beginning at 8:00 p.m.
Seattle's leading Rock and Roll station, KJR, disc jockey Pat O’Day
introduced the Beatles and the crowd went wild -- 9:25 p.m.
screaming fans made the noise in the Coliseum deafening and few if any could hear the songs
during the concert, hundreds of teenage girls rushed the stage
in the hopes of catching the eyes of their idols
police and firefighters did their best to prevent injuries, but thirty-five people
required first aid treatment, ranging from bumps and bruises to all-out hysteria
one girl was restrained on a stretcher, all the while screaming “Paul! I love you!”
After the performance, the Beatles waited an hour before leaving the Coliseum
in the rear of an ambulance
for the return trip to the heavily guarded Edgewater Inn on the waterfront
they earned \$34,569 for their performance
next day they left for Vancouver, British Columbia

MARMES MAN ARCHEOLOGICAL SITE RECEIVES ONLY CURSORY ATTENTION⁴⁵⁵

Despite the significance of the discoveries at the Marmes Rockshelter site [1962]
further serious investigation was not possible
as funding for archaeological research was extremely limited
complicating matters, four Snake River dams were in various stages of planning or construction
eighty other archaeological sites had been identified
within the area to be flooded by Lower Monumental Dam alone
Only a few excavators worked at the Marmes Rockshelter -- 1964
most were new to the project -- record keeping was inconsistent; work was needlessly duplicated
by today’s archaeological standards, the collection methods were haphazard
due in part to the inexperience of many of the workers
some people kept careful field notes about where they found artifacts; others did not
most of the teams used quarter-inch screens to sift the dirt for artifacts,
instead of the eighth-inch screens that are more commonly in use today
smaller objects such as the bones of fish were easily lost through the larger screens
nevertheless, it was found the people living at the site hunted game such as elk and deer
they also hunted smaller mammals such as beavers and gathered mussels from the river
archaeological excavations ended at the end of the 1964 field season

⁴⁵⁵ Cassandra Tate, *Marmes Rockshelter*, HistoryLink.org, Essay 7970, October 5, 2006.

COLUMBIA RIVER TREATY WITH CANADA IS RATIFIED

Columbia River Treaty was ratified and came into effect -- September 16, 1964
(in recent years, the Treaty has generated significant attention not because of what it contains,
but because of what it does NOT contain
a reflection of the times in which it was negotiated,
the Treaty's emphasized hydroelectricity and flood control.
other interests such as fish protection, irrigation and environmental concerns
were not specifically addressed in the treaty)

CHINA SUCCESSFULLY TESTS IT FIRST ATOMIC BOMB

China detonated its first atomic bomb -- October 16, 1964
U.S. officials were not terribly surprised by the test
intelligence reports since the [1950s] indicated that China was working
to develop an atomic bomb -- possibly aided by Soviet technicians and scientists
However, this successful test did cause great concern in the U.S. government
during the early [1960s] China took a particularly radical stance
that advocated worldwide revolution against the forces of capitalism
and worked strenuously to extend its influence in Asia and the new nations of Africa
coming just two months after the Tonkin Gulf Resolution created the frightening specter
of a nuclear confrontation and conflict in Southeast Asia

VIETCONG ATTACK AN AMERICAN AIR BASE

Just two days before the U.S. presidential election,
Vietcong mortars shelled Bien Hoa Air Base near Saigon, South Vietnam -- November 1, 1964
Four Americans are killed and seventy-six wounded
five B-57 bombers were destroyed, and fifteen others were damaged

LYNDON BAINES JOHNSON (LBJ) LEADS A DEMOCRATIC ELECTION ADVANCE

Although Barry Goldwater had been successful in rallying conservatives,
he was unable to broaden his base of support for the general election
Johnson won in a landslide carrying forty-four states
and the District of Columbia -- November 3, 1964
LBJ and Hubert H. Humphrey received 486 electoral votes and 61.1% of popular votes
to Barry Goldwater and William E. Miller's fifty-two
this was the greatest margin of electoral votes since [1820]
Democrats won twenty-seven of the thirty-five seats up for election in the U.S. Senate
among the new U.S. Senators were two of the late President John Kennedy's brothers:
Robert and Edward (Ted)
Democrats made large gains in Washington's Congressional delegation
while Republican Tom Pelly maintained his First District seat
Democrat Julia Butler Hansen was reelected in the Third Congressional District
Republican Catherine Dean May returned to Congress representing the Fourth District
new Congressmen, all Democrats, were elected:

- Lloyd Meeds bested Republican incumbent Alfred Westland in the Second District
- Tom Foley defeated eleven-term Republican Walt Horan in the Fifth Congressional District (he later became Speaker of the U.S. House of Representatives)
- Floyd Hicks defeated eight-term Republican Thor Tollefson in the Sixth District
- Brock Adams won over one-term Republican K. William Stinson in the Seventh District (he will later serve as Washington State's U.S. Senator)

State' usual voting inconsistency was demonstrated
 as Republican Dan Evans defeated incumbent Democrat Albert D. Rosellini
 in Legislative races favored Republican candidates
 State Senate saw Republican gain four seats
 but Democrats held a thirty-two to seventeen majority
 State House of Representatives shifted eight seats to the Republican Party
 as the Democratic majority slipped to three seats -- fifty-one to forty-eight

GOLDMARK LIABLE SUIT IS OVERTURNED

Tonasket Tribune editor Ashley Holden and former Republican legislator Albert Canwell
 were successful in gaining a new trial to review the liable suit they had lost
 to John and Sally Goldmark [January 22, 1964]⁴⁵⁶
 King County Judge Theodore S. Turner granted a new trial for Holden and Canwell
 Turner went even further a few days later -- December 18, 1964
 he overturned the \$40,000 judgment and set aside the jury's verdict
 based on a U.S. Supreme Court decision [March 1964] involving *The New York Times*
 U.S. Supreme Court ruled that a public official could not collect damages
 for criticism of his official actions in the absence of proof of actual malice
 Turner said the evidence in the Goldmark case had established
 that Goldmark was not a Communist
 and that the defendants had made false charges to injure him politically
 but that was not enough -- there had been no clear proof of malice
 After losing the case, John and Sally Goldmark went back to their ranch in Okanogan County
 he never held public office again
 (John Goldmark died in Seattle [October 31, 1979] of cancer; Sally passed away [May 31, 1985])

DAVE BECK IS RELEASED FROM FEDERAL PRISON

For some forty years Dave Beck was a key leader of the Brotherhood of Teamsters Union
 both on the West Coast and nationally (from the late [1920s] to the early [1960s])
 During his time in prison Beck worked as an apple canner and wrote his memoirs
 his wife, Dorothy, had died while he was serving his sentence
 Dave Beck, a former member of the Washington State Board of Prison Terms and Paroles,
 was pardoned by Washington State Governor Albert D. Rosellini -- January 10, 1965
 after serving thirty months at McNeil Island federal penitentiary
 however, Beck remained on parole for his conviction on federal charges

⁴⁵⁶ Jim Kershner, *Goldmark, John E. (1917-1979)*, HistoryLink.org, Essay 9858, July 22, 2011.

After his release from prison, Dave Beck returned to private and modest public life
he lived on Seattle First Hill in the basement of a house that he himself had built
for his mother and sister [in the 1940s]
he retained his \$50,000-a-year Teamster president's pension
he became a multimillionaire investing in parking lots
(Dave Beck was pardoned by President Gerald Ford [May 1975]
to his death, Beck claimed never to have even seen, much less signed,
the Joint Council 28 Building Association report that led to his conviction)

In summarizing his own life, Dave Beck said, **“Looking back on my career, I have made many close friends, inside as well as outside of labor. Despite all the fighting that was directed against me by Seattle’s business community and the State of Washington, I don’t think there’s a single person, right now [1978] who has any more friends in Seattle business than Dave Beck. That has to say something about me.”**⁴⁵⁷

(Dave Beck died at the age of 99 in Northwest Hospital in Seattle [December 26, 1993]
he is buried in Calvary Cemetery, Seattle)

PRESIDENT LYNDON BAINES JOHNSON BEGINS HIS OWN POLITICAL AGENDA

LBJ immediately set about persuading Congress not only to approve the martyred president's agenda
but to move far beyond the bills John Kennedy had in mind
He proposed programs to improve social welfare with a program he called “War on Poverty”
and Civil Rights and federal aid to education that became the “The Great Society”
Johnson was concerned with passing bills as quickly as possible
when one measure became law he was on to the next
however, he lacked the communication skills, charisma or charisma to give the country
a wider sense of vision or to inspire his fellow citizens as Kennedy had done
President Johnson also took on the War in Vietnam
although he had run as a “Dove” (peace candidate)
against Republican Barry Goldwater's “Hawk”
when LBJ was elected he immediately began to escalate the fighting
he vastly increased Kennedy's commitment from fewer than 20,000 U.S. troops
to more than a half million

ANTI-WAR EFFORT SPREADS ACROSS THE NATION

Campus unrest was one of the most-remembered aspects of the Vietnam War era
student activism played a key role in bringing antiwar ideas to the broader public
most student antiwar organizations were locally or campus-based
because they were easier to organize and participate in than national groups
Common antiwar demonstrations for college students featured attempts to sever ties
between the war machine and universities by burning draft cards,
protesting universities furnishing grades to draft boards,
and protesting military and Dow Chemical (the makers of napalm) job fairs on campus
University of Washington was actively involved in the radical activism

⁴⁵⁷ Ross Reider, *Beck, Dave (1894-1993), Labor Leader*, HistoryLink.org, Essay 2972, February 14, 2001.

of the civil rights and antiwar movements
College students were not the only people protesting
League of Women Voters was one of the first groups
to call for an end to military involvement in Vietnam
an Anti-Vietnam War protest attended by 2,500 participants
was organized by University of Michigan -- January 29, 1965
(this model was repeated at thirty-five campuses across the country)

KOREAN WAR VETERANS BENEFITS COME TO AN END

Servicemen's Readjustment Act (G.I. Bill) for veterans of the Korean Conflict
came to an end -- January 31, 1965
roughly 1.2 million military veterans had used their benefits to enter higher education,
and over 860,000 for other education purposes
another 318,000 for occupational training
in addition, more than 1.5 million Korean War veterans obtained low-cost home loans

ANOTHER AMERICAN MILITARY BASE IN VIETNAM IS ATTACKED

U.S. helicopter base and advisory compound in the central highlands of South Vietnam
was attacked by Vietcong commandos
nine Americans were killed and more than seventy wounded -- February 7, 1965
President Johnson immediately ordered U.S. Navy fighter-bombers
to attack military targets just inside North Vietnam

WASHINGTON STATE TEACHERS RECEIVE THE RIGHT TO BARGAIN COLLECTIVELY

Washington's K-12 public school teachers had no statutory right to provide input or be involved
in decisions concerning any of their working conditions prior to 1965
for the most part teachers were considered "professional," yet had little, if any,
input individually or collectively regarding their "professional" work environment⁴⁵⁸
each teacher had only a "personal services contract" which stated
that they were hired for one year, their assignment and their pay
Passage of Washington's one-page Professional Negotiations Act by the state legislature -- 1965
required school boards prior to final adoption of key policies to "meet and confer"
with elected employee representatives over wages, hours and other conditions of employment
school boards resisted the change as an infringement on their authority
while this act allowed teachers to meet with their employers to discuss work-related issues,
when an impasse in the talks was reached the resolution process favored school boards
this act did not provide for true collective bargaining for teachers
In some school districts, teacher leaders presented comprehensive contract proposals
calling for extensive bargaining on a wide range of school policy and working conditions
teachers attempted to reach binding agreements through their local unions
but with limited success
these efforts at bargaining were met with great resistance from school boards and administrators

⁴⁵⁸ Steve Kink, *Teacher Strikes in Washington*, HistoryLink.org, Essay 9763, March 22, 2011.

most school boards went through the motions of the negotiation process outlined in the law only to fall back on their right to adopt policy with or without input from local teachers even so, educators and school district leaderships reached agreements on thousands of local contracts in the state's then 295 school districts all of these agreements were made without a strike

ALABAMA SEES LITTLE PROGRESS IN ACHIEVING CIVIL RIGHTS

Student Nonviolent Coordinating Committee (SNCC) held an ambitious voter registration campaign in Selma, Alabama [1963] but by 1965 little progress had been made to revitalize the effort, Dr. Martin Luther King came to Selma to lead several marches he was arrested along with 250 other demonstrators but still progress was miniscule marchers continued to meet violent resistance from local and state police one marcher, Jimmie Lee Jackson, was killed by officers -- February 17, 1965

PRESIDENT JOHNSON ORDERS OPERATION "ROLLING THUNDER" TO BEGIN

"Rolling Thunder" was the code name for sustained aerial bombing of the Democratic Republic of Vietnam (North Vietnam) -- March 2, 1965

Four objectives for the operation evolved over time:

- to boost the sagging morale of the Saigon regime in the Republic of Vietnam (South Vietnam);
- to persuade North Vietnam to stop supporting Communist insurgency in South Vietnam without actually taking any ground forces into Communist North Vietnam;
- to destroy North Vietnam's transportation system, industrial base and air defenses;
- to stop the flow of men and material into South Vietnam

Attaining these frequently changing goals was made additionally difficult for two reasons: restrictions were placed on the U.S. and its military alliance by the Cold War; assistance was received by North Vietnam from its Communist allies, People's Republic of China and the Soviet Union

During the month of March 1965, Operation "Rolling Thunder" raids on North Vietnam unleashed more tonnage of bombs, including chemical weapons, on the mostly civilian population than had been dropped in all of World War II

American Marines arrived at Danang Air Base (their number will grow to more than half a million)

WAR IN VIETNAM POLARIZED AMERICA

Supporters of U.S. involvement in Vietnam argued for what was known as the "Domino Theory" they believed if one country fell to Communism, then the bordering countries would be sure to fall as well -- much like falling dominoes

they noted that after World War II eastern Europe fell under Soviet Communism influence Peace advocates questioned the "Domino Theory"

some believed the Communist threat was used to hide American imperialistic intentions others argued the war in Vietnam was a civil war and America should not intervene Anti-war protestors identified moral arguments against United States' involvement in Vietnam moral imperatives against the war were especially popular among American college students conscientious objectors played an active role in spite of their small numbers

Opposition to the draft swelled as lower, middle class, blue-collar and African American

young people were targeted for military service
“baby boomers” were especially at the greatest risk to be drafted
Military critics of the war pointed out that the Vietnam War was political
America’s military mission lacked any clear idea of how to achieve its objectives
Civilian critics of the war argued that the government of South Vietnam lacked political legitimacy
thus (in their mind’s at least) support for the war was completely immoral
Media also played a substantial role in polarizing American opinion regarding the Vietnam War
majority of the media attention was focused on military tactics
with very little discussion about the necessity for a full scale intervention in Southeast Asia
civilian deaths in Vietnam were either downplayed or omitted entirely by the Western media
civilian casualties became a subject for protest
media covered the dissent and domestic controversy that existed within the United States,
but excluded the actual view of dissidents and resisters
when uncensored information and photographic evidence of casualties emerged
presented by the extensive television coverage on the ground in Vietnam
graphic war footage of casualties moved into America’s living rooms
every night with the nightly news on all of the major television networks

WASHINGTON STATE LEGISLATORS GIVE TEACHERS THE RIGHT TO BARGAIN

Teachers in Washington State enjoyed a few specific rights outlined in state law
“personal service contracts” with their school district employer contained only the annual salary,
number of school days to be taught, dates of required “In-Service” days
and the teaching assignment
teachers who coached or had other extra duty assignments
usually received a supplemental contract
in some school districts local school board policies granted teachers additional privileges
but these policies were always subject to change by the board -- they were never a right
Passage of the Washington State Professional Negotiations Act by the State Legislature -- 1965
required local school boards to confer and negotiate with elected employee groups
before the final adoption of key school district policies
school boards resisted the requirement as an infringement on their authority
but the Washington Education Association was granted the right to negotiate
professional contract provisions directly with local school boards for the first time
(classified [non-certified] school employees were granted the right to negotiate [1967])

FREEDOM MARCHES ATTEMPTS TO GAIN VOTING RIGHTS

Student Nonviolent Coordinating Committee (SNCC) led 600 people on a fifty-four mile walk
from Selma, Alabama to the state capital in Montgomery -- March 7, 1965
Six blocks into the march, state troopers and local police officers, some on horseback,
attacked with billy clubs, tear gas, rubber tubes wrapped in barbed wire, and bull whips
they drove the marchers back into Selma -- at least sixteen marchers were hospitalized
National television broadcasts of news footage showing lawmen attacking unresisting marchers
provoked an angry national response
Additional marches from Selma provoked other angry responses from local residents

as whites murdered another voting rights supporter, Rev. James Reeb who died [March 11]

PRESIDENT LYNDON JOHNSON ADDRESSES THE NATION

President Johnson gave a television address -- March 15, 1965

in support of a Voting Rights Bill he sent to Congress in which he stated: **“But even if we pass this bill, the battle will not be over. What happened in Selma is part of a far larger movement which reaches into every section and state of America. It is the effort of American Negroes to secure for themselves the full blessings of American life.**

Their cause must be our cause too. Because it is not just Negroes, but really it is all of us, who must overcome the crippling legacy of bigotry and injustice. And we shall overcome.”⁴⁵⁹

(Ku Klux Klansmen shot and killed Detroit homemaker Viola Liuzzo [March 25])

PROJECT GEMINI ACHEIVES REMARKABLE SUCCESS

Two previous unmanned Gemini flights had been undertaken to develop long-duration spaceflight, space rendezvous and docking with a space capsule, targeted re-entry and Earth landing

Gemini III Astronaut Grissom Young -- March 23, 1965

was successfully launched using a Titan II rocket

he completed three orbits of the Earth in four hours, fifty-two minutes thirty-one seconds

U.S. ATTEMPTS TO END THE VIETNAM CONFLICT

An American campaign against North Vietnam’s transport system began -- April 3, 1965

Navy and Air Force planes hit bridges, road and rail junctions, truck parks and supply depots in a month-long offensive

Next the U.S. offered North Vietnam economic aid in exchange for peace -- April 7, 1965

but the offer was summarily rejected. Two weeks later,

(Two weeks later President Johnson raised America’s combat strength in Vietnam to more than 60,000

Allied forces from Korea and Australia were added as a sign of international support)

STUDENT PROTEST GROUPS LEAD THE EFFORT AGAINST THE WAR

Students joined the antiwar movement

because they did not want to fight in a foreign civil war that they believed did not concern them or because they were morally opposed to all war

others disliked the war because it diverted funds and attention away from problems in the U.S.

intellectual growth and gaining a liberal perspective at college caused many students

to become active in the antiwar movement

another attractive feature of the opposition movement was that they were a popular social event

Student Nonviolent Coordinating Committee (SNCC) and Students for a Democratic Society (SDS)

led about 25,000 protesters on the first of several anti-war marches

that were held in Washington, D.C. -- April 17, 1965

Student Nonviolent Coordinating Committee (SNCC) was active in the Civil Rights movement

⁴⁵⁹ Congressional Record: Proceedings and Debates of the Eighty-ninth Congress, First Session, Volume 111, Part 4. P. 5060.

Students for a Democratic Society (SDS) best-known national student organization
was inspired by the civil rights movement
SDS's all-encompassing progressivism helped generate activities on campuses around the country
In fact, the Anti-war movement was less a unified army
than a rich mix of political notions and visions
tactics used were diverse: legal demonstrations, grassroots organizing, congressional lobbying,
electoral challenges, civil disobedience, draft resistance and political violence

EDWARD R. MURROW PASSES AWAY

Famed newsman Edward R. Murrow's CBS radio reports from London during the World War II blitz
transfixed American listeners and made his a familiar voice throughout the nation
Murrow returned to America near the war's end [March 1945]
he was surprised that he was hailed as a star by his followers across the nation
Murrow served as CBS's vice-president in charge of public affairs [1945-1947]
and was elected to the board of directors [1949]
Murrow, working with his long-time friend Fred Friendly, produced and hosted
CBS's new radio program, *Hear It Now*
Murrow traveled to Korea to cover the Korean War
he often interviewed common soldiers, exposing listeners to the grim life at the front
reinforced by the eerie sound of artillery fire in the background
American public was more than intrigued
when photos of Murrow interviewing soldiers deep within trenches were released
Hear It Now proved to be exceptionally popular to radio listeners
CBS asked Murrow to convert *Hear It Now* to a television format
although initially reluctant, he finally accepted the idea
See It Now, premiered on television ([November 18, 1951] and continued until [July 7, 1958])
Ed Murrow went on to pioneer investigative reporting in the new medium of television
he was never afraid to tackle difficult and controversial topics
his television documentaries and commentaries
often represented the plight of America's poor and powerless
(his high ethical standards and persistence in the search for truth
continues to inspire journalists to this day)
See It Now often centered on people of Murrow's own background
and segments of society often ignored by the mainstream press:
the poor, farmers, African Americans, immigrants and the everyday man and woman
these topics sparked interest among viewers
American audiences continued to watch these reports
and deeply appreciated Murrow's truthful analysis and compelling presentation
Edward R. Murrow developed the television documentary format
research and fieldwork assured the accuracy of his reports to the public
one notable [1952] special episode was entitled *Christmas in Korea*
Murrow spent Christmas Day interviewing American soldiers
assigned to fight for the United Nations' combat brigade
another documentary on *See It Now* was *Harvest of Shame* [November 1960]

which focused on the harsh living conditions of migrant workers
other notable episodes tackled issues like the link between lung cancer and smoking, poverty,
and the [1954] desegregation of schools
however, all of these were overshadowed by one of Murrow's most controversial broadcasts
exposing U.S. Senator Joseph McCarthy and his Red-Baiting senate hearings
searching for Communists in the federal government [1953-1954]
Ed Murrow worked on his other weekly program, *Person to Person* [1953-1959]
during this series Murrow informally chatted with famous people in their own homes
during these non-confrontational talks guests were permitted to direct the conversations
Murrow also hosted *Small World*, a [1959] talk show
during which political opponents met for one-on-one debates
that show soon ceased to exist as a weekly program
it was replaced with special broadcasts sponsored by the *See It Now* crew, including Murrow,
these specials were titled *CBS Reports*
Ed Murrow resigned from CBS [1961] to take up an offer by President John F. Kennedy
to be the head of the United States Information Agency
Murrow had the job for only three years before he was diagnosed with lung cancer [1964]
due to life-long smoking
At age of 57 Edward R. Murrow died at his New York farm -- April 27, 1965
his charisma, perseverance, and honesty proved to future generations that those traits could
lead to great achievements in the fields of broadcast journalism and investigative reporting
Numerous academic resources have been dedicated to Murrow,
including Washington State University's Edward R. Murrow School of Communications
In many ways, Murrow changed the way we hear and see the news
he was a master of his craft⁴⁶⁰

EARTHQUAKE AGAIN SHAKES THE PUGET SOUND REGION

Seattle-Tacoma-Olympia area suffered a moderately strong (6.5) earthquake
at -- 8:30 a.m. Pacific Daylight Time April 29, 1965
probable epicenter was placed north and west of Gig Harbor
landslides occurred but no aftershocks of the earthquake were felt
however, three persons were killed by falling debris
one in downtown Seattle and two on Seattle's Harbor Island
Property damage was a very light \$50 million -- some of it due to the previous ([1949] quake
minor damage was widespread through Seattle to Everett on the north
and to Olympia on the south
damage extended from a few miles east of Renton to almost as far west as the Hood Canal
most of the damage consisted of broken chimneys, cracked mortar between concrete blocks,
fallen fluorescent light fixtures and loosened brick facing
damage to split-level homes was greater than in other frame residences
because the two sections of such homes vibrated at different frequencies

⁴⁶⁰ Katie Bailey, *History Day award winner -- Murrow, Edward R. (1908-1965): One Man, One Microphone, One Murrow*, Essay 10224, HistoryLink. org, September 30, 2009.

concentrating stress along the junction between the sections
some split-level houses collapsed completely
structural damage in multistory buildings was generally limited
Damage in Olympia-Tacoma was spotty
in Tacoma damage occurred mainly to cornices and chimneys of older structures
built on soft ground in lowland areas and on firmer gravel in highland areas
in Olympia, no damage was noted on the mud flats
damage was primarily confined to the old part of the city
and to areas of the port built on artificial fill
but the Washington State Capitol dome was cracked
its shear walls and columns were left in such poor condition that a major aftershock
could have caused them to collapse entirely
legislative building was temporarily closed to reduce the impact of future occurrences
government activities were moved to nearby motels
(State of Washington performed additional seismic improvements [1975])
In Seattle, schools normally serving 8,800 students were closed
until inspections could be carried out to determine their safety
Boeing aircraft plants in Seattle and Renton suffered significant damage
both are located on natural mud flats and artificial fill
floors settled away from the foundation piling and interior concrete block was cracked,
fluorescent light fixtures were down, acoustical ceiling tile fell,
concrete tiles fell away from structural steel supports
Damage to water mains occurred in Seattle and Everett
in Seattle three water mains (two 20-inch and one 12-inch pipe) failed
in Everett two of three 48-inch water supply lines broke
where the trestle carried them crosses an area of poor soil
pressure surges in pipes were reported in Tacoma but did not cause pipe failures
Two Bonneville Power Administration transmission towers toppled near Everett
these towers carried 230,000-volt electrical power from Chief Joseph Dam
to the Snohomish substation

YOUNG AMERICANS FOR FREEDOM ORGANIZE CONSERVATIVES ON CAMPUSES

U.S. became polarized between those who demanded an end to the war
and those who advocated continued involvement in Vietnam
Young Americans for Freedom were organized for the purpose of publicizing the conservative causes
this group became active on college campuses across the nation generating support for
America's involvement in the war in Vietnam
Young Americans for Freedom were opposed to the spread of Communism,
as they supported United States involvement in Vietnam and opposed the draft

PRESIDENT LYNDON JOHNSON CHANGES THE STRATEGY OF THE WAR

U.S. government had come to realize that the South Vietnamese government
needed a solid base of popular support if it were to survive the insurgency
At a Dinner Meeting of the Texas Electric Cooperatives, Inc. -- May 4, 1965

President Johnson said, **“So we must be ready to fight in Vietnam, but the ultimate victory will depend upon the hearts and the minds of the people who actually live out there. By helping to bring them hope and electricity you are also striking a very important blow for the cause of freedom throughout the world.”**⁴⁶¹

“Civil Affairs” units, were used extensively for the first time since World War II

these units, while remaining armed and under direct military control,

engaged in what was known as “nation-building”

constructing (or reconstructing) schools, public buildings, roads and other infrastructure;

conducting medical programs for civilians who had no access to medical facilities;

facilitating cooperation among local civilian leaders;

conducting hygiene and other training for civilians and similar activities

This policy attempted to win the hearts and minds of the Vietnamese people,

but it was often was at odds with other aspects of the war such as:

- emphasis on “body counts” as a way of measuring military success on the battlefield;

- bombing of villages (as noted by CNN’s Pulitzer Prize winning journalist

Peter Arnett’s famous quote: **“it was necessary to destroy the village to save it”**⁴⁶²

- killing of civilians

UNIVERSITY OF CALIFORNIA, BERKELEY IS THE LOCATION OF A MASS TEACH-IN

Vietnam Day Committee, a new anti-war group, organized a student demonstration

on the University of California, Berkeley campus -- May 5, 1965

activities included a teach-in attended by 30,000

activists marched on the Berkeley Draft board where forty students burned their draft cards

President Lyndon Johnson was burned in effigy

(nineteen more draft cards were burnt [May 22]

at a demonstration following another Berkeley teach-in)

At that time, only a fraction of all men of draft age were actually conscripted,

but the Selective Service System office (“Draft Board”) in each locality

had broad discretion as to whom to draft and whom to exempt

GEMINI IV CARRIES TWO AMERICAN ASTRONAUTS INTO SPACE

Astronauts Ed White and James McDivitt rode a Titan II rocket into space -- June 3-7, 1965

he remained in orbit around the earth for four days, one hour fifty-six minutes and twelve seconds

during that time Ed White attempted and complete the first successful “walk in space”

during a twenty-two minute exercise

U.S. SUPREME COURT BECOMES MORE LIBERAL AS NEW JUSTICES ARE APPOINTED

Justice William O. Douglas increased his influence and was able to make his views into law

his most notable contribution was the landmark *Griswold v. Connecticut* decision -- June 7, 1965

which struck down state restrictions on the sale of contraceptives to married couples

as the Court recognized a constitutional right to privacy

⁴⁶¹ Lori Maguire editor, *The Cold War and Entertainment Television*, P. 130.

⁴⁶² David L. Anderson, *The Columbia History of the Vietnam War*, P. 48.

ROALD FRYXELL RETURNS TO THE MARMES ROCKSHELTER SITE

Roald Fryxell, a young WSU geologist and member of Dr. Richard Daugherty's original team, returned to the archeological site to conduct further studies

on the geologic strata at the rockshelter

Fryxell asked landowner Roland Marmes to use his bulldozer to cut a trench through deposits at the mouth of the rockshelter

Fryxell followed as Marmes carefully carved through the deposits four inches at a time about forty feet in front of the shelter and about twelve feet below the surface,

the bulldozer uncovered what were later identified as human bones

(Roald Fryxell and others revisited the site often during the next two years)

U.S. EXPANDS THE GROUND WAR IN VIETNAM

General William Westmoreland launched the first purely offensive operation by U.S. ground forces against Vietcong forces in the territory just northwest of Saigon -- June 27, 1965

CONSTRUCTION BEGINS ON THE FOURTH AND LAST LOWER SNAKE RIVER PROJECT

Lower Granite Dam named for Granite Point is located approximately fifteen miles northeast of Pomeroy, Washington in Garfield County

Preliminary construction started on the dam -- July 1965

this was the final dam of a series of four dams built in the Lower Snake River Project

after Ice Harbor Dam Project [1955-1961], Lower Monumental Dam Project [1961-1969] and Little Goose Dam Project [1963-1970]

There was considerable controversy regarding construction of the Lower Granite Dam:

- United States government refused to increase spending for the dam funds were held back in an effort to fight inflation
- area above the dam was an historical site as well as an ancient Nez Perce Tribe burial ground (during a two-year project [1973- 1974] about 275 Nez Perce graves were relocated and reinterred at the Nez Perce Historical Park in Spalding, Idaho other artifacts and Native American petroglyphs were excavated and catalogued⁴⁶³ Army Corps of Engineers, Washington State University and other schools as well as local historians from both Garfield and Asotin County assisted in the excavation of the site that the Lower Granite Lake would flood
- newly active environmental movement began to voice concerns about the dam's effect on fish Association of Northwest Steelheaders took a lead role in the opposition Washington's Department of Fisheries and Department of Game joined in a lawsuit U.S. District Judge William Goodwin in Spokane dismissed the suit [November 1971] he ruled federal courts lacked the jurisdiction to stop construction Ninth Circuit Court of Appeals reversed this decision [September 1973] and sent the case back to District Court for reconsideration

⁴⁶³ Phil Dougherty, *Initial phase of the Lower Granite Dam on the Snake River is completed on February 15, 1975*, HistoryLink.org, Essay 7715, April 24, 2006.

Main structure and three generators were completed [1969]
with an additional three generators finished [1981]
(However, the litigation proceeded in District Court even after the dam was completed
and the first three power generating units went online
District Judge Manuel Real ruled in favor of the Corps of Engineers [September 1977]
noting the construction issue was essentially moot since all of the four dams
along the Snake River were by this time in operation
however, Judge Real ordered the Corps to enhance fish runs along the river
studies for enhancement were funded for several years but studies ended [1980]
when federal funding for them was eliminated)

PRESIDENT JOHNSON EXPANDS THE DRAFT

President Johnson doubled the number of young men to be drafted per month
from 17,000 to 35,000 -- late July 1965
At first a few draft-age young males risked jail time and/or ostracism by openly refusing induction
(by the end of the decade, Canada became a popular means of escape from military duty)

VOTING RIGHTS ACT OF 1965 IS SIGNED INTO LAW

One of the most important pieces of civil rights legislation ever passed by Congress,
the 1965 Voting Rights Act gave the U.S. Attorney General
authority to supervise voter registration in areas where statistics suggested
minorities were unable to register on an equal basis
in addition federal authorities were to oversee elections in places
where African Americans had been blocked from voting in the past
Voting Rights Act also banned literacy tests and similar practices
designed to hamper minority voter registration
Echoing the language of the Fifteenth Amendment to the U.S. Constitution
Voting Rights Act prohibited states from imposing any “...**voting qualification or prerequisite
to voting, or standard, practice, or procedure ... to deny or abridge the right of any citizen of the
United States to vote on account of race or color.**”
specifically, Congress intended the Act to outlaw the practice of requiring
otherwise qualified voters to pass literacy tests in order to register to vote,
(this had been used to prevent African Americans from exercising the franchise)
However, Section 5 of the Voting Rights Act had to be renewed by congress after five years
this sections requires that any change in voter qualifications in southern states
may not be imposed until the change is reviewed by the United States Attorney General
or the U.S. District Court in the District of Columbia
Voting Rights Act was signed into law by President Lyndon B. Johnson -- August 6, 1965
President Johnson expressed his concern to associates that signing the bill
would lead to the loss of the South for the Democratic Party which supported Civil Right
Voting Rights Act of 1965 had an immediate and positive impact for African Americans
within months of passage of the Voting Rights Act, 250,000 new black voters had been registered
number of African Americans registered to vote in the South
increased from twenty-nine percent [1960] to almost sixty-seven percent [1969]

when Congress passed the Voting Rights Act, about 100 African Americans held elective office
all of these office-holders were in northern states
(by [1989] there were more than 7,200 African Americans in office
including more than 4,800 Southern blacks who held top positions
in city, county, and state governments in the South
on [November 4, 2008] Barack Obama was elected President of the United States)
But the Act was set to expire [August 6, 1970] if Congress did not take action to renew it

URBAN LIVING CONDITIONS FOR BLACKS REMAIN INADEQUATE

None of the federal laws passed during the [1950s and 1960s] changed the condition in which blacks found themselves in urban ghettos
In protest to these living conditions, riots broke out in the Los Angeles neighborhood of Watts an impoverished neighborhood with very high unemployment
Watts' white police department had a history of abuse against blacks
while arresting a young man for drunk driving, police officers argued with the suspect's mother this conflict triggered a massive destruction of property through six days of rioting
thirty-four people were killed and property valued at about \$30 million was destroyed making the Watts Riots among the worst in American history -- August 11-15, 1965

U.S. LEARNS OF AN ATTACK PLANNED AGAINST A U.S. MARINE BASE IN VIETNAM

After a deserter from the 1st Vietcong regiment revealed an attack was imminent against the U.S. Marine base at Chu Lai, the American army launches Operation "Starlite" this was the first major battle of the Vietnam War -- August 17, 1965
United States won a resounding victory as ground forces, artillery, ships and air support combined to kill nearly 700 Vietcong soldiers
U.S. forces sustained forty-five dead and more than 200 wounded

GEMINI V IS LAUNCHED INTO SPACE

Command Pilot Gordon Cooper, Jr. and Charles "Pete" Conrad were carried into space for a week-long flight -- August 21-29, 1965
these Astronauts were to conduct the first test of fuel cells for electrical power during 120 orbits of the Earth, tests were conducted on the guidance and navigation system in anticipation of future rendezvous missions

BURNING A DRAFT CARD BECOMES ILLEGAL

President Johnson signed a Bill into law making it a crime to burn a draft card -- August 31, 1965
young protestors brazenly burned their draft cards anyway
Draft Boards frequently changed their classification from "I-S" or "II-S" (student) to "I-A" (first choice for induction)

INDIAN PROTESTERS STAGE MORE FISH-INS

As protests increased on the Nisqually River, near Frank's Landing tensions came to a head
Native Americans of the Survival of the American Indian Association (SAIA) were not pacifists they frequently threatened to defend themselves -- with violence if necessary

State police arresting a group of protesting Indians rammed their boat
protesters were dumped into the water -- October 7, 1965
State officers raided Billy Frank's property to confiscate his fishing gear -- October 9
they met with violent resistance from Native Americans
ACLU agreed to defend Indians charged with interfering with the police during the confrontations
A well-publicized protest culminated in violence -- October 13
both sides levied charges of assault and brutality

ANTI-WAR PROTEST MOVEMENT BECOMES WORLDWIDE

Anti-war movement had significantly expanded to become a national and even global phenomenon
anti-war protests drawing 100,000 were held simultaneously
in as many as eighty major cities around the U.S., London, Paris and Rome -- mid-October

SEATTLE HOLDS A PROTEST RALLY

University of Washington chapter of Students for a Democratic Society (SDS)
and the Seattle Committee to End the War in Vietnam organized a protest march
from the Federal Courthouse at Fifth and Spring Street to a noon rally at Westlake Mall
that began under police escort down Fourth Avenue in Downtown Seattle
Almost 400 protesters turned out for Seattle's first major demonstration against the Vietnam War
they were greeted with hecklers from both counter-protesters and pro-war bystanders who chanted
"Keep Washington Green—not Red!" and **"For Sale Cheap—Ho Chi Minh Sandals!"**⁴⁶⁴
at Westlake Mall counter-protesters were kept one block away from the rally,
as they attempted to drown out the antiwar voices by singing the Mickey Mouse Club anthem
Russell Wills, a University of Washington philosophy graduate student,
became the first Seattle citizen to refuse induction
in protest against the war -- October 16, 1965⁴⁶⁵
he wrote a letter to his draft board stating he was opposed to U.S. involvement in Vietnam
on both legal and moral grounds -- he included that he had destroyed his draft card
(one week later, he was given a 1-A draft classification with no explanation
he did not receive a notice explaining the grounds for reclassification until [January]
too late for any appeal
denied conscientious objector status, he felt he had no recourse but to refuse induction
he was arrested, tried and sentenced to five years in prison [September]
which was later reduced to two years)

GEMINI VI SUFFERS A SET-BACK

Preparations to launch an unmanned space vehicle were completed
this was to be part of an experiment to dock with Gemini VI
in preparation for a manned flight to the moon
Agena, the docking vehicle, failed to reach orbit -- October 25, 1965
Gemini VI was removed from the launch pad and was replaced by Gemini VII

⁴⁶⁴ *Jeff Stevens, Mickey Mouse Fight Club, Radical Seattle Remembers.com, 2010.*

⁴⁶⁵ *Jeff Stevens, Hell No! Radical Seattle Remembers.com, 2010.*

Gemini VI was re-designated Gemini VI-A

ANTI-WAR PROTESTORS MAKE THE ULTIMATE SACRIFICE

Gruesome images of Buddhist monks lighting themselves on fire in protest of America's involvement in South Vietnam were shown on national television networks
Television displayed images of Norman Morrison, a thirty-two-year-old Quaker setting himself on fire in front of The Pentagon -- November 2, 1965
Roger Allen La Porte, of the Catholic Worker Movement did the same in front of United Nations Headquarters in New York City

INDIANS RECEIVE SUPPORT IN THEIR EFFORT TO KEEP THEIR TREATY RIGHTS

Increased publicity regarding fish-ins brought support from outside organizations
Episcopal Bishop of Olympia offered his financial and moral support -- November 17, 1965 including a donation of \$1000 for Survival of the American Indian Association (SAIA)
other churches also provided monetary support -- although some did so anonymously

NATIONAL CELEBRITIES ADDRESS A NEW YORK CITY PROTEST RALLY

Coretta Scott King, wife of Rev. Dr. Martin Luther King, Students for a Democratic Society (SDS) President Carl Oglesby and Dr. Benjamin Spock, author of *Baby and Child Care*, the book used by mothers to raise a generation of children, all spoke at an anti-war rally of about 30,000 in Washington, D.C.
this was the largest demonstration to date
parallel protests occurred elsewhere around the nation -- November 27, 1965
On that same day, President Johnson announced a significant escalation of U.S. involvement
American troop increased from 120,000 to 400,000 in Indochina

DAVE BECK RETURNS HOME

After his release from the federal prison at McNeil Island -- December 11, 1965
Dave Beck returned to private and modest public life
he lived on Seattle First Hill in the basement of a house that he himself had built [in the 1940s] for his mother and sister
he retained his \$50,000-a-year Teamster president's pension
he became a multimillionaire investing in parking lots
For some forty years Dave Beck was a key leader of the Teamster's Union both on the West Coast and nationally (from the late [1920s] to the early [1960s])
to his death, Beck claimed never to have even seen -- much less signed -- the Joint Council 28 Building Association report that led to his conviction

In summarizing his own life, Dave Beck said, "**Looking back on my career, I have made many close friends, inside as well as outside of labor. Despite all the fighting that was directed against me by Seattle's business community and the State of Washington, I don't think there's a single person, right now [1978] who has any more friends in Seattle business than Dave Beck. That has to say something about me.**"⁴⁶⁶

⁴⁶⁶ Ross Reider, *Beck, Dave (1894-1993), Labor Leader*, HistoryLink.org, Essay 2972, February 14, 2001.

(Dave Beck died at the age of 99 in Northwest Hospital in Seattle [December 26, 1993]
he is buried in Calvary Cemetery, Seattle)

NASA LAUNCHES TWO VEHICLES INTO SPACE

Gemini VII carried Command Pilot Frank F. Borman, II and James A. Lovell, Jr.
into orbit -- December 4-18, 1965
malfunctions began as some of the thrusters stopped working
this was traced to the fact that they had an old type of laminate in the thrust chamber
on the twelfth day the fuel cells started to give only a partial amount of power
manufacturers of the Gemini spacecraft decided that the spacecraft could survive
by battery power alone for the next couple of days
they spent thirteen days, eighteen hours and thirty-five minutes in space for a total of 206 orbits
astronauts' objective was to determine whether humans could live in space for fourteen days
this was nearly met

Gemini VI-A carrying Astronauts Walter Schirra and Thomas Stafford
blasted off from Cape Kennedy for a two day mission -- December 15-16, 1965
(Gemini VI [October 25] had failed to reach orbit due to an engine failure)

Gemini VI-A and Gemini VII rendezvoused in space as they came within one foot of each other
they remained between one hundred yards and one foot apart for over five hours
and could have docked had they been so equipped

Both space vehicles successfully splashed down
Gemini VI-A -- December 16, 1965
Gemini VII -- December 18

AMERICA EXPANDS ITS WAR EFFORT

U.S. forces launched Operation "Crimp" deploying nearly 8,000 troops -- January 8, 1966
this was the largest American operation of the war
Goal of the campaign was to capture the Vietcong headquarters for the Saigon area
believed to be located in the district of Chu Chi
although the area was razed and repeatedly patrolled,
American forces fail to locate any significant Vietcong base

RISE OF BLACK POWER IN AMERICA

With black militancy on the rise, ghetto residents directed acts of anger at the police
black residents, tired of police brutality, continued to riot
"Black is beautiful!" became the rallying cry of protestors
as they stood up to generations of abuse, fear and discrimination -- January 1966

Some young people joined groups such as the Black Panthers
whose popularity was based in part on their reputation for confronting police officers

Civil Rights Movement in America found itself splitting into two camps
Dr. Martin Luther King and others advocated the non-violent approach to seek change
Stokely Carmichael, the new leader of Student Nonviolent Coordinating Committee (SNCC),
and others began urging African American communities to confront the Ku Klux Klan
armed and ready for battle

“Black Power” was strongly advocated by the Black Panther Party
founded by Huey Newton and Bobby Seale in Oakland, California
Black Panthers followed the “by-any-means necessary” teachings of Malcolm X
to stop inequality and police brutality
Black Panther clothing consisted of black leather jackets, berets, slacks and light blue shirts
referring to police officers as “pigs,” displaying shotguns and a raised fist
and often using the statement “Power to the people”
but they were also remembered for setting up free breakfast programs,
Dr. King was not comfortable with “Black Power”
which sounded like “black nationalism” to him
SNCC activists began to embrace the “right to self-defense”
in response to attacks from white authorities
they booed Dr. King for continuing to advocate non-violence

CIVIL RIGHTS MOVEMENT MOVES INTO THE NORTH

Riots in Harlem and Bedford-Stuyvesant in New York and rioting in Philadelphia
showed the Civil Rights Movement had work to do outside of the South
Dr. Martin Luther King and the Southern Christian Leadership Conference (SCLC)
traveled to Chicago to try to improve housing, jobs and schools for the city’s black residents,
using non-violent methods -- January 1966
Many of Chicago’s black citizens, who make up a quarter of the population,
lived in decaying, segregated neighborhoods where city and landlord services tended to disappear
as soon as the last whites move away
Mayor Richard J. Daley used his political machine to prevent protesters from gaining any traction

MEMBERS OF THE MILITARY BECOME INVOLVED IN THE ANTI-WAR PROTESTS

Protest activities escalated to include members of the military -- 1966
about 100 veterans attempted to return their decorations to the White House in protest of the war
but were turned back -- February 1966
three army privates known as the “Fort Hood Three” refused to deploy in Vietnam
they called the war “illegal and immoral” -- and were sentenced to prison terms

NATIVES AMERICANS GAIN WIDE SUPPORT FOR THEIR PROTESTS

Survival of the American Indian Association (SAIA) continued its protest efforts
another celebrity, African-American comedian and activist Dick Gregory, joined the cause
his arrest at a fish-in brought national publicity to the Indians’ cause -- February 6, 1966
SAIA gave tours of Frank’s Landing and other fish-in sites to people who could be effective
in getting their message out
several filmmakers, publishers and reporters were given guided tours of the fish-in sites
they were given access to members of the community at Frank’s Landing
American Friends Service Committee (Quakers) became involved because of the civil rights issues
American Civil Liberties Union (ACLU) agreed to defend Indians directly involved in fish-ins

SURVIVAL OF THE AMERICAN INDIAN ASSOCIATION (SAIA) CHANGES LEADERS

Janet McCloud left SAIA to pursue the goal of educating others about Native American culture
Hank Adams became the leader of the SAIA -- 1966

he worked to further SAIA's involvement with other movements and organizations
as militancy increased under Adams' leadership,

non-native students and counterculture supporters were attracted to Frank's Landing
work began on a major documentary film (that would eventually be released [1971])

PROJECT GEMINI SUFFERS A HUGE LOSS

Gemini IX Command Pilot Elliott See and Pilot Charles Bassett were both killed
when their airplane crashed four months before the scheduled mission -- February 28, 1966
Back-up Command Pilot Elliott Thomas P. Stafford and Eugene A. Cernan
were promoted to the prime crew of Gemini IX-A

CONGRESS REDUCES VETERANS' BENEFITS TO REFLECT THE CHANGING TIMES

President Lyndon Johnson believed that many of his "Great Society" social programs
removed the need for sweeping veterans' benefits

But, prompted by unanimous support given the bill by Congress,

President Johnson signed the Veterans Readjustment Benefit Act -- March 3, 1966
this law changed the nature of military service in America

as it extended benefits to veterans who served during times of war and peace

Almost immediately the veterans' community charged that the bill did not go far enough
at first, single veterans who had served more than 180 days

and had received an "other than dishonorable discharge" received only \$100 a month
to pay for tuition and all of their expenses

this amount was sufficient only to pay only for books and minor fees

veterans of the Vietnam War disliked the fact that the bill did not provide them
with the same educational opportunities as their predecessors

thus only about 25% of eligible Vietnam veterans used their education benefits

(In the face of fierce objections from the fiscally conservative Nixon and Ford Administrations
efforts were made to increase veterans' benefits levels

unmarried veteran's benefits were raised to \$130 a month [1967]
they rose to \$175 [1970])

GEMINI VIII DOCKS WITH ANOTHER SPACE VEHICLE

Gemini VIII carrying Astronauts Neil Armstrong on his second trip into space
and David Scott on his first mission were launched into space -- March 16, 1966
for a flight lasting ten hours twenty-six minutes
they were to dock with an unmanned space vehicle

Armstrong slowly maneuvered this space capsule to within inches of his unmanned target
docking latches clicked into locked position

a green light indicated that the docking had been successfully completed

"Flight, we are docked! Yes, it's really a smoothie,"⁴⁶⁷ Armstrong radioed to the ground

⁴⁶⁷ James R. Hansen, *First Man: The Life of Neil A. Armstrong*, P. 257.

Scott noticed that they were in a roll

Armstrong used the Gemini's Orbit Attitude and Maneuvering System to stop the roll
but the moment he stopped using the thrusters, the roll started again

Scott noticed Gemini's fuel had dropped to thirty per cent indicating there was a problem
they were forced to undock and move away from the target vehicle

Gemini spacecraft began to roll even faster and approached one revolution per second
due to the violent motion astronauts were now in danger of impaired vision
and loss of consciousness

Armstrong shut down the Orbit Attitude and Maneuvering System

he fired the Re-entry Control System to stop the spin

they tested the Orbit Attitude and Maneuvering System

and discovered Number 8 thruster was stuck on

mission rules dictated that the flight be terminated

once the Re-entry Control System had been fired for any reason

Gemini VIII prepared for an emergency landing

it was decided to let the spacecraft reenter earth's gravitation one orbit later

so that it could land in a place that could be reached by the secondary recovery forces
at a new landing site 500 miles east of Okinawa

both astronauts and the space capsule were successfully recovered -- March 17, 1966

ROY OLMSTEAD TURNS HIS LIFE AROUND

During his years at McNeil Island, former bootlegger and Seattle policeman Roy Olmstead
converted to the Christian Science faith

he became an active practitioner dedicated to the belief that liquor is destructive

he was divorced from his wife Elise [August 5, 1943] -- she dropped from public view

After his release from prison, Olmstead made his living selling furniture

he also spent a considerable amount of time visiting jails and working with the prisoners

Roy Olmstead stayed in Seattle and eventually became a full time Christian Science practitioner

he operated his ministry out of a small, unassuming office in the Times Square Building

he spent all of his time counseling clients, teaching the Bible,

and visiting jails and prisons in the Puget Sound area in an attempt to rehabilitate inmates

Roy Olmstead remained a vibrant and active community member

he taught Sunday school and visited the prisoners in the King County Jail every Monday morning
although he led a commendable life during his last thirty-five years,

Roy Olmstead would always be known in Seattle as "King of the Puget Sound Bootleggers"

he died, without fanfare at age seventy-nine -- April 30, 1966

ANTI-WAR PROTEST ACTIVITIES GROW IN NUMBER

Another large demonstration took place outside the White House and the Washington Monument
as 10,000 protestors called for an end to the war -- May 15, 1966

Protests, strikes and sit-ins continued at the University of California, Berkeley

and across other campuses throughout the year

Anti-war movement drew the support of celebrities

American folk singer, songwriter and musician Joan Baez and political activist Rev. A.J. Muste organized over 3,000 people across the nation in an antiwar tax protest participants refused to pay their taxes

or they did not pay the amount designated for funding the war

Heavyweight boxing champion Muhammad Ali (formerly Cassius Clay)

declared himself to be a conscientious objector and refused to go to war

he was stripped of his title and banned from professional boxing for more than three years (Ali was sentenced to five years in prison for draft evasion [1967]

but his conviction was later overturned on appeal)

At rallies protestors shouted slogans that became the fighting words of the anti-war movement

“Hell no, we won't go”, “Bring our boys home”, “Eighteen today, dead tomorrow”

“Make love, not war”, “Johnson lied. People died”, “Stop the war, feed the poor”,

“End the nuclear race, not the human race”, “Not my son, not your son, not their sons”

“The Whole World is Watching!” “All we are saying is give peace a chance.”

and the very personal and hateful: **“Hey, hey LBJ, how many kids have you killed today?”**

Counter-protestors chanted slogans of their own: **“Love our country”, “America, love it or leave it”, “No glory like old glory”** (the nickname for the American flag)

PROJECT GEMINI SUFFERS A SETBACK

Astronauts of Gemini IX were to dock with an Agena Target Vehicle just as Gemini VIII had however, during the launch of the target vehicle -- May 17, 1966

its Atlas booster malfunctioned and it failed to make it to orbit

Lost Agena Target Vehicle was replaced with a newly-developed

Augmented Target Docking Adapter (ATDA) which was successfully launched -- June 1, 1966

GEMINI IX-A TAKES FLIGHT

Astronauts Thomas P. Stafford Command Pilot and Pilot Eugene A. Cernan lifted off -- June 3, 1966 docking with the Augmented Target Docking Adapter (ATDA) was one of the mission objectives also scheduled was a spacewalk during which Cernan would test the Air Force's

Astronaut Maneuvering Unit -- this was the first “rocket pack” to be used in space it had its own propulsion, stabilization system and oxygen supply

ATDA was first seen by the astronauts three hours and twenty minutes into the mission when they were fifty-eight miles away from the target vehicle

As they got closer they found the ADTA was in a slow rotation with the protective conical nose shroud still attached

Mission control decided to send the astronauts out to investigate the situation however, trouble began right from the start

after pumping up his pressure suit to three- and one-half pounds of pressure per square inch Cernan could not bend at all and he struggled to move inside his stiff suit

both astronauts did some planned rendezvous practice

that involved them moving away from the ATDA by firing their thrusters next they practiced approaching the ATDA from below

GEMINI IX-A ASTRONAUTS AGAIN APPROACH THE ATDA

Once again Astronauts Stafford and Cernan donned their space suits and set out for the ATDA attempting to remove the protective shroud proved frustrating and dangerous -- June 4, 1966
Stafford was concerned about wasting fuel keeping himself near the ATDA when there was little they could do with it
it was decided to postpone the spacewalk effort until the next day

ANOTHER ATTEMPT IS MADE TO DOCK WITH THE ATDA

Astronaut Gene Cernan reached the rear of the Gemini capsule
he began to prepare for his spacewalk -- June 5, 1966
Preparations took longer than planned due to lack of hand and foot holds -- he could find no leverage
things were made worse when, after sunset, his faceplate fogged up
he used his nose to clear a spot so he could see out
risks increased markedly as Cernan's pulse soared to about 195 beats per minute
and the flight surgeon on the ground feared he would lose consciousness
Cernan determined the risks of continuing his effort was too dangerous
he had poor visibility from within his spacesuit and he could not move very well
to continue he would have to disconnect himself from the umbilical that attached him to the Gemini
although he would still be attached by a longer thinner lead
he decided to cancel the rest of the spacewalk -- Mission Control and Commander Stafford agreed
Eugene Cernan's spacewalk had lasted two hours and seven minutes

GEMINI IX RETURNS TO EARTH

On their forty-fifth revolution around the Earth, the astronauts fired the retrofire rockets that slowed them down so that they would reenter -- June 6, 1966
They landed only 700 yards from the planned landing site
and were close enough to see the prime recovery ship, USS *Wasp*
this was the most accurate of any manned flight splashdown

OLDER GENERATIONS JOIN THE PROTEST MOVEMENT

Mothers and older generations of women joined the opposition movement, as advocates for peace
many were disgusted by the effect of the war and the draft had on the generation of young men
women saw the draft as one of the most disliked parts of the war machine
they sought to undermine the war itself by undermining the draft
many women in America sympathized with the plight of Vietnamese people affected by the war
they protested the use of Dow Chemical's napalm (a highly flammable gasoline jelly)
that was dropped on Vietnamese combatants and civilians alike
Saran Wrap and other products made by Dow Chemical Company were boycotted
also, every Sunday from 11:00 a.m. to 1:00 p.m. for eight years
members of Women For Peace showed up at the White House for a peace vigil
Federal officials often saw middle-aged women involved in peace organizations
as the most dangerous members of the opposition movement
because they were ordinary citizens who quickly and efficiently mobilized

GEMINI X IS LAUNCHED INTO SPACE

Astronauts John W. Young, Command Pilot on his second spaceflight and Pilot Michael Collins blasted into orbit -- July 18, 1966

This Gemini mission was to establish that radiation at high altitude was not a problem in the course of several experiments the astronauts completed two successful rendezvous first with the Agena booster vehicle located in a low orbit pattern above the Earth power from this craft's rocket was used to allow them to reach higher orbit Young and Collins next rendezvoused with the aborted Gemini VIII flight's Agena executing the program's first double rendezvous with no electricity on board the second rendezvous was accomplished with eyes only no radar was used in the experiment

Collins space-walked over to the dormant Agena at the end of a fifteen foot tether he retrieved a cosmic dust collecting panel from the side of the Agena Target Vehicle After three days and forty-three orbits in space, Gemini X returned to Earth -- July 21, 1966 they landed only three and a half miles away from the intended landing site and were recovered by the USS *Guadalcanal*

ANGRY MOBS SURFACE IN CHICAGO

Six months of effort by Dr. King and the Southern Christian Leadership Conference (SCLC) resulted in little progress so Civil Rights activists decided to take their protest out of the slums Dr. Martin Luther King focused national attention on white areas that exclude blacks protests were held identifying real estate interests that kept the city segregated

Dr. King proved realtors systematically deny blacks access to housing in white neighborhoods Jesse Jackson, a Chicago Theological Seminary student, was chosen by SCLC to lead operation breadbasket, a boycott of white businesses to pressure them to hire blacks and purchase goods and services from black contractors

Soon, angry white mobs attack the protesters

Acting on his own, Jesse Jackson announced a march into Cicero, Illinois which was a suburb especially known for its racial hatred concerned about possible rioting, leaders on both sides called a summit they agreed to enforce open housing laws and desegregate public housing

Dr. King announced that no more marches would take place in response, skeptical local black groups announced their own march -- August 1966 when 250 marchers went to Cicero, they found 3,000 law enforcement officers and a large mob of angry whites, who yelled slurs and threw bricks unconstrained by Dr. King and the SCLC, the group responded with violence

FEDERAL GOVERNMENT BECOMES ALARMED BY THE PROTEST ACTIVITIES

Congress' House Un-American Activities Committee began investigations of Americans who were suspected of aiding North Vietnam's National Liberation Front -- August 16, 1966 it was intended to make these activities illegal

Anti-war demonstrators disrupted the meeting and fifty were arrested

INDIAN PROTESTORS ESCALATE THEIR EFFORTS

Survival of the American Indian Association (SAIA) protests had a major impact
a variety of groups attended the fish-ins ensuring wider participation and a broad audience
Native Americans and about fifty non-native supporters set four nets at Frank's Landing
in the off-reservation area of the lower Nisqually River -- September 4, 1966
non-native supporters included members of the Washington Peace and Freedom Party,
Students for a Democratic Society, Socialist Workers' Party and the Black Panthers
presence of the Black Panthers assured a large police presence
State Fisheries officers watched from their side of the river
SAIA leader Hank Adams announced they would continue fishing for five days

WASHINGTON STATE'S FIRST ASTRONAUT IS LAUNCHED INTO SPACE

Gemini XI was the seventeenth manned American flight into space
Command Pilot Charles "Pete" Conrad, Jr., was on his second spaceflight
Pilot Richard F. Gordon, Jr. was born in Seattle [October 5, 1929]
he graduated from North Kitsap High School in Poulsbo
he received a Bachelor of Science degree in Chemistry
from the University of Washington [1951]
(Richard Gordon was also the pilot of the command module of Apollo XII
the second manned mission to the moon [1969])
Gemini XI was launched -- September 12, 1966
this was the first mission to attempt a rendezvous with an Agena Target Vehicle
on the first orbit around the Earth
this was achieved about ninety-four minutes after lift-off
using an on-board computer and radar equipment
with only minimal assistance from ground support
Agena's rocket engine was then used to achieve a world record high-apogee earth orbit
tethered together the astronauts created a small amount of artificial gravity
by spinning the two spacecraft
Gemini XI crew docked and undocked four times, and still had sufficient maneuvering fuel
remaining in the Gemini for an unplanned fifth rendezvous
Twelve scientific experiments were attempted ranging from the physics of spaceflight
to the study of weather patterns on Earth and conditions in the upper atmosphere
to the effect night vision in space and the impact of zero gravity on blood
to testing and evaluating power tools in space
After three days in orbit, Gemini XI returned to Earth -- September 15, 1966
this mission ended with the first totally automatic, computer-controlled reentry by the U.S.
Gemini XI splashed down only 2.8 miles from its recovery ship USS *Guam*

THIRD ATTEMPT IS MADE TO REPEAL RESTRICTIONS ON ALIEN LAND OWNERSHIP

Senate Joint Resolution 20 to amend the state constitution appeared on the voters' ballots
society had seen several significant changes since the first effort had failed [1960]
opposition to the war in Vietnam had intensified
Civil Rights Movement had reached its pinnacle in the South

and was spreading to Northern States with increasingly radical rhetoric
This time the voters' pamphlet took a strong pro-repeal position that the law then in effect
was a serious embarrassment to the state and was having a negative impact on international trade
first name listed on the long line of endorsements in the pamphlet
was Boeing Company President William Allen
Fear tactics took its toll on the voters, but the measure passed: 430,984 (50.94%) to 415,082 (49.06%)
(Asian immigrants making their way to Washington State in the new wave of immigration
ushered in by the [1965] federal Immigration Act and the war in South-East Asia
would no longer have face racist alien land laws to own homes or buy land)

FISH-IN AT FRANK'S LANDING CONTINUES

Demonstration at Frank's Landing grew beyond the original five days
encampment for the fish-in was forty-six days old -- October 20, 1966
tight security had been set up -- "No Trespassing" signs were posted
which identified property as "Federal Trust Lands"
state police set up a roadblock to prevent other protesters from arriving
there had been twenty-six arrests in the Frank's Landing area [September 4-October 20]
many of the arrests were of non-natives charged with interfering
with the state officers' attempts to arrest the protesting Indian fishermen

FINAL GEMINI MISSION

Gemini XII was the tenth and final manned Gemini flight
Astronauts James A. Lovell, Jr. Command Pilot on his second spaceflight
and Pilot Edwin E. "Buzz" Aldrin, Jr. were launched into space -- November 11, 1966
This late into the Gemini program it had still not been demonstrated that an astronaut
could work easily and efficiently outside the spacecraft
Improved restraints were added to the outside of the capsule,
and a new technique, underwater training, was introduced
Aldrin's two-hour twenty-minute tethered space-walk allowed him to photograph star fields,
retrieve a micrometeorite collector and other chores
it demonstrated the feasibility of astronauts working outside of their space vehicle
Gemini XII performed a by-now routine rendezvous and docking with an Agena Target Vehicle
which was done "manually" using the onboard computer and charts
when a rendezvous radar failed
fourteen additional scientific experiments were conducted
During reentry the capsule was controlled by computer and splashed down in the Atlantic Ocean
less than three miles from its target -- November 15, 1966

SEATTLE GETS ITS FIRST MAJOR LEAGUE SPORTS FRANCHISE

Los Angeles businessmen Sam Schulman and Eugene V. Klein and a group of minority partners
were awarded a National Basketball Association franchise for Seattle -- December 20, 1966
Team owners selected Tom Meschery from the San Francisco Warriors,
Walt Hazzard from the Los Angeles Lakers, and thirteen others in the expansion draft
Al Tucker from Oklahoma Baptist was the team's first pick in the college draft

first head coach was Al Bianchi who had played for the Syracuse Nationals and Philadelphia 76ers during a ten-year career

VIETNAM CONFLICT IS WEARING ON THE AMERICAN PUBLIC

American forces in Vietnam reached 385,000 men, plus an additional 60,000 sailors offshore more than 6,000 Americans were killed and 30,000 wounded -- 1966
it was estimated that the Vietcong which numbered over 280,000 had lost 61,000 killed

MAKAH INDIANS HAVE LONG LIVED ON THE WESTERN TIP OF WASHINGTON STATE

In their language, the Makah are “people of the cape”⁴⁶⁸
who inhabited a large portion of the Olympic Peninsula
their land extended from Cape Flattery at the tip of the Peninsula
many miles south along the Pacific coast and west along the Strait of Juan de Fuca
According to archaeological research, Makah people inhabited Neah Bay for more than 3,810 years
there were five Makah villages prior to contact with Europeans [1790]
southernmost of the Makah village was Ozette -- a typical Northwest Coast native village
with plank houses arranged in two rows facing the ocean
Ozette was a whaling village occupied from about [400 BCE] until the [early 1900s]
it was located on the Olympic Peninsula at today’s Cape Alava
a large portion of the village was suddenly buried under a mud slide some 550 years in the past
local inhabitants, the Makah people, abandoned the village but remained nearby
Makahs were ordered by the United States government to send their children to school [1917]
villagers were relocated to Neah Bay almost twenty miles to the north
but many contemporary Makahs can trace their ancestry to Ozette village
Dr. Richard Dougherty of Washington State University became aware of the buried village of Ozette
he led an expedition to excavate archaeological test pits
in the vicinity of the village -- winter 1966-1967

MALCOLM STAMPER TAKES OVER PRODUCTION OF THE BOEING 747

(Malcolm Stamper had grown up in Detroit and went to work for General Motors before he joined the Boeing Company [1962]
his first assignment was to sell its ailing gas turbine division to Caterpillar, Inc.)
Following the success of that assignment, Boeing President William M. Allen asked Stamper to spearhead production of the new 747 airplane on which the company’s future was riding
Stamper led 50,000 people in the race to build the 747 jetliner
this was a monumental engineering and management challenge
it included construction of the world’s biggest factory located in Everett
the size of forty football fields it turned out Boeing 747s

BOEING ATTEMPTS TO DEVELOP TWO NEW AIRCRAFT AT THE SAME TIME

Boeing was sinking money in its new 747 airplane
problems with the 747 program continued when one of the five test aircraft

⁴⁶⁸ Robert Sullivan, *A Whale Hunt*, P. 23.

suffered serious damage during a landing attempt at the company's Renton Municipal Airport
Fearful about being left behind in the Supersonic Transport (SST) race
the U.S. government asked its aerospace companies
to submit a design to compete with Europe's future *Concorde* SST
Boeing began work on a proposed 1,800 mile per hour SST prototype
Boeing's design for an SST airplane that flew faster than the speed of sound
was to be capable of carrying 300 passengers
In competition with Lockheed Aircraft and North American Aviation
Boeing was announced as the winner of the contract to build the SST airplane -- January 1, 1967
Strong support came from the federal government
federal loans for the Boeing project passed through U.S. House of Representatives
led by Washington's Congressman Brock Adams
funding bills also were ushered through the U.S. Senate by senators Magnuson and Jackson

VIETCONG ARMY AVOIDS CONTACT WITH AMERICAN TROOPS

American forces began Operation "Cedar Falls" which was intended to drive Vietcong forces
from the "Iron Triangle" -- a sixty square mile area between the Saigon River and Route 13
Nearly 16,000 American troops and 14,000 soldiers of the South Vietnamese Army
moved into the Iron Triangle but they encounter no major resistance -- January 8, 1967
seventy-two Americans were killed over nineteen days
primarily the victims of booby traps and snipers emerging from concealed tunnels
huge quantities of supplies were captured by the Americans
seven hundred and twenty Vietcong were killed

DISASTER STRIKES NASA'S FIRST APOLLO SPACE MISSION

Apollo I was scheduled to be the first mission of the Apollo manned lunar landing program
launch date was set for [February 21, 1967]
Apollo's Command/Service Module spacecraft was much bigger and far more complex
than the Mercury or Gemini program space modules that preceded it
Continuous testing of equipment and personnel was conducted in preparation for the flight
Astronaut Virgil I. "Gus" Grissom followed by Roger B. Chaffee and Edward H. White II
entered the command module fully dressed in pressurized suits -- 1:00 p.m. January 27, 1967
they were strapped into their seats
and were hooked up to the spacecraft's oxygen and communication systems
almost immediately, Grissom noticed a strange odor in the air circulating through his suit
which he compared to "sour buttermilk" -- the simulated countdown was held
Further problems included high oxygen flow through the spacesuits which tripped an alarm
likely cause of this event was determined to be the astronauts' physical movements,
next Grissom's microphone became stuck open which caused a major problem
with the communications loop connecting the crew, the Operations and Checkout Building
and the control room
all three astronauts continued to run a series of equipment tests as scheduled
Grissom reported a fire on board the capsule -- 6:30 p.m. January 27, 1967

Chaffee then reported, “**We’ve got a fire in the cockpit**”⁴⁶⁹

White responded to Chaffee’s comment
within twelve seconds of the fire being reported,

Chaffee urged the crew to get out of the command module
only seventeen seconds after the first indication of the fire, voice transmissions ended abruptly
All three astronauts, Gus Grissom, Roger Chaffee and Edward White, perished in the fire
(later a review board determined that the electrical power momentarily failed
evidence was found of several electrical arcs in the interior equipment
however, they were unable to conclusively identify a single ignition source)

LEGISLATORS ADDRESS PUBLIC EMPLOYEE COLLECTIVE BARGAINING

Washington State legislature provided public employees were
with the right to join labor organizations of their choosing
and to be represented by unions concerning their relationship with public employers -- 1967
Genuine collective bargaining was guaranteed to all state and school district employees
Washington Education Association (WEA) led efforts to organize local school district affiliates
in designing and negotiating professional agreements in addition to personal service contracts
that stated a teacher’s assignment for a year and the salary
(Tacoma Education Association (TEA) bargained the first professional agreement in the state [1968])

SEATTLE SICK’S STADIUM ENTERS THE BIG LEAGUES

Seattle longed for a big league baseball team⁴⁷⁰
major league owners awarded one to President of the Pacific Coast League Dewey Soriano
and his brother Max -- 1967
American League stipulated a condition to the franchise
Sicks’ Stadium may have been a nice place to watch minor league ball,
but a major league city needed a Major League ball diamond
Seattle had to promise that a new domed stadium would be built within three years
Sports legends like Joe DiMaggio, Mickey Mantle, and Carl Yastrzemski came to Seattle
to urge voters to pass a bond issue to fund a new stadium
Sicks’ Stadium was expanded for use as a temporary home for American League baseball
this stadium originally seated 15,000 fans -- far too few for a major league team
bids to expand the stadium to 28,500 seats came in too high
reluctantly, the American League agreed to reduce the planned capacity
first to 25,000 and then to 21,000 seats

CONSTITUTIONAL AMENDMENT XXV CLARIFIES THE PRESIDENTIAL SUCCESSION

Amendment XXV to the Federal Constitution was passed by Congress
and approved by the required three-quarters of the states -- February 10, 1967
Section 1 states: “**In case of the removal of the President from office or of his death or
resignation, the Vice President shall become President.**”

⁴⁶⁹ Remembering the Apollo Tragedy, www.history.com/news/remembering-the-apollo-1-tragedy

⁴⁷⁰ Alan J. Stein, *Sicks’ Stadium (Seattle)*, Essay 1501, HistoryLink.org, July 15, 1999.

Section 2: **“Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take office upon confirmation by a majority vote of both Houses of Congress.”**

Section 3: **“Whenever the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that he is unable to discharge the powers and duties of his office, and until he transmits to them a written declaration to the contrary, such powers and duties shall be discharged by the Vice President as Acting President.”**

Section 4: dictates that if the Vice President and a majority of the cabinet all agree that the president is no longer capable of carrying out the duties of his office, the Vice President can temporarily take over as Acting President if the President disputes his removal from office, the Congress must decide whether the President or Vice President should retain the powers of the office

VIETCONG BASES AND HEADQUARTERS IN SOUTH VIETNAM ARE ATTACKED

One of the largest American air-mobile assaults ever began -- February 21, 1967

Operation “Junction City” involved 240 helicopters that swept the region north of Saigon

its goal was to destroy Vietcong bases

and the Vietcong military headquarters in South Vietnam

30,000 U.S. troops took part in the mission

joined by 5,000 men of the South Vietnamese Army

(“Junction City” ended after seventy-two days

American forces captured large quantities of supplies, equipment and weapons

but there are no large, decisive battles that could have destroyed the Vietcong Army)

MELDING OF THE PROTEST MOVEMENTS

As the war expanded over 400,000 U.S. troops were stationed in Vietnam -- 1967

America’s anti-war protest movement expanded in proportion

to the growing support attracted on college campuses

Escalating violence of the war in Vietnam and the social injustice of the military draft

brought many African Americans into the Anti-war Movement

African Americans were often involved in both the Civil Rights Movement

and the antiwar movement

Dr. Martin Luther King, Jr. was a prominent opponent of the Vietnam War

Black Panther Party leaders vehemently opposed U.S. involvement in Vietnam

African Americans involved in the antiwar movement often formed their own groups,

such as Black Women Enraged, National Black Anti-War Anti-Draft Union

and the National Black Draft Counselors

many African American women viewed the war in Vietnam as racially motivated

they sympathized strongly with Vietnamese women

Civil Rights leader Dr. Martin Luther King led a march of 5,000

against the war in Chicago, Illinois -- March 25, 1967

PUBLIC TELEVISION GOES ON THE AIR

Democratic Party advocate and Seattle Businessman Saul Hass
saw public television's potential for education and became its advocate
he wanted help for the country's seventy million functional illiterates

"...the people who can't understand or use the language."⁴⁷¹

in an interview, Hass said, **"We've got to find a way to teach people the language of their time, I'm terrified at the lack of ability of some to express themselves. It opens the way for demagogues."**⁴⁷²

With the support of Haas's friend U.S. Senator Warren G. Magnuson
the Corporation for Public Broadcasting (CPB) was created -- 1967

STUDENTS PROTEST HARASSMENT BY UNIVERSITY DISTRICT MERCHANTS

University District businesses was not happy about the growing "hippie" culture in their vicinity⁴⁷³

University Way, referred to locally as "The Ave," was one of the city's major retail streets

Local residents felt they were the victims of discrimination

it was alleged efforts to drive hippies, the homeless, racial minorities and other "undesirables"

were being conducted by "civil" means such as lobbying Seattle City Hall

and the University of Washington administration

and more direct efforts such as police harassment

including discretionary ticketing of jaywalkers,

arresting and detaining hippies for frivolous charges

and even other, more brutal, forms of harassment

these activities were considered by the targeted local residents to be locally sanctioned

Students for a Democratic Society (SDS) attempted to document

alleged instances of police harassment

along with cases of direct discrimination by restaurants, rental agencies and other businesses

affidavits were gathered to convince authorities to put an end

to the harassment and discrimination

Civil activists met with University community leaders to discuss demands

petitions bearing 8,000 signatures that supported the goals of the protestors were presented

Community leaders responded with a polite rejection of the demands

however, another meeting was agreed to at some future date yet to be determined

finally six U. District merchants agreed to meet with student leaders -- April 11, 1967

but they noted they could not speak for other merchants

UNIVERSITY OF WASHINGTON LEARNS ABOUT PROTEST MARCHES

After discussions among "hippie" leaders into the night regarding the proposal proved to be fruitless

approximately 2,000 protestors introduced the U. District to activism -- April 12, 1967

Students for a Democratic Society (SDS) gained effective control of Loew Hall⁴⁷⁴

at least 2,000 agitated students demonstrated their discontent with the college administration

⁴⁷¹ Frank Chesley, *Haas, Saul (1896-1972)*, HistoryLink.org, Essay 5632, January 7, 2004.

⁴⁷² Frank Chesley, *Haas, Saul (1896-1972)*, HistoryLink.org, Essay 5632, January 7, 2004.

⁴⁷³ Jeff Stevens, *"I'm Marching Down the Ave..."*, Radical Seattle Remembers.com, 2010.

⁴⁷⁴ Jeff Stevens, *"I'm Marching Down the Ave..."*, Radical Seattle Remembers.com, 2010.

Two Yakima Valley beekeepers abruptly stopped their truck containing eight hives of bees
in front of the scene unfolding in the plaza outside Loew's main entrance
abruptness of the stop caused one of the hives to overturn
wildly buzzing bees immediately swarmed out of the back of the truck and into the crowd
one of the drivers, clad in protective gear, stepped out of the truck's cab
he began haphazardly handling the remaining hives causing more understandably angry bees
to be released and begin stinging wildly

After several minutes, some of the students outside Loew Hall
began pelting the truck with fruit and various other objects,
including a brick that went through the truck's windshield just before the driver took off

However, the highly enraged bees failed to break up the SDS demonstration,
although twenty-two people were treated for bee stings at the UW's Hall Health Center

Merchants charged a "breach of faith" had taken place -- negotiations and grievances continued
civil activists continued to document many further instances of police harassment
(these were present to City Hall at a [May 1967] rally)

(In an interview with the *UW Daily* the following week, the two beekeepers claimed to have been
seeking an entomologist to examine their allegedly ailing cargo
at the time, the UW had no entomology department nor even a degree program in that field)

ANTI-WAR ACTIVISTS INVADE NEW YORK CITY

More than 400,000 people marched from Central Park in New York City
to the United Nations Building to protest the war in Vietnam-- April 15, 1967
there they heard speeches from critics of the war such as Dr. Benjamin Spock,
Dr. Martin Luther King, Southern Christian Leadership Conference's Rev. James Bevel,
and Jan Barry Crumb, a veteran of the war

On the same date 100,000 marched in San Francisco

LATINO WORKERS ORGANIZE IN WASHINGTON STATE⁴⁷⁵

Mexican-American Civil Rights movement flourished throughout the United States -- late 1960s
activity in Washington state mirrored that of the larger nationwide movement
as it sought to establish self-determination and self-definition for Latino people

Inspired by the United Farm Workers Organizing Committee's California grape boycott
two students from Yakima Valley College, Guadalupe Gamboa and Tomas Villanueva,
who were friends and the sons of Yakima Valley farm worker families
traveled to Delano, California and met with UFWOC leader Cesar Chavez
returning to Washington, Gamboa and Villanueva co-founded
the United Farm Worker's Cooperative (UFWC) in Toppenish, Washington
this was the first activist Chicano organization in the state of Washington
they convinced people to give \$5.00 to purchase shares in their organization
they build a small store and also began running a sort of defense service for people
when growers did not pay their wages or when people got injured

⁴⁷⁵ Oscar Rosales Castaneda, *Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s*, HistoryLink.org, Essay 7922, October 21, 2007.

workers were instructed to get food stamps
their co-op began to grow

Another group, the Mexican American Federation, formed -- 1967

they advocate for community development and political empowerment in the Yakima Valley
as they developed a new direction in Mexican American community organizing
Eastern Washington saw a dramatic shift in the Chicano and Latino community
as the previously silent people raised their voices to advocate for labor rights and social equity
Chicano students who entered Washington State University
through the High School Equivalency Program
organized a Mexican American Student Association chapter in Pullman

VIETNAM VETERANS AGAINST THE WAR COMES INTO BEING

Six Vietnam vets marched together in a New York City peace demonstration -- June 1, 1967

Vietnam Veterans Against the War was organized to voice growing opposition
to the still-raging war in Vietnam felt by returning servicemen and servicewomen
Membership of *Vietnam Veterans Against the War* grew to over 30,000 throughout the United States
as well as active duty GIs stationed in Vietnam who offered their first-hand experiences
to help many other Americans to see the nature of what they believed was an unjust war

SUMMER OF LOVE EXPLODES ACROSS THE NATION AND WORLD

Summer of 1967 became known as the "Summer of Love" as 100,000 people converged
on the Haight-Ashbury neighborhood of San Francisco creating a cultural and political rebellion
"Hippies" or "Flower Children" or "The Beat Generation" talked of "Flower Power"
they lived an alternative lifestyles sharing "Beat" music, drugs, free love
and communal living which featured sharing resources -- often among total strangers
Hippies also gathered in New York, Los Angeles, Philadelphia, Seattle, Portland, Washington, D.C.,
Chicago, Miami; Montreal, Toronto, Vancouver, Canada and across Europe

SEATTLE HAS ITS OWN SUMMER OF LOVE

University District, alive with hippies, had its own underground newspaper
and the city's first alternative rock band: *Daily Flash*

Members of the counterculture smoked pot, dropped acid, protested the war in Vietnam,
danced at rock light shows and practiced free love

face paint and flowers delineated the participants
conversations centered on Anti-authoritarianism, simple living, environmentalism, pacifism,
communal living, counterculture activities, Bohemianism and vegetarianism
wisdom came in catch phrases and slogans that were frequently repeated:

**"Turn on, tune in, drop out," "Keep the Faith," "Tell it like it is," "Live and let live,"
"Do your own thing," "Don't trust anybody over thirty," "Go with the flow"**

Music was as undisciplined as the hippies themselves:

Folk rock, Psychedelic rock, Progressive rock, Psychedelic folk and New Age music
all demonstrated the variety (and inconsistency) of the times

SUMMER OF "BURN BABY BURN" CONTRASTS WITH THE SUMMER OF LOVE

In contrast to the Hippie “Peace and Love” lifestyle during the summer of 1967
some of the worst violence in U.S. cities in the country’s history also took place
159 race riots and insurrections erupted across the nation
June saw rioting in Atlanta, Boston, Cincinnati, Buffalo and Tampa
July saw riots in Birmingham, Chicago, New York City, Milwaukee, Minneapolis,
New Britain, Connecticut and Rochester, New York
other cities were rocked by rioters during the summer
San Francisco, Oakland, Baltimore, Seattle, Cleveland and Columbus, Ohio
but the most serious riots of the summer took place in Newark, New Jersey and Detroit Michigan
Newark saw a five day uprising -- July 12-17, 1967
in the riot twenty-six people, mostly blacks, were reported killed -- another 750 were injured
over 1,000 were jailed -- property damage exceeded \$10 million
when the melee ended the state had experienced the worst civil disorder in New Jersey history
Detroit rioting, also known as the Twelfth Street Riot, began in the early hours of July 23, 1967
for five days an estimated 10,000 people participated in the melee
with an estimated 100,000 gathering to watch riots, looting, violence and destruction
that left forty-three people (ten whites) dead, 467 hurt and 7,231 arrested
2,509 stores were looted or burned, 388 families were rendered homeless or displaced
and 412 buildings were burned or damaged enough that they had to be demolished
dollar loss estimates from arson and looting ranged from \$40 million to \$80 million

SCHOOL FRIENDS BECOME INTERESTED IN TECHNOLOGY

Paul Allen was born in Seattle [January 21, 1953] and grew up in the nearby suburb of Wedgewood
his parents, Faye and Kenneth Allen, were both librarians at the University of Washington
they introduced Allen and his sister Jody to a wide variety of cultural offerings
regularly taking their children to museums, galleries and concerts
Allen’s parents also encouraged his early love of reading and science
his mother hosted meetings for his grade school science club
Paul developed a great interest in science fiction novels, including the *Tom Swift* series
Allen began seventh grade at Lakeside School, a prestigious private school in Seattle [1965]
Bill Gates III was born in Seattle [October 28, 1955] to Mary and Bill Gates
his father worked for a Seattle law firm while his mother taught school until they had children
both of his parents were involved in politics and business
they encouraged their children to become involved as well
When Bill became a teenager full of ideas and energy, he began having some problems in school
his parents transferred him from public school to Lakeside School
which offered opportunities for students to explore their own ideas
because the school was very strict, Gates was not very happy there until he found a few friends
who shared this interest in reading business magazines such as *Fortune*
Lakeside Mother’s Club gave the school a digital training terminal
that was linked by telephone to a local computing company
their idea was that the teachers would figure out the computer and then teach the students
in fact, it was the other way around
Sophomore Paul Allen became acquainted with eighth-grader Bill Gates -- 1967

they were drawn together by their curiosity regarding computers
Several students including Gates and Allen were invited to serve as amateur technicians
at the *Computer Center Corporation* (“C-Cubed”) in the University District
after school every school day a group rode the bus to the University of Washington
they spent hours reading computer manuals and teaching themselves computer languages
such as FORTRAN, LISP and PDP-10
they dug discarded codes out of the trash and studied those to see what was wrong with them
four students, Paul Allen, Bill Gates, Ric Weiland and Kent Evans became most involved
Bill and Paul were usually the last to leave C-Cubed
despite the best effort of the students, C-Cubed eventually went bankrupt
this was the pair’s introduction to the realities of the business world
Paul Allen, Bill Gates, Ric Weiland and Kent Evans discovered a company in Portland, Oregon
that let them write a huge complex payroll program using a COBOL program
Gates learned about labor reports, taxes, and other business-related topics
Allen, Gates, Weiland and Evans began the *Lakeside Programming Group*
Paul became really interested in the PDP-10 machine
Ric Weiland became interested in writing
Gates and Evans, at sixteen the two youngest members of the team,
did most of the work on the payroll program
During this time *Lakeside Programming Group* was paid \$4,300 to write a program
to help Lakeside School with its student scheduling
eventually, the students took over determining who was in what classes and when they met
Bill modified the scheduling program
to put himself in a class with the best-looking girls in school
students and teachers alike agreed that Gates was one of the smartest scholars at Lakeside
Bill Gates and Paul Allen hit on another scheme to make money using a computer
state and local governments frequently did traffic surveys
using a rubber hose stretched across a road
counts were mechanically recorded by punching holes in a roll of paper tape
cities hired private companies to translate the data into reports
that traffic engineers could use to adjust traffic lights or improve roads
Gates and Allen traded writing computer programs for free computer time on various computers
they recruited classmates to manually read the hole-patterns in the paper tape
and transcribe the data onto computer cards for analysis

DRAFT CARDS ARE TURNED IN AS A FORM OF PROTEST

Continuing a seemingly unfair draft system, 40,000 men were called for induction each month
this resulted in a burgeoning draft resistance movement
Draft card turn-ins were held across the country
more than 1,000 draft cards were returned to the Justice Department
as an act of civil disobedience -- October 16, 1967
Draft resisters expected to be prosecuted immediately
(but U.S. Attorney General Ramsey Clark instead prosecuted a group of ringleaders
including Dr. Benjamin Spock and Yale chaplain William Sloane Coffin, Jr.)

in Boston [1968])
(By late 1960s one quarter of all court cases dealt with the draft
including men accused of draft-dodging and men petitioning for conscientious objector status
over 210,000 men were accused of draft-related offenses -- 25,000 of whom were indicted)

SEATTLE SUPERSONICS BEGIN PLAY

Seattle's new National Basketball Association team was dubbed the *Seattle Supersonics*
SuperSonics took to the court at the Seattle Center Coliseum -- October 17, 1967
Sonics, coached by Al Bianchi, and featured All-Star guard Walt Hazzard
and NBA All-Rookie Team members Bob Rule and Al Tucker
Seattle's expansion team stumbled out of the gates
as they lost to the San Francisco Warriors 144–116
(and finished the season with a 23–59 record)

LARGE ANTI-WAR RALLY IS HELD AT THE LINCOLN MEMORIAL IN WASHINGTON, D.C.

As many as 100,000 anti-war demonstrators attended the event -- October 21, 1967
at least 30,000 of these later marched to the Pentagon for another rally and an all-night vigil
some took part in acts of civil disobedience on the Pentagon steps
these were interrupted by clashes with soldiers and police -- 647 were arrested
When a plot to airdrop 10,000 flowers on the Pentagon was discovered and stopped
these flowers ended up being inserted one at a time into the barrels of Military Police rifles
several famous photographs of the activity were taken and published

YOUTH INTERNATIONAL PARTY IS BORN

Abbie Hoffman was the co-founder of the radical Youth International Party (Yippies)
that organized -- December 31, 1967
they were known for their free speech and anti-war movements
They used theatrical gestures and symbolic politics
such as advancing a pig, "Pigasus the Immortal," as a candidate for President in 1968
Well known for street theater and politically-themed pranks,
many of the "old school" political liberals either ignored or denounced them
Yippies, seen as anti-authoritarian and anarchist, were referred to by some critics
as Groucho Marxists (in reference to well-known comedian Groucho Marx)

VIETCONG ATTACK A U.S. MARINE BASE IN SOUTH VIETNAM

Shattering barrage of shells, mortars and rockets slam into the U.S. Marine base
at Khe Sanh -- 5:30 a.m. January 21, 1968
eighteen Marines were killed instantly -- another forty were wounded
initial attack continued for two days before Khe Sanh was surrounded
and placed under siege by Vietcong troops

MEDIA PROMINATELY FEATURES THE DEBATE BETWEEN "HAWKS" AND "DOVES"

"Doves" were liberal critics of the war
they claimed the war was well-intentioned

but was, in fact, a disastrously wrong mistake in an otherwise peaceful foreign policy doves did not question U.S. intentions in intervening in Vietnam, nor did they question the morality or legality of the U.S. intervention rather they simply stated that the war was a mistake “Hawks” argued the war was legitimate and winnable and a part of the peaceful U.S. Foreign policy they blamed the “one-sided” criticism of the war conducted by the liberal media for the decline of public support for the war (which, they later said, ultimately helped the U.S. lose the war)

TET OFFENSIVE TAKES PLACE IN SOUTH VIETNAM

U.S. military officials continually reported that American efforts in South Vietnam were being successfully carried out People’s Army of Vietnam (North Vietnam) began a major military campaign -- January 31, 1968 as units surged into action over the length and breadth of South Vietnam on Tet -- the first day of the year on the traditional lunar calendar and the most important Vietnamese holiday in more than 100 cities and towns, shock attacks by Vietcong sapper-commandos were followed by wave after wave of supporting troops Purpose of the Tet Offensive was to attack U.S. military and civilian command and control centers located throughout South Vietnam in an effort to spark a general uprising among the population that would then topple the Saigon government of South Vietnam and thus end the war in a single blow Initial attacks stunned the U.S. and South Vietnamese armies and took them by surprise but the Tet Offensive did provide the U.S. and allied militaries a great opportunity as the Viet Cong (North Vietnamese army) was finally brought into open battle and destroyed as a fighting force most of the fighting was quickly contained and beaten back inflicting massive casualties on the Communist forces Tet Offensive had a profound effect on the U.S. government and shocked the American public they had been led to believe by South Vietnamese political and military leaders that the Communists were incapable of launching such a massive effort Tet gave the American people the perception that the military had been untruthful about the success of earlier military operations, and ultimately, about their the ability to achieve a meaningful military solution in Vietnam First phase of the North Vietnamese Tet Offensive continued until [March 28, 1968]

NEWS PHOTOGRAPH INCREASES THE OUTRAGE OF ANTI-WAR PROTESTORS

South Vietnamese National Police Chief Nguyen Ngoc Loan executed a suspected enemy officer with a single shot to the head on a public street in front of journalists -- February 1, 1968 one photographer snapped a picture of the execution which instantly became famous this image helped sway public opinion in the United States against the war (South Vietnamese reports later claimed the suspect was captured near the site of a ditch holding as many as thirty-four bound and shot bodies of Vietnamese police and their relatives, some of whom were family members of General Loan’s deputy and close friend)

ANTI-WAR PROTEST MOVEMENT HAS A MIXED EFFECT ON THE WAR EFFORT

Despite increasingly depressing news of the events in Vietnam,
many Americans continued to support President Lyndon Johnson's endeavors
there was a feeling that the goal of preventing a Communist takeover
of the pro-Western government in South Vietnam was a noble objective
many Americans were also concerned about saving face in the event we disengaged from the war
New York *Times* poll -- February 1968
indicated 61% saw themselves as "hawks" (advocates of war)
while 23% of Americans defined themselves as "doves" (advocates of peace)
Gallup poll same month revealed 35% of Americans
approved of President Johnson's handling of the war while 50% disapproved

LATINO ACTIVISTS EXPAND THEIR EFFORTS IN WASHINGTON STATE⁴⁷⁶

United Farm Worker's Cooperative sought help from the Washington American Civil Liberties Union
to provide legal aid to people of farm working background
Washington American Civil Liberties Union reported that conditions present in the Yakima Valley
forced Chicanos into a state of political and economic defeat
Yakima County reported thirty-nine percent of the population living below the poverty level
institutional neglect coupled with discrimination kept Chicanos locked in a cycle of poverty
As a result of various lawsuits filed through the Washington American Civil Liberties Union,
Yakima County was forced to take measures to ensure that Chicanos
were provided equal voting rights through removal of the English literacy requirements

SEIGE OF KHE SANH CONTINUES

More than 1,300 artillery rounds hit the Marine base at Khe Sanh
and its outposts -- February 23, 1968
this was more than on any previous day of the attack
To survive the constant assaults, bunkers at Khe Sanh were rebuilt to withstand 82mm mortar rounds

WAR IN VIETNAM BECOMES INCREASINGLY POLITICAL

Democrat President Lyndon Johnson began his re-election campaign
Eugene McCarthy, a member of the president's own party, ran against him for the nomination
on an anti-war platform
McCarthy did not win the first primary election in New Hampshire -- March 12, 1968
but he did surprisingly well which encouraged protestors
Former Attorney General Robert Kennedy joined the race for the U.S. presidency
as a Democrat anti-war candidate -- March 16, 1968

MANY CELEBRITIES OPPOSE THE WAR IN VIETNAM

Antiwar artists ranged from pacifists to violent radicals

⁴⁷⁶ Oscar Rosales Castaneda, *Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s*, HistoryLink.org, Essay 7922, October 21, 2007.

they caused Americans to think more critically about the war and its effects
they used their creativity and careers to visibly display their opposition
Writers and poets opposed to America's involvement in the war
included Allen Ginsberg, Denis Levertov, Robert Duncan, and Robert Bly
their pieces often incorporated imagery based on the tragic events of the war
as well as contrasting life in Vietnam with life in the United States
Visual artists Ronald Haeblerle, Peter Saul, and Nancy Spero among others
used war equipment, like guns and helicopters, in their works
while incorporating important political and war figures
portraying to the nation exactly who was responsible for the violence
Filmmakers such as Lenny Lipton, Jerry Abrams, Peter Gessner, and David Ringo
created documentary-style movies featuring actual footage from the antiwar marches
to raise awareness about the war and the diverse opposition movement
Playwrights like Frank O'Hara, Sam Shepard, Robert Lowell, Megan Terry, Grant Duay,
and Kenneth Bernard used theater to portray their thoughts about the Vietnam War
often satirizing the role of America in the world
by juxtaposing the horrific effects of war with normal scenes of life at home

MUSIC ADDS TO THE ANTI-WAR PROTEST MOVEMENT

Rock and Roll music and Folk music were in the forefront of the protests
many of the stars of the music world participated in the protest movement
such as Joni Mitchell, Joan Baez, Roger Hannay, Lou Harrison, Gail Kubik, William Mayer,
Elie Siegmeister, Robert Fink, David Noon, Richard Wernick and John Downey
Often when protesters participating in peace marches were being arrested
popular musicians were among their ranks
Seattle Rock guitarist Jimi Hendrix was a key figure although he was not an official protestor
being a former soldier himself, he sympathized with the anticommunist view
even so, his songs became anthems to the antiwar movement
Hendrix summed up his position on the war with the words:
"when the power of love overcomes the love of power... the world will know peace."
American singer-songwriter, musician and poet Bob Dylan was another key historic figure
Dylan's songs were designed to awaken the public and to cause a reaction
Blowing in Wind embodied Dylan's antiwar sentiment
The Times they are A-Changin' became a protest theme song
Rock and Roll music and Folk music provided the protest movement with direction
and the feeling of solidarity necessary in a movement that sprang from the people

WOMEN OPPOSE THE ANTI-VIETNAM WAR PROTEST MOVEMENT

However, they were largely relegated to second-class status within the organizations
protest leaders often viewed women as sex objects or secretaries,
not actual thinkers who could contribute positively and tangibly to the group's goals
others believed that women could not truly understand and join the antiwar movement
because they were unaffected by the draft
Despite the inequalities, participation in various antiwar groups

allowed women to gain experience with organizing protests and crafting effective antiwar rhetoric
these newfound skills combined with their dislike of sexism within the opposition movement
caused many women to break away from the mainstream antiwar movement
to create or join women's antiwar groups
female soldiers serving in Vietnam joined the movement to battle the war, sexism, racism,
and established military bureaucracy
by writing articles for antiwar and antimilitary newspapers
Some of frustrations of younger women became apparent during the antiwar movement
they demanded more radical change and rejected societal gender roles that older women accepted
Women activists' disillusionment with the antiwar movement
led to the formation of the Women's Liberation Movement
to establish true equality for American women in all facets of life

OIL IS DISCOVERED ON ALASKA'S NORTH SLOPE

Atlantic Richfield Oil Co. (later ARCO) and Humble Oil and Refining Co. (later Exxon)⁴⁷⁷
announced the discovery of large deposits of oil on the North Slope of Alaska -- March 13, 1968
These companies and several others began planning the Trans-Alaska Pipeline System
to move oil from the north side of Alaska 800 miles to a seaport on the Gulf of Alaska
(Alyeska Service Pipeline Company was formed [1970] by the participating oil companies
to build and operate the pipeline and pumping system)

MY LAI MASSACRE TAKES PLACE IN VIETNAM

Mass murder by United States Army soldiers of between 347 and 504 unarmed civilians
took place in South Vietnam -- March 16, 1968
one large group of about seventy to eighty villagers rounded up by the 1st Platoon
were killed on an order given by Lieutenant William Calley, who also participated
Calley also shot two other large groups of civilians with a weapon taken from a soldier
who had refused to do any further killing
Calley then turned the weapon on the soldier and shot him in the face and killing him
members of the 2nd Platoon killed at least sixty or seventy Vietnamese as they swept through
the northern half of My Lai and through Binh Tay, a small sub-hamlet
3rd Platoon was dispatched to deal with any "remaining resistance"
they began killing every living person and animal they could find including Vietnamese
who had emerged from their hiding places as well as the wounded
most of the My Lai victims were women, children, including babies, and elderly people
Over the following two days, both battalions were involved in additional burning of dwellings
as well as mistreatment of Vietnamese detainees
while most of the soldiers did not participate in the crimes,
they neither protested nor complained to their superiors
Although this incident passed without notice at the time in America,
in Vietnam it undid the benefit of countless hours of civic action

⁴⁷⁷ Dave Wilma, *Construction of the Trans-Alaska Pipeline begins on April 29, 1974*, HistoryLink.org, Essay 3600, October 7, 2001.

by Army units and individual soldiers

VIETCONG AGAIN ATTACK THE KHE SANH U.S. MARINE BASE

Khe Sanh remained under siege by the Vietcong Army when without warning a massive North Vietnamese barrage slammed into Khe Sanh -- March 22, 1968 more than 1,000 rounds hit the base at a rate of a hundred every hour at the same time, electronic sensors around Khe Sanh indicated Vietcong troop movements American forces replied with heavy bombing of military targets

SEATTLE'S FRANKLIN HIGH SCHOOL IS THE SCENE OF A SIT-IN

Franklin High School principal's office was occupied by a large number of high school and college students -- March 29, 1968 who were protesting the suspension of two African American students⁴⁷⁸ Three of the students were arrested for "unlawful assembly" this statute made it illegal for three or more persons to assemble with intent to "carry out any purpose in such manner as to disturb the public peace" it stated that if the assembly attempted or threatened "**any act tending toward a breach of the peace**" ... "**every person participating therein by his presence**"⁴⁷⁹ was guilty of the offense three defendants appeared in Justice Court which heard cases of violations of city law they were sentenced to six months in jail but they appealed to Superior Court

THREE FRANKLIN HIGH SCHOOLS DEMONSTRATORS ARE TRIED IN SUPERIOR COURT

Three defendants were represented by a team of American Civil Liberties Union (ACLU) lawyers, who argued that the unlawful assembly statute was unconstitutional⁴⁸⁰ Superior Court Judge Solie Ringold, a former president of the Washington ACLU chapter, ruled that the statute was unconstitutional because it allowed conviction for acts of free speech and assembly permitted by the constitution, also it placed too much discretionary power in the hands of law enforcement, and it permitted conviction for being present at unlawful acts in which one did not participate Judge Ringold dismissed the charges but the prosecutor appealed to the State Supreme Court

PRESIDENT LYNDON JOHNSON MAKES TWO SURPRISING ANNOUNCEMENTS

Surprising success of presidential contender Eugene McCarthy and the entry of Robert Kennedy into the presidential race led the president to make a surprise announcement in a televised speech he stated he would not seek his party's nomination -- March 31, 1968 in the same speech he announced the beginning of the Paris Peace Negotiations with North Vietnam Johnson's vice president, Hubert Humphrey placed his name in nomination

⁴⁷⁸ Kit Oldham, *State Supreme Court issues decision in Franklin High School sit-in case on January 14, 1971* HistoryLink.org, , Essay 3763, May 8, 2002.

⁴⁷⁹ RCW 9.27.060.

⁴⁸⁰ Kit Oldham, *State Supreme Court issues decision in Franklin High School sit-in case on January 14, 1971*, HistoryLink.org, Essay 3763, May 8, 2002.

with the promise of continuing to support the South Vietnamese government

DR. MARTIN LUTHER KING ARRIVES IN MEMPHIS, TENNESSEE

Dr. King was invited to Memphis, Tennessee to support a strike [March 1968]

by African American sanitation workers who had launched a campaign for union representation after two of the workers were accidentally killed on the job and to protest unequal wages and working conditions

he returned to Memphis to address a gathering at the Mason Temple

which served as the World Headquarters of the Church of God in Christ -- April 3, 1968

On this occasion Dr. King delivered a speech that came to be known

as the *I've Been to the Mountain Top* speech

when he neared the close he said: **“And then I got into Memphis. And some began to say the threats... or talk about the threats that were out. What would happen to me from some of our sick white brothers? Well, I don't know what will happen now. We've got some difficult days ahead. But it doesn't matter with me now. Because I've been to the mountaintop. [applause] And I don't mind. Like anybody, I would like to live a long life. Longevity has its place. But I'm not concerned about that now. I just want to do God's will. And He's allowed me to go up to the mountain. And I've looked over. And I've *seen* the promised land. I may not get there with you. But I want you to know tonight, that we, as a people, will get to the promised land! [applause] And so I'm happy, tonight. I'm not worried about anything. I'm not fearing any man. Mine eyes have seen the glory of the coming of the Lord!”**⁴⁸¹

After the speech, Dr. King returned to the motel room he shared with his close friend

Rev. Ralph Abernathy of the Southern Christian Leadership Conference

REV. DR. MARTIN LUTHER KING IS ASSASSINATED

Dr. Martin Luther King spent the day with Civil Rights activists and friends -- April 4, 1968

as evening approached the Civil Rights leaders stepped out onto the room's balcony

According to Jesse Jackson who was in the motel room, Dr. King spoke with musician Ben Branch who was scheduled to perform at the event Dr. King was going to attend that night **“Ben, make**

sure you play *Take My Hand, Precious Lord* in the meeting tonight. Play it real pretty.”⁴⁸²

those were his last words as a shot rang out -- 6:01 p.m. April 4, 1968

Dr. King, age thirty-nine, was pronounced dead at St. Joseph's Hospital at 7:05 p.m.

Stokely Carmichael, the leader of Student Nonviolent Coordinating Committee (SNCC),

stated that whites murdered the one person who would prevent rampant rioting

and that blacks would burn every major city to the ground

RIOTING SWEEPS ACROSS AMERICA

In every major city from Boston to San Francisco, race riots broke out in the black community -- 1968

fueled by frustration and grief, Americans for and against Civil Rights took out their aggressions

more than 110 cities saw acts of violence including looting, arson and shootings

⁴⁸¹ Stanford, The Martin Luther King, Jr. Research and Education Institute, <https://kinginstitute.stanford.edu/king-papers/documents/ive-been-mountaintop-address-delivered-bishop-charles-mason-temple>

⁴⁸² John Jordan, *Born Black* in the U.S.A. P. 58.

damage done in many cities destroyed black businesses
several hundred people were injured
about 3,000 people were arrested -- most of those in Washington, D.C.
In an effort to regain control, curfews were put into place in many areas of the country
National Guard soldiers were mobilized to help stop the violence
which was threatening to engulf the entire United States in a race war
twelve thousand troops were called out in the nation's capital
to help protect fire fighters tackling at least eight blazes started by rioters
in Chicago looting and sniper attacks were accompanied by fires
that completely destroyed at least twenty buildings
Detroit saw thirty-eight arson attacks, shootings were reported in Pittsburg
Tennessee State University was the scene of a four-hour gun battle
Dr. Martin Luther King's successor and new head of the Southern Christian Leadership Conference
Rev. Ralph Abernathy repeatedly appealed for calm
he appeared on television and urged respect for the murdered leader's commitment
to non-violent protest
"White Flight" occurred in several cities
leaving blacks to live isolated dilapidated and nearly unrepairable cities

SIEGE OF KHE SANH COMES TO AN END

U.S. forces involved in Operation "Pegasus" finally captured the primary supply route to Khe Sanh
ending the seventy-seven-day siege -- April 8, 1968
Khe Sanh was the biggest single battle in Vietnam to that point
official assessment of the North Vietnamese Army's dead was just over 1,600
with two divisions all but annihilated
thousands more were probably killed by American bombing

ANTI-WAR RIOTING TAKES PLACE IN BERKELEY, CALIFORNIA

National press and television captured anti-war riots in Berkeley, California -- April 17, 1968
police over-reaction was shown in Berlin and Paris sparking demonstrations in those cities

MORE HUMAN BONES ARE DISCOVERED AT THE MARMES ROCKSHELTER SITE

Human bones that dated back more than 10,000 years were unearthed -- April 1968
these were the oldest found up to that point anywhere in the Western Hemisphere
In light of construction of four Snake River dams, emergency salvage operations began immediately
as did a campaign to bring public attention and funding to the site
Roald Fryxell and WSU's Dr. Richard Daugherty appeared at a press conference
hosted by Washington's U.S. Senator Warren G. Magnuson
they announced that bones that could be as old as 13,000 years had been discovered
some had been charred and split in a way that suggested cannibalism
they also announced this site was about to be flooded by the Lower Monumental Dam

STUDENT PROTEST GROUPS

Students for a Democratic Society activists led an effort called "Ten Days of Resistance"

rallies, marches, sit-ins and teach-ins culminated in a one-day strike -- April 26, 1968
Across the nation almost a million college and high school students boycotted classes
to show opposition to the war -- April 26, 1968

this was the largest student strike in the history of the United States
Many college and public school administration officials felt foreign Communists
were aiding and abetting the movement although no evidence of this was discovered

BOEING RESTRUCTURES IT OPERATIONS

Boeing carried out a major internal restructuring
some divisions of the company were eliminated as others were created -- 1968
but its Commercial Airplane Division remained the largest part of the company
Thornton Arnold "T.A." Wilson became company president replacing William M. Allen -- 1968
he had to deal with problems associated with the 747
flight test program was hampered by problems with the engines
which stalled because of rapid movements of the throttles
problems also delayed 747 deliveries for several months and stranded twenty aircraft
at the Everett plant while they awaited engine installations

SECOND PHASE OF THE NORTH VIETNAMESE TET OFFENSIVE BEGINS

Viet Cong launch "Mini Tet" -- May 5, 1968
Saigon, the capital of South Vietnam is struck by a series of rocket and mortar attacks
as were 119 other cities and military installations throughout South Vietnam
U.S. troops responded with air strikes using Napalm and high explosives

PEACE TALKS BEGIN IN PARIS

President Lyndon Johnson halted bombing operations over North Vietnam
in an effort to bring the Communist government in Hanoi to the peace table
Both sides first met -- May 10, 1968
(but the negotiations stalled for five months
North Vietnam demanded a total halt of the bombing w
U.S. insisted that North Vietnamese troops withdraw from the South)

SNAKE RIVER'S LOWER MONUMENTAL DAM THREATENS MARMES ROCKSHELTER⁴⁸³

Lower Monumental Dam was originally scheduled to be completed [December 1968
under pressure U.S. Senator Warren Magnuson and others
Army Corps of Engineers, builders of the dam, agreed to finance new excavations
to salvage as much of the archaeological record at the Marmes site as possible
Digging at the Marmes Rockshelter began -- May 1968 (it continued through [February])
faced with the knowledge that the site would probably be under water in a matter of months,
it was decided to sacrifice precision for speed
most workers went on eighteen-hour shifts despite one of the coldest winters on record
Roland Marmes' bulldozer was put to work again along with a backhoe

⁴⁸³ Cassandra Tate, *Marmes Rockshelter*, HistoryLink.org, Essay 7970, October 5, 2006.

machines churned through the upper layers in order to get to older, deeper levels,
probably destroying many small artifacts and possibly more human remains
each lost artifact was of value in interpreting the lives of ancient people
stone tools were found as well as scrapers for use in tanning hides; and mortars and pestles
amounts of snail shells imported from the West Coast 200 miles away were found
majority of the shells had holes drilled through them
indicating that they had adorned necklaces (on the coast they were as money)
analyzing pollen sequences at the site showed when the Ice Age retreated
it was followed by a steppe climate of semi-arid grasslands without trees
this was followed in turn by mixed pine and spruce forests
which eventually gave way to the current prairie ecosystem

UNIVERSITY OF WASHINGTON BLACK STUDENT SIT-IN

Recently-formed University of Washington Black Student Union (BSU) had for weeks
been petitioning the University administration
to develop a recruitment program for black students
and to expand the black studies program⁴⁸⁴

University officials expressed their alleged sympathy for the BSU's concerns
but ultimately ignored the issue

BSU members staged a surprise occupation

of the offices of UW President Charles Odegaard -- May 20, 1968
to demand the UW take steps to address the under-enrollment of black students
also, \$50,000 was demanded to be spent developing an expanded black studies program
beginning with twenty-five protestors, the number rapidly grew to fifty
who brought in bags of groceries and a portable record player showing their resolve
to maintain the occupation as long as necessary

As several Seattle police cars and a growing crowd of UW community members anxiously waited
outside the Administration Building where intense negotiation were being conducted
University President Odegaard, after four hours of talks, signed a policy statement
committing the UW to the Black Student Union's demands

(Today the legacy of this event remains on the UW campus
represented by the Office of Minority Affairs and Diversity, Ethnic Cultural Center and Theatre,
and the American Ethnic Studies department)

ROBERT KENNEDY IS ASSISSANATED IN LOS ANGELES

On the campaign trail for the presidency, Robert F. Kennedy (RFK, Bobby) Kennedy
was speaking at an event at the Ambassador Hotel in Los Angeles -- June 4, 1968
he had just learned that he won the South Dakota Democratic primary election
Kennedy had planned to talk to supporters in the ballroom
before attending another gathering of supporters elsewhere in the hotel
Bobby spent a little time greeting supporters in the ballroom
he welcomed contact with the public -- people often tried to touch him in their excitement

⁴⁸⁴ Jeff Stevens, *The UW Black Student Union Sit-In*, Radical Seattle Remembers.com, 2010.

However, with television deadlines rapidly approaching, reporters wanted a press conference
it was decided to cut through the kitchen and pantry behind the ballroom to get to the press area
Kennedy passed through the kitchen area where he greeted and shook hands with the hotel staff
he started down a passageway made narrow by an ice machine against the right wall
and a steam table along the left wall
he turned to his left and shook hands with busboy, Juan Romero,
when the assassin stepped out from beside the ice machine
and repeatedly fired a .22-caliber revolver -- just after midnight June 5, 1968

Robert F. Kennedy was hit three times
one bullet, fired at a range of about one inch, entered behind his right ear
dispersing fragments throughout his brain
two others entered just behind his right armpit
one exited from his chest and the other lodged in the back of his neck
in the melee five other were wounded by the spray of bullets fired until the gun was empty
none were fatally wounded

All three television networks (ABC, NBC and CBS) began coverage just minutes after the shooting
a still photograph of Kennedy sprawled on the floor was televised
as reporters noted in a voice-over that he had been shot repeatedly by an unknown assailant
but was conscious and had "good color"
a physician at the scene remarked that the extent of his injuries was unknown

Later reports were provided by Kennedy's press secretary who stood on a car
outside Good Samaritan Hospital to relay more technical information supplied by surgeons
An announcement was made that Robert F. Kenney had died -- 1:44 a.m. June 6, 1968
nearly twenty-six hours after the shooting

MARMES ROCKSHELTER BECOMES A SWARM OF ACTIVITY⁴⁸⁵

Marmes Rockshelter was crowded with scientists, students and onlookers -- June 1968
media attention was directed at the ongoing activities and a number of important new discoveries
including a tiny bone needle with an eye about the diameter of a modern straight pin
other needles, awls and small bone tools found suggested that work
requiring some delicacy was done outdoors where the light was better
another major discovery inside the rockshelter was the cremation hearth
found at a deep level not excavated earlier
this hearth consisted of a series of small rings of rock and rock piles,
peppered with ancient shards of bone, rock chips
and debitage (waste flakes resulting from the manufacture of stone tools)
virtually all of the bone was extensively burned
making it difficult to determine if it was human or animal
adding to the difficulty, all of the bone fragments found in the hearth area were small
(Later analysis indicated that the hearth was used primarily for human cremation,
in accordance with ritualistic burial practices that were common among Stone Age peoples
most of the bones and bone fragments in the hearth area had been burned

⁴⁸⁵ Cassandra Tate, *Marmes Rockshelter*, HistoryLink.org, Essay 7970, October 5, 2006.

and then broken into smaller pieces and reburned
this practice could account for Roald Fryxell's earlier assumption these people were cannibals

REPUBLICAN NATIONAL CONVENTION TAKES PLACE

Republican Party held its presidential nominating convention in Miami Beach -- August 5-8, 1968

Richard Nixon developed a strategy with the help of southern conservatives
to entice the Southern states to abandon the Democratic "Solid South"
and join the Republican Party

Richard Milhous Nixon was placed in nomination by Maryland Governor Spiro Agnew

he was selected as the Republican presidential candidate on the first ballot

Nixon surprised the convention when he selected Spiro Agnew as his Vice President

During the convention delegates were harassed by 3,000 antiwar demonstrators

many were painted with death masks

hundreds of protestors were arrested outside the meeting hall

many were injured when police imposed aggressive riot-control measures

TACOMA TEACHERS NEGOTIATE THE FIRST COLLECTIVE BARGAINING AGREEMENT

Tacoma Education Association, the local union affiliate of the Washington Education Association,

successfully negotiated the first true collective bargaining agreement in the state -- 1968

Washington Education Association began to organize collective bargaining in other school districts

to negotiate "professional agreements" to protect the rights of local association members

professional agreements provided protection to teachers

who signed "personal service contracts" with their school district

VIET CONG ATTACK ONCE AGAIN

Third and final phase of the Tet Offensive began -- August 17, 1968

significantly, only North Vietnamese forces participated in the attack on South Vietnam

Viet Cong troops initiated the attack in an effort to draw defensive forces away from the cities

three North Vietnamese regiments asserted heavy pressure on the U.S. Special Forces camp

three miles from the Cambodian border

fighting lasted for two days before the North Vietnamese broke it off

TET OFFENSIVE ENDS AS A DISASTER FOR THE VIETCONG

Thrust of the third phase of the Tet Offensive continued until -- August 30, 1968

by the end of the Tet Offensive, 37,000 Vietcong troops had been killed

many more had been wounded or captured

including most of the Vietcong's best fighters, political officers and secret organizers

for the guerillas, Tet was nothing less than a catastrophe

fighting also had created more than a half million South Vietnamese civilian refugees

For Americans, who lost 2,500 men, the Tet Offensive was a serious blow to public support

AMERICANS ARE IN TURMOIL

For Americans, the world seemed to be turned upside down

Dr. Martin Luther King, Jr., had been assassinated [April 4, 1968]

in response, race riots broke out in some 125 cities across the nation
rioting in Baltimore lasted five days
Robert (Bobby) Kennedy's life was taken [June 5, 1968]

DEMOCRATIC NATIONAL CONVENTION IS HELD IN CHICAGO

Democratic President Lyndon Johnson had announced he would not seek a second term in office
Democratic presidential hopeful Eugene McCarthy (D-Minnesota) had been running
against President Johnson's Vice President, Hubert Humphrey
U.S. Senator Robert Kennedy, thought by many to be the leading contender,
was murdered [June 5]
feelings were already running high
Chicago's mayor, Richard J. Daley, intended to showcase his city
and its achievements to the news media gathered for the Democratic nominating convention
However, more than 10,000 anti-war protesters who marched and demonstrated throughout the city
had a different goal in mind

RIOTS TAKES PLACE IN CHICAGO

Approximately 15,000 anti-war demonstrators held a legal rally in Chicago's Grant Park
other demonstrations involved hundreds or even thousands
Chicago mayor Richard J. Daley unleashed 23,000 police and National Guardsmen
eyewitnesses reported a young boy lowered the American flag -- about 3:30 p.m. August 28, 1968
police officers rushed through the crowd and began beating the boy
in response, the crowd pelted the police with food, rocks and chunks of concrete
tensions between Chicago Police assisted by the Illinois National Guard and protesters
quickly escalated -- fights broke out between the police and protestors
Tom Hayden, one of the leaders of Students for a Democratic Society (SDS), encouraged protestors
to move out of the park to ensure that if they were tear gassed the whole city would be tear gassed
if blood was to be spilled it would happen throughout the city
Police sprayed demonstrators and bystanders indiscriminately with Mace
they unleashed enormous amounts of tear gas on the protestors
so much that it eventually made its way to the Hilton Hotel
where it disturbed presidential candidate Hubert Humphrey while he was taking a shower
Police assault in front of the Hilton Hotel
became the most famous image of the Chicago demonstration
this attack took place live for seventeen minutes under television lights
with the crowd shouting, "The whole world is watching"
As rioting took place outside of the convention hall,
inside Connecticut U.S. Senator Abraham Ribicoff used his nominating speech
for U.S. Senator George McGovern to tell of the violence
going on outside the convention hall, saying that **"with George McGovern we wouldn't
have Gestapo tactics on the streets of Chicago."**⁴⁸⁶
Chicago Mayor Daley responded to his remark with something

⁴⁸⁶ David Farber, *Chicago '68*, P. 201.

that the television sound was not able to pick up (and would have been censored)
Disturbances throughout the Democratic Convention were well publicized by the mass media
some journalists and reporters were caught up in the violence
well-known and respected CBS network newsmen Mike Wallace and Dan Rather
were both roughed up by the Chicago police inside the convention hall
That night, NBC News switched its coverage back and forth
between the demonstrators being beaten by the police
and the festivities over Humphrey's victory in the convention hall
it was clear that the Democratic party was sorely divided

IN THE AFTERMATH OF THE CHICAGO DEMOCRATIC CONVENTION RIOTS

After the Chicago protests, demonstrators were confident that the majority of Americans
would side with them over what had happened in Chicago -- especially because of police behavior
they were shocked when public opinion polls demonstrated that the majority of Americans
supported Mayor Richard Daley's tactics
Debacle in Chicago severely damaged the prospects for a Democratic victory in 1968
perception of the Democratic convention was negative
and Democrats were more divided than ever
Democratic ticket of Vice President Humphrey and Senator Edward Muskie (D- Maine)
would begin the campaign having to "defend" a weakened Johnson administration
and the national party

RICHARD NIXON MOUNTS THE REPUBLICAN CAMPAIGN

As the Republican candidate, Richard Nixon had only to point to the domestic unrest and violence
along with the war in Vietnam to argue that it was a time for change
his largely media-based campaign emphasized how the country had deteriorated since [1965]
However, Nixon's position and statements on Vietnam were studiously ambiguous
he emphasized the need for "peace with honor" and "law and order"
although he referred to a plan for peace, he offered no explanation of what he would do
because his plan might interfere with the Johnson administration efforts
to achieve a settlement or would weaken his own bargaining position
if he became President
to counter the possibility of a late campaign "Peace Offensive" by the Democrats,
Nixon developed a "back channel" to persuade South Vietnam President Thieu
not to cooperate with President Johnson in his effort to achieve peace
this line of communication went through John Mitchell (later named Attorney General)

HUBERT HUMPHREY CAMPAIGNS FROM BEHIND

As the election campaign got underway, polling numbers showed Humphrey trailing Nixon
campaign financing was slow and President Johnson refused to use his office to help raise money
campaign leaders decided to spend no money on radio or television advertising
until the final three weeks of the election
Candidate Humphrey, in an effort to heal party wounds, agreed to appoint a special commission
to reform the party's rules governing delegate selection and presidential nominations

his selection of commissioners was, in fact, viewed as the same old “back room” politics by many (although they would adopt substantial reforms which created the marathon of primaries and caucuses used today)

THIRD PARTY CANDIDATE GEORGE WALLACE HURTS THE DEMOCRATIC PARTY

Many Americans outside the South, even those who considered themselves moderate on race issues, began to wonder if perhaps the country needed an independent political leader
Alabama Governor George Wallace ran as the American Independent Party candidate
Hubert Humphrey was not considered a serious threat for the presidency
and Republican Richard Nixon’s slick, carefully-orchestrated campaign was in contrast to George Wallace’s blunt outspokenness on the stump that was appealing to many
Wallace’s campaign for president succeeded in raising nine million dollars mostly from contributions of under fifty dollars, although Wallace also accepted large donations from people like wealthy Texas oilman Bunker Hunt and actor John Wayne
kickbacks from winning Alabama state contracts also swelled his campaign coffers
Wallace, a political realist, knew he had little chance of being elected but if he could keep Humphrey and Nixon from winning the electoral college vote he could demand that one of the other candidates support him on his issues before he would deliver the presidency
Wallace’s tirades against hippies, the Supreme Court, and big government and his noble depiction of the white working class was better received than pundits predicted but his selection of former Air Force Chief of Staff General Curtis LeMay as vice president whose blunt manner and belief in the necessity of the atom bomb eroded Wallace’s support

WASHINGTON’S LATINO MOVEMENT EXPANDS BEYOND THE YAKIMA VALLEY⁴⁸⁷

During the late 1960s (and early [1970s]), many in Seattle’s Chicano/Latino community isolated but the small community could see transformations taking place as a result of the Chicano Movement developing throughout the United States
Yakima-area students were recruited by the University of Washington’s Black Student Union they initiated the Chicano student movement in Seattle
collaboration across racial lines was a unique development in the Northwest it provided an integral part of the legacy of civil rights activism in the region
Soon after arriving on campus thirty-five Chicano students formed the first chapter in the Northwest of the United Mexican American Students (UMAS)
they worked to establish a Mexican-American Studies class through the College of Arts & Science
UMAS also engaged in a campaign to halt the sale of non-union table grapes at the UW
Chicano activists formed organizations, committees, programs, and activities on and off-campus:

- United Farm Workers Cooperative,
- United Farm Workers grape boycott,

⁴⁸⁷ Oscar Rosales Castaneda, *Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s*, HistoryLink.org, Essay 7922, October 21, 2007.

- El Centro de La Raza which helped build Chicano communities where none had existed before
- community health centers,
- Chicano Education Opportunity Program,
- Chicano Studies center at the University of Washington

These alliances were essential to the movement's success

alliances for civil rights that emerged allowed for further progress within the Chicano community at a time when the local population was miniscule

SEATTLE'S VOLUNTARY BUSING PROGRAM IS A DISMAL FAILURE

Seattle School Board's voluntary effort to achieve racial balance in the city's schools

resulted in little movement of students of color into North End schools

and even less movement of white students into South End schools⁴⁸⁸

Civil rights activists were split on the issue of how the school board could best promote integration one side, represented by the Central Area Civil Rights Committee,

advocated closing predominantly black elementary schools in the South End

and moving the students to predominantly white schools in the North End

another Central Area group opposed most desegregation plans

because they placed the burden of integration on black pupils

some believed more forceful measures were needed to overcome years of ingrained segregation

still others called for the expansion of special programs to encourage voluntary transfers

Following a new tact, the school board tried enticing white students to move to minority schools

by implementing "magnet programs," beginning with Garfield High School -- September 1968

SDS IS ACTIVE ON THE UNIVERSITY OF WASHINGTON CAMPUS AND BEYOND

Students for a Democratic Society (SDS) at the University of Washington was a multi-issue group

that drew attention with its activities on issues of antiwar, labor and civil rights

as well as publishing a newsletter, *SDS News*

SDS and other radical and antiwar groups on campus received wide-ranging support for their efforts

SDS ran a slate of candidates for the 1968 student government elections -- September 1968

who advocated explicitly radical positions -- they received 25% of the total vote

FEDERAL GRAND JURY INVESTIGATES CHICAGO RIOTS

Federal grand jury was empaneled to consider criminal charges

regarding activities during the Chicago riots -- September 9, 1968

On and off for more than six months the grand jury met thirty time and heard some 200 witnesses

President Lyndon Johnson's Attorney General, Ramsey Clark, discouraged any indictments

as the Administration believed the violence was primarily caused by the Chicago police

TWO MAJOR POLITICAL PARTIES PUSH THEIR CANDIDATE FOR PRESIDENT

Both Democrat and Republican campaigns began to use their vice-presidential candidates

to attack the other presidential candidate

Republican Vice Presidential nominee Spiro Agnew assailed Hubert Humphrey

⁴⁸⁸ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002.

who was closely tied to Johnson for being soft on Communism, inflation and law and order
Democrat running mate Ed Muskie was a natural campaigner
he confronted Richard Nixon, President Eisenhower's vice president, for ignoring such issues
as urban renewal, housing and federal aid for education and sewage
While in Salt Lake City Humphrey delivered a televised speech to the nation -- September 30, 1968
he announced that if he was elected, he would end to the bombing of North Vietnam
and call for a ceasefire
he contrasted his "new acceptable risk for peace" with Nixon's statement that
he would not reveal his plan until Inauguration Day

NORTH CASCADES NATIONAL PARK IS ESTABLISHED

Washington State's North Cascades National Park is the largest of three National Park Service units
that comprise the North Cascades National Park Service Complex
this park opened -- October 2, 1968
several national wilderness areas and British Columbia parkland adjoin the National Park
North Cascades National Park protects portions of the North Cascades mountain range
it features rugged mountain peaks -- the park had 318 glaciers
more than any U.S. park outside Alaska
all of the glaciers in the park have retreated significantly [1980-2005] and the rate is increasing
Eight distinctive life zones support thousands of different plant species in the North Cascades
no other National Park surpasses North Cascades National Park in the number of plant species
this park contains an estimated 236,000 acres of old-growth forests
North Cascades National Park also has a rich diversity of animals
it is home to seventy-five species of mammals
including wolves, grizzly bears, mountain lions/lynx, moose, wolverines and black bears
and 200 species of birds including bald eagles (the national bird)
that either pass through or use the North Cascades for a breeding area.
there are also eleven species of fish on the west side of the Cascades
North Cascades National Park has few maintained buildings and roads within the park
therefore, it is most popular with backpackers and mountain climbers
one of the most popular destinations in the park is Cascade Pass
which was used as a travel route by ancient and contemporary Native Americans alike

APOLLO VII IS THE FIRST MANNED FLIGHT AFTER THE APOLLO I DISASTER

(All three Apollo I astronauts had been killed in a cabin fire [January 27, 1967]
after the launch pad fire, the Apollo Command Module had been extensively redesigned)
Apollo VII was the next attempt to launch astronauts into space
three-man Apollo VII astronaut crew was composed of
Commander of the Apollo VII mission Walter M. Schirra who was on his third space flight
he was the only astronaut to fly Mercury, Gemini and Apollo missions
Command Module Pilot was Donn F. Eisele
Lunar Module Pilot was R. Walter Cunningham
Apollo VII blasted into space -- October 11, 1968
even though Apollo's larger cabin was more comfortable than Gemini's,

eleven days in orbit took its toll on the astronauts
tensions with Schirra began when flight managers decided to launch
with a less than ideal abort option for the early portion of the flight in place
once in orbit the spacious cabin may have caused some crew motion sickness
which had not been an issue in the earlier smaller spacecraft
astronauts also were unhappy with their food selections
but the worst problem occurred when Schirra developed a severe head cold
he became irritable with requests from Mission Control
and all three astronauts began “talking back” to the engineers on the ground
Despite these difficulties, the mission successfully met its objective
capability of manned flight aboard the Apollo Command and Service Modules was proven
also the first live television broadcast from an American spacecraft was received on Earth
Successful splashdown was accomplished about 200 miles South-southwest of Bermuda
where the recovery ship USS *Essex* waited -- October 22, 1968

OPERATION “ROLLING THUNDER” COMES TO AN END

After three and a half years, Operation “Rolling Thunder” came to an end -- November 1, 1968
this campaign had cost 818 American pilots dead or missing
and more than 900 American aircraft destroyed
nearly 120 Vietnamese airplanes were destroyed in air combat or accidents, or by friendly fire
it was estimated that 182,000 North Vietnamese civilians had been killed
twenty thousand Chinese support personnel also were casualties of the bombing

VERY CLOSE 1968 ELECTION IS WON BY RICHARD MILHOUS NIXON

Republican Richard Nixon was elected president by a razor-thin margin -- November 5, 1968
Nixon won 43.42% of the popular vote to 42.72% for Democrat Hubert Humphrey
and 13.53% for pro-segregation American Independent Party candidate George Wallace
the former Governor of Alabama
because Nixon carried the key states of California, Illinois and Ohio and Florida,
he won more decisively in the Electoral College with 301 votes to 191 for Humphrey
George Wallace carried five states in the Deep South picking up forty-six electoral votes

In Washington State the election results provided little change:

- Republican Governor Daniel J. Evans won a second term in office;
- Democrat U.S. Senator Warren G. Magnuson easily won reelection;
- Washington’s Congressional delegation, five Democrats and two Republicans, all were reelected;
- Democrats lost one seat in the State Senate but retained a twenty-seven to twenty-two majority;
- Republicans in the State House of Representatives added one seat to their majority
holding a fifty-six to forty-three vote edge

KING COUNTY VOTES APPROVE THE STATE’S FIRST HOME RULE CHARTER

King County voters changed their county’s government -- November 5, 1968
King County’s new Charter created the new position of King County Executive
and replaced the old three-member County Commission with a nine-member County Council
(First Executive, John Spellman, and first members of the new Council were elected [1969])

County Council was expanded to thirteen members and changed its name to the Metropolitan King County Council to reflect [1992])⁴⁸⁹

APOLLO VIII SET OUT TO CIRCLE THE MOON

These Astronauts would be the first:

- humans to leave Earth orbit;
- to be captured by and escape from the gravitational field of another celestial body;
- to directly see the far side of the Moon

they also were the first crewed launch from the John F. Kennedy Space Center, Florida located adjacent to Cape Canaveral

Apollo VIII's crew was composed of Commander Frank F. Borman II on his second flight on this flight the commander was not the most experienced member of the crew Command Module Pilot James A. Lovell, Jr. on his third flight Lunar Module Pilot William A. Anders on his first trip into space

This launch used a Saturn V rocket for the first time -- December 21, 1968

Apollo VIII took three days to travel to the Moon

during this time the first attempt to broadcast live television from the spacecraft failed second television broadcast was made at fifty-five hours into the flight

first television pictures of the Earth through a telephoto lens were projected back to Earth this transmission lasted twenty-three minutes

At sixty-four hours into the flight, the crew began to prepare for Lunar Orbit

this maneuver had to be performed on the far side of the Moon and out of contact with Earth anything less than perfection doomed the flight

at sixty-eight hours and fifty-eight minutes the spacecraft went behind the Moon and out of radio contact with the Earth

thrusters burned for four minutes and thirteen seconds placing the Apollo VIII spacecraft in orbit around the Moon

crew described the burn as being the longest four minutes of their lives

if the burn had not lasted exactly the correct amount of time, the spacecraft

could have ended up in a highly elliptical lunar orbit or even flung off into space

if it lasted too long they could have crashed on the Moon

after making sure the spacecraft was working, they finally had a chance to look at the Moon which they would orbit for the next twenty hours

While reporting on the status of the spacecraft, Lovell gave the first description of the lunar surface:

“The Moon is essentially grey, no color; looks like plaster of Paris or sort of a grayish beach sand. We can see quite a bit of detail. The Sea of Fertility doesn't stand out as well here as it does back on Earth. There's not as much contrast between that and the surrounding craters. The craters are all rounded off. There's quite a few of them, some of them are newer. Many of them look like—especially the round ones—look like hit by meteorites or projectiles of some sort. Langrenus is quite

⁴⁸⁹ Walt Crowley, *King County voters approve first Home Rule Charter on November 5, 1968*, HistoryLink.org, Essay 1992, January 1, 2000.

a huge crater; it's got a central cone to it. The walls of the crater are terraced, about six or seven different terraces on the way down."⁴⁹⁰

When the spacecraft came out from behind the Moon, the crew witnessed Earthrise for the first time in human history

Borman saw the Earth emerging from behind the lunar horizon

he called in excitement to the others taking a black-and-white photo as he did so

Anders took the more famous color photo

(later picked by *Life* magazine as one of its hundred photos of the century)

APOLLO VIII RETURNS TO EARTH

Journey back to Earth was mostly a time for the crew to relax and monitor the spacecraft

on Christmas afternoon, the crew made their fifth television broadcast

this time they gave a tour of the spacecraft showing how an astronaut lived in space

After two uneventful days the crew prepared for a computer-controlled re-entry

all the crew had to do was put the spacecraft in the correct attitude, blunt end forward

if the computer broke down, Commander Borman would take over

Spacecraft splashdown position was in the North Pacific Ocean south of Hawaii -- December 27, 1968

when it hit the water, the parachutes dragged the spacecraft over and left it upside down

about six minutes later the Command Module was righted by the inflatable bag up righting system

astronauts were buffeted by ten-foot waves

because the spacecraft landed before sunrise, it took forty-three minutes before the first frogman

from the USS *Yorktown* arrived

after another forty-five minutes the crew was safely on the deck of the aircraft carrier

SDS AT THE UNIVERSITY OF WASHINGTON SUPPORTS OTHER RADICAL GROUPS

Protest efforts at the University of Washington expanded -- December 28, 1968

Students for a Democratic Society (SDS) worked in conjunction with Draft Resistance Seattle

to initiate a number of campaigns organizing radical and antiwar groups at area high schools

activities were focused on students whose draft deferments

would soon change after graduation

Vietnam Day Committee (later the Student Mobilization Committee) on campus

was a large, explicitly antiwar group that involved members of the Young Socialist Alliance,

and the youth wing of the American Socialist Workers' Party

Vietnam Day Committee organized many of the antiwar actions on campus in 1968-1969

including the formation of a student-soldier antiwar group,

GI-Civilian Alliance for Peace (GI-CAP)

GI-CAP was one of the first organizations in the country to form links

between civilians and antiwar soldiers and inspired similar organizing elsewhere in the country

students in GI-CAP joined with their active-duty colleagues

to put out an underground newspaper, *Counterpoint*, that was distributed to soldiers,

they held citywide antiwar conferences and marches,

⁴⁹⁰ Richard W. Orloff, *Apollo by the Numbers: A Statistical Reference*, P. 40.

they even staged an “invasion” of Fort Lewis by boat
to “liberate soldiers” from the military
GI-CAP’s work was followed by more intensive efforts at the UW and at Fort Lewis among GIs
radicals and antiwar activists gained a wider audience
as they joined with antiwar and black power protestors across the country
African American students organized the Black Students’ Union which led a 1968 strike
actively supported by U.W. liberals demanding an ethnic studies program on campus

HISTORY OF AMERICAS INVOLVEMENT IN VIETNAM IS COLLECTED

Secretary of Defense Robert McNamara had created a Vietnam Study Task Force [June 17, 1967]
for the purpose of writing an “encyclopedic history of the Vietnam War”
he wanted to leave a written record for historians,
but kept the study secret from the rest of the Johnson administration
McNamara left the Defense Department in [February 1968]
his successor Clark M. Clifford received the 3,000 pages of historic analysis
4,000 pages of original government documents in forty-seven volumes
five days before Richard Nixon’s inauguration -- January 15, 1969
it was classified as “Top Secret - Sensitive”

REALITY TELEVISION BECOMES VERY REAL

Television, in its endless quest to reach viewers, wins ratings, and to sell advertising
became fixated on tragic news events well within the memory of the public
The assassinations of President John Kennedy, Dr. Martin Luther King
and the president’s younger brother, Robert Kennedy, were featured programming for years
U.S. Senate and House of Representatives investigations into the tragic events were shown
as an endless stream of “new evidence” capture the public’s attention
conspiracy theories and counter-theories were debated
personal, group and collective observations, interpretations and reflections all were aired
Each analysis of the catastrophes brought an anguished (if diminishing) response from the public

ASSASSINATION IN SEATTLE⁴⁹¹

Housing discrimination and *de facto* school segregation were widespread in Seattle
Edwin T. Pratt was a member of the Central Area Civil Rights Organization in the struggle
for integrated housing and education in Seattle -- he was a respected and effective leader
through his leadership, the Urban League’s staff grew from five to twenty-five
and he became the Seattle chapter’s executive director [1961]
When Edwin T. Pratt opened the front door of his home in Shoreline to investigate a disturbance
(reportedly the sound of a snowball hitting a window), he was shot directly in the face
by one of two unknown persons, who then quickly fled -- 9:00 p.m. January 26, 1969
it was assumed that a third person was involved as the driver of the getaway car
darkness kept the witnesses from identifying whether the killers were white or black
King County Sheriff’s Department in collaboration with the FBI quickly began a formal investigation

⁴⁹¹ Jeff Stevens, *The Assassination of Edwin T. Pratt*, Radical Seattle Remembers.com, 2010.

\$10,500 was offered as a reward by local business leaders but the crime remained unsolved (Freelance journalist David Newman took an interest in the case he requested the relevant police files be released under the Public Disclosure Act [March 1994] this was supported by Pratt's daughter Miriam along with previous investigators on the case King County Council members Larry Gossett, Larry Phillips, and Ron Sims and Seattle Mayor Norm Rice also supported the request King County officials claimed exemption from the Act for the police investigative files only a partial release of the files requested by Newman was provided after a long legal battle, the Washington State Supreme Court ruled [November 1997] that the Pratt files should remain closed as long as the King County Police Department deemed it was necessary to this day, the crime remains unsolved Edwin T. Pratt is remembered in the Edwin T. Pratt Park and the Pratt Fine Arts Center both located in the Central Area and named in his honor [in the late 1970s]

MARMES ROCKSHELTER IS LOST⁴⁹²

As Lower Monumental Dam neared completion [fall of 1968] Washington U.S. Senator Warren G. Magnuson used his political clout to secure an emergency appropriation to build a horseshoe-shaped enclosure around the rockshelter and an adjacent floodplain it was hoped the area could be kept dry enough for archaeologists to continue their work unfortunately, the enclosure, built on a gravel base, filled as quickly as the main reservoir Scientists from Washington State University hurriedly covered what they could with plastic and sand and then watched helplessly as the site disappeared beneath forty feet of water in Herbert G. West Lake, the reservoir behind Lower Monumental Dam on the Snake River -- February 1969 Evidence collected before the site had to be abandoned showed the remains of at least thirty-eight individuals most had been cremated and then buried with grave goods that included shell beads, bear teeth, and in one case, the hoop from an infant's cradleboard excavators also found a wealth of tools, weapons and ornaments dating to the end of the Ice Age Marmes Rockshelter was one of the Pacific Northwest's most significant archaeological sites it contained thousands of Stone Age artifacts and the oldest human remains yet to be found in Washington State Half-drowned remnants of the leaky cofferdam still stand, visible from an overlook about a quarter-mile above Lyons Ferry State Park

KING COUNTY VOTERS DECIDE TO PAY FOR NEEDED IMPROVEMENTS

Voters passed part, but not all, of the "Forward Thrust" proposal -- February 13, 1969 these bonds would have funded twelve areas of capital improvement including rail transit, parks, sewage facilities and a new sports facility

⁴⁹² Cassandra Tate, *Marmes Rockshelter*, HistoryLink.org, Essay 7970, October 5, 2006.

rail transit failed, but sixty-three percent of the voters wanted a “Kingdome” sports stadium⁴⁹³
However, the \$40 million stadium project ran into complications:

- choosing a location became very difficult when 110 potential sites were identified;
- interest rates rose to six percent -- much higher than the 4.65% funded by the voters;

Squabbling, political maneuvering and threatened legal action by suggested neighborhoods combined to slow the effort

UNITED MEXICAN AMERICAN STUDENTS (UMAS) ACHIEVES SUCCESS

United Mexican American Students (UMAS) achieved some success in their [1968] grape boycott but the Husky Union Building failed to cooperate

After student pressure on the university administration increased,

UW Grape Boycott Committee was victorious -- February 17, 1969

University of Washington was the first campus in the United States to entirely remove grapes from all of its eating facilities⁴⁹⁴

In addition to the grape boycott, UMAS also called a conference in Toppenish⁴⁹⁵

to generate support for the creation of Chicano youth groups at the high school and college levels with the assistance of University of Washington faculty,

UMAS created “La Escuelita” in Granger, Washington -- 1969

which led to the creation of a program that taught history and culture to Chicano youth in Eastern Washington

(University of Washington United Mexican American Students (UMAS))

officially adopted the name Movimiento Estudiantil Chicano de Aztlan (MEChA)

VIETCONG LAUNCH A MAJOR CAMPAIGN IN VIETNAM

Vietcong assault teams and artillery attacked American bases all over South Vietnam killing 1,140 Americans -- February 22, 1969

At the same time, South Vietnamese towns and cities also were hit

heaviest fighting was around Saigon, the capital of South Vietnam

but fights rage all over South Vietnam

Eventually, American artillery and airpower overwhelm the Vietcong offensive

STUDENT ACTIVISTS LACK UNITY

Over 9,000 U.W. students marched to protest Reserve Officers’ Training Corps (ROTC) on campus because many did not agree with ROTC’s advocacy for the war -- March 1969

But even as the left gained momentum, Students for a Democratic Society (SDS) nationally split into several warring factions

sections of the campus left turned away from building broad movements and demonstrations toward confrontational guerilla actions designed to “spark” resistance

others turned to labor organizing or began to build women’s liberation groups

⁴⁹³ Alan J. Stein, *Sicks’ Stadium (Seattle)*, HistoryLink.org, Essay 1501, July 15, 1999.

⁴⁹⁴ Oscar Rosales Castaneda, *Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s*, HistoryLink.org, Essay 7922, October 21, 2007.

⁴⁹⁵ Oscar Rosales Castaneda, *Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s*, HistoryLink.org, Essay 7922, October 21, 2007.

however, even as SDS broke apart, campus radicalism and antiwar sentiment increased

APOLLO IX TESTS SEVERAL ASPECTS CRITICAL TO LANDING ON THE MOON

Third manned Apollo IX mission was launched into low earth orbit -- March 3, 1969
this was the first space test of the complete Apollo spacecraft,
including the Command/Service Module and the last critical piece of Apollo hardware,
the Lunar Module

Three-man crew was composed of astronauts:

- Commander James A. McDivitt on his second spaceflight,
- Command Module Pilot David R. Scott on his second spaceflight,
- Lunar Module Pilot Russell L. “Rusty” Schweickart on his first spaceflight

While in space the astronauts conducted tests on various pieces of equipment
including the Lunar Module engines, navigation systems and backpack life support systems
they also completed the first space docking of Command/Service Module with the Lunar Module
an internal crew transfer between them was successfully accomplished
during the ten days in orbit they manned and flew the Lunar Module for the first time
Schweickart and Scott each performed a spacewalk
Schweickart checked out the new Apollo spacesuit, the first to have its own life support system
rather than being dependent on an umbilical connection to the Command Module

For ten days, the astronauts put both Apollo space vehicles through their paces above the Earth
docking, undocking and redocking the lunar lander with the command vehicle,
just as the landing mission crew would have to perform
Apollo IX gave proved the Apollo spacecraft could accomplish a Moon landing
and protect the lives of the lunar landing crews

Splashdown point was 180 miles east of the Bahamas -- March 13, 1969
within sight of the recovery ship USS *Guadalcanal*

FEDERAL GRAND JURY RETURNS INDICTMENTS REGARDING THE CHICAGO RIOTS

Only after Richard Nixon was elected president were indictments returned
eight police officers were charged with civil rights violations
eight protesters also were charged with various crimes under the anti-riot provisions
of the Civil Rights Act of 1968 which made it a federal crime to cross state lines
with the intent to incite a riot
Abbie Hoffman, Jerry Rubin, David Dellinger, Tom Hayden, Rennie Davis, John Froines,
Lee Weiner and Bobby Seale

SEATTLE *PILOTS* TAKE TO THE BASEBALL DIAMOND

(Work had begun on Sicks' Stadium [early 1969]
during one of the worst winters the region had seen in half a century
heavy snowfall brought construction to a near halt)
Opening day saw only 6,000 seats added to Sick's Stadium -- April 11, 1969⁴⁹⁶
putting the seating capacity at a mere 17,000

⁴⁹⁶ Alan J. Stein, *Sicks' Stadium (Seattle)*, HistoryLink.org, Essay 1501, July 15, 1999.

As Seattle's *Pilots* (so named to honor both Boeing and Seattle's sea-going history) took to the field, some fans had to wait outside while their benches were installed these fans caught their first glimpse of the game in the third inning (Little did the city know that by the next year the *Pilots* would be gone faced with rising costs and low attendance,
Dewey and Max Soriano found themselves over their heads in debt delay after delay hampered the construction of the Kingdome and Sicks' Stadium was woefully inadequate
visiting players showered at their hotels due to low water pressure, when attendance exceeded 10,000 the toilets stopped flushing before the [1970] season began, the Pilots were sold to Milwaukee and were renamed the Milwaukee Brewers)

U.S. SUPREME COURT JUSTICE WILLIAM O. DOUGLAS DENOUNCES PRESIDENT NIXON

(Justice Douglas was stricken with a heart attack [1968] after his recovery he continued his work, travel, and enjoy trips into the wilderness)
Justice Douglas was an outspoken critic of Richard Nixon's policies -- 1969 he denounced what he saw as governmental attacks on the Bill of Rights he dissented when a Court majority that included three new Nixon appointees upheld U.S. Army surveillance of civil rights and anti-war activists

FINAL SEGMENT OF INTERSTATE-5 OPENS IN WASHINGTON STATE

(First segment of I-5 formally opened in Tacoma [December 1960] despite some protests, construction proceeded on schedule through the decade)
(Section of freeway from Tacoma to Everett was opened [January 1967] but just north of Everett, another segment of I-5 remained incomplete)
Last segment of freeway to be completed was the four mile stretch between Marysville and Everett built at a cost of \$9.8 million, it contained eleven bridges
northbound lanes opened – April 1969
southbound lanes opened -- May 14, 1969
last traffic light on the freeway between Canada and California was symbolically taken down when the new segment of freeway opened at 11 a.m.⁴⁹⁷
With this opening traffic could travel from the Canadian border to the California state line

DRAFT EVADERS SEEK ASYLUM IN A NUMBER OF PLACES

Most of those subjected to the draft were too young to vote or drink alcohol in most states ironically, the idea of young people being forced to risk their lives in the military without the privileges of voting or legally drinking pressured congress to lower the voting age nationally and the drinking age in many states
Many men received a deferment or exemption from the draft
many attended college to gain an exemption or deferment from the draft

⁴⁹⁷ Phil Dougherty, *Interstate 5 is completed in Washington on May 14, 1969*, HistoryLink.org, Essay 9393, April 10, 2010.

they had to remain in college until they turned twenty-six to be certain of not being drafted
some got married -- this remained an exemption throughout the war
some men were rejected by the military as 4-F -- unfit for service
after failing to meet physical, mental, or moral standards
also conviction for certain crimes resulted in an exclusion
still others joined the National Guard or entered the Peace Corps as a way of avoiding Vietnam
homosexuality was certain to provide an exemption at that time
but very few men attempted this because of the stigma involved
Many who received a deferment or exemption never served,
simply because the pool of eligible men was so huge compared to the number required for service
that draft boards never got around to drafting them because a new crop of men
would become available in the new year
All of these issues raised concerns about the fairness of who got selected for involuntary service
it was often the poor or those without connections who were drafted
Increasing opposition to the conflict among soldiers who served resulted in increasing fraggings
(assaulting, wounding, or killing an unpopular or overzealous officer
with a fragmentation grenade)

SOME FOREIGN GOVERNMENTS SUPPORT THOSE SEEKING TO EVADE THE DRAFT

Canadian federal government in Ottawa announced that immigration officials
would not and could not ask about the military status of immigration applicants
if they showed up at the border seeking permanent residence in Canada
over 30,000 people left the country and went to Canada, Sweden, and Mexico to avoid the draft
Japanese anti-war group Beheiren helped some American soldiers to desert and hide in Japan

APOLLO X APPROACHES A LANDING ON THE MOON

Apollo X was the fourth manned mission in the American Apollo space program
its purpose was to be a "dry run" to test all of the procedures and components of a Moon landing
without actually landing on the Moon itself
Three astronauts on board were lifted into space -- May 18, 1969
Commander L. Gordon Cooper, Jr. had two previous spaceflights
Command Module Pilot John W. Young had two previous spaceflights
Lunar Module Pilot Eugene A. Cernan had one previous spaceflight
This dress rehearsal for a Moon landing brought Stafford and Cernan's lunar module
to within ten miles of the lunar surface to test lunar gravitational potential
to calibrate the power needed for the descent to and takeoff from the Moon
(Splashdown of Apollo X occurred in the Pacific Ocean east of American Samoa -- May 26, 1969
astronauts were recovered by the USS *Princeton*)

INTERSTATE-5 IS COMPLETED FROM EVERETT TO TACOMA

Federal freeway from Canada to Mexico opened for traffic [January 31, 1967]
this did little to quiet the resentment of Seattle residents still facing the loss of their property
to the proposed R.H. Thompson Expressway running from Boeing Field in the south
to Lake City on the north

residents living along the route of proposed arterials designed to carry traffic
to and from the Thompson Expressway also expressed their grievances
Residents from Montlake and the Central districts and supporters of the Washington Park Arboretum
organized protests against the R.H. Thomson Expressway -- May 24, 1969
they flooded city council meetings with arguments against the project
homeowners in Montlake filed a series of lawsuits over the route through their neighborhood
and the effect the freeway would have on private property values
R.H. Thomson Expressway project was delayed
(eventually elected officials felt the pressure and placed the project on a special election ballot
where it was voted down and killed once and for all [February of 1972]
today, the bottleneck of I-5, as anticipated, continues)

BOEING DISPLAYS ITS NEW SUPERSONIC TRANSPORT (SST) AIRPLANE

Boeing Company profits declined to only \$10 million
however, these difficulties did not prevent Boeing
from taking one of their Supersonic Transport (SST) test aircraft to the 28th Paris Air Show
where it was displayed to the general public for the first time -- mid-1969

APOLLO XI CARRIES MAN TO THE MOON

In addition to throngs of people crowding highways and beaches near the launch site,
millions watched the launch of Apollo XI on television -- July 16, 1969
NASA Chief of Public Information Jack King provided a commentary
as Command Module *Columbia* lifted from the launch pad
three astronauts were on their way to the Moon
Commander Neil A. Armstrong on his second spaceflight
Command Module Pilot Michael Collins also on his second spaceflight
Lunar Module Pilot Edwin "Buzz" Aldrin, Jr. on his second spaceflight

APOLLO XI PASSES BEHIND THE MOON

Once behind the Moon Apollo XI fired its service propulsion engine to enter lunar orbit -- July 19
during the thirty orbits that followed, the crew saw passing views of their landing site
located in the southern Sea of Tranquility

LUNAR MODULE SEPARATES FROM THE COMMAND MODULE *COLUMBIA*

Astronauts Neil Armstrong and Buzz Aldrin departed aboard the Lunar Module, *Eagle*
Michael Collins remained alone aboard the Command Module *Columbia*
he inspected the *Eagle* as it pirouetted in front of him
to ensure the craft was not damaged on the way to the Moon -- July 20, 1969
As the *Eagle* descent began, Armstrong and Aldrin discovered they were passing landmarks
four seconds ahead of schedule -- they would land miles west of their target point
Armstrong again looked outside and saw their landing target was in a boulder-strewn area
he took semi-automatic control and with Aldrin calling out altitude and velocity data,
he landed with about twenty-five seconds of fuel left -- July 20

Neil Armstrong announced, “**Houston, Tranquility Base here. *Eagle* has landed.**”⁴⁹⁸

MAN WALKS ON THE MOON

Preparation for their Moon walk required longer than the two hours scheduled

Armstrong finally opened the hatch but initially had some difficulties squeezing through wearing his Portable Life Support System

Finally he began his descent to the lunar surface but the Remote Control Unit on his chest kept him from seeing his feet while climbing down the nine-rung ladder

Neil Armstrong set his left foot on the surface of the Moon -- 10:56 p.m. EDT July 20, 1969

he described the surface dust as “**very fine-grained**” and “**almost like a powder**”⁴⁹⁹

six and a half hours after landing Armstrong stepped off *Eagle's* footpad

he uttered his famous line: “**That's one small step for man -- one giant leap for mankind.**”⁵⁰⁰

President John Kennedy’s goal was reached

About seven minutes after stepping onto the Moon’s surface, Armstrong collected a soil sample using a sample bag on a stick

he then folded the bag and tucked it into a pocket on his right thigh

Aldrin joined him on the Moon’s surface and described the view as “**Magnificent desolation**”⁵⁰¹

both astronauts tested methods for moving around, including two-footed kangaroo hops, they discovered loping worked best

both astronauts planted a specially designed U.S. flag on the lunar surface in clear view of the TV camera

At the end of the walk on the Moon, Aldrin entered *Eagle* first

with some difficulty the astronauts lifted film and two sample boxes

containing more than forty-nine pounds of lunar surface material into the Lunar Module

Armstrong reminded Aldrin of a bag of memorial items in his suit sleeve pocket,

and Aldrin tossed the bag down to the surface

Armstrong then jumped to the ladder's third rung and climbed into the Lunar Module

After more than 2½ hours on the lunar surface, they had left behind scientific instruments

an American flag, an Apollo I mission patch and a plaque bearing two drawings of Earth

(one of the Western and the other the Eastern Hemispheres) with an inscription

and signatures of the astronauts and President Richard M. Nixon

plaque inscription read: “***Here Men From The Planet Earth First Set Foot Upon the***

Moon, July 1969 A.D. We Came in Peace For All Mankind.”

Apollo XI astronauts rested in the Lunar Module, *Eagle*, for about seven hours

before the crew was awakened by Houston controllers to prepare for the return flight

to rejoin Command Module Pilot Michael Collins aboard *Columbia* in lunar orbit

⁴⁹⁸ Chris Gebhardt, “45 years after Tranquility: One small step to a bright future,” July 20, 2014, NASA Spaeflight.com

⁴⁹⁹ Chris Gebhardt, “45 years after Tranquility: One small step to a bright future,” July 20, 2014, NASA Spaeflight.com

⁵⁰⁰ Chris Gebhardt, “45 years after Tranquility: One small step to a bright future,” July 20, 2014, NASA Spaeflight.com

⁵⁰¹ Chris Gebhardt, “45 years after Tranquility: One small step to a bright future,” July 20, 2014, NASA Spaeflight.com

Two and a half hours later the astronauts lifted off in *Eagle's* ascent stage for the journey to the Command Module

APOLLO XI RETURNS TO EARTH

After rendezvous with *Columbia*, *Eagle's* ascent stage was jettisoned into lunar orbit -- July 21, 1969
Columbia and its astronauts forcefully struck the water east of Wake Island
at -- 11:45 a.m. Central Time July 24, 1969

Initially the Command Module landed upside down but was righted after several minutes by flotation bags triggered by the astronauts who announced to Mission Control that
“Everything's okay. Our checklist is complete. Awaiting swimmers.”⁵⁰²

WOODSTOCK MUSIC AND ART FAIR IS HELD IN BETHEL, NEW YORK

Outdoor music festivals were relatively common at the time

promoters planned to draw a large crowd with a terrific line-up of Rock musical acts including many of the best of the time

Hundreds of thousands of young people traveled to upstate New York for the four-day three-night festival

all planning to celebrate with one another and listen to some good music -- August 15-18, 1969

Traffic to Woodstock was so heavy that major New York freeways were shut down for a time because of the enormous number young people from around the country headed to the concert in cars and brightly colored vans or hitchhiking

Roughly half a million young people from across the United States converged on Max Yasgur's 600-acre dairy farm in Bethel, New York for the twenty-four-hour-a-day musical celebration

Bands and songs filled four days and nights with music

on the first day performances included Richie Havens, Country Joe McDonald, John B. Sebastian, the Incredible String Band, Sweetwater, Bert Sommer, Tim Hardin, Ravi Shankar, Arlo Guthrie, and Joan Baez

performances on the second day were given by Santana, Canned Heat, Janis Joplin,

Sly & The Family Stone, Creedence Clearwater Revival and The Who

events for the third day included Jefferson Airplane, Joe Crocker, Country Joe & the Fish,

Ten Years After, The Band, Blood Sweat and Tears, Johnny Winter, and Crosby, Stills, Nash & Young

final day of almost constant music concluded with Paul Butterfield Blues Band, Sha-Na-Na,

ending the days-long extravaganza was Seattle's Jimi Hendrix

During the sometimes rainy and always muddy weekend, thirty-two musical acts performed outdoors it became widely regarded as a pivotal moment in popular music history

This music festival fueled by drugs, sex and nudity was remarkably peaceful there were two recorded fatalities:

one from what was believed to be a heroin overdose

another caused in an accident when a tractor ran over an attendee

⁵⁰² Chris Gebhardt, “45 years after Tranquility: One small step to a bright future,” July 20, 2014, NASA Spaeflight.com

sleeping in a nearby hayfield
there also were four miscarriages and two births recorded at the event
one in a car caught in traffic
another in a hospital after an airlift by helicopter
In tune with the idealistic hopes of the “flower children” of the 1960s
Woodstock satisfied most attendees with its sense of social harmony and the quality of music
far more than were ever anticipated were in attendance
many dressed in unconventional attire -- some were not dressed at all
they relished the exhilarating behavior and joyous attitudes that helped to make Woodstock
one of the enduring events of the century

CELLULAR TELEPHONE TECHNOLOGY TAKES ROOT IN WASHINGTON STATE

John Elroy McCaw married Marion Oliver from Centralia and began a family there
Elroy entered the broadcasting business of buying and selling radio and television stations
although the family lived quite comfortably, significant debts also were incurred
as teenagers, all four McCaw boys worked for one of their father’s small cable television services
climbing poles, stringing cable and selling subscriptions door-to-door
Craig O. McCaw, the second son, was Dyslexic and made extra efforts in his studies
Elroy McCaw sold his sons one tiny, 2,000-subscriber system,
Craig took the lead in managing the company
even after enrolling at Stanford University, Craig continued to run the cable company
from his dormitory room
When Craig was a sophomore at Stanford he returned home on a visit from college,
he discovered his father dead from a stroke -- August 1969
left with a large burden of taxes and debts accountant Marion McCaw
was forced to liquidate the family business
Elroy McCaw had been an avid deal maker and borrower who hated documentation
he paid little attention to the actual operations of the businesses he owned
Although only nineteen years old at the time Craig McCaw took the helm of the business
because he had been the son most interested in the family’s financial affairs,
he was quickly accepted as the primary manager of the family’s interests
Craig McCaw sold all of the family holdings except for the tiny cable service in Centralia
which had been sold to the boys

ENVIRONMENT IN WASHINGTON RECEIVES ATTENTION

Republican Governor Dan Evans was a champion of the environmental movement
in discussing how the department came about, Evens said: **“Here in Washington state the environmental movement was strong and deep but splintered into scores of competing organizations. ... I decided to call a special session in 1970, concentrating on environmental protection. In preparation we held a meeting at Crystal Mountain in September of 1969. Representatives of the Washington Environmental Council, legislative leaders and appropriate state department heads gathered to discuss environmental challenges. In two days of discussion, over 60 proposals were identified. ... Six issues emerged with overwhelming support. Leading the list was**

creation of a Department of Environmental Quality. Environmental leaders agreed to focus on these six issues; legislators promised to give priority hearing to these bills, and department heads drafted legislation”⁵⁰³

CHARGES ARE BROUGHT IN THE MY LAI MASSACRE

My Lai Massacre had taken place in Vietnam [March 16, 1968] when American troops under Second Lieutenant William Calley killed between 347 and 504 unarmed civilians most of the victims were women, children, including babies, and elderly people Calley was charged with six specifications of premeditated murder for the deaths of 104 Vietnamese civilians near the village of My Lai -- September 5, 1969 My Lai raised unsettling questions about the conduct of the war when it became public knowledge it prompted widespread outrage around the world

FEDERAL TRIAL OF THE CHICAGO RIOTERS BEGINS

Original eight protester/defendants had been indicted by a federal grand jury [March 20, 1969] trial opened in Chicago with judge Julius Hoffman presiding -- September 24, 1969 demonstrations organized by the local Black Panther Party were held daily during the trial Federal Judge Julius Hoffman read the charges against eight Chicago protestors Abbie Hoffman (no relation), Jerry Rubin, David Dellinger, Tom Hayden, Rennie Davis, John Froines, Lee Weiner and Bobby Seale for violating the anti-Riot Act of 1968 specific charges were crossing state lines with the intent to incite, organize, promote, encourage, participate in, and carry on a riot and to commit acts of violence in furtherance of a riot Early in the trial, Black Panther Party activist Bobby Seale wanted the trial postponed so that his own attorney, who was about to undergo gallbladder surgery, could defend him Judge Hoffman denied the postponement and refused to allow Seale to represent himself

SEATTLE *PILOTS* HAVE A LOSING SEASON

An effort to construct a new stadium at Seattle Center was blocked by local citizens its sixty-four win to ninety-eight losses did not help the team to survive nor did trading away Rookie of the Year Lou Piniella (he eventually returned as manager) After the first year the team was moved to Milwaukee and became the *Brewers*

ANTI-WAR PROTEST MOVEMENT REACHES ITS PEAK

President Richard Nixon's failure to bring the Vietnam War to an end fueled the protest movement 58% of Gallup respondents said U.S. entry into the war was a mistake -- October 1969 "Moratorium to End the War in Vietnam" demonstrations took place -- October 15, 1969 across the country millions of Americans took the day off from work and school to participate in local anti-war demonstrations

⁵⁰³ Peter Blecha, *Washington State Department of Ecology is authorized on February 12, 1970*, HistoryLink.org, Essay 9703, February 1, 2011.

these were the first major demonstrations
against the Nixon Administration's handling of the war effort
(Second round of "Moratorium" demonstrations was held [November 15]
but this was less well-attended)

DISSENTION UNDERMINES THE ANTI-WAR PROTEST MOVEMENT

Many participants questioned the effectiveness of the protest movement
which aggravated dissension over strategies and tactics
spawning dropouts hindered the organization of protests and the maintenance of antiwar groups
infighting continued to sap energy, alienate activists and hamper antiwar planning
some of this strife was fanned by the U.S. government
but it was largely internally generated

KINGDOM OF CAMBODIA IN SOUTHEAST ASIA BECOMES UNSTABLE

(France had allowed its colony, Cambodia, to become a constitutional monarchy
eventually led by Prince Norodom Sihanouk [1960]
Sihanouk had adopted an official policy of neutrality in the Cold War
although he was widely considered to be sympathetic to the Communist cause
Prince Sihanouk allowed North Vietnamese Communists to use Cambodia as a sanctuary
and as a supply route for arms and other aid to their armed troops fighting in South Vietnam)
President Nixon ordered B-52 strikes
against North Vietnamese bases and supply routes in Cambodia -- 1969
these orders were classified and were thus kept from the U.S. media and Congress
in each strike, one B-52 normally dropped twenty-one tons of bombs
each strike consisted of three or six bombers

BOEING WINS A NASA CONTRACT TO BUILD A "LUNAR ROVER" VEHICLE

Boeing won a \$19.6 million National Aeronautics and Space Administration (NASA) contract
to design and build a motorized "moon buggy" -- October 28, 1969
to give future astronauts far greater mobility on the surface of the Moon
Boeing did most of the manufacturing and assembly of the lunar rover
at a newly-built aerospace facility in Kent, Washington
Boeing's Lunar Roving Vehicle could be folded into a space five foot by twenty inches
unloaded, it weighed 460 pounds and could carry two astronauts
each wheel was independently driven by a ¼-horsepower electric motor
Lunar Rover traveled at speeds up to eight mph so astronauts could travel
far afield from their lunar lander for the first time
and still have enough time to do some scientific experiments⁵⁰⁴

DEFENDANT BOBBY SEALE CHALLENGES THE DECORUM OF THE FEDERAL COURT

Chicago Eight defendant Bobby Seale shouted bitter attacks

⁵⁰⁴ John Caldbeck, *The Boeing Company wins NASA contract for lunar rover on October 28, 1969*, HistoryLink.org, Essay 10045, February 28, 2012.

at Judge Julius Hoffman in court -- October 29, 1969

he called the judge a “fascist dog,” a “honky,” a “pig,” and a “racist,” among other things
When Seale refused to be silenced, the judge ordered him bound and gagged in the courtroom

TRIAL OF BOBBY SEALE IS SEVERED FROM THE OTHER CHICAGO DEFENDANTS

Judge Julius Hoffman severed Seale from the case -- November 5, 1969

Seale was sentenced him to four years in prison for contempt of court

this was one of the longest sentences ever handed down for that offense

With the removal of Bobby Seale from the list of eight defendants charged with rioting in Chicago

U.S. Justice Department moved forward in their case against the remaining seven defendants

these defendants became known as the “Chicago Seven”

TRIAL OF THE “CHICAGO SEVEN” CONTINUES

As the federal trial of the Chicago protestors continued, Yippies Abbey Hoffman and Jerry Rubin
mocked courtroom decorum as the widely publicized trial itself became the focal point

for a growing legion of protesters

one day, defendants Hoffman and Rubin appeared in court dressed in judicial robes

when the judge ordered them to remove the robes, they complied,

to reveal that they were wearing Chicago police uniforms underneath

Abbey Hoffman blew kisses at the jury

Judge Julius Hoffman became the favorite courtroom target of the defendants

who frequently insulted the judge to his face

(Trial of the Chicago Seven went on for months

many celebrated figures from the American left and counterculture were called to testify

including folk singers Phil Ochs, Judy Collins and Arlo Guthrie, writer Norman Mailer,

LSD advocate Timothy Leary and Reverend Jesse Jackson all appeared in court)

AMERICAN PUBLIC BECOMES AWARE OF THE MY LAI MASSACRE

Independent investigative journalist Seymour Hersh_broke the My Lai story -- November 12, 1969

after extensive conversations with Lieutenant William Calley

Time, *Life* and *Newsweek* magazines all covered the story

CBS televised an interview with a soldier in Calley's unit during the massacre

The Plain Dealer (Cleveland, Ohio) published explicit photographs of dead My Lai villagers

News of the [March 16, 1968] My Lai massacre ignited widespread outrage

General William R. Peers was appointed to conduct a thorough investigation

into the My Lai incident and its subsequent cover-up

PROTESTORS CONTINUE THEIR EFFORTS TO END THE WAR

More than 500,000 activists demonstrated in Washington, D.C. and another 150,000 in San Francisco

militant protests composed mainly of young people continued to spread -- November 1969

many Americans began to wonder whether the war was worth a split society

Other forms of antiwar activity also persisted

President Richard Nixon's administration attempted a host of measures to blunt the movement

smearing the movement, tracking the leaders, withdrawing U.S. troops from Vietnam,

instituting a draft lottery and eventually ending draft calls
Each step to diminish America's effort in Vietnam mobilized the protestors and its leaders
rather than lessening their resolve

APOLLO XII ACCOMPLISHES A LANDING ON THE MOON

Apollo XII was the sixth manned flight and the second to land on the Moon
it was launched from Kennedy Space Center, Florida during a rainstorm -- November 14, 1969
carrying astronaut Commander Charles "Pete" Conrad, Jr. on his third spaceflight
Command Module Pilot Richard F. Gordon, Jr. on his second spaceflight
(he had been born and raised in Poulsbo and educated in Washington)

Lunar Module Pilot Alan L Bean on his first spaceflight

Thirty-six-and-a-half seconds after lift-off, the vehicle triggered a lightning discharge through itself
and down to the earth through the Saturn rocket's ionized plume
protective circuits on the fuel cells in the Command/Service Module, *Yankee Clipper*,
falsely detected overloads

all three fuel cells were automatically taken offline

along with much of the Command/Service Module (*Yankee Clipper*) instrumentation
loss of all three fuel cells put the Command/Service Module entirely on batteries
power supply problems lit nearly every warning light on the control panel
and caused much of the instrumentation to malfunction

A second lightning strike at fifty-two seconds after launch knocked out the attitude indicator
however, the Saturn V rocket continued to fly correctly

After a quick response from the ground crew, astronauts were able to put the fuel cells back on line,
with telemetry restored, the launch continued successfully

Once in earth "parking orbit," the crew carefully checked out their spacecraft

lightning strikes had caused no serious permanent damage, however, it was feared
that the lightning could have caused the Command/Service Module's parachute mechanism
to prematurely fire disabling the explosives that opened the parachute compartment
if it indeed was disabled, the command module on reentry would crash uncontrollably
into the Pacific Ocean and kill the crew instantly
since there was no way to discover whether or not this was the case,
ground controllers decided not to tell the astronauts about the possibility

SECOND LANDING ON THE MOON

Mission Commander Pete Conrad and Lunar Module Pilot Alan Bean
performed just over one day and seven hours of lunar surface activity -- November 19, 1969
landing site for the mission was located in the southeastern portion of the Ocean of Storms

Command Module Pilot Richard F. Gordon remained in lunar orbit

key objectives of a more precise landing and to visit the lunar lander Surveyor 3

(which had landed on the Moon [April 20, 1967]) to remove parts for analysis were achieved

Having successfully completed the main mission, the Command/Service Module *Yankee Clipper*
ended with a successful splashdown east of American Samoa -- November 24, 1969

with the recovery conducted by the USS *Hornet*

DRAFT LOTTERY IS IMPLEMENTED

Charges of unfairness in the draft system led to the institution of a draft lottery in which a young man's birthday determined his relative risk of being drafted
First draft lottery in the United States since World War II was held -- December 1, 1969
it was met with large protests and a great deal of controversy
regarding whether or not the lottery was actually random
([September 14] was the birthday at the top of the draft list for 1970
the following year July 9 held the distinction)
Various antiwar groups opened free draft counseling centers where they gave young American men advice for legally and illegally evading the draft

PROBLEMS AND CONCERNS DEVELOP WITH BOEING'S SUPERSONIC (SST) AIRCRAFT

Problems with the project began⁵⁰⁵
when the proposed "swing-wing" proved too heavy and complex
it had to be abandoned for a more traditional delta wing
environmental studies also suggested that large fleets of SSTs could deplete the ozone layer
and cause other damage to the upper atmosphere
cost overruns mounted to the point where some U.S. Senators felt taxpayer money was wasted
At stake was \$290 million of an anticipated \$7 billion project
U.S. Senator Magnuson pushed SST funding through his Commerce Committee

⁵⁰⁵ Walt Crowley, *Boeing wins contract to develop prototype supersonic transport (SST) on December 31, 1966*, HistoryLink.org, Essay 2687, January 1, 2000.

1970-1979

MAKAH INDIAN VILLAGE OF OZETTE IS UNEARTHED

Winter storms hit the beach where Ozette village had lay buried for more than 250 years
driving winds and rain caused a clay bank there to slump -- winter 1969-1970
High tides washed artifacts from their resting places
hundreds of perfectly preserved wooden artifacts were exposed
a hiker passing by the area alerted Makahs tribal officials to what had happened

NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) IS SIGNED INTO LAW

National Environmental Policy Act was sponsored by U.S. Senator Henry “Scoop” Jackson⁵⁰⁶
President Richard Nixon signed the bill into law -- January 1, 1970
this most influential of the many environmental laws enacted in the [1960s] and 1970s
and was referred to as the environmental Magna Carta
federal agencies were required to prepare environmental impact statements
before taking major steps toward construction projects
it became a powerful tool for environmentalists
Neither Jackson nor Nixon anticipated the effect NEPA would have
as the environmental movement reached a peak of influence in the 1970s
activists discovered that NEPA provided a powerful tool
to halt, delay, or modify building projects
they considered to be harmful to the environment
Although the Act did not mention court review of environmental impact statements,
courts soon ruled that citizen groups could sue to ensure compliance with the Act
courts frequently overturned project approvals if a statement was not prepared
or did not properly disclose the destructive impacts that could be anticipated

CENSUS DATA SHOWS WOMEN OUTNUMBER MEN IN WASHINGTON FOR THE FIRST TIME

Total population of Washington state in 1970 was 3,409,169
an increase of 555,955 (19.5 percent) from the [1960] count
For the first time since census counts in Washington were begun [1853]
there were slightly more women living in the state
1,715,422 (50.3 percent, up .6 percent from [1960])
there were roughly equal numbers of men and women up through age sixty-five
male population was 1,693,747 (49.7 percent, down .6 percent from [1960])
at which point female longevity became statistically significant
Largest age group by far was between ten and nineteen years old
nearly twenty percent of the state’s total population
There was a continuation of the trend toward urban living,
but the state’s two largest cities actually lost population
Everett joined Seattle, Spokane and Tacoma in the list of Washington cities

⁵⁰⁶ Kit Oldham, *President Richard Nixon signs Senator Henry Jackson's National Environmental Policy Act into law on January 1, 1970*, HistoryLink.org, *Essay 5615*, November 13, 2003.

with core populations greater than 50,000
four counties had a population in excess of 100,000 people: King (935,014), Pierce (411,027),
Spokane (287,487) and Snohomish (172,199)

total rural population in 1970 was 932,700 (27.4 percent of total population
down from 31.9 percent in [1960])

Single men significantly outnumbered single women in the 1970 census,
but there were more than four times as many widows as widowers:

total males over age fourteen: 1,239,721

- Married: 809,832 (65.3 percent)
- Single: 350,199 (28.3 percent)
- Divorced: 49,506 (4.0 percent)
- Widowed: 30,144 (2.4 percent)

total females over age fourteen: 1,280,861

- Married: 814,387 (63.6 percent)
- Single: 263,657 (20.6 percent)
- Divorced: 64,107 (5.0 percent)
- Widowed: 138,210 (10.8 percent)

For purposes of the 1970 census, “family” was defined as comprising two or more individuals
who were living together and were related by birth, marriage, or adoption

total number of families in 1970 census: 861,689

total families with children under age 18 living at home: 479,077 (55.6 percent)

total number of two-parent families: 768,097 (89 percent)

total children of two-parent families: 422,393 (55 percent)

Washington residents age twenty-five and older were grouped by years of schooling completed:

- no education through eighth grade: (18.21 percent of the population)
- one to three years of high school (17.59 percent)
- four years of high school (36.25 percent)
- one to three years of college (14.52 percent)
- four years of college (6.65 percent)
- more than four years of college (6.07 percent)

Income figures showed men earning more than twice the amount earned by women:

median income for all employed males over age fourteen: \$8,823:

median income employed white males: \$8,885

median income employed Negro males: \$7,170

median income employed male Hispanics: \$6,852

median income for all employed females over age fourteen: \$4,023

median income employed white females: \$4,028

median income employed Negro females: \$4,081

median income female Hispanics: \$2,988

Poverty levels reflected income:

Caucasians below poverty level: (9.7 percent of total state white population)

White families below poverty level (7.2 percent of all white families)

Negroes below poverty level: (21.2 of total state Negro population)

Negro families below poverty level: (16.8 percent of all Negro families)

families of Spanish language below poverty level:

(17.1 percent of all families of Spanish language)

Five Washington counties with the highest percentage of population living in poverty were:

Pend Oreille (24.3 percent), Columbia (23.3 percent), Yakima (19.6 percent),
Stevens (19.5 percent), Grant: (18.2 percent)

Six Washington counties with the lowest percentage of population living in poverty were:

King (7.5 percent), Snohomish (7.6 percent), Benton (8.4 percent), Cowlitz (8.9 percent)
Kitsap and Clark (tied at 9.1 percent)

BOEING DELIVERS ITS FIRST 747 JUMBO JET

Boeing's most famous aircraft, the humpbacked, wide-body, long-range 747 jumbo jet was introduced

First Lady of the United States Pat Nixon christened Pan American's first 747, *Clipper Victor*
at Dulles International Airport (later renamed Washington Dulles International Airport)
instead of champagne, red, white and blue water

was sprayed on the aircraft -- January 15, 1970

Boeing's 747 entered service on Pan Am's New York-London route -- January 22, 1970
two and a half times the size of the Boeing 707, it held the passenger capacity record
for thirty-seven years

AN ATTEMPT IS MADE TO CLOSE SEATTLE'S PIKE PLACE MARKET

Land developers attempted to close the Market and construct major projects

Senator Magnuson turned his attention to saving the Market

at least \$20 million was routed from Housing and Urban Development funds
one block, \$10 million, came from the "urgent needs program"

The Pike Place Market is still an important part of downtown Seattle

BROWN BERETS FORM IN THE CHICANO COMMUNITY

United Mexican American Students (UMAS) was followed by students forming local chapters
of the "Brown Berets," and Movimiento Estudiantil Chicano de Aztlan,
among other organizations

at campuses throughout the state -- these generated a great deal of activism

Brown Beret chapters formed in both Yakima and at the University of Washington -- 1970

Brown Beret organization consisted mostly of motivated, militant university students and youth
from Seattle's Chicano neighborhood who wanted to work at the community level

more than two hundred members were organized and emerged as a key organization

linking students to communities and to young people not enrolled in college

Brown Berets donned their distinctive headgear and military fatigues as a symbolic statement
that they were willing to fight for their communities

working against racial discrimination, poverty and police brutality

they gave the movement a new and tougher look

Brown Berets' uncompromising stance on these issues

attracted Chicano youth to the organization

CHICANO WOMEN ARE ALSO ACTIVE IN THE CIVIL RIGHTS MOVEMENT

“Las Chicanas” was composed primarily of students and staff at the University of Washington who focused on women’s issues within the Chicano/Latino Community
this organization addressed issues pertinent to women
who struggled against both racism and sexism

WASHINGTON’S LEGISLATURE SENDS AN ABORTION RIGHTS REFERRENDUM TO VOTERS

Washington State Legislature approved Referendum 20 to place abortion rights before the voters
State Senate had passed by a vote of 25 For and 23 Against [January 30, 1970]
State House of Representatives voted 64 for (29 Republicans and 25 Democrats)
and 31 against (15 Republicans and 16 Democrats) -- February 4, 1970
(Public vote on the referendum took place [November 3, 1970])

DEPARTMENT OF ECOLOGY IS ESTABLISHED IN WASHINGTON STATE

Republican Governor Dan Evans was a champion of the environmental movement
in discussing how the department came about, Evens said: **“Here in Washington state the environmental movement was strong and deep but splintered into scores of competing organizations. ... I decided to call a special session [of the legislature] in 1970, concentrating on environmental protection. In preparation we held a meeting at Crystal Mountain in September of 1969. Representatives of the Washington Environmental Council, legislative leaders and appropriate state department heads gathered to discuss environmental challenges. In two days of discussion, over 60 proposals were identified. ... Six issues emerged with overwhelming support. Leading the list was creation of a Department of Environmental Quality. Environmental leaders agreed to focus on these six issues; legislators promised to give priority hearing to these bills, and department heads drafted legislation”**⁵⁰⁷

Washington State Legislature established the Department of Ecology -- February 12, 1970
by authorizing the consolidation of four state agencies
Washington’s Department of Ecology was the first such state-level organization in the nation
and preceded the federal government’s Environmental Protection Agency (EPA)
Washington State’s Department of Ecology went on to serve as a model for many other states

SEATTLE LIBERATION FRONT CLASHES WITH POLICE

Trial of the infamous Chicago Seven defendants charged with “interstate conspiracy to incite a riot”
during the 1968 Democratic National Convention in Chicago was winding down
Federal Judge Julius Hoffman was reviled by much of America’s radical youth
Chicago Seven had called for their many supporters to organize local demonstrations nationwide
Seattle Liberation Front, a radical anti-Vietnam War organization,
had formed at the University of Washington [January 1970]
activists responded to the call for action -- February 17, 1970
roughly 2,000 agitated youth ranging in age from “juvenile” to twenty-something
assembled downtown in front of Seattle’s downtown federal courthouse
some may have held a deeply-rooted understanding of the injustice of the Chicago verdict
but by many accounts many were too young to have first-hand knowledge

⁵⁰⁷ Peter Blecha, *Washington State Department of Ecology is authorized on February 12, 1970*, HistoryLink.org, Essay 9703, February 1, 2011.

they simply were looking for reckless trouble
What could have been a relatively peaceful demonstration against injustice in America's court system
became instead an anti-everything free-for-all
protesters threw rocks, bottles, paint bombs, broke windows, and violently scuffled with police
twenty were injured
tear gas was plentiful enough for clouds to be seen rising over downtown from Interstate 5
was thrown -- police blamed the protestors while protestors blamed the police
Seattle's then-acting police chief Frank Moore stated to the news media: **"The demonstrators
came prepared for war.... They were armed with pipes, clubs, chains, paint and tear gas ... and
they used them all."**⁵⁰⁸

When the smoke finally cleared, up to eighty-nine people had been arrested, scores were injured
downtown property damage estimates were placed at \$75,000

TRIAL OF THE CHICAGO SEVEN COMES TO AN END

All seven defendants were found not guilty of conspiracy
five defendants, Abbie Hoffman, Jerry Rubin, David Dellinger, Tom Hayden and Rennie Davis,
were convicted of intent to incite a riot while crossing state lines -- February 18, 1970
two, John Froines and Lee Weiner, were acquitted
Judge Julius Hoffman sentenced all of the guilty defendants and their attorneys
to unprecedented prison terms ranging from ten months to four years for contempt of court
in addition, all five defendants were each fined \$5,000 and sentenced to five years in prison
Both the guilty verdict and contempt of court fines were appealed to a higher federal court

LITTLE GOOSE DAM PROJECT IS COMPLETED

Little Goose Dam project consisted of a powerhouse, navigation lock, and two fish ladders
project provides navigation, hydroelectric generation, recreation and incidental irrigation
Little Goose Dam was 2,655 feet long with an effective height of ninety-eight feet
the dam was located at the head of Lake West, the reservoir formed by Lower Monumental Dam
Little Goose Dam was a concrete gravity type, with an earth fill right embankment abutment
eight-bay spillway was 512 feet long and has eight fifty-foot by sixty-foot gates
construction had started [June 1963]
Filling of Lake Bryan located directly behind Little Goose Dam began on [February 16, 1970]
and continued until elevation 638 was reached on February 25, 1970
Lake Bryan extended about 37.2 miles up the Snake River until it reaches Lower Granite Dam
Installation of power generating units one through three was completed in [March 1970]
this project also included a single-lift navigation lock eighty-six feet by 668 feet
and a fifteen-foot minimum depth that opened to navigation [May 1970]
Two fish ladders for passing migratory fish

NATIONAL INSTITUTES OF HEALTH (NIH) IS U.S. SENATOR MAGNUSON'S PROJECT National Institutes of Health (NIH) is the largest medical research enterprise in the world

⁵⁰⁸ Jeff Stevens, *Hit the Highway, Freeway*, Radical Seattle Remembers.com, 2010.

It was noted by a national lobbyist, “[Washington State U.S. Senator Warren G.] **Magnuson in essence sponsored all the funding for medical research in the nation through the National Institutes of Health. The NIH is the work of a lot of people, to be sure, but it needed a leader to make it work. Maggie was the leader. Of course, he always took care of the University of Washington.**”⁵⁰⁹

University of Washington’s Medical School covered ten acres (and today bears his name):

The Warren G. Magnuson Health Sciences Center

Magnuson also fed millions of federal dollars into the Veterans Administration health services for hospital construction and medical education

BURLINGTON NOTHERN RAILROAD COMES INTO EXISTENCE⁵¹⁰

Great Northern, Northern Pacific, and Chicago, Burlington & Quincy merged -- March 3, 1970

Spokane, Portland & Seattle Railway with its 24,398 miles of track was also absorbed

Burlington Northern picked up the St. Louis-San Francisco Railway

(Burlington Northern merged with the Atchison, Topeka & Santa Fe

to become Burlington Northern Santa Fe [1995])

SEATTLE’S “MEDIC ONE” PROGRAM BECOMES OPERATIONAL

Seattle Fire Department’s “Medic One” began providing out-of-hospital emergency cardiac care to heart attack patients with a custom-built van staffed by two specially trained firefighters and a physician -- March 7, 1970

it was one of the first paramedic programs in the nation where physician assistance could be delivered to cardiac patients at the scene

Harborview Medical Center was especially equipped to receive heart attack patients

NATIVE AMERICANS ATTEMPT TO CLAIM SEATTLE’S FORT LAWTON

Fort Lawton, a 1,100-acre U.S. military base located in Seattle’s Magnolia neighborhood, had recently been decommissioned and declared surplus by the U.S. Army

Seattle’s city government expressed strong interest in turning the land into a public city park

United Indian People’s Council (UIPC) approached U.S. Senator Henry M. Jackson

about the possibility of using the land for a cultural center and social services provider for Pacific Northwest indigenous peoples

while Jackson politely referred UIPC to the U.S. Department of the Interior,

he made it clear to the press that he intended to deny the request -- March 8, 1970

Emboldened by the Black and Chicano liberation movements taking place across the nation

more than 100 members and supporters of the United Indian People’s Council (UIPC)

took action to reclaim a portion of Fort Lawton

in one of the first noteworthy events of the Native American movement nationally

About 100 UIPC members and supporters appeared at the Fort Lawton main gate -- March 8, 1970

participants included Bob Satiacum, Puyallup tribal leader and treaty fishing rights advocate,

Bernie Whitebear of the Colville Confederated Tribe,

⁵⁰⁹ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*, P. 260.

⁵¹⁰ David Wilma, *Great Northern, Northern Pacific, and Chicago, Burlington & Quincy merge to become the Burlington Northern Railroad on March 3, 1970*, HistoryLink.org, Essay 7532, November 3, 2005.

Seattle's Leonard Peltier (future American Indian Movement leader and political prisoner) actress Jane Fonda was also in attendance drawing media attention their claim to legal ownership of the land at Fort Lawton was based on the [1855] Point Elliott Treaty that promised surplus military lands would revert to their original owners activists invaded the fort from all sides, some entered from Puget Sound beaches, some scaled the western bluff overlooking Puget Sound, some climbed over fences, using diversionary tactics, some attempted to enter through two heavily guarded gates all joined together on the military post and erected a tepee they brought cooking utensils with them -- they were ready to occupy the fort U.S. Army sent a forty-man Military Police (MP) platoon from Fort Lewis to remove the activists MPs began taking any activists they could catch to the Fort Lawton stockade eighty-five were detained, questioned and released that evening with letters of expulsion allegations of brutality by the MPs inside the stockade on the first day of the invasion were reported and remained a point of contention among protesters Many of the activists involved in the invasion remained camped outside the Fort Lawton front gates Jane Fonda and twelve protestors entered Fort Lewis they were arrested and given letters of expulsion

FORT LAWTON PROTEST CONTINUES

United Indian People's Council (UIPC) continued to confront the federal and Seattle governments concerning their claim to the land at Fort Lawton -- morning, March 9, 1970 this effort was expanded to the U.S. Federal Courthouse in downtown Seattle Fort Lawton military police, unable to effectively prevent intrusions, requested assistance two truckloads of the 3rd Armored Cavalry from Fort Lewis reinforced the 392nd Military Police Armored Cavalry brought along rolls of concertina barbed wire which was placed around the post perimeter UIPC council protesters remained outside Fort Lawton for three weeks their encampment became known as "Resurrection City" skirmishes with the military police and protests at the main gate continued local community members kept the activists supplied with food, clothing and moral support Another attempt to invade Fort Lawton occurred -- March 15, 1970 seventy-seven were arrested that day but they agreed not to resist arrest so this incident was peaceful

TWENTY ARE KILLED IN SEATTLE'S OZARK HOTEL FIRE⁵¹¹

An arsonist set fire to the landmark Seattle hotel at Westlake Avenue and Lenora Street twenty were killed and ten injured as flames swept up two stairways of the wooden five-story sixty room structure -- March 20, 1970

⁵¹¹ Greg Lange, *Arsonist kills 20 and injures 10 at the Ozark Hotel fire in Seattle on March 20, 1970*, HistoryLink.org., Essay 698, January 15, 1999.

no arrest was made in the case
Seattle City Council enacted stringent new fire codes which led to the loss of low-income housing
leading to a permanent homeless population in Seattle

CAMBODIA'S PRINCE NORODOM SIHANOUK IS OVERTHROWN

While visiting Beijing, King Sihanouk was ousted by a military coup -- March 1970
new regime immediately demanded that North Vietnamese Communists leave Cambodia
North Vietnamese and Viet Cong forces, desperate to retain their sanctuaries and supply lines,
immediately launched armed attacks on the new government hastening the onset of civil war
Khmer Rouge Vietnamese Communist rebels gained support and dominated Cambodia

U.S. ARMY PUBLISHES ITS REPORT ON THE MY LAI MASSACRE

General William R. Peers' final report was published -- March 1970
it was highly critical of top officers for participating in the cover-up
and the Charlie Company officers for their actions at My Lai
However, critics of the Peers Commission pointed out that it sought to place the real blame
on four officers who were already dead

PRESIDENT RICHARD NIXON SECRETLY EXPANDS THE WAR EFFORT

Responding to the Communist attempt to take Cambodia,
President Nixon authorized a large scale U.S.-Republic of Vietnam (South Vietnam) raid
into Cambodia to directly hit Communist headquarters and supply dumps -- April 1970
without informing Congress

ENVIRONMENTALS BECOME VERY CONCERNED ABOUT THE TRANS-ALASKA PIPELINE

Environmental groups attempted to block the Alyeska Service Pipeline Company project
by filing lawsuits -- beginning April 1970
Trans-Alaska pipeline consisted of a 48-inch diameter steel pipe that crossed three mountain ranges
and more than 800 rivers and streams⁵¹²
(Ultimately, Alyeska obtained 515 federal permits and 832 state permits for the project
thirty-one persons lost their lives in construction accidents)

MAKAH INDIANS BECOME AWARE OF THEIR HISTORY

Dr. Richard Dougherty of Washington State University had become aware
of the ancient village of Ozette that had been covered in a landslide about 550 years before
In an effort to prevent looting of the Ozette site,
Makah people contacted Washington State University's Dr. Richard Dougherty [1969]
who had begun a preliminary archeological investigation of the coastal native village site
Dr. Dougherty with the help of local people began a program of excavations -- April 1970
Makah oral history told of a "great slide" which buried a portion of Ozette village long ago
archaeologists soon realized they were dealing with the dream of virtually every archaeologist

⁵¹² Dave Wilma, *Construction of the Trans-Alaska Pipeline begins on April 29, 1974*, HistoryLink.org, Essay 3600, October 7, 2001.

they had discovered an almost intact village
six longhouses and their respective contents were buried
locking wooden and wood-based artifacts in a shroud of mud
that pre-dated European contact
mud slides had sealed everything and created a low-oxygen, waterlogged environment
which prevented bacteria from attacking the organic remains

Collecting materials from Ozette required specific excavation techniques
garden hoses shooting sea water were substituted for trowels and shovels
as the mud was carefully washed away organic objects such as wooden boxes, wooden tools,
nets, clothing, cradle boards, mats, hats, numerous styles and sizes of baskets, looms,
toys, ropes, beautifully carved wooden boards from plank houses,
bone and antler harpoons, fishing, sealing and whaling equipment and ceremonial gear
a spectacularly elaborate whale saddle or dorsal fin inlaid with seven hundred sea otter teeth,
was recovered
metal tools also were discovered
it was speculated that the metal came from shipwrecks or trade networks
all of these finds were treated with preserving solutions before being collected
radiocarbon dates demonstrated the slide had hit (around 1750 AD)
out of respect for these people ancestral remains were reinterred
in keeping with native cultural beliefs about death

Excavation of Ozette village lasted eleven years and produced over 55,000 artifacts
that have been excavated, cleaned, identified with Makah names, cataloged and preserved
these were stored or displayed on the Makah reservation
most of the artifacts came from three excavated plank houses
House One was the largest of the group -- it was located in the front row facing the ocean
Houses Two and Five were smaller and were located in the back row
excavations at Ozette revealed a great deal about everyday life of the Northwest Coast people
art style, social ranking, warfare and much more have been determined
social ranking was well documented at Ozette
people living in House One, for example, possessed a larger house in the front of the village
they had more decorated objects
based on the distribution of sea mammal hunting equipment, members of this family
specialized in whale hunting -- an activity usually restricted to high-status individuals
they relied less on commonly available foods such as salmon and halibut

Houses Two and Five were smaller and less clean
with less differentiation among living spaces
processing and consuming food, sleeping and other activities shared space in the house
they possessed fewer decorated objects
these houses contained more common fish and shell fish species remains
members of these houses exploited different shell beds
suggesting that these could have been owned (as it happened in later time)

Makahs were renowned for their seafaring tradition
paddling large cedar canoes carved from a single tree trunk, Makahs regularly hunted and fished
thirty or forty miles, and sometimes more than 100 miles, out to sea

early white observers commented on the Makahs' great skill as canoeists and as whale hunters
they hunted several varieties of whale
but concentrated on twenty to thirty-five ton gray whales that migrate in the Pacific
even a single whale filled many needs
because a whale hunt required substantial resources
whalers occupied positions of high prestige in Makah society
only selected families were eligible to lead hunts
whaling crews were led by the heads of those families
all whalers practiced the techniques of the hunt and underwent rigorous spiritual training
including prayer, ritual cleansing and purification
Makah whaling canoes carried eight men
six paddlers, a steersman in the rear and a harpooner in the front
harpoons consisted of a copper or iron head with animal horn barbs
which was attached to the wooden spear shaft with a rope of whale sinew
this spear was tied to the canoe by a long rope woven from stringy inner cedar bark
when the whale was harpooned, numerous buoys made of inflated sealskins and tied to a rope
were thrown in the water to slow the wounded animal and prevent it from diving
more harpoons and buoys were attached until the whale tired and could be killed with lances
dead whale was then towed to shore where it was carved and distributed among the crew
and other village members according to rank and custom
virtually every part of the whale was used
oil, blubber and flesh were eaten, sinews were used for ropes, cords and bowstrings,
stomach and intestines were dried and inflated to hold whale and seal oil
bones were used for elaborate carvings and, occasionally, in house construction
Makahs frequently produced a surplus of whale oil and blubber which they traded to other natives
and to white settlers when they arrived in the region
Makahs had a well-developed technology and economy based largely on resources from the ocean
in addition to whales, halibut and fur seals were central to their ancient culture
Ozette represents one of the most important archeological sites in North American
it has given us a clear picture of earlier Makah life
it illustrated the Makah's in-depth knowledge of their environment
knowledge gained through thousands of years of living in that area
not only is it amazing for its preservation, but Ozette also is an example
of the results of combining Native American traditional knowledge
and archaeological research
Local Makah people run *The Makah Culture and Research Center*, a museum at Neah Bay
which tells, from the Makah point of view, the history of their ancestors
following the cycle of the seasons, it described the artifacts using Makah terms
Ozette site is recognized as one of the richest archaeological resources in the world
it has inspired a cultural renaissance for the Makah people

APOLLO XIII IS LAUNCHED INTO SPACE

Three American Astronauts, Jim Lovell, Jack Swigert and Fred Haise blasted into space
aboard a Saturn V rocket -- at 13:13 Central Standard Time April 11, 1970

This mission began with a little-known small incident during the second-stage boost as the center (inboard) engine shut down two minutes early four outboard engines burned longer to compensate as the vehicle continued to a successful orbit

APOLLO XIII IS HIT WITH A CRISIS

Just under fifty-six hours into the launch, the astronauts heard a “loud bang” accompanied by fluctuations in electrical power and firing of the attitude control thrusters inadvertently fired -- April 13, 1970 crew members initially thought that a meteoroid might have struck the Lunar Module (lunar lander) *Aquarius*, in fact, an oxygen tank had exploded crippling the Command/Service Module *Odyssey* upon which the astronauts in the *Odyssey* depended damage to the Command/Service Module made safe return from a lunar landing impossible so that portion of the mission was aborted

Apollo XIII was close to entering the lunar sphere of influence it was decided to circle the moon and use its gravity to catapult the capsule back to Earth First order of business was to re-establish the return trajectory using a small burn of the Lunar Module descent propulsion system considerable ingenuity under extreme pressure was required from the crew, flight controllers and support personnel for the safe return developing drama was shown on television

Because electrical power was severely limited, live TV broadcasts stopped low power levels made even voice communications difficult TV commentators used models and animated footage as illustrations for their broadcasts to the public

Shortage of the compound used to remove carbon dioxide from the Command/Service Module presented a serious problem astronauts jury-rigged a tube to connect canisters of the compound in the Landing Module to canisters in the Command/Service Module

Next problem to be solved for a safe return was how to power-up the completely shut-down Command/Service Module this was never intended to be attempted in-flight engineers on the ground had to invent a new protocol to do complicated by the ship’s limited power supply and pressing time factor another complication was the fact that the un-powered Command Module got so cold that water began to condense on solid surfaces leading to concern this might short out electrical systems when it was reactivated (in fact, this turned out not to be a problem)

As Apollo XIII neared Earth, the crew jettisoned the Service Module crew next jettisoned the Lunar Module *Aquarius*, leaving the Command Module *Odyssey* to begin its lone re-entry through the atmosphere

Re-entry on a lunar mission normally was accompanied by four minutes of communications blackout caused by ionization of the air around the Command Module there was a possibility the heat shield had been damaged from the oxygen tank rupture

this heightened tensions during the blackout period
which, in fact, took thirty-three seconds longer than normal
Apollo XIII Command Module *Odyssey* splashed down safely in the South Pacific Ocean
southeast of American Samoa four miles from the recovery ship, USS *Iwo Jima*
for the most part, the crew was in good condition considering their escape from disaster

AUTHOR FRANK HERBERT BEGINS HIS AWARD WINNING SCIENCE FICTION CAREER

Tacoma novel writer Frank Herbert survived rejection slips from twenty publishers
before he finally found a publisher for *Dune* -- 1970

which is frequently cited as the world's best-selling science fiction novel
and was the start of the *Dune* saga

Herbert wrote five sequels to the novel *Dune*:

Dune Messiah, *Children of Dune*, *God Emperor of Dune*, *Heretics of Dune*
and *Chapterhouse: Dune*

these have been replicated and expanded in film adaptations, computer games, board games
songs, a Sci-Fi Channel miniseries: *Frank Herbert's Dune*,
and a series of prequels, interquels and sequels

SEATTLE SEVEN ARE INDICTED BY A FEDERAL GRAND JURY

Seven members of the Seattle Liberation Front who had participated in an anti-war demonstration
at Seattle's federal courthouse [February 17, 1970] were indicted on charges of inciting a riot
Michael Lerner, Jeff Dowd, Michael Abeles, Joseph Kelly, Roger Lippman,

Charles "Chip" Marshall III and Susan Stern became known as the "Seattle Seven"
an eighth accused rioter went into hiding to avoid prosecution

Case of the Seattle Seven was assigned to Federal District Judge George H. Boldt,
whose Tacoma courtroom hosted a pre-trial hearing -- April 16, 1970

WASHINGTON STATE HOLDS ITS FIRST "EARTH DAY"

Awareness regarding environmental issues was gaining considerable traction

groups that had been fighting against oil spills, polluting factories and power plants, raw sewage,
toxic dumps, pesticides, freeways, the loss of wilderness and the extinction of wildlife
suddenly realized they shared common values for a healthy, sustainable environment

Massive coast-to-coast rallies were held -- April 22, 1970

millions of Americans took to the streets, parks, and auditoriums to demonstrate
thousands of colleges and universities organized protests against deterioration of the environment
teach-ins were held at the University of Washington and at Seattle Center

Earth Day 1970 achieved a rare political alignment

support came from Republicans and Democrats, rich and poor, urbanites and farmers
this first Earth Day led to the creation of the United States Environmental Protection Agency
and the passage of the Clean Air, Clean Water, and Endangered Species Acts

PRESIDENT NIXON ANNOUNCES HIS EXPANSION OF THE WAR IN SOUTHEAST ASIA

President Nixon, who had previously committed to a planned withdrawal,
announced South Vietnamese troops hand attacked into Cambodia

and were pushing toward Vietcong bases -- April 29, 1970
Within minutes of the televised statement, anti-war protesters took to the streets with renewed focus
many young people, including college students and teachers, were concerned
about being drafted to fight in a war that they strongly opposed
expansion of that war into another country appeared to them to have increased that risk

TASK FORCE *SHOEMAKER* EXTENDS THE WAR INTO CAMBODIA

U.S. Task Force Shoemaker numbering 30,000 including three U.S. divisions
had been preceded by B-52 bombing strikes in Cambodia -- May 1, 1970
Operations in Cambodia lasted for sixty days, and uncovered vast North Vietnamese supply depots
28,500 weapons as well as over sixteen million rounds of small arms ammunition
and fourteen million pounds of rice were captured
although most Vietcong managed to escape across the Mekong River,
there were over 10,000 Vietcong casualties
this incursion prevented the immediate takeover of Cambodia by the Communist Khmer Rouge
it cost North Vietnamese Communists a major supply line to their troops in South Vietnam
America's involvement in Cambodia was now visible to the U.S. population
it appeared Richard Nixon's campaign promise to get out of Vietnam
was really a plan to move into Cambodia -- intense protests took place on college campuses

DEMONSTRATIONS ARE HELD AT KENT STATE UNIVERSITY IN KENT, OHIO

About 500 students demonstrated on the Commons -- May 1, 1970
a grassy knoll in the center of campus traditionally used as a gathering place for rallies or protests
as the crowd dispersed to attend 1 p.m. classes another rally was planned [for May 4]
to continue the protest of President Nixon's expansion of the Vietnam War into Cambodia
There was widespread anger and many protesters issued a call to "bring the war home"
as a symbolic protest to Nixon's decision a group of students watched a graduate student
burning a copy of the U.S. Constitution while another student burned his draft card

UNEMPLOYMENT BENEFITS TO LAID-OFF WORKERS ARE EXTENDED

Workers in Washington State, especially those at Boeing and its contractors tied to the SST program,
were thrown into desperate straits as an economic recession took its grip locally
Malcolm Stamper, director of the 747 program, presided over the laying off
of nearly two-thirds of Boeing's 101,000 employees
Washington's U.S. senators Magnuson and Jackson responded
by seeking an extension of unemployment benefits for states (such as Washington)
facing serious economic problems
however, the proposed bill to ease the suffering of unemployed workers
remained locked in Congressman Wilbur Mills' Ways and Means Committee
It was not until Maggy took the unprecedented step of going personally
to the House chambers with Congressman (and former Magnuson aide) Norm Dicks
and negotiating directly with Congressman Mills that the Bill passed
and was signed by President Nixon -- May 1970

KILLINGS TAKE PLACE ON THE KENT STATE UNIVERSITY CAMPUS

As previously planned, Kent State students and staff gathered -- late morning May 4, 1970
to again protest the actions of the U.S. government

University officials attempted to ban the gathering, handing out 12,000 leaflets
stating that the event was canceled

despite these efforts an estimated 2,000 people gathered on the university's Commons

A few members of the Ohio Army National Guard attempted to disperse the students
dispersal began late in the morning with a campus patrolman arriving in a National Guard jeep
protesters responded by throwing rocks hitting a campus Patrolman and forcing the Jeep to retreat
Just before noon, the Guard returned and again ordered the crowd to disperse
when most of the crowd refused, the Guard used tear gas that had little effect because of the wind
demonstrators began to chant "Pigs off campus!"

Seventy-seven additional Ohio Army National Guardsmen arrived with bayonets on their M-1 rifles
they advanced toward hundreds of protesters who retreated
many students left, but some stayed and angrily confronted the soldiers
some throwing rocks and tear gas canisters

After about ten minutes, the guardsmen began to retrace their steps toward the Commons area
according to eyewitnesses a guardsman turned and began firing at the students
with his .45 pistol -- 12:24 pm, May 4, 1970

other guardsmen nearest the students also turned and fired their rifles into the crowd
in all, twenty-nine of the seventy-seven guardsmen reported firing at the demonstrators
sixty-seven rounds of ammunition were aimed into the crowd
(shooting was later determined to have lasted only thirteen seconds)

Question of why the shots were fired remained widely debated

Adjutant General of the Ohio National Guard told reporters that a sniper had fired on the troops
many guardsmen later testified that they were in fear for their lives

Shootings killed four students and wounded nine

two of the four students killed had participated in the protest
other two had been walking from one class to the next at the time of their deaths

Photographs of the Kent State dead and wounded were distributed worldwide in the press
one photo captured a fourteen-year old runaway screaming over the body of the dead student
who had been shot in the mouth

this photograph won a Pulitzer Prize and became the most enduring image of the event
and one of the most enduring images of the anti-Vietnam War movement

UNIVERSITY OF WASHINGTON DEMONSTRATORS CLOSE I-5

After Kent State, nearly 7,000 UW students participated in a protest march
that began in front of the UW's Husky Union Building -- 10:30 a.m. May 5, 1970

After a long serpentine march though campus, strikers arrived at the Administration Building -- noon
demonstrating students and faculty overwhelmingly approved a list of demands
including the impeachment of President Richard Nixon
demands specific to the University of Washington were presented
to UW President Charles Odegaard:

- official university condemnation of the Kent State killings

- of four young people shot by the Ohio National Guard;
- a pledge from the University to never use National Guard troops on the UW campus;
- an end to the Reserve Officer Training Corps (ROTC) program on campus;
- an end to military recruiting and war-related research on the university campus

University President Charles Odegaard addressed the crowd with a bull-horn
 he expressed outrage over the Kent State killings but refused the strikers' other demands
 Demonstrators were not satisfied

by a voice vote, protesters decided to march through the University District
 they began marching off the campus -- just before 2:00 p.m. May 5, 1970
 some 7,000 reached NE 45th Street and surged toward Interstate 5
 planning to march to the Federal Courthouse in downtown Seattle

About 3,000 demonstrators spilled out onto I-5
 half of the marchers moved toward the Federal Courthouse
 while the remainder sat down on the freeway
 demonstrators talked to motorists about their opposition to the war in Vietnam
 and the Kent State killings
 those who continued the march sat along Fifth Avenue in downtown Seattle
 blocking traffic and listening to speeches
 Southbound lanes of Interstate-5 remained blocked for several hours
 until riot-equipped police arrived on the freeway to confront the freeway occupiers
 there were no serious confrontations between marchers and motorists
 with many motorists reportedly honking and flashing peace signs in approval

UNIVERSITY OF WASHINGTON STUDENTS AGAIN MARCH TO DOWNTOWN SEATTLE

An even larger group of UW demonstrators marched from the campus -- May 6, 1970
 through the Montlake and Central Area neighborhoods to downtown -- remaining off the freeway
 U.W. strikers joined a demonstration of about 10,000 outside of city hall -- late afternoon
 when the rally ended, about 2,000 protesters moved on to the freeway
 and blocked all lanes at the height of rush hour
 Deputy Sheriffs and state troopers moved in with riot clubs and tear gas
 to move the strikers off the freeway
 rocks were thrown at the police -- four officers were hurt
 some students were injured when they leaped from the elevated freeway
 University of Washington President Odegaard canceled classes the next day to allow tempers to cool
 (remainder of that week saw outbreaks of violence in the U District related to the strike
 antiwar protesters were attacked by right-wing "vigilantes")

SEATTLE POLICE ARREST PROTESTORS AT THE UNIVERSITY OF WASHINGTON

Anti-Vietnam War protesters attempted to close the University of Washington
 by blocking the entrance gates
 they were cleared from the campus and officers returned to police headquarters
 After night fell protestors began breaking windows and throwing rocks in the U District

uniformed officers returned in cars and buses⁵¹³

one group of uniformed Seattle police broke into the Lander Hall dormitory
they claimed they were chasing rioters

Seattle Police Department deployed plainclothes officers in an effort to quell the unrest at the U.W.
witnesses reported that civilian “vigilantes” beat “anyone with long hair” (*Seattle P-I*)

SEATTLE CHAPTER OF THE NATIONAL ORGANIZATION FOR WOMEN IS CHARTERED

Seattle’s Chapter of NOW, the National Organization for Women, began -- May 8, 1970

NOW, founded by Betty Friedan [1966], is a civil rights organization pledged to work actively
to bring women into full participation in the mainstream of American society

Shortly after the chapter organized the original eleven members met with Governor Daniel J. Evans
to gain his support for legislation guaranteeing equal rights for women⁵¹⁴

CANADIANS PROTEST THE UNITED STATES’ INVASION OF CAMBODIA⁵¹⁵

In protest to President Richard Nixon’s decision to invade Cambodia

about 450 Canadians, most between the ages of eighteen and twenty,

crossed the international boundary at Blaine, Washington -- 2:00 P.M. May 9, 1970

Demonstrators ripped down plaques reading “May These Gates Never Be Closed” on the Peace Arch
they tied them together across the arch’s entrance, symbolically closing the border

protestors threw bags of red paint at the arch

they scrawled “Amerika at War With the Earth,” “Power to the People,” “Free Bobby Seale,”

and other slogans and obscenities in red and green paint and ink on the arch

protestors blocked both northbound and southbound traffic on I-5

and marched about half a mile south into downtown Blaine

there American flags were torn down and buildings were vandalized

Five members of the Blaine Police Department responded

soon nine Whatcom County sheriff officers were on the scene

Washington State Patrol was alerted in several counties

cars from as far south as Seattle (110 miles) were called to the scene

Canadians protestors were confronted by a combination of nightstick-wielding police

and enraged American civilians who repeatedly charge the protestors

as protestors retreated to Peace Arch Park just south of the Peace Arch, itself

where they hurled rocks and bottles at the pursuing Americans

Canadians regrouped and attempted a final stand

but the American civilians, running at full tilt, charged the Canadians again and again

Once back on the Canadian side of the park, the protestors threw rocks

at a Burlington Northern Railway train carrying new cars of various makes to Vancouver

about ninety of the 107 cars on the train were damaged

⁵¹³ David Wilma, *Weeks of protests erupt in Seattle beginning May 1, 1970, against U.S. entry into Cambodia and later also to protest the killing of four Kent State students*, Essay 2308, HistoryLink. Org, May 1, 2000.

⁵¹⁴ David Wilma, *Seattle Chapter of the National Organization for Women (NOW) is chartered on May 8, 1970*, HistoryLink.org, Essay 3519, August 28, 2001.

⁵¹⁵ Phil Dougherty, *About 450 Canadians invade Blaine on May 9, 1970*, HistoryLink.org, Essay 8242, August 2, 2007.

Total damage estimates ranged from between \$50,000 to \$100,000 -- most to the cars on the train

UNIVERSITY OF WASHINGTON STUDENTS VOTE TO GO ON STRIKE

Several thousand students voted to strike -- May 10, 1970

it never completely occupied the entire campus, but the strike gained massive student support (UW student strikes would continue throughout the month of May overall, the strike was a largely peaceful affair -- at least on the campus)

KILLINGS AT JACKSON STATE COLLEGE

Jackson State College killings (now Jackson State University) in Jackson, Mississippi occurred as a group of student protesters were confronted by city and state police

About one hundred black students had gathered -- Thursday evening May 14 some of the students started fires, threw rocks at white motorists and overturned vehicles

Firefighters dispatched to the scene quickly requested police support

Jackson city police and the Mississippi Highway Patrol responded in force after the firefighters left the scene -- about midnight

police moved to disperse the crowd gathered in front of a women's on-campus dormitory Advancing to within fifty to one hundred feet of the crowd, at roughly 12:05 a.m., May 15

officers opened fire on the dormitory -- exact cause of the shooting remain unclear

officers claimed they saw a sniper on one of the building's upper floors

and were also being shot at in all directions although only two city policemen

and one state patrolman reported minor injuries from flying glass

(an FBI search for evidence of sniper fire was negative)

students say that the officers were not provoked by them

gunfire lasted thirty seconds and at least 140 shots were fired by a reported forty state patrolmen using shotguns at a range from thirty to fifty feet

in the melee two students were killed and twelve injured

every window on the narrow side of the building was blown out

COLLEGE STUDENTS ACROSS THE NATION PROTEST U.S. GOVERNMENT ACTIONS

President Nixon's invasion of Cambodia and the Kent State and Jackson State shootings sparked the greatest display of campus protests in U.S. history

over 100,000 demonstrated in Washington, D.C. despite only a week's prior notice

student strikes nation-wide completely shut down over 500 colleges and universities

other Americans protested in cities across the country;

many outraged citizens lobbied White House officials and members of Congress

U.S. Senators John Sherman Cooper (R-Kentucky) and Frank Church (D-Idaho) sponsored legislation prohibiting funding of U.S. ground forces and advisers in Cambodia

(this legislation later passed)

Many labor leaders spoke out for the first time

blue-collar workers joined antiwar activities in unprecedented numbers

However, construction workers in New York assaulted a group of peaceful student demonstrators and some union leaders organized pro-administration rallies with White House assistance

PRESIDENT NIXON CANCELS NERVE-GAS SHIPMENTS ON PUGET SOUND

Department of Defense had proposed to ship twelve train loads and five shiploads (some 4,320 tons) of GB and VX nerve gas and HD mustard gas bombs, rockets, and artillery shells from Okinawa through the Bangor Naval Ammunition Depot in Kitsap County

U.S Senator Henry M. Jackson wrote to President Nixon indicating that in the Seattle area more than forty bombings had taken place since the beginning of the year

Washington Governor Daniel J. Evans and Oregon Governor Tom McCall joined in a civil suit to block the shipments

U.S. Senator Warren G. Magnuson filed legislation to block funding of the shipments

People Against Nerve Gas also filed suit and staged a “die-in” in Seattle -- May 17, 1970

(President Richard Nixon canceled plans to ship surplus nerve gas on Puget Sound [May 23, 1970])⁵¹⁶

KING COUNTY VOTERS REJECT FOUR “FORWARD THRUST” BOND PROPOSALS

“Forward Thrust” essentially resubmitted major components of the original Forward Thrust package which had previously failed [1968]⁵¹⁷

this proposal consisted of four bond issues bond issues to provide

- a regional rail transit system (\$615.5 million), storm water control (\$80 million),
- community centers (\$55.3 million)
- and (\$40.2 million) for new county jails, police stations and public health centers

total local cost of the bonds was \$615.5 million

with an additional \$900 million in federal aid for mass transit

that was secured by U.S. Senator Warren G. Magnuson

However, local economic insecurity doomed the effort -- May 19, 1970

sixty percent of those voting had to approve the measure to achieve validation

mass transit did the worst with only forty-six percent approval

MODERN TIMBER INDUSTRY IS GREATLY IMPROVED OVER “OLD TIME LOGGING”

Traditionally, timber harvesting has been one of the most dangerous occupations

there were many pieces of equipment used at every step of the logging operation

- such as large handsaws, hand axes, or chainsaws
- equipment constantly evolved to be more efficient, more versatile and safer

farmers came in the wake of the early loggers to grub out stumps and plant fields

skidroads became highways and towns were platted

Loggers and timber barons gave way to modern foresters

- who spoke of safety, conservation, selective logging and sustained yield
- they believed timber could be grown like a crop
- modern timber harvesting equipment today is significantly safer
- than that used a hundred years ago

Timber harvesting, a modern term for logging, involves cutting down trees,

removing them from the forest and eventually processing them into products

⁵¹⁶ David Wilma, *Bombings in Seattle move President Nixon to cancel nerve-gas shipments through Puget Sound on May 23, 1970*, Essay 2425 HistoryLink.org, May 16, 2000.

⁵¹⁷ HistoryLink Staff, *Voters reject rail transit plan and three other Forward Thrust bond proposals on May 19, 1970*, Historylink.org, Essay 3961, August 25, 2000.

modern timber harvesting uses much larger equipment to cut down trees
harvesters are massive vehicles capable of rapidly cutting down trees sometimes in groups
this equipment can be controlled by a single driver assisted by computers for calculations
another type of timber harvesting equipment is the log mover
traditionally, skidders were used to drag the tree along the ground
mules or horses hitched to logs provided the power
these were later replaced by logging trains
today, log mover tend to be large-tired machines, like the Caterpillar 528
also, “forwarders” that carry the logs above the ground can reduce environmental damage
Sawmills have improved drastically to become one of the most mechanized industries in the nation
bark is removed by a blast from a high-pressure water hose
modern sawmills are equipped with massive computers,
helping to calculate every step of the process to minimize waste and maximize efficiency
as saws rip into chunks which are graded and milled into planks of high-grade lumber
chips and other waste products are sold by lumber mills to pulp and paper mills
where they are converted into thousands of useful products
even smaller portable sawmills, suitable for home use, are quite efficient

WEYERHAEUSER REMAINS A LEADING IN THE LOGGING INDUSTRY

Focusing on innovations and research, Weyerhaeuser grew
into one of the largest pulp and paper companies in the world
(it is the world’s largest private sector owner of softwood timberland,
and the second largest owner of United States timberland -- behind Plum Creek Timber
Weyerhaeuser operated over 150 mills, plants and service centers
including the largest wood products plant in the world along Columbia River
plywood, pulp, paper products, pressed board, kraft paper, and Presto-logs
rivaled dressed lumber in importance
conservation, including tree farms, received a great deal of attention from the company

SEATTLE POLICE ADMIT TO POLICE OVER REACTION AT THE U.W.

Acting Police Frank Chief Moore admitted that a platoon of the Tactical Squad
was present at the University District the night of [May 7, 1970]⁵¹⁸
they had been changing clothes at the police station when the call came in to go back on duty
Moore stated that he had **“reason to believe some of these [tactical squad] people took some
physical actions that they at least over-reacted.”**

After the tactic became public, Seattle Police Major Ray Carroll was demoted and transferred
for his “overreaction” in commanding the officers -- June 3, 1970

CONGRESS EXTENDS AND EXPANDS THE [1965] VOTING RIGHTS ACT

[1965] Voting Rights Act was due to expire [August 6, 1970]
nearly one million new black voters registered since the [1965] Rights Voting Act was enacted

⁵¹⁸ David Wilma, *Seattle Police vigilantes assault citizens on May 7, 1970*, Essay 2309, HsitoryLink. Org, January 16, 2000.

still, various devices were used to eliminate the newly gained voting strength of blacks:

- strongly held black districts were switched to “at-large” positions,
- terms of incumbent white officials were extended,
- elected offices were changed to appointed positions,
- dates of elections were suddenly changed,
- qualifications for candidates to be elected to office changed,
- cost of the fee to file for an elected position increased,
- election district boundary lines were redrawn to dilute the impact of nonwhite vote

Staunch Southern foes in the U.S. House of Representatives Judiciary Committee

blocked congressional efforts to extend Section 5 of the [1965] Voting Rights Act to break the impasse in congress, U.S. Senators Warren Magnuson (D-Washington),

Edward “Ted” Kennedy (D-Massachusetts) and Mike Mansfield (D-Montana)

proposed adding a measure to the 1965 Voting Rights Act to allow 18-to-20-year-olds to vote in federal elections

Congress amended the [1965] Voting Rights Act -- June 22, 1970

in addition to addressing actions being used to eliminate or reduce participation by black voters:

- it extended the expiration date for five more years;
- literacy tests or similar devices to discriminate against voters were banned for ten years;
- sections of a few northern states were added to the list of affected areas;
- only thirty day of residency were required to vote in a presidential election;
- voting age was lowered to eighteen

WASHINGTON GETS ITS FIRST WOMAN SUPERIOR COURT JUDGE

Nancy Ann Holman was appointed to the bench by Governor Dan Evans -- June 25, 1970

she was the first woman Superior Court judge in the state

she had to battle an old boys’ club to prove that a woman’s place could be on the bench.

Nancy Ann Holman not only proved her worth to the state’s legal system

she also held the door open for other women to follow her

(by the year 2000, seventy-five women have served on the bench

in state superior courts, the Court of Appeals and the State Supreme Court)

Being a superior court judge was not her only first:

- she was the first woman member of the Washington Defense Lawyers,
- the first woman to hold an office in the state Superior Court Judges’ Association
- the first woman elected to the King County Law Library Board

Judge Holman was active in the legal community

she taught at the University of Puget Sound Law School (now Seattle University Law School),
the National College of State Judiciary at the University of Nevada

BUFFALO PARTY HOLDS IT “POLITICAL CONVENTION”

Woodstock’s rock festival at had garnered national attention

local music organizers decided to hold a local event of their own

state legislators, upon learning of the proposal, outlawed rock festivals

In response to this legislation music organizers decided rather than labeling the activity a rock festival they would have a political party convention

they believed (correctly) such conventions would not be outlawed
“Buffalo” Don Murphy’s Flying M Ranch in Eatonville was the site of the happening
as 10,000 young people attended the “Buffalo Party Political Convention” -- July 3, 1970
One concert-goer, about twenty-one years old, 5 foot 8 inches tall and 160 pounds
was killed in a fall over a seventy-five foot waterfall
his funeral, twenty-four days after he died, was paid for by the state
eight people attended the services held in Puyallup’s Woodbine Cemetery
where a donated headstone reads:
**“Here lies a young man known but to God
He surely is loved and missed by someone, somewhere”**
this young man has never been identified

JAPANESE AMERICANS JOIN THE CIVIL RIGHTS MOVEMENT

(Japanese Americans, most of them American-born, were removed from their homes
after only one or two weeks advance notice
they were moved to the Camp Harmony assembly center
located at the Puyallup Fair Grounds [beginning April 21, 1942]
if they were unable to find non-Japanese Americans to safeguard their property in their absence
they were forced to sell their homes and businesses for far less than their value
after about ten weeks at Camp Harmony, a transfer began to Idaho’s Minidoka Relocation Center
one of ten permanent incarceration sites in the West [mid-August, 1942]
these camps had inadequate facilities and eight were located in desert climates
inmates suffered the double humiliation of substandard living conditions
and the shame of being incarcerated)
Second generation Japanese American Nikkei joined by third generation Sansei -- 1970
began to organize to recognize and publicize their grievances
dating back to the Japanese American incarceration
Seattle-area Nikkei developed an exhibit in conjunction with the Museum of History & Industry⁵¹⁹
titled *Pride and Shame* which opened to display the chronicled the history
of the Japanese and Japanese Americans in the Pacific Northwest
from the late [1800s] -- July 7, 1970
this exhibit included artifacts and photos that told the story of Japanese immigration,
and the role of the Nikkei in Washington history and their wartime incarceration
it was the first time the Japanese American community had addressed their losses publicly
Pride and Shame marked the beginning of a shift in consciousness
in the Japanese American community and in other communities,
toward pride in Japanese American heritage
idea of redress for the unjust imprisonment of Japanese Americans during World War II
was planted in the minds of the victims
Pride and Shame helped the public and younger Japanese Americans
learn what incarceration was like and to witness the full extent of its effects after years of silence

⁵¹⁹ Jennifer Ott, *First Day of Remembrance (of World War II incarceration of Japanese Americans) is held at the Puyallup Fairgrounds on November 25, 1978*, HistoryLink.org, Essay 9464, August 23, 2010.

by focusing on incarceration the exhibit prompted scholars and non-scholars alike
to revisit the issue and take seriously the need for reparations by the federal government

LATINO WORKERS IN THE YAKIMA VALLEY GO ON STRIKE

United Farm Workers' Cooperative organized the hop workers of Yakima County
into a series of "wildcat" (not union-supported) strikes -- summer 1970⁵²⁰

(However, the organization did not receive official recognition until the [mid-1980s]
when it became the United Farm Workers of Washington State)

In addition to United Farm Workers Co-op, there were other forms of activism in the Yakima Valley
Cursillo Movement was organized through the Catholic Church

politically moderate, its purpose was to engage people in social action
and encourage participation in church life

SEATTLE HAS THE MOST BOMBINGS PER CAPITA IN THE NATION

Mayor Wes Ulman told the U.S. Senate Permanent Committee on Investigations -- July 28, 1970
that for the past sixteen months "**Seattle has the dubious distinction**"
of the highest number of bombings per capita in the nation⁵²¹

ninety incendiary and explosive devices were set by anti-war and racial discrimination protesters
which damaged school and university facilities, businesses, homes of elected officials
and houses of worship

behind only New York and Chicago in total numbers of bombings⁵²²

INDIAN POLICE ARE USED TO PROTECT FISH-IN SITES

Intertribal Council of Western Washington discarded their attempts at reconciliation with the state
at a press conference held at the Seattle Indian Center, Charlie Cantrell of the Puyallup tribe,
accompanied by representatives of the Nisqually and other tribes, announced
that Indians would police fish-ins with their own armed guards -- August 13, 1970

FIVE FIRES BURN 122,000 ACRES OF WENATCHEE NATIONAL FOREST

Aggressive fire suppression and prevention programs resulted in a buildup
of underbrush and smaller trees that might have been reduced had natural fires run their course

Lightning ignited five fires in the Wenatchee National Forest -- August 23, 1970

collectively known as the Entiat Burn, the destruction continued for fifteen days⁵²³

U.S. Forest Service used 8,500 firefighters at a cost of \$13 million to contain the fires
town of Ardenvoir, Washington was threatened for a time
before they can be contained and rain finally puts them out

⁵²⁰ Oscar Rosales Castaneda, *Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s*, HistoryLink.org, Essay 7922, October 21, 2007.

⁵²¹ David Wilma, *Seattle is reported highest per capita nationwide in bombings on July 28, 1970*, HistoryLink.org, Essay 2312, January 1, 2001

⁵²² David Wilma, *Seattle is reported highest per capita nationwide in bombings on July 28, 1970*, HistoryLink.org, Essay 2312, January 1, 2001.

⁵²³ David Wilma, *Five fires in the Wenatchee National Forest burn 122,000 acres beginning August 23, 1970*HistoryLink.org, , Essay 5498, August 1, 2003.

PUYALLUP INDIAN ACTIVISTS HOLD A “FISH-IN” ON THE PUYALLUP RIVER

Native American demonstrations in Washington State led by Bob Satiacum and James Young were usually held near metropolitan centers to encourage press and television coverage these demonstrations drew counter demonstrations along Puyallup and Nisqually rivers

POLICE ATTACK A FISHING CAMP ON THE PUYALLUP RIVER

Puyallup River was the scene of the most violent and publicized incident to date -- September 9, 1970 fifty-five adults and five children were arrested

“Police used tear gas and State Game Department officials used clubs to break up a force of about 30 Indians armed with guns, knives, and fire bombs” (*Seattle Times*)

police had warned the Indians several times over a loudspeaker to lay down their arms and peaceably leave the area

Public opinion ran in favor of the Indians, despite evidence of violent behavior on both sides (those Indians arrested for interfering with the police were later acquitted by an all-white jury which even accused the police of conspiracy to bring about the violent confrontation)

U.S. Attorney Stanley Pitkin and Federal Department of Justice officials joined with the Indians

U.S. v. Washington was filed -- September 9, 1970

to sue the state on behalf of the tribes who had signed [1854-1855] treaties with Territorial Governor Isaac Stevens

(legal case was in preparation for three years as tensions mounted on both sides this was the case that eventually led to the [1974] Boldt decision)

DEATH OF SEATTLE’S JIMMY HENDRIX IN LONDON

Rock star Jimmy Hendrix had dropped out of Seattle’s Garfield High School as a Sophomore

After leaving the Seattle music scene where he was very popular

he found fame in New York and London

(this musical genius is widely considered to be the greatest electric guitarist in music history

he was one of the most influential musicians of his era)

Jimmy Hendrix died of a possible drug overdose at age twenty-seven -- September 18, 1970

he left behind only four completed albums

U.S. DEPARTMENT OF JUSTICE SUES WASHINGTON OVER TREATY FISHING RIGHTS

Justice Department filed suit to stop Washington State from preventing or restricting tribes

“from taking fish at their usual and accustomed place”

in accordance with [1854-1855] Indian treaties -- September 18, 1970

this action was taken on behalf of seven tribes in Western Washington

Puyallup, Nisqually, Muckleshoot, Skokomish, Makah, Quileute and Hoh

DEMOCRATS ENJOY SOME SUCCESS IN THE STATE ELECTION

Washington’s Congressional delegation saw only one change -- November 3, 1970

Fourth District Democratic Congressman Mike McCormack, Richland

replaced Republican Congresswoman Catherine D. May

(Congressman McCormack will remain in office for five terms [1971-1981])

all of the other five Democrats and one Republican congressmen were reelected

Washington's legislature also saw Democratic gains
as Democrats in the State Senate increased their majority to twenty-nine to twenty
in the State House of Representatives Republicans lost five seats
but maintained their majority fifty-one to forty-eight
Initiative 20 to legalize abortion in the state
was approved by the voters of Washington -- November 3, 1970
this was the nation's first political forum on the issue

MANDATORY BUSING IS ADOPTED FOR THE SEATTLE SCHOOL DISTRICT

Seattle School District's voluntary busing program to gain racial balance in school
had limited success

In order to address the issue of racial segregation in Seattle Schools and avoid federal intervention,
School Board members adopted a Middle School Desegregation Plan

that called for mandatory busing to achieve racial balance -- November 11, 1970
about 2,000 students in four of the city's middle schools were involved

Months of debate, demonstrations pro and con, and threats of lawsuits from both sides
showed the contentious nature of the issue⁵²⁴

school board members rejected a proposal to enlarge the planned desegregation zone
to include elementary and high schools as well
instead, the board limited the desegregation effort
to one middle school in the predominately black Central Area
and three in the predominately white North End

Some civil rights activists expressed disappointment with the plan as others praised it
an anti-busing group, Citizens Against Mandatory Busing, immediately filed suit against the plan
(implementation was delayed for almost two years [until September 6, 1972])

MY LAI MASSACRE MILITARY COURT MARTIAL BEGINS

United State Army charged fourteen officers, including the Division's commanding officer,
with suppressing information related to the incident

however, the strongest case was against Lieutenant William Calley

Military trial of William Calley began at Fort Benning, Georgia -- November 12, 1970
in his opening statement, the prosecutor described how Calley used his machine gun
to murder innocent civilians

he also ordered his men to kill unarmed men, women and children
he concluded by telling the six military officers who served as the jury
that the evidence would convict Calley of criminal charges

SECOND LIEUTENANT WILLIAM CALLEY GOES TO TRIAL

Military prosecutors contended Lieutenant Calley, in defiance of the military rules of engagement,
ordered his men to deliberately murder unarmed Vietnamese civilians

despite the fact that his men were not under enemy fire at all

Testimony revealed that Calley had ordered the men to kill everyone in the village

⁵²⁴ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002.

Calley's original defense that the death of the villagers was the result of an accidental helicopter or aerial airstrike was quashed by the few prosecution witnesses
In his new defense, Calley claimed he was following orders from his immediate superior, Captain Ernest Medina -- November 17, 1970 (whether this order was actually given is disputed to this day
Medina was acquitted of all charges relating to the incident at a separate trial [August])

MARYMOOR PREHISTORIC INDIAN SITE IS NAMED AN HISTORIC PLACE⁵²⁵

Marymore Park had been purchased by King County [1962]
an archaeological dig was undertaken by U.W. archaeologist Dr. Robert E. Greengo at a small part of the park along the Sammamish River [1964] to 1[970]
During the dig it was discovered that there were two separate occupations separated by 3,000 years
stone tools indicated the older part of the site may have been visited by Indians as early as [4000 B.C.] -- hunters and gatherers used the site only seasonally around [1000 B.C.] the site may have seen more substantial occupation
stone tools from that era included projectile points, scrapers, choppers and small blades
raw materials for these tools included quartz, jasper, chert, chalcedony and obsidian
many of these stones were not native to the valley, indicating that the inhabitants may have had connections to Eastern Washington
Marymore prehistoric site was named to the National Register of Historic Sites -- November 20, 1970

SEATTLE SEVEN GO ON TRIAL IN FEDERAL COURT

(Seattle Seven were members of the Seattle Liberation Front, a radical anti-Vietnam War organization formed at the University of Washington [January 1970]
Seattle Seven participated in a demonstration held [February 17] at Seattle's Federal Courthouse which attracted a crowd of roughly 2,000 who were irate at the fate of the Chicago Seven
one of the most outspoken members was 27-year-old visiting philosophy professor Michael Lerner along with Jeff Dowd, Michael Abeles, Joseph Kelly, Roger Lippman, Susan Stern and Charles "Chip" Marshall III)
Trial was begun in federal Judge George Boldt's Tacoma courtroom -- November 23, 1970
roughly 200 protesters picketed outside the courthouse in support of the Seattle Seven
defendants and their supporters inside the courtroom refused to stifle either their emotions or their political opinions

U.S. SENATE VOTES AGAINST THE BOEING SUPERSONIC TRANSPORT (SST) PROGRAM

Although previously approved by the U.S. House of Representatives
environmentalists and fiscal conservatives combined to kill the SST program -- December 3, 1970
as the U.S. Senate rejected a new appropriation to continue development by a 52-41 vote

⁵²⁵ Alan J. Stein, *Marymoor Prehistoric Indian Site is placed on the National Register of Historic Places on November 20, 1970*, HistoryLink.org, Essay 4095, December 27, 2002.

Senator William Proxmire (D-Wisconsin) in his fight against political pork stated:
“There are just two strong, persuasive reasons for the SST -- Scoop and Maggie.”⁵²⁶
Boeing’s supersonic (faster than the speed of sound) transport aircraft (SST) was dead
more than 7,500 Boeing workers were immediately laid off
(over the next year, total Boeing employment would decline by 60,000 jobs
due to a sudden drop in commercial airliners and military orders)
Pacific Northwest was thrown into an ever deepening economic recession
Seattle’s professional basketball team quietly changed its name
from the “Seattle Supersonics” to the “Seattle Sonics”

TRIAL OF THE SEATTLE SEVEN ENDS IN A MISTRIAL

Trial culminated in a courtroom riot where punches were thrown
philosophy professor Michael Lerner was the only defendant to remain seated
federal Judge George Boldt sent Lerner to jail on contempt of court charges
Federal Judge George Boldt declared a mistrial court -- December 10, 1970
he cited all the defendants for contempt of court and sentenced them to six months in prison
he refused to grant bail
(contempt charges were settled out of court [1972])
All of the Seattle Seven served brief sentences in federal minimum security prison

SUPREME COURT RULING ON EIGHTEEN YEAR OLD VOTERS CONCERNS STATES

U.S. Supreme court ruled the eighteen-year-old minimum age voting requirement
was valid for national elections but not for state and local elections -- December 21, 1970
Under this proposal nearly all of the states faced the prospect
of establishing a cumbersome and expensive dual voting system
local election officials would have to maintain
one voter registration list for persons eighteen to twenty
and another list for those twenty-one and older
states would have to devise two sets of ballots or provide special voting machines to ensure
that 18-to-20-year-olds did not vote for state and local candidates or referendums
but only for federal officials

BROWN BERETS SUPPORT LOCAL CHICANO COMMUNITIES

Brown Berets acted in defense of students being harassed or intimidated by others
their muscle was sometime a useful force
however, older members of the community were more reluctant
to support the confrontational tactics of the Brown Berets
reflecting the generational differences in the Chicano community
Brown Berets initiated or participated in a number of programs targeted at specific community needs
Seattle chapter organized a “Food for Peace” drive to gather food, clothing and money
to make and distribute Christmas baskets to Chicanos in the Yakima Valley

⁵²⁶ Sharon Boswell and Lorraine McConaghy, *Twin towers of power*, *The Seattle Times*, September 29, 1996.

who were most in need -- winter 1970
UW chapter also engaged in other activities
such as the creation of a legal defense fund for Chicano activists
and active involvement in support of United Farm Worker Union's grape boycott
Brown Berets financed most of their activities through collection drives
and by requesting funds from sympathetic staff and faculty at the University of Washington

STATE SUPREME COURT RULES ON THE CASE OF THE FRANKLIN HIGH DEMONSTRATORS

Superior Court Judge Solie Ringold's dismissal of the [March 29, 1968] case
regarding the occupation of Seattle's Franklin High School principal's office was overturned⁵²⁷
State Supreme Court declared the unlawful assembly statute was constitutional -- January 14, 1971
Court stated that the terms "breach or disturbance of the peace" had been used in the law
for centuries and were not unconstitutionally vague or uncertain
Court also ruled that prohibiting disturbances of the peace did not deny the freedoms of speech
or peaceable assembly
Court made it clear a person who was merely present but did not commit or intend to commit
any of the prohibited acts could not be convicted
State Supreme ordered the defendants be re-tried on the charges in Superior Court
however, the prosecution declined to prosecute again
case was over three years after the sit-in and arrests had taken place
(Unlawful assembly statute was repealed by the legislature [1975]
it was replaced with a somewhat narrower law making a person guilty of failure to disperse
if he or she congregates with a group of three or more who commit acts
creating a substantial risk of injury and does not disperse
when ordered to do so by a law enforcement officer)

INDIAN PROTEST LEADER HANK ADAMS IS SHOT

Tide had shifted in favor of Indians protesting to maintain their treaty rights
even so, two white assailants shot Hank Adams as he walked beside the Puyallup River
they approached him muttering obscenities, jammed a rifle in his stomach
and pulled the trigger -- January 19, 1971
(Adams survived the attack and continued his efforts to exempt Indians
from state fish and game regulations)

APOLLO XIV TAKES FLIGHT

After a delay of forty minutes due to weather, Commander Alan B. Shepard, Jr.,
Command Module Pilot Stuart A. Roosa and Lunar Module Pilot Edgar D. Mitchell
blasted off -- January 31, 1971
Apollo XIV's flight to the Moon was routine

APOLLO XIV FACES DIFFICULTIES

⁵²⁷ Kit Oldham, *State Supreme Court issues decision in Franklin High School sit-in case on January 14, 1971*, HistoryLink.org, Essay 3763, May 8, 2002.

At the beginning of the mission, the Command/Service Module, *Kitty Hawk*, had difficulty docking with the Lunar Module *Antares*
repeated attempts to dock went on for an hour and forty-two minutes until it was suggested pilot Roosa hold *Kitty Hawk* against *Antares* using its thrusters
this proved to be successful and Astronauts Shepard and Mitchell entered the *Antares*
Once in lunar orbit, the Lunar Module separated from the *Kitty Hawk*-- February 5, 1971
Antares developed two serious problems:

- first, *Antares*' computer began getting an ABORT signal from a faulty switch tapping on the panel next to the switch fixed the problem, but only temporarily because after the descent engine was fired the computer would think the signal was real and would initiate an "auto-abort" causing *Antares* to climb back into orbit on the ground NASA and the software teams scrambled to find a permanent solution software modifications were transmitted to the crew via voice communication, Lunar Module Pilot Edgar D. Mitchell manually entered the changes just in time
- second problem occurred during the powered descent of the Moon's surface when *Antares*' radar altimeter failed to lock automatically onto the moon's surface near 18,000 feet the astronauts cycled the landing radar breaker and successfully acquired a signal -- again just in the nick of time

APOLLO XIV ASTRONAUTS WALK ON THE MOON

After landing the Lunar Module *Antares* on the surface -- February 5, 1971
Alan Shepard and Edgar Mitchell took two moon walks using a "lunar rickshaw" pull cart to carry equipment and samples
Shepard and Mitchell deployed and activated various scientific instruments and experiments and collected almost 100 pounds of lunar samples for return to earth
Shepard brought a makeshift six iron golf club and two golf balls to the Moon
he took several swings (one-handed, due to the limited flexibility of the EVA suit)
Shepard and Mitchell spent about thirty-three hours on the Moon
with about nine-and-a-half-hours dedicated to their space walks
Command Module Pilot Stuart Roosa, meanwhile,
remained on Command/Service Module *Kitty Hawk* taking pictures while in lunar orbit

APOLLO XIV SPLASHES BACK TO EARTH

Command/Service Module *Kitty Hawk* splashed down in the South Pacific Ocean south of American Samoa -- February 9, 1971
it was met by the recovery ship USS *New Orleans*
Command Module Pilot Stuart Roosa, who had worked in forestry in his youth, took several hundred tree seeds on the flight
these were germinated after the return to Earth, and widely distributed around the world as commemorative "Moon Trees"
one is planted on the state capital campus in Olympia

WASHINGTON'S STATE'S DEPARTMENT OF ECOLOGY CARRIES OUT ITS MISSION

Department of Ecology became responsible for administering the Shoreline Management Act,

the Water Code, the state Water Pollution Control Act, the state Clean Air Act
and the Model Toxics Control Act -- 1971

These responsibilities were followed quickly by the Washington Oil Pollution Act which:

- established unlimited liability for oil spills;
- provided for state cleanup capability;
- specifically clarified that the discharge of any oil into state waters was illegal

Governor Dan Evans requested an oil risk analysis report
concerning the transportation of oil into Puget Sound

TWENTY-SIXTH AMENDMENT TO THE U.S. CONSTITUTION IS CONSIDERED

Congress took up a proposed Constitutional amendment to allow 18-20 year-olds to vote
in every primary and general election

It was pointed out this would save millions of dollars by avoiding the need for dual voting systems
for federal officials and state, county and city officials and issues

U.S. Senate unanimously approved the Twenty-sixth Amendment -- March 10, 1971

U.S. House of Representatives followed suit by a 400 to nineteen vote [March 23]

Next step in the constitutional amendment process, ratification by the states, proceeded swiftly
Delaware and Minnesota acted within an hour of the House vote

BOEING DELIVERS ITS LUNAR ROVING VEHICLE TO NASA

Two weeks ahead of schedule, Boeing presented the first lunar rover that was to travel to the moon
to the National Aeronautics and Space Administration (NASA) -- March 10, 1971

to no one's great surprise, it had cost \$38 million -- almost twice the original estimate

Boeing's lunar rover was a wonder of design and engineering

it was a fully functional vehicle that could be folded up, bolted to the side of a lunar lander,
flown to the moon, unfolded, and driven by astronauts
to places they could never reach on foot

(Boeing eventually made four lunar rovers for NASA, each intended for work on the moon)

Boeing far-reaching design generated led to several "spin-off" products \
for civilian and military use⁵²⁸

including such things as robotic vehicles and advanced motorized wheelchairs
its multi-purpose "joystick" controls were later adapted for computer games
another variation was developed to permit those without the use of their legs
to drive without the need for extensive modifications to the vehicle

SECOND LIEUTENANT WILLIAM CALLEY IS FOUND GUILTY IN THE MY LAI MASSACRE

In a four-month-long trial, most of the enlisted men who were involved in the events at My Lai
had already left military service and were thus legally exempt from prosecution

Despite claims that he was following orders from his commanding officer,

after seventy-nine hours of deliberation Second Lieutenant William Calley was convicted
of premeditated murder by a six-officer jury (five had served in Vietnam) -- March 29, 1971

⁵²⁸ John Caldbeck, *The Boeing Company wins NASA contract for lunar rover on October 28, 1969*, HistoryLink.org, Essay 10045, February 28, 2012.

for ordering the shooting of unarmed civilians

SECOND LIEUTENANT WILLIAM CALLEY IS SENTENCED

Lieutenant Calley was sentenced to life in prison at Fort Leavenworth, Kansas -- March 31, 1971
of the twenty-six officers and soldiers initially charged for their part in the My Lai Massacre
or the subsequent cover-up, only Calley was convicted
many saw the My Lai Massacre as a direct result of the military's attrition strategy
with its emphasis on "body counts" and "kill ratios"

PRESIDENT NIXON PLACES SECOND LIEUTENANT CALLEY UNDER HOUSE ARREST

Only one day after Lieutenant William Calley was sentenced, President Richard Nixon ordered him
transferred from Leavenworth prison to Fort Benning, Georgia
where he was placed under house arrest at pending an appeal -- April 1, 1971
this leniency was protested by Secretary of Defense Melvin Laird
(In [1974], President Nixon issued William Calley a limited Presidential Pardon
consequently, his general court-martial conviction and dismissal from the U.S. Army
were upheld, however, the prison sentence and subsequent parole obligations
were commuted to time served leaving William Calley a free man)

HYDRO-ELECTRIC POWER DEVELOPMENT COMES TO AN END

Planners told Public Utility Districts (PUDs) the demand for electricity would double every ten years
all of the best hydroelectric sites had been developed
environmental objections blocked any new projects
utility companies turned to other sources for energy: coal, natural gas and nuclear power⁵²⁹
Atomic Energy Commission viewed nuclear energy as an untapped energy source
Bonneville Power Administration officials responsible for coordinating regional power resources
believed building nuclear power plants was the best way to supply clean and cheap electricity
Bonneville Board voted to construct five nuclear reactors
three at Hanford
two at Satsop near Elma
Washington Public Power Supply System (WPPSS -- pronounced whoops)
was a governmental coalition organized Public Utility Districts (PUDs) in Washington
to share the costs of building new nuclear generating facilities [1957]
WPPSS made plans for a nuclear plant at Hanford, called Plant 2, and public utilities signed up to
share costs and benefits of the construction and operation --1971

ECONOMIC HARD TIME HITS WASHINGTON STATE

United States was in a recession and sale of Boeing commercial aircraft was slow -- 1970s
as the company went for one eighteen-month period
without a single new domestic order for any of its airliners
(Boeing's 747 had not yet established itself in the market)
Boeing cutbacks increased to 1,500 layoffs a month

⁵²⁹ David Wilma, *Tacoma City Light taps Wynoochee River for power in 1994*, HistoryLink.org, Essay 5151, January 30, 2003.

during one week alone, some five thousand of Boeing's people received pink slips
firings reached to the top of major organizations -- even vice-presidents got the axe
people took to saying **“an optimist was someone who brought a lunch to work;
a pessimist kept his auto engine running while he went inside”** (Seattle Times)
these job losses devastated the economy of Washington
property values dropped by the millions
total value in [1970] was \$597 million
total value in 1971 was \$589 million

ECONOMIC RECESSION LEADS TO HUNGER IN WASHINGTON STATE

In the Seattle area, the consequences were devastating
each unemployed Boeing worker cost the job of at least one other person
due to the loss of the worker's purchases and spending

Unemployment leaped to fourteen percent -- the highest in the nation
about the same number of people were on welfare or receiving food stamps
enrollment in a free-lunch program for schoolchildren soared more than fiftyfold

All of Seattle suffered, and a billboard on the city's edge read:

“Will the last person leaving Seattle turn out the lights.” -- April 16, 1971

Citizens of Kobe, Japan donated rice and canned goods to feed Seattle's new poor

Washington's U.S. Senator Warren G. Magnuson took to the Senate floor

he told the U.S. Senate there were thousands of starving people in Seattle

he expressed his **“total humiliation”** when he asked, **“Why must citizens of the richest nation in the world have their survival depending on mercy shipments of rice and canned goods from another nation?”**⁵³⁰

food was released from the Agriculture Department

Seattle churches and synagogues responded to the hunger crisis with “Neighbors in Need”

millions of dollars' worth of food were collected and distributed -- no questions asked

deepest part of the disaster was reached -- April 1971

SCHOOL FUNDING IS IMPACTED BY THE GROWING RECESSION

Local school districts were funded almost entirely by the state

annual budgets passed by the state legislature provided a dependable source of money

to operate public schools throughout the state

local districts knew the amount they would be provided when the legislative session adjourned

giving school district administrators time to write their annual budget

for the upcoming school year beginning in [September]

Because of the deepening recession which led to declines in State tax revenue

the State Legislature reduced the funding available to public schools

as the recession deepened so did cuts to education

PRESIDENT NIXON OFFERS SENATOR HENRY JACKSON IS OFFERED A CABINET POSITION

U.S. Senator Jackson was offered the position of Secretary of Defense by President Nixon -- 1971

⁵³⁰ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*, P. 265.

Scoop declined but became one of Nixon's most favored Democrats
as Senator Magnuson's influence in the White House declined,
Senator Jackson's influence soared

Jackson maintained his support of the effort in Vietnam which expanded into Cambodia under Nixon
in contrast, Senator Magnuson began to shift away from supporting the war
now that his friend Lyndon Johnson no longer served as Commander-in-Chief

STARBUCKS COFFEE OPENS ITS FIRST STORE IN SEATTLE'S PIKE PLACE MARKET

Writer Jerry Baldwin, English teacher Gordon Bowker and history teacher Zev Siegl
shared a common passion for fine coffee and tea

they had been buying coffee from as far away as Berkeley, California and Vancouver, B.C,
These three coffee lovers saw a business opportunity

each contributed \$1,350 and together they borrowed another \$5,000 to open a store⁵³¹

they wanted to use a nautical theme for their new company

so they looked for names in Herman Melville's nineteenth-century novel *Moby Dick*

"Starbuck," the first mate of the whaling ship *Pequod* who loved his coffee, was chosen

Starbucks Coffee, Tea and Spice roasted and sold coffee beans

in a small coffee house in Seattle's Pike Place Market -- April 1971

business exceeded their expectations -- (a decade later four Starbucks were in operation)

RAILROAD RECOVERY AND REFORM ACT BECOMES LAW

Collapse of the Penn-Central and seven other northeast and mid-west railroads
threatened America's economy

railroads could not meet their payroll -- railroad stock was almost worthless

Senator Warren Magnuson handled the complex legislation needed in the U.S. Senate

Washington's Congressman Brock Adams carried the lead in the House of Representatives

Railroad Recovery and Reform Act passed Congress and became law -- May 1, 1971

rehabilitation of America's railroads took eight years to complete [1972-1980]

(congress provided \$2.1 billion for the recovery effort

system was streamlined as railroads were allowed to cut excess trackage and service
Amtrak [passenger service] and Conrail [northeast freight hauler] were both created
deregulation of railroads was allowed)

WASHINGTON ENVIRONMENTAL POLICY ACT IS APPROVED BY THE LEGISLATURE

Washington's new law was inspired by the National Environmental Policy Act [1969]

which was promoted by Washington U.S. Senator Henry M. Jackson⁵³²

Overall goal was to use Environmental Impact Statement information

to adjust project plans in order to reduce likely negative impacts on the environment

As written, the ambitious law's purposes were:

"(1) To declare a state policy which will encourage productive and enjoyable harmony

⁵³¹ David Wilma, *Starbucks Coffee opens first store in Pike Place Market in April 1971*, HistoryLink.org, Essay 2075, January 1, 2000.

⁵³² Peter Blecha, *Washington's State Environmental Policy Act (SEPA) is approved on May 10, 1971*, HistoryLink.org, Essay 9737, April 10, 2011.

- between humankind and the environment;**
(2) to promote efforts which will prevent or eliminate damage to the environment and biosphere;
(3) and [to] stimulate the health and welfare of human beings;
(4) to enrich the understanding of the ecological systems and natural resources important to the state and nation.”

BOEING’S SUPERSONIC TRANSPORT (SST) PROGRAM IS CANCELLED

Despite the Supersonic Transport (SST) project’s strong support by the federal administration and although more than \$500 million in federal funds had been sunk into the program

U.S. senators rejected further funding [March 1971]

In response, the “National Committee for an American SST” urged supporters

to send in \$1 to keep the program alive -- nearly \$1 million worth of contributions poured in

Labor unions, worried that the winding down of both the Vietnam War and Project Apollo would lead to mass unemployment in the aviation sector, also supported the SST project

U.S. House of Representatives also voted to end SST funding -- May 20, 1971

Boeing’s Supersonic Transport (SST) program was cancelled

at the time, Boeing had 115 unfilled orders by twenty-five airlines,

while Europe’s *Concorde* had seventy-four orders from sixteen customers

HISTORY OF THE VIETNAM EFFORT IS LEAKED TO THE PRESS

Former defense analyst Daniel Ellsberg had worked on the study for several months

he also knew the leaders of the task force researching the history of the conflict very well

Ellsberg and his friend Anthony Russo photocopied the study [October 1969]

they were intent on disclosing it to the press

Ellsberg discussed the study with *New York Times* reporter Neil Sheehan

Ellsberg gave forty-three of the volumes to Sheehan [March 1971]

AMERICANS BEGIN TO LEARN ABOUT EVENTS THAT TOOK PLACE IN SOUTHEAST ASIA

New York Times began publication of activities in Vietnam -- June 13, 1971

during the resulting media publicity the name “Pentagon Papers” arose for the study

Pentagon Papers revealed that the U.S. had deliberately expanded its war with Marine Corps attacks and the bombing of Cambodia and Laos and coastal raids on North Vietnam

none of which had been reported by the media in the U.S.

most damaging revelations in the papers revealed that administrations from Truman to Johnson

had misled the public regarding their intentions

another controversy was that President Johnson sent combat troops to Vietnam [by July 17, 1965]

even before consulting with his advisors

President Nixon’s first reaction to the publication of the Pentagon Papers

was that he should do nothing

since the study embarrassed the Johnson and Kennedy administrations; not his

however, Secretary of State Henry Kissinger convinced the president

that not opposing publication set a negative precedent for protecting future secrets

U.S. Attorney General John N. Mitchell and Nixon obtained a federal court injunction

to force the *Times* to cease publication after three articles
Washington Post began publishing its own series of articles based on the Pentagon Papers
fifteen other newspapers also received copies of the study and began publishing
Daniel Ellsberg surrendered to authorities in Boston
he admitted that he had given the papers to the press

OPERATION “RANCHHAND” CONTINUES TO POSION VIETNAM

President Richard Nixon, without informing Congress ordered U.S. forces
to begin “search and destroy” missions in South Vietnam
Herbicides containing Dioxin were banned for use by the U.S. Department of Agriculture [1968]
however, the spraying of Agent Orange continued in Vietnam -- summer 1971
Operation “Ranchhand” sprayed eleven million gallons of Agent Orange containing 240 pounds
of the lethal chemical Dioxin on South Vietnam
more than one seventh of the country’s total area has been laid waste

WEST COAST LONGSHOREMEN GO ON STRIKE

Five-year contract between dock workers and the Pacific Maritime Association expired -- 1971
when the sides failed to agree on a new contract, union leaders called for a strike vote
Members of the International Longshoremen and Warehousemen’s Union (ILWU)
voted to strike West Coast ports in -- July 1, 1971
this is the first time in twenty-three years that all fifty-six ports on the Pacific Coast
were closed by a labor⁵³³

CONSTITUTIONAL AMENDMENT XXVI PROVIDE EIGHTEEN YEAR OLDS VOTING RIGHTS

Amendment XXVI to the Federal Constitution was passed by Congress
and approved by the required three-quarters of the states -- July 1, 1971
North Carolina, the thirty-eighth and final state necessary, ratified the amendment
Section 1 states: **“The right of citizens of the United States, who are eighteen years of age
or older, to vote shall not be denied or abridged by the United States or by any State
on account of age.”**
More than eleven million 18-to-20-year-olds throughout the United States had the right to vote
in federal, state and local elections
U.S. Senators Warren Magnuson, Edward “Ted” Kennedy and Mike Mansfield
had found a way to permanently ensure the right to vote for those 18 to 20 years old

JOHN DAY DAM AND LOCK BEGINS OPEATION

Multipurpose project spanned the Columbia River near Rufus, Oregon
located 216 miles upstream from the river’s mouth at the head of Lake Celilo
project consisted of a navigation lock, 1,228-foot spillway, twenty gates, a powerhouse
and fish passage facilities on both shores
Construction began in [1958] and was completed at a total cost of \$511 million -- 1971

⁵³³ David Wilma, *Longshoremen vote to strike West Coast ports on July 1, 1971*, HistoryLink.org, Essay 3883, July 9, 2002.

this was the final step in harnessing the lower waters of the Columbia River
it completed the 325-mile route from the Columbia River's mouth to Pasco, Washington
Powerhouse was the second largest in the world
with a capacity to create 2,160,000 kilowatts of power using twenty generators
Navigation Lock Chamber 675 feet long and eighty-six feet wide could lift traffic 113 feet
Lake Umatilla, the 76.4-mile long reservoir behind John Day Dam,
covered several former hazards to navigation
Indian Rapids, Middle and Upper Rapids and Squally Hook

APOLLO XV LEAVES EARTH FOR ANOTHER VISIT TO THE MOON

Command/Service Module *Endeavour* carried Commander David R. Scott on his third spaceflight
with Command Module Pilot Alfred M. Worden and Lunar Module Pilot James B. Irwin
they blasted off from the Kennedy Space Center at Cape Canaveral -- July 26, 1971
Apollo XV was the ninth manned mission in the American Apollo space program
and the fourth to land on the Moon
it was the first long duration visit to the Moon
and had a greater focus on science than had been possible on previous missions
it was also the first mission where Boeing's Lunar Roving Vehicle was used

POLICE PAYOFF SCANDAL IS EXPOSED IN SEATTLE⁵³⁴

(Dating back almost to the time of statehood [1889] Seattle police officers
had collected bribes to ignore illegal activity such as gambling and prostitution)
(Although gambling was illegal in Washington, the Seattle City Council passed an ordinance
providing for the licensing of cardrooms [954]
this allowed operators to establish facilities where patrons could gather to play cards
Seattle Police Department Vice Squad and patrol officers began to collect bribes
to allow gambling and other activities considered "vices" to continue
tavern operators who operated after hours also were targeted for bribes
individual officers were able to double their base salaries with bribes
money was passed up the chain of command to the Assistant Chief of Police
business owners who refused to pay bribes found their liquor licenses suspended
by state liquor inspectors who cooperated with the police)
(*The Seattle Times* published a series of articles exposing the corrupt system [January 1967]
Mayor James "Dorm" Braman impaneled a blue-ribbon commission to investigate
that body found insufficient evidence of payoffs to justify the filing of criminal charges
International Association of Chiefs of Police reviewed departmental operations [1967]
their report recommended substantial changes to departmental structure
and singled out the Assistant Chief of Police for particular criticism
Seattle Police Department reorganized [1968]
these changes seemingly ended organized graft by officers
(United States Attorney Stan Pitkin was appointed by President Nixon [1969])

⁵³⁴ David Wilma, *King County grand jury indicts public officials in police payoff scandal on July 27, 1971*, HistoryLink.org, Essay 3289, May 19, 2001.

federal government lacked authority to directly prosecute local corruption,
but could investigate other possible violations
an investigation was undertaken by a federal grand jury [1970]
this investigative task force was hampered by a short time frame
and by the opposition of the police guild to the use of polygraph
witnesses were called before a federal grand jury to testify
about their knowledge of the payoff system in Seattle
some witnesses refused to cooperate and were cited for contempt -- some lied
even so, it was discovered the payoff system had involved thirty-five to forty officers
Seattle Police Department presented felony cases against four officers
former Assistant Chief of Police Milford E. "Buzz" Cook was indicted for perjury
he had denied under oath any knowledge of the payoff system
Cook was convicted and sentenced to prison
County Prosecuting Attorney Charles O. Carroll filed misdemeanor charges instead
and asked that the officers receive suspended sentences)
Long-serving (twenty-two years) King County Prosecutor Charles O. Carroll
was challenged by Christopher Bayley in the Republican primary election
Bayley was elected to the office and began his own investigation of police payoffs and bribe
another grand jury was impaneled -- July 27, 1971
conspiracy indictments were brought against nineteen officers
several hundred police officers were named as unindicted co-conspirators
police officers and state liquor inspectors were charged with graft and bribery,
some witnesses were charged with perjury⁵³⁵

BOEING'S LUNAR ROVER IS USED ON THE MOON

After unloading the Lunar Roving Vehicle, astronauts David Scott and James Irwin
drove to Elbow crater where they were to conduct their first moonwalk
they spent about six-and-a-half hours outside of the Lunar Module -- July 30, 1971
in the meantime, Command Module Pilot Alfred Worden orbited the Moon
he studied the lunar surface and environment in great detail with a panoramic camera,
mapping camera, laser altimeter and other scientific equipment

WHITE HOUSE "PLUMBERS" MEET TO PLAN THEIR STRATEGY

In an effort to stop the leaking of information regarding America's involvement in Southeast Asia
President Nixon authorized creation of a "special investigations unit"
led by aide John Ehrlichman
Ehrlichman made Egil "Bud" Krogh head of the "Special Investigation Unit" in the White House
Krogh worked closely with David Young, Special Assistant at the National Security Council
and an Administrative Assistant to Henry Kissinger
Krogh and Young met with G. Gordon Liddy and E. Howard Hunt
in a basement office in the Old Executive Office Building -- August 1, 1971
Hunt and Liddy recommended a "covert operation" to get information

⁵³⁵ David Wilma, HistoryLink.org Essay 3289, May 19, 2001.

about former defense analyst and Pentagon Paper leaker Daniel Ellsberg's mental state
in order to discredit him
because they were attempting to stop leaks to the press they dubbed themselves the "plumbers"
Ehrlichman approved the covert operation

APOLLO XV ASTRONAUTS TAKE TWO MORE WALKS ON THE MOON

Second walk on the Moon lasted seven hours and twelve minutes -- August 1, 1971
in addition to driving the Lunar Roving Vehicle and conducting scientific experiments,
Scott and Irwin erected a U.S. flag on the surface
Third Moon Walk lasted just under four hours fifty minutes -- August 2
both astronauts drove the Lunar Roving Vehicle -- this time to the Northwest of their landing site
after completing their work, Scott drove the rover beyond the Lunar Module
to its final resting point where a television camera on the rover could observe the liftoff
Scott set up a memorial nearby to the cosmonauts and astronauts who had died up to that time
with a plaque bearing their names and a "Fallen Astronaut" statuette
Lunar Module lifted carrying astronauts David Scott and James Irwin
lifted off from the Moon to join Command Module Pilot Alfred M. Worden
in orbit around the Moon -- August 3
in total, the two astronauts had spent eighteen-and-a-half hours on the surface of the Moon
during this time they collected approximately 170 pounds of lunar samples
Lunar samples and other items were carried into the Command/Service Module
Lunar Module was sealed off, jettisoned, and intentionally crashed
into the lunar surface -- August 3, 1971
Apollo XV astronauts remained in orbit around the Moon

APOLLO XV ASTRONAUTS RETURN TO EARTH

After completing their observations of the Moon's surface
Apollo XV astronaut's final activity in lunar orbit was to release a small satellite into lunar orbit
its objectives were to study the plasma, particle, and magnetic field environment of the Moon
and map the lunar gravity field
this satellite orbited the Moon and returned data from [August 4, 1971] until [January 1973]
During the return trip to Earth, Al Worden performed a spacewalk in deep space -- the first of its kind
Command Module carrying Commander David R. Scott, Command Module Pilot Alfred M. Worden
and Lunar Module Pilot James B. Irwin reentered the Earth's atmosphere
Although one of the three parachutes on the Command Module failed to deploy properly,
only two were required for a safe landing
USS *Okinawa* recovered the crew in the North Pacific Ocean -- August 7, 1971

WAGE AND PRICE CONTROLS ARE IMPOSED TO CURB INFLATION

Costs of the Vietnam War and increased domestic spending accelerated inflation in America
which exceeded 6% briefly [1970] and persisted above 4% -- 1971
such inflation rates were thought to be completely intolerable by prevailing historical standards
America's money supply had increased by 10%
as \$22 billion in assets left the U.S. (in the first six months of [1971])

U.S. was running a balance-of-payments deficit
and a trade deficit for the first time in the Twentieth Century
An international monetary crisis began -- August 15, 1971
with the announcement of President Richard Nixon's "new economic policy"
domestically this policy involved a ninety-day wage and price freeze
internationally it suspended the convertibility of U.S. dollars
into gold for foreign central banks
and imposed a temporary ten percent import tax surcharge intended to remain in force
until European countries and Japan had made realignments of their currency's value
in terms of the dollar satisfactory to the United States
President Nixon and fifteen advisers made these decisions
without consulting members of the international monetary system,
so the international community informally named the reaction "Nixon shock"
(This financial crisis remained of concern for four months
as foreign currency "floated" in value against the dollar
finally an agreement was reached
on terms acceptable to the U.S. administration [December 18, 1971]
however, the ninety-day wage and price freeze stretched into one thousand days
before Nixon established a federal pay board to approve requests for wage increases)

NEW OIL REFINERY OPENS IN WASHINGTON STATE

Atlantic Richfield (ARCO) built a refinery at Cherry Point near Ferndale, Washington -- 1971
original dock design called for two platforms
one for the unloading of crude oil
another for loading the refined product
however, during construction the southern platform was altered
to handle both the unloading of crude and loading of refined products
Petroleum production leaped well ahead of in-state consumption
(British Petroleum (BP) bought the Cherry Point refinery [April 2000]
and BP purchased ARCO [January 2002])

SAFETY OF PUGET SOUND BECOMES A MAJOR ISSUE OF CONCERN

Increased oil tanker traffic into the Strait of Juan de Fuca and Puget Sound
and the construction of more oil tankers (including the later infamous *Exxon Valdez*)
delivered crude oil from Valdez, Alaska to various locations in Washington's
inland marine waters around Anacortes and Ferndale's Cherry Point
Potential for oil spill disasters awakened the state and federal government's interest
in studying the risk to marine resources
(Arco/BP and the Conoco/Phillips refineries reported seventy-three spills
at their Cherry Point refineries between [1972] and [1999])

WHITEHOUSE PLUMBERS ATTEMPT TO GATHER INFORMATION ON DANIEL ELLSBERG

Los Angeles office of Dr. Lewis Fielding, Ellsberg's psychiatrist,
was burglarized -- September 3, 1971

in an effort to find information to smear Ellsberg's character and undermine his credibility
this mission was led by former CIA agent E. Howard Hunt
Burglars waited hours for the cleaning lady to leave -- then found the building door locked
Committee for the Re-Election of the President Chief Counsel (CREEP) G. Gordon Liddy
arrived after a telephone call had been made and told the burglars to break a window
Hunt and Liddy serve as lookouts as three burglars entered Dr. Lewis Fielding's office
(two of the burglars, Eugenio Martinez and Bernard Barker were later arrested
in the burglary of the Democratic National headquarters at the Watergate Hotel)
Hunt telephoned Plumbers supervisor Egil Krogh to report that the burglary was a success
but they found no files on Ellsberg

JOHN EHRLICHMAN GIVE A PROGRESS REPORT TO PRESIDENT NIXON

Ehrlichman gave President Nixon a report on the activities of Egil "Bud" Krogh and the plumbers
who had been focusing most of the energy on Pentagon Paper leaker Daniel Ellsberg
while not specific, Ehrlichman spoke of "dirty tricks" -- September 8, 1971

PAUL ALLEN ENTERS WASHINGTON STATE UNIVERSITY

Allen graduated from Lakeside School and entered Washington State University -- 1971
that same year, he read about the first computer microprocessor: Intel Corporation's 4004
Allen immediately recognized the new microprocessor could read the traffic tapes directly
and eliminate the tedious manual work currently done by Lakeside students
Traf-O-Data was born to process road traffic information faster and more cheaply -- 1971
Paul Gilbert, a UW physics student, was made a partner in the new company
he assembled a working microcomputer from electrical components
Gates and Allen began developing software for computer hardware that did not yet exist

IMPACT OF THE MILITARY ON THE LOCAL ECONOMY

Job losses at Boeing continued at an unprecedented pace
101,000 employees had worked at Boeing [1968]
37,200 employees remained employed -- October 1971
Boeing workers noted with gallows humor: "**An optimist at Boeing takes his lunch to work; a pessimist parks his car with the engine running.**"⁵³⁶

WEST COAST LONGSHOREMEN RETURN TO WORK

President Nixon invoked his authority under the Taft-Hartley Act -- October 9, 1971
beginning an eighty-day "cooling-off period"⁵³⁷
International Longshoremen and Warehousemen's Union (ILWU) strikers
reluctantly returned to work
(ILWU will strike again when the Taft-Hartley injunction expires [January 17, 1972]
and will stay out for another thirty-four days before a settlement is reached [February 20])

⁵³⁶ Steven V. Roberts, *Sharp Slump at Boeing Plant Puts Seattle Economy in a Tailspin*, Special to The New York Times, March 3, 1970.

⁵³⁷ David Wilma, *Longshoremen vote to strike West Coast ports on July 1, 1971*, HistoryLink.org, Essay 3883, July 9, 2002.

CONSTRUCTION BEGINS AT THE BANGOR TRIDENT NUCLEAR SUBMARINE BASE

Construction of the \$750 million federal government project began at Bangor, Washington
land sales boomed on the Kitsap Peninsula

Peace activists were regularly arrested for scaling the base's wire fence -- November 2, 1971

FATE OF THE PIKE PLACE MARKET IS IN DOUBT

Preservationists led by architect and University of Washington faculty member Victor Steinbrueck
organized the "Friends of the Market" and collected signatures for Proposition 1

to protect the entire seventeen-acre Market District

another group, the "Alliance for a Living Market" joined the Friends

Downtown businessmen organized in opposition to saving the market

they started the ironically named "Committee to Save the Market" to oppose the initiative
and bring development to the area

Seattle voters sided with the preservationists when they passed Proposition 1 -- November 2, 1971

which saved Pike Place from developers and established an historic district

to "preserve, improve and restore the Pike Place Market"

and "prohibit alterations, demolition, or construction"

without the approval of a twelve-member commission

Throughout the 1970s, the Pike Place Market area underwent restoration and revitalization

as a "Keep the Market" campaign saved Pike Place from land developers

U.S. Senator Warren G. Magnuson turned his attention to saving the Market

for one block, \$10 million from the federal Housing and Urban Development's

"urgent needs program" provided funding

at least \$20 million was routed from Housing and Urban Development funds to the Market

(today, consumers, curious tourists and over 600 vendors once again

pack Pike Place Market stalls, creating an atmosphere of social and ethnic diversity

that makes it one of Seattle's most engaging historic places)

NATIVE AMERICANS CONTINUE TO NEGOTIATE FOR FORT LAWTON

Talks between United Indian People's Council (UIPC) and the Seattle city government
continued at a frustratingly slow pace

actual formal negotiations did not begin until [June 1971]

UIPC's persistence finally led to a formal victory -- November 1971

it was agreed that UIPC would lease twenty acres of the Fort Lawton property

for a 99-year period with options for successive 99-year leases without renegotiation

this agreement was approved, executed and incorporated [March 29, 1972]

U.S. SENATOR HENRY M. JACKSON RUNS FOR THE PRESIDENCY

Washington's U.S. Senator Henry M. "Scoop" Jackson was a Franklin Roosevelt "New Deal" liberal
throughout his long political career he remained staunchly liberal on many domestic issues:

- he saw social welfare programs as the best way to improve life for the average American;
- he strongly supported organized labor;
- he authored landmark environmental legislation;

- he held a deep commitment to civil rights
 - he strongly backed every major civil rights bill in Congress

He announced his candidacy for [1972] Democratic presidential nomination -- November 19, 1971
 in his declaration speech, “Scoop” Jackson hearkened back to his New Deal roots
 but he also expressed his stand for “law and order”
 he positioned himself to the right of Democratic front-runner Edmund S. Muskie
 and eventual nominee George McGovern

Henry Jackson was a constant advocate for increased defense spending
 and a “hardliner” against the Soviet Union

Jackson’s political positions were out of sync with large segments of the Democratic Party⁵³⁸
 he remained a defiant “hawk” and vocal supporter of the Vietnam War
 long after many Democrats had turned against the war
 he was spurned by enthusiastic young anti-war volunteers
 (who would propel South Dakota Senator George McGovern
 to become the Democratic nomination)

However, neither his election achievements at the state level
 (he never lost an election in thirteen tries)
 nor his influential insider role in the U.S. Senate
 translated into success as a presidential candidate
 although an excellent one-on-one campaigner and a master of backroom politics,
 Jackson was far less adept at speaking before large crowds or on television
 despite efforts by aides and consultants to bolster his speaking style
 other efforts to upgrade his “old fashioned and fuddy duddy” wardrobe⁵³⁹ also failed
 Jackson insisted on buying his suits off the rack from a discount store owner
 in his home town of Everett -- this typified both his loyalty and his frugality
 (Henry Jackson did not show well in the Democratic primary elections
 he finished the Florida primary election (the first race that he entered) a distant third
 that was his strongest showing outside of Washington State
 his fifth-place finish in the Wisconsin primary ended any chance of a nomination
 he did win all of Washington’s fifty-two convention delegates in his home-state party caucuses)

AMERICA SEES ITS FIRST SKYJACKING

On a dark and stormy Thanksgiving Day afternoon Northwest Orient Airlines’ Boeing 727 flight 305
 took off from Portland, Oregon bound for Seattle -- November 24, 1971
 A passenger who gave his name as Dan Cooper had bought a \$20 ticket at the last minute
 after first confirming that the aircraft was a Boeing 727 –
 a model equipped with an aft staircase⁵⁴⁰
 “D.B.” Cooper, approximately forty, was six feet tall and 175 pounds with an olive complexion

⁵³⁸ Kit Oldham, *Senator Henry Jackson announces his candidacy for president on November 19, 1971*, HistoryLink.org, Essay 9661, December 9, 2010.

⁵³⁹ Kit Oldham, *Senator Henry Jackson announces his candidacy for president on November 19, 1971*, HistoryLink.org, Essay 9661, December 9, 2010.

⁵⁴⁰ Kathrine Beck, *Dan Cooper parachutes from skyjacked jetliner on November 24, 1971*, HistoryLink.org, Essay 1997, August 30, 2011.

had brown eyes, wavy black hair with a receding hairline
he boarded the airplane wearing a dark suit with a black tie, loafers and a black raincoat
he carried an attaché case
Once aboard, he took a seat in row 18, the last row and ordered a bourbon
he passed a note in an envelope to stewardess (as flight attendants were then called)
Florence Schaffner who ignored the note until Cooper told her he thought she should read it
it said, “**Miss, I have a bomb here and I would like you to sit by me.**”⁵⁴¹
When she asked if he was kidding he opened his attaché case
to reveal what looked like red sticks of dynamite, a battery and some copper wire
Cooper said that when the plane landed in Seattle, he wanted \$200,000 in twenty dollar bills
two back parachutes and two front or reserve parachutes designed to clip to the main parachutes
he also said he wanted a refueling truck standing by on the Sea-Tac tarmac,
and he asked for meals for the flight crew
four parachutes indicated he might take a hostage with him
thus assuring all of the chutes would function properly
Florence Schaffner took the note to the cockpit
while stewardess Tina Mucklow replaced her in the seat
as they talked, Cooper looked out of the window and noted that they were over Tacoma
he had some familiarity with the area
Flight 305 was by now circling Seattle in a thunder and lightning storm
the other thirty-six passengers were unaware that the plane had been hijacked
they were told there was a mechanical problem requiring the pilot to burn off some fuel
however, on the ground authorities were scrambling
because Northwest Orient Airlines was insured, the CEO decided to pay the ransom
downtown office of the Seattle First National Bank was visited by a Seattle police detective
who collected a canvas bag with \$200,000 in twenty-dollar bills
all of serial numbers, which were non-sequential, had been recorded
two parachutes provided by a local parachute rigger were delivered to the airport by cab
two additional backup front parachutes were collected from Issaquah’s Skyport
and brought to Sea-Tac
crew meals and parachute instructions were also provided to Cooper

FLIGHT 305 REACHES SEA-TAC AIRPORT

After circling to kill time so the money, parachutes and food could be delivered
Flight 305 landed at Sea-Tac -- 5:46 p.m. November 24, 1971
Outside, snipers were lined up and authorities tried to stall the hijacker
by claiming it was too cold to refuel
Cooper used the cabin phone to the cockpit to demand that they “**get this show on the road**”⁵⁴²
While passengers were still aboard, Cooper went into the lavatory with his attaché case
he emerged with the case and a knapsack

⁵⁴¹ Kathrine Beck, *Dan Cooper parachutes from skyjacked jetliner on November 24, 1971*, HistoryLink.org, Essay 1997, August 30, 2011.

⁵⁴² Kathrine Beck, *Dan Cooper parachutes from skyjacked jetliner on November 24, 1971*, HistoryLink.org, Essay 1997, August 30, 2011.

which presumably had come from inside the attaché case
Tina Mucklow was told to leave the plane, go to the terminal
and return with the knapsack full of money
only when she returned would the passengers be allowed to leave the plane
Cooper gave additional instructions to Mucklow which she relayed to the cockpit
on her return with the cash they were going to fly to Mexico City
they must fly with the landing gear down and the flaps set at fifteen degrees
they must not fly higher than 10,000 feet to keep the cabin pressurized

ALL OF THE PASSENGERS WERE ALLOWED TO EXIT THE AIRPLANE

D.B. Cooper examined the parachutes when they were delivered
When Miss Mucklow returned with the money, Cooper was upset that the cash
had not come in the knapsack as requested but rather in the canvas bag from the bank
D.B. Cooper released all of the passengers and they quickly moved into the terminal -- November 24
but he indicated that the cabin crew and stewardess Tina Mucklow were to remain
Cooper allowed the two other stewardesses (flight attendants) to walk past him
to retrieve their purses from the back of the plane before they deplaned
Now alone in the cabin with Tina Mucklow, Cooper opened one of the reserve parachutes
and used a pocketknife cut the lines from the chute to make a handle
Cooper asked Mucklow to show him how to lower the stairs
Cooper picked up the intercom to the cockpit
he appeared completely familiar with the intercom system on the plane
he told pilot Bill Scott and co-pilot Bob Rataczak to fly toward Reno, Nevada
at less than 10,000 feet and under 200 miles per hour
Cooper ordered Mucklow to help him open the door under the fuselage
the aft ramp was lowered and the stewardess was then ordered to go to the cockpit
on her way he directed the curtain between first class and the economy cabin be pulled behind her
as she turned to do so, she saw him tying the sack with the money around his waist
that was the last anyone saw of D.B. Cooper

FLIGHT 305 TOOK OFF FROM SEA-TAC AIRPORT

Tina Mucklow and the two other crew members were in the cockpit when the plane took off
two F106 fighter jets from McChord Air Force Base were scrambled to follow the plane
in addition, two Idaho Air National Guard F102 jets were dispatched from Boise, Idaho
an Air National Guard flight instructor from Camp Murray on a night training mission
in a T-33 reconnaissance aircraft was also called into action
Five minutes out of Seattle the aft stair light went on in the cockpit -- 7:42 p.m. November 24, 1971
which meant that Dan Cooper had managed to get the aft stairs down
co-pilot Bob Rataczak called back into the cabin and Dan Cooper picked up the intercom phone
however, the conversation was brief⁵⁴³

⁵⁴³ Kathrine Beck, *Dan Cooper parachutes from skyjacked jetliner on November 24, 1971*, HistoryLink.org, Essay 1997, August 30, 2011.

D.B. COOPER LEAPS INTO THE DARK

In the vicinity of La Center, Washington,

flight crew in the airplane felt a slight bump -- 8:11 p.m. November 24, 1971

Crew members felt oscillations in the cabin⁵⁴⁴

it was minus seven degrees Celsius outside of the plane, it was dark and there was sleet and hail

Later the 727 landed in Reno, Nevada with the aft stairs down creating sparks on the runway

crew members opened the cockpit door and Captain Bill Scott crept into the passenger area

there was no one on the plane and only two parachutes remained

D.B. Cooper had bailed out over Southwest Washington

In the days and weeks to come, massive searches were conducted over the area

where the hijacker was thought to have landed, near the small town of Ariel, Washington

nothing was found

(D.B. Cooper was the first and only successful hijacker of a passenger airplane for ransom

however, some clues have surfaced over the years

operating instructions for the 727 aft stairs printed on a plastic placard were found

by a hunter thirteen miles west of Castle Rock, Washington [November 1978]

more spectacularly, three bundles of marked twenties that were part of the ransom

were found buried in the sand along the bank of the Columbia River by an 8-year-old boy

nine miles downstream from Vancouver, Washington [February 1980]

recovered cash was degraded -- experts said it could have been washed into the Columbia

from another location, or perhaps, had been moved by dredging operations

despite the offer of rewards for the marked bills, none have ever surfaced

one hundred and ninety thousand dollars of the ransom remains unaccounted)

SEATTLE'S DR. LESTER SAUVAGE ADVANCES HEART RESEARCH⁵⁴⁵

(Dr. Sauvage and other researchers had learned that the mitral valve

(which controls blood flow between the upper and lower chambers in the heart) could be repaired

but the aortic valve (which regulates blood flow from the heart into the aorta)

must be replaced

options for replacements included natural tissues from animals, human cadavers, or the patient

or artificial materials

mechanical or artificial valves last longer than those made from human or animal tissues,

but they have a greater tendency to attract blood clots)

(Sauvage and his team explored ways to prevent or at least minimize artificial valves clotting

they developed a method for using a patient's own blood to "pre-clot" artificial grafts

this minimized internal bleeding and helped promote healing after the grafts were implanted

Dr. Sauvage's team published nearly forty articles

on the healing and design of artificial arteries and heart valves)

Dr. Sauvage and his associates at Hope Heart Institute published an article that summarized

⁵⁴⁴ Kathrine Beck, *Dan Cooper parachutes from skyjacked jetliner on November 24, 1971*, HistoryLink.org, Essay 1997, August 30, 2011.

⁵⁴⁵ Cassandra Tate, *Sauvage, Lester R. (b. 1926)*, HistoryLink.org, Essay 7732, April 21, 2006.

ten years of heart research: “Prosthetic Replacement of the Aortic Valve” -- January 1, 1972
this article summarized a decade of research and stood as a standard text in the field for years

SOUTH VIETNAM FACES ITS COMMUNIST ENEMY WITH SHRINKING AMERICAN SUPPORT

United States had withdrawn much of its army from South Vietnam
only 133,000 U.S. servicemen remained -- January 1, 1972
two thirds of America’s troops had withdrawn in two years
ground war became almost exclusively the responsibility of South Vietnam
which had over 1,000,000 men enlisted in its armed forces
President Richard Nixon ordered the mining of North Vietnamese ports with informing Congress
although there was great risk to Russian and Chinese vessels

AMERICA’S SPACE SHUTTLE PROGRAM BEGINS

President Richard Nixon announced the beginning of the Space Shuttle program -- January 5, 1972
as the officially named Space Transportation System (STS) was commonly identified
This proposed Winged Space Shuttle orbiter would be launched vertically
it carried four to seven astronauts (although an eighth astronaut could be carried)
and up to 50,000 pounds of payload into low Earth orbit
space shuttle could independently move itself out of orbit and re-enter the Earth’s atmosphere
using its Maneuvering System
during descent and landing the orbiter acted as a re-entry vehicle and finally as a glider

ELECTION DIRTY TRICKS ARE PUT INTO PLAY

G. Gordon Liddy, general counsel to the Committee for the Re-Election of the President (CREEP)
presented a campaign intelligence plan to spend \$250,000 for an intelligence gathering operation
to Richard Nixon’s U.S. Attorney General John Mitchell, White House Counsel John Dean
and CREEP’s Acting Campaign Chairman Jeb Stuart Magruder that involved
extensive illegal activities to be carried out against the Democratic Party
Mitchell viewed the plan as unrealistic -- January 1972

SEATTLE VOTERS KILL THE PROPOSED R.H. THOMPSON FREEWAY

Plans for R. H. Thomson Expressway dated from the [1950s] as part of a “ring road” system
around downtown Seattle to connect with Interstate-5
Seattle voters in a special election voted to kill the proposed freeway system -- February 8, 1972
Seattle was left with an inadequate freeway through the heart of the city

PRESIDENT RICHARD NIXON GOES TO CHINA

As a congressman and member of the House Un-American Activities Committee,
Richard Nixon rose to prominence as a hard-liner anti-Communist
he accused the administration of Harry Truman of “losing” China to the Communists [1949]
there is no small irony that Nixon would be responsible for establishing friendly relations
with the People’s Republic of China some twenty years later
President Richard Nixon visited the People’s Republic of China -- February 21-28, 1972
this visit was the first time a U.S. president had visited Communist China

which at that time considered the U.S. one of its staunchest foes
Nixon's visit opened the door to normalizing relations between the United States and China

BILL GATES AND PAUL ALLEN MAINTAIN THEIR PARTNERSHIP

Allen and Gates purchased the next generation of Intel's 4004 chip, the 8008, for \$360 -- 1972
they used the chip to develop a computer that conducted traffic volume count analysis
but their goal was to sell not just the analysis but also computers to city traffic departments
sadly for them, the State of Washington offered free traffic processing services to cities
which ended the need for private contractors and traffic counting computers
Allen and Gates eventually abandoned *Traf-O-Data*, but applied the technology to their next venture
(they both took jobs at TRW, Inc. in Vancouver, Washington
where they used minicomputers to distribute power from hydroelectric dams [1973])

CRAIG McCAW OPERATES HIS CABLE TELEVISION BUSINESS IN CENTRALIA

After graduating from Stanford, Craig set about expanding the family's cable investments -- 1972
he borrowed money against the Centralia cable television system
to buy other small cable operations in remote areas
he improved programming, raised rates to subscribers and cut costs to the company
(In the next few years, Craig's strategy for the cable operation paid off
as revenues quadrupled and the cash flow increased eight-fold
he added a paging business to the company
McCaw Communications, Inc., grew
to become the twentieth largest cable network in the U.S.)

COALITION AGAINST OIL POLLUTION (CAOP) IS FORMED

Alaska's Northern Tier Pipeline Company planned to bring supertankers
to Anacortes and Cherry Point in northern Puget Sound
Coalition Against Oil Pollution (CAOP), a non-partisan organization,
was formed to protect the waters of Puget Sound in Washington State -- 1972
individual and organization members were opposed to opening oil ports on Puget Sound
that would connect with the Alaskan Northern Tier Pipeline
CAOP had the support of the Washington Environmental Council and claimed to have support
from environmentalists, tourist industry representatives and commercial fishermen
CAOP constantly pushed for oil tankers to unload their crude oil at or west of Port Angeles
Development of supertankers in the [1960s] and [1970s] aggravated the situation
CAOP's data showed that these large ships not only spilled more oil
but also were more prone to accidents

PLAN TO BREAK INTO DEMOCRATIC NATIONAL CAMPAIGN HEADQUARTERS IS MADE

Members of the Committee for the Re-Election of the President (CREEP) again proposed a plan
that involved burgling the Democratic National Committee's (DNC) headquarters
at the Watergate Hotel Complex in Washington, D.C. and placing telephone wiretaps
U.S. Attorney General John Mitchell approved a version of the plan
two months after the [January 1972] meeting -- March 1972

G. Gordon Liddy, general counsel of CREEP was put in charge of the operation
he was assisted by former CIA Agent E. Howard Hunt
and CREEP Security Coordinator James McChord
John Mitchell resigned as U.S. Attorney General to become chairman of CREEP

EQUAL RIGHT AMENDMENT TO THE U.S. CONSTITUTION PASSES CONGRESS

(An effort to introduce a constitutional amendment to assure equal rights for women
was originally drafted by suffragist and activist Alice Stokes Paul [1923]

her proposed constitutional amendment read: **“Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.”**

little notice was paid to the proposal)

President Lyndon Johnson had issued Executive Order 1137 [October 13, 1967]

which expanded the [1964] Civil Rights Act to cover discrimination based on gender
as a result, federal agencies and contractors were required to ensure that women
enjoyed the same educational and employment opportunities as males
however, this applied only to the federal government)

The Equal Rights Amendment (ERA) was passed by Congress -- March 22, 1972

Section 1. Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex.

Section 2. The Congress shall have the power to enforce, by appropriate legislation, the provisions of this article.

Section 3. This amendment shall take effect two years after the date of ratification.

ERA was sent to the states for ratification

thirty-eight states were needed to reach the required three-quarters majority of states necessary

LARGE TORNADO STRIKES VANCOUVER WASHINGTON

Cold air began moving inland from the Pacific Ocean and collided with warm air

in Oregon’s Willamette Valley and the coastal mountains⁵⁴⁶ -- Wednesday morning April 5, 1972

A squall line formed between Eugene and Newport, Oregon

it gained strength as it moved north-northeast -- by noon, the squall line had reached Portland

Storm continued to intensify as it moved north through Portland, and just before 12:50 p.m.,

observers south of the Columbia River noted a sudden and dramatic increase in the winds

startled witnesses watched the storm move north across the Columbia River

sucking up water as it moved -- no one in Vancouver had any idea of what was coming

When the storm reached the McLoughlin Heights neighborhood about a mile north of the river

it blew down at least a half mile of transmission lines and sent showers of blue sparks into the air

two homes were demolished and twenty-five others were damaged

Students at Peter Skene Ogden Elementary School were just ending their noon recess

many of the 541 pupils had come in from the playground

to escape the rain and golf-ball-sized hail that suddenly begun falling

some stood near their classroom windows watching the storm

⁵⁴⁶ Phil Dougherty, *A severe tornado strikes Vancouver, Washington, killing six and injuring more than 300, on April 5, 1972*, HistoryLink.org, Essay 8099, February 25, 2007.

as the wind began carrying flying debris, teachers moved students to the west side of the building
school staff were forced to move the students when the wind shifted
flying objects went over the top and around the huddled youngsters
but nothing seemed to touch them

Once the storm passed, students from the high school raced to the now-demolished elementary school
they helped dig the younger students out of the wreckage
at least seventy students from Ogden school were injured -- none were killed by the tornado

The storm next struck at Sunrise Bowling Alley a few blocks northeast of the school
collapsing the south wall killing a 31-year-old woman

Flying timbers and debris sailed across the street from the bowling alley
into the Waremart Discount Store parking lot
a woman and her two young children were sitting in their parked car were killed
when the front wall of the 48,000-square-foot store, collapsed
two people inside also were killed

Twenty ambulances from Clark County and from Portland converged on the damaged areas
these were assisted by four Army National Guard and two Air Force Reserve helicopters
injured were taken to St. Joseph's Hospital and Vancouver Memorial Hospital
(rescuers remained on the scene throughout the afternoon and into the evening
searching the ruins with their bare hands to insure no one remained trapped in the rubble)

Tornado continued on its north-northeast track for nine miles reaching Brush Prairie, Washington
but there was little damage except in Vancouver

Vancouver's tornado was classified as a category F3 or severe tornado with 158-206 mph winds
property damage exceeded \$5 million
it had the dubious distinction of being the deadliest tornado recorded in the United States in 1972
six people were killed and at least 304 were injured seriously enough to be taken to hospitals
(today it remains the deadliest tornado in Washington state history)

LATINO MOVIMIENTO ESTUDIANTIL CHICANO DE AZTLAN (MEChA) EXPANDS

Numerous Movimiento Estudiantil Chicano de Aztlan (MEChA) chapters
emerged in Washington state including groups in the Columbia Basin,
Seattle Central Community College, Central Washington University,
A.C. Davis High School in Yakima and in various other communities throughout the 1970s⁵⁴⁷

Students organized the first statewide MEChA Conference at Yakima Valley College -- April 1972
this conference resulted in a statewide board authorized to facilitate communication
among all MEChA chapters in Washington
(Chicanos near the Spokane area waited until [1977]
to organize at Eastern Washington University which affiliated with MEChA [1978])

MEChA was much more than a political action group as its efforts included a focus
on social and cultural matters, as well as its educational and political objectives
it often sponsored celebrations and other social events to meet the needs of students

⁵⁴⁷ Oscar Rosales Castaneda, Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s, HistoryLink.org, Essay 7922, October 21, 2007.

who were often far removed from their respective communities⁵⁴⁸
MEChA chapters also sponsored lecture and film series, rap sessions, food and clothing drives,
dances and numerous Latino festivities and workshops
MEChA invited national leaders to college campuses to talk to students
about events taking place in other parts of the country
speakers included Cesar Chavez and Dolores Huerta of the United Farm Workers of California
as well as various other guests such as artists and poets

APOLLO XVI GOES TO THE MOON

Due to a technical problem this lift off was delayed one month (from [March 17])
Command/Service Module *Casper* blasted off from the Kennedy Space Center -- April 16, 1972
carrying Commander John Young, Command Module Pilot Ken Mattingly
and Lunar Module *Orion* Pilot Charles Duke

APOLLO XVI LUNAR LANDING IS SUCCESSFUL

After waking up on flight day four, the crew began preparations for the maneuver
that would slow the spacecraft into orbit around the Moon
Astronauts John Young and Charles Duke ate breakfast -- April 21, 1972
before they began preparations for their first moonwalk of the mission
they donned and pressurized their spacesuits
and depressurized the Lunar Module *Orion*'s cabin
Astronauts' first task of the moonwalk was to unload Boeing's Lunar Roving Vehicle
along with other equipment, from the Lunar Module
they set up a television camera and planted a flag of the United States
John Young and Charles Duke spent just under three days on the lunar surface
they carried out three spacewalks and drove the Lunar Roving Vehicle 16.6 miles
they collected 211 pounds of lunar samples to be returned to Earth
After Young and Duke rejoined Mattingly in lunar orbit,
the crew released a sub-satellite from *Casper*
Command Module Pilot Ken Mattingly performed a "deep-space" spacewalk
while he was outside of the spacecraft he retrieved several film cassettes
from the exterior of the Command/Service Module *Casper*

SPLASHDOWN OF APOILLO XVI IS SUCCESSFUL

Command Module *Casper* splashed down in the Pacific Ocean
220 miles southeast of Christmas Island
spacecraft and its three-person crew were retrieved by the USS *Ticonderoga* -- April 27, 1972

MAJOR OFFENSIVE, OPERATION *LINEBACKER*, IS LAUNCHED AGAINST NORTH VIETNAM

In an effort to drive the
Operation "*Linebacker*" began with large-scale bombing operations against North Vietnam

⁵⁴⁸ Oscar Rosales Castaneda, Chicano Movement in Washington: Political Activism in the Puget Sound and Yakima Valley Regions, 1960s-1980s, HistoryLink.org, Essay 7922, October 21, 2007.

by tactical fighter aircraft of the Seventh Air Force -- May 10-[October 23], 1972
by the end of the May American aircraft had destroyed thirteen bridges
along the rail lines running from Hanoi to the Chinese border
another four were destroyed between Hanoi and Haiphong Harbor
targets were then switched to petroleum and oil storage tanks, transportation networks
and North Vietnamese airfields
air defense systems also were systematically attacked
Linebacker missions included the first widespread use of precision-guided munitions
After the South Vietnamese Army with American air support
had blunted a massive North Vietnamese invasion
Vietnam conflict became the central issue in the 1972 Presidential election

FIRST TEACHERS' STRIKE IN THE STATE TAKES PLACE IN ABERDEEN⁵⁴⁹

Sharp declines in funding from the State Legislature led local school board members
to make drastic cuts in the number of teachers that would be hired
this led to large increased in class sizes
Washington Education Association (WEA) represented most of the state's union organized teachers
each school district maintained a local association affiliated with the WEA
In accordance with the [1965] Professional Negotiations Act of Washington State
and the Public Employees Collective Bargaining Act [1967]
Aberdeen Education Association (AEA) held meetings to discuss a set of proposals
to be given to school district administrators and the school board
these proposals covered salary, class size reduction, health insurance,
planning time and more
At this time the Aberdeen School District superintendent wanted to replace many teachers
with non-certificated aides who would be supervised by a few administrator-selected teachers
teachers saw this as an insult to their professional dignity
as talks drug on without progress, teachers reached the breaking point
Aberdeen K-12 teachers voted to strike -- the first teacher strike in the state -- May 11, 1972
Grays Harbor area was a strong union center with a long history of labor activity
but some people thought of teachers as professionals who should not be allowed to strike
many other supported their teachers' efforts
when Grays Harbor labor union leaders met with Aberdeen teacher strike leaders
they recognized these were familiar issues that labor had long been fighting to achieve
it was also noted that there was no alternative for teachers but to capitulate
when the situation became clear, many labor union members came to support the strike
by keeping their kids home from school
Aberdeen School District broke the strike by obtaining a court injunction
from Grays Harbor Superior Court that ordered teachers back to work
Aberdeen teachers, collectively, were unwilling to defy the injunction
after three days on the picket line they returned to work without a contract -- May 14, 1972
but a commitment to continue collective bargaining had been achieved by the teachers

⁵⁴⁹ Steve Kink, *Teacher Strikes in Washington*, HistoryLink.org, Essay 9763, March 22, 2011.

ISSUES IN THE ABERDEEN SCHOOL DISTRICT REMAINED UNRESOLVED⁵⁵⁰

Governor Dan Evans appointed a Blue Ribbon Committee to attempt to resolve the Aberdeen conflict
committee members included the State Superintendent of Public Instruction, administrators
and teachers from other districts

their findings sided with the teachers on most of the unresolved issues

Pressure on the school district from the committee's findings, teachers and the public
finally resulted in an agreement between the district and the Aberdeen Education Association

In the end, the strike was a success because it brought about intense pressure
that forced the school district to deal with the major issues that had been in dispute

Aberdeen teachers finally had a true voice in their work environment

school boards and administrators had been put on notice that teachers were serious
about influencing decisions that impacted education beyond their own classrooms

Aberdeen broke the ice

they did not achieve all of their goals but they illustrated to the rest of the state's educators
that there was a new path available to seek a level playing field in the bargaining process

BREAK IN AT THE DEMOCRATIC NATIONAL CAMPAIGN (DNC) HEADQUARTERS

G. Gordon Liddy, general counsel of the Committee for the Re-Election of the President (CREEP),
and former CIA agent E. Howard Hunt arranged to install bugging equipment

in the office at the Democratic National Committee headquarters at the Watergate Hotel
First attempt to break into the Watergate Complex failed -- May 17, 1972

DEMOCRATIC NATIONAL CAMPAIGN (DNC) HEADQUARTERS IS BROKEN INTO

Committee for the Re-Election of the President (CREEP) carried out its plan -- May 28, 1972

Republican campaign counsel G. Gordon Liddy

and CIA Agent and electronics expert James W. McCord and their team

placed wiretaps on the telephones of DNC Chairman Lawrence O'Brien

and Executive Director of Democratic States' Chairman R. Spencer Oliver, Jr.

When CREEP's Acting Campaign Chairman Jeb Stuart Magruder

and John Mitchell, the chairman of CREEP read transcripts from the wiretaps

they deemed the information inadequate and ordered another break-in

ANOTHER BREAK-IN AT THE DEMOCRATIC NATIONAL CAMPAIGN HEADQUARTERS

Five men were apprehended inside the Democratic National Committee headquarters complex
located in the Watergate Hotel -- June 17, 1972

Virgilio González, Bernard Barker, Eugenio Martínez, Frank Sturgis and James McChord, Jr.

McChord was Security Coordinator for the Committee for the Re-Election of the President

All five burglars were charged with attempted burglary

and attempted interception of telephone and other communications

Watergate burglars implicated themselves on other counts and charges

by voluntarily telling investigators about having attempted and committed previous break-ins

⁵⁵⁰ Steve Kink, *Teacher Strikes in Washington*, HistoryLink.org, Essay 9763, March 22, 2011.

EVIDENCE OF THE WATERGATE BREAK-IN IS DESTROYED

Physical evidence that might have corroborated the testimony of the Watergate burglars was destroyed by the Committee for the Re-Election of the President (CREEP) including:

- General Counsel for CREEP G. Gordon Liddy,
- CREEP's Acting Campaign Chairman Jeb Stuart Magruder,
- Presidential Counsel John Dean

also acting head of the FBI, L. Patrick Gray was involved destroying evidence (he later resigned after he admitted he had destroyed evidence that had been taken from the safe of CIA Agent E. Howard Hunt)

DEMOCRATIC LEADER AND MEDIA OWNER SAUL HAAS DIES

Saul Haas was a self-educated complex and contradictory character who was variously described as brilliant, irascible, compassionate and ambitious

he was seen as a benevolent despot -- or sometimes not so benevolent⁵⁵¹ occasionally a controversial political activist and pioneering broadcaster

Haas managed two successful campaigns for U. S. Senator Homer T. Bone before returning to Seattle as the Collector of Customs

Haas and Bone together mentored up-and-coming politician Warren G. Magnuson Haas served as state director of the Democratic National Campaign Committee and built KIRO into a powerful radio station

he was appointed to the Corporation for Public Broadcasting's (PBS) first board of directors Saul Haas and his wife created the Saul and Dayee G. Haas Foundation [1963]

when he found that some students at Seattle's Garfield High School were handicapped by the lack of eyeglasses, uniforms, testing or tutoring fees, field trips, or athletic shoes (this foundation has disbursed more than \$7 million to public secondary schools in Washington it now helps more than 12,000 students a year)

Saul Haas passed away -- June 21, 1972

PRESIDENT NIXON DENIES ANY WHITE HOUSE ROLE IN THE BREAK-IN

President Nixon told a gathering of reporters regarding the Watergate burglary

"The White House has had no involvement in this particular incident."

Washington Post reporters Carl Bernstein and Bob Woodward find the phrasing **"this particular incident"** interesting

TITLE IX IS PASSED BY CONGRESS

Title IX is a portion of the Education Amendments of 1972 -- June 23, 1972

it states in part: **"No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance...."**

Title IX forbids sex discrimination in all university student services and academic programs including, but not limited to, admissions, financial aid, academic advising, housing, athletics,

⁵⁵¹ Frank Chesley, Haas, Saul (1896-1972), HistoryLink.org, Essay 5632, January 07, 2004.

recreational services, college residential life programs, health services, Registrar's office, counseling and psychological services, classroom assignments, grading and discipline
Title IX also forbids discrimination because of sex
in employment and recruitment consideration or selection whether full time or part time
under any education program or activity operated by an institution receiving or benefiting from federal financial assistance

WHITE HOUSE NEEDS MONEY TO PAY OFF THE WATERGATE BURGLARS

White House counsel John Dean met with the deputy director of the CIA Vernon Walters to ask the agency to provide “financial assistance” for the five Watergate burglars when CIA director Richard Helms heard of the request he refused Dean’s request
Dean informed Presidential Aide Frederick LaRue and two campaign associates, Committee for the Re-Election of the President (CREEP) Chairman John Mitchell, and Republican Party official Robert Mardian,
of the problem raising money for the Watergate burglars -- June 26, 1972

WATERGATE BURGLARS ARE A THREAT TO THE WHITE HOUSE

President Nixon told his Chief of Staff H.R. “Bob” Haldeman
that Watergate burglars would need money
president’s advisors met to raise \$75,000 for hush money
Presidential Counsel John Dean met with the president’s personal attorney, Herbert W. Kalmbach,
Dean told Kalmbach that Presidential Chief of Staff H.R. “Bob” Haldeman
and Counsel and Assistant to the President John Ehrlichman
and former U.S. Attorney General John Mitchell
all wanted Kalmbach to raise money for the Watergate burglars -- June 29, 1972
Watergate burglars expected to receive money for bail, legal expenses and family support
Finance Chairman for the Committee for the Re-Election of the President (CREEP)
Maurice Stans gave Presidential Aide Frederick LaRue \$75,000 later that day
of that money, Watergate “plumber” E. Howard Hunt’s attorney William Bittman
received \$25,000 -- Dorothy Hunt asked for an additional \$450,000
White House courier Anthony Ulasewicz delivered \$53,000 to Dorothy Hunt
and \$29,000 to Presidential Aide Frederick LaRue
(this money was delivered over the next few months)
The Washington Post reported a \$25,000 cashier's check intended for (CREEP)
had been found in the bank account of a Watergate burglar

STATE DEMOCRATIC CONVENTION SUPPORTS ITS “FAVORITE SON” FOR PRESIDENT

Washington’s U.S. Senator Henry Jackson was running for the presidency
at the State Democratic Convention he lashed out at the “kooks” and “extremists”
who were protesting the war -- many delegates at the convention fit that description
these Democrats supported Democratic presidential nominee George McGovern
not Henry M. Jackson
even so, the state convention gave their delegates to the National Democratic Convention
to Henry M. “Scoop” Jackson

Nixon's opponent, Democrat George McGovern, campaigned on a platform of withdrawal
Nixon's campaign portrayed McGovern's policies as out of the main stream
in the meantime, National Security Adviser Henry Kissinger
continued to conduct secret negotiations with North and South Vietnam

MALCOLM STAMPER BECOMES THE PRESIDENT OF THE BOEING COMPANY

Malcolm Stamper was elevated from his position as director of the 747 program
to president of the Boeing Company
(he served as a member of the board of the directors from 1972 until [1985]
when he became vice chairman of the board)
Although the Supersonic Transport project was dead
the company went ahead with other profitable efforts: 737, 747, 757, 767
Stamper and the 747 both was a huge successes by the late 1970s
Boeing began to rebound financially
Stamper was one of only a dozen U.S. corporate executives to earn over a million dollars

PRESIDENT NIXON ANNOUNCES THE RESULTS OF A WHITE HOUSE INVESTIGATION

President Nixon announced that White House counsel John Dean
had conducted an investigation into the Watergate affair
Dean had found that no one from the White House was involved -- August 30, 1972

CITY OF SEATTLE TAKES OVER FORT LAWTON⁵⁵²

Fort Lawton, abandoned by the military, had been requested by several groups
Native Americans claimed the old fort under tribal treaty rights
that stated abandoned property would be returned to the original owner
Seattle Public Schools requested buildings for education purposes
other requests came from King County, the U.S. Navy, and the U.S. Coast Guard
and the Audubon Society
Federal government offered 425.75 acres of Fort Lawton property to Seattle for use as a park [1971]
many people thought the park should be named Fort Lawton Park to recall the post
others preferred the name Discovery Park to recall Captain George Vancouver
and his exploration of Puget Sound on his ship *Discovery* [1792]
Discovery Park was dedicated -- September 1, 1972
as 391 acres of Fort Lawton was transferred to the City of Seattle to provide open tranquil spaces
offering a natural refuge of meadows, forests, wildflowers, tidal beaches, birds and animals
also, access would be provided to the West Point lighthouse -- the oldest on Puget Sound
U.S. Army Reserve would be allowed to move into a military-retained section of post
called the 500 Area after the more than 500 World War II temporary buildings built there

TERRORISTS STRIKE THE OLYMPIC GAMES IN MUNICH, GERMANY

Eight members of "Black September" terrorist group wearing tracksuits and carrying duffel bags
loaded with AKM assault rifles, Tokarev pistols and grenades scaled a six foot chain-link fence

⁵⁵² Duane Colt Denfeld, Ph.D., *Fort Lawton to Discovery Park*, HistoryLink.org, Essay 8772, September 23, 2008.

Once inside, they used stolen keys to enter two apartments being used by the Israeli Olympic team wrestling and weightlifting coaches in the first apartment were surprised and captured entering another apartment, six wrestlers and weightlifters were taken as additional hostages -- September 5, 1972

As the intruders returned to the first apartment with their hostages, Israeli wrestling coach Moshe Weinberg knocked one of the intruders unconscious and slashed another with a fruit knife before he was shot and killed

Terrorists were reported to be Palestinians from refugee camps in Lebanon, Syria and Jordan they demanded 234 Palestinians and non-Arabs jailed in Israel be released and taken to Egypt terrorists threw Weinberg's body out the front door of the apartment to demonstrate their resolve Israel's response was immediate and absolute -- there would be no negotiation

The hostage situation presented an extremely difficult political situation for the German government because the hostages were Jewish

Germans offered the Palestinians an unlimited amount of money for the release of the athletes as well as the substitution of high-ranking Germans for the hostages however, the kidnapers refused both offers

Elsewhere in the village athletes carried on as normal, seemingly oblivious of events unfolding nearby

Olympic Games continued until mounting pressure on the International Olympic Committee forced a suspension of activities some twelve hours after the first participant had been murdered

GERMAN POLICE ATTEMPT TO RESPOND TO THE SITUATION

Small squad of German border police was dispatched to the Olympic village -- September 5, 1972 dressed in Olympic sweat suits and carrying sub-machine guns they were poorly trained and without specific operational plans in place for the rescue police took up positions awaiting orders that never came

Television camera crews filmed the police and broadcast the images live on television kidnapers were able to watch the police as they prepared to attack footage showed the kidnapers leaning over to look at the police in the end, the police left the premises

Negotiators demanded direct contact with the hostages to satisfy themselves the Israelis were still alive two hostages were brought to an apartment window

Kidnapers issued a new dictate demanding transportation to Cairo, Egypt -- 6 p.m. Munich time

PLANS ARE PUT INTO PLACE TO AMBUSH THE TERRORISTS

German authorities feigned agreement to the Cairo demand although Egyptian Prime Minister Aziz Sedki had already told the German authorities that the Egyptians did not wish to become involved in the hostage crisis a bus arrived to carry the hostages and gunmen to two military helicopters which were to transport them to a nearby NATO airbase -- 10:10 p.m. September 5, 1972 during the transfer from the bus to the helicopters it was discovered that there were eight terrorists Five German snipers in a third helicopter preceded the "Black September" members and hostages

these men had been chosen to ambush the kidnapers
A Boeing 727 jet was positioned on the tarmac
with five or six armed German police inside dressed as the flight crew
plan was that the Germans would overpower the terrorists as they boarded
giving the snipers a chance to kill the remaining gunmen at the helicopters
At the last minute, as the helicopters were arriving, the German police aboard the airplane
voted to abandon their mission -- without consulting the central command
this left only the five sharpshooters to try to overpower a larger and more heavily armed group
One of the German snipers took a shot -- but due to the poor lighting he missed
German authorities gave the order for all snipers positioned nearby to open fire -- 11:00 p.m.
two of the kidnapers were killed as the others scrambled to safety and returned fire
hostages, who were tied up inside the helicopter, could not escape

OLYMPIC HOSTAGE CRISIS ENDS IN A MASSCRE

German armored personnel carriers arrived -- midnight September 6, 1972
seeing the balance of power shift, the terrorists fired at the hostages from point-blank range
one of attackers then pulled the pin on a hand grenade and tossed it into the helicopter cockpit
ensuing explosion destroyed the helicopter and incinerated the bound Israelis inside
another terrorist shot and killed the remaining hostages in the second helicopter
Two of the "Black September" members were killed -- three others lay on the ground
another escaped but was discovered and killed forty minutes later
Jim McKay, who was covering the Olympics for ABC received the official confirmation -- 3:24 a.m.
he reported to the world: **"When I was a kid, my father used to say 'Our greatest hopes and our worst fears are seldom realized.' Our worst fears have been realized tonight. They've now said that there were eleven hostages. Two were killed in their rooms yesterday morning, nine were killed at the airport tonight. They're all gone."**⁵⁵³

MANDATORY BUSING OF SEATTLE MIDDLE SCHOOL STUDENTS BEGINS

Seattle School District implemented a mandatory busing plan to achieve racial balance
in selected middle schools on the first day of school -- September 6, 1972
Initially, about 1,200 middle school students were bused away from their neighborhoods⁵⁵⁴
to integrate one school in the predominately black Central Area
and three schools in the predominately white North End of Seattle
about half the students had volunteered for the ride -- the rest were mandatory transfers
(Howls of indignation from white residents resulted in the gathering of enough signatures on petitions
to trigger a recall election targeting four School Board members
who had voted for the plan [1973]
however, the recall attempt failed -- but by a margin of less than one percent)

FEDERAL GRAND JURY ISSUES CHARGES IN THE WATERGATE BREAK-IN

⁵⁵³ Americansportscastersonline.com. <http://www.americansportscastersonline.com/mckay5questions.html>. Retrieved April 10, 2012.

⁵⁵⁴ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 5, 2002.

Virgilio González, Bernard Barker, Eugenio Martínez, Frank Sturgis and James McChord, Jr. Security Coordinator for the Committee for the Re-Election of the President (CREEP) indicted for conspiracy, burglary and violation of federal wiretapping laws -- September 15, 1972
Former CIA Agent E. Howard Hunt and General Counsel of CREEP G. Gordon Liddy also were indicted for conspiracy, burglary and violation of federal wiretapping laws
The Federal Bureau of Investigation (FBI) connected cash found on the burglars to a slush fund used by the Committee for the Re-Election of the President

METRO TRANSIT IS CREATED IN KING COUNTY

King County voters had rejected Metro transit plans in [1958], [1962], [1968] and [1970] voter attitudes toward a transportation system began to shift -- 1972
King County voters approve a 0.3 percent sales tax to fund a county-wide bus system operated by Metro (the Municipality of Metropolitan Seattle) -- September 19, 1972 on the same ballot, Seattle voters reject a second initiative to convert all city buses to electric trolleys to be operated by City Light⁵⁵⁵

SECRET REPUBLICAN CAMPAIGN FUND IS UNCOVERED

Washington Post reporters Bob Woodward and Carl Bernstein reported that John Mitchell while serving as Attorney-General controlled a secret Republican fund used to finance widespread intelligence-gathering operations against Democrats -- September 29, 1972
Woodward and Bernstein reported that Donald Segretti was hired by the White House to run a campaign of “dirty tricks” to sabotage the Democratic Party
Segretti was paid \$20,000 a year by personal attorney to the President Herb Kalmbach using Committee for the Re-Election of the President (CREEP) funds

WASHINGTON PUBLIC POWER SUPPLY (WPPSS) EXPANDS ITS CONSTRUCTION EFFORTS

WPPSS started construction on two additional nuclear reactors
Plant 1 at Hanford and Plant 3 at Satsop near Elma in Grays Harbor County -- 1972 (Plant 2 was already under construction at Hanford [1971])
cost of the project was to be paid by the sale of the power to consumers
Tacoma City Light joined in the construction of nuclear power plants 1 and 3
WPPSS planned Plant 4 at Hanford and 5 at Satsop which would be “twinning” with plants 1 and 3 this way the experience and resources from the first plants would benefit the twin plants thus keeping cost down for Public Utility Districts (PUDs)

VIETNAM PEACE TALKS CAN NOT ACHIEVE PEACE

Secretary of State Henry Kissinger was put in charge of peace talks
he came close to agreeing to a formula to end the war -- October 1972
negotiated plan was that U.S. troops would withdraw from Vietnam
in exchange for a cease-fire and the return of 566 American prisoners held in Hanoi
it was also agreed that the governments in North Vietnam and South Vietnam

⁵⁵⁵ Walt Crowley, *King County voters approve creation of Metro Transit on September 19, 1972*, HistoryLink.org, Essay 1998, January 1, 2000.

would remain in power until new elections could be arranged to unite the whole country
This agreement rapidly unraveled because while U.S. troops would leave South Vietnam,
North Vietnamese troops could remain in their positions in the south
In an effort to put pressure on North Vietnam to withdraw its troops,
President Richard Nixon ordered a new series of air-raids on Hanoi and Haiphong Harbor

SEATTLE'S ABANDONED BEACON HILL SCHOOL IS OCCUPIED BY LATINO ACTIVISTS

Many services provided for Seattle's Chicano/Latino community were scattered throughout the city
decentralization made it difficult for many who sought services to obtain them⁵⁵⁶
economic recession of the early seventies saw many programs sent to the chopping block
one such service was an English as a Second Language program in the south end of Seattle
that had a social justice component
most of the activists were the faculty, staff, and students of the program
who had been negotiating with the city government to obtain the building
Frustration with the slow pace of the negotiations led to activists asking to tour the building
Seattle School District's building inspector allowed the group in
Roberto Maestas then announced they were not going to leave -- October 12, 1972

WASHINGTON'S SENATOR WARREN G. MAGUSON SPONSORS ENVIRONMENTAL LAWS

U.S. Senator Warren G. Magnuson was disgusted with private entrepreneurs
who rounded up Puget Sound orcas for sale to exhibitors
He sponsored the Marine Mammal Protection Act of 1972
which passed Congress -- October 21, 1972
this landmark marine environmental bill was the first act of Congress to call specifically
for an ecosystem approach to natural resource management and conservation
Senator Magnuson also sponsored the Coastal Zone Management Act of 1972
that required states to adopt management programs to preserve, protect, develop
and restore or enhance the resources of the Nation's coastal zone
for this and succeeding generations

CONSTRUCTION OF SEATTLE'S KINGDOME DRAWS PROTESTORS

Official groundbreaking ceremonies to mark the start of construction on the domed stadium
were held -- November 2, 1972
in attendance were about twenty-five young Asian protesters who hurled mudballs at dignitaries
and booed speakers to show their disapproval of the location in their neighborhood
several hundred other spectators watched as County Executive John Spellman's speech
drew chants of "Stop the Stadium!"
Spellman hastily planted the gold home plate on the field, but the ceremony was a bust

NEGOTIATIONS WITH BOTH NORTH AND SOUTH VIETNAM PROVE FUTILE

(After the South Vietnamese Army had blunted a massive North Vietnamese invasion

⁵⁵⁶ Oscar Rosales Castaneda, *Chicano/Latino Activism in Seattle, 1960s-1970s*, HistoryLink.org, Essay 8013, November 24, 2006.

launched in the [spring 1972] Vietnam conflict had been the central issue
in the 1972 Presidential election)

Nixon's opponent, Democrat George McGovern, campaigned on a platform of withdrawal
Nixon's campaign portrayed McGovern's policies as out of the main stream
in the meantime, National Security Adviser Henry Kissinger
continued to conduct secret negotiations with North and South Vietnam

ELECTION RESULTS MADE LITTLE CHANGE AT ANY LEVEL

President Richard M. Nixon and Vice President Spiro T. Agnew were returned to office
in a landslide victory over Democratic Senator George McGovern and R. Sargent Shriver
Nixon won the electoral votes of Washington State and every other state except Massachusetts
and the District of Columbia -- November 7, 1972

Moderate Republican Governor Dan Evans won an unprecedented third consecutive term in office
defeating former Democratic Governor Albert Rosellini 50.78 percent 42.82 percent
last-minute newspaper allegations linking Rosellini to organized crime hurt his campaign
although the allegations were never proven
(fellow Republican Arthur B. Langlie was to date the only other Washington governor
who won three terms -- but these were not consecutive)

Washington's delegation in Congress saw only one change
neither U.S. Senator Warren G. Magnuson nor Henry M. Jackson were up for reelection
although Jackson had entered the Democratic primary election campaign for the presidency
all six of Washington's Democratic Congressional members were reelected
in the First Congressional District ten-term Republican U.S. Representative Thomas M. Pelly
was replaced by Republican Joel Pritchard (who served six terms in office [1973-1985])
Legislative elections saw two additional Democrats elected to the State Senate for a 31-18 majority
in the state House of Representatives Democrats regained the majority 57-41

WASHINGTON VOTERS ADDRESSED A LONG LIST OF BALLOT ISSUES

Voters approved several proposals, including two landmark provisions⁵⁵⁷ -- November 7, 1972

Equal Rights Amendment to the state constitution passed by a slender margin
this constitutional amendment prohibited discrimination on the basis of sex
in all areas of public life

Washington is one of only nine states to pass such an amendment
it took three weeks to certify the results: 50.52 for to 49.48 percent against
(Congress passed an Equal Rights Amendment to the United States Constitution
on [March 22, 1972] but the states failed to ratify it)

Initiative 276, landmark Public Disclosure Act, passed by a much wider margin -- 72 to 28 percent
this Act mandated disclosure of campaign financing, lobbying, and public officials' finances
it also made almost all government records available to the public on request,
with stiff financial penalties for agencies that did not respond fully to requests

⁵⁵⁷ Kit Oldham, *President Richard Nixon, Governor Dan Evans, and six U.S. Representatives win re-election on November 7, 1972*, HistoryLink.org, Essay 7332, May 27, 2005.

WATERGATE COVERUP REACHES A CRISIS

E. Howard Hunt telephoned Special Counsel to the President and “dirty trickster” Charles Colson to demand additional money for the Watergate burglars -- November 25, 1972
President Richard Nixon, Charles Colson, Presidential Chief of Staff H.R. “Bob” Haldeman and Counsel and Assistant to the President John Ehrlichman met at Camp David to discuss Hunt’s latest blackmail threat
President Nixon called CIA Director Richard Helms to Camp David to demand his resignation because of his knowledge of the cover-up and refusal to be a co-conspirator

FEDERAL SEVENTH CIRCUIT COURT REVERSES CONVICTIONS OF THE CHICAGO FIVE

Convictions of Abbie Hoffman, Jerry Rubin, David Dellinger, Tom Hayden and Rennie Davis for contempt of court were overturned by a Federal Appeals Court -- November 21, 1972 on the basis that the judge was biased in his refusal to permit defense attorneys to screen prospective jurors for cultural and racial bias
further, contempt convictions resulting in more than six months in prison required a trial by jury
Department of Justice decided not to retry the case

APOLLO XVII TAKES FLIGHT

Apollo 17 was the eleventh and final Apollo space program manned mission to the Moon
Commander Eugene Cernan, Command Module Pilot Ronald Evans and Lunar Module Pilot Harrison Schmitt lifted off -- December 7, 1972
approximately 500,000 people were estimated to have observed the launch in the immediate vicinity of Kennedy Space Center despite the early morning hour
this first night launch was visible as far away as 500 miles

APOLLO XVII ASTRONAUTS WALK ON THE MOON

First moonwalk of the mission began approximately four hours after landing -- December 11, 1972
Boeing’s Luna Roving Vehicle and other equipment were unloaded from the Lunar Module
While working near the rover, a right-rear fender was accidentally broken off when Gene Cernan brushed up against it and his hammer got caught under the fender as a result Cernan and Schmitt were covered with dust
thrown up when the rover was in motion

Astronauts Cernan and Schmitt began their second lunar excursion -- December 12, 1972
one of the first tasks was to repair the right-rear fender on the Lunar Roving Vehicle
duct tape and a clamp were used to replace the fender extension
dust was successfully blocked

Third and final moonwalk took place -- December 13, 1972
astronauts collected 150 pounds of lunar samples

a plaque located on the Lunar Module commemorated the achievements of the Apollo program
before reentering the Lunar Module for the final time, Gene Cernan expressed his thoughts: **“I’m on the surface; and, as I take man’s last step from the surface, back home for some time to come -- but we believe not too long into the future -- I’d like to just [say] what I believe history will record. That America’s challenge of today has forged man’s destiny of tomorrow. And, as we leave the**

Moon at Taurus-Littrow, we leave as we came and, God willing, as we shall return: with peace and hope for all mankind. Godspeed the crew of Apollo 17.”

PARIS PEACE TALKS BEGIN ANEW

U.S. National Security Advisor Henry Kissinger and North Vietnam's Le Duc Tho resumed public peace negotiations in Paris

Kissinger and the North Vietnamese finally made some progress on reaching a negotiated end to the war

However South Vietnamese President Nguyen Van Thieu

demanded massive changes to the agreement that caused the North Vietnamese negotiators to walk out of the talks -- December 13, 1972

Negotiations became deadlocked -- North Vietnam demanded new changes

when the Hanoi government in North Vietnam went public with the agreement's details, Nixon's Administration claimed that North Vietnam was attempting to embarrass the President

President Richard Nixon issued an ultimatum to the Hanoi government of North Vietnam

to send its representatives back to the conference table within seventy-two hours "or else." North Vietnam rejected Nixon's demand

APOLLO XVII COMPLETES ONE FINAL TASK IN SPACE

Lunar Module's ascent stage was sealed off and deliberately crashed into the Moon -- December 15 this collision was recorded by seismometers on Apollo XVII

Astronaut Ron Evans successfully conducted a one hour and seven minute deep spacewalk to retrieve exposed film from the instrument bay

on the exterior of the Command/Service Module -- December 17, 1972

PRESIDENT NIXON ORDERS OPERATION *LINEBACKER II* TO BEGIN

President Nixon ordered a full-scale air campaign against North Vietnam

Operation *Linebacker II*, the bombing of Hanoi and Haiphong Harbor, began -- December 18, 1972

to show support for South Vietnam and to force the North Vietnamese back to the negotiating table

Simultaneously President Nixon pressured South Vietnam President Nguyen Van Thieu to accept the terms of the negotiated agreement

Nixon threatened to conclude a bilateral peace deal with North Vietnam and cut off American aid to South Vietnam

OPERATION *LINEBACKER II* IS A COORDINATED ATTACK ON NORTH VIETNAM

Air Force and Navy tactical aircraft and B-52s delivered an around-the-clock bombardment of the North Vietnamese heartland

over three nights up to 120 B-52s struck Hanoi and Haiphong harbor during hours of darkness and destroyed much of the remaining economic and industrial capacity of that nation

U.S. Air Force F-111s provided surgical strikes on transport targets, fighter airfields, supply depots, and surface-to-air missile sites in and around Hanoi and Haiphong

depending on the weather F-4 daylight operations were carried out
bombing visually or with long-range navigation techniques
U.S. Navy A-7s from the aircraft carriers *Enterprise, Saratoga, Oriskany, America and Ranger*
flew more than 505 sorties in the coastal areas around Hanoi and Haiphong
in addition, escort aircraft such as the Air Force EB-66s and Navy EA-6s
broadcast electronic jamming signals to confuse the radar-controlled defenses of the North
Strategic Air Command provided KC-135s tankers
to support the participating aircraft with in-flight refueling
concentrated strikes also were carried out
against surface-to-air missile and anti-aircraft artillery sites, enemy army barracks,
petroleum storage areas, Haiphong Naval shipyard areas and railroad and truck stations
U.S. Seventh Fleet performed the most extensive aerial mining operation in history,
blockading North Vietnam's main avenues of supply
Operation *Linebacker II* was condemned throughout the world
newspaper headlines included: "Genocide," "Stone-Age Barbarism" and "Savage and Senseless"

APOLLO XVII TRAVELS BACK TO EARTH

After jettisoning the Service Module, the Command Module splashed into the Pacific Ocean
only four miles from the recovery ship USS *Ticonderoga* -- December 19, 1972
Apollo XVII broke several records set by previous flights:

- longest manned lunar landing flight;
- longest total lunar surface extravehicular activities;
- largest lunar sample return;
- longest time in lunar orbit

PRESIDENT NIXON SUSPENDS OPERATION *LINEBACKER II*

After around-the-clock bombing (with the exception of a 36-hour break for Christmas),
North Vietnamese officials agreed to return to the peace negotiations in Paris
President Nixon suspended Operation *Linebacker II* -- December 29, 1972
Operation *Linebacker II* saw U.S. aircraft drop in excess of 20,000 tons of bombs on North Vietnam
U.S. Air Force losses included fifteen B-52s, two F-4s, two F-111s
and one HH-53 search and rescue helicopter
U.S. Navy losses included two A-7s, two A-6s, one RA-5, and one F-4
seventeen of these losses were attributed to SA-2 missiles, three to daytime MiG attacks,
three to anti-aircraft artillery and three to unknown causes
ninety-three airmen were killed, captured or missing
North Vietnam reported between 1,300 and 1,600 dead

SEATTLE METRO TRANSIT BEGINS OPERATION

New Seattle Metro Transit system began operation -- January 1, 1973
it absorbed Seattle Transit, formerly under the City of Seattle
and the Metropolitan Transit Corporation, a private company serving cities in King County
(King County voters in [1988] endorsed by a two-to-one majority
an advisory ballot for accelerated development of a regional rail system

later the Growth Management Act [1990] and related state legislation
authorized serious planning for regional mass transit
Metro system was absorbed by King County [1993])
but voters in King, Snohomish, and Pierce Counties [1995]
rejected a \$6.7 billion Regional Transit Authority (RTA) proposal
to build light rail, standard-gauge commuter trains and express buses)

PEACE TALKS RESUME IN PARIS

United States and North Vietnam negotiators returned to Paris -- January 8, 1973
President Nixon informed Secretary of State Henry Kissinger to accept the terms
that had been offered [in October], if that was what it took to get the agreement signed
U.S. Senator Henry Jackson tried to persuade Nixon to make a televised address to explain
to the American people **“we bombed them in order to get them back to the table.”**⁵⁵⁸
however, it would have been extremely difficult to get informed observers in the U.S.
to believe we were forced to bomb North Vietnam
to get them to accept terms they had already agreed to
With the suspension of the bombing, talks moved along quickly

ACCUSED WATERGATE BURGLERS APPEAR IN FEDERAL COURT

Trial of the seven men accused of breaking into Democratic headquarters at the Watergate hotel
and office complex began in the federal courtroom of Judge John Sirica -- January 8, 1973
General Counsel for the Committee for the Re-Election of the President (CREEP) G. Gordon Liddy
was confident to the point of exuberance as he waved triumphantly to the jurors
other defendants were more subdued
Prosecutor Earl Silbert’s opening argument presented a scenario in which Liddy was given money
for legitimate political intelligence-gathering purposes but he decided on his own
to undertake illegal operations
After Silbert’s opening argument former CIA Agent E. Howard Hunt
abruptly changed his plea to guilty

OTHER WATERGATE BURGLERS PLEAD GUILTY

At a meeting at the Arlington Towers Hotel, E. Howard Hunt told Frank Sturgis, Virgilio Gonzalez,
Eugenio Martinez, Bernard L. Barker the White House would take care of their families
while they were in prison if they pleaded guilty and kept quiet about the Watergate operation
all four pled guilty to the charges -- January 10, 1973

PRESIDENT NIXON’S POLITICAL JUDGEMENT IS IN DOUBT

There was great indignation and apprehension in Congress
that the continued bombing of Cambodia would jeopardize the Paris Peace talks
There was also growing distrust of President Richard Nixon’s political wisdom
Congress had long criticized the White House for abuse of its war powers
in the management of the war in Vietnam

⁵⁵⁸ Stephen Ambrose, *The Christmas Bombings*, P. 411.

these concerns rapidly escalated as the Watergate scandal unfolded

SEATTLE LATINO ACTIVISTS OCCUPY THE OLD BEACON HILL SCHOOL

Even without heat or running water during what turned out to be a record cold winter the occupation of Beacon Hill School begun by Roberto Maestas [October 12, 1972] lasted into early 1973

More urgent, but largely amicable, negotiations took place between the activists and the Seattle City Council and the Seattle School District but for legal reasons the school district could not lease the school building directly to the Chicano group

Seattle's liberal Mayor Wes Uhlman welcomed the idea of an ethnic center for Chicanos Seattle School District agreed to lease the property to the city for five years for \$1 a year City of Seattle then agreed to sub-lease the property to the activists

Roberto Maestas became the founder of Seattle's Chicano/Latino civil rights organization activists chose the name El Centro de la Raza "The Center of the People"

El Centro became not only a community center, but also a civil-rights organization that developed coalitions with other ethnic communities -- especially Native Americans⁵⁵⁹ (However, Seattle School District eventually insisted on fair market rates rent rose to \$12,000 a month [1997])

El Centro compiled a \$150,000 bill for back rent grants from the City of Seattle and from Washington State totaling \$1 million eventually allowed El Centro to buy the site from the school district today El Centro still thrives as one of the largest community-based organizations in the nation)

KINGDOME CONTINUES TO DRAW PROTESTORS AND PROBLEMS

Dissent continued throughout the stadium's construction

International District residents feared the Kingdome would overwhelm their neighborhood, create noise and light pollution, clog the district with traffic, and escalate parking problems⁵⁶⁰

In a construction accident, steel towers forming the core of the stadium's concrete piers fell on a workman and toppled other standing towers like dominos -- January 1973

King County Executive John Spellman ended the county's contract with the construction company this decision drew even more fire from citizens who were concerned with overspending

A new construction firm was hired to continue construction

U.S. SUPREME COURT AFFIRMS WOMEN'S ABORTION RIGHTS IN ROE V WADE

In the *Roe v. Wade* case, the U.S. Supreme Court ruled in favor of "Jane Roe"

in her challenge to a state law banning abortion in Texas

this ruling established a woman's right to terminate a pregnancy

as an expression of her fundamental "right of privacy" -- January 22, 1973

but balanced this right against the developing fetus's progress toward independent viability

⁵⁵⁹ Oscar Rosales Castaneda, *Chicano/Latino Activism in Seattle, 1960s-1970s*, HistoryLink.org, Essay 8013, November 24, 2006.

⁵⁶⁰ Heather MacIntosh, *Kingdome: The Controversial Birth of a Seattle Icon (1959-1976)*, HistoryLink.org, Essay 2164, March 1, 2000.

as the fetus evolved through the trimesters of pregnancy restrictions on abortions increased
U.S. Supreme Court ruled that based on the right to privacy, a woman along with her doctor
could choose an abortion in earlier months of pregnancy without legal restriction
and with some restrictions in later months

Justice William O. Douglas co-authored the majority opinion in the 7-2 decision
Supreme Court deemed abortion to be a fundamental right under the United States Constitution
thereby subjecting all laws attempting to restrict it to the standard of strict scrutiny

Justices noted: **“This right of privacy, whether it be founded in the Fourteenth Amendment’s concept of personal liberty and restrictions upon state action, as we feel it is, or, as the District Court determined, in the Ninth Amendment’s reservation of rights to the people, is broad enough to encompass a woman’s decision whether or not to terminate her pregnancy. The detriment that the State would impose upon the pregnant woman by denying this choice altogether is apparent. Specific and direct harm medically diagnosable even in early pregnancy may be involved. Maternity, or additional offspring, may force upon the woman a distressful life and future. Psychological harm may be imminent. Mental and physical health may be taxed by child care. There is also the distress, for all concerned, associated with the unwanted child, and there is the problem of bringing a child into a family already unable, psychologically and otherwise, to care for it. In other cases, as in this one, the additional difficulties and continuing stigma of unwed motherhood may be involved. All these are factors the woman and her responsible physician necessarily will consider in consultation.”**

This federal ruling superseded the more restrictive standards of Washington’s Referendum 2
(approved by state voters [November 3, 1970] which legalized abortion in Washington
essential provisions of the *Roe v. Wade* decision will later be adopted

as Washington state law with passage of Initiative 120 [November 5, 1991])

Roe v. Wade prompted a national debate (that continues today) regarding issues including:

- whether and to what extent abortion should be legal,
- who should decide the legality of abortion,
- what methods the U.S. Supreme Court should use in constitutional adjudication,
- what role should religious and moral views play in the political sphere

Roe v. Wade reshaped national politics, dividing much of the United States
into pro-choice and pro-life camps with grassroots movements on both sides

PEACE AGREEMENT IS SIGNED IN PARIS

Paris Peace Accord cease-fire agreement was formally signed -- January 27, 1973
by the United States, the Democratic Republic of Vietnam (North Vietnam)
and the Republic of Vietnam (South Vietnam)

this agreement closely resembled what had been previously agreed to [in October 1972]

United States’ direct involvement in the Vietnam War was officially ended

American Prisoners of War (POWs) were released

boundaries of South Vietnam were guaranteed to remain in place

national elections in both North and South Vietnam were called for

sixty days were stipulated for the total withdrawal of U.S. forces

(this article proved to be the only one of the Paris Agreements which was fully carried out)

U.S. Secretary of State Henry Kissinger later justified the accord by saying, **“We believed that those who opposed the war in Vietnam would be satisfied with our withdrawal, and those who favored an honorable ending would be satisfied if the United States would not destroy an ally.”**⁵⁶¹

America’s eight-year involvement in the Vietnam War, the longest war to date, was at an end for the Americans

TRIAL OF THE TWO REMAINING WATERGATE BURGLERS ENDS

Five of the seven accused Watergate burglars

Virgilio González, Bernard Barker, Eugenio Martínez, Frank Sturgis and James McChord, Jr. had pled guilty

John Sirica continued the trial of CIA Agent and electronics expert James W. McCord

and Committee for the Re-Election of the President (CREEP) General Counsel G. Gordon Liddy

Prosecutor Earl Silbert told the eight women and four men that **“when people cannot get together for political purposes without fear that their premises will be burglarized, their conversations bugged, their phones tapped...you breed distrust, you breed suspicion, you lost confidence, faith and credibility.”**

Silbert asked the jury to **“bring in a verdict that will help restore the faith in the democratic system that has been so damaged by the conduct of these two defendants and their coconspirators.”**⁵⁶²

Jury deliberated just ninety minutes before returning a verdict of guilty

on eight counts of conspiracy, burglary and wiretapping for both defendants

Judge Sirica ordered the two immediately jailed -- January 30, 1973

UNITED STATES LEAVES THE GOLD STANDARD FOR THE DOLLAR

President Richard Nixon’s Administration ends adherence to the gold standard -- February 13, 1973

many other industrialized nations also switched from a system of fixed exchange rates

to a system of floating or fluctuating rates according to the supply of and demand

for different currencies in international markets

an increase in the value of a currency is known as “appreciation”

a decrease as “depreciation”

“devaluation,” the deliberate downward adjustment in the official exchange rate,

reduces the currency’s value relative to other currencies

in contrast, “revaluation” is an upward change in the currency’s value

Devaluation, the effect of America’s leaving the gold standard, had several possible effects:

- devaluation made the country’s exports relatively less expensive for foreigners;
- devaluation made foreign products relatively more expensive for domestic consumers thus discouraging imports;
- devaluation also aggravated inflation which soon forced the federal government to raise interest rates to control inflation -- but at the cost of slower economic growth;
- devaluation could be viewed as a sign of economic weakness placing the creditworthiness of the nation in jeopardy

⁵⁶¹ PBS: http://www.pbs.org/wgbh/amex/honor/peoplevents/e_paris.html.

⁵⁶² Lawrence Meyer *Washington Post* January 31, 1973.

There was great fear in the Nixon Administration that a round of successive devaluations would occur
our trading partners could become concerned that devaluation
might negatively affect their own export industries and devalue on their own
Treasury Secretary George P. Shultz told newsmen the devaluation and the other moves
taken by the Nixon Administration will benefit
“...the American working man, businessman and the consumer.”
American travelers around the world faced an immediate financial crisis their dollars were worth less

GRAND COULEE DAM INCREASES ITS GENERATING CAPACITY

(After power shortages in the Northwest during the [1960s],
it was determined that six remaining planned irrigation pumps would be pump-generators
when energy demand was high, the pump generators could generate electricity
with water from Banks Lake running through a feeder canal
adjacent to the dam and at a higher elevation delivering water to the generators
U.S. Senator Henry M. Jackson, who was influential in the construction of power plants,
announced the Bureau of Reclamation would present the project to Congress for funding
to keep up with Soviet competition and increase the generating capacity,
it was determined the generators could be upgraded to 300 or 600 megawatts)
Pump-Generating Plant was completed -- 1973
this upgrade included six pumps and six pump-generators
Grand Coulee Dam was once again one of the largest hydroelectric producers in the world

ONE WATERGATE BURGLER CONFESSES TO PERJURY

Watergate burglar and Committee for the Re-Election of the President (CREEP) Security Coordinator
James McChord wrote a letter to federal Judge John Sirica -- March 17, 1973
that stated he had perjured himself in court -- the conspiracy that led to the burglary
was not a CIA operation as McCord had stated in court
but rather involved other government officials
McCord implicated senior individuals in the Nixon Administration in the cover-up
he claimed his perjured testimony was compelled by pressure
from White House Counsel John Dean
and former Attorney General (now (CREEP Chair) John Mitchell
President Richard Nixon's White House came under investigation

WATERGATE COVER-UP BECOMES MORE DIFFICULT TO MAINTAIN

Former CIA Agent and Watergate “plumber” E. Howard Hunt
received an additional \$75,000 from “bag-man” Frederick LaRue -- March 20, 1973
John Dean tells Nixon that the Watergate burglars will demand millions of dollars -- March 21
Changing his perjured testimony CIA Agent and electronics expert James W. McCord
testified in court the Committee for the Re-Election of the President (CREEP)
General Counsel G. Gordon Liddy told him that the Watergate operation
had been approved by John Mitchell when he was still the U.S. Attorney General

EQUAL RIGHTS AMENDMENT IS RATIFIED IN WASHINGTON STATE

Washington was the thirty-second of thirty-eight states necessary
to approve the change to the U.S. Constitution first proposed by Congress [March 22, 1972]
(King-Snohomish State Representative Lois North introduced a state constitutional amendment
to provide Equal Rights for women into the State House of Representatives [January 11, 1973])
Legislators ratified the Equal Rights Amendment to the State Constitution -- March 22, 1973
which prohibited discrimination on the basis of sex in all areas of public life
Washington became first state to assure equality for women
when securing credit and insurance

LAST AMERICAN COMBAT SOLDIER LEAVES SOUTH VIETNAM

Hanoi freed the remaining American prisoners of war held in North Vietnam
Two months after signing the Vietnam peace agreement, the last U.S. combat troops
left South Vietnam -- March 29, 1973
of the more than three million Americans who served in the war, almost 58,000 were dead
some 150,000 Americans were seriously injured and over 1,000 were missing in action
But only combat soldiers departed
military advisors and U.S. Marines who protected U.S. installations remained in South Vietnam
and some 7,000 U.S. Department of Defense civilian employees remained behind in Saigon
to aid South Vietnam in conducting what looked to be a fierce and ongoing war
with Communist North Vietnam

LAWSUIT IS FILED IN FEDERAL COURT TO STOP THE BOMBING OF CAMBODIA

War in Cambodia continued even after the American agreement to end hostilities in South Vietnam
there had been numerous attempts by opponents of the war in Southeast Asia
to bring the federal courts in to rule on constitutional and legal challenges to the war
however, the courts consistently refused to hear such cases
because of their essentially political and military nature
Federal court suit to stop the bombing of Cambodia was filed -- April 13, 1973
Federal District Court Judge Orrin C. Judd of Brooklyn agreed to hear the case
attorneys from the American Civil Liberties Union represented the plaintiffs
Congresswoman Elizabeth Holtzman (D-New York) and four Air Force officers
who contended the missions over Cambodia were unconstitutional
as Congress had never authorized the attacks
further, these attacks were a new war begun after the Paris Peace Accords were signed
U.S. government attorneys argued the Cambodian operations were a continuation
of the larger Southeast Asia war and Congress had appropriated money for that military effort

ANOTHER CONSPIRATOR AGREES TO TESTIFY FOR THE PROSECUTION

White House Counsel John Dean agreed to co-operate with the Watergate prosecutors [April 6]
President Richard Nixon released an official statement that claimed he had no prior knowledge
of the Watergate affair -- April 17, 1973
President Nixon announced that he has dismissed White House Counsel John Dean
and had accepted the resignations Presidential Chief of Staff H.R. "Bob" Haldeman
and Counsel and Assistant to the President John Ehrlichman

NATIONAL INSTITUTE OF HEALTH GETS A MAJOR PUSH FROM U.S. SENATOR MAGNUSON

Largest medical research enterprise in the world

It was noted by a national lobbyist, **“Magnuson in essence sponsored all the funding for medical research in the nation through the National Institutes of Health. The NIH is the work of a lot of people, to be sure, but it needed a leader to make it work. Maggie was the leader. Of course, he always took care of the University of Washington.”**⁵⁶³

The university’s medical school which covers ten acres bears his name

The Warren G. Magnuson Health Sciences Center

He also had fed millions of dollars into the Veterans Administration health services for hospital construction and medical education

NATIONAL INSTITUTE OF HEALTH GETS A MAJOR PUSH FROM U.S. SENATOR MAGNUSON

National Institute of Health (NIH) at the University of Washington

was the largest medical research enterprise in the world

it was noted by a national lobbyist, **“Magnuson in essence sponsored all the funding for medical research in the nation through the National Institutes of Health. The NIH is the work of a lot of people, to be sure, but it needed a leader to make it work. Maggie was the leader. Of course, he always took care of the University of Washington.”**

The university’s medical school which covers ten acres bears his name:

The Warren G. Magnuson Health Sciences Center

Maggy also had fed millions of dollars into the Veterans Administration health services for hospital construction and medical education

WASHINGTON PUBLIC POWER SUPPLY SYSTEM (WPPSS) RUNS INTO TROUBLE

Several factors combined to ruin construction schedules

and drive costs to three and four times the original estimates:

- disputed contracts, delayed construction, cost overruns, legal disputes and inflation all added to increases in the anticipated costs;
- changing state laws that mandated different contractors added to the confusion;
- builders often got ahead of designers who were then forced to modify their drawings to conform to what had already been built;
- faulty inspections caused completed work to be torn out and redone, sometime more than once;
- supplies failed to arrive on time;
- paperwork fell well behind schedule;
- safety changes imposed by the Nuclear Regulatory Commission also increased costs

but the biggest cause of delays and overruns

was mismanagement by the WPPSS directors and managers of the system who had no experience in nuclear engineering or in projects of this scale system managers were unable to develop a unified and comprehensive

⁵⁶³ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*, P. 260.

method of choosing, directing and supervising contractors⁵⁶⁴

ALL CHARGES IN THE LEAKING OF THE PENTAGON PAPERS ARE DROPPED

U.S. District Judge W.M. Byrne was shocked to learn that Watergate burglars

G. Gordon Liddy and E. Howard Hunt had supervised the burglary of the Los Angeles office of Daniel Ellsberg's psychiatrist, Dr. Lewis Fielding -- May 11, 1973

all charges against Pentagon Paper leakers Daniel Ellsberg and Anthony Russo were dismissed

Judge Byrne noted: **“The conduct of the government has placed the case in such a posture that it precludes the fair, dispassionate resolution of these issues by a jury.”**⁵⁶⁵

EVERGREEN SCHOOL DISTRICT TEACHERS GO ON STRIKE

Three hundred K-12 teachers in Evergreen School District

located just east of Vancouver, Washington

were affiliated with the Washington Education Association (WEA)

they were on a collision course with the district's administration⁵⁶⁶

majority of the Evergreen Education Association (EEA) members were young

many had less than five years of teaching experience

they felt uncertain about job security and needed a way to protect themselves

union leaders set about to procure a contract to ensure this protection

During bargaining sessions, EEA bargainers heard nothing but “NO” to every proposal they made

with no progress at the bargaining table, it became clear that they would have to strike

because of the relationship between the District and teachers

EEA leaders knew that a strike meant they would likely have to violate a court injunction

and possibly go to jail

EEA members held a secret ballot and overwhelmingly voted to strike -- Mother's Day May 13, 1973

EVERGREEN SCHOOL DISTRICT STRIKE LEADERS GO TO JAIL

Evergreen School District administrators continued just saying “NO” at the bargaining table

soon they sought an injunction from State Superior Court Judge Guthrie Langsdorf

Evergreen Education Association (EEA) leaders held a press conference

to announce that, regardless of the issuance of an injunction the strike would go on

until a satisfactory contract agreement was reached -- May 14, 1973

Judge Langsdorf saw Washington Education Association (WEA) Crisis Coordinator Dick Johnson

and EEA President Fred Ensmen giving the press conference on television

Judge Guthrie J. Langsdorf handed down a court injunction

ordering teachers back to work -- May 14, 1973

Evergreen Education Association (EEA) members defied the order

they refused to enter their classrooms

JUDGE GUTHRIE LANGSDORF ORDERS STRIKE LEADERS TO JAIL

⁵⁶⁴ David Wilma, *Washington Public Power Supply System (WPPSS)*, HistoryLink.org, Essay 5482, July 10, 2003.

⁵⁶⁵ Martin Arnold, *New TRIAL BARREDNEW TRIAL BARRED*, Special to The New York Times, March 12, 1973.

⁵⁶⁶ Steve Kink, *Teacher Strikes in Washington*, HistoryLink.org, Essay 9763, March 22, 2011.

Only a dozen of the 300 members were not on the picket lines after the first day on strike
Evergreen School District officials asked the judge to enforce his order
State Superior Court Judge Langsdorf ordered EEA President Fred Ensman
and WEA Action Committee chair Dick Johnson to his court -- May 15, 1973
he ordered them both to direct the teachers back to work
they both respectfully but firmly declined his order
Judge Langsdorf immediately sent them to jail
Evergreen teachers remained on strike despite the fact that each one knew
he or she could be the next to be jailed
School District administrators ordered principals in each building
to take photographs of EEA building representatives so that court officers could identify them
and serve them with warrants for their arrest

JUDGE GUTHRIE LANGSDORF CALLS ANOTHER STRIKE LEADER INTO COURT

Superior Court Judge Langsdorf called newly-appointed interim President John Zavodsky
to appear before his bench -- May 16, 1973
Zavodsky was told by the judge to order teachers back to work
he refused and was sent to jail, also

EVERGREEN EDUCATION ASSOCIATION (EEA) NAMES ANOTHER PRESIDENT

Conditions in the Lewis County jail were deplorable
strike leaders thought the Superior Court Judge Langsdorf would not send a woman teacher to jail
Betty Colwell, a respected older woman member, agreed to be appointed Interim EEA President
she held a press conference to announce her presidency -- May 17, 1973
Betty Colwell received an order to report to Judge Guthrie Langsdorf's court the next day
she attended the School Board meeting that night that was packed with parents
at the meeting Betty announced to the board members, **"I have never broken the law or had
so much as a traffic ticket, but tomorrow I'm going to jail because of you!"**⁵⁶⁷
most parents in attendance were shocked and loudly criticized the School Board
for their lack of action in reaching an agreement with the teachers

U.S. SENATE WATERGATE COMMITTEE BEGINS ITS INVESTIGATIONS

Senate Watergate Committee was a special committee convened by the United States Senate
to investigate the Watergate burglaries and the ensuing Watergate scandal after it was learned
that the Watergate burglars had been directed to break into and wiretap
the Democratic National Committee headquarters
by the Committee to Re-elect the President (CREEP)
President Richard Nixon's re-election campaign fund raising organization
official name of the committee was: Select Committee on Presidential Campaign Activities
Senate Watergate Committee was composed of four Democrats and three Republicans
Senator Sam Ervin (D-North Carolina) served as Chair
committee Democrats were staffed by Chief Counsel Sam Dash

⁵⁶⁷ Steve Kink, *Teacher Strikes in Washington*, HistoryLink.org, Essay 9763, March 22, 2011.

Senator Howard H. Baker, Jr. (R-Tennessee) served as Ranking Member
committee Republicans were staffed by Chief Counsel Fred Thompson
Archibald Cox took a leave of absence from Harvard Law School
to accept an appointment as the Watergate special prosecutor
this was a key condition set by the leadership of the U.S. Senate for the confirmation
of Elliot Richardson as the new U.S. Attorney General to replace
Richard G. Kleindienst who had resigned as a result of the Watergate scandal
Senate Watergate Committee hearings were broadcast live on commercial television
85% of U.S. households watched some portion
CBS, NBC and ABC broadcast simultaneously during the day (then later rotated coverage)
PBS replayed the hearings at night
gavel-to-gavel audio feeds were broadcast on scores of National Public Radio (NPR) stations
Senate Watergate Committee hearings made stars out of U.S. Senators Sam Ervin and Howard Baker
Ervin became known for his resolute determination tempered by his folksy manner and wisdom
Baker appeared non-partisan and uttered the famous phrase
“What did the President know, and when did he know it?”⁵⁶⁸

EEA MEMBERS RALLY IN SUPPORT OF PRESIDENT BETTY COLWELL

EEA members met in a park across the street from the courthouse -- morning May 18, 1973
to see EEA interim-President Betty Colwell on her journey to Judge Langsdorf’s courtroom
Betty Colwell stopped on the courthouse steps and spoke to the members of the media in attendance
but then reporters were shocked to see roughly 300 teachers headed inside with their president
Judge Langsdorf’s courtroom could not hold all of them
most spilled into hallways throughout the courthouse
Judge Langsdorf did not have jail space for everyone so he chose not to jail Betty Colwell
frustrated, he called in the District School Board members into his courtroom
he ordered them to bargain in good faith
Authentic negotiations got underway with the help of a federal mediator
and staff from the Superintendent of Public Instruction’s Office

EVERGREEN EDUCATION ASSOCIATION REACHES A SETTLEMENT

After two weeks on strike, a comprehensive collective bargaining agreement was reached
this was Washington’s first full contract achieved from a strike -- May 21, 1973
Evergreen teachers established the lengths to which educators would go
to achieve quality, comprehensive collective bargaining agreements
they demonstrated an unwavering commitment to resolve their issues
their collective action changed the way school managements viewed teachers,
and forced administrators to ponder the ramifications of a strike
because of the effort of Evergreen teachers there actually was an improvement in labor relations
because the vast majority of districts began to take teachers’ concerns seriously⁵⁶⁹

⁵⁶⁸ WATERGATE HEARING CLIP, WWW.C-SPAN.ORG/VIDEO/?C4715520/USER-CLIP-PRESIDENT.

⁵⁶⁹ Steve Kink, *Teacher Strikes in Washington*, HistoryLink.org, Essay 9763, March 22, 2011.

ANOTHER WATERGATE INSIDER BEGINS COOPERATING WITH FEDERAL PROSECUTORS

Committee to Re-elect the President (CREEP)'s Acting Campaign Chairman Jeb Stuart Magruder began cooperating with authorities -- May 21, 1973

Magruder was the only direct participant of the scandal to claim that President Richard Nixon had specific prior knowledge of the Watergate burglary

Magruder claimed that Nixon actually directed John Mitchell to proceed with the burglary which was organized by CREEP General Counsel G. Gordon Liddy and former CIA Agent E. Howard Hunt

In exchange for his testimony, Magruder was allowed to plead guilty to a one-count indictment of conspiracy to obstruct justice, to defraud the United States, and to illegally eavesdrop

on the Democratic Party's national headquarters at the Watergate Hotel (Magruder was sentenced by Federal Judge John Sirica to ten months to four years for his role in the failed burglary of Watergate and the following cover-up [in the end he served just seven months of his sentence])

COMMUNIST KHMER ROUGE TROOPS ESCALATE THE FIGHT IN CAMBODIA

Communists troops launched a massive offensive -- June 30, 1973

in an effort to isolate Cambodia's capital, Phnom Penh, from the sea

President Nixon authorized a step-up in American bombing to break the impact of that offensive fighter bombers from Thailand conducted over 200 missions a day over Cambodia,

B-52s from Thailand and Guam flew some forty missions a day

CONGRESS OPPOSES PRESIDENT NIXON'S CAMBODIA POLICY

In response to the shifting Congressional attitude, Secretary of State Henry Kissinger met with the U.S. Senate Foreign Relations Committee in secret

to inform its members that negotiations were underway to reach a cease-fire in Cambodia

Nixon's Administration believed the bombing of Cambodia was vital to halt Communist gains and to put pressure to intensify the secret negotiations

Congress, however, had a different view

in opposition to the President Nixon's policy to bomb Cambodia, Congress added a section to an appropriation bill that would immediately cut off funds for this operation -- July 1, 1973

President Nixon vetoed the bill and Congress was unable to override the veto in the U.S. House

CONGRESS TAKES ACTION TO STOP THE BOMBING OF CAMBODIA

In opposition to the President Nixon's policy to bomb Cambodia,

Congress passed the Second Supplemental Appropriations Act of 1973

(and the Continuing Appropriations Act of [1974]) -- July 1, 1973

each bill contained the provision that no funds were to be used for American military operations in North Vietnam, South Vietnam, Laos, or Cambodia on or after [August 15, 1973]

for the first time Congress had trimmed the President's powers as Commander-in-Chief

CONGRESS ENDS THE MILITARY DRAFT

United States Constitution is quite specific with respect to compelling men to join the military

Article I, Section 8 authorizes Congress **“To provide for calling forth the Militia to execute the laws of the Union, suppress Insurrections and repel Invasions.”**

there is no other mention of mandatory military service
(President Woodrow Wilson persuaded Congress to declare war
on Germany and Austria [April 7, 1917]
Congress passed the Selective Training and Service Act [May 18, 1917]
American men were drafted to fill the needs of the country’s armed forces
Congress established the Selective Service System as an independent federal agency [1940])
Congress refused to extend the draft law and it expired automatically -- July 1, 1973
an all-volunteer army was instituted
(however, men of draft age are required to register under the Military Selective Service Act)

UNITED STATES ARMY BECOMES ALL-VOLUNTEER

Creation of an all-volunteer army led to a reexamination of veterans’ benefits
some argued that citizens who were drafted to serve in war were owed a greater debt
by the nation than those who volunteered during peacetime
attracting enlistees rather than compensating veterans with benefits should be the goal
This reasoning led to the passage of the Veteran's Educational Assistance Act of [1977]
military veterans who contributed one dollar to their education benefit program
would have that amount matched with two dollars from the federal government

TRIDENT SUBMARINE BASE IS PROPOSED AT BANGOR, WASHINGTON

Washington’s U.S. Senator Henry Jackson’s relationship with the Pentagon
persuaded the navy to build a new base inside Puget Sound’s Hood Canal
U.S. Navy announced the selection of the Bangor base as the home port
for the first squadron of Ohio-class Trident Fleet Ballistic Missile submarines -- 1973
Washington’s U.S. Senator Warren Magnuson was given the task of providing funds
for new roads, sewers, water and garbage facilities serving the multi-million-dollar project

U.S. SENATOR WARREN G. MAGNUSON TRAVELS TO CHINA

(Washington’s U.S. Senator Warren G. Magnuson had written legislation [the 1943 Magnuson Act]
that permitted Chinese immigration for the first time since the Chinese Exclusion Act of [1882]
he argued for years for trade and normalization of relations with Chinese Communists)
Senator Magnuson went to China leading the first Congressional delegation there -- July 1973
he had been invited by Zhou Enlai -- who second only to Mao Zedong in the Chinese government
During his visit Senator Magnuson opened trade relations with China

OVAL OFFICE TAPING SYSTEM IS DISCOVERED

(Presidents since Franklin D. Roosevelt recorded many of their conversations while in office)
Retired U.S. military officer, public servant, and businessman Alexander Butterfield
served as the deputy assistant to President Richard Nixon [1969] until [1973]
although he was appointed head of the Federal Aviation Administration [December 19, 1972]
he routinely testified before the Senate Watergate Committee
Butterfield revealed that all conversations in the Oval Office were taped

if the President was involved -- July 16, 1973

SENATE WATERGATE COMMITTEE SUBPOENAES THE OVAL OFFICE TAPES

Senate Watergate Committee special prosecutor Archibald Cox, subpoenaed the White House tapes but Nixon refused to turn them over to the committee citing executive privilege -- July 23, 1973
This began a lengthy legal battle over the tapes that lasted more than a year and went all the way to the U.S. Supreme Court

PRESIDENTIAL AIDE FRED LaRUE GOES TO PRISON

Presidential Aide Frederick Cheney "Fred" LaRue pleaded guilty to obstruction of justice -- July 23
Fred LaRue did not have any rank, title, salary or even listing in the White House directory but he was present at an early meeting with his friend, U. S. Attorney General John Mitchell who approved a "dirty tricks" campaign -- including the Watergate break-in
LaRue was known as the "bagman" because he delivered more than \$300,000 in cash ("hush money") to the conspirators and their attorneys to keep participants of the Watergate burglary quiet
he also attended the meeting after the break-in where some campaign officials scurried about in an effort to come up with more money for the burglars
LaRue personally assisted the cover-up by supervising the shredding of documents and the destruction of financial records
Fred LaRue was the first Nixon Administration official to plead guilty to obstruction of justice for his involvement with the Watergate burglary and the cover-up -- July 1973
(Fred LaRue served a reduced sentence of four and a half months in federal prison in return for cooperating with prosecutors investigating the break-in at the Watergate complex)

FEDERAL JUDGE JUDD RULES AGAINST THE PRESIDENT'S BOMBING OF CAMBODIA

Federal District Court Judge Orrin C. Judd of Brooklyn ruled on the bombing of Cambodia he stated that Congress had given no explicit authority for continued American military activity in Southeast Asia after the [January 27, 1973] Paris cease-fire agreement
therefore, the President gave an unconstitutional order to continue bombing Cambodia
Judge Judd issued an injunction to end the Air Force operations over Cambodia -- July 25, 1973
(to begin at 4:00 p.m., [July 27, 1973])

RULING TO STOP THE BOMBING OF CAMBODIA IS APPEALED

Federal District Court Judge Orrin C. Judd's suspension of Air Force operations over Cambodia was heard by the Federal Second Circuit Court of Appeals -- July 27, 1973
which unanimously granted a stay of injunction that allowed continuation of the bombing
Plaintiffs appealed immediately to U.S. Supreme Court Associate Justice Thurgood Marshall to reinstate the injunction
since the U.S. Supreme Court was in summer recess,
Justice Marshall heard the matter himself
and refused to lift the injunction [August 1, 1973]

MORE INFORMATION ABOUT THE BOMBING OF CAMBODIA IS RELEASED

Pentagon announced that B-52s had accidentally bombed a village -- July 30, 1973

and had killed more than 300 Cambodian civilians
It also became public at this time that the administration
had ordered the secret bombing of Cambodia (in [1969]-[1970])
unknown to Congress and the public at a cost of about \$1.5 billion

BRUCE LEE, SEATTLE MARTIAL ARTS MASTER AND FILM MAKER, DIES⁵⁷⁰

Bruce Lee popularized Kung Fu and other Asian martial arts disciplines
during a brief but influential career as an instructor and actor on television and in feature films
Born in San Francisco [November 27, 1940] the Lee family moved to Hong Kong
Bruce was a child star in Hong Kong -- at age six, he starred in *The Birth of Mankind*, [1946]
he eventually starred in twenty movies while in Hong Kong
Bruce moved to Seattle [1959]
as a favor to Bruce's father, Ruby Chow offered Bruce a room
above her Seattle Chinese restaurant where he worked full time as a waiter
as he attended the University of Washington
to supplement his income he began teaching Kung Fu Chinese culture
next he began teaching martial arts and established his first studio
during this time he met and married his wife, Linda
Bruce and Linda moved to Southern California
Bruce gave a martial arts demonstration at a karate tournament in Long Beach [1964]
Television producer William Dozier was looking for an actor to play
fictional Chinese-American detective Charlie Chan's son
in a new series in the works, *Number-One Son* -- Bruce Lee became the *Number-One Son*
next Dozier called Bruce to tell him a new Chinese martial arts television series,
The Green Hornet, would become available [March 1966]
Bruce took the role of Kato the Green Hornet's assistant and enjoyed the notoriety he received
most Americans had never seen martial arts before
Bruce's self-choreographed fight scenes and fast-action disposal of enemies
made him the star of the show in the eyes of many of the viewers -- especially children
however, *The Green Hornet* was too "campy" for most adults
it was cancelled after twenty-six episodes
Bruce Lee began to teach Kung Fu privately to celebrities such as radio broadcaster Mike Stone
screenwriter and producer Stirling Silliphant, actors Steve McQueen, James Coburn,
Chuck Norris, and boxer Joe Lewis
during their training with Bruce they won every karate championship in the United States
movie director Roman Polanski flew him to Switzerland for private lessons
other celebrities sought Lee out as a teacher
American film director, screenwriter and producer Blake Edwards,
actors James Garner and Lee Marvin,
Los Angeles *Lakers* basketball star Kareem Abdul Jabbar
Bruce returned to Hong Kong to visit his mother and was mobbed by fans

⁵⁷⁰ Alyssa Burrows, *Lee, Bruce (1940-1973), Martial Arts Master and Film Maker*, Essay 3999, HistoryLink.org, October 21, 2002.

he had no idea how popular he was there

Bruce Lee shot the film *Return of the Dragon*, in Hong Kong [1972] for U.S. release
Filming began on *Enter the Dragon* and *The Game of Death* -- 1973
during a sweltering recording session in the studio [May 10, 1973], Bruce fainted in the restroom
after his return to the studio, Bruce collapsed again, vomited, and went into convulsions
he was taken to the hospital and given tests
Bruce flew to Los Angeles the following week for additional medical tests
doctors found absolutely nothing wrong and told him he was as healthy as an 18-year-old
it was decided Bruce had suffered a swelling of the brain in Hong Kong
with an unexplained grand mal seizure

Bruce was working on *The Game of Death* when he complained of a headache [July 20, 1973]
he was given a strong prescription aspirin
Bruce said he didn't feel well and went to lie down -- he never woke up
an autopsy was performed -- it was discovered Bruce's brain was very swollen,
but there were no blocked or broken blood vessels
autopsy report concluded that the most likely cause of the brain swelling
was a hypersensitivity or allergic reaction to the prescription aspirin
Bruce Lee was buried in Seattle's Lake View Cemetery (1554 15th Avenue E) -- July 30, 1973

SUPREME COURT JUSTICE WILLIAM O. DOUGLAS STOPS THE BOMBING OF CAMBODIA

Justice Douglas had repeatedly tried, without success, to get his court colleagues
to review the legality of U.S. military operations in Vietnam
he finally got his opportunity when American Civil Liberties Union attorneys
tracked Justice Douglas to his home in remote Goose Prairie, Washington
after a brief conversation he agreed to hold a hearing on the bombing of Cambodia
at the federal courthouse in Yakima
Justice Douglas reversed his colleague Justice Thurgood Marshall's decision -- August 4, 1973
eleven days before the [August 15] deadline he ordered a halt to the Cambodia bombings
he viewed this matter as a capital case and granted the injunction
as though it were a stay of execution for a condemned person sentenced to death
Justice Douglas's injunction lasted just six hours and ten minutes
Justice Marshall telephoned all eight other members of the U.S. Supreme Court
they delayed Douglas's injunction on procedural ground

BOMBING OF CAMBODIA COMES TO AN END

Bombing of Cambodia began four years earlier than was reported to the public and the press
it began not under President Richard Nixon but under President Lyndon Johnson
United States dropped far more ordnance on Cambodia than was announced:
2,756,941 tons' worth was dropped between [October 4, 1965] and August 15, 1973
as 230,516 sorties were flown against 113,716 sites
just over ten percent of the bombing was indiscriminate,
3,580 of the sites were listed as having "unknown" targets
another 8,238 sites had no target listed at all

NATIVE AMERICAN FISHING RIGHTS ARE HEARD IN FEDERAL COURT

(Fight over Native American fishing rights began [1964] with “fish-ins” on the Puyallup River led by Robert Satiacum and Billy Frank who defied Washington’s efforts to regulate their fishing sixty people, Native Americans and their supporters, who failed to disperse during the [1964] fish-in had been arrested)

U.S. v. Washington was heard in Federal Judge George Boldt’s Tacoma courtroom -- August 27, 1973 during the trial Judge Boldt held court six days a week including Labor Day forty-nine experts and tribal members testified (Judge Bolt’s ruling will be delivered [February 12, 1974])

TEACHERS IN TWO SCHOOL DISTRICTS GO ON STRIKE

Two other school districts also faced striking teachers at the same time:

- Elma School District teachers (members of the Washington Education Association’s Elma Education Association (EEA) struck for six days,
- Edmonds School District teachers Edmonds Education Association (EEA) struck for one day before a court injunction was imposed

E. HOWARD HUNT TESTIFIES BEFORE THE SENATE WATERGATE COMMITTEE

Convicted “plumber” and ex-CIA Agent E. Howard Hunt had been adamant about remaining silent when he was interrogated by the FBI and the Watergate grand jury prosecutors he had inspired burglars Bernard Barker, Virgilio Gonzales, Eugenio Martinez and Frank Sturgis to also remain silent

Hunt astounded the other four convicted burglars with his testimony before the Senate Watergate Committee -- September 24-25, 1973

he confirmed that former Nixon White House and campaign aides John Mitchell, John Dean, and Jeb Magruder were primarily responsible for the covert actions of the Nixon campaign and that the CIA was heavily involved in domestic activities (in violation of its charges)

General Counsel for the Committee for the Re-Election of the President (CREEP) G. Gordon Liddy, who had also remained obstinately silent, was overtly disgusted with Hunt when Hunt was returned to his jail cell, Liddy asked the guards to transfer him to another block -- away from Hunt

YOM KIPPUR WAR ERUPTS IN THE MIDDLE EAST

Coalition of Arab states led by Egypt and Syria launched a joint surprise attack on Israel on Yom Kippur, the holiest day in Judaism -- October 6, 1973

Egyptian troops crossed ceasefire lines along the Sinai Peninsula that had been established after the [1967] Six-Day War

while Syria entered the marched into the Golan Heights of Israel

Both the United States and the Soviet Union initiated massive resupply efforts to their respective allies

U.S. in support of Israel -- U.S.S.R. in support of Egypt and Syria

VICE PRESIDENT SPIRO AGNEW IS UNDER INVESTIGATION

United States Attorney’s office in Baltimore, Maryland had been investigating Vice President Agnew

on charges of extortion, tax fraud, bribery and conspiracy
Vice President Spiro Agnew was formally charged -- October 1973
with having accepted bribes totaling more than \$100,000 while holding office
as Baltimore County Executive, Governor of Maryland,
and Vice President of the United States

EGYPT IS BADLY BEATEN BY EGYPT AND SYRIA

After their initial success cross the Suez Canal in three days, Egypt dug in -- October 9, 1973
Syrians coordinated their attack on the Golan Heights to coincide with the Egyptian effort
Israel badly needed military supplies from the United States

VICE PRESIDENT SPIRO T. AGNEW RESIGNS FROM OFFICE

Vice President Agnew became the second Vice President to resign the office
unlike John C. Calhoun, who resigned [December 28, 1832] to take a seat in the U.S. Senate
Agnew resigned from office and then pled no contest in a Baltimore federal courtroom
to income tax evasion -- October 10, 1973

regarding \$29,500 he received while he was governor of Maryland [1967]

Spiro T. Agnew was fined \$10,000 and was put on three years' probation

\$10,000 fine covered only the taxes and interest due on what was "unreported income"

Agnew's resignation triggered the first use of the 25th Amendment

Section Two: **"Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take office upon confirmation by a majority vote of both Houses of Congress."**

Spiro T. Agnew resigned from the Vice Presidency in disgrace -- October 12, 1973

ISRAEL TAKES THE OFFENSIVE IN THE YOM KIPPUR WAR

Within a week Israel recovered from the Arab surprise attack
and launched a four-day counter-offensive that drove deep into Syria -- October 13, 1973
to relieve their ally the Egyptians went back on the offensive, but were decisively defeated

WHITEHOUSE COUNSEL JOHN DEAN PLEADS GUILTY TO OBSTRUCTION OF JUSTICE

Watergate trial judge John Soricca accepted John Dean's guilty plea -- October 19, 1973

Dean admitted supervising payments of "hush money"

to the Watergate burglars -- notably E. Howard Hunt

Dean also revealed the existence of Nixon's "enemies list"

(Special Counsel to the President Charles Colson had sent a memo to Dean

listing people the president did not like [September 9, 1971])

Senate Watergate Committee Special Prosecutor Archibald Cox was interested in meeting with Dean

Cox planned to do so a few days later to follow-up on Nixon's enemies list

"SATURDAY NIGHT MASSACRE" OCCURS UNDER ORDERS FROM PRESIDENT NIXON

President Richard Nixon ordered U.S. Attorney General Elliot Richardson

to dismiss Watergate Special Prosecutor Archibald Cox -- Saturday October 20, 1973

Richardson refused and resigned from office

Nixon next ordered the deputy Attorney-General, William Ruckelshaus, to fire Cox
Ruckelshaus refuses and was himself fired
Solicitor General Robert Bork, third in line at the Department of Justice, then fired Cox
“Saturday Night Massacre” raised cries calling for Nixon’s impeachment

YOM KIPPUR WAR COMES TO AN END

Israelis counterattacked at the seam between two Egyptian armies
they crossed the Suez Canal and advanced southward and westward
in a week of heavy fighting -- October 20, 1973
Israelis improved their position considerably and completed an encirclement of Egypt’s Third Army
this development heightened tensions between the United States and the Soviet Union
who were actively both opposite sides in the conflict
(At the conclusion of hostilities, Israeli forces had penetrated farther into Egypt and Syria
than they had been after the Six-Day War
Israel was twenty-five miles from Damascus and sixty-three miles from Cairo [October 25])

PRESIDENT NIXON AGREES TO DELIVER SOME OF THE OVAL OFFICE TAPES

Under intense pressure from the press and the public, President Nixon agreed to comply with a subpoena ordering him to turn over some of the Oval Office tapes regarding the Watergate break-in to investigators -- October 23, 1973
Members of the President’s Administration and legal staff began to identify tapes to be delivered
only a few of the tapes were submitted to the U.S. Senate Watergate Committee

CONGRESS PASSES THE WAR POWERS ACT

U.S. Constitution granted Congress the power to declare war in Article I, Section 8, Clause 11:
“**...To declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water;**”

President Richard Nixon defended his escalations of the Southeast Asia war by arguing that the constitutional distinction between Congress’s war power and the president’s commander-in-chief role had become blurred
(in fact, a number of wars had been declared under the United States Constitution, although there continued to be controversy as to the exact number, because the Constitution does not specify the form of such a declaration)

Congress wanted to limit the president’s authority to use armed forces abroad without a declaration of war or other congressional authorization, yet provide enough flexibility to permit the president to respond to attack or other emergencies

War Powers Resolution of 1973 was passed by Congress -- October 24, 1973
to stop the President from committing American troops without the consent of Congress:

- President must to notify Congress within forty-eight hours of committing armed forces to military action;
- if Congress does not expressly authorize this action within sixty days, all forces armed forces must be withdrawn;
- an additional thirty days may be added to withdraw troops that have been committed

President Richard Nixon vetoed the measure

OIL CRISIS SWEEPS ACROSS AMERICA

Members of the Organization of Arab Petroleum Exporting Countries (OPEC)

consisted of the Arab members of OPEC plus Egypt, Syria and Tunisia

they proclaimed an oil embargo in response to the U.S. decision to re-supply the Israeli military during the “Yom Kippur War” -- October 1973

industrialized economies relied on crude oil -- and OPEC was their predominant supplier

America faced an oil shortage

Nixon Administration began negotiations with Arab oil producers to end the embargo

and also began talks with Egypt, Syria, and Israel to arrange an Israeli pull back

from the Sinai Peninsula and the Golan Heights after the Yom Kippur War fighting stopped

Government price controls made the crisis in the United States worse

as the price of “old oil” (that already discovered) was capped

while newly discovered oil was sold at a higher price

this resulted in a withdrawal of old oil from the market and the creation of artificial scarcity

these controls also discouraged the development of alternative energies or more efficient fuels

this was intended to promote oil exploration

likewise, America’s natural gas reserves dwindled

federal government had controlled the price of natural gas since the [1950s]

market price of natural gas did not encourage the search for new reserves

SCARCITY OF OIL RESULTS IN GAS RATIONING

Motorists in many countries faced long lines at gas stations -- fall 1973

in the U.S. drivers of vehicles with license plates having an odd number as the last digit

(or a vanity license plate) were allowed to purchase gas only on odd-numbered days

while drivers of vehicles with even-numbered license plates were allowed to purchase fuel

only on even-numbered days

in some states such as Washington, a three-color flag system was used

to show gasoline availability at service stations:

- green flag indicated the unrationed sale of gasoline,
- yellow flag denoted restricted and rationed sales,
- red flag meant that no gasoline was available

but the service station was open for other services

SENATE WATERGATE COMMITTEE RECEIVES A NEW SPECIAL PROSECUTOR

Special Prosecutor Archibald Cox was replaced by Leonidas “Leon” Jaworski -- November 1, 1973

Jaworski initially believed that only Nixon’s aides had committed misconduct

however, he learned that on numerous occasions Nixon had discussed the Watergate cover-up

and that these conversations had been recorded by the White House taping system

Jaworski requested tapes of sixty-four Presidential conversations as evidence for the upcoming trials

but Nixon refused to release them citing “executive privilege”

Jaworski began a long contest with President Nixon to secure evidence for the trial

of former senior administration officials on charges relating to the Watergate cover-up

Nixon attempted to reach a compromise acceptable to the special prosecutor's office including supplying edited transcripts of some recordings -- Jaworski now subpoenaed the tapes Nixon appealed the subpoena on two grounds:

- first, the office of Special Prosecutor did not have the right to sue the office of President;
- second, the requested materials were privileged presidential conversations

Aware that an important constitutional issue was at stake, and unwilling to wait any longer, Jaworski asked the U.S. Supreme Court to take the case directly, bypassing Federal District Court and the U.S. Court of Appeals

CONGRESS OVERRIDES THE PRESIDENT'S VETO OF THE WAR POWERS ACT

President Richard Nixon was a weakened president

Watergate and his continuing an unpopular war -- even expanding the war into Cambodia all without Congressional authorization had undermined his office

U.S. House of Representatives voted to override the president's veto of the War Powers Act 284 to 135 (four votes more than required to override) -- November 7, 1973

one of the Republicans voting against was Gerald Ford, who said the bill had "the potential for disaster"

U.S. Senate vote was seventy-five to override and eighteen against -- November 7

(Nixon and subsequent presidents have contended the War Powers Resolution was unconstitutional this constitutional debate may be settled by the courts in years to come)

CONGRESS PASSES THE TRANS-ALASKA PIPELINE ACT

President Richard Nixon had supported the construction project even before the oil crisis began (he released a message stating that the pipeline was his priority

for the remainder of the Congressional session that year [September 10, 1973])

After the oil embargo had been in place for three weeks, he reaffirmed that statement members of Congress, under pressure from their constituents

created the Trans-Alaska Pipeline Authorization Act which removed all legal barriers from construction of the pipeline, provided financial incentives and granted a right-of-way for its construction

Trans-Alaska Pipeline Authorization Act was drafted, rushed through committee, and approved by the U.S. House of Representatives -- November 12, 1973

U.S. Senate passed the law the next day

President Nixon signed it into law -- November 16

PRESIDENT NIXON ANNOUNCES "I'M NOT A CROOK"

President Richard Nixon attended an hour-long question-and-answer session

with 400 Associated Press managing editors -- November 17, 1973

at Disney's Contemporary Resort in Lake Buena Vista, Florida

Mr. Nixon was tense and sometimes misspoke, but he maintained his innocence in the Watergate case at one point he stated: **"I want to say this to the television audience. I made my mistakes, but in all of my years of public life, I have never profited, never profited from public service. I have earned every cent. And in all of my years of public life, I have never obstructed justice. And I think, too, that I can say that in my years of public, life that I welcome this kind of examination because**

people have got to know whether or not their President is a crook. Well, I'm not a crook. I've earned everything I've got.”⁵⁷¹

OVAL OFFICE TAPE RECORDING IS ERASED

When tape recorded evidence of conversations in the Oval Office were investigated it was discovered that one recording held an 18½ minute gap
President Nixon's secretary, Rose Mary Woods, said she was reviewing the [June 20, 1972] tape when she said she had made “a terrible mistake” during transcription [on September 29] while answering the telephone she mistakenly hit the “record” button next to the “stop” button during the phone conversation she kept her foot on the activation pedal causing a five-minute portion of tape to be re-recorded
in fact, 18½ minutes of tape recording had been destroyed
(she later insisted she was not responsible for the additional 13 minutes of buzzing contents missing from the recording remain unknown to this day
H.R. “Bob” Haldeman's notes from the meeting showed that one of the topics of discussion was the arrests at the Watergate Hotel
Nixon said he never heard the conversation and did not know the topics of the missing tape)
(White House lawyers first heard the 18½ minute gap on the evening of [November 14, 1973] they decided to release the obviously altered tape after they decided there was “no innocent explanation” that they could offer)
Federal Judge John Sirica received the tape -- November 21, 1973

GERALD FORD BECOMES VICE PRESIDENT OF THE UNITED STATES

Gerald Rudolph “Jerry” Ford, Jr. was born Leslie Lynch King, Jr.
his mother separated from her husband, Leslie Lynch King just sixteen days after her son's birth
Jerry Ford grew up to become the congressman representing the Grand Rapids, Michigan district for twenty-five years [1949] to [1973]
his time in office was largely notable for its modesty
he did not write a single piece of major legislation in his entire career
Democratic election land slide victory for Lyndon Johnson and Democrats [1964] took thirty-six U.S. House of Representatives seats from the Republican Party
members of the Republican caucus looked for a new Minority Leader
after a closely contested election, Gerald Ford was chosen to replace the former Minority Leader
After Spiro Agnew's resignation from the Vice Presidency,
Gerald Ford was nominated for the position [October 12, 1973]
this was the first use of the vice-presidential vacancy provision of the 25th Amendment
United States Senate voted ninety-two to three confirm Ford -- November 27
U.S. House of Representatives confirmed Ford 387 to thirty-five the same day
One hour after the confirmation vote in the U.S. House of Representatives,
Gerald Ford took the oath of office as Vice President of the United States -- November 27, 1973

⁵⁷¹ Neil A. Hamilton, *Eyewitness History: The 1970s*, P. 175.

AMERICA'S OIL SHORTAGE DEEPENS

Gasoline shortages led to long gas lines at the service station pumps
gas-guzzler cars lost their popularity as fuel economy was the need of the day
nationwide, a 55 mile-per-hour speed limit on national highways was imposed
with great public outcry from rural areas -- especially in the Midwest of the United States
Gasoline rationing led to a two day nationwide truck drivers' strike and violence -- December 1973

RIGHT-OF-WAY IS GRANTED FOR THE TRANS-ALASKA PIPELINE

Federal right-of-way for the pipeline and transportation highway was granted -- January 3, 1974
oil companies signed the contracts that allowed work to start -- January 23, 1974
(however, cold weather, the need to hire workers, and construction of the Dalton Highway
meant work on the pipeline itself did not begin until [March 1975])

PRESIDENT NIXON'S "DIRTY TRICKS" CAMPAIGN IS IN FULL FORCE

Dirty trickster Donald Segretti carried out his assignment
to disrupt Democratic Presidential campaigns
he and his team artfully distributed illegal (in fact, forged) campaign literature
he circulated a faked letter on Democratic presidential candidate Edmund Muskie's letterhead
falsely alleging that fellow Democrat presidential candidate Henry "Scoop" Jackson
had an illegitimate child with a 17-year-old
other Muskie letters accused Democratic presidential candidate Hubert Humphrey
of sexual misconduct as well
after Muskie dropped out of the presidential race Democrats in Florida noted the similarity
between the Muskie sabotage incidents and false news releases on Humphrey's letterhead
stationery stolen from Democratic presidential candidate Hubert Humphrey's offices
accused Congresswoman Shirley Chisholm (D-N.Y.) of being "mentally unbalanced"
another mailing mischaracterized Humphrey
as supporting a controversial environmental measure that he actually opposed

YOUNG WOMEN BEGIN TO DISAPPEAR AND MANY ARE FOUND DEAD

An unknown person attacked more than a dozen young women
who were kidnapped, bludgeoned, strangled, raped and their bodies left in remote areas:

- Kathleen Merry Devine, 15, disappeared while hitchhiking to Oregon [November 15, 1973]
- Joni Lenz, a dancer and student at the University of Washington was severely beaten
while in her bed [January 4, 1974] but survived
- Lynda Ann Healy, 21, well known because of her radio station job broadcasting ski reports,
disappeared from her basement bedroom in the U.W. District -- February 1, 1974
- Donna Gail Manson, 19, disappeared from the campus of Evergreen State College
where she was a student [March 12, 1974]
- Susan Elaine Rancourt, 18, was on her way to a movie when she disappeared
from the campus of Central Washington State University in Ellensburg [April 17, 1974]
two coed Central Washington students later came forward to report encounters
with a man wearing an arm sling who asked for help carrying a load of books

to his brown or tan Volkswagen Beetle

- Roberta Kathleen Parks, 22, left to have coffee with friends at the Oregon State University Student Union Building when she disappeared from the campus [May 6, 1974]
 - Brenda Carol Ball, 22, was last seen playing pool in a tavern in Burien [June 1, 1974]
 - Georgann Hawkins, 18, disappeared from behind her sorority house near the University of Washington [June 11, 1974]
 - Brenda Baker's body is found in Millersylvania State Park south of Olympia
 - two women, Janice Ott, 23, and Denise Naslund, 19 were abducted in broad daylight both disappeared from Lake Samammish State Park [July 14, 1974]
 - Carol Valenzuela, 20, disappeared near Vancouver, Washington [August 2, 1974]
- suddenly the crime wave moved away from the Pacific Northwest
- body of an unidentified raped and strangled hitchhiker abducted in Boise, Idaho was discovered in Idaho [September 2]

PRESIDENT NIXON'S POSITION IS BECOMING PRECARIOUS

U.S. House of Representatives approved giving the House Judiciary Committee authority to pursue whether grounds exist for the impeachment of President Richard M. Nixon -- February 6, 1974
Thirty-eight member committee chaired by Congressman Peter Rodino (D-New Jersey) would determine if charges should be brought for serious misconduct while in office

LOWELL PAPER MILL SMOKESTACK IS DYNAMITED

Crowds of people gathered in the Everett suburb of Lowell to witness the end of pulp and paper production in the town
Everett Pulp and Paper Mill had operated for more than eighty years⁵⁷²
Morning dawned dull and gloomy with a dense fog -- February 9, 1974
but still the hillsides and streets in Lowell were swarming with onlookers holding cameras all awaiting the heralded dynamiting of the smokestack
fog was still in place when the detonation occurred
only the sound of the blast, the ghostly shadow slowing sinking in the heavy fog and the shudder as the towering chimney hit the earth served as evidence of the event

WASHINGTON'S CONGRESSWOMAN RETIRES

Congresswoman Julia Butler Hansen announced -- February 1974
that she would not run for re-nomination to an eighth term
(she resigned her seat effective [December 31, 1974])
In retirement she continued her endeavors as an author and playwright
(she had written an award-winning fictional work for juveniles, *Singing Paddles* [1952])
Julia remained busy tending her beloved garden, cooking, baking and keeping at her needlepoint
she also stayed active in state government administration
she was appointed [1975] to a six-year term on the Washington state toll bridge authority and state highway commission which she had helped create while in the state legislature

⁵⁷² Margaret Riddle, *The old Lowell Paper Mill's smokestack is ceremoniously dynamited, ending an era, on February 9, 1974*, Essay 8564, HistoryLink.org, April 1, 2008.

she chaired the Washington State Transportation Commission [1979-1980]
Julia Butler Hansen resided in Cathlamet, Washington until her death [May 3, 1988]
she is remembered with the Julia Butler Hansen Refuge
for the Columbian White-Tailed Deer in Cathlamet [1972];
Julia Butler Hansen Elementary School in Olympia, Washington [1994];
Julia Butler Hansen Bridge connects Cathlamet to Puget Island, Washington

FEDERAL JUDGE GEORGE BOLDT ISSUES HIS RULING ON INDIANS FISHING RIGHTS

(Fight over Native American fishing rights began [1964] with “fish-ins”

led by Robert Satiacum on the Puyallup River and Billy Frank on the Nisqually River
both defied Washington’s efforts to regulate its fishing)

Federal Judge George Boldt in his Tacoma courtroom in *U.S. V. Washington* -- February 12, 1974
ruled on use of the words “in common with” in treaties written in [1854-1855]

as meaning “sharing equally” -- restrictive state laws against native fishing were illegal
he reaffirmed Washington Indian tribes’ rights to fish in accustomed places

U.S. government’s treaty promise to secure the fisheries for the tribes was central
to the treaty-making process and that the tribes had an original right to the fish,
which they extended to white settlers

50% of the harvestable salmon and steelhead catch belonged to the Native Americans

Washington was not in any position to tell the tribes how to manage what belonged to them

Judge Boldt stated: **“The right of taking fish at usual and accustomed grounds and stations is further secured to said Indians in common with all citizens of the United States and of erecting temporary houses for the purpose of curing, together with the privilege of hunting and gathering roots and berries on open and unclaimed lands.”**⁵⁷³

At the same time Judge Boldt denied federal recognition and treaty rights to “landless” tribes

among the non-reservation tribes were the Samish, Snoqualmie, Steilacoom and Duwamish

One of history’s most important and controversial court decisions, Bolt rocked Indian-white relations

- it allowed Indians jurisdiction over Native American fishing away from the reservation,

- it also granted Indians the authority to manage their own fishery

and assured Native Americans the right to protect the fish harvest

Indians became key players in management of the resource

this led to the development of a charter committee to develop a constitution and bylaws

for the Northwest Indian Fisheries Commission -- an intertribal fishing commission

Indian protest group, Survival of the American Indian Association (SAIA), had been vindicated

(Nearly all of Judge Boldt’s decision was upheld by the U.S. Supreme Court

in a 6-3 decision [July 2, 1979]

principles established by the Boldt Decision have since been applied to other resources

including shellfish)

(Billy Frank received the Presidential Medal of Freedom [November 24, 2015]

this is the highest civilian award given in the United States

⁵⁷³ Walt Crowley and David Wilma *Federal Judge George Boldt issues historic ruling affirming Native American treaty fishing rights on February 12, 1974*, Essay 5282, HistoryLink.org, February 23, 2003.

President Barack Obama during the ceremony noted: **“Billy Frank, Jr. was a tireless advocate for Indian treaty rights and environmental stewardship, whose activism paved the way for the “Boldt decision,” which reaffirmed tribal co-management of salmon resources in the state of Washington. Frank led effective “fish-ins,” which were modeled after sit-ins of the civil rights movement, during the tribal “fish wars” of the 1960s and 1970s. His magnetic personality and tireless advocacy over more than five decades made him a revered figure both domestically and abroad. Frank was the recipient of many awards, including the Martin Luther King, Jr. Distinguished Service Award for Humanitarian Achievement. Frank left in his wake an Indian Country strengthened by greater sovereignty and a nation fortified by his example of service to one’s community, his humility, and his dedication to the principles of human rights and environmental sustainability.”**⁵⁷⁴

LOCAL SCHOOL DISTRICT LEVIES ARE NECESSARY TO FUND THE PUBLIC SCHOOLS

As state funding for local school districts were slashed by the State Legislature to off-set the loss of tax revenue coming into the state’s coffers

local “Maintenance and Operation Levies” increased local property taxes in school districts
levy funding in many district rose from 5% of the budget to 32%
voters could not understand why their local property taxes kept going up
as their local school district had less money

FEDERAL GRAND JURY INDICTES SEVERAL MEMBERS OF THE NIXON ADMINISTRATION

Federal Grand Jury in Washington, D.C. indicted several former aides of President Nixon for conspiring to hinder the Watergate investigation -- March 1, 1974

- White House Chief of Staff H.R. “Bob” Haldeman,
- Counsel and Assistant to the President John Ehrlichman,
- former Attorney General and Presidential Campaign Manager John Mitchell,
- Special Counsel to the President Charles Colson,
- Republican Party official Robert Mardian,
- Counsel to the Committee to Re-elect the President Kenneth Parkinson
- Gordon C. Strachan aide to H.R. “Bob” Haldeman

(had the charges against him dropped before the trial began)

these men became known as the “Watergate Seven”

Members of the grand jury also secretly named President Nixon as an “unindicted co-conspirator”
special prosecutor Leon Jaworski dissuaded the grand jury from an indictment of Nixon
he argued that a President could only be indicted after he left office

WORK BEGINS ON ALASKA’S DALTON HIGHWAY

Dalton Highway, once called the North Slope Haul Road (a name still sometimes used),
was built as a supply road to support the Trans-Alaska Pipeline System
this highway, which directly parallels the pipeline, is one of the most isolated roads in the U.S.

⁵⁷⁴ <https://www.whitehouse.gov/the-press-office/2015/11/16/president-obama-names-recipients-presidential-medal-freedom>

Work began on the 414-mile-long James W. Dalton Highway (Alaska Route 11) -- March 1974
route begins at the Elliott Highway north of Fairbanks, Alaska and ends at Deadhorse, Alaska
near the Arctic Ocean and the Prudhoe Bay oil fields
there are only three towns along the route: Coldfoot (population thirteen)
Wiseman (population twenty-two) and Deadhorse (twenty-five permanent residents)

TWO WATERGATE CONSPIRATORS ARE FOUND GUILTY

Dwight Chapin, Deputy Assistant to the President Richard M. Nixon, was the appointments secretary
(he had hired former colleague Donald Segretti to disrupt Democratic Presidential campaigns
through acts of political “sabotage” -- this was known as the “dirty tricks” campaign)
when Chapin appeared before the grand jury he denied any knowledge of Segretti’s activities
he was found guilty of lying to the grand jury -- April 5, 1974
and was sentenced to ten to thirty months in Alderson Federal Prison Camp, West Virginia
(he only served eight months in “Camp Cupcake” before being released)

Two days later, the same grand jury indicted Ed Reinecke,
Republican Lieutenant-Governor of California, on three charges of perjury -- April 7
during his testimony before the Senate Watergate Committee

CONSTRUCTION ON THE TRANS-ALASKA PIPELING BEGINS

Trans-Alaska Pipeline was to transport oil from the North Slope of Alaska
construction on the 800-mile pipeline to the tanker terminal at Valdez began -- April 29, 1974⁵⁷⁵
\$8 billion dollar project marked the end of Washington State’s economic downturn
caused by the elimination of 60,000 jobs at the Boeing Company
three million tons of construction material will be shipped from Seattle
as more than 70,000 construction workers will pass through Seattle to or from Alaska

PRESIDENT RICHARD NIXON ADDRESSES THE NATION

President Nixon, belatedly responded to the subpoena for tape recordings from the Oval Office
he said he would make available public forty-six White House conversation transcripts
related to the Watergate events -- April 29, 1974

Nixon explained why, up to that point, he had defied the subpoena
he cited the need to protect state secrets under the doctrine of executive privilege
he reported that he had edited the transcripts to exclude material that was “irrelevant”
to the Watergate investigation then being pursued in Congress

President Nixon invited House Judiciary members to review the tapes
to determine whether the transcripts omitted incriminating evidence
White House released 1,200 pages of transcripts to the House Judiciary Committee -- April 30

WASHINGTON STATE CAPITOL CAMPUS BECOMES A NATIONAL HISTORIC TREASURE

(It was decided to build a campus complex to house the state government rather than a single building
New York architects Walter Wilder and Harry White Wilder submitted the winning design

⁵⁷⁵ Dave Wilma, *Construction of the Trans-Alaska Pipeline begins on April 29, 1974*, Essay 3600, HistoryLink.org, October 7, 2001.

their plans were influenced by the Olmsted brothers
who served as consultants [1911-1912] and designed and supervised
construction of the landscaping for the campus [1927-1931]
construction on the first building, the Temple of Justice, began [1912] and was completed [1920]
next the Insurance Building and the power and heating plant were built
Legislative Building was constructed [1924-1928]
additional buildings on the campus were constructed during the next several decades)
Washington State's Capitol Campus was placed on the National Register of Historic Districts -- 1974

SPOKANE HOLDS ITS WORLD'S FAIR -- EXPO '74

Spokane wanted to celebrate its centennial

it was suggested that the city try for a worldwide event [1970]
at that same time, concerns over the pollution of the Spokane River surfaced
mining companies were eventually convinced to stop discharges into the water
these two movements came together in an environmental theme for the fair ⁵⁷⁶

Union Pacific, Burlington Northern, and Milwaukee Road railroads
deeded real estate to Spokane for the fairgrounds

Spokane satisfied all the requirements for staging a World's Fair

Bureau of International Expositions approved Spokane for a Category II Exposition

Spokane was the smallest city ever to be so honored

Canada was the first country to sign up and would later be joined by the United States, Soviet Union,
Korea, Germany, Japan, West Germany, Iran, and the Republic of China (Taiwan)
plans for the fair expanded to Canon Island, which became Canada Island,

and the adjacent south bank of the Spokane River in the center of the city

President Richard M. Nixon opened the fair -- May 4, 1974

Spokane proclaimed itself the first exposition held using an environmental theme:

“Celebrating Tomorrow's Fresh New Environment”

Several companies displayed their products: Kodak, General Motors and Ford each built a pavilion
with the exception of these pavilions, all of the major buildings were modular structures
that were assembled on the site

events such as a symposium at Expo '74, on United Nations World Environment Day [June 5],
and ECAFE (United Nations Economic Council for Asia and the Far East) Day [June 14]
demonstrated the importance of the environment to countries around the world

NORTHWEST INDIAN FISHERIES COMMISSION IS ESTABLISHED BY NATIVE AMERICANS

As salmon populations declined in the twentieth century,

competition between Indian, commercial, and sport fishers grew increasingly intense

Federal Judge George Boldt's [February 12, 1974] decision reaffirmed tribal treaty fishing rights
he ruled that Washington's salmon and steelhead fisheries must be co-managed
by the state and the tribe

this led to the development of a charter committee to develop a constitution and bylaws
for the Northwest Indian Fisheries Commission -- an intertribal fishing commission

⁵⁷⁶ Jim Kershner, *Expo '74: Spokane World's Fair*, Essay 1079, HistoryLink.org, May 28, 2014.

Tribes in each of the treaty areas formed councils to choose a commissioner:

- Nisqually, Puyallup and Squaxin Island tribes met as signers of the Medicine Creek Treaty;
 - Makah, as the only signers of the Treaty of Neah Bay, sent a representative from their tribe;
 - Lummi, Swinomish, Nooksack, Sauk-Suiattle, Upper Skagit tribes, Suquamish, Muckleshoot, Tulalip and Stillaguamish as signers of the Treaty of Point Elliott chose a representative;
- Lower Elwha Klallam, Port Gamble Klallam, and the Skokomish tribes as signers of the Treaty of Point No Point selected a representative;
- Hoh, Quileute and Quinault as signers of the Treaty of Olympia chose a representative (the Jamestown S'Klallam tribe when they regained federal recognition [1981] joined them)

Charter members, made up of representatives from the Western Washington treaty tribes, met in Seattle⁵⁷⁷ -- June 24, 1974

Northwest Indian Fisheries Commission members envisioned their organization as a way to:

- share tribal financial resources,
- more efficiently develop fishery management programs,
- offer a forum for the tribes to discuss policy and coordinated actions,
- improve public understanding of Indian cultures and treaty rights

After nearly a decade of antagonistic and sometimes violent conflict between the state and Indians a cooperative model was developed that led to more effective management of salmon resources

Northwest Indian Fisheries Commission developed working relationships with state agencies and other non-Indians

Northwest Indian Fisheries Commission focused on two areas to enhance fish runs

- preserving and restoring salmon habitat to restore salmon runs to harvestable numbers,
- developing fish hatchery and public information programs

However, despite these efforts to cooperate and manage the species, salmon populations continue to decline

TWO STATE POLITICAL LEADERS VIE FOR A STATE SENATE LEADERSHIP POSITION⁵⁷⁸

Democratic State Senator R. R. “Bob” Greive was a political force in Washington State

he was a tireless fundraiser, an astute tactician, and a master of hardball politics

he became Senate Majority Leader [1950s-1960s] and actively solicited donations from lobbyists

he used this money to help elect senators who, in turn,

helped him retain his leadership position

however, he had become unpopular with some Democratic senators over how he ran the Senate

and the strong-armed way he rewarded or punished fellow legislators

August “Augie” Mardesich, was a member of an Everett commercial fishing family and an attorney

he was appointed to the House of Representatives to replace his older brother Tony

who had died in a Bering Sea fishing accident that killed Tony and his father

two other brothers survived the sinking of the family purse seiner [1950]

Augie flourished in the State House of Representatives as he repeatedly won re-elections

he rose to become House majority leader before he moved to the State Senate [1964] a

⁵⁷⁷ Jennifer Ott, *A charter committee meets in Seattle to develop a constitution for the Northwest Indian Fisheries Commission on June 24, 1974*, Essay 9787, HistoryLink.org, March 28, 2011.

⁵⁷⁸ Kit Oldham, *Jury finds state senate majority leader August Mardesich not guilty of extortion and tax evasion charges on July 3, 1975*, Essay 8535, HistoryLink.org, March 18, 2008.

where he again rose through the leadership ranks
Mardesich decided to run against State Senator R.R. "Bob" Grieve
for the position of Majority Leader
Mardesich won the bitter battle and became majority leader for the [1973] legislative session
but the victory led directly to the charges against him that [in 1971]
he took a \$20,000 payoff from two garbage industry executives to pass legislation
that favored private garbage companies over public utility garbage collection services
Mardesich did not deny receiving the payments
but he contended they were campaign contributions unrelated to the legislation
Prosecutors convened a grand jury to investigate the allegation -- summer 1974
both of the two garbage company executives accused of paying the bribe refused to testify
until they were granted immunity from prosecution for anything they discussed
grand jury also heard from various legislators and candidates
(Former State Senate Majority Leader R.R. "Bob" Grieve he lost his Senate seat [November 1974]
he rebounded by winning a King County Council seat the following year)

U.S. SUPREME COURT RULES ON THE OVAL OFFICE TAPE RECORDING SUBPEONIA

In *United States v. Nixon*, the U.S. Supreme Court ruled by a unanimous vote of 8-0
that claims of executive privilege over the tapes were void -- July 24, 1974
Special Prosecutor did have the right to sue the President; and **"the generalized assertion of
[executive] privilege must yield to the demonstrated, specific need for evidence in a pending
criminal trial"**.
(Justice William Rehnquist, who had been appointed by Nixon,
recused himself from the trial)
Justice William O. Douglas considered this to be one of the courts most important decisions
President Nixon was forced to give the unedited tapes to Watergate Special Prosecutor Leon Jaworski

U.S. HOUSE OF REPRESENTATIVE IMPEACHES PRESIDENT RICHARD NIXON

To "impeach" is to bring charges against a federal official
U.S. House of Representatives Judiciary Committee approved its first article of impeachment
charging President Nixon with obstruction of justice -- July 27, 1974
six of the Committee's seventeen Republicans joined all twenty-one Democrats
U.S. House of Representatives Judiciary Committee approved the second article of impeachment
that charged Nixon with abuse of power -- July 29, 1974
U.S. House of Representatives Judiciary Committee approved the third article of impeachment
that charged Nixon with contempt of Congress -- July 30
Articles of Impeachment read:

"RESOLVED, That Richard M. Nixon, President of the United States, is impeached for high
crimes and misdemeanors, and that the following articles of impeachment to be exhibited to the Senate:

ARTICLES OF IMPEACHMENT EXHIBITED BY THE HOUSE OF REPRESENTATIVES
OF THE UNITED STATES OF AMERICA IN THE NAME OF ITSELF AND OF ALL OF THE
PEOPLE OF THE UNITED STATES OF AMERICA, AGAINST RICHARD M. NIXON, PRESIDENT
OF THE UNITED STATES OF AMERICA, IN MAINTENANCE AND SUPPORT OF ITS
IMPEACHMENT AGAINST HIM FOR HIGH CRIMES AND MISDEMEANOURS."

U.S. Senate would be charged with conducting a trial of the president on the charges
if the president was found guilty of the charges he would be removed from office
President Nixon's remaining support waned

PRESIDENT NIXON COMPLIES WITH THE SUBPEONA FOR THE WATERGATE TAPES

Ordered by the U.S. Supreme Court to deliver all of the Oval Office tapes
to Special Watergate Prosecutor Leon Jaworski
President Nixon agreed to comply with the order and released the subpoenaed tapes -- July 30, 1974

VICE PRESIDENT GERALD FORD LEARNS ABOUT THE WATERGATE COVER-UP

Following Gerald Ford's appointment to the Vice Presidency, the Watergate investigation continued
Presidential Chief of Staff Alexander Haig contacted Ford -- August 1, 1974
to tell him that "smoking gun" evidence left little doubt that President Nixon
was part of the Watergate cover-up
Ford, who had been Vice President only eight months, was stunned

WHITE HOUSE COUNSEL JOHN DEAN IS FOUND GUILTY

White House Counsel John Dean in exchange for becoming a key witness for the prosecution
pleaded guilty to a single felony count of conspiracy to obstruct Justice -- August 2, 1974
Federal Judge John Sirica handed down a sentence of one to four years in a minimum-security prison
(however, when Dean surrendered himself as scheduled [September 3] he was diverted
to the custody of U.S. Marshals, and kept in a special "safe house"
he spent his days of incarceration in the offices of the Watergate Special Prosecutor Jaworski,
and testifying in the trial of other Watergate conspirators:
•former U.S. Attorney General and Presidential Campaign Chair John Mitchell,
•Presidential Chief of Staff H.R. Haldeman,
•Counsel and Assistant to the President John Ehrlichman,
•Republican Party official Robert Mardian,
•Counsel to the Committee to Re-elect the President Kenneth Parkinson)

"SMOKING GUN" TAPES ARE RELEASED TO THE SPECIAL PROSECUTOR

White House released a previously unknown audio tape from [June 23, 1972] -- August 5, 1974
recorded a few days after the Watergate break-in that documented initial stages of the cover-up
it revealed Nixon and Haldeman met in the Oval Office and formulated a plan
to block investigations by having the CIA falsely claim to the FBI
that national security was involved

H.R. "Bob" Haldeman is heard to say: **Now, on the investigation, you know the Democratic break-in thing, we're back in the problem area because the FBI is not under control, because (FBI Director L.) Gray doesn't exactly know how to control it and they have--their investigation is now leading into some productive areas--because they've been able to trace the money--not through the money itself--but through the bank sources--the banker. And, and it goes in some directions we don't want it to go.**⁵⁷⁹

⁵⁷⁹ Los Angeles Times, *THE "SMOKING GUN" TRANSCRIPT*, July 21, 1990.

These tapes proved Nixon ordered a cover-up of the Watergate burglary six days after the break-in

PRESIDENT RICHARD NIXON RESIGNS FROM OFFICE

In a televised address to the nation -- 9:00 p.m. August 8, 1974

Richard Milhous Nixon announced he would resign as the 37th President of the United States at noon August 9, 1974

He told the citizens of the United States: **“In all the decisions I have made in my public life, I have always tried to do what was best for the Nation. Throughout the long and difficult period of Watergate, I have felt it was my duty to persevere, to make every possible effort to complete the term of office to which you elected me. In the past few days, however, it has become evident to me that I no longer have a strong enough political base in the Congress to justify continuing that effort. As long as there was such a base, I felt strongly that it was necessary to see the constitutional process through to its conclusion, that to do otherwise would be unfaithful to the spirit of that deliberately difficult process and a dangerously destabilizing precedent for the future....**

“I would have preferred to carry through to the finish whatever the personal agony it would have involved, and my family unanimously urged me to do so. But the interest of the Nation must always come before any personal considerations. From the discussions I have had with Congressional and other leaders, I have concluded that because of the Watergate matter I might not have the support of the Congress that I would consider necessary to back the very difficult decisions and carry out the duties of this office in the way the interests of the Nation would require.

“I have never been a quitter. To leave office before my term is completed is abhorrent to every instinct in my body. But as President, I must put the interest of America first. America needs a full-time President and a full-time Congress, particularly at this time with problems we face at home and abroad. To continue to fight through the months ahead for my personal vindication would almost totally absorb the time and attention of both the President and the Congress in a period when our entire focus should be on the great issues of peace abroad and prosperity without inflation at home. Therefore, I shall resign the Presidency effective at noon tomorrow. Vice President Ford will be sworn in as President at that hour in this office.”⁵⁸⁰

—Richard Nixon

PRESIDENT RICHARD MILHOUS NIXON LEAVES THE WHITE HOUSE

Secretary of State Henry Kissinger received a note from the White House -- morning, August 9, 1974

“Mr. Secretary, I hereby resign the Office of President of the United States.

Sincerely, Richard Nixon”⁵⁸¹

That same morning President and Mrs. Nixon and their family said farewell to the White House staff in the East Room

a helicopter carried them from the White House to Andrews Air Force base in Maryland

(Nixon later wrote that he thought, **“As the helicopter moved on to Andrews, I found myself thinking not of the past, but of the future. What could I do now....”** ⁵⁸²

at Andrews, he and his family boarded Air Force One to fly to

⁵⁸⁰ Journal of the Senate of the United States of America.

⁵⁸¹ Journal of the Senate of the United States of America.

⁵⁸² Jonathan Aitken, Nixon: A Life, P. 621.

El Toro Marine Corps Air Station in California,
then were transported to the Nixon home in San Clemente

VICE PRESIDENT GERALD R. FORD IS SWORN IN AS PRESIDENT OF THE UNITED STATES

Vice President Gerald R. Ford of Michigan took the oath as the new President -- noon August 9, 1974
to complete the remaining 2½ years of Nixon's term

Ford was the only person to assume the presidency without having been previously voted
into either the vice presidential or presidential office

in a speech broadcast live to the nation President Ford noted the peculiarity of his position: **“I am acutely aware that you have not elected me as your president by your ballots, and so I ask you to confirm me as your president with your prayers.”**⁵⁸³

WITH RICHARD NIXON OUT OF OFFICE SOUTH VIETNAM IS LEFT ON ITS OWN

United States cut military aid to South Vietnam -- August 1974

this resulted in the demoralization of the South Vietnamese army

Sensing that the end was near, North Vietnamese Army (NVA) and Vietcong
escalated their offensive against the Republic of Vietnam (South Vietnam)

U.S HOUSE JUDICIARY COMMITTEE PRESENTS ARTICLES OF IMPEACHMENT

Following President Nixon's resignation, House Judiciary Committee formally submitted
House Report 93-1305 -- August 20, 1974

which included the text of the resolution impeaching President Nixon
and stated the articles of impeachment against him

three Articles of impeachment were charged against the president

final paragraph summarized the charges: **“In all of this, Richard M. Nixon has acted in a manner contrary to his trust as President and subversive of constitutional government, to the great prejudice of the cause of law and justice, and to the manifest injury of the people of the United States. Wherefore Richard M. Nixon, by such conduct, warrants impeachment and trial, and removal from office.”**

BILL GATES ENTERS HARVARD UNIVERSITY

After graduation from Lakeside School, Bill Gates enrolled at Harvard in Cambridge, Massachusetts
to study mathematics or law -- September 1974

Paul Allen dropped out of Washington State University after two years

he accepted a job as a computer programmer at the Honeywell Corporation in Boston
so that he and Gates could continue working together

TEACHER STRIKES CLOSE SCHOOLS ACROSS THE STATE

Washington Education Association (WEA) led the state's first fall teachers' strikes

Federal Way Education Association (FEA) walked out for twenty days

district administrators kept the schools open as strikebreakers were hire

a court injunction was issued to force the teachers back into the classroom

⁵⁸³ Hamilton, Neil A., *The 1970s*, P. 207.

teaches defied the injunction
In Tacoma, TEA teachers also defied a court injunction for twelve days
administrators managed to open schools for one day using strikebreakers
Mukilteo School District teachers walked off the job for two days
superior court judge ordered the end of the school year be delayed to make up the time lost
Mead School District teachers struck for eight days
district administration kept the schools open as the teachers defied a court injunction
Yelm School District teachers walked a picket line for one day
while the schools remained opened
Goldendale School District teachers went on a one day strike until a court injunction was issued
Central Kitsap School District teachers spontaneously walked out for one day
Kelso School District teachers' two day strike ended before a court hearing could be held
school administrators kept the schools opened
Instructors at Olympic Community College went on strike
they were represented by the AFL-CIO American Federation of Teachers (AFT)

PRESIDENT GERALD FORD ISSUES A PARDON TO RICHARD NIXON

President Ford issued Proclamation 4311 which gave Richard Nixon a full and unconditional pardon for any crimes he may have committed against the United States
between [January 20, 1969] and [August 9, 1974] -- September 8, 1974
in a televised broadcast to the nation, Ford explained that he felt the pardon was in the best interests of the country, and that the Nixon family's situation was **“a tragedy in which we all have played a part. It could go on and on and on, or someone must write the end to it. I have concluded that only I can do that, and if I can, I must.”**⁵⁸⁴

When he announced the Nixon pardon, Ford also introduced a conditional amnesty program for Vietnam War draft dodgers who had fled to countries such as Canada
Nixon's pardon was highly controversial
critics derided the move and claimed a “corrupt bargain” had been struck between the men
New York Times stated the Nixon's pardon was **“a profoundly unwise, divisive and unjust act”**
that in a stroke had destroyed the new president's **“credibility as a man of judgment, candor and competence”** (*The New York Times*. [December 28, 2006])
President Ford's first press secretary and close friend Jerald Franklin terHorst resigned his post in protest after President Nixon's full pardon was granted

HOUSE JUDICIARY COMMITTEE ENDS ITS IMPEACHMENT PROCEEDINGS

Because of the resignation and pardon of former-President Richard Nixon
U.S. House Judiciary Committee voted to close the impeachment investigation
U.S. House of Representatives never voted on the resolution
thus there was no U.S. Senate trial to remove Richard Nixon from office
(Nixon proclaimed his innocence until his death [1994])

⁵⁸⁴ www.historyplace.com/speeches/previous.htm

in his official response to the pardon, Richard Nixon said that he “**was wrong in not acting more decisively and more forthrightly in dealing with Watergate, particularly when it reached the stage of judicial proceedings and grew from a political scandal into a national tragedy.**”⁵⁸⁵

PRESIDENT GERALD FORD APPEARS BEFORE CONGRESS

President Ford voluntarily spoke to Congress in a nationally televised appearance -- October 17, 1974 in sworn testimony regarding the pardon of President Richard Nixon,

President Ford admitted that a pardon was one of the many options presented for discussion by Nixon’s former chief-of-staff, Alexander Haig

but Ford denied having promised a pardon or having made any commitment at all regarding Nixon’s resignation

Ford declared “**There was no deal, period, under no circumstances.**”

SERIAL KILLINGS MOVE FROM WASHINGTON TO UTAH

- Nancy Wilcox, 16, a cheerleader, was dragged into a wooded area in Holladay, Utah where she was raped and strangled [October 2, 1974]
- Melissa Smith, 17, the daughter of the police chief of the Midvale, Utah disappeared after leaving a pizza parlor -- October 18, 1974
- Laura Aime, 17, disappeared about midnight after leaving a cafe in Lehi, Utah [October 30, 1974]
- Carol DaRonch, 18, a telephone operator in Salt Lake City, managed to escape from a man calling himself “Officer Roseland” [November 8, 1974]
she had been handcuffed but the effort to force her into his Volkswagen did not succeed she gave police a description of her attacker
- Debra Kent, a 17-year-old high school student in Bountiful, Utah disappeared later that same day after leaving an evening theater production at her school to pick up her brother

SPOKANE WORLD’S FAIR CLOSES

Expo ’74 “**Celebrating Tomorrow's Fresh New Environment**” ran 184 days
it drew 5.2 million visitors and ended almost even financially -- it was considered a success
blighted urban core of Spokane had been revitalized
an estimated \$150 million flowed into the local economy and surrounding region

Spokane’s World’s Fair closed -- November 3, 1974

exposition site became the city’s 100 acre Riverfront Park

(Several structures built for the fair remained standing

United States Pavilion today houses an IMAX theater built after the fair

as well as a winter ice rink that is put to other varied uses in the warm months

original covering of the U.S. pavilion was a thick vinyl sheeting not designed to last

it began to deteriorate and became unsightly and was thought to be a safety hazard

tent design itself with its heavy cables was not intended to stay up

however the people of Spokane voiced the opinion that it should remain

as a unique architectural statement, and a monument to the 1974 exposition

Washington State Pavilion still stands and is used

⁵⁸⁵ David Hosansky, *Eyewitness to Watergate*, P. 285.

as the Spokane Convention Center and the Opera House
Spokane's carousel remains a popular attraction
clock tower had been part of a Great Northern Railway depot that was demolished for Expo '74
featured the Fair's logo)

NATIONAL ELECTION IS HELD AFTER THE WATERGATE SCANDLE

Effect of Watergate was significant in Congress -- November 5, 1974

Democrats in the U.S. Senate increased by five seats

Washington's U.S. Senator Warren G. Magnuson won his sixth term in office

he continued to use his seniority and legislative skills to enact laws

that profoundly affected many aspects of American life

especially consumer protection

Democrats in the U.S. House of Representatives picked up forty-nine seats

in Washington State, all six incumbent members of Congress were re-elected

(five Democrats and a Republican) returned to Washington, D.C.

in addition, U.S. Representative Don Bonker, Democrat from Olympia, was elected to office

as he replaced retiring Democratic Congresswoman Julia Butler Hansen

(Congressman Bonker will serve seven term representing the state [1975-1989])

SEATTLE VOTERS CLOSE SAND POINT NAVAL AIR STATION

U.S. Navy had declared the land at Sand Point to be surplus⁵⁸⁶

When the Navy de-activated the station, Senator Magnuson led passage of a bill in Congress

giving the land to the city on condition that the runways be plowed under to make way for a park

Aviation buffs waged a five-year fight to keep the airport operating, but lost -- November 5, 1974

Seattle voters sided with Senator Warren G. Magnuson and city officials as they chose to reject

continued aviation use of the former Sand Point Naval Air Station on Lake Washington

CONGRESS PASSES AMENDMENTS TO THE [1966] FREEDOM OF INFORMATION ACT

Effect of the Watergate scandal on the election was significant

concern about misuse of personal information by federal officials

led to adding the Privacy Act of 1974 to the [1966] Freedom of Information Act

Privacy Act Amendments of 1974 were enacted into law -- November 21, 1974

they prohibited the disclosure of information without the written consent of the subject

as well as to laws requiring new financial disclosures by key government officials

these amendments regulated government control of documents which concerned a citizen

these amendments gave citizens:

- “(1) the right to see records about [one]self, subject to the Privacy Act's exemptions,**
- (2) the right to amend that record if it is inaccurate, irrelevant, untimely, or incomplete,**
- (3) the right to sue the government for violations of the statute including permitting**
others to see [one's] records unless specifically permitted by the Act.”

President Gerald Ford wanted to sign Freedom of Information Act -strengthening amendments

⁵⁸⁶ Patrick McRoberts, *Seattle City Council approves revised Magnuson Park-Sand Point plan on November 1, 1999*, Essay 2282, HistoryLink.org, January 1, 2000.

but concern by his chief of staff, Donald Rumsfeld, and deputy Richard Cheney about leaks and legal arguments that the bill was unconstitutional given by government lawyer (later U.S. Supreme Court Justice) Antonin Scalia and others persuaded Ford to veto the bill

However, when Congress voted to override Ford's veto, they gave the United States a stronger Freedom of Information Act that provided judicial review of executive secrecy claims (this is still in effect today)

At the same time, personal disclosures such as releasing federal candidates and officials income tax forms, while not legally required, became expected

NATIONAL FOOTBALL LEAGUE AWARDS A FRANCHISE TO SEATTLE

Seattle had long obsessed about joining the "big leagues" in sports it had some experience -- the Seattle Metropolitan hockey team won the Stanley Cup [1917] and the minor league Seattle Totems [1957-1974] played in the Western Hockey League Seattle SuperSonics made their National Basketball Association debut [1966] but what city leaders and fans really coveted were major league baseball and football teams⁵⁸⁷ League Commissioner Pete Rozelle awarded the "Seattle Professional Football" consortium led by a who's who of Seattle business leaders, including Lloyd W. Nordstrom, industrialist D. E. "Ned" Skinner, contractor Howard S. Wright, retailer M. Lamont Bean and entrepreneur Herman Sarkowsky who served as the chief operating officer Seattle's franchise cost \$16 million when the deal was completed -- December 5, 1974

NELSON ROCKEFELLER IS SWORN IN AS THE NEW VICE PRESIDENT

Vice President Gerald Ford's resignation from the Vice Presidency to assume the Presidency again triggered the use of the 25th Amendment to the U.S. Constitution for only the second time former-New York Governor Nelson Rockefeller was selected to become the new Vice President

Nelson Rockefeller, a moderate Republican, underwent extended hearings before Congress it was revealed he had made massive gifts to senior White House staff such as Henry Kissinger and used his personal fortune to finance a defamatory biography of a political opponent also, he had not paid all his taxes and owed nearly one million dollars in federal income taxes but no illegalities were uncovered and he was confirmed although conservative Republicans were not pleased that Rockefeller was picked, most of them voted for his confirmation

Nelson Rockefeller took the oath of office as the Vice President -- December 19, 1974

U.S. SUPREME COURT ASSOCIATE JUSTICE WILLIAM O. DOUGLAS SUFFERES A STROKE

U.S. Supreme Court Associate Justice William O. Douglas while vacationing in Nassau, The Bahamas suffered a massive stroke that left him partially paralyzed -- December 31, 1974

President Gerald Ford as House minority leader

⁵⁸⁷ Walt Crowley, National Football League awards Seattle a franchise for future Seahawks on December 5, 1974, Essay 7633, HistoryLink.org, February 2, 2006.

had filed impeachment papers against Douglas [1970]
however, he sent a military aircraft to the Bahamas to fly Douglas back to the United States

TRIAL OF THE PRESIDENT'S MEN IS CONCLUDED

In Judge John Sirica's federal courtroom evidence provided by White House Counsel John Dean resulted in a guilty verdict for six of the "Watergate Seven" -- January 1, 1975
only Counsel to the Committee to Re-elect the President (CREEP) Kenneth Parkinson was found not guilty
Judge Sirica adjusted John Dean's sentence to time served -- four months
but Dean was disbarred as a lawyer so he could no longer practice law

MAGNUSON-MOSS WARRANTY ACT GOES INTO EFFECT

As Chairman of the U.S. Senate Commerce Committee, Magnuson protected consumers
U.S. Senator Warren G. Magnuson and U.S. Representative John E. Moss (D-California) sponsored federal legislation to govern warranties on consumer products
to protect consumers from widespread deceptive warranty practices by merchants
this law set standards for warranties on consumer products
and demanded a sticker that listed the price, mileage performance
and extra equipment be placed on cars for sale on car lots
Magnuson-Moss Warranty Act provided consumers with access to reasonable and effective remedies
and provided for an informal dispute-settlement process
federal government was granted the authority to take legal action against a supplier or warrantor who failed to meet the requirements of the act
President Gerald Ford signed the Magnuson-Moss Warranty Act into law -- January 4, 1975

AUGUST MARDESICH IS CALLED BEFORE THE GRAND JURY

August "Auggie" Mardesich testified before the grand jury -- January 8, 1975
he asserted that payments from two garbage company executives
were campaign contributions to support his win as majority leader
and not related to his support for the garbage collection legislation
he reported using the money to purchase stamps for other political candidates
One day after Mardesich testified, the grand jury handed down an indictment -- January 9, 1975
Mardesich was charged with extorting two \$5,000 payments
and failing to report the \$10,000 on his federal tax return
Despite facing the felony charges, Mardesich remained Democratic State Senate Majority Leader
even as the grand jury investigated him during the 1975 legislative session
he eliminated the organization and procedures State Senator R.R. Bob Grieve had in place
he took credit for reforming the administration of political contributions
so that they were doled out by a committee rather than by the majority leader personally
he streamlined the State Senate's committee structure
he improved the process used for budget analysis

MAJORITY OF SCHOOL DISTRICTS IN WASHINGTON SUFFER DOUBLE LEVY FAILURES

Many poorer school districts were on the verge of bankruptcy -- 1975

voters in the state rebelled against high local property taxes
Under state law a school district whose voters failed to approve a levy proposal by a 60% “yes” vote suffered the loss to the levy and the money that would have been generated
but a school district could make a second effort to gain the necessary 60% approval
if the second levy effort failed, the school district lost the proposed revenue
Sixty-five school districts in the state representing over 40% of the state’s school population had suffered “double levy losses” by 1975
these levy losses led to a huge disparity
between rich school districts that were able to pass local levies
and poor school districts that were not able to pass local levies
In response to the crisis in school funding the State Legislature authorized an extensive study
former state budget director Wally Miller was contracted
to develop a public education finance and reform report

LEGISLATORS CLARIFY TEACHER COLLECTIVE BARGAINING RIGHTS

It was clear to teachers and the state legislature that a new bargaining law was needed
one that better regulated the bargaining process but also spelled out teachers’ right to bargain
Educational Employment Relations Act was lobbied through the legislature
by the Washington Education Association (WEA) -- 1975
school employees were given the right to organize and bargain collectively
through representatives of their own choosing
bargaining representative upon receipt of an appropriate authorization form, had the right
to deduct from the salary of all district employees an amount equal to the fees and dues
required for membership -- an “agency shop” fee
either an employer or a bargaining representative could declare an “impasse” between them
and could request a mediator to assist in reconciling their differences
Public Employment Relations Commission (PERC) was established to administer
Washington’s various public employee bargaining laws
members of the State Legislature omitted language that specifically permitted strikes by teachers
they also declined to pass any legislation specifically banning strikes
thus leaving state law silent on the subject of the legality of teacher strikes to this day
WEA’s plea to grant bargaining rights to community college staff was ignored
Under the new law, WEA and local education associations across the state organized and collaborated
as they went to the bargaining table with full-blown collective bargaining contract proposals
local bargaining was coordinated by the Washington Education Association (WEA)
so that a breakthrough by one local could be repeated by others across each region

BILL GATES AND PAUL ALLEN TEAM UP AGAIN ON A COMPUTER PROJECT

Paul Allen purchased the newest issue of *Popular Electronics* in Harvard Square -- January 1975
on the cover was a picture of the Micro Instrumentation and Telemetry Systems (MITS)
Altair 8800 minicomputer -- the first true personal computer
magazine’s cover story featured a computer kit that you could assemble yourself
Allen recognized that the computer would need programming language
he knew that he and Gates had the skills to code a programming language for it

he ran to show the article to Bill Gates
Both were convinced that there would be a market for software for the Altair
and the other desktop computers they believed would follow it
Gates agreed to collaborate with Allen on computer language called BASIC
(Beginner's All-purpose Symbolic Instruction Code) for the Altair computer
for the next eight weeks the two worked feverishly to adapt a version of their own
Bill Gates contacted MITS and asked to write software for them
then he began writing Altair BASIC
one tiny coding error could keep the software from working
neither Allen nor Gates had ever seen the Altair 8800 machine
MITS officials were impressed with Bill Gates and Paul Allen
it was decided to meet with Paul Allen at their corporate office in Albuquerque, New Mexico
to test the team's BASIC code on the Altair 8800
Allen loaded the team's code into the Altair -- on the second try the system worked as planned
Gates and Allen moved to Albuquerque to work for MITS

FEDERAL RESEARCH PROJECT IS LOCATED IN SEATTLE

Seattle officials offered 100 acre of the former Naval Air Station to the federal government
for use as the National Oceanic and Atmospheric Administration (NOAA)
Western headquarters⁵⁸⁸
Neighbors argued there were better locations for NOAA
and that the fleet of twelve research vessels up to 300-foot long
would damage the character of the residential neighborhood
Sand Point became the home of the NOAA headquarters -- February 22, 1975
(Another 195.6 acres later became Sand Point Park
which was then renamed Warren G. Magnuson Park after the long-serving senator)

SIX OF THE "WATERGATE SEVEN" ARE SENTENCED TO PRISON

Sentencing took place February 25, 1975

- White House Chief of Staff H.R. "Bob" Haldeman
was convicted of conspiracy, obstruction of justice, perjury and other charges
he was sentenced to a maximum of twenty-five years in prison and \$16,000 in fines
Haldeman served eighteen-months in prison
- Counsel and Assistant to the President John Ehrlichman
was convicted of conspiracy, obstruction of justice, perjury and other charges
he was sentenced to a maximum of twenty-five years in prison and \$40,000 in fines
Ehrlichman served eighteen months in prison
- former U.S. Attorney General and Presidential Campaign Chair John Mitchell
was the first Attorney General to be convicted and imprisoned due to illegal activities
he was found guilty of conspiracy, obstruction of justice and perjury
and was sentenced to two and a half to eight years in prison

⁵⁸⁸ Patrick McRoberts, *Seattle approves Sand Point site as the National Oceanic and Atmospheric Administration's Western headquarters on February 22, 1975*, Essay 2240, HistoryLink.org, January 1, 2000.

- after nineteen months he was paroled for medical reasons
- Special Counsel to the President Charles Colson pleaded guilty to obstruction of justice for his effort to defame the character of Pentagon Paper leaker Daniel Ellsberg he served seven months in Maxwell Correctional Facility in Alabama while there he founded “Prison Fellowship” [1976]
- Republican Party official Robert Mardian -- he was sentenced to ten months to three years but his conviction was overturned on appeal [1976] as the U.S. Court of Appeals ruled he should have been tried separately because his lawyer fell ill two weeks into the trial

U.S. AIRFORCE C-141A STARLIFTER CRASHES INTO MOUNT CONSTANCE⁵⁸⁹

Because of the demands of the long flight from The Philippines via Japan to McChord Air Force Base, a ten-man crew was flying the Starlifter at night over the Olympic Mountains -- March 20, 1975 also on board were six U.S. Navy sailors as passengers headed to new ship assignments Federal Aviation Administration (FAA) air traffic controller nearing the end of his shift confused the Starlifter for a northbound Navy A-6 Intruder on approach to Whidbey Island Naval Air Station Starlifter pilot was ordered to drop altitude to 5,000 feet C-141A crashed into Warrior Peak on the northwest face of Inner Mount Constance besides being nighttime, weather conditions in the Puget Sound area were extreme high winds, snow, freezing rain, a low cloud cover provided only a quarter-mile visibility Rescue operations began immediately McChord put rescue helicopters and an Air Force Disaster Preparedness Team on alert they waited for a break in the weather Coast Guard Air Station, Port Angeles, became base-of-operations for the impending search-and-rescue effort shortly after the plane’s disappearance, some 120 mountaineers from the Seattle, Everett, Tacoma, and Olympic Mountain Rescue Units and several military helicopters assembled there awaiting orders An Air Force Lockheed C-130 Hercules from McClellan AFB, California flying at 30,000 feet reported a rough “fix” on the Starlifter’s crash-locator beacon four hours after the crash in the mountains approximately twelve miles southwest of Quilcene in Jefferson County ground parties were flown by helicopter to Quilcene and prepared to hike to the crash site but first they needed the location pinpointed because of the rugged terrain and winter weather Bad weather continued to plague aerial search operations throughout the day but the wreckage was spotted about 4:20 p.m. March 21 it appeared the airplane impacted at about the 6,000-foot level then slid down the mountainside debris was scattered over a wide area on the steep slope-- no signs of life were detected (ten of the bodies were recovered over the next three months) Air Force C-141A Starlifter remains the biggest tragedy ever to occur in the Olympic Mountains

⁵⁸⁹ Daryl C. McClary, *U.S. Air Force C-141A Starlifter crashes into Mount Constance, on the Olympic Peninsula, killing 16 servicemen, on March 20, 1975*, Essay 8562, HistoryLink.org, April 29, 2008.

CONSTRUCTION ON THE TRANS-ALASKA PIPELINE ITSELF BEGINS

Construction on the Trans-Alaska Pipeline System began -- March 27, 1975

this was a massive undertaking by the Alyeska Pipeline Service Company

that involved tens of thousands of people who traveled North attracted by high-paying jobs

at a time when most of the rest of the nation was undergoing an economic recession

they endured long hours, extremely cold temperatures and brutal working conditions

difficult terrain, particularly in Atigun Pass, Keystone Canyon, and near the Sagavanirktok River

forced workers to come up with solutions for unforeseen problems

(More than 800 miles of pipe were laid, eleven pumping stations were built

and an entire port was constructed at Valdez, Alaska to serve oil tankers

waiting to transport oil from the pipeline's end to Cherry Point on Puget Sound near Ferndale

Some Washington State residents battled to halt both oil moving proposals:

- construction of the pipeline across the environmentally fragile Northern Tier of Alaska;

- transporting crude oil aboard supertankers traveling Puget Sound

both battles were lost

(Main construction effort lasted until [1977])

BILL GATES AND PAUL ALLEN BEGIN MICRO-SOFT

Bill Gates and Paul Allen co-founded the Micro-soft Corporation in Albuquerque -- April 4, 1975

Gates was known as a "man of action"

at just nineteen years old he was the Chairman and Chief Executive Officer of Micro-soft

Paul Allen, was the "idea man"

at twenty-two he was the Executive Vice President of Research and New Product Development

Micro-soft's senior technology post

COALITION AGAINST OIL PRODUCTION (CAOP) WINS ITS FIRST VICTORY

Washington State legislature passed the Tug Escort Law which banned

oil tankers over 125,000 deadweight tons from entering Puget Sound for at least two years

(supertankers could be as large as 1,000,000 deadweight tons)

While the Coalition Against Oil Production (CAOP) did not want more oil tankers in Puget Sound,

it was not opposed to a "superport" at or west of Port Angeles

with a pipeline going around, but not across, Puget Sound

it was reasoned that there was less chance of a spill if tankers did not cross into Puget Sound

and a spill in the Strait of Juan de Fuca would be much less harmful than one in Puget Sound

as this compromise plan began to look possible,

many people and organizations who had supported CAOP began to turn against it

it was argued that any oil port or pipeline would be too hazardous

Discord erupted within the Coalition Against Oil Pollution (CAOP)

many environmentalists began to feel that CAOP only opposed oil tankers in Puget Sound

while remaining blind to the dangers of an oil pipeline across the state

and supertankers in the Strait of Juan de Fuca

also, sixty-five percent of Port Angeles voters showed their disapproval in a referendum

COMMUNISTS ACHIEVE GAINS IN SOUTH VIETNAM AND CAMBODIA

North Vietnamese Army NVA and Vietcong troops closed in on Saigon -- April 17, 1975
while Communist-led Khmer Rouge troops captured the Cambodian capital of Pnomh Penh
Communist Khmer Rouge government led by Cambodian Maoist revolutionary Pol Pot
broke with its North Vietnamese sponsors and re-aligned with Chinese Communists
Pol Pot became the leader of Cambodia -- April 17, 1975
Khmer Rouge's economic policy was similar to, and possibly inspired by, China
Pol Pot imposed agrarian socialism forcing urban dwellers to relocate to the countryside
to work in collective farms and forced labor projects
"mutual assistance groups" were established in the areas they occupied
as collective farming replaced private land and equipment ownership
(an estimated 1.7 to 2.5 million people [of a population of slightly over eight million] died
of the combined effects of forced labor, malnutrition, poor medical care and executions
as a result of the policies of his three-year premiership)

FALL OF SIAGON, SOUTH VIETNAM

U.S. Marines and Air Force helicopters, flew from aircraft carriers off-shore
to begin a massive airlift -- April 29-30, 1975
over 1,000 American civilians and almost 7,000 South Vietnamese refugees
were flown out of Saigon in eighteen hours
Two U.S. Marines were killed in a rocket attack at Saigon's Tan Son Nhut airport
they were the last Americans to die in the Vietnam War -- 4:03 a.m. April 30, 1975
At dawn, the last Marines guarding the U.S. embassy were airlifted out of Saigon
American Combat troops pull-out was complete -- April 30, 1975
in Seattle, Joe R. Hooper, the most decorated U.S. soldier in the war
(Medal of Honor, two Silver Stars, six Bronze Stars, eight Purple Hearts) stated, **"For the first time it dawned on me that it was possibly a waste and a loss ... I am still proud of how I and my men fought. We proved we could still fight when our hands were tied."** (*Seattle P-I*)
Hooper took up work as a counselor for the Veterans Administration ⁵⁹⁰
Only hours later, looters ransacked the U.S. embassy
Communist North Vietnamese tanks rolled into Saigon, the capitol of South Vietnam
Communist forces captured the presidential palace in Saigon
Republic of Vietnam surrendered unconditionally
ending the Vietnam conflict -- April 30, 1975
In the fifteen years of fighting in Vietnam,
nearly a million North Vietnamese Army (NVA) and Vietcong troops had been killed
more than quarter of a million South Vietnamese soldiers died
hundreds of thousands of civilians had been killed
more than 58,000 Americans died in the war
With the fall of South Vietnam thousands of South Vietnamese "boat people" fled their country
Indochinese, Vietnamese, Cambodians, Hmong, Meo, and other ethnic groups

⁵⁹⁰ David Wilma, *Fall of Saigon to Communist troops marks the end of the Vietnam War on April 30, 1975*, Essay 3335, HistoryLink.org, June 4, 2001.

fled Communist rule -- many going to Thailand, Hong Kong and the Philippines
many of these refugees were associated with the American war effort and feared for their lives
The day after Saigon fell, thirteen Cambodian families arrived in Seattle from refugee camps
they were the first of a wave of the Indochinese migration to Washington state

FISHING RIGHTS IN WASHINGTON STATE REMAINS CONTROVERSIAL

Indian tribes met with opposition to their fishing and co-management rights -- 1975
years immediately following the Boldt decision upholding Indian fishing rights
were marked by rancor and conflict from non-Indian fishermen on the water
all the way up to the head of the state Department of Fisheries
state agencies and the tribes struggled to co-manage the fisheries
until Judge Boldt established the Fishery Advisory Board to moderate disputes
At the same time, non-Indian fishers harassed Indian fishermen and repeatedly fished illegally,
sometimes to create test cases to challenge the Boldt ruling
Washington State Attorney General, Republican Slade Gorton appealed the [1974] Boldt Decision
continued to appeal losses in federal court all of the way to the U.S. Supreme Court
Bills were introduced into Congress to end the Indian treaties
one proposal was made by Washington's U.S. Senator Republican Slade Gorton
another by Washington's Democratic Congressman Don Bonker

SEATTLE'S DISCOVERY PARK EXPANDS

Another 151 acres of the old Fort Lawton site became surplus⁵⁹¹ -- 1975
this land contained Fort Lawton's most significant and historic construction
many colonial-style homes and buildings were located around the parade grounds
to protect as many of these structures as possible, twenty-four buildings and the Parade Grounds
were placed on the National Register of Historic Places [1976]

SEATTLE'S NATIONAL FOOTBALL LEAGUE FRANCHISE GETS UNDER WAY⁵⁹²

(Former UW Husky executive John Thompson was hired as general manager [March 5, 1975])
Seattle's professional football team was named the "Seahawks" -- June 17, 1975
from a list of more than 20,000 entries to name the team
Thompson recruited Jack Patera to build and coach the new team
Thompson bravely (and wrongly) predicting that the Hawks
would play a Super Bowl game within four years

STATE SENATE MAJORITY LEADER AUGUST "AUGIE" MARDESICH GOES ON TRIAL⁵⁹³

Eight-day trial began with visiting U.S. District Court Judge Charles Renfrew
from San Francisco presiding [late June 1975]
Both garbage company executives admitted each gave Mardesich a plain white envelope

⁵⁹¹ Duane Colt Denfeld, Ph.D., *Fort Lawton to Discovery Park*, Essay 8772, HistoryLink.org, September 23, 2008.

⁵⁹² Walt Crowley, National Football League awards Seattle a franchise for future Seahawks on December 5, 1974, Essay 7633, HistoryLink.org, February 2, 2006.

⁵⁹³ Kit Oldham, *Jury finds state senate majority leader August Mardesich not guilty of extortion and tax evasion charges on July 3, 1975*, Essay 8535, HistoryLink.org, March 18, 2008.

with \$5,000 in cash on the day in [1971] that the Senate passed the bill their companies wanted but said that Mardesich but did not make any promises or threats
After deliberating for a day the jury was not convinced that the payments were extorted or should have been reported on Mardesich's income tax
jurors reported their verdict: not guilty on both charges -- July 3, 1975
however, August "Augie" Mardesich resigned his State Senate leadership position

TEACHERS IN THREE SCHOOL DISTRICTS GO ON STRIKE

Three Washington State school districts face strikes by their teachers -- 1975
Washington Education Association (WEA) affiliate in Clover Park (CPEA) teachers struck for thirteen days before a Superior Court judge appointed a special master to resolve the strike
West Valley School District faced a twelve day strike before a Superior Court judge imposed an injunction forcing WVEA teachers to return to work striking teachers defied the injunction
South Kitsap teachers during contract talks were locked out of their jobs for three days no court injunction was imposed but the school year was extended to make up the lost days

ATTACKS ON YOUNG WOMEN CONTINUE IN UTAH AND COLORADO

Based on the description given by two Central Washington State University coeds, Eastern Washington police sought a young man named "Ted" seem driving a Volkswagen he was seen speaking to Susan Elaine Rancourt before she disappeared
However, the unknown assailant continued to prey on his victims:

- Caryn Campbell, 23, a registered nurse, disappeared from the parking lot of her hotel in Snowmass, Utah [January 12, 1975]
- Julie Cunningham, 26, a sporting goods employee, disappeared while walking to a dinner date in Vail, Colorado [March 15, 1975]
- Denise Oliverson, 25, a homemaker, disappeared while riding her bicycle to her parents' house in Grand Junction, Colorado [April 6, 1975]
- Melanie Cooley, 18, disappeared from her school in Nederland, Colorado [April 15, 1975]
- Lynette Culver, a 12-year-old junior high student, was lured away from school while attending a youth conference she was drowned then sexually assaulted in Pocatello, Idaho [May 6, 1974]
- Susan Curtis vanished from the campus of Brigham Young University in Provo, Utah [June 28]
- Shelly Robertson, 24, disappeared from Golden, Colorado [July 1, 1975]
- Nancy Baird, 23, disappeared from the gas station where she worked in Layton, Utah [July 1975]
- Debby Kent, 17, disappeared from an ice skating rink in Bountiful, Utah [November 8, 1975]

TED BUNDY IS ARRESTED FOR POSSESSION OF BURGLARY TOOLS

Among thousands of tips received by police from a concerned public were five leads that pointed directly to Theodore Robert "Ted" Bundy who was arrested a Utah Highway Patrol officer after he failed to pull over for a routine traffic stop -- August 16, 1975
police noticed the front passenger seat was missing -- the officer searched his Volkswagen Beetle

a ski mask, a second mask fashioned from pantyhose, a crowbar, handcuffs, trash bags, a coil of rope, an ice pick, and other items assumed to be burglary tools were found but nothing sufficiently incriminating to hold him -- Bundy was released

Details of Ted Bundy's life began to emerge

his mother, Eleanor Louise Cowell, gave birth [November 24, 1946] in Burlington, Vermont at the Elizabeth Lund Home For Unwed Mothers

Ted was raised in his maternal grandparents' Philadelphia home

his grandfather was a tyrannical bully and a bigot who beat his wife

Ted Bundy was told his mother was his older sister

when he eventually discovered the truth he developed a life-long resentment regarding the lie

Ted's mother took the name Louise and left Philadelphia with her son

to live with her cousins in Tacoma, Washington

there Louise met Johnny Bundy, a hospital cook, and married -- Johnny formally adopted Ted

Bundy was described as "**well known and well liked**" by his friends at Wilson High School

he was considered to be a "**a medium-sized fish in a large pond**"⁵⁹⁴

however, Bundy described himself as a loner during his adolescence

he claimed he had no natural sense of how to develop friendships

After high school graduation [1965], Bundy attended the University of Puget Sound

before transferring to the University of Washington to study Chinese

he showed great promise -- he was good-looking and articulate

he was a bright student in subjects which interested him

but he dropped out of the U.W. [1968]

he worked at a series of minimum-wage jobs and volunteered at the Seattle office

of presidential candidate Nelson Rockefeller

he attended the 1968 Republican National Convention in Miami

as a Rockefeller delegate [August]

he took a volunteer position at a Seattle Crisis Clinic which tracked missing women

Bundy returned to the University of Washington and graduated [1972]

he joined Governor Daniel J. Evans' reelection campaign and became a Republican operative

recommendations from professors and political leaders allowed him to enroll

in the University of Puget Sound Law School (now Seattle University School of Law)

but he dropped out to enter the University of Utah Law School [fall 1974]

about the time the serial killing spree began there

NASA SENDS SPACE PROBES TO MARS

NASA's Viking program was comprised of two American space probes sent to Mars

Viking 1 and Viking 2 each had two main parts:

- an orbiter designed to photograph the surface of Mars from orbit,
- a lander designed to study the planet from the surface

orbiters also served as communication relays for the landers once they touched down

Viking 1 was launched -- August 20, 1975

(Viking 2 was launched [September 9, 1975])

⁵⁹⁴ Ann Rule, *The Stranger Beside Me*, P. 13.

TED BUNDY SELLS HIS VOLKSWAGEN BEETLE

After the sale of Bundy's car, Utah police impounded it,
FBI technicians dismantled and searched it -- September 1975
hairs matching samples obtained from Caryn Campbell's body were found
also hair strands belonging to Melissa Smith and Carol DaRonch were discovered

TED BUNDY IS CHARGED WITH AGGRAVATED KIDNAPPING

In a police lineup, Carol DaRonch identified Bundy as "Officer Roseland"
who attempted to abduct her
Witnesses from Bountiful, Utah also picked him from the same lineup
as the stranger lurking about the high school auditorium when Debby Kent went missing
Ted Bundy was indicted and released on \$15,000 bail paid by his parents -- September 1975
he spent most of the time between his indictment and his trial in Seattle

REPORT ON PUBLIC SCHOOL FINANCE AND REFORM IS DELIVERED

State Legislators received the report of former State Budget Director Wally Miller -- September 1975
his report concluded the public schools' finance system was **"the major contributing factor in creating unequal educational opportunities among students across the state and in creating inequalities in the relative tax burden borne by property owners."**⁵⁹⁵
his report recommended a uniform staff-to-student ratio be implemented state-wide
to be funded by the legislature
he proposed fifty staff members per one thousand students (a ratio of one to twenty)

GOVERNOR'S MANSION RE-OPENS AFTER RENOVATION⁵⁹⁶

Governor Daniel J. Evans and First Lady Nancy Bell Evans
opened their home to the press -- September 15, 1975
for a full tour of the restored and remodeled Washington state governor's mansion
originally built in [1908]
When the mansion had its first housewarming [January 1909] the women of Olympia
not only provided hospitality but also loaned their furniture for the occasion
This time, after more than three years of effort, the official residence re-opened
with decorations and furnishings donated through the private
Foundation for the Preservation of the Governor's Mansion organized by Nancy Evans
Renovation of the three-story Georgian Revival house was extensive
it included new wiring, plumbing, plaster and interior walls, added insulation, new paint,
refinished floors and fireproofing
fireplaces and chimneys were restored, and a new elevator was installed in the existing shaft
revised traffic patterns inside the house made it more comfortable
for both public use and private use by the governor's family

⁵⁹⁵ Miller & Associates (1975) Common School Financing and Reform: A Report to the Select Study Coordinating Committee of the Washington State Legislature, September 1975 (also called the Miller Report).

⁵⁹⁶ Dotty DeCoster, *Governor's mansion in Olympia re-opens on September 15, 1975*, Essay 9080, HistoryLink.org, July 29, 2009.

first floor additions included a new family dining room, solarium, restroom, gallery, family living room, staff sitting room, service area and renovated kitchen existing foyer, library, ballroom and formal public parlor were restored and redecorated public rooms were painted off-white -- green detailing showcased furnishings and decorations in the state dining room, landscapes suggestive of early Washington were hand-painted on canvas in the style of French wallpaper manufacturer Jean Zuber whose scenes of early America were popular in the early nineteenth century chandeliers, some original and some donated, graced the large public rooms late eighteenth- and early nineteenth-century period antique furniture enhanced the setting silver service and other silver objects from the State's collection also were displayed second floor saw two guest bedrooms with attached full bathrooms added, a small office was created for the governor's wife, family bedrooms and bathrooms were revised, family den and study were completely remodeled third floor, an existing dormitory, three staff bedrooms and a staff bathroom were repainted Outside the mansion, the garage was relocated, a new driveway and parking area were built and a sentry station for security staff was constructed, grounds were partly re-landscaped, exterior brick on the original parts of the building was waterproofed

STATE OF WASHINGTON IS SUED TO PROVIDE STABLE FUNDING FOR SCHOOL DISTRICTS

As widespread levy failures continue across the state, Seattle School District sued the State legislature *Seattle School District v State of Washington* alleged the state was not meeting its constitutional duty to make ample provision for funding education This case was heard in the courtroom of Thurston County Superior Court Judge Robert Doran -- 1975 superior court decisions delivered in Thurston County can be appealed directly to the State Supreme Court without having to be heard in the State Appellate Court

MICRO-SOFT RELEASED ITS FIRST SUCCESSFUL COMPUTER PROGRAM

Micro-soft licensed its first operating system to the Altair 8800 manufacturer -- fall 1975 (they dropped the hyphen one year later) It was much cheaper for manufacturers to buy Micro-soft's software than to write their own

SEATTLE CITY LIGHT ELECTRICIANS GO ON STRIKE⁵⁹⁷

Members of Seattle's International Brotherhood of Electrical Workers Local No. 77 asked for a fifteen percent pay raise -- City Light stood fast at eleven percent Local No. 77 struck just before the city council election Strikers threw their support behind Liem Eng Tuai, who was friendly to their position Tuai ran against John Miller, who backed the city's position in the dispute

⁵⁹⁷ David Wilma, *Seattle City Light electricians strike on October 17, 1975*, Essay 3611, HistoryLink.org, October 16, 2001.

Miller won the election along with Tim Hill who also backed the city
A federal mediator was called in to assist in the talks
a few weeks after the election, city negotiators came up with a package acceptable to both parties
but when the proposal was presented to the new city council, it was rejected -- talks broke off
Seattle City Light electricians struck -- October 17, 1975
twenty-seven supervisors stepped in to provide emergency work to City Light customers

JUSTICE WILLIAM O. DOUGLAS RETIRES FROM THE U.S. SUPREME COURT

After suffering a stroke that left him partially paralyzed and confined to a wheelchair
U.S. Supreme Court Associate Justice William O. Douglas remained determined
to return to full health and stay on the Court
However, Douglas's ill health and his mental energy drained,
he was forced to retire -- November 12, 1975
he had served on the Court under five chief justices and seven presidents
longer than any other Justice in American history -- thirty-six years and seven months
he established the records for the most opinions written, the most dissents written,
the most speeches given and the most books authored by any member of the Supreme Court
Associate Justice Douglas' was well versed in corporate law, including antitrust matters,
which was his specialty as a law professor
Associate Justice William O. Douglas was a strong advocate for civil liberties in his opinions
and was a determined supporter of the Bill of Rights as he argued for a literal interpretation
especially the First Amendment's command
that **“Congress shall make no law... abridging the freedom of speech...”**
which should be strictly enforced
Douglas he argued for a literal interpretation of the law
he was distrustful of establishments of all types
he considered himself a voice for the voiceless and powerless
However, his judicial style was unusual -- he wrote his opinions quickly
which sometimes meant they were poorly crafted
he did not attempt to elaborate justifications for his judicial positions
which were determined on the basis of writings, history and legal precedent
instead, Douglas was known for writing short, pithy opinions
which relied on philosophical insights, observations about current politics, and literature
as much as more conventional “judicial” sources
his love for the environment also carried through to his judicial reasoning

CONGRESS PASSES THE FEDERAL EDUCATION FOR ALL HANDICAPPED CHILDREN ACT

Education for All Handicapped Children Act, sometimes referred to as Public Law (PL) 94-142,
was enacted by Congress -- November 29, 1975
This act required all public schools accepting federal funds to provide equal access to education
and one free meal a day for children with physical and mental disabilities
Public schools were required to evaluate handicapped children and create an educational plan
with parent input that would follow as closely as possible the educational experience
of non-disabled students

PL 94-142 required that school districts provide administrative procedures
so that parents of disabled children could dispute decisions made about their children's education
if necessary, parents were authorized to seek judicial review of the administration's decision
PL 94-142 states that disabled students should be placed in the least restrictive environment
one that allows the maximum possible opportunity to interact with non-disabled students
however, the instructional goals in the regular classroom must not be adversely affected
Finally, PL 94-142 contains a due process clause that guarantees an impartial hearing
to resolve conflicts between the parents of disabled children and the school system

POWER SUPPLY WAS BECOMING INADEQUATE

(Low snow pack generated during the winter of [1972-1973] forced cutbacks of electricity
that was generated by conventional hydro sources
Arab oil embargo [1973] produced long lines at gas stations
which instilled a sense of looming shortages of cheap power)
Seattle City Light had purchased electric power generated by nuclear power Plants 1, 2 and 3
operated by Washington Public Power Supply Service (WPPSS)
made up of publicly-owned utilities -- 1975
WPPSS began construction on nuclear power Plants 4 and 5 -- 1975
WPPSS offered Seattle City Light the opportunity to participate
in the construction of nuclear power Plants 4 and 5
Tacoma City Light joined in these projects as well

ENVIRONMENTALISTS ARE CONCERNED ABOUT NUCLEAR POWER

Environmental movement began to question the wisdom of nuclear power -- 1975
Washington Environmental Council filed a lawsuit that required Seattle City Light
to produce an environmental impact statement on construction
of Washington Public Power Supply System (WPPSS) nuclear Plants 4 and 5
this would have delayed the process five years
In an agreement to drop the lawsuit, Seattle City Light opened up its decision-making process
public scrutiny was provided by a twenty-seven-member Citizens' Overview Committee
that began to look at Seattle's need for power and the best ways to provide it
To appease environmentalists, City Light first supported a ten percent share
of the construction of nuclear Plants 4 and 5
then quickly lowered the proposal to a five percent share

WINTER FLOODS STRIKE SNOHOMISH COUNTY⁵⁹⁸

One of the worst floods in Snohomish County's history began
snow in the mountains melted due to a sudden warm up
rain that melted the snow and pushed rivers out of their banks -- December 1, 1975
especially along the Snohomish River
Situation grew more serious as dawn approached -- December 2

⁵⁹⁸ Phil Dougherty, Disastrous flood strikes Snohomish County beginning on December 1, 1975, Essay 8504, HistoryLink.org, February 22, 2008.

Sultan and Skykomish rivers topped their banks and continued to rise
some Sultan residents spent the day frantically sandbagging their homes and storefronts
others paddled canoes along the streets of downtown Sultan in water two to five feet deep
but by nightfall the flooding in Sultan seemed to be abating,
and even though forecasts called for more flooding, no one anticipated what was coming
West of Sultan, the Snohomish River also rose above flood stage
residents of the Snohomish Valley were confident French Slough Flood Control station
with its six pumps capable of pumping a total of 300,000 gallons a minute
would protect against flooding
however, floodwaters tore a nearly 300-foot-wide hole in the French Slough dike
water poured into the valley rising so fast that people who had been laying sandbags
had little time to do anything except run -- 10 p.m. December 2
soon a 50,000-acre "lake" stretched between Everett and Monroe
stranded cattle were left standing atop dikes or other spots of high ground
in water that in some places came up to their necks
More dikes along the river failed, overwhelming sandbaggers -- December 3
dikes near Jackknife Bridge on the south end of Ebey Island (east of Everett) failed
residents were forced from their homes
parts of Ebey Island were soon under fifteen feet of water
by this time the flooding was so extreme that there was little more that could be done
In Snohomish County as the floodwaters rose about 330 people
were evacuated from their homes by helicopter, boat, and truck
emergency centers were set up by the Red Cross and Salvation Army
but most evacuees stayed with friends and relatives until they could return home
Flooding peaked during the fourth day -- December 4
Snohomish River at the city of Snohomish reached a record depth of 33.16 feet,
more than eight feet above flood stage
as many as forty dikes along the river had collapsed from the flood by the end of the day
loss of livestock, particularly cattle, was catastrophic
about 3,500 head of cattle and other animals were lost throughout Snohomish County
these cows didn't all drown
many died from exhaustion as a result of standing in cold floodwaters for several days
Finally the weather began to turn as cooler, drier weather had moved in -- December 5, 1975
Snohomish County rivers began dropping
ironically, remnants of the dikes that had failed during the flood
prevented proper drainage of the floodwaters as the flood receded
some fields remained flooded, in a few places up to ten feet deep, for several more weeks
As the flood retreated late in the week, the problem arose of how to dispose of the dead animals
Bryant landfill about three miles north of Arlington was identified as a disposal site
National Guard was given the enormous task of disposing of the decomposing animal carcasses
"Operation Cow," attracted sightseers from miles around to the landfill
to watch the cattle being buried in enormous 50-by-100 foot trenches twelve feet deep
Half a million sandbags had been used in the nearly weeklong water war
damage estimates ranged from \$8 million to \$50 million

more than 2,000 people driven from their homes and perhaps 300 homes had been damaged
on the positive side, no one was killed or even seriously injured
(French Slough Flood Control station was rebuilt -- and damaged once again
by flooding in November [1995] and February [1996])

SEATTLE CITY LIGHT ELECTRICIANS REMAIN ON STRIKE

City Light supervisors providing emergency service were tested
when a gasoline tanker wrecked on the Alaskan Way Viaduct -- December 4, 1975
power cables into downtown Seattle were destroyed
power outage lasted for thirty-six hours⁵⁹⁹

SEATTLE BROADCASTING LEGEND LEO LASSEN PASSES AWAY⁶⁰⁰

(Sportswriter and publicist Leo Lassen covered the city's Pacific Coast League teams [1931 to 1960]
his glory years matched those of the Seattle Rainiers when they played at Sicks' Seattle Stadium
baseball was the biggest game in town and Lassen was its voice
his distinctive rapid-fire delivery was packed with detail and baseball knowledge
he tried out for Seattle's Lincoln High School's baseball team
but was not good enough to make it
he worked as an office boy for the *Seattle Post-Intelligencer*
before becoming a sports reporter for the *Seattle Star* ([1918]
and became the newspaper's managing editor)
(When the paper closed because of the depression, he became a publicist
for Seattle Indians baseball team of the Pacific Coast League
although he had no radio experience the Indians hired him as their broadcaster
he was an astute observer and quickly became a baseball expert
he knew the players' mannerisms and could plausibly predict what they would do
home games for the Indians were played at Dugdale Field,
a ballpark with a double-deck grandstand at Rainier Avenue S and S McClellan Street
away games were covered by telegraph, with an operator at the ballpark
sending messages to a Seattle radio studio where Lassen would embellish the account
Lassen would sometimes fabricate scenarios taking place at the ballpark
to fill time unexpectedly created by technical delays
or if the telegraph lagged, he might invent extra foul balls or an argument at home plate
financially hard-pressed Seattle Indians were sold to local brewer Emil Sick
who vowed to give Seattle a first-class team and a first-class stadium
he named the team the Seattle Rainiers after his brewery)
(Rainiers played their first game at Sicks' Stadium [June 15, 1938] and drew 12,000 fans
Lassen was installed in a press box attached to the grandstand roof and reached by a steel ladder
he packed his accounts with every tug of a cap or wiggle of a bat
he knew the rules as well as the players, managers and umpires

⁵⁹⁹ David Wilma, *Seattle City Light electricians strike on October 17, 1975*, Essay 3611, HistoryLink.org, October 16, 2001.

⁶⁰⁰ Glenn Drosendahl, *Lassen, Leo H. (1899-1975)*, Essay 9760, HistoryLink.org, March 8, 2011.

and explained them in a way that listeners could understand and appreciate when the action was fast, so was his voice -- he almost reached the tempo of an auctioneer he liked to set the scene, perhaps referring to **“a Grandma Moses sky,”**
or noted that Mount Rainier was out and looming “like a big ice cream cone”
he often embellished his play-call with “Oh baby!”
if the game was close heading into the ninth inning, it was
“hang onto your rocking chairs”
most famous of all was his home run call:
“It’s a high fly ball to left field. Back-back-back, b-a-a-ck ... and it’s over!”
he signed off with a humble “uh, this is Leo Lassen speaking. I hope you enjoyed it.”⁶⁰¹

Leo Lassen’s broadcasting career ended when he resigned over a salary dispute shortly before the start of the [1957] season

in twenty-eight seasons he had broadcast roughly 5,000 games
he withdrew into private life, never returned to the ballpark where he had earned his fame
a lifelong bachelor, he spent his retirement caring for his mother
and tending his roses at his Wallingford home

Leo was inducted into the Washington State Sports Hall of Fame [1974]

Leo Lassen died at age 76 without any surviving family members

but with legions of fans -- December 5, 1975

Post-Intelligencer’s sports section the next morning ran the headline

“Lassen, Seattle Baseball Legend, Dies”

sports editor and long-time friend Royal Brougham wrote: **“His was the best known voice in the community for three decades. He created an entire dictionary of baseball terms. He was Mister Baseball. Leo Lassen died in the dark hours of early morning alone in the hospital room. A lonely man, he has no living relatives, and only a handful of close friends. But the pioneer broadcaster of the Seattle Rainiers had tens of thousands of admirers who knew him only as a voice.”**⁶⁰²

a memorial service was held at Ballard’s Crown Hill Lutheran Church -- December 9, 1975

where the organist played a slow, somber version of *Take Me Out to the Ballgame*

Seattle Parks and Recreation Department named a cluster of softball diamonds

at Lower Woodland Park the Leo Lassen Fields -- the small plaque there is his only memorial

SEATTLE CITY LIGHT ELECTRICIANS CONTINUE THEIR STRIKE⁶⁰³

Seattle’s Radical George Jackson Brigade was named after a dissident prisoner and Black Panther who was shot and killed during an alleged escape attempt at San Quentin Prison [1971]

brigade members bombed the Laurelhurst substation in the early morning hours January 1, 1976

causing \$737,137 in damage

power outage lasted several days but City Light supervisors restored power

SUPERIOR COURT JUDGE DORAN RULES IN THE SEATTLE SCHOOL DISTRICT LAW SUIT

⁶⁰¹ Glenn Drosendahl, “Lassen, Leo H. (1899-1775) HistoryLink.org Essay 9760, March8, 2011.

⁶⁰² Glenn Drosendahl, “Lassen, Leo H. (1899-1775) HistoryLink.org Essay 9760, March8, 2011.

⁶⁰³ David Wilma, *Seattle City Light electricians strike on October 17, 1975*, Essay 3611, HistoryLink.org, October 16, 2001.

State Superior Court Judge Robert Doran reaffirmed the constitutionally protected status of education he ruled that the State Legislature had failed to fully fund basic education -- January 14, 1976 he ordered the Legislature to define and fully fund a basic education program through regular and dependable tax sources -- local levy money could not be relied upon he gave the state until the [summer of [984] to restore cuts that had been previously made and to correct other deficiencies in its school finance system
State of Washington appealed Judge Doran's ruling to the State Supreme Court but the negative publicity of the legislature having violated the State Constitution was such an embarrassment that the legislature was forced to act even before the State Supreme Court made a final ruling

SEAHAWKS SUFFER A MAJOR LOSS EVEN BEFORE THEY TAKE TO THE FIELD⁶⁰⁴

As the finishing touches were being put on the Kingdome, the news arrived from Mexico that Seahawk owner Lloyd Nordstrom had suddenly died -- January 20, 1976
Brother Elmer Nordstrom assumed his ownership role in the family's behalf

SEATTLE CITY LIGHT ELECTRICIANS END THEIR STRIKE⁶⁰⁵

International Brotherhood of Electrical Workers Local No. 77 voted to approved a new contract 389 to 238 gaining a fifteen percent pay raise although they lost their two-hour lunch break
union members returned to work -- January 23, 1976
at ninety-eight days this was is the longest public employee strike in Washington history

ICE HARBOR DAM PROJECT IS COMPLETED

(Construction on the first phase of the Snake River Ice Harbor Dam located eight miles northeast of the town of Burbank, Washington and twelve miles east of Pasco took six year [1955-1961])
Second phase had begun [1961] that saw the addition of powerhouse units four through six installed all units began producing power -- January 1976

SCHOOL FUNDING BY THE STATE CONTINUES AS AN UNRESOLVED ISSUE⁶⁰⁶

Although he had resigned as State Senate Majority Leader conservative Democrat August "Augie" Mardesich from Everett was considered the most powerful legislator in the State
Mardesich created "Plan II" retirement system for teachers and public employees dramatically shrinking retirement benefits and saving money for the state
Mardesich also eliminated the Teachers Continuing Contract law teachers were left without any due process rights to protect them
Mardesich gave big business what they wanted, usually at the expense of employees

⁶⁰⁴ Walt Crowley, National Football League awards Seattle a franchise for future Seahawks on December 5, 1974, Essay 7633, HistoryLink.org, February 2, 2006.

⁶⁰⁵ David Wilma, *Seattle City Light electricians strike on October 17, 1975*, Essay 3611, HistoryLink.org, October 16, 2001.

⁶⁰⁶ Steve Kink and John Cahill, *The 1978 August Mardesich/Larry Vognild Campaign*, Essay 5685, HistoryLink.org, April 7, 2004.

and the unions that represented them⁶⁰⁷

FIGHT FOR ADEQUATE SCHOOL FUNDING CONTINUES

Washington State School Directors' Association (WSSDA) formed a school finance study committee
their proposal employed a "staff-to-student-ratio"
they also proposed a "cap" on local levies to restore a "uniform system of public schools"
and reduce the funding differences between property rich and poor school districts
Parents formed "Citizens for Fair School Funding" which became a state-wide coalition
they organized parents to lobby the legislature and increase public support for school funding

COALITION AGAINST OIL PRODUCTION (CAOP) WINS ANOTHER VICTORY

Governor Dan Evans, a strong proponent of environmental protection,
amended the state's Coastal Zones Management Plan
to prevent construction of a supertanker docks on Puget Sound -- 1976
When Washington became the first state to adopt a coastal management program
U.S. Senator Warren Magnuson led a celebration at Seattle's Olympic Hotel
Evans, Magnuson and many environmentalists feared the potentially catastrophic consequences
of allowing supertanker traffic in the narrow, treacherous, fog-bound approaches
to the northern sound through the San Juan Islands

TED BUNDY GOES ON TRIAL FOR KIDNAPPING AND ASSAULT

Ted Bundy stood trial for the Carol DaRonch kidnapping -- February 1976
on the advice of his attorney he forfeited his right to a jury
due to the publicity surrounding the case
kidnapping case against him was weak and deteriorated steadily
pretrial motions were consistently resolved in his favor
significant bits of evidence were ruled inadmissible
After a four-day trial and a weekend of deliberation,
Judge Stewart Hanson found him guilty of aggravated kidnapping and assault
(Bundy was sentenced to one to fifteen years in the Utah State Prison [June 30, 1975]
Utah conviction served its main purpose
to hold Bundy until he could be put on trial for murder)

KILLER WHALES ARE CAPTURED AND TAUGHT TO DO TRICKS

Orca whales are active, intelligent and large mammals
males range from twenty to thirty-two feet long and weigh over eight tons
females range from sixteen to twenty-three feet long and weigh three to almost six tons
It is extremely difficult to capture orcas and to provide a healthy environment for the captives
early attempts [1960s] caused many injuries and deaths to the mammals
during the [1960s] and [early 1970s], nearly seventy orcas were taken from Pacific waters
theme parks learned more about avoiding injury during capture and the care of orcas

⁶⁰⁷ Steve Kink and John Cahill, *The 1978 August Mardesich/Larry Vognild Campaign*, Essay 5685, HistoryLink.org, April 7, 2004.

they also discovered orcas could be trained to perform tricks
a great attraction to visitors

As commercial demand increased, growing numbers of Pacific orcas were captured peaking in [1970]
only eighty wild orcas were left in the Southern Resident community -- 1976
(and the whale pod remains on the endangered list even today)

Ted Griffin, a whale catching entrepreneur, rounded up a pod of orca whales for potential sale
U.S. District Judge Morell Sharp issued a restraining order
to stop the enterprise -- March 13, 1976

Senator Magnuson and his staff hurried to make the injunction permanent by law

Gerry Johnson of Magnuson's staff said, **"We worked at breakneck speed on the act for two days. Still, it wasn't fast enough. Time was running out on the restraining order. I so informed the senator. He said, 'Get me Mo [Judge Sharpe] on the telephone.' I was surprised and told Magnuson 'you can't interfere with a federal judge.' But he insisted. I got Judge Sharpe and Magnuson told him, 'I've got this little bill on marine mammals but I need just a few more days to work it out.' When he hung up, Magnuson said, 'He's going to extend the order.' We passed the bill through Congress a few days later."**⁶⁰⁸

(Magnuson-Stevens Fishery Conservation and Management Act became law a few days later)

KINGDOME, HOME OF THE SEATTLE SEAHAWKS, OPENS TO THE PUBLIC

Kingdome opened to a crowd of 54,000 -- March 27, 1976

Kingdome's 1976 debut followed a lengthy public debate surrounding site and budget
that began in [1959] and continued until the Kingdome was deconstructed
by implosion [March 26, 2000]

opening ceremony coincided with the nation's bicentennial

more than 6,000 performers participated including **"ethnic groups, Boy Scouts, Girl Scouts, Camp Fire Girls, armed forces color guards, antique and classic cars, log rollers, drill teams, square dancers, barbershoppers, a choral group of 1,717 voices from 23 schools and a massed band of 2,680 instruments from 32 schools ... and Rufus, the Frisbee-chasing dog."**⁶⁰⁹

(During its lifetime the Kingdome was a huge success seeing more than 2,425,000 visitors

Billy Graham crusade [May 14, 1976] drew 74,000 visitors -- more than any other event that year
best-attended professional football game was a pre-season contest with the Los Angeles Ram
that drew 62, 532 fans [August 14, 1976]-- Seahawks lost 16-13
largest "consumer show" was the [1976] boat show attended by 119,007⁶¹⁰)

END OF THE McNEIL ISLAND FEDERAL PENITENTIARY ERA

Federal Bureau of Prisons decided to phase out the 107-year-old federal penitentiary
it was declared "obsolete" because it was too big, too old, too remote
and too expensive to maintain and renovate

⁶⁰⁸ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*, P. 295.

⁶⁰⁹ Heather MacIntosh, *Kingdome: The Controversial Birth of a Seattle Icon (1959-1976)*, Essay 2164, HistoryLink.org, March 1, 2000.

⁶¹⁰ Heather MacIntosh, *Kingdome: The Controversial Birth of a Seattle Icon (1959-1976)*, Essay 2164, HistoryLink.org, March 1, 2000.

newest trend in prisons was toward smaller, more manageable prisons,
housing no more than 500 inmates
Federal Government began shutting down the McNeil Island facility -- 1976

HOW TO BEST USE McNEIL ISLAND COMES UNDER DEBATE

Washington State had a severe shortage of prison space and was under a federal court order
to take speedy action to correct the situation
Washington's need for additional prison space prompted state officials to explore the possibility
of acquiring the prison to house state prisoners
However, as it was becoming available there were other pressures for use of McNeil Island⁶¹¹
environmentalists wanted the entire island to be preserved as a wildlife sanctuary
state legislators wanted to use the facility to relieve overcrowding
at the Walla Walla State Prison and other state institutions
Governor Dixy Lee Ray promoted a plan to build a new \$35,000,000, 500-bed prison in Monroe
thus she was opposed to the idea of the state taking over McNeil Island Federal Penitentiary
she argued that the island was too beautiful and too expensive to use as a prison
she refused to ask the federal government to preserve the prison for possible state use
she proposed it be turned into a state park
McNeil Island's founding families, that is homesteaders and their descendants,
felt the island should be returned to them
they argued that in [1936] there were about 500 civilians, mostly farmers, living on the island
federal government had offered the landowners \$50 an acre,
or it would condemn the property using *eminent domain*
(taking private property for public use) at that price
but the federal government said if the land was ever abandoned,
the original land owners, or their descendants, could have it back
unfortunately, that promise was never documented
some of the former homesteaders stated that they would take their fight to court or Congress

NASA'S VIKING 1 SPACE PROBES ARRIVES AT MARS

Viking 1 reached orbit above Mars -- June 19, 1976
its primary mission objectives were to obtain high resolution images of the Martian surface,
discover and characterize the structure and composition of the atmosphere and surface
and search for evidence of life
(Viking 1's lander reached the surface of Mars [July 20, 1976]
its orbiter remained operational until [August 17, 1980]
Viking 1's lander remained operational until [November 13, 1982])

NEW FOREST PRACTICES RULES TAKE EFFECT

(State law required reforestation as a condition of a logging permit [1945]
but compliance was uneven

⁶¹¹ Daryl C. McClary, *McNeil Island and the Federal Penitentiary, 1841-1981*, Essay 5238, HistoryLink.org, April 17, 2003.

Congress passed the Clean Water Act [1972] that regulated pollution such as logging operations during the following decades, rules were added to cover scenic vistas, archeological resources, and threatened and endangered species

Washington Legislature passed the Forest Practices Act [1973] which provided for the development of rules to guarantee sustainable yields for state, municipal and private forests while protecting other resources

loggers, environmentalists, governmental agencies, treaty fishing tribes, and land developers all had a say in the process

competing interests vied for attention and influence before the Forest Practices Board which resulted in an adversarial and contentious environment

dissatisfied stakeholders took their cases to court)

New forest practices rules regulated logging and its impacts on the environment – July 1, 1976
this is the first major change in the regulation of logging in thirty years

AMERICA CELEBRATES ITS BI-CENTENNIAL (TWO HUNDRED YEAR) ANNIVERSARY

Waves of patriotism and nostalgia swept the nation

there was a general feeling that the irate era of the Vietnam War and the [1974] Watergate crisis had finally come to an end

Across America celebrations of signing of the Declaration of Independence were held -- July 4, 1776

festivities included elaborate fireworks displays in the skies above major American cities

local observances included painting mailboxes and fire hydrants red, white and blue

Celebration in Washington, D.C. was presided over by President Ford and televised nationally

large international fleet of tall-masted sailing ships gathered first in New York City -- July 4

before going on to Boston about one week later

vessels docked and allowed the general public to board the ships in both cities,

while their sailors were entertained on shore at various ethnic celebrations and parties

Britain's Queen Elizabeth II and her husband, Prince Philip,

arrived aboard the Royal Yacht *Britannia*

they toured the Eastern Seaboard including Philadelphia, Washington, D.C., Virginia, New York, Connecticut and Massachusetts

President Gerald Ford and First Lady Betty Ford dined with the Royal Couple

in the White House President's Dining Room

The *American Freedom Train* set out from Wilmington, Delaware on a twenty-one month journey covering 25,388 miles across the forty-eight contiguous states

national railroads and shortlines painted locomotives or rolling stock

in patriotic color schemes

many military units marked aircraft with special designs in honor of the Bicentennial

U.S. Department of the Treasury issued special designs as part of the Bicentennial celebration:

- quarter featuring a colonial drummer and a torch encircled by thirteen stars;
- half dollar featured Independence Hall where the original signing took place in Philadelphia;
- silver dollar displayed the Liberty Bell (also in Philadelphia) superimposed over the Moon;
- two dollar bill was reintroduced (and was discontinued [1966])

featuring the Founding Fathers signing the Declaration of Independence on the reverse side

WASHINGTON STATE NURSES ASSOCIATION GOES ON STRIKE IN SEATTLE

Washington State Nurses Association (WSNA) members demanded
a 13% wage increase the first year of its contract with 8% raises the next two years
WSNA also supported “nursing practice committees” to influence the number of nurses
needed for various wards and patients
“agency shop” (only union member would be employed) was also contested
Seattle Area Hospital Council (SAHC) offered 8% annual raises
with no “nursing practice committees” or “agency shop”
Washington State Nurses Association (WSNA) supported the first nurse’s strike
in the history of the state of Washington as nurses walked out -- July 11, 1976

SEATTLE CITY COUNCIL REJECTS NUCLEAR POWER IN FAVOR OF CONSERVATION

Washington Public Power Supply System (WPPSS) construction plan
came under increased suspicion as projected costs rose from \$4.1 billion to \$12 billion
Seattle City Light produced a study, *Energy 1990*, which examined ways to meet future power needs
energy policy had been entirely in the hands of specialists at City Light
Seattle City Light planners expected the demand for electricity would continue to double
every ten years as it had in the past
Seattle Mayor Wes Uhlman gave Seattle citizens a greater role in energy policy development
citizens and consultants argued whether the energy generated by WPPSS Power Plants 4 and 5
would be necessary to meet future needs -- or would conservation measures such as
insulating homes and amending building codes to include energy efficient materials
be adequate to meet anticipated increased demands⁶¹²
Seattle City Council voted down participation in the WPPSS nuclear plants -- July 12, 1976
at the same time, the council adopted five resolutions
making conservation the long-term energy policy in Seattle

SENATOR HENRY M. (SCOOP) JACKSON RUNS FOR THE PRESIDENCY

Henry Jackson campaigned for the Presidency for a second time -- summer 1976
he maintained his Hawkish position regarding the war in Vietnam
Senator Warren Magnuson had been clearly opposed to the war effort
Relationship between Washington’s two U.S. Senators could easily have been fractured
yet both senators supported each other in promoting the interests of Washington State
especially in protecting the region’s environment
but most of all, Scoop and Maggy kept the federal money rolling into Washington

SEATTLE SEAHAWKS PLAY THEIR FIRST HOME EXHIBITION FOOTBALL GAME

Seahawks took to the Kingdome’s Astroturf for the first time -- August 1, 1976
to face the San Francisco 49ers in an exhibition game
Seattle lost 27-20, but no one seemed to care much
Seattle was in the “big-leagues” at last
in fact, fans were inspired by the skills of exciting new players

⁶¹² David Wilma, *Washington Public Power Supply System (WPPSS)*, Essay 5482, HistoryLink.org, July 10, 2003.

such as Quarterback Jim Zorn and wide-receiver Steve Largent
Zorn was tackled at the 49er two yard line as time expired

NASA'S VIKING 2 SPACE PROBE REACHES MARS

Viking 2 began its orbit around Mars -- August 7, 1976

like Viking 1, its mission was to obtain high resolution images of the Martian surface,
discover and characterize the structure and composition of the atmosphere and surface
and search for evidence of life

(Viking 2's lander reached the surface of Mars [September 3, 1976]

its orbiter remained operational until [July 25, 1978]

Viking 2's lander remained operational until [April 11, 1980])

EXPLOSION AT THE HANFORD NUCLEAR WEAPONS PLANT⁶¹³

Harold McCluskey, a 64-year-old chemical operator, was working when a chemical reaction
resulted in an explosion that shattered the glass box protecting him -- August 30, 1976

he was blinded and cut -- he was showered with nitric acid and radioactive materials

he inhaled approximately 500 times the occupational standard

for americium 241, a plutonium byproduct

other workers who rendered assistance also were contaminated

McCluskey became so radioactive that to avoid exposing others

Dr. Bryce Breitenstein placed McCluskey in a special steel and concrete isolation unit
and treated him there for five months

Dr. Breitenstein administered an experimental drug

which flushed eighty percent of the contamination out of McCluskey's system

(Harold McCluskey survived and retired

he received a settlement of \$275,000 plus medical care for life -- he died [1987]

he had been exposed to the highest dose of radiation known to a human who survived)

MORE TEACHER STRIKES TAKE PLACE IN WASHINGTON STATE

State law regulating teacher collective bargaining went into effect -- 1976

this legislation specifically declined to make teacher strikes legal or illegal

Three school districts in the state faced strikes by their teachers -- August 1976

- teachers in the Evergreen School District (EEA) were locked out for five days;
- Everett teachers (EEA) struck for five days until faced with a court injunction forcing them back;
- Seattle Teachers Association (STA) went on strike for twelve days
before their contract was settled

SEATTLE SEAHAWKS PLAY THEIR FIRST OFFICIAL FOOTBALL GAME

Expansion Seahawks coached by Jack Patera played their first game -- September 12, 1976

sold out crowd of 58,441 fans saw the Hawks' desperation final pass intercepted in the endzone
which resulted in a 30-24 loss to the S. Louis Cardinals

⁶¹³ David Wilma, *Harold McCluskey becomes the Atomic Man at Hanford on August 30, 1976*, Essay 5692, HistoryLink.org, April 23, 2004.

(Seahawks would go on to lose their first five games before they beat their expansion team brothers the Tampa Bay Buccaneers 13-10 in Tampa [October 17]
three weeks later the Seahawks would earn their first home victory
when they beat the Atlanta Falcons 30-13 [November 7]
these two wins would be the only victories for the first year team
as the Seahawks completed a typical expansion-like record of 2-12)

SEATTLE NURSES STRIKE IS SETTLED

Washington State Nurses Association (WSNA) and Seattle Area Hospital Council (SAHC)
agreed on a new three-year contract which consisted of an 8-12% pay raise the first year
and 6% pay raises each of the following two years
seventy-four percent of the 2,200 affected WSNA member nurses
voted to ratify this contract -- September 17, 1976
sixty-eight day strike was one of the nation's longest strikes that year
However, this settlement was a disappointment to many nurses
SAHC did not grant unconditional amnesty to all the striking nurses
more than eighty of the striking nurses lost their jobs
but they did receive first priority for future openings

TED BUNDY PLANS TO ESCAPE FROM THE UTAH PRISON

Serving time for kidnapping, Ted Bundy was found hiding in bushes while carrying an "escape kit"
which contained road maps, airline schedules and a social security card -- October 1976
After his capture Bundy spent several weeks in solitary confinement

NATIONAL, STATE AND LOCAL ELECTIONS

Democrat Jimmy Carter defeated incumbent Republican Gerald Ford -- November 2, 1976
Washington's U.S. Senator Henry M. "Scoop" Jackson, who had lost his second bid
for the presidency in the Democratic Primary Elections, easily won his fifth U.S. Senate term
Jackson's campaign did well in the Massachusetts and New York primary elections
then fell apart in Florida and Pennsylvania where Jimmy Carter took the lead
while Washington State supported President Ford
Carter was the first candidate from the Deep South to win the presidency since the Civil War
Dixie Lee Ray was elected the state's first woman governor
although closely tied to the national Republican Party she ran as a Democrat
she defeated Republican King County Executive John Spellman 53.14% to 44.43%
One change in Washington's congressional delegation took place
Congressman Norm Dicks was elected to office
Port Orchard Democrat served on Senator Magnuson's staff in Washington, D.C.
he took the position previously held by Representative Floyd V. Hicks in the Sixth District
when Hicks resigned to accept an appointment to the Washington State Supreme Court;
remainder of Washington's Congressional delegation
was composed of five Democrats and one Republican
Washington State's legislature remained split exactly as it had been before the election
Democrats held a thirty to nineteen seat lead in the State Senate

State House of Representatives remained split sixty-two to thirty-six in favor of the Democrats

DIXIE LEE RAY IS ELECTED WASHINGTON'S FIRST WOMAN GOVERNOR

Born in Tacoma, Dixie Lee Ray was trained as a zoologist

she served as an associate professor of marine biology at the University of Washington

she became director of the Pacific Science Center [1963]

Republican President Richard Nixon had appointed Dixie Lee Ray
to the Atomic Energy Commission

her appointment had been strongly supported by presidential advisor

and member of the Washington State Bar Association John Ehrlichman [1972]

she apparently did not fit in well and was soon transferred to the State Department

where she served as Undersecretary to Secretary of State to Henry Kissinger

she resigned from that position to run for governor of Washington State as a Democrat

Dixie Lee Ray was elected the first woman governor of the state

in the aftermath of the Watergate scandal, state voters wanted a political outsider

she was outspoken (sometimes to a fault), quick to judge

and totally unfamiliar with the political ways in Olympia

Governor Ray generated more controversy than accomplishments:

- she signed a bill reducing welfare;
- she advocated reductions in environmental protections;
- she supported nuclear power;
- she advocated the use of supertankers to carry oil on Puget Sound;
- she was well known for her feud with the media

(eleven piglets were born at her home on Fox Island which she named after reporters [1978])

a year later she treated the press to sausages made from the pigs)

Governor Dixie Lee Ray served for one term

TED BUNDY IS TRANSFERRED TO PRISON IN COLORADO

Colorado authorities charged Ted Bundy with registered nurse Caryn Campbell's murder

after resisting at first, Bundy waived extradition from Utah

he was transferred to the county jail in Aspen, Colorado -- January 1977

STATE OF WASHINGTON IS SUED TO PROVIDE STABLE FUNDING FOR SCHOOL DISTRICTS

After the wide spread levy failures in the mid-1970's,

Seattle School District sued the State legislature

(Seattle School District v State of Washington) -- 1977

State Superior Court Judge Robert Doran reaffirmed the constitutionally protected status of education

he ruled that the State legislature had failed to fully fund basic education -- January 14, 1977

and gave the state until the [summer of 1984] to restore cuts that had been previously made

and to correct other deficiencies in its school finance system

State of Washington appealed Doran's ruling to the State Supreme Court

but the negative publicity of the legislature having violated the State Constitution

was such an embarrassment that the legislature was forced to act

even before the State Supreme Court made a final ruling

STATE LEGISLATURE PASSES THE BASIC EDUCATION ACT

In response to Judge Robert Doran's decision regarding state funding of schools
legislators passed the Basic Education Act – 1977

Basic Education Act for the first time ever guaranteed a minimum level of school funding
set at “staff-to-student-ratio” of 20-to-1 as had been proposed [1976]
by the Washington State School Directors' Association (WSSDA)

Basic Education Act also mandated a minimum of 180 days of instruction
and a minimum of twenty-five hours per week of direct classroom instruction for teachers
composed of five hours or five classes per day

STATE LEGISLATURE PASSES THE SCHOOL LEVY LID ACT

Levy Lid Act was passed by legislators – 1977

this law placed a lid on the percentage of local funding that could be requested in a school levy
school district excess levies were reduced to 10% of State and federal funding
except in a few school districts which were “grandfathered” in at higher levy rates
grandfathered school districts were supposed to “level down” over a period of four years
in order to insure a “uniform system of public schools” as required by the State Constitution
however, the levelling down period was repeatedly extended by later legislatures
as a consequence a truly uniform system of schools was never enforced

TRIDENT SUBMARINE BASE OPENS AT BANGOR, WASHINGTON

U.S. Naval Submarine Base Bangor, the only port for the Pacific Fleet Trident nuclear submarines,
was officially activated -- February 1, 1977

Kings Bay, Georgia is home for the U.S. Atlantic Trident nuclear Fleet
Naval Base Kitsap included the Strategic Weapons Facility Pacific which provides maintenance,
spare parts and spare nuclear warhead storage for the Trident ballistic missiles
that are carried by the nuclear submarines

First eight Trident submarines had their home ports at Bangor, Washington

TRIDENT SUBMARINES ARE AMERICA'S MOST POWERFUL AND EXPENSIVE WEAPONS

Ohio-class Trident submarines are the largest submarines ever built for the U.S. Navy
fourteen Trident II submarines together carry approximately fifty percent
of the total American active inventory of strategic thermonuclear warheads
each Trident submarine can carry up to twenty-four submarine-launched ballistic missiles
each missile is armed with multiple independently-targeted warheads

Although the Trident missiles have no preset targets when the submarines go on patrol,
these warships, when required, are capable of quickly being assigned targets
by using secure and constant radio communications links at sea

Ohio-class submarines were designed specifically for extended war-deterrence patrols
each submarine is provided with two complete crews -- Blue crew and the Gold crew
each crew serves typically on seventy- to ninety-day deterrent patrols

ANTI-WAR PROTESTORS GATHER AROUND BANGOR, WASHINGTON

Ground Zero, a nonviolent anti-nuclear resistance in Kitsap County, Washington, was begun to protest the initial arrival of Trident nuclear submarines at the Bangor base --1977 members of Ground Zero were concerned about the nuclear arms race

POWER INDUSTRY FEELS THE NEED TO EXPAND

Bonneville Power Administration (BPA) warned there was a probability of power blackouts unless the Pacific Northwest supported twenty new power projects
there was no means of checking the BPA/private power claims of impending blackouts
U.S. Senator Jackson, chairman of the Senate Energy Committee, echoed the warning
Senator Jackson proposed federal legislation that gave BPA the authority to locate nuclear plants and determine how much new electric power was needed
Jackson's bill failed in the U.S. House of Representatives
because it was simply a subsidy for WPPSS
it was believed the proposal too strongly favored private utilities
and the aluminum industry
Private power companies and the aluminum industry proposed
blending together BPA's cheap hydroelectric energy with expensive nuclear power
thus saving private power companies the cost of further nuclear plant construction
Five new nuclear plants already were on the Washington Public Power Supply System (WPPSS) drawing boards -- there were only rumors of construction cost overruns

SEATTLE MARINERS PLAY THEIR FIRST BASEBALL GAME IN SEATTLE

Seattle Mariners were created as a result of a lawsuit in the aftermath of the Seattle Pilots' purchase (by future Commissioner of Baseball Bud Selig) and relocation to Milwaukee (where they played as the Milwaukee Brewers)
Seattle, King County, and the state of Washington sued the American League for breach of contract [1970])
Mariners' name originates from the prominence of marine culture in the city of Seattle
they were nicknamed "the M's" after the logo on their hats and shirts
team mascot is the Mariner Moose
Seattle Mariners met the California Angels in the Kingdome -- April 6, 1977
57,762 fans were in attendance to see the Mariners' starting pitcher David Segui who was a member of the [1969] Seattle Pilots Major League baseball club
Seattle lost 7-0⁶¹⁴
(Mariners got their first win [April 8, 1977] against the Angels with a score of 7-6
Mariners ended the year with a 64 and 98 record
Seattle hosted 50th Major League Baseball All-Star Game [1979]
the organization did not field a winning team until [1991] and did not have any real success until [1995] when they won their first division championship
Mariners won 116 games [2001] and set the American League record for most wins in a season and tied the [1906] Chicago Cubs

⁶¹⁴ David Wilma, *Seattle Mariners play their first baseball game in Seattle on April 6, 1977*, Essay 3419, HistoryLink.org, July 2, 2001.

for the Major League record for most wins in a season)

SEATTLE SCHOOLS ARE AGAIN THREATENED WITH RACIAL DISCRIMINATION LAWSUITS

Civil rights groups again threatened to file a lawsuit if the Seattle School District

did not initiate a more effective school integration program -- April 1977

Seattle School Board members responded with what became known as the “Seattle Plan” which was an expansion of its busing program to include all the schools in the district months of talks and preparation took place before the new plan was implemented [December 1977]

PIERCE COUNTY FACES A CRIME WAVE⁶¹⁵

Local businessman John Carbone was the head of a local crime syndicate known as “The Enterprise”

Pierce County saw a rash of arsons at taverns and homes (ten or more in six years)

with \$2 million in losses between [1972] and 1977

three taverns were owned or operated by members of The Enterprise

owners paid off mortgages and debts with the insurance money

then either rebuilt the premises or opened new establishments nearby

one of the houses torched in Gig Harbor belonged to John Carbone

so he would appear to be a targeted victim -- and for the insurance money

clearly aimed at driving out competition, several arsons occurred

at discos and taverns featuring topless dancing (between [1976] and [1978])

The Enterprise used violence to extort money and intimidate people

liquor control board agent Carl A. Fiske had his home firebombed -- May 12, 1977

Pierce County Sheriff’s Department was unsuccessful in solving any of the crimes

DAYBREAK STAR CULTURAL CENTER OPENS AT THE SITE OF FORT LAWTON

Twenty acres of Seattle’s Discovery Park at were deeded to United Indian People’s Council (UIPC)

at least in part due to the [1970] occupation of Fort Lawton

by Puyallup tribal leader and Indian treaty fishing rights advocate Bob Satiacum,

American Indian Movement leader and political prisoner Seattle’s Leonard Peltier,

and Bernie Whitebear of the Colville Confederated Tribe

Daybreak Star Cultural Center officially opened -- May 13, 1977

under the auspices and operation of United Indian People’s Council (UIPC)

(known today as United Indians of All Tribes)

Center’s name, as well as the architectural design of the building, was inspired

by the legend of the visions of Black Elk, a Dakota Sioux medicine man

Daybreak Star was originally the name of an herb which, according to Black Elk,

when dropped on the ground exploded into the tree of life

representing the uniting of all races

this building’s design was a groundbreaking attempt to integrate Native American symbolism into contemporary architecture

⁶¹⁵ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, Essay 9728, HistoryLink.org, April 5, 2011.

Daybreak Star Cultural Center was directed by Bernie Whitebear (until his death [July 2000])

BROCK ADAMS BECOMES U.S. SECRETARY OF TRANSPORTATION

Brock Adams resigned his Washington State Seventh Congressional District seat to accept an appointment from President Jimmy Carter to become the Secretary of Transportation in a special election held in the Seventh Congressional District -- May 17, 1977 because of confusion over the resignation of Congressman Brock Adams, Republican state legislator Jack Cunningham won the heavily Democratic Seattle and its southern suburbs election (Congressman Cunningham held office for one term May 17, 1977 to [January 3, 1979])

WASHINGTON STATE HORSE WINS THE TRIPLE CROWN

Yakima residents Mickey and Karen Taylor joined Florida veterinarian Jim Hill and his wife Sally they entered a bargain basement bid of \$17,500 for a one year old colt [1974] he elicited little other interest they named their colt "Seattle Slew" to reflect Washington's largest city and Florida's swampy real estate⁶¹⁶

Three-year-old Seattle Slew won his first stakes race at Belmont by five lengths [September 20, 1976] then went on to win the Kentucky Derby [May 7, 1977]

Seattle Slew took the Triple Crown by winning the Preakness Stakes -- May 21, 1977 no horse had won the Triple Crown in four years (Secretariat had won [1973]) Seattle Slew became the tenth American Triple Crown Winner

and, having never lost a race, Seattle Slew was the only undefeated competitor ever to do so (only Affirmed accomplished the feat since [1978])

(Shortly after his Triple Crown triumph, an exhausted Seattle Slew suffered his first loss at the Hollywood Park Swaps [July 3, 1977] when he came in fourth by sixteen lengths Slew raced seven times the following year and won all but two his farewell race ended in triumph at Aqueduct by more than three lengths [November 11, 1978] Seattle Slew earned \$1.2 million in purses, but his income was just beginning

he was syndicated and put to stud, earning as much as \$800,000 for each mare he sired more than 1,000 foals and 102 stakes winners including [1984] Kentucky Derby and Belmont champion, Swale

Seattle Slew passed away at the Hill 'n' Dale Farm in Lexington, Kentucky [May 7, 2002] twenty-five years to the day after his Kentucky Derby victory)

SEATTLE'S SAND POINT IS RENAMED WARREN G. MAGNUSON PARK

Sand Point Naval Air Station had been closed by Seattle voters [November 5, 1974] cheering supporters attended the renaming ceremony -- May 29, 1977 as Sand Point became Warren G. Magnuson Park dedicating the park to Warren G. Magnuson was a rare honor

⁶¹⁶ Glenn Drosendahl, *Seattle Slew (1974-2002)*, HistoryLink.org, Essay 10429, July 24, 2013.

as he was not only still living but also still served as Washington's U.S. Senator⁶¹⁷
only a few disgruntled protestors attended to mark the end of the air field
and the placement of the National Oceanic and Atmospheric Administration's (NOAA)
Western headquarters nearby
Senator Magnuson told the crowd a \$700,000 federal grant to build new facilities in the park
had won approval only two days before

TED BUNDY ESCAPES FROM THE ASPEN, COLORADO JAIL

Bundy chose to serve as his own attorney during his preliminary hearing
on charges of murdering registered nurse Caryn Campbell
he was excused by the judge from wearing handcuffs or leg shackles in court
During a recess he asked to visit the courthouse law library to research his case -- June 7, 1977
once behind a bookcase, Bundy opened a second story window and jumped
he sprained his right ankle as he landed
Shedding an outer layer of clothing he walked through Aspen, Colorado
as roadblocks were being set up the city's outskirts

TED BUNDY IS CAPTURED

Bundy left Aspen, Colorado and took to the woods where he hid out
he became thoroughly lost for a few days before stealing a car
Bundy was arrested after he was spotted weaving erratically through Aspen six days after his escape
Bundy was recaptured -- June 13, 1977

ELLENSBURG IS ADDED TO THE NATIONAL REGISTER OF HISTORIC PLACES⁶¹⁸

Ellensburg's 200 acres of downtown between E 3rd and E 6th streets and N Main and N Ruby streets
included forty-nine buildings, many built of brick and stone after a devastating fire [July 4, 1889]
it was originally known as Ellen's Burgh named after Mary Ellen Shoudy
she and her husband John had first settlers and platted the townsite [1875]
Ellensburg was incorporated [1884]
Arrival of the Northern Pacific Railroad [1886]
and Chicago, Milwaukee and St. Paul Railroad [1909]
ensured Ellensburg's role as a hub of travel, trade and community activity in Kittitas Valley
Ellensburg is the county seat of Kittitas County
Ellensburg was placed on the National Register of Historic Places -- July 1, 1977

WASHINGTON STATE CONFERENCE FOR WOMEN OPENS IN ELLENSBURG⁶¹⁹

International Women's Year (IWY) was designated by the United Nations [1975]
Congress passed legislation setting up a National Women's IWY Conference [1975]

⁶¹⁷ Patrick McRoberts, *Navy bids Sand Point naval base farewell on September 28, 1995*, HistoryLink.org, Essay 2280, January 1, 1999.

⁶¹⁸ Paula Becker, *First Northern Pacific Railroad passenger train reaches Ellensburg on February 26, 1886*, HistoryLink.org, Essay 5139, January 28, 2003.

⁶¹⁹ Cassandra Tate, *Washington State Conference for Women opens in Ellensburg on July 8, 1977*, HistoryLink.org, Essay 10259, December 14, 2012.

with conferences to be held in each of the fifty states, the District of Columbia and five U.S. territories
each state was to elect delegates to the national conference
and submit resolutions to be debated there
goal world-wide was to identify and eliminate
“barriers to the full participation of women”
Congress appropriated \$5 million to finance the conferences [July 1976]
Washington State received \$41,000 augmented with \$10,000 in private donations
Final plans for the Washington State Conference were in place
about 2,500 women had pre-registered to attend
many would be staying in dormitory rooms on the Central Washington College campus
conference materials had been printed, workshops scheduled, meeting rooms assigned,
child care arranged and voting procedures finalized
Just as the conference planning committee was about to adjourn, Susan Roylance
a Kennewick homemaker, member of the Church of Jesus Christ of Latter-day Saints (Mormon),
and Benton County Republican Central Committee vice-chairwoman knocked on the door
she said she represented about 2,000 “Christian women” who had not pre-registered
but would be coming anyway -- they had made their own arrangements for housing,
would bring their own food, and would pay the \$5 surcharge per person
for registering late
they planned to vote in opposition to a proposed Equal Rights Amendment
to the U.S. Constitution
this announcement stunned the committee
Washington State already had passed a proposed Equal Rights Amendment (ERA)
to the U.S. Constitution [1972]
Washington State Conference for Women opened in Ellensburg as scheduled -- July 8, 1977
this three-day conference was designed to promote gender equality
opening day was a study in chaos as unexpected arrivals overwhelmed the registration process
pre-registered and unregistered women mingled in lines that stretched
outside the registration center in the Student Union Building, across a lawn
and into a parking lot 100 yards away
registration continued until 11:30 p.m. July 8 and reopened the next morning
some women stood in line for five hours or more just to register
meanwhile, members of competing coalitions caucused until late in the evening
each side prepared opposing slates of delegates to the national conference
both groups emphasized the need for unity
each came up with a list of twenty-four nominees, gave copies of the list
to their supporters, and emphasized the importance of voting as a bloc
Delegates were deeply split
regarding the role and rights of women and girls in American society
one session ended with the defeat the Equal Rights Amendment (ERA)
another session resulted in the election of a pro-ERA slate of delegates
to the up-coming national women’s conference to be held in Houston, Texas
Not every workshop was a battlefield, however

women of opposing political beliefs found common ground on topics such as
sexist depictions of women in the media, the need for equal pay for equal work,
violence against women and quality child care for women who worked outside the home

OIL FLOWS THROUGH THE TRANS-ALASKA PIPELINE

Alyeska Pipeline Service Company completed the 798-mile-long pipeline to carry oil
from Prudhoe Bay on Alaska's North Slope to tankers docked at Valdes, Alaska
waiting to carry oil to Cherry Point near Ferndale, Washington on Puget Sound for refining
Pipeline cost more than \$8 billion to build
thirty-two Alyeska employees or contract workers were killed during the project
First barrel of oil reached the Port of Valdes -- July 28, 1977
this pipeline carries approximately seventeen percent of the U.S. oil supply
(several pump stations were built as oil flow increased (these were completed in [1980])

POLITICAL LANDSCAPE CHANGES FOR THE COALITION AGAINST OIL PRODUCTION

Threat of disastrous oil spills on Puget Sound were of great concern
the possible use of supertankers elevated environmentalists' fears to that of alarm
Coalition Against Oil Pollution (CAOP) underwent a change in leadership -- 1977
but friction between the coalition and its members continued to grow as CAOP softened its stance
Northern Tier's Pipeline's plan to build a pipeline through rather than around Puget Sound
was considered by the new leadership
CAOP member group Washington Environmental Council passed a resolution
to oppose any transshipment of oil through Washington State over CAOP's objection

ANCIENT MASTODON TUSK IS DISCOVERED IN SEQUIM, WASHINGTON⁶²⁰

Emanuel and Clare Manis moved from California to Sequim [1975] seeking a simpler rural life
while using a backhoe to dig a small pond in a dry peat bog on his property
"Manny" Manis uncovered what at first appear to be old logs -- August 8, 1977
Manny and his wife soon realized they were looking not at logs but at eight-foot-long tusks
Dr. Richard D. Daugherty, Dr. Carl Eugene Gustafson and Delbert Wesley Gilbow
all of Washington State University were contacted
as was Jean Welch of the Washington State Office of Archaeology and Historic Preservation
it was confirmed that the tusks and other bones at the site were those of a mastodon
preserved in the wet peat for 13,000 to 14,000 years -- and extinct for roughly 11,000 years
Almost immediately, Dr. Gustafson discovered a rib fragment with a denser type of bone stuck in it
his best hunch was that the protruding bone could be a spear point
if so, it would indicate that humans had hunted the mastodons of the Olympic Peninsula
long before human contact of any kind with prehistoric prey
had been previously speculated
this would represent the oldest evidence of human activity in the Pacific Northwest

⁶²⁰ Laura Arksey, *Emanuel Manis finds mastodon tusks in Sequim on August 8, 1977*, HistoryLink.org, Essay 8511, March 5, 2008.

EFFORT TO ACHIEVE EQUAL RIGHTS FOR WOMEN REMAINS ACTIVE

(Thirty-five of the thirty-eight states necessary ratified the proposed Equal Rights Amendment (ERA)

Washington was the thirty-second [March 22, 1973] but little progress had been made since then

Indiana was the thirty-fifth and last state [January 18, 1977] leaving it just three states short

To generate support and demonstrate their commitment to the ERA

women in Washington State held a march in solidarity with similar marches across the nation

to mark the 57th anniversary of woman's suffrage in the United States

some 1,500 local supporters of the ERA gathered in downtown Seattle

to march from the old Federal Courthouse to the Pike Place Market -- August 27, 1977

Seattle's police officers on patrol downtown were under the impression that the march

would be limited to downtown sidewalks -- they were confused when marchers took to the streets

organizers and police officers hastily arranged a plan to guide marchers through downtown traffic

festive marchers carried signs such as: **"Adam was a Rough Draft"**

and **"Eve Was Framed"**⁶²¹

Pike Place Market was reached and a rally was held at Waterfront Park (Victor Steinbrueck Park)

for four hours speakers and local musicians held the interest of gathering

(Although the [1979] deadline was later extended by Congress to [June 30, 1982],

Equal Rights Amendment eventually failed to be ratified)

TEACHERS ONCE AGAIN STRIKE ACROSS WASHINGTON STATE

Across the state Washington Education Association (WEA) affiliates

refused to go into classrooms -- 1977

- Aberdeen School District teachers struck for a second time

this time they remained off the job for seven days defying a court injunction

- Central Valley School District teachers defied a court injunction during their six day strike

- Methow Valley teachers also struck for six days in defiance of a court injunction

- Omak Education Association teachers struck for six days in defiance of a court injunction

- Bainbridge Island saw a four day strike defying a court injunction to force a return to work

- Granger School District saw its teachers go on strike for two days

- Ellensburg School District EEA teachers struck for one day

- Renton's REA members held a one day strike

but returned to work before there was court action

- Sunnyside School District teachers staged a sit-in for one day -- no court action was taken

GOVERNOR DIXIE LEE RAY SUPPORTS SUPERTANKERS TO CARRY OIL ON PUGET SOUND

Governor Dixie Lee Ray had close ties to the oil industry

she made overturning the oil port ban in the coastal management program a top priority

and strongly promoted developing Cherry Point as an oil port hub near Ferndale

where supertankers from Alaska would unload oil into a pipeline

that would transport the oil across the state and to the Midwest

Ray, a political novice and outsider, quickly antagonized the media, legislators

and particularly environmentalists

⁶²¹ Jeff Stevens, *Equal Rights Already!* Radical Seattle Remembers.com, 2010.

Although maritime unions, as well as oil and pipeline companies, supported the oil port,
most of the public reaction to Ray's proposal was negative
state legislature passed a bill to ban a Cherry Point superport
but Governor Ray vetoed the bill

STATE LEGISLATURE CREATES STATE DEPARTMENT OF TRANSPORTATION (WSDOT)⁶²²

Efforts to transform the Washington State Department of Highways
resulted in combining all forms of transportation into one agency -- September 21, 1977
Washington State Department of Transportation (WSDOT) absorbed several agencies
Aeronautics Commission, the Toll Bridge Authority, the Canal Commission and others
WSDOT was guided by the seven member State Transportation Commission
four members from the west side of the Cascade Range and three from the east side
no more than four could be from the same political party

POLITICAL LEADERS CLASH OVER THE USE OF SUPERTANKERS

Although both were Democrats, U.S. Senator Warren Magnuson and Governor Dixie Lee Ray
held diametrically opposed views on the need for environmental protection -- October 5, 1977
Magnuson, a veteran U.S. Senate and master tactician, had a deep personal affection
for the marine environment -- especially Puget Sound
Governor Ray strongly supported the use of supertankers to carry oil on Puget Sound
she had faith that technology could prevent environmental disasters
oil companies Arco, which had an existing facility at Cherry Point,
and Texaco, which also had refineries in northern Puget Sound,
strongly backed Governor Ray's campaign
however, concern about potential supertanker oil spills on Puget Sound remained
Governor Ray, to prove how safe tankers were, took the bridge of an Arco oil vessel
newspapers ran a picture of a smiling Ray at the wheel of an Arco tanker
ailing through Rosario Strait in the San Juan Islands⁶²³
U.S. Senator Magnuson was not pleased

U.S. SENATOR WARREN MAGNUSON STOPS SUPERTANKERS FROM USING PUGET SOUND

Marine Mammals Protection Act [1972] came up for reauthorization
U.S. Senator Warren Magnuson rose from his senate seat and attached "a little amendment"
banning supertankers east of Port Angeles
without supertankers there was no need to develop a "superport" on Puget Sound
this amendment passed Congress
one day after Magnuson had introduced it -- October 5, 1977
Magnuson's ban on supertankers was strongly supported in the local media
and as strongly attacked by Governor Dixie Lee Ray who called Maggy a "dictator"
a political feud was born

⁶²² Kit Oldham, *Legislature creates Washington State Department of Transportation (WSDOT) effective September 21, 1977*, HistoryLink.org, Essay 7274, March 15, 2005.

⁶²³ Kit Oldham, *Congress passes Senator Warren Magnuson's amendment banning supertankers in Puget Sound on October 5, 1977*, HistoryLink.org, Essay 5620, November 26, 2003.

Magnuson was praised by many for keeping supertankers out of Puget Sound
Senator Magnuson's "little amendment" was frequently singled out
as one of the most important achievements in a political career that had many⁶²⁴

U.S. COAST GUARD WAS SLOW TO RESPOND TO MAGGY'S "LITTLE AMENDMENT"

U.S. Senator Warren Magnuson pressed the Coast Guard for new safety standards on Puget Sound
because the Coast Guard was slow to respond, Maggy held up all promotions to admiral
Soon new marine improvements to protect Washington's fragile water environment were in place:

- traffic control system operation on Puget Sound was begun,
- new construction standards for vessels were achieved,
- Coast Guard monitoring of loading and unloading of oil and chemicals
at Puget Sound ports began

"HILLSIDE STRANGLER" GOES ON A RAMPAGE IN LOS ANGELES, CALIFORNIA⁶²⁵

Kenneth Alessio Bianchi was born [May 22, 1951] in Rochester, New York
to a seventeen-year-old alcoholic prostitute
he was adopted by Nicholas and Frances Bianchi [August 1951] and was their only child
there were early indications that Kenneth had mental problems
he was a compulsive liar, had a quick temper and was prone to throw violent tantrums
Although of above-average intelligence, he was a poor student and an academic underachiever
Kenneth enjoyed having power and control over people
he was an arrogant and macho rabble-rouser
who took pleasure in manipulating his fellow students
Bianchi, a six foot-tall, well-dressed, physically fit man with a virile mustache,
was obsessed with becoming a police officer
Bianchi and his adoptive cousin Angelo Anthony Buono, Jr. embarked on a criminal rampage
Angelo Anthony Buono, Jr. lacked good looks, brains and manners
his attitude was that of a delinquent -- aloof and without a care in the world
together they killed at least ten young California women from age twelve to twenty-eight
victims were tortured, raped and finally strangled
their naked, mutilated bodies were dumped on freeway embankments to taunt the authorities
they terrorized Los Angeles County for months -- October 17, 1977-[February 17, 1978]
Bianchi also befriended and killed women who lived in his neighborhood
Los Angeles reporters dubbed it the work of the "Hillside Strangler"

PIERCE COUNTY CRIME WAVE CONTINUES UNSOLVED⁶²⁶

With the failure of the Pierce County Sheriff's Department to make any progress in the crime spree
Federal Bureau of Alcohol Tobacco and Firearms (BATF) joined the investigation -- fall 1977

⁶²⁴ Kit Oldham, *Congress passes Senator Warren Magnuson's amendment banning supertankers in Puget Sound on October 5, 1977*, HistoryLink.org, Essay 5620, November 26, 2003.

⁶²⁵ Daryl McClary, *After he murders two Bellingham women, police arrest serial killer Kenneth A. Bianchi on January 12, 1979*, HistoryLink.org, Essay 8613, July 26, 2008.

⁶²⁶ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

It became evident that Pierce County Sheriff George Janovich was providing information to The Enterprise syndicate boss John Carbone and his lieutenant Ronald J. Williams. BATF pretended to abandon the arson investigation then partnered with the FBI to develop an undercover operation.

SPOKANE IS THE HOME OF REMARKABLE MUSICAL TALENT⁶²⁷

Harry Lillis “Bing” Crosby was born in Tacoma [May 3, 1903] at the age of three he moved with this family to Spokane even though he was the fourth of seven children in a poverty-stricken family. Bing’s mother recognized his love of music and somehow scraped together enough money to pay for some private vocal instruction.

Mildred Rinker was born in Tekoa, Washington [February 27, 1907]. Mildred’s mother enrolled her as a member of the Coeur d’Alene Tribe. Her younger brother Al was born [December 20, 1907].

Mildred displayed an early aptitude for music. During her childhood she played the family piano⁶²⁸.

Bing Crosby saw his singing idol, Al Jolson, perform at Spokane’s Auditorium Theater -- 1917. Fourteen-year-old Bing Crosby realized he wanted to be a professional musician.

Bing began playing drums for his high school’s jazz band. Crosby then went on to Gonzaga University where he fell in with a local dance combo that played high-school dances and illicit bathtub-gin-fueled parties for a few months.

Mildred and Al’s mother passed away, Mildred was sent to live with an aunt in Seattle. There as a teenager she earned an income playing in silent-movie houses and demonstrating sheet music for customers at Woolworth’s Department Store.

CAREERS OF TWO SPOKANE MUSIC LEGENDS BEGIN

Bing Crosby was lured away from his college band-mates by local band led by pianist/bandleader Al Rinker.

Mildred Rinker returned to Spokane to work as a sales-clerk at Baileys Music store. While working there she got her first gig playing at the town’s hippest speakeasy.

Al Rinker brought his band to Bailey’s Music Shop to listen to recordings of Vic Meyer’s Seattle dance band and the newest hot jazz releases.

Al Rinker’s band and singer Bing Crosby performed throughout Spokane for the next couple of years before the new manager at Spokane’s Clemmer Theater dropped the band in favor of a “novelty” duo: Rinker on piano and Crosby singing, dancing and jiving.

CALIFORNIA DEVELOPS MUSICAL TALENT

Mildred Rinker moved to Los Angeles and adopted the stage name “Mildred Bailey”. She instantly became a minor celebrity singing blues nightly in the city’s most popular speakeasy. Inspired by Mildred’s success, Bing Crosby and Al Rinker left Spokane [October 15, 1925].

⁶²⁷ Peter Blecha, *Crosby, Bing (1903-1977) and Mildred Bailey (1907-1951), Spokane's Jazz Royalty*, HistoryLink.org, Essay 7445, August 29, 2005.

⁶²⁸ Peter Blecha, *Crosby, Bing (1903-1977) and Mildred Bailey (1907-1951), Spokane's Jazz Royalty*, HistoryLink.org, Essay 7445, August 29, 2005.

and traveled to Seattle to audition with Jackie Souders and Vic Meyers -- that city's top bands who were both playing at the Butler Hotel
(whether or not they were hired remains in dispute depending on who tells the story)
Crosby and Rinker next visited Tacoma where they performed for a week
before moving on to appear in several speakeasies in Portland and San Francisco
when they arrived in Hollywood, Mildred Bailey got them an audition with a theatrical company that booked a circuit of nearly forty West Coast theaters
they made their first record *I've Got The Girl* for Columbia Records [October 18, 1926]
Mildred Bailey got her big break when she was hired
by nationally famous band leader Paul Whiteman as his featured a female vocalist [1929]
while Mildred was the first "big band" female singer, other bands soon added female voices that same year, billed as "That Princess of Rhythm," Bailey cut her debut recording *What Kind O' Man Is You* for Columbia Records [1929]

SPOKANE'S MUSICAL TALENT BECOMES LEGENDARY

Mildred Bailey passed away at the age of forty-four [December 12, 1951]
her perfect intonation and pitch have been acknowledged by music historians
"Her interpretation of lyrics on ballads was spellbinding, and she was superb at up-tempo tunes, where her knowledge of harmonics was utilized to sing variations on the melodic theme that were years ahead of her time...."⁶²⁹

Al Rinker was best remembered for his work with Bing Crosby
when they performed with "King of Jazz" Paul Whiteman's big band in the [1930]
Rinker also wrote songs for the movies and television such as *Ev'rybody Wants to Be a Cat*
for the Disney cartoon children's movie *The Aristocats* [1970]

Al Rinker passed away [June 11, 1982]

Bing Crosby enjoyed a long and successful career before he died -- October 14, 1977⁶³⁰

he recorded more than 1,700 songs --his chart numbers remain astonishing:

- 383 chart singles, including forty-one No. 1 hits;
- separate hit singles in every calendar year between [1931] and [1954];
- twenty-three gold and platinum records although the recording industry did not institute its gold record certification program until [1958]⁶³¹

he made numerous live appearances before American troops fighting in the European Theater
in a poll of U.S. troops at the close of World War II, Crosby topped the list as the person
who had done the most for G.I. morale ahead of President Franklin Delano Roosevelt,
General Dwight Eisenhower and Bob Hope

his success as a celebrity singer paved the way for the pop vocal movement
which swept aside the instrument-heavy big band sound of the WWII era
he has been referred to as the **"most successful musical artist of all-time,"**

⁶²⁹ Peter Blecha, *Crosby, Bing (1903-1977) and Mildred Bailey (1907-1951), Spokane's Jazz Royalty*, HistoryLink.org, Essay 7445, August 29, 2005.

⁶³⁰ Peter Blecha, *Crosby, Bing (1903-1977) and Mildred Bailey (1907-1951), Spokane's Jazz Royalty*, HistoryLink.org, Essay 7445, August 29, 2005.

⁶³¹ Peter Blecha, *Crosby, Bing (1903-1977) and Mildred Bailey (1907-1951), Spokane's Jazz Royalty*, HistoryLink.org, Essay 7445, August 29, 2005.

and the **“world’s most recognized voice”**⁶³²

Bing Crosby appeared on 4,000 radio shows, in 100 movies and on 300 television shows he starred with Bob Hope in seven *“Road to...”* musical comedies [1940-1962], he was a frequent guest on the television musical variety shows of the [1950s] and [1960s], he was called the **“most popular radio star of all time,”**
“the biggest box-office draw of the 1940s,” and
“most popular and influential media star of the first half of the 20th century”⁶³³

WASHINGTON STATE WOMEN’S COMMISSION IS REJECTED BY THE VOTERS⁶³⁴

Washington State Legislature had passed Referendum 40 on to the voters [June 1977] to authorize and fund a Washington State Women’s Commission
Women’s Commission members previously served at the pleasure of the governor
Proposed commission was resoundingly defeated by a vote of more than two to one -- November 8
opposition to the proposal came from several sources:

- anti-feminist women and men (supported by religious opponents who opposed the Equal Rights Amendment (ERA), the rights of homosexuals, affirmative action and the availability of abortion;
- voters opposed to bigger government and presumably more taxes;
- voters who believed that there was no problem -- women in Washington State had equality;
- people who did not understand the measure

Governor Dixie Lee Ray phased out the old Washington State Women’s Commission

THE ENTERPRISE ATTEMPTS TO COMMIT MURDER⁶³⁵

John Carbone, boss of the criminal syndicate *“The Enterprise,”* told enforcer Robert M. Valentine to hire someone to kill state Liquor Control Board Agent Mel Journey for vigorously enforcing the state’s liquor laws
half-brothers Jackie M. Bentley and Michael Johnson were hired by Valentine
Mel Journey said goodbye to his wife, Phyllis, and twelve-year-old daughter, Ami, walked out the front door of his home to his car -- 7:15 a.m. November 15, 1977
two men wearing dark clothing and stocking caps came up the driveway and opened fire
Journey was hit four times -- three additional bullet holes were found in his car
Tacoma Police found eight 9-mm shell casings and one spent 12-gauge shotgun shell
one load of buckshot, apparently intended to scare his family, hit the house
Journey was rushed to Saint Joseph Hospital in Tacoma

⁶³² Peter Blecha, *Crosby, Bing (1903-1977) and Mildred Bailey (1907-1951), Spokane's Jazz Royalty*, HistoryLink.org, Essay 7445, August 29, 2005.

where he underwent four hours of surgery that saved his life

“SEATTLE PLAN” TO RESOLVE RACIAL DESEGREGATION IS IMPLEMENTED

“Seattle Plan” was approved by the Seattle School Board

by a vote of six to one -- December 14, 1977

to go into effect [September 1978]

This vote made Seattle the largest city in the United States

to voluntarily undertake district-wide desegregation through mandatory busing

“Seattle Plan” was based on a complicated formula that defined segregation

in terms of the ratio of white to nonwhite students in the school district

therefore, as the proportion of white students decreased

the percentage of minority students necessary to be “racially balanced” increased

(in 1977 a “racially imbalanced” school housed more than fifty-five percent minorities

by [1995] a school could be eighty-five percent nonwhite

and still be considered integrated)

TED BUNDY ESCAPES AGAIN FROM A COLORADO COUNTY JAIL

In jail in Glenwood Springs, Bundy devised a new escape plan which took six months of preparation

he acquired a hacksaw blade from another inmate and accumulated \$500 in cash from visitors

during the evenings, while other prisoners were showering, he cut a one foot square hole

in the corner of his cell’s ceiling

he lost thirty-five pounds and was able to wriggle through the hole

into the crawl space above his cell

he made multiple practice runs, exploring the parameters of the crawl space

When most of the jail staff was on Christmas break and short-term prisoners released for the holidays

Ted Bundy piled books and files in his bunk bed under a blanket to simulate himself sleeping

he slipped into the crawlspace to make his escape -- December 30, 1977

Bundy broke through the ceiling into the apartment of the chief jailer who was out for the evening

he changed into street clothes from the jailer’s closet

and walked out the front door to freedom

Bundy stole a car which broke down on Interstate-70, hitched a ride to Vale, Colorado

where he caught a bus to Denver and boarded a flight to Chicago

SEQUIM, WASHINGTON ARCHAEOLOGICAL SITE GENERATES WORLD-WIDE INTEREST

Dr. Carl Gustafson, Delbert Gilbow, graduate students and volunteers

continued to excavate the mammoth site throughout the fall and winter of 1977-1978

Using funding from the Washington State Office of Archaeology and Historic Preservation,

the National Science Foundation and other sources, the team established an archaeological site

which generated a great deal of scholarly research and local interest⁶³⁶

Sequim’s archaeological dig site was placed on the National Register of Historic Places -- 1978

(during the years of excavation, 50,000 people from the United States

⁶³⁶ Laura Arksey, *Emanuel Manis finds mastodon tusks in Sequim on August 8, 1977*, HistoryLink.org, Essay 8511, March 5, 2008.

and thirty foreign countries visited the site)

TED BUNDY MAKES GOOD HIS ESCAPE

Bundy continued his escape as he traveled from Chicago to Ann Arbor, Michigan by train there he sat in a tavern and watched his alma mater, the University of Washington, defeat Michigan University in the 64th Rose Bowl by a score of 27-20 five days later he stole a car and drove to Atlanta, Georgia where he boarded a bus and arrived in Tallahassee, Florida -- January 8, 1978 there he rented a room near Florida State University Due to a lack of identification he was unable to get work, Ted reverted to his old habits of shoplifting and stealing credit cards

ANOTHER KILLING SPREE BEGINS

Ted Bundy entered the Florida State University Chi Omega sorority house -- January 15, 1978 Margaret Bowman, 21, was bludgeoned with a piece of firewood as she slept then was strangled with a nylon stocking about -- 2:45 a.m. Bundy entered the bedroom of 20-year-old Lisa Levy and beat her unconscious he strangled and sexually assaulted her in an adjoining bedroom he attacked Kathy Kleiner and Karen Chandler who survived the attacks Kleiner suffered a broken jaw and deep shoulder lacerations Chandler suffered a concussion, broken jaw, loss of teeth and a crushed finger All four attacks took place in less than fifteen minutes and within hearing distance of more than thirty people -- none of whom heard anything Bundy also attacked Cheryl Thomas in her nearby home seriously injuring her

TED BUNDY ATTACKS AGAIN

Bundy drove to Lake City, Florida -- February 9, 1978 that morning at Lake City Junior High School 12-year-old Kimberly Ann Leach was summoned by a teacher to her homeroom to retrieve a forgotten purse she never returned to class With no cash to pay his overdue rent and a growing suspicion that police were closing in on him, Bundy stole a car and fled driving westward across the Florida Panhandle

TED BUNDY IS ARRESTED AGAIN

Bundy was stopped by Pensacola, Florida police officer David Lee near the Alabama state line when the Volkswagen Beetle he was driving was checked, it proved to be stolen -- 1:00 a.m. When told he was under arrest, Bundy kicked Lee's legs out from under him and took off running Lee fired a warning shot and then a second round, gave chase and tackled him Ted Bundy struggled but was finally subdued and arrested -- February 12, 1978 Officer David Lee transported his suspect to jail unaware that he had just arrested one of the FBI Ten Most Wanted Fugitives he heard Bundy say, "I wish you had killed me."⁶³⁷

⁶³⁷ Ann Rule, *The Stranger Beside Me*, P. 321-323.

THE ENTERPRISE STRIKES AGAIN IN PIERCE COUNTY⁶³⁸

John Carbone, head of the Pierce County crime syndicate The Enterprise, had Jerome Weinstein, owner of the Prudential Mortgage Company, attacked and beaten -- February 1978
Carbone mistakenly thought he had been snitching to the IRS
he told Weinstein he would be “protected” from further violence if he paid \$2,500
FBI supplied the payoff money and Weinstein gave it to Ronald J. Williams as instructed
Williams, however, said it was not enough and demanded another \$7,500 which the FBI supplied
In fact, there actually was a snitch in the organization
syndicate enforcer Robert M. Valentine had agreed to become a government informant
to elicit and record conversations and to introduce undercover agents into The Enterprise

U.S. SENATORS MAGNUSON AND JACKSON REPRESENT WASHINGTON AS A TEAM

Both Senator Warren G. “Maggie” Magnuson and Senator Henry M. “Scoop” Jackson achieved great power
Washington’s senior U.S. Senator gave up his position as Chairman of the Commerce Committee
he took on the new, even more powerful, role of Chair of the Senate Appropriations Committee
now he had oversight regarding all federal spending
Washington junior U.S. Senator Henry M. “Scoop” Jackson was chair of the U.S Senate Interior Committee
and served on the Armed Service and Government Affairs committees
he concerned himself with issues ranging from the Columbia Gorge to Middle East tensions
he sponsored a long-term, mutual, and verifiable nuclear arms controls
and the effort to sharply reduced American and Soviet nuclear arsenals

MAGGY FOCUSES FEDERAL SPENDING ON HUMAN ISSUES

Conflicts between military spending and human services weighed on him
his support of health and education issues and human services was well known
entrenching those who opposed his thinking

In a speech to the National Cancer Institute, he uncharacteristically noted his efforts:

“I can’t take credit for having the idea of establishing a National Cancer Institute. The idea has been around Congress for at least ten years...but it was not universally supported and it was not popular among some members of the health profession.... We charged the surgeon general with a new mission: to investigate the cause, diagnosis and treatment of cancer; to assist and foster similar research activities by other public and private agencies. The first (appropriations) bill gave NCI \$700,000 for operations, \$750,000 for construction. In 1978 funding totaled \$183 million. More than 1.5 million Americans are alive and cured of cancer, one in three victims is saved.”⁶³⁹

Magnuson created a “super fund” for the clean-up of toxic waste
and raised the liability level for owners and operators of vessels that spilled oil
Presidential Press Secretary George Reedy stated, in only partial jest,

⁶³⁸ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

⁶³⁹ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*, P. 311.

that as Chair of the Appropriations Committee “**Maggie took everything not nailed down in Washington, D.C. and sent to Washington State.**”

U.S. Senator Walter Mondale joked, “**He is scrupulously fair with federal funds; one half for Washington state, one half for the rest of the country.**”

ANTI-NUCLEAR WAR PROTESTORS GATHER AT BANGOR, WASHINGTON

Anti-nuclear resistance protest groups camped through the previous night on farmland designated to be taken for use for a highway to serve Bangor
Ground Zero protestors joined with other protest groups at Bangor Trident Submarine Base
3,000 people gathered for a rally -- May 22, 1978
three hundred of these climbed the Bangor fence
they were arrested and bused to Tacoma where they were released without being charged
(Ground Zero members persisted in weekly leafleting, usually Thursday mornings, of the Bangor base
they held workshops on various topics of social justice,
as well as supplying training and education in nonviolence
annual memorials of the atomic bombings of Hiroshima and Nagasaki were held
Martin Luther King Day and Mother’s Day were also often celebrated
with nonviolent actions and educational events at the Bangor base)

WALLA WALLA DEVELOPS PREMIUM WINES⁶⁴⁰

(Vineyards of concord grapes for juice had been planted in the Walla Walla Valley [early 1970s] as well as some commercial attempts to plant vinifera grapes and produce wine)
Gary Figgins traced his interest in wine back to his grandparents, Frank and Rose Leonetti, they were Italian immigrants who had their own vineyard and made their own wine with the help of his uncles, Figgins planted an acre of cabernet sauvignon grapes and some white Riesling grapes on a hillside behind the original Leonetti homestead [1974]
Figgins bonded a winery, Leonetti Cellar [1977]
he drew attention to the possibility of a modern wine industry in Walla Walla when he produced its first wines --1978
(Other pioneer winemakers in the valley included Rick Small, founders of Woodward Canyon [1981] and Baker and Jean Ferguson who founded L’Ecole N° 41 in the old Lowden School [1983]
substantial plantings were started by Seven Hills [1981] and Pepper Bridge [1991]
outside interest and investors quickly increased the number of wineries and vineyards to more than one hundred in the Walla Walla Valley)

BILL GATES AND PAUL ALLEN RETURN TO SEATTLE

Working in Albuquerque, New Mexico, Allen and Gates soon built up an impressive client list that included Ricoh, Texas Instruments, Radio Shack and another new start-up, Apple Computers
Microsoft charged only \$21,000 for its software to run on Apple computers
machines with the software sold quickly but the fee charged by Microsoft worked out to be

⁶⁴⁰ Michael J. Paulus Jr., *Walla Walla's first successful premium wines are produced in 1978*, HistoryLink.org, Essay 8481, February 6, 2008.

just two cents per copy sold -- they could have charged a lot more money
it was a mistake they would not make again

Business began to dwindle at Micro Instrumentation and Telemetry Systems (MITS)
when Apple and other computer manufacturers emerged as competitors
With sales already over \$1 million, Allen and Gates had no reason to remain in Albuquerque
they relocated their company to Bellevue where they experienced significant growth -- 1978

FISHERY ADVISORY BOARD ATTEMPTS TO SETTLE FISHING DISPUTES

In an effort to serve as the voice of Indian tribes in resolving disputes,
Fishery Advisory Board commissioners
began the Treaty Indian Catch Monitoring Program -- 1978
this involved issuing identification cards to Indian fisherman
and gathering and sharing data about Indian catches
commissioners also developed a communications system
to update tribes quickly about changes to state fishery regulations

WEST SEATTLE BRIDGE IS REPLACED

Port of Seattle had wanted to develop the upper reaches of the Duwamish River for years
this was not possible, in part, because the West Seattle Bridge blocked vessel traffic downstream
Captain Rolf Neslund, at age eighty the oldest pilot on Puget Sound
steered the freighter *Chavez* into the West Seattle Bridge -- June 10, 1978
half of the structure was knocked into the Duwamish River

Magnuson staffer Gerry Johnson recalled, **“It was Sunday morning and we were on the way back to Washington. Maggie got up in his suite at the Olympic Hotel chipper, hopping about and beaming. I was puzzled. He had already heard the news about the *Chavez*. He greeted me: ‘This is the best thing that could happen -- the wreck is a hazard to navigation. Now we can pay for a new bridge from the federal bridge replacement fund.’ We needed \$100 million -- the total sum of the fund. Brock (Adams, President Carter’s secretary of transportation) balked but we rolled over him. We vacuumed the bridge replacement fund to build a new West Seattle bridge.”**⁶⁴¹

Port of Seattle plans to develop upper Duwamish were subsequently dropped anyway

SEQUIM, WASHINGTON ARCHAEOLOGICAL SITE YIELDS A STUNNING DISCOVERY

As more bones were found, the cuts and scratches on them indicated that the dead mastodon
had been partially butchered for food
charcoal and animal bones found on higher ground near the mammoth remains
indicated that humans had camped there repeatedly between 14,000 and 8,000 years ago
early hunters had carried bones from the more exposed right side of the mastodon
to the slightly higher elevation for butchering⁶⁴²
bones discovered less than an inch above the glacial gravel indicated that the mastodon
had died soon after the last glacier had retreated

⁶⁴¹ Shelby Scates, *Warren G. Magnuson and the Shaping of Twentieth-Century America*, P. 299.

⁶⁴² Laura Arksey, *Emanuel Manis finds mastodon tusks in Sequim on August 8, 1977*, HistoryLink.org, Essay 8511, March 5, 2008.

other fragmentary animal remains included bison and caribou as well as snakes, frogs and ducks
(Experts from other fields took advantage of the dig over the next few years
to research the conditions in which the mastodon had lived
it was discovered the dry Sequim Valley was even drier then, as cactus was found
scientists concluded that the evergreen forests had not yet developed in the area)
Prevailing scientific wisdom has long held that Clovis people
were the earliest hunters in North America (they disappeared 13,500 to 13,000 years ago)
DNA sequencing, CT scanning and other advanced methods of analysis was used
on objects from the Sequim archaeological dig⁶⁴³
one puzzling object was a piece of bone intentionally shaped into a spear point
more than ten inches long
further analysis confirmed the mastodon died around 13,800 years ago
predating the Clovis people by some 300 to 800 years
(After the death of Emanuel Manis, Clare Manis donated the two-acre site
to the non-profit Archaeological Conservancy in his memory [2002]
whose Museum and Arts Center in Sequim displays a life-sized mural
on which actual major bones of the mastodon are preserved
and are superimposed to depict the mastodon and its environment in an exhibit
today the mastodon's tusks are held in a tank of water in front of the mural
an excellent video shown there, narrated by Dr. Carl Eugene Gustafson,
recounts the history of excavation of the site)

JOHN CARBONE'S "THE ENTERPRISE" CONTINUES ITS CRIMINAL ACTIVITIES⁶⁴⁴

Ronald and Patricia Chase, owners of the Night Moves tavern, had their business firebombed twice
Chases were being followed home after they closed the business for the night
female topless-dancers who worked at the tavern had been routinely threatened
Richard F. Caliguri broke into the Chase's home in Kent armed with a butcher knife -- August 1978
he tied up the children, two little boys and a teenage girl, and the housekeeper
and threatened to cut off their hands
Caliguri told the housekeeper to tell the Chases, who were not home at the time,
they were to close their tavern or he would return and kill them all
(federal agents later foiled a plot to blow up the Night Moves tavern)
Pierce County Sheriff George Janovich had an agreement with members of The Enterprise
to provide advanced warning of any raid of its topless-dancing and illegal-gambling operations
so evidence could be removed or destroyed
Sheriff Janovich accepted a bribe of \$1,300 to provide protection
for illegal gambling and prostitution operations
from an undercover agent who posed as a tavern buyer from Chicago
From there, it was a matter of agents gathering enough hard evidence, documenting meetings,
recording private conversations and making payoffs to substantiate the racketeering conspiracy

⁶⁴³ Laura Arksey, *Emanuel Manis finds mastodon tusks in Sequim on August 8, 1977*, HistoryLink.org, Essay 8511, March 5, 2008.

⁶⁴⁴ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011..

and dismantle the organization

WASHINGTON STATE FACES A WAVE OF TEACHER STRIKES

Washington Education Association (WEA) affiliates across the state refused to return to work

Leavenworth Education Association (LEA) teachers struck for twenty-three days -- 1978

although teachers stayed out in spite of a court injunction to force them back

district officials managed to keep the district's school open using non-union substitutes

Tacoma teachers again went out on strike

this time for twenty-three day in defiance of a court injunction

Seattle teachers refused to teach for twenty-one days in defiance of a court injunction

University Place teachers struck for fourteen days before returning to work

without a court injunction being filed to force them back to work

Everett School District faced a thirteen-day teacher strike in violation of a court injunction

Central Kitsap teachers again struck -- this time for five days

although no injunction was issued, the schools were kept open with the use of strike breakers

Oak Harbor teachers struck for four days and returned to work without an injunction being issued

Raymond School District teachers struck for two day -- no court injunction was issued

Lake Washington School District saw a two day strike before teacher returned to work

without an injunction being issued

Riverview Education Association (REA) teachers walked off the job for one day

they returned to work before an injunction could be sought by the school district

SEATTLE SCHOOL DISTRICT BEGINS BUSING TO INTEGRATE SCHOOLS

"Seattle Plan" to integrate the city's school was launched -- September 19, 1978

on a wave of optimism and good intentions with support from a broad coalition

of political leaders and community groups, including the NAACP,

the American Civil Liberties Union,

the Urban League, the Chamber of Commerce, the Municipal League,

the League of Women Voters, the Church Council of Greater Seattle,

and both the outgoing and the newly elected mayors of Seattle⁶⁴⁵

When students arrived at their new schools there was little opposition and none of the violence associated with mandatory busing in other parts of the country

STATE SUPREME COURT RULES ON SCHOOL LEVY FUNDING

State Supreme Court Justices ruled in *Seattle School District No. 1 v. State* -- September 28, 1978

that school districts may use local tax "Maintenance and Operation" levies

to fund enrichment programs

and programs outside of the legislative definition of "basic education"

however, levy monies cannot be used to reduce the state's obligation to fund basic education

⁶⁴⁵ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002.

FEDERAL AGENTS SEIZE TWO TONS OF MARIJUANA IN THE SAN JUAN ISLANDS⁶⁴⁶

Federal agents conducted drug raids on Barnes Island in the San Juan Islands and at a stash-house in Sumas, Washington -- October 22, 1978
six men are arrested and ninety-one bales of marijuana were seized
two additional men escaped from the island in a 28-foot speedboat
a Customs patrol boat and a Drug Enforcement Administration aircraft pursued the vessel south into Admiralty Inlet but soon lose sight of it in the darkness
Authorities located the speedboat, beached on Whidbey Island -- October 23
six bales of marijuana were found floating in the Strait of Juan de Fuca
in total the potent “Thai stick” variety of marijuana was valued at \$12 million

STATE ELECTION SEES REPUBLICAN GAINS

Two congressional changes were made in the state-wide election -- November 7, 1968
Congressman Al Swift, Democrat from Bellingham was elected to office
he took the seat of retiring seven term Democrat Second District Congressman Lloyd Meeds
(he served eight terms in the U.S. House [1979]-[1994])
Congressman Mike Lowry, Seattle Democrat
defeated one term Republican Representative John E. Cunningham
(Lowry served five terms for the Seventh District [1979]-[1989])
State votes did not change to number of seats held by either Party in the State Senate
as the Democrats maintained the majority thirty to nineteen
however, former Senate Majority Leader August “Augie” Mardesich
had been defeated in the Democratic Primary Election by fellow Democrat Larry Vognild
mainly because labor unions viewed Mardesich as being opposed to their interests

WASHINGTON STATE HOUSE OF REPRESENTATIVES ELECTION ENDS IN A TIE

For many years a tie for control of the Washington House of Representatives was not possible because that body had an odd number of members -- ninety-nine since [1933]
however, the United States District Court redistricted Washington’s legislative boundaries to comply with the United States Supreme Court’s “one person, one vote” rule [1972]
each electoral district must have approximately equal populations
District Court imposed a plan that reduced the State House of Representatives from 99 to 98
with two state representatives and one state senator from each of 49 legislative districts
Democrats were expected to retain their State House majority -- November 7, 1978
however, Republicans mounted an aggressive effort to gain control of the House
when all 98 races were decided, the Republicans had picked up thirteen seats
and reduced the Democrats’ previous 62-to-36-seat majority to a 49-49 tie
this unprecedented situation left observers and legislative leaders uncertain
how the evenly divided House of Representatives would function VOTERS IN

WASHINGTON STATE PASS INITIATIVE 350

⁶⁴⁶ Daryl C. McClary, *Federal agents interrupt a smuggling operation in the San Juan Islands, seize two tons of marijuana, and arrest six men on October 22, 1978, October 22, 1978*, HistoryLink.org, May 27, 2005.

Implementation of Seattle School District's busing plan resulted in rapidly conducted signature drive only six weeks after the "Seattle Plan" anti-busing Initiative 350 was presented to voters statewide Initiative 350 was passed by Washington voters by a sixty-six percent majority -- November 7, 1978 voters in Seattle also approved the initiative with a sixty-one percent majority These votes showed that acceptance of busing was not as broad or as deep as its advocates hoped⁶⁴⁷ (U.S. Supreme Court ruled Initiative 350 unconstitutional [June 30, 1982])

SEATTLE VOTERS UPHOLD GAY AND LESBIAN RIGHTS⁶⁴⁸

Seattle was one of the first large American cities to enact specific civil rights protections prohibiting discrimination on the basis of sexual orientation employment rights of sexual minorities were affirmed [1973] Seattle broadened its housing laws to include gay and lesbian rights Seattle City Council Member Jeanette Williams was the chief advocate of these reforms which generated little controversy at the time of their adoption Seattle voters rejected city-wide Initiative 13 which proposed to repeal the city ordinances protecting employment and housing rights for gays and lesbians -- November 7, 1978 this initiative also would have dissolved the City of Seattle's Office of Women's Rights

FIRST DAY OF REMEMBRANCE IS HELD AT THE PUYALLUIP FAIR GROUNDS⁶⁴⁹

(Japanese Americans, most of them American-born, had been removed to assembly centers with only one or two weeks advance notice they were sent first to assembly centers many from Puget Sound area communities, including Seattle and rural areas around Tacoma, were sent to "Camp Harmony," -- a temporary camp located at the Puyallup fairground after about ten weeks at Camp Harmony, a transfer began to the Minidoka Relocation Center, in Idaho -- one of ten permanent incarceration sites these camps had inadequate facilities and eight were located in desert climates camp inmates suffered the double humiliation of substandard conditions and the shame of being incarcerated) Because it was wartime there were no rallies by Nikkei (second generation Japanese American) or other Americans to protest the internment Nikkei rarely spoke about their incarceration -- many felt a great deal of anger and shame they did not even discuss it with their children Members of the Japanese American Citizens League formed the Seattle Evacuation Redress Committee (SERC) [late 1970s] they sought financial redress from the federal government for homes and businesses lost due to incarceration SERC members set about organizing a Day of Remembrance program Not everyone in the Nikkei community supported the redress idea

⁶⁴⁷ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002.

⁶⁴⁸ Walt Crowley, *Seattle voters reject Initiative 13 and uphold gay and lesbian rights on November 7, 1978*, HistoryLink.org, Essay 1403, June 22, 1999.

⁶⁴⁹ Jennifer Ott, *First Day of Remembrance (of World War II incarceration of Japanese Americans) is held at the Puyallup Fairgrounds on November 25, 1978*, HistoryLink.org, Essay 9464, August 23, 2010.

some feared that it would provoke an anti-Japanese backlash
others did not want to stir up memories of a painful time
More than 2,000 people gathered at the Puyallup Fair Grounds -- November 25, 1978
to commemorate the wartime incarceration of Japanese Americans
at the first Day of Remembrance program

MEMBERS OF JOHN CARBONE'S "THE ENTERPRISE" FACE CRIMINAL CHARGES

As a result of thirteen months of investigation and undercover work by FBI and BATF agents
fifteen members of The Enterprise were charged acts of arson, assault, bribery, extortion,
and attempted murder⁶⁵⁰

FBI agents filed a criminal complaint in U.S. District Court, Tacoma -- November 28, 1978
charging fifteen Pierce County men with racketeering

under the Racketeer Influenced and Corrupt Organization (RICO) Act
which had been put in place [1970] to combat organized crime

RICO removed the requirement for preliminary court hearings in which the federal government
would be forced to present details of its case to establish probable cause for the arrests

RICO also allowed the federal government to seize and forfeit all property and assets
used by the criminal organization to further its goals

FIFTEEN PIERCE COUNTY RACKETEERS ARE INDICTED⁶⁵¹

After four days of testimony, a federal grand jury in Seattle
returned a sweeping seventeen-count indictment -- December 8, 1978
charging fifteen members of The Enterprise with racketeering and several other offenses
committed over a seven year period [1971-1978]

MEMBERS OF THE ENTERPRISE ARE ARRESTED

Federal marshals, together with FBI agents and the Bureau of Alcohol, Tobacco and Firearms
immediately arrested nine of the men fifteen named in the federal complaint:

John Carbone, the leader of the Pierce racketeering syndicate The Enterprise
Pierce County Sheriff George V. Janovich who protected The Enterprise
by disclosing information, discouraging law enforcement investigations,
using deputies to harass competing businesses,
and permitting prostitution and illegal gambling

Ronald J. Williams was Carbone's chief lieutenant
he directed henchmen to carry out illegal acts

Frank J. Mazzuca and Carbone's son, Joseph M. "Joey" Carbone
were lieutenants who directed illegal activities

Richard F. Caliguri was Carbone's chief enforcer and provided security for The Enterprise

⁶⁵⁰ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

⁶⁵¹ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

LaMonte A. Zemek and informer Robert M. Valentine hired gangsters
to commit murder, assault, arson and extortion
Anthony J. Mladnich provided security for the operation's illegal gambling businesses
in a second wave of arrests the other members of The Enterprise were taken into custody
William L. Pettit provided security for the illegal gambling businesses
Leroy G. Lusk, Harry E. Wilcox and David W. Levage were employed as arsonists
half-brothers Jackie M. Bentley and Michael D. Johnson specialized in strong-arm tactics,
killing and an occasional firebombing
all of the defendants were booked into the King County Jail
and then taken to Tacoma for initial court appearances before U.S. Magistrate Robert Cooper
Half-brothers, Jackie M. Bentley, Michael D. Johnson, provided the first break in the case
when they were arrested in Kansas City, Missouri, in possession of the shotgun used
in the attempted murder of Washington State Liquor Control Board Agent Melvin R. Journey
at his home in Tacoma [November 15, 1977]
both men agreed to cooperate and told federal agents they had been hired by Robert M. Valentine
on behalf of John Carbone and Ronald Williams to kill Journey
Valentine, who had already agreed to become an informer, not only admitted hiring the two gunmen
but he also told agents he had been engaged to
arrange for the firebombing of various taverns in Pierce County,
and to assault Prudential Mortgage Company owner Jerome Leo Weinstein
who was suspected of providing information about Carbone's businesses
to the Internal Revenue Service

“WHITE FLIGHT” IMPACTS SEATTLE SCHOOLS

Percentage of white students in the Seattle Public Schools
had been decreasing since the [1960s] for several reasons:

- end of the post-World War II baby boom,
- lower birth rates among whites, comparatively higher birth rates among people of color,
- increases in immigration, especially from Southeast Asia

additionally, expansion of highways made the suburbs more attractive to middle-class families
seeking an escape from high taxes, crime rates and other problems in the city⁶⁵²
But it was also clear that some white parents were taking their children out of Seattle public schools
simply because they did not want them bused out of their neighborhoods
number of white students dropped by nearly twelve percent compared to the previous year
and the total enrollment by ten percent in the first year of district-wide busing
(percentage of white students and the overall number of students fell steadily
during the years of mandatory busing)
In an effort to reduce “white flight,” the school district added more and more “options”
from “alternative” classrooms to programs for gifted students
all intended to appeal to middle-class parents
number of schools that offered options increased (from twenty-seven [1977])

⁶⁵² Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002

(to fifty-seven [1982])⁶⁵³
increased choices added to the costs of busing and diluted the desegregation program
as most of the students in options programs were white
as a result, segregated classrooms persisted even in technically integrated schools
(Even so, a five-year review of the Seattle Plan showed
that only about half the students in mandatory assignments were showing up
the rest were either moving into options programs or moving out of the public schools)⁶⁵⁴
School districts in Tacoma and Pasco joined with anti-busing groups in Seattle
to file a lawsuit challenging the constitutionality of the law -- December 1978

LIQUOR SALES BEGIN AT THE TULALIP SMOKE SHOP⁶⁵⁵

(Sale of liquor to Native Americans had been prohibited [since March 30, 1802]
congress passed an Act to Regulation of Trade and Intercourse with the Indian Tribes
and to Preserve Peace on the Frontier that prohibited the sale of liquor to Indians
until the law was repealed [August 15, 1953])
Tulalip Tribes opened a tribal-run Smoke Shop on their reservation
they planned to sell tobacco and eventually liquor
tribal leaders obtained federal permission and asserted that their sovereign status
meant the operation was not subject to state taxation or regulation
they ordered 645 cases of liquor, with a wholesale price of more than \$300,000,
from a federally licensed liquor distributor in Oklahoma
however, the state Liquor Control Board temporarily frustrated the tribe's plans
when agents and state patrol seized the liquor shipment in Everett [November 28, 1978]
Tulalip Tribes sued the state in federal district court the next day
seeking the return of its liquor and an injunction prohibiting the state from interfering
with the tribe's liquor sales
Federal District Judge Donald Vorhees issued a preliminary ruling within two weeks
which required the state to return the liquor
Tulalip Tribe's Smoke Shop made its first liquor sales -- December 15, 1978
even as employees worked to stock the shelves with the 645 cases
of previously confiscated liquor
(Washington State and the Tulalip tribe signed an agreement that committed the Tulalips
to buy its liquor from the state, thus paying the state tax, and to sell at state prices
in return, the Liquor Control Board agreed that it would close its Marysville store
and not open one in the area for ten years giving the Tulalips a temporary monopoly
on liquor sales near the reservation)

WASHINGTON STATE HOUSE OF REPRESENTATIVES HAS CO-SPEAKERS OF THE HOUSE

Normally the majority party in the State House of Representatives elects the Speaker of the House

⁶⁵³ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002

⁶⁵⁴ Cassandra Tate, *Busing in Seattle: A Well-Intentioned Failure*, HistoryLink.org, Essay 3939, September 7, 2002

⁶⁵⁵ Kit Oldham, *Liquor sales begin at the Tulalip Smoke Shop on December 15, 1978, after a federal judge orders the return of 645 cases seized by the state Liquor Control Board*, HistoryLink.org, Essay 9133, August 29, 2009.

to preside over the session, designate committee chairs, and appoint non-member employees such as the chief clerk, House attorney and Sergeant-At-Arms
however, the State House was tied at forty-nine Democrats and forty-nine Republicans
thus neither party had a majority
various options were suggested, including bringing in a non-member to preside as Speaker,
before a co-Speakership was agreed upon to share the leadership position
under the carefully negotiated arrangement,
each party would name co-chairs of seven of the most important House committees
chairs of the remaining fourteen committees were divided evenly between the parties
procedural rules ensured that no significant action could occur
without participation by both parties
Republican Duane Berentson and Democrat John Bagnariol were elected co-Speakers
by the members of the State House of Representatives -- January 8, 1979
they had served together in the legislature for many years and were on good terms
elected in an upbeat and friendly atmosphere with forty-nine votes each,
Berentson and Bagnariol received a special gavel
that had two separate handles so they could jointly the gavel session to order⁶⁵⁶

WASHINGTON STATE LAW REGARDING THE SELECTION OF JURORS CHANGES

Washington's jury statute was changed the state legislature -- 1979
to declare that **“a citizen shall not be excluded from jury service in this state on account of race, color, religion, sex, national origin, or economic status.”**⁶⁵⁷
opt-out statutes giving women an automatic exemption were found unconstitutional in Washington
U.S. Supreme Court trailed far behind Washington in defining women's right to serve on juries
not until [1994] did the U.S. Supreme Court strike down the use of peremptory challenges
to disqualify petit jurors on the basis of sex
in these decisions, the Court recognized that its earlier judgments about social roles,
expressed not long before as if they were natural laws, **“are no longer consistent with our understanding of the family, the individual, or the Constitution.”** (*Planned Parenthood of Southeastern Pennsylvania v. Casey*, 505 U.S. 833, 896-897 -- [1992])⁶⁵⁸

SERIAL KILLER KENNETH BIANCHI'S LIVE-IN GIRLFRIEND MOVES TO BELLINGHAM

Bianchi's girlfriend moved to Bellingham with their son to live with her parents in Bellingham
Bianchi begged for reconciliation and she finally relented,
but she demanded that he move to Bellingham which he did [late May 1978]
Bianchi took a job with Whatcom Security Agency, Inc.
Bellingham Police Department received information from the security office

⁶⁵⁶ Kit Oldham, *Duane Berentson and John Bagnariol are elected co-Speakers of the state House of Representatives on January 8, 1979*, HistoryLink.org, Essay 9086, July 20, 2003.

⁶⁵⁷ RCW 2.36.080 (3).

⁶⁵⁸ Aaron H. Caplan, “The History of Women's Jury Service in Washington,” *Washington State Bar News*, March 2005, P. 20.

at Western Washington University that two students were missing -- January 12, 1979
Diane A. Wilder, 27, from Bremerton and Karen L. Mandic, 22, from Bellevue
they shared a rental house at 1246 Ellis Street in Bellingham
Police learned that Mandic and Wilder had been offered \$100 each by a Whatcom Security guard
to watch a residence for two hours in the secluded Edgemoor neighborhood
while the security-alarm system was being repaired
Karen Mandic's green two-door [1978] Mercury Bobcat hatchback was discovered parked
at the end of a heavily wooded undeveloped cul-de-sac off Willow Road
two bodies were discovered stuffed into the car's back seat
also discovered was a piece of paper found lodged between the front seats of the car
on which it was written "334 Bayside 7 pm Ken"
Kenneth Bianchi was contacted by the Whatcom Security dispatcher and was told
to report to the security-guard's shack at the Port of Bellingham's South Terminal
shortly after his arrival, detectives took Bianchi into custody for questioning
he lied about his whereabouts during the night in question
Acting on a tip, police searched the area around the South Terminal guard shack
they discovered Diane Wilder's coat stuffed behind some pipes
only twenty feet from where Bianchi had parked his company pickup truck
during questioning Bianchi's alibis were so contradictory that detectives
believed they had found the murderer

BELLINGHAM POLICE INVESTIGATE THE KAREN MANDIC AND DIANE WILDER MURDERS⁶⁵⁹

Bellingham Detective Fred Nolte noted Bianchi's California driver's license
he contacted the Los Angeles County Sheriff's Department to check on his background
Nolte's call was referred to Hillside Strangler Task Force member Sergeant Frank Salerno
who was investigating the murders of thirteen California women since [October 1977]
when he heard the address on Bianchi's license, Salerno immediately made the connection
Salerno made plans to fly to Bellingham
Bellingham police served a search warrant at Bianchi's house
they seized his clothing as well as property stolen from places he had been assigned to guard
they also found a cache of stolen jewelry
at least two of the pieces, a large turquoise ring and a gold ram's-horn necklace,
matched the description of jewelry
worn by the Los Angeles "Hillside Strangler's" victims
Bellingham Police detectives arrested Kenneth A. Bianchi -- January 13, 1979
as the prime suspect in the strangulation murders
of two Western Washington University students, Karen L. Mandic and Diane A. Wilder

MICROSOFT MOVES TO REDMOND, WASHINGTON

Bill Gates and Paul Allen moved Microsoft and its sixteen employees

⁶⁵⁹ Daryl McClary, *After he murders two Bellingham women, police arrest serial killer Kenneth A. Bianchi on January 12, 1979*, HistoryLink.org, Essay 8613, July 26, 2008.

to Redmond, Washington -- January 1979

Gates thought it would be easier to recruit computer programmers at this site
Microsoft hired more than thirty-five employees and a professional manager

U.S. SENATOR WARREN G. MAGNUSON BECOMES THE HIGHEST RANKING U.S. SENATOR

Senator Warren G. “Maggie” Magnuson became President Pro Tempore of the U.S. Senate -- 1979
President Pro Tempore presides over the Senate in the absence of the Vice President
this is the highest rank a U.S. senator can achieve
and is third in line for succession to the presidency
after the Vice President and U.S. Speaker of the House of Representatives

CIVIL WAR DISRUPTS LIFE IN IRAN

Mohammad Reza Pahlavi, the Shah of Iran, had been under attack for seven years [1970-1979]
fueled by the oil boom of the 1970s, an alarming increase in inflation and waste furthered the gap
between Iran’s rich and poor and its urban and rural citizens
also, tens of thousands of unpopular skilled foreign workers had moved into Iran
as the political crisis to the Shah grew, his secret police, SAVAK, became increasingly brutal

EVENTS IN IRAN ARE FELT IN AMERICA

Ayatollah Ruhollah Khomeini was an Iranian religious leader and politician
who had been exiled from Iran for fifteen years
by American-backed Mohammad Reza Pahlavi, the Shah of Iran
Khomeini was the author of more than forty books about Islam,
but he was primarily known for his political activities
Khomeini returned to Tehran, Iran and led the Iranian Revolution that overthrew the Shah of Iran
and forced him into exile -- February 1, 1979
Khomeini’s movement gained momentum as he gained title “Grand Ayatollah”
he was officially known as “Imam” -- rightful successors of Muhammad
Iran’s army mutinied against the Shah and joined forces with Ayatollah Khomeini

TRIAL OF JOHN CARBONE’S CRIMINAL SYNDICATE IS MOVED TO SAN FRANCISCO⁶⁶⁰

Although originally scheduled to be heard in federal court in Seattle -- February 4, 1979
U. S. District Court Judge Morell E. Sharp moved the trial to San Francisco
because of extensive pre-trial publicity
Before the trial even began, Robert M. Valentine, Jackie M. Bentley, Michael D. Johnson,
who were involved in the attempted murder of Washington State Liquor Control Board Agent
Melvin R. Journey pleaded guilty
enforcers Anthony J. Mladnich and William L. Pettit and arsonist Harry E. Wilcox
also pled guilty and agreed to testify as government witnesses
One defendant, Leroy Lusk who was charged with conspiracy and mail fraud
was granted a separate trial because he could not afford to defend himself in San Francisco

⁶⁶⁰ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

Eight remaining members of The Enterprise were scheduled to go on trial
president over by U. S. District Court Judge Morell E. Sharp

HOOD CANAL FLOATING BRIDGE SUFFERS A CATESTROPHIC FAILURE

Hood Canal Floating Bridge (officially known as the William A. Bugge Floating Bridge)
was hit by a violent windstorm carrying sustained winds of up to eighty-five miles per hour
and gusts up to 120 mph -- February 13, 1979
the bridge broke into three sections -- 7:00 a.m.
despite the drawspan being opened to relieve lateral pressure
the western drawspan and the pontoons of the western half of the bridge
broke loose and sunk
two state pickup trucks, a private car, a compressor, generator and a small crane
also went to the bottom, but nobody perished as the bridge was closed to highway traffic
and the tower crew had evacuated
Efforts to repair the bridge began immediately and Washington's Secretary of Transportation
secured a commitment of federal emergency relief money for the project

JAPANESE AMERICANS SEEK NATIONAL REDRESS FOR WRONGS DONE DURING WWII

Japanese American led by the Seattle Evacuation Redress Committee (SERC)
financial redress from the federal government for the homes and businesses lost
due to incarceration during the Second World War became their goal⁶⁶¹
Frank Chin, writer, playwright, the cofounder of San Francisco Asian American Theater Workshop
was in Seattle working on a series of articles for the *Seattle Weekly* -- he joined the SERC effort
he, together with members of SERC decided to hold a "Day of Remembrance" program
37th anniversary of the signing of Executive Order 9066, February 19, 1979,
was selected as the date

PUYALLUP FAIRGROUNDS BECOMES THE SITE FOR ANOTHER "DAY OF REMEMBRANCE"

Puyallup fairgrounds had served as the assembly center named Camp Harmony [1942]
second generation Japanese Americans, Nikkei, from around Puget Sound, Seattle and Tacoma
were assembled there before they were moved to more permanent camps further inland⁶⁶²
At first the Western Washington Fair board did not approve of holding the program on its grounds
however, after some discussion and presentations by SERC members,
fair board members voted unanimously to allow the event -- and to waive all user fees
Day-long program began at Sicks' Stadium in Seattle -- February 19, 1979
there a caravan led by National Guard trucks, like those used in the original removal,
that formed and wound its way south on Interstate 5 to Puyallup
at the fairgrounds, exhibits of internment camp artifacts and photos, dance performances,
and speeches addressed the often unspoken history of the wartime era
for Japanese Americans

⁶⁶¹ Jennifer Ott, *First Day of Remembrance (of World War II incarceration of Japanese Americans) is held at the Puyallup Fairgrounds on November 25, 1978*, HistoryLink.org, Essay 9464, August 23, 2010.

⁶⁶² Jennifer Ott, *First Day of Remembrance (of World War II incarceration of Japanese Americans) is held at the Puyallup Fairgrounds on November 25, 1978*, HistoryLink.org, Essay 9464, August 23, 2010.

speakers included Nikkei from around the country:

- actor Pat Morita poked fun at the hardships they had endured,
- poet Lawson Inada read a poem titled, “Something Grand,”
- author Monica Sone read a passage from her book, *Nisei Daughter*,
- Shosuke Sasaki read from his diary about the day he left for Camp Harmony

Other speakers included Washington State Supreme Court Justice James Dolliver,
University of Washington psychiatry professor Dr. Minoru Masuda,
University of Washington law professor Charles Z. Smith,
Seattle mayor Charles Royer

Most immediate effect of the first “Day of Remembrance”

was that people began talking more openly about their wartime experiences
many who had been incarcerated talked about their experiences
with their children and grandchildren for the first time that day

Puyallup Day of Remembrance led to other cities hosting their own events

anti-Japanese backlash that some feared never materialized

local television news programs covered the event favorably, as did the area’s major newspapers

no protesters picketed the event⁶⁶³

EIGHT MEMBERS OF JOHN CARBONE’S “THE ENTERPRISE” GO ON TRIAL⁶⁶⁴

U. S. District Court Judge Morell E. Sharp opened the trial in San Francisco -- March 19, 1979

John C. Merkel, U. S. Attorney for the Western District of Washington,

and two assistants, Peter Mair and David Wilson, represented the U.S. government

each defendant brought his own team of lawyers

Trial lasted three months, during which time more than 150 witnesses testified

hundreds of exhibits were introduced, including seventy-seven tape recordings

of conversations between the defendants and undercover federal agents

prosecution took two months to present its case while the defense took less than two weeks

IRAN ADOPTS A NEW CONSTITUTION

Iran held an election with only one choice: Islamic Republic: Yes or No -- April 1, 1979

voters overwhelmingly cast their votes of approval

Ayatollah Khomeini declared an Islamic republic with a new Constitution

that reflected his ideals of Islamic government -- a theocratic government

(that is, rule by God and religious leaders)

U.S.-CHINA TRADE REOPENS⁶⁶⁵

Arrival of the M.V. *Liu Lin Hai* at Port of Seattle’ Terminal 91 -- April 18, 1979

ended America’s thirty-year trade embargo against China

⁶⁶³ Jennifer Ott, *First Day of Remembrance (of World War II incarceration of Japanese Americans) is held at the Puyallup Fairgrounds on November 25, 1978*, HistoryLink.org, Essay 9464, August 23, 2010.

⁶⁶⁴ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

⁶⁶⁵ Kit Oldham, *M.V. Liu Lin Hai, first ship from People's Republic of China to visit U.S., docks at Pier 91 in Seattle on April 18, 1979*, HistoryLink.org, Essay 1696, April 17, 2015

United States had severed commercial and diplomatic relations with mainland China following the victory of Mao Zedong's Communist forces and the creation of the People's Republic of China [October 1, 1949]
Liu Lin Hai was operated by the China Ocean Shipping (Group) Company, or COSCO
China selected Seattle as the port in which to resume trade to honor U.S. Senator Warren G. Magnuson who had long advocated normalization of relations
Chinese leader Deng Xiaoping also visited Seattle in 1979
(China has become Seattle's second largest seaborne trading partner with cargoes valued at \$6.1 billion [1997])

LOWER GRANITE DAM PROJECT IS COMPLETED

Lower Granite Dam Project consisted of the dam, powerhouse, navigation lock and two fish ladders construction on the project began [July 1965]
Lower Granite Dam is a concrete gravity type, with an earthfill right abutment embankment it is about 3,200 feet long with an effective height of 100 feet
eight-bay spillway is 512 feet long with eight 50-foot by 60.5-foot radial gates
completed powerhouse featured six 135,000-kilowatt units
generators four through six came online – 1979
navigation lock is a single-lift type with dimensions of 86 by 674 feet and a fifteen-foot minimum depth
Lower Granite Lake extends up the Snake River about 39.3 miles to Lewiston, Idaho
backwater levees have been constructed around Lewiston
Lower Granite Dam Project provides navigation, hydroelectric generation, recreation and incidental water for irrigation

SEATTLE SONICS WIN THE NATIONAL BASKETBALL ASSOCIATION (NBA) CHAMPIONSHIP

(Seattle Sonics finished the [1978] season at 47–35 record under Coach Lenny Wilkens they won the Western Conference title
Sonics led the Washington Bullets in the NBA finals three games to two before losing the NBA Finals in seven games)
in the off-season only center Marvin Webster was lost to the team in a trade to New York
Sonics team was especially remarkable because it boasted no single superstar
center Jack Sikma was an All-Star but not considered a “superstar”
they were known for stingy defense and excellent outside shooting
powerful backcourt tandem of Gus Williams and Dennis Johnson
were outside shooters and played strong defense
forwards John Johnson and Lonnie Shelton played consistent basketball
key reserves Freddy Brown and Paul Silas brought an added spark when needed
(coach Lenny Wilkens eventually become the NBA's all-time winningest coach)
however, this team collectively was clearly better than the individual players⁶⁶⁶
Seattle rolled to its first fifty-win season in franchise history (52-30) -- 1979

⁶⁶⁶ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

once in the postseason, Seattle made relatively quick work of the Los Angeles Lakers to win the Western Conference Semifinals four games to one
Sonics then faced the Phoenix Suns in the Conference Finals,
they clinched a return to the NBA Finals with a 114-110 triumph in Game 7
to set up a re-match with the Washington Bullets
Seattle Sonics beat the Bullets 97-93 in Washington, D.C. taking the series four games to one
to win the team's first (and only) National Basketball Association Championship -- June 1, 1979
Guard Gus Williams scores twenty-three points in the decisive contest
center Jack Sikma grabbed seventeen rebounds

JURY IS GIVEN THE PIRECE COUNTY RACKETERRING CASE

Trial of the eight members of John Carbone's crime syndicate, The Enterprise,
went to the jury -- June 12, 1979
Federal District Court Judge Morell E. Sharp decided there was no need to sequester the jurors
because the San Francisco press was not interested in covering the trial

WORK BEGINS IN THE HOOD CANAL FLOATING BRIDGE

West truss of the Hood Canal Floating Bridge
(officially known as the William A. Bugge Floating Bridge)
was removed and taken to storage -- June 15, 1979
Washington State Department of Transportation attempted to mitigate the impact of the disaster
by redirecting traffic to US Highway 101 to drive fifty miles around Hood Canal
former Washington State ferry run that had been in place between Lofall and South Point
before the bridge was first built [1961]
this ferry run was reestablished across Hood Canal just south of the damaged bridge
also during the closure an additional ferry route was temporarily added
between Edmonds and Port Townsend

PIERCE COUNTY RACKETERRING JURY RETURNS ITS VERDICTS

One week after receiving the case the jury returned its verdicts -- June 19
they found seven defendants guilty of racketeering and a variety of other serious offenses
one defendant, David W. Levage, was found not guilty⁶⁶⁷
he was already serving a twenty-year sentence at the Washington State Correctional Center
in Shelton for setting fire to the Tacoma landmark restaurant *Top of the Ocean*

SEATTLE BUSING TO ACHIEVE RACIAL EQUALITY GOES TO FEDERAL COURT

Seattle's mandatory busing plan was ending its first year
when U.S. District Court Judge Donald S. Voorhees agreed with the school district
he declared that Initiative 350 as passed by the voters [November 8, 1978]
was unconstitutional
(U.S. Court of Appeals for the Ninth Circuit upheld the District Court ruling a year later
but this decision was appealed to the United States Supreme Court [1982])

⁶⁶⁷ Daryl C. McClary, HistoryLink.org, April 05, 2011.

U.S. SUPREME COURT RULES IN FAVOR OF WASHINGTON'S INDIAN FISHING RIGHTS

In the case of *Washington v. Fishing Vessel Association* U.S. Supreme Court ruled 6-3 -- July 2, 1979 in favor of upholding Federal Judge George Boldt's decision supporting Indian fishing rights

Justice John Paul Steven delivered the opinion of the Court which stated in part: **“The principal question presented by this extensive litigation in state and federal courts concerned the character of the right to take fish under the language of several Indian treaties entered into by the United States and various tribes in 1854 and 1855 whereby the Indians, in return for their relinquishing their interest in certain lands in what is now the State of Washington, were given, among other things, the ‘right of taking fish at usual and accustomed grounds and stations ... in common with all citizens of the Territory.’ A treaty, including one between the United States and an Indian tribe, is essentially a contract between two sovereign nations, and when the signatory nations have not been at war and neither is the vanquished, it is reasonable to assume that they negotiated as equals at arms length.**

“In treaties involving Indians, the United States, as the party with the presumptively superior negotiating skills and superior knowledge of the language in which the treaty is recorded, has a responsibility to avoid taking advantage of the other side, so that a treaty must be construed, not according to the technical meaning of its words to learned lawyers, but in the sense in which they would naturally be understood by the Indians.

“I would hold that the treaties give to the Indians several significant rights that should be respected. ...the purpose of the treaties was to assure to Indians the right of access over private lands so that they could continue to fish at their usual and accustomed fishing grounds. Indians also have the exclusive right to fish on their reservations, and are guaranteed enough fish to satisfy their ceremonial and subsistence needs. Moreover, as subsequently construed, the treaties exempt Indians from state regulation (including the payment of license fees) except as necessary for conservation in the interest of all fishermen. Finally, under *Puyallup II*, it is settled that even a...neutral conservation regulation is invalid if its effect is to discriminate against Indian fishermen. These rights, privileges, and exemptions -- possessed only by Indians -- are quite substantial....

DECISION: “Indian treaties of 1854 and 1855 securing ‘right of taking fish ... in common with all citizens,’ held to give Indian tribes right to harvest share of each run of ...fish passing through tribal fishing grounds in Washington state area.”

MEMBERS OF “THE ENTERPRISE” WHO PLED GUILTY ARE SENTENCED

U. S. District Court Judge Morell E. Sharp sentenced the six defendants who had plead guilty and testified for the government -- July 11, 1979

longest sentences, twelve years, were given to informant Robert Michael Valentine, and half-brothers Jackie M. Bentley and Michael D. Johnson⁶⁶⁸

for the attempted murder of state Liquor Control Board Agent Mel Journey
three other defendants, Anthony J. Mladnich and William L. Pettit and arsonist Harry E. Wilcox received lesser sentences

⁶⁶⁸ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

REMAINING MEMBERS OF JOHN CARBONE'S "THE ENTERPRISE" ARE SENTENCED

U. S. District Court Judge Morell E. Sharp sentenced the seven defendants found guilty at trial to sentences ranging from twelve to twenty-five years in federal prison -- July 13, 1979

- crime boss John Joseph Carbone was sentenced to twenty-five years and a \$163,000 fine;
- chief lieutenant Ronald John Williams was sentenced to twenty-five years and a \$172,000 fine;
- Carbone's son, Joseph M. "Joey" Carbone was sentenced to eighteen years and a \$38,000 fine;
- Richard Caliguri, Carbone's chief enforcer, was sentenced to eighteen years in federal prison;
- lieutenant Frank Julius Mazzuca was sentenced to fifteen years and a \$25,000 fine;
- LaMonte A. Zemek who hired gangsters as enforcers received twelve years in prison;
- Pierce County Sheriff George V. Janovich who protected The Enterprise was sentenced to twelve years in federal prison

All seven defendants found guilty appealed their convictions

to the federal Ninth Circuit U.S. Court of Appeals in San Francisco

they attacked the strength of the evidence to support their racketeering conspiracy convictions

they charged federal Judge Morell Sharpe had committed judicial errors

by allowing some of the evidence be shown to the jury

and also in his instructions to the jury

(U. S. Attorney's Office reviewed the charges of conspiracy and mail fraud against Leroy Lusk who had been granted a separate trial

it was decided there was not enough evidence to sustain a conviction⁶⁶⁹

(charges against Lusk were dismissed [August 8, 1979])

U.S. Court of Appeals affirmed the district court judgment

and convictions [October 6, 1980])

MAJOR LEAGUE BASEBALL'S ALL-STARS GAME IS PLAYED IN SEATTLE⁶⁷⁰

Seattle's Kingdome was visited by the best players in the National and American Leagues
players had been selected by a vote of the fans

Appearing in the game was Philadelphia Phillies Catcher Bob Boone

(his son, Seattle Mariners Second Baseman Brett Boone,

was elected to the [2001] All-Star Team)

National League All-Stars won the game 7-3 -- July 17, 1979

TED BUNDY STANDS TRIAL FOR MURDER

Bundy faced a jury for the brutal Florida State University Chi Omega sorority house
homicides and assaults of Margaret Bowman and Lisa Levy

despite the presence of five court-appointed attorneys to represent him,

Bundy again handled much of his own defense

Bundy's trial was covered by 250 reporters from five continents

and was the first murder trial to be televised nationally

Members of the jury deliberated less than seven hours before convicting him of both murders,

⁶⁶⁹ Daryl C. McClary, *Federal grand jury indicts 15 men in Pierce County for racketeering on December 8, 1978*, HistoryLink.org, Essay 9728, April 5, 2011.

⁶⁷⁰ Dave Wilma, HistoryLink.org, June 27, 2001.

three counts of attempted first degree murder and two counts of burglary -- July 24, 1979
Trial judge imposed the death sentence for each murder conviction

IT BECOMES NECESSARY TO RESOLVE THE FISHING DISPUTE IN WASHINGTON STATE

After the U.S. Supreme Court upheld the Boldt Decision with only minor adjustments,
legal challenges came to an end

State officials and Indian tribes had to decide how to move forward together -- 1979

they knew that fisheries managed by the courts would not benefit the fish or any of the fishermen
also, with the focus on allocation, conservation of the salmon had been neglected

WASHINGTON SCHOOL DISTRICTS STRIKE ACROSS THE STATE

Washington Education Association (WEA) leads affiliates went out on strike -- 1979

Spokane School District teachers (SEA) was struck for twenty-three days

Pasco teachers struck for thirteen days as a superior court judge delayed ruling on an injunction
strike breakers were used by district officials to keep the schools opened

West Valley School District faced a nine day teacher strike

schools remained opened although no court injunction was issued

Renton School District teachers (REA) were locked out by district administration for four days

no court injunction was sought by district administration

Northshore teachers walked off the job for one day

SERIAL KILLER KENNETH BIANCHI PLEADS GUILTY TO MURDER⁶⁷¹

Bianchi confesses to the crimes and then began providing information

about the serial killing of at least ten women in Los Angeles, California
attributed to the then-infamous "Hillside Strangler"

to save himself from the death penalty, Bianchi agreed to plead guilty

to the two murders in Bellingham and to five murders in Los Angeles

and to testify against his cousin Angelo Anthony Buono Jr.,

his accomplice in the California slayings -- October 20, 1979

Kenneth Bianchi received two consecutive life sentences for the murder convictions in Bellingham
(he was not be eligible for parole until [2059])

and should he be paroled, Bianchi would be remanded to the State of California

to serve life sentences for five counts of murder and conspiracy to commit murder there)

BIANCHI'S CALIFORNIA ACCOMPLICE IS ARRESTED⁶⁷²

Angelo Anthony Buono Jr. was taken into custody without a struggle -- October 20, 1979

he was charged in Los Angeles County Superior Court with twenty-four felonies

which included ten murders, extortion, conspiracy, sodomy, pimping and pandering

Los Angeles District Attorney's Office believed their case

rested on Bianchi's credibility as a witness

when Bianchi plead guilty he became their key witness

⁶⁷¹ Daryl McClary, HistoryLink.org, July 26, 2008.

⁶⁷² Daryl McClary, HistoryLink.org, July 26, 2008.

SHAH OF IRAN IS ADMITTED INTO THE UNITED STATES

American-backed Mohammad Reza Pahlavi, the Shah of Iran, was himself driven into exile
he traveled to America for cancer treatment -- October 22, 1979
In Iran there was an immediate public outcry against the United States
Ayatollah Khomeini and his backers demanded the Shah be returned for trial and execution

AMERICAN EMBASSY IN TEHRAN, IRAN IS TAKEN OVER

At the urging of Ayatollah Khomeini, 3,000 Islamist radicals, mostly students,
took control of the American Embassy -- November 4, 1979
ninety hostages were held -- fifty-three were Americans
(this crisis, known as the Iran hostage crisis, lasted 444 days)
they demanded the United States send the former Shah of Iran back to stand trial
Americas saw the hostage-taking as a flagrant violation of international law
it aroused intense anti-Iranian anger across the nation
In Iran, the takeover was immensely popular and earned the support of Khomeini

SITUATION IN IRAN RAPIDLY ESCALATES

President Jimmy Carter halted all oil imports from Iran to the United States -- November 12, 1979
Carter then issued Executive Order 12170 which froze all Iranian assets in the U.S. -- November 14
In response, the government in Iran released thirteen women and African American hostages
but the Ayatollah Khomeini issued false radio reports
that Americans had occupied the Grand Mosque in Mecca
in response to Khomeini the American Embassy in Islamabad, Pakistan
was attacked by a mob and set afire killing four -- November 21

1980-1989

GARY LARSON CREATES THE *FAR SIDE* CARTOON

Gary Larson was born in Tacoma [August 14, 1950]
he grew up on Fox Island, Washington
he attended Curtis Senior High School before he attended Washington State University
where he graduated with a degree in communications [1972]
Gary was working in a music store
he took a few days off after he realized how much he hated his job
he decided to try cartooning and drew six cartoons
that he submitted to Seattle-based *Pacific Search* (now *Pacific Northwest Magazine*)
Larson next submitted his work to *The Seattle Times* under the title *Nature's Way* [1979]
Gary Larson syndicated *The Far Side* -- January 1, 1980
its themes were often surreal
as the behavior of supposedly superior humans was compared with animals
his single-panel cartoon was published internationally for fifteen years
(he produced more than twenty-three books of collected cartoons
with a combined sales of more than forty-five million copies
Gary Larson ended the series when he retired [January 1, 1995])

POPULATION OF WASHINGTON STATE INCREASES BY TWENTY-ONE PERCENT

Total population of Washington State was 4,132,156 -- 1980
this represented an increase of 21.1 percent from the [1970] count of 3,413,244
ratio of women to men remained 50.3 percent women to 49.7 percent men
about half of the state's residents were born here
Average population density state-wide was 62.1 persons per square mile
total urban population, 1980: 3,037,014
73.50 percent of total population -- an increase of 535,963 (21.4 percent) from [1970]
73% of state population lives in 166 urban areas across the state
25% of the people of Washington live in Seattle, Tacoma or Spokane
total rural population, 1980: 1,095,142
26.5 percent of total population -- an increase of 187,024 (20.6 percent) from [1970]
75% of the state's population lived west of the Cascade Mountains
63% lived in Puget Sound Basin
Snohomish County had 337,720 people (up 27.3 percent)
King County alone has almost 1/3 of the state's population
with 1,269,749 (up 17.8 percent)
Pierce had 485,643 people (up 17.8 percent)
San Juan County was the fastest growing county with an increase of 103.3 percent

east of the Cascades Spokane County population of 41,835 was up 18.9 percent
Yakima County held 172,508 (up 18.8 percent)
Largest age group was 20-29 years old with 790,539 people
followed those 30-39 age group at 628,027 people

Single men significantly outnumbered single women in the 1980 census,
but there were more than five times as many widows as widowers:

total males over age fourteen: 1,239,721

- Married: 947,501 (60.01 percent)
- Single: 461,462 (29.22 percent)
- Divorced: 113,269 (7.17 percent)
- Widowed: 31,891 (2.02 percent)

total females over age fourteen: 1,280,861

- Married: 940,250 (57.72 percent)
- Single: 340,434 (20.90 percent)
- Divorced: 148,257 (9.10 percent)
- Widowed: 168,394 (10.34 percent)

Racial makeup of Washington state was 3,779,170 (91.56 percent) white residents
352,986 minority residents comprised 8.54 percent of the state's population

- Hispanic origin (of any race): 120,016 (2.90 percent of total population)
- Black: 105,574 (2.55 percent of total population)
- American Indian, Eskimo, and Aleut: 60,804 (1.47 percent of total population)
- Korean: 13,083 (1.32 percent of total population)
- Japanese: 26,378 (0.64 percent of total population)
- Filipino: 24,37 (0.59 percent of total population)
- Chinese: 18,114 (0.44 percent of total population)
- Vietnamese: 9,838 (0.24 percent of total population)
- Asian Indian: 4,002 (0.10 percent of total population)
- Hawaiian: 2,976 (0.01 percent of total population)
- Other race: 87,843 (2.12 percent of total population)

Washington residents age twenty-five and older grouped by years of schooling completed:

- up to eighth grade: (10.3 percent of the population down from 18.21 percent [1970])
- one to three years of high school (12.0 percent down from 17.59 percent)
- four years of high school (37.4 percent down from 36.25 percent)
- one to three years of college (21.3 percent up from 14.52 percent)
- four years of college or more (19.1 percent up from 12.72 percent)

Income in general is substantially higher than in [1970]

but there is a glaring imbalance between the income of men and that of women

- median income for fully employed males fifteen years and older: \$20,144
- median income for fully employed females fifteen years and older: \$11,558

Poverty level for a family of four was determined to be an income of \$7,412 per year

poverty level for individuals was established at \$3,686

there were 78,194 families below poverty level (7.2 percent of Washington's families)

ECONOMIC RECESSION SEVERELY IMPACTS THE WORLD

World economic development had suffered from a shortage of oil

led by the [1973] oil crisis when an Arab oil embargo was imposed

and the [1979] energy crisis when Iran nearly stopped producing oil

United States's Economic growth rate slowed down

and unemployment remained high [[1970s] and early 1980s
U.S. economy was suffering from “stagflation”
where the inflation rate remained stagnated at a high rate,
inflation had more than doubled after the [1973] oil embargo shock
but it reached a startling 11.3% [1979] and then soared to 13.5% [1980]
stagflation caused a dilemma for economic policy
since actions designed to lower inflation could aggravate unemployment
and vice versa
Primary cause of the recession in the United States was a monetary policy
established by the Federal Reserve System to control high inflation
as interest rates were substantially increased to reduce high inflation
unemployment remained at historically high levels
several key industries experienced a downturn
many of the economic sectors that supplied these basic industries were hard-hit

TIME MAGAZINE NAMES KHOMEINI ITS “MAN OF THE YEAR”

Ayatollah Ruhollah Khomeini was named *Time’s* “Man of the Year” -- January 7, 1980
in the article it was noted: **“The dour old man of 79 shuffles in his heel-less slippers to the rooftop and waves apathetically to crowds that surround his modest home in the holy city of Qum. The hooded eyes that glare out so balefully from beneath his black turban are often turned upward, as if seeking inspiration from on high--which, as a religious mystic, he indeed is. To Iran’s Shi’ite Muslim laity, he is the Imam, an ascetic spiritual leader whose teachings are unquestioned. To hundreds of millions of others, he is a fanatic whose judgments are harsh, reasoning bizarre and conclusions surreal. He is learned in the ways of Shari’a (Islamic law) and Platonic philosophy, yet astonishingly ignorant of and indifferent to non-Muslim culture. Rarely has so improbable a leader shaken the world.”**

ANOTHER TRIAL FOR TED BUNDY ON MURDER CHARGES

Ted Bundy was tried in Orlando, Florida for killing junior high student Kimberly Ann Leach
this time Bundy decided not to represent himself -- January 7, 1980
his defense team’s strategy was to plead not guilty by reason of insanity
Ted became increasingly agitated throughout the trial
at one point he even lost control
and stood up yelling at a witness with whom he disagreed

WASHINGTON STATE LEGISLATURE GOES INTO REGULAR SESSION

Once again the State House of Representatives
faced co-Speakers of the House -- January 14, 1980
Republican Duane Berentson and Democrat John Bagnariol continued to share leadership
(before that fall’s election ended the tie)
Controversial matters were generally avoided
much of the legislation that passed did so unanimously or by large margins
one big exception was the budget that had to be passed
House of Representatives members were deeply divided

sixty day regular session was followed by sixty-three days of special session as the budget remained deadlocked until Berentson reluctantly voted with the forty-nine House Democrats to allow the session to adjourn

U.S. SUPREME COURT ASSOCIATE JUSTICE WILLIAM O. DOUGLAS PASSES AWAY

Yakima Valley raised William O. Douglas was a self-professed outdoorsman

Justice Douglas was well known for his adventures

he enjoyed and wrote about his wilderness excursions around the country and the world

according to *The Appalachian Trail Thru-Hiker's Companion*,

a guide published by the Appalachian Trail Club,

Douglas hiked the entire 2,000-mile trail from Georgia to Maine

because of his long-standing love of the wilderness and his high-profile public position,

he became one of the early leading voices of the growing environmental movement

Justice Douglas had a special affection for the south central Cascade Mountains

he had traveled since boyhood

even as a Justice he spent long summers at his Goose Prairie retreat

along the Bumping River

throughout his controversial life Douglas returned regularly to the Pacific Northwest

to spend his summers in the Wallowa and Cascade mountains

During his lifetime, Associate Justice William O. Douglas found time to travel extensively

he discovered he could fund the foreign travels which he loved

by publishing books on people and places he visited

many of Douglas' thirty-two books and writings

focused on nature and promoted conservation

in his book *My Wilderness: The Pacific West* [published in 1960] he wrote: **“I realized from my day's journey how badly we need high alpine meadows which can only be reached on foot, how badly we need peaks which can only be conquered by daring. The passion to bring ‘civilization’ into our wilderness areas is one sign that we Americans are getting soft and flabby. We want everything made easy. Yet success is worth having only when it comes through great effort and hazardous exertion.**

“The logistics of abundance call for mass production. This means the ascendancy of the machine. The risk of man's becoming subservient to it are great. The struggle of our time is to maintain an economy of plenty and yet keep man's freedom intact. Roadless areas are one pledge to freedom. With them intact, man need not become an automation. There he can escape the machine and become once more a vital individual. If these inner sanctuaries are invaded by the machine, there is no escape. For men and civilization will be molded by mass compulsions.”

other books reviewed his legal views and court decisions

still others addressed what in his mind it meant to be an American

he also wrote two autobiographical volumes which reflected his political philosophy

Go East Young Man [1974] and *Of Men and Mountains* [1982]

these autobiographical books are accounts of his early life and mountain adventures

that are deeply personal and revealing and contributed to the Douglas legend

he noted: **“When a man knows how to live dangerously, he is not afraid to die. When he is not afraid to die, he is, strangely, free to live.”**

U.S. Supreme Court Associate Justice William O. Douglas passed away at the age of eighty-one -- January 19, 1980
he is buried at Arlington National Cemetery
following his death, the federal court building in Yakima was named in his honor
William O. Douglas Wilderness located in the Cascade Mountains near his beloved Goose Prairie also commemorates Douglas and the wild areas he championed

LIFE IN IRAN UNDER AYATOLLAH RUHOLLAH KHOMEINI

Under Khomeini's rule, Sharia (Islamic law) was introduced -- February 1, 1980

- Islamic dress code was enforced for both men and women by Islamic Revolutionary Guards;
- women were required to cover their hair -- men were not allowed to wear shorts;
- alcoholic drinks and most Western movies were banned;
- practice of men and women swimming or sunbathing together were also banned;
- Iranian educational curriculum was Islamized at all levels;
- broadcasting of music other than military or religious on Iranian radio and television was banned

TED BUNDY HEARS THE VERDICT IN THE KILLING OF KIMBERLY ANN LEACH

Exactly one month following the opening of the trial,

Judge Wallace Jopling asked the jury to attempt to reach a verdict

After less than eight hours of deliberation

the jury returned a verdict of guilty -- February 7, 1980

principally due to the testimony of an eyewitness who saw him leading Leach from the schoolyard to his van

During the penalty phase of the trial, Bundy took advantage of an obscure Florida law that provided that a marriage declaration in court in the presence of a judge constituted a legal marriage

former Washington State Department of Employment Security employee

Carole Ann Boone had moved to Florida to be near Ted Bundy

she had testified on his behalf as a character witness at a previous trial

this time as she was testifying, Bundy asked her to marry him

she accepted and Bundy declared to the court that they were legally married

TED BUNDY IS SENTENCED TO DEATH

Theodore Robert "Ted" Bundy was sentenced to death for a third time -- February 10, 1980

As the sentence was announced Bundy reportedly stood and shouted,

"Tell the jury they were wrong!"⁶⁷³

(This third death sentence would be the one ultimately carried out more than nine years later)

TED BUNDY BEGINS TO PROVIDE INFORMATION ABOUT HIS KILLINGS

⁶⁷³ Laura Foreman, editors of Time-Life Books: *Serial Killers -- True Crime*. P. 42.

Shortly after the beginning of his long appeals process in the death of Kimberly Ann Leach Ted Bundy initiated a series of interviews with various police detectives
Bundy spoke primarily in the third person to avoid “the stigma of confession”⁶⁷⁴
he began to divulge details of his crimes and thought processes

BARBARA ROTHSTEIN IS NOMINATED FOR A FEDERAL JUDGESHIP

Barbara J. Rothstein graduated from Harvard Law School [1966]
she entered private practice in Boston, Massachusetts
before joining the Washington State Attorney General’s Office
in the Consumer Protection and Antitrust Division [1968] to [1977]
she was also an adjunct professor at the University of Washington Law School
and served as a Superior Court Judge in King County [1977] to [1980]
Barbara Rothstein was appointed by President Jimmy Carter
to a new Federal judge position in the U. S. District Court for the Western District of Washington
and was confirmed by the U.S. Senate -- February 20, 1980
(she served as chief judge [1987-1994]
and as director of the Federal Judicial Center [from 2003])

FATE OF THE NINETY AMERICAN EMBASSY HOSTAGES REMAIN IN DOUBT

Ayatollah Khomeini proclaimed Iran’s government officials in control
of the hostage situation and demanded the United States return the Shah of Iran
for trial in Iran for crimes against the nation
(although the Shah died a few months later the crisis continued) -- February 23, 1980
Khomeini supporters named the American Embassy a “Den of Espionage”
and published details regarding armaments, espionage equipment
and many volumes of official and classified documents which they located there

COALITION AGAINST OIL PRODUCTION SOFTENS ITS ANTI-PIPELINE POSITION

Alaska’s Northern Tier Pipeline Company received the Coalition Against Oil Production’s
approval to begin construction of a pipeline across Puget Sound -- 1980
coalition’s lobbyist resigned because he believed CAOP
had abandoned its environmental goals
Seattle Audubon Society withdrew its CAOP membership
eight environmental organizations, nine Indian tribes and two local governments
tried to block the pipeline plan through litigation

MOUNT ST. HELENS SHOWS SIGNS OF AWAKENING

Indians were aware of volcanic activity at Mt. St. Helens going back thousands of years
they developed several remarkably similar legends to explain the mysterious activity
several of these events took place between [1800] and [1857]
minor explosions were reported in [1898], [1903], and [1921]
these were probably steam-driven and not magmatic (molten rock) eruptions

⁶⁷⁴ Stephen Michaud and Hugh Aynesworth, *Ted Bundy: Conversations with a Killer*, P. 17.

Mount St. Helens received its European name from British Captain George Vancouver [1792]
in honor of his friend Alleyne Fitzherbert (Baron St. Helens) British ambassador to Spain
Mount St. Helens was shaken by a series of small earthquakes -- beginning March 16, 1980
a substantial quake of magnitude 4.2 on the Richter Scale
shook the mountain -- March 20
this was the first substantial indication in 123 years of Mount St. Helens' awakening
scientists converged on the mountain by droves
Governor Dixie Lee Ray issued evacuation orders for a large area surrounding the mountain
Steam explosions opened the 9,677-foot tall mountain's crater peak
Mount St. Helens began spewing fumes and lava -- March 27, 1980
for the next few weeks steam and ash periodically vented out of the growing crater

WASHINGTON STATE LEGISLATIVE LEADERS ARE INDICTED FOR RACKETEERING

Washington State Co-Speaker of the House of Representatives Democrat John Bagnariol
and Senate Majority Leader Democrat Gordon Walgren were named
along with lobbyist Patrick Gallagher in a federal racketeering indictment
from an undercover FBI operation -- April 2, 1980
FBI agents were asked to investigate gambling and political corruption in Vancouver, Washington
FBI Agent Harold Heald, who headed the operation, posed as the representative
of "So-Cal," a fictitious California company that wanted to acquire and expand
legalized gambling outlets⁶⁷⁵
Heald was introduced to Gallagher, who in turn introduced the undercover agent
to political leaders Bagnariol and Walgren
in taped conversations it was agreed that the legislators would arrange
for passage of legalized gambling legislation and the gambling would be controlled by So-Cal
each of the three accused would receive six percent of the gambling profits So-Cal made
Both Democratic legislative leaders were among the most powerful politicians in the state
and both had been planning to seek higher office in the fall
Bagnariol planned to challenge Democratic Governor Dixie Lee Ray
Walgren planned to run for State Attorney General
as then-Attorney General Slade Gordon was filing
to run against U.S. Senator Warren G. Magnuson
Facing trial in United States District Court, in what became known as the Gamscam case,
Walgren, Bagnariol and Gallagher adamantly denied they had done anything wrong
they denounced the FBI investigation

AMERICA ATTEMPTS TO RETRIEVE THE HOSTAGES FROM IRAN

After negotiations with Iran to free the American hostages failed
President Jimmy Carter severed diplomatic relations with Iran
and imposed economic sanctions -- April 7, 1980
President Carter authorized a top-secret mission, named *Operation Eagle Claw*, to free the hostages

⁶⁷⁵ Kit Oldham, HistoryLink.org, March 3, 2008.

OPERATION EAGLE CLAW SETS OUT TO RESCUE THE IRANIAN HOSTAGES

An attempt to put an end to the Iranian hostage crisis by rescuing fifty-two Americans held hostage by radical students in the American Embassy in Tehran, Iran

Operation Eagle Claw called for a minimum of six Delta Force helicopters
eight were sent in -- April 24, 1980

two helicopters could not navigate through a very fine sand cloud

one helicopter was forced to crash land

second helicopter was forced to return to the aircraft carrier USS *Nimitz*

six helicopters reached the initial rendezvous point, Desert One,

but one of them had damaged its hydraulic systems

spare parts were on the crippled helicopters

During the planning stages, it was determined that if fewer than six helicopters were available then the mission would be automatically aborted

even though only four were absolutely necessary

commanders on the scene requested to abort the mission

President Carter gave his approval to stop the effort

As the U.S. Delta Force prepared to leave Iran, one of the helicopters crashed

into a C-130 Hercules transport aircraft containing fuel and a group of servicemen

resulting fire killed eight American soldiers and destroyed the two aircraft involved

as a result in the remaining helicopters were left behind -- April 25, 1980

failure of the rescue mission was announced by the press-- 1:00 a.m. April 26

Embassy hostages were scattered across Iran making a second rescue attempt impossible

failure of *Operation Eagle Claw* and the humiliating public debacle that ensued

damaged American prestige world

and negatively impacted President Carter's reelection campaign

MOUNT ST. HELENS BEGINS TO SWELL

North side of the mountain began to bulge -- Goat Rocks area expanded five feet per day
volcano had ballooned into a deformed mass of magma (molten rock), explosive gases
and increasingly hot groundwater -- end of April 1980

Mount St. Helen's snowy profile was peppered black by ash

and a stream of melting glacial ice began coursing down its north side

Mount St. Helens intermittently spewed ash and steam in bursts

this activity continued intermittently for the next several days

(About 10,000 earthquakes were recorded through [mid-May])

MOLTEN ROCK BEGINS TO RISE INSIDE MOUNT ST. HELENS

Magma rising in the mountain exerted pressure -- May 1980

North side of Mount St. Helens bulged out 300 feet and increased at a rate of five to six feet a day
scientists confidently predicted an eruption would take place but no one knew the magnitude

MOUNT ST. HELENS ERUPTS

Violent explosion five hundred times more powerful than the Nagasaki bomb,

equivalent to more than thirty tons of TNT, occurred -- 8:32 a.m. Sunday, May 18, 1980

Several events happened almost simultaneously:⁶⁷⁶

- hot gases (660 degrees F) and pulverized pieces of the mountain were blasted to the north at speeds of at least 300 mph
this blast was so powerful that all trees and vegetation in a six mile radius to the north of Mount St. Helens were vaporized
8.8 billion cubic yards of pulverized rock, dirt and ice blew into the air;
- sound and shock waves shot straight upward;
- top of the mountain, composed of rock debris, snow and ice rushed down at speeds up to 200 mph
most of the landslide flowed northwest following the North Fork of the Toutle River
an avalanche covered a twenty-four square mile area an average thickness of 150 feet but reached 600 feet thick in some places
- in moments Mount St. Helens dropped from Washington's fifth highest mountain (9,677 feet) to being the thirtieth highest peak at 8,364 feet

David Crockett, a cameraman for Seattle's KOMO TV, stood at the base of the mountain

he heard a deafening roar and instantly saw a sea of mud rushing toward him

he found safety on a piece of dry land between two fingers of the mud river

filming the blast, he spoke into the camera's microphone: **"I am walking toward the only light I can see. I can hear the mountain rumble. At this very moment I have to say 'Honest to God, I believe I am dead.' The ash in my eyes burns my eyes! Oh dear God, this is hell! It's very, very hard to breathe and very dark. If I could only breathe air. God, just give me a breath! I will try the radio. Mayday! Mayday! Ash is coming down on me heavily. It's either dark or I am dead. God. I want to live!"**⁶⁷⁷

miraculously Crockett was rescued by helicopter hours later

As Crockett was filming, volcanologist David Johnston was five miles away

observing an enlarged bulge on the slope when the eruption occurred

Johnston managed to radio out a single message: **"Vancouver, Vancouver, this is it!"**

David Johnston was covered with ash and lava

Moments later Jean Penna was driving down the road when the sky grew very dark

Penna later said, **"In the time it took me to get from my apartment to my mother's house, it went black. All of a sudden this powder began to fall, just like snow. It was 75 degrees outside and pitch black...."**⁶⁷⁸

AN ASH PLUME FILLS THE AIR

Ash roared out of the mountain

repeated clouds of ash were sent seventy-five thousand feet into the sky

In less than five minutes after the eruption, the blast reached out

eighteen to twenty-three miles killing nearly all vegetation

trees, mainly Douglas Firs, some 200 feet high, were stripped of branches and bark and blown down like toothpicks

⁶⁷⁶ Greg Lange, HistoryLink.org, May 15, 2003.

⁶⁷⁷ Crutchfield, James A. *It Happened in Washington*. P. 108-109

⁶⁷⁸ Crutchfield, James A. *It Happened in Washington*. P. 109.

some old growth trees were picked up, roots and all, and thrown over a ridge 1,500 feet high⁶⁷⁹
Within fifteen minutes the ash plume reached a height of fifteen miles above the mountain
dense clouds of black ash blown east blocked the sun -- day was turned into total darkness
powdery ash began to fall out of the “clouds” onto the countryside
ten inches of ash accumulated on the ground within ten miles of the mountain,
within sixty miles of the mountain the ash fall was one inch
within 300 miles one-half inch of ash was measured
It took about an hour for the sound and shock wave of the explosion
to bounce off the upper atmosphere and reach as far as King County
shock waves rattled windows and caused dishes to fall from shelves
sound of the Mount St. Helens eruption would be heard as far away as Saskatchewan

ASH FALL IMPACTS YAKIMA ABOUT AN HOUR AFTER THE ERUPTION

As reported by Yakima City Manager Dick Zais, **“By noon, the City was engulfed in darkness and communications by home telephone were impossible. It was like an eclipse of the sun that lingered - a blinding blizzard and a thundering electrical storm all in one. Street lights came on automatically, traffic stopped, and a strange quiet fell on our community; everywhere a talcum-like, sandy, gray powder kept accumulating. Cars, trucks, buses, and trains all stopped, and planes were re-routed away from the ash cloud.**

“From noon until 6:00 a.m. the following morning, the City was in total darkness. The ash fall on the City was gritty and light and difficult to sweep or shovel, especially when dry. Shifting winds blew the dust everywhere, severely impairing visibility and driving in our area. It was exceedingly harmful and abrasive to mechanical and electrical equipment, especially the motors of vehicles, aircraft and electronic systems.

“The ash fallout was especially crippling -- Yakima received nearly three inches of this material in the first 24 hours following the explosion. We estimated that several million tons of ash was deposited on the entire region. Initially, most citizens were caught unaware and were confused about what effects or risks the ash fall could present to themselves and their property. It appeared serene and many thought it would be washed away with the next rainstorm.”⁶⁸⁰

DEVASTATION CONTINUES TO ERUPT FROM MT. ST. HELENS

Ash eruptions continued roaring out of the mountain for nine hours
thousands of miles surrounding the mountain was covered with a layer of ash
ash fall reached the Great Plains about 900 miles from the mountain
ash cloud took three days to reach the East Coast and fifteen days to circumnavigate the world⁶⁸¹
Vessel traffic on the Columbia River between Longview and Astoria was paralyzed
by a twenty mile long log jam of floating debris
salmon and trout died by the millions
Damage estimates exceeded \$3 billion

⁶⁷⁹ Greg Lange, HistoryLink.org, May 15, 2003.

⁶⁸⁰ Yakima City Manager Dick Zais presented in a speech at Cities on Volcanoes 2 Conference, Auckland, New Zealand, February 14, 2001.

⁶⁸¹ Greg Lange, HistoryLink.org, May 15, 2003.

boiling gas and mud scour 200 square miles of forest
150 square miles of timber was destroyed
some 1,000 miles of state highways and roads were closed -- some for months
highway repairs alone ran into hundreds of millions of dollars
while the official casualty count was fifty-seven at least sixty people killed was more probable

DEVASTATION REACHES RITZVILLE, WASHINGTON

Ritzville was directly in the path of the Mount St. Helen's ash cloud -- May 18, 1980
it was hit harder than nearly any other spot in Eastern Washington
four to six inches of ash covered every surface with drifts as high as two feet⁶⁸²
When the mountain blew,
thousands of motorists were traveling across the state on weekend outings
they were forced to pull into Ritzville when visibility was reduced to zero
Ritzville's motels were quickly overwhelmed
hundreds of people were herded into the school gymnasium -- which quickly filled
crowds were gathered in every restaurant and church and residents opened up their homes
Ritzville's twenty-bed hospital was crowded with people
suffering from respiratory problems
hospital corridors were jammed with those who had nowhere else to go

FRUSTRATED MOTORISTS ATTEMPT TO FLEE FROM RITZVILLE

Winds swirled ash and dust throughout Ritzville
even opening a door caused eyes and throats to burn
still more than 2,500 motorists (more than the normal population of Ritzville)
remained stranded⁶⁸³
Hundreds of people become so tired and impatient that they defied police orders
as they attempted to drive out of Ritzville -- May 20, 1980
despite the fact that Interstate 90 and other roads were officially closed due to ash fall
most of them did not get more than a few miles
before the gritty blowing ash forces them to return
many motorists end up stalled on the shoulders of the road
when their engines clog with ash and they had to be rescued
fewer than 100 made it as far as the Schrag Rest Area about twenty-two miles west
Shoveling the ash to remove it proved to be very difficult work -- there was nowhere to put it
when trucks plowed it to the side of the road it just blew back
however, over the next few days most of the stranded travelers trickled out of Ritzville
although abandoned cars continued to litter the freeway

PRESIDENT JIMMY CARTER SURVEYS THE SCENE AT MOUNT ST. HELENS

Air Force One carrying the president and U.S. Senator Warren G. Magnuson
arrived in Portland, Oregon -- May 1980

⁶⁸² Jim Kershner, HistoryLink.org, April 14, 2010.

⁶⁸³ Jim Kershner, HistoryLink.org, April 14, 2010.

U.S. Senators Warren Magnuson and Henry Jackson had already acquired a commitment of \$1 billion in federal funds for relief of those stricken by the eruption
As he exited the airplane to the runway, Maggy stumbled -- film footage of the event was put to active use in the campaign to unseat Washington's senior U.S. senator
Washington voters saw a frail seventy-five-year-old man
Washington's National Guard troops flew the president to inspect the scene of devastation
he reflected, "**The Moon looks like a golf course compared to what's up there. It's the worst thing I have ever seen.**"⁶⁸⁴

WASHINGTON STATE WASN'T TO BUY McNEIL ISLAND FEDERAL PRISON

(Bureau of Prisons had been slowly closing the old federal penitentiary since [1976]
beef and dairy herds at the Federal Work Camp were moved
to the Federal Correctional Institution at Lompoc, California
remainder of the livestock was sold
Federal Prison Industries shops and equipment were moved to other federal institutions
shutdown operation was in full swing by [1979])
Washington State wanted to use the facility temporarily,
to help relieve overcrowding in the state's prison facilities
at the request of U.S. Senator Warren G. Magnuson the Bureau of Prisons agreed
not to further dismantle the penitentiary -- 1980

KENNETH BIANCHI TESTIFIES AGAINST ANGELO ANTHONY BUONO, JR.⁶⁸⁵

Kenneth Bianchi began violating the terms of his plea agreement
almost as soon as he arrived in Los Angeles
Buono's preliminary hearing became the longest in Los Angeles County history
it lasted for ten months -- June 1980 to [March 1981]
Bianchi attempted to influence judicial proceedings by making contradictory statements
in an effort to destroy his credibility
and have the case against his cousin Anthony Buono dismissed
It was during the prolonged preliminary hearing
that Bianchi met Veronica Lyn Compton, age 24, a self-proclaimed actress, poet and playwright
she sent Bianchi a letter at the Los Angeles County Jail,
asking if he would read her screenplay about a female serial killer,
called *The Mutilated Cutter*, and help her with characterization
the plot centered on the "Hillside Strangler still on the loose and killing women
Bianchi and Veronica Lyn Compton concocted a scheme
she would fly to Bellingham, strangle a girl with a length of white clothesline
and plant evidence to simulate the Mandic/Wilder murders
she was to send letters and cassette tapes to various locations in Los Angeles and Bellingham
with messages that the wrong man was in jail and the "strangler" would strike again

⁶⁸⁴ Senator Patty Murray speaking at the 25th Anniversary of the May 18, 1980 Eruption.

⁶⁸⁵ Daryl McClary, HistoryLink.org, July 26, 2008.

RESCUE SERVICES AT THE COLUMBIA RIVER'S CAPE DISAPPOINTMENT⁶⁸⁶

Early rescue efforts at the mouth of the Columbia River, the “Graveyard of the Pacific” were informal and mostly ineffective

United State Naval Lieutenant Charles Wilkes of the United States Exploring Expedition left a small boat from the wrecked USS *Peacock* in the hope that local residents would use it to save the crews of ships that foundered offshore [1841]

Local resident Joe Munson began a volunteer rescue program [1865] that lasted until [1882] he used a metal lifeboat salvaged from the [March 1865] wreck of the bark *Industry*

Astoria citizens raised money to equip the boat

U.S. Army provided free moorage at Baker’s Bay

Congress appropriated money to establish the U.S. Life-Saving Service [1874]

federal government support for the Baker’s Bay rescue efforts came in [1877]

when federal funds were used to build and equip a facility that volunteers could use

this was one of the first life-saving stations authorized for the Pacific Coast

Baker’s Bay station’s first full-time, paid Life-Saving Service crew was employed [1882]

it became one of seventeen stations nationwide to receive Life-Saving Service’s

Baker’s Bay station acquired one of the first thirty-four foot motor-powered lifeboats [1907]

this was upgraded to a thirty-six foot vessel [1909]

When the Revenue Cutter Service merged to form the United States Coast Guard [1915]

Cape Disappointment station continued in operation

as the U.S. Life-Saving Service Coast Guard’s Thirteenth District,

which includes Oregon and Washington

Thirteenth District began to replace its thirty-six foot motor lifeboats

with new steel-hulled forty-four-footers [1960s]

this Coast Guard District upgraded the training for its crews

in an effort that became nationally recognized

Congress appropriated money to establish the U.S. Life-Saving Service [1874]

⁶⁸⁶ William S. Hanable, HistoryLink.org, December 12, 2003.

U.S. COAST GUARD OPENS A NATIONAL MOTOR LIFEBOAT SCHOOL AT ILWACO⁶⁸⁷

Mouth of the Columbia River where the river's current collided with the Pacific Ocean
was an ideal location for the proposed U.S. Coast Guard National Motor Lifeboat School -- 1980
Originally equipped with five forty-four-foot Motor Lifeboats
new forty-seven-foot boats were developed and tested [late 1990s]
as the U.S Coast Guard Station's rescue operation continued at Cape Disappointment
Coast Guard continues to provide services at the mouth of the Columbia River
with a maritime law enforcement presence near the approaches to the Columbia River
and search and rescue missions within fifty nautical miles of the Columbia River entrance

SELECTIVE SERVICE (DRAFT) REQUIREMENT IS REINSTATED

(President Gerald Ford had signed Presidential Proclamation 4360 [March 29, 1975]
which terminated registration procedures under the Military Selective Service Act
registration for the Draft of males eighteen to twenty-five years old was no long required)
In response to the Soviet Union's invasion of Afghanistan
President Jimmy Carter signed Presidential Proclamation 4771 -- July 2, 1980
which reinstated the requirement to register for the draft
male U.S. citizens and male immigrant non-citizens between the ages of 18 and 25
were required by law to register within thirty days of their 18th birthday
and they must notify Selective Service within ten days of any changes
to any of the information provided on his draft registration card
registration for Selective Service is required for various federal programs and benefits
including student loans, job training, federal employment and naturalization
names are distributed to the Services for military recruiting purposes
on a quarterly basis

MICROSOFT PARTNERS WITH INTERNATIONAL BUSINESS MACHINES (IBM)

International Business Machines (IBM) approached Bill Gates to talk about writing
an operating system for its new personal computer then secretly under development -- July 1980
Bill Gates established a goal to have a personal computer in every household in the United States
Gates and Paul Allen convinced IBM to allow other companies to copy the specifications
of their personal computer "PC" -- unleashing a flood of personal computer "clones"

CAMPAIGN FOR U.S. SENATOR MAGNUSON'S SEAT

Senator Warren G. Magnuson at age seventy-five was seeking office for a seventh term
Magnuson's health was a concern during his Senate race
besides his committee assignments, he was president pro tempore of the Senate
third in line to the presidency after the Vice President and Speak of the House
when asked about the fact he was slowing down
he responded "**The meeting doesn't start until I get there.**"⁶⁸⁸
Slade Gorton, Washington's Attorney General, received the Republican nomination

⁶⁸⁷ William S. Hanable, HistoryLink.org, December 12, 2003.

⁶⁸⁸ Shelby Scates *Warren G. Magnuson*. P. 310.

Gorton was known for taking the unusual step of appearing personally
to argue the state's positions before the Supreme Court of the United States
and for prevailing in those efforts

STATE DEMOCRATIC CONVENTION IN ABERDEEN

Delegates to the state Democratic convention met in the Aberdeen High School auditorium
U.S. Senator Warren Magnuson opened his keynote speech
with a list of accomplishments
and jobs as yet unfinished that required his reelection

Governor Dixie Lee Ray, smiling at the audience, sat behind the orator
her smile vanished and delegates grew uncomfortable as Maggy spoke: **“This state is not going to be a dumping ground for nuclear waste and there are not going to be any supertankers on Puget Sound.... Little monkeys in trees have thrown coconuts at me from time to time -- I’ve even been called a dictator!** (by Governor Ray)

wild cheering filled the room, **“Yeah. Now one more thing. While I’ve been back in Washington working on problems of the state and nation, I hear that some have been bartering my job. Well. I want to tell the governor and any other governor there ain’t gonna be any vacancy in the U.S. Senate!”**⁶⁸⁹

Governor Ray bolted out a back door to a waiting car
delegates had witnessed her political death

BOEING’S PLANT 2 BECOMES OBSOLETE

Boeing’s Plant 2 was located about a mile up the Duwamish River
from Boeing’s original Plant 1 [1917] to [1965],
Boeing’s Plant 2 built in [1936 had a glorious history
burlap houses and chicken-wire lawns had camouflaged its rooftops during World War II
when Boeing produced 6,981 B-17 Flying Fortresses out of Plant 2

Plant 2 was where Boeing assembled a variety of other aircraft:

- Model 307 Stratoliner, which was the first successful pressurized production airplane;
- Model 377 Stratocruiser airliner;
- B-47 Bomber -- the first large swept-wing jet;
- KC-97, which was the first mass-produced aerial tanker;
- B-52 Stratofortress which served the Air Force for more than six decades;
- and the first 737 jet airliners-- Boeing’s best-selling jetliner

However, Plant 2 was headed toward obsolescence within fifteen years after it opened
although it had expanded from its original 60,000 square feet to more than 1.7 million,
it was too small for modern aircraft as the roof beams were just thirty-five feet high
Boeing’s prototype B-52 Bomber was forty-eight feet tall
as a temporary fix engineers put hinges on the early B-52s’ vertical fins
so they could be wheeled out of the factory

Plant 2 became overshadowed by Boeing’s nearby complexes
for military work, research, offices, flight testing and aircraft deliveries

⁶⁸⁹ Shelby Scates, *Warren G. Magnuson*. P. 307.

Plant 2 was used as a machine shop into the 1980s,
but was emptied of even that work as operations shifted to bigger, more modern facilities
Eventually the building fell into decay due to lack of adequate maintenance and earthquakes
broken water mains sometimes flooded the tunnels which led to other buildings on site
(Boeing Plant 2 was demolished
as part of a cleanup of the Duwamish watershed [July 26, 2010])

GAMSCAM TRIAL OF BAGNARIOL, WALGREN AND GALLAGHER BEGINS

State Speaker of the House John Bagnariol, State Senate Majority Leader Gordon Walgren
and lobbyist Patrick Gallagher were tried in the federal courtroom
of Judge Walter T. McGovern on charges of racketeering
in the Gamscam case -- late summer 1980
Although under federal indictment, both Walgren and Bagnariol
sought re-election to their legislative positions
however, they gave up their plans to seek higher office⁶⁹⁰

WASHINGTON STATE TEACHERS ONCE AGAIN GO ON STRIKE

Washington Education Association (WEA) once again led affiliates off the job -- 1980
Bellevue teachers struck for twenty days
but no court injunction was requested by the district
Riverview teachers were on strike for seven days
to achieve a better professional agreement
although no court injunction to force teacher back to work was issued
district officials opened schools using scabs
Auburn (AEA) teachers struck for four days before achieving a contract settlement
Castle Rock School District was struck for three days
before a professional agreement was reached

PIERCE COUNTY PROPOSES A HOME RULE CHARTER GOVERNMENT

Pierce County had a commission form of government
an effort to change to Home Rule Charter failed to gain voter approval [1976]
but the arrest of former County Sheriff George Janovich
changed the voters' attitude concerning a new form of government⁶⁹¹
Home Rule Charter government was proposed in Pierce County -- September 1980
to elect a county executive and a seven-member county council
to appoint the positions of sheriff and county clerk

CHINA RECEIVES MOST-FAVORED TRADE STATUS

U.S. Senator Warren G. Magnuson, long a friend of China, was proud to witness
as China gained most-favored trade status
from the U.S. Department of State -- September 1980

⁶⁹⁰ Kit Oldham, HistoryLink.org, March 3, 2008.

⁶⁹¹ Daryl C. McClary, HistoryLink.org, April 5, 2011.

agreements on maritime affairs, civil aviation links, and textile matters,
as well as a bilateral consular convention were agreed upon

Maggy made another speech: **“For twenty-five years I’ve urged the resumption of non-strategic trade with China. We simply could not go on ignoring nearly one-third of the world’s population.... [T]rade and cultural exchanges reduce tensions and lead the way to expanded peaceful relations.”**⁶⁹²

Unites States dialogue with the People’s Republic of China broadened
to cover a wide range of issues including global and regional strategic problems,
political-military questions like arms control, the United Nations
and other multilateral organization affairs

Maggy’s efforts paid great dividends for Washington State
about \$6.5 billion in Chinese trade entered the state’s waterfront docks [1994]

WASHINGTON STATE DEMOCRATIC PARTY IS IN DISARAY

Democratic Governor Dixie Lee Ray was challenged in the primary election
by Democrat Jim McDermott -- September 16, 1980

McDermott won the Primary Election
and represented the Democrats in the General Election

Co-Speaker John Bagnariol lost his House seat in the Democratic primary election
to Democrat Michael Patrick who went on to be elected
to the State House of Representatives

State Senate Majority Leader Gordon Walgren won the Democratic primary
he continued his reelection bid expecting to be exonerated by the jury

WAR IN THE MIDDLE EAST IMPACTS AMERICANS

Bad feeling had long been evident as the Iraqi government and Iranian governments
suspiciously guarded their mutual border as diplomatic relations deteriorated
and border disputes increased

Iraq under President Saddam Hussein was becoming
one of the most feared powers in the Middle East and an economic contender in the world
Iran’s vast oil fields and close trade ties with the Soviet Union were a prime target for Iraq
Iraq initiated strategic airstrikes against Iran -- September 22, 1980
and began a military invasion the next day setting off the (First) Persian Gulf War
(fighting continued until [August 20, 1988])

making this the longest conventional war of the 20th Century killing millions)
This war was fought at a great cost in lives and economic damage in both nations
half a million Iraqi and Iranian soldiers and civilians were believed to have died in the war
many more were injured -- but it brought neither victory nor a change in borders

Tactics were often those developed in World War I
large scale trench warfare, manned machine-gun posts, bayonet charges,
barbed wire across trenches, human wave attacks across no-man’s land
and extensive use of chemical weapons such as mustard gas were unleashed

⁶⁹² Shelby Scates Warren G. Magnuson. P. 312.

by the Iraqi government against Iranian troops and civilians
Although the United States supplied weapons to both sides over the course of the conflict,
it primarily favored Iraq -- which led to further anti-American resentment in Iran

“COPYCAT STRANGLER” MURDER ATTEMPT IS MADE IN BELLINGHAM⁶⁹³

Veronica Lyn Compton flew to Bellingham -- September 19, 1980
she befriended Kim Breed, age 26, a Bellingham Parks and Recreation employee
after spending several hours together, Compton lured Breed to her room
at the Shangri-La Downtown Motel, 611 E. Holly Street
there, Compton managed to tie Breed’s hands and twice attempted to strangle her
Breed was bigger and unusually strong --she managed to struggle free and escaped
Compton quickly disappeared from Bellingham but she was easy to trace
she was arrested at her Carson, California home -- October 2, 1980
on a Whatcom County first-degree attempted murder warrant and held on \$500,000 bail
media, dubbed Compton the “Copycat Strangler”

FEDERAL JUDGE GEORGE BOLDT DECISION PHASE II IS UPHELD

(In *United States v. Washington State* U.S. District Court Judge George Boldt upheld
Indian fishing rights provided in the treaties written by Isaac Stevens
acting as governor of Washington Territory
and Superintendent of Indian Affairs [1854-1855]
however, rather than make a sweeping all-inclusive ruling, Judge Boldt
had left specific questions of merit in the case to be considered by other courts
Federal District Judge William Orrick, who had replaced retired Judge George Boldt,
made his ruling in the Boldt Decision “Phase II”⁶⁹⁴
he decided Indian treaty rights extended to environmental conservation -- September 26, 1980
it was a responsibility of the federal government to provide for suitable salmon habitat
further, a portion of hatchery raised salmon should be allocated to the Indians
because these fish replenished the dwindling number of salmon for everyone
Sixteen fishing industry companies formed the Northwest Water Resources Committee
to support an appeal by the state of Judge Orrick’s ruling
Washington’s U.S. Senator Republican Slade Gorton
and Democrat Congressman Don Bonker
introduced bills into both houses of congress to end the Indian treaties

JURY REACHES A VERDICT IN THE GAMSCAM TRIAL

Co-Speaker of the House John Bagnariol, State Senate Majority Leader Gordon Walgren
and lobbyist Patrick Gallagher faced federal racketeering charges⁶⁹⁵
Jury in the case rendered its verdict -- October 3, 1980
lobbyist Patrick Gallagher was guilty on fourteen counts

⁶⁹³ Daryl McClary, HistoryLink.org, July 26, 2008.

⁶⁹⁴ Trova Hefferman, *Where the Salmon Run*, P. 181.

⁶⁹⁵ Kit Oldham, HistoryLink.org, March 3, 2008.

co-Speaker of the State House of Representatives John Bagnariol
was found guilty on nine counts
Senate Majority Leader Gordon Walgren was acquitted of five of the thirteen charges
as jurors were unable to agree on five additional charges they were dismissed
but Walgren was found guilty of racketeering, mail fraud and a Travel Act violation
Walgren announced that he was abandoning his re-election campaign for the State Senate

DEMOCRATS SUE TO REMOVE GORDON WALGREN FROM THE BALLOT

Although State Senator Gordon Walgren had been convicted of three felonies,
Washington State Supreme Court ruled that he must remain on the ballot
for re-election as the Democratic candidate -- October 22, 1980
even though Walgren had suspended his campaign after the jury verdict was delivered⁶⁹⁶
Republican State Representative Ellen Craswell ran against Walgren in the general election
she was known as one of the most conservative members
of the State House of Representatives

NATIONAL ELECTION CHANGES THE POLITICAL LANDSCAPE

Ronald Reagan led the Republican Party to a landslide victory -- November 4, 1980
Reagan ran on **“getting government off the backs of the American People”**⁶⁹⁷
and a tougher U.S. stance in foreign relations
President Carter’s failure to resolve the Iran Hostage Crisis damaged his leadership
Washington State supported Reagan as President Jimmy Carter was defeated

WASHINGTON STATE VOTERS JOIN THE REPUBLICAN LANDSLIDE

Former- King County Executive Republican John Spellman -- November 4, 1980
defeated Democrat Jim McDermott for Governor of the State of Washington
(McDermott had bested Governor Dixie Lee Ray in the Democratic primary election)
U.S. Senator Warren G. “Maggy” Magnuson, the most powerful man the U.S. Senate,
had been Washington’s Democratic senator for thirty-six years
and a member of the U.S. House of Representatives for eight years before that
Democrat Senator Magnuson was defeated by Republican challenger Slade Gordon+
by a 54% to 46% margin
as the GOP gained national control of the U.S. Senate for the first since [1954]
voters felt Maggy was too old and they noted, **“we still have ‘Scoop’ in the Senate”**
(U.S. Senator Gorton served one term [1981-1987])

In the U.S. House of Representatives

Republicans narrowed the margin of the Democratic majority to thirty-three seats
in Washington State five of six Democratic incumbent congressmen were reelected
as was Republican Joel Pritchard in Seattle’s First Congressional District
in the Fourth District Republican Sid Morrison from Zillah was elected to Congress
after defeating incumbent Democrat Mike McCormack

⁶⁹⁶ Kit Oldham, HistoryLink.org, March 3, 2008.

⁶⁹⁷ *The Seattle Times*

(Morrison served six terms in the U.S. House of Representatives [1981-1993])

GAMSCAM HAS AN EFFECT ON STATE ELECTIONS IN WASHINGTON

Gamscam trial of the State Co-Speaker of the House John Bagnariol,
State Senate Majority Leader Gordon Walgren and lobbyist Patrick Gallagher
turned what would have been a bad year for Democrats
into a Republican route -- November 4, 1980
Bagnariol lost his seat in the Democratic Primary Election [September 1980]
Walgren was badly beaten in the General Election by Republican Ellen Craswell
Washington State Senate saw the Republicans gain five seats
Democrats held only a one vote majority -- twenty-five to twenty-four
In the State House of Representatives Republicans picked up seven seats
to give the GOP a fifty-two to forty-six majority

VOTERS IN WASHINGTON HAVE THEIR SAY ON SPECIFIC ISSUES

Initiative 383 stated: **“Shall Washington ban the importation and storage of non-medical radioactive wastes generated outside Washington, unless otherwise permitted by interstate compact?”** passed by a vote of 75.49% YES

Referendum 38 was passed by the legislature and sent to the voters

it read: **“Shall \$125 million in state general obligation bonds be authorized for planning, acquisition, construction and improvement of water supply facilities.”**

it was passed by the voters by a 65.66% YES vote

Referendum 39 proposed: **“Shall \$450,000,000 in state general obligation bonds be authorized for planning, designing, acquiring, constructing and improving public waste disposal facilities?”**

this proposal was approved by a 63.33% YES vote

Senate Joint Resolution was a proposed constitutional amendment

that the state lay claim to 311,000 acres of federal land in Eastern Washington

SJR 132 read: **“Shall the constitution be amended to provide that the state no longer disclaims all rights to unappropriated federal public lands?”**

this proposal was defeated

Pierce County voters approved a Home Rule Charter (constitution) form of government

by a sixty-two percent margin -- November 4, 1980

new charter did away with the three-commissioner system of government

which was believed to foster political favoritism and corruption

Pierce County became the only county in Washington State

with an appointed rather than an elected sheriff

(First Pierce County executive to be elected under the new charter was Booth Gardner

who later served two terms as Washington’s governor [1985-1993])

(Seven members were elected to the County Council

three commissioners who were in office when the new charter began remained in office

four new members were added to the County Council by the new Charter

each of the seven Council Districts held about 60,000 citizens

all officers’ terms began [May 1, 1981])

“THE ENTERPRISE” CONTINUES TO FUNCTION OUTSIDE OF THE LAW⁶⁹⁸

Ronald John Williams, chief lieutenant in John Carbone’s criminal syndicate The Enterprise, faced twenty-five years in prison when he decided to cooperate with the FBI -- November 1980 he provided information that saved lives and resulted in numerous arrests, he prevented two major jailbreaks, and the murder of at least one prison guard and two inmates who were government witnesses

(U.S. District Court Judge Walter T. McGovern at the request of U.S. Attorney Gene Anderson and the FBI reduced Williams sentence to time served: four years [February 1983] because his cooperation endangered his life, Williams was given a new identity by the U.S. Marshal Service and put in the Witness Protection Program Williams gave a deposition in the civil lawsuits against Pierce County he alleged that more than forty Washington State and Pierce County officials were involved in fostering The Enterprise’s illegal activities) crime boss John J. Carbone was released on parole [December 20, 1991] he died at Western State Hospital in Tacoma [August 18, 1998] disgraced Pierce County Sheriff George Janovich was released on parole [December 19, 1986] after serving six years of his sentence he had been moved from prison to prison some thirty times and was kept segregated from the general prison population because of his thirty years with the Pierce County Sheriff’s Department Janovich died in Gig Harbor of complications from a ruptured appendix [June 19, 2005])

DISTRICT JUDGE WALTER T. McGOVERN SENTENCES GAMSCAM DEFENDANTS

John Bagnariol Gordon Walgren and Patrick Gallagher were sentenced to five years in federal prison by U.S. District Judge Walter T. McGovern⁶⁹⁹ -- November 24, 1980 During his sentencing hearing Gordon Walgren moved for a new trial District Court Judge McGovern denied the request this denial was appealed to the U.S. Ninth Circuit Court of Appeals which overturned two of Walgren’s three convictions as the case did not meet the necessary burden of proof (Walgren served two years in federal prison before being released on parole after his release, Walgren successfully petitioned for reinstatement as an attorney he continued his career as a lawyer and lobbyist but he did not seek elective office again)⁷⁰⁰

PACIFIC NORTHWEST ELECTRIC POWER PLANNING AND CONSERVATION ACT

Demands for electric power fell far below projected usage conservation and alternative power resources played a much larger role than expected Congressman Mike Lowery was a key advocate in the U.S. House of Representatives

⁶⁹⁸ Daryl C. McClary, HistoryLink.org, April 5, 2011.

⁶⁹⁹ Kit Oldham, HistoryLink.org, March 3, 2008.

⁷⁰⁰ Kit Oldham, HistoryLink.org, March 3, 2008.

to assist electrical consumers of the Pacific Northwest
Pacific Northwest Electric Power Planning and Conservation Act
passed congress -- December 5, 1980
this law established a representative regional power planning process to:

- achieve cost-effective energy conservation,
- encourage the development of renewable energy resources,
- assure the region of an efficient and adequate power supply

under the Pacific Northwest Electric Power Planning and Conservation Act
the Northwest Power Planning Council was created
Northwest Power Planning Council represented Washington, Montana, Idaho and Oregon
it was charged with assessing energy needs of the region
this was said to be the most significant energy innovation
since the construction of Grand Coulee Dam

BEATLE JOHN LENNON IS MURDERED

Popular music had been transformed by the English rock group *The Beatles*
composed of John Lennon (rhythm guitar, vocals), Paul McCartney (bass guitar, vocals),
George Harrison (lead guitar, vocals) and Ringo Starr (drums, vocals)
Musician and peace activist John Lennon was shot in New York City -- December 8, 1980
after taking part in a photo shoot for the cover of *Rolling Stone* magazine
as Lennon and his wife, Yoko Ono, returned home at *The Dakota* across from Central Park
Lennon was shot in the back by four of five hollow-point .38 caliber bullets
fired by an assassin whose reasoning remains a matter of speculation
John Lennon died en route to the hospital
his death triggered an unprecedented outpouring of grief around the world
chanting crowds outside *The Dakota* disturbed Yoko
she asked that they re-convene in Central Park the next Sunday
for ten minutes of silent prayer

THE WORLD PAYS TRIBUTE TO JOHN LENNON

Millions of people around the world
responded to the request from Yoko Ono -- December 14, 1980
thirty thousand gathered in Liverpool, England
New York's Central Park, close to the scene of the shooting saw the largest group
more than 225,000 gathered there
For those ten minutes every radio station in New York City went off the air
At least two Beatles fans committed suicide after the murder
leading Yoko Ono to make a public appeal asking mourners not to give in to despair
(Mark Chapman received a life sentence, but under the terms of his guilty plea
he became eligible for parole after serving twenty years
Chapman has been denied parole at hearings every two years since [2000])

REGULAR SESSION OF THE WASHINGTON STATE LEGISLATURE CONVENES

Republican effort to win a majority of the State Senate was greatly aided

in the [1980] election by the nationwide Republican landslide headed by Ronald Reagan and by the conviction on racketeering charges of two prominent Democratic legislators, House co-Speaker John Bagnariol and Senate Majority Leader Gordon L. Walgren,⁷⁰¹ Nevertheless, the effort in the State Senate came up one seat short Democrats clung to a narrow 25-24 majority when the 1981 legislative session opened -- January 12, 1981

AN AGREEMENT RELEASES THE AMERICAN HOSTAGES IN TEHRAN, IRAN

After the seizure of the American embassy in Tehran, Iran and the taking of American hostages, the U.S. government froze billions of dollars in Iranian gold held in American banks Iran, now involved in a war with neighboring Iraq, was desperate for the money they therefore appeared willing to release the hostages However, Iranians refused to communicate directly with President Jimmy Carter or his emissary at the request of the United States, Algeria agreed to act as an intermediary for the talks this arrangement slowed down the negotiating process after months of negotiation the U.S. agreed to release several billion dollars in Iranian gold Iranian officials signed an agreement with the U.S. to release the fifty-two American hostages after fourteen months of captivity -- January 19, 1981

PRESIDENT RONALD REAGAN IS SWORN INTO OFFICE

President Reagan took the oath of office -- January 20, 1981 at the moment Reagan completed his twenty-minute inaugural address fifty-two American hostages were released by Iran into U.S. custody After spending 444 days in captivity the hostages were flown to Algeria as a symbolic gesture for their help in resolving the crisis flown next to Rhein-Main Air Base in West Germany then on to Wiesbaden USAF Hospital where former President Carter, acting as emissary, received them All of the hostages arrived at West Point U.S. Military Academy where they stayed for three days Ten days after their release, the former hostages were given a ticker tape parade through the Canyon of Heroes in New York City everywhere they visited they were received a heroes' welcome In the United States some political analysts believed the Iranian hostage crisis had been a major reason for President Jimmy Carter's defeat in the [November 1980] presidential election

NICARAGUA'S REVOLUTION CONCERNS AMERICA

(Leftist rebels, the Sandinista National Liberation Front, overthrew the last of a long line of Nicaraguan military governments -- Sandinistas took control of Nicaragua [July 1979] Sandinistas were supported in their efforts by elements of the Catholic Church and regional governments including Panama, Mexico, Costa Rica and Venezuela

⁷⁰¹ Kit Oldham, HistoryLink.org, July 20, 2009.

and by the Soviet Union
Carter Administration officials, while refusing to act unilaterally,
decided to work with the new Nicaraguan Sandinista government)
On assuming office, President Ronald Reagan condemned the Sandinistas
for joining with Cuba in supporting Marxist revolutionary movements
in Latin American countries
he feared that Nicaragua would become a “second Cuba” -- late January 1981
Reagan’s Administration authorized the Central Intelligence Agency
to have paramilitary officers begin financing, arming, training and advising
anti-Sandinista rebels that were branded as counter-revolutionaries or “Contras”
Congress, and a majority of the American public, did not support the Administration efforts
to overthrow the Sandinista government in Nicaragua

WASHINGTON STATE ACQUIRES McNEIL ISLAND FEDERAL PENITENTIARY

Governor John Spellman’s first order of business after his election
was to fulfill his campaign promise to secure McNeil Island for state use
Governor Spellman negotiated a contract with the federal General Services Administration
to lease the prison for three years at \$440,000 a year⁷⁰²
with two one year extensions possible -- February 11, 1981
under the terms of the agreement, the new correction center would occupy
only sixty-six of the islands 4,413 acres
Washington State signed a lease with the federal government
granting the state use of the penitentiary
McNeil Island became the only prison in the United States that began as a territorial prison,
became a federal penitentiary and finally served as a state prison
it was the last prison in America located on a small, remote island

STATE SENATOR PETER VON REICHBAUER SWITCHES POLITICAL PARTIES

Democratic State Senator Peter von Reischauer was first elected to a state senate seat
for the 30th Legislative District of Vashon Island [1973]
He was considered to be a volatile personality by some fellow legislators,⁷⁰³
von Reichbauer feuded with Democratic Senate leaders from the start of the legislative session
Five weeks into the legislative session State Senator Peter von Reichbauer
at a tumultuous news conference in a crowded Senate hearing room -- Friday February 13, 1981
announced his intention to join the Senate Republican caucus
von Reichbauer’s decision gave Senate Republicans the key twenty-fifth vote
Republicans became the majority political party in the Washington State Senate
This sudden switch in political party affiliation produced both dismay and celebration
powerful State Senate Democratic committee chairmen lost their posts
and some committee staff employed by the Democrats were let go
State Senator Minority Leader Jeannette Hayner became the new Senate Majority Leader

⁷⁰² Daryl C. McClary, HistoryLink.org, April 24, 2003

⁷⁰³ Kit Oldham, HistoryLink.org, July 20, 2009.

JEANNETTE HAYNER, WASHINGTON'S FIRST WOMAN SENATE MAJORITY LEADER

Jeannette Hafner had grown up in Oregon and graduated as one of only two women in her class from the University of Oregon Law School
she married law school classmate H. H. "Dutch" Hayner and worked as an attorney for the Bonneville Power Administration while Dutch served in World War II
Jeannette got involved in politics and civic life while raising their three children she served on political campaigns, on the Walla Walla school board and was active in the local Republican party
she defeated three other Republicans in the [1972] primary election and was elected to an open State House of Representatives seat in the 16th Legislative District after she was re-elected to the House [1974], Republican leaders encouraged her to run for the 16th District State Senate seat [1976]
she won and held the seat until her retirement [1992])⁷⁰⁴
(Hayner played an important leadership role beginning with her first year term in the State Senate [1977]
she joined a group of fellow Republican senators who were frustrated that the party had been a minority in the Senate for over two decades they felt the existing Republican leadership was not making an effort to regain the majority group members staged a legislative "coup" against their Republican leaders at the end of the [1979] session Hayner, still in her freshman term as a State Senator, became Senate Minority Leader
and the first woman in the Washington State Legislature to lead a party caucus)
Jeannette Hayner quickly proved her skills as a legislative leader,
she became one of the most powerful and effective legislators in state history
Because it had been so long since the Republicans held the majority of the State Senate reorganizing the entire Senate structure in the middle of the session was very difficult
Hayner turned to legislative leaders from other states for advice
as the new Majority Leader she managed a smooth transition
and then presided over a session facing the worst budget crisis in years⁷⁰⁵

LEGAL EFFORTS ATTEMPT TO STOP THE USE OF McNEIL ISLAND AS A PRISON

Steilacoom citizens sued the Washington Department of Corrections -- February 18, 1981
they demanded an environmental impact study regarding how transferring state prisoners to McNeil Island would affect their historic town of 6,000 residents
their lawsuit claimed the lack of parking and increased traffic congestion from families waiting for the passenger ferry to visit the island corrections center would pose severe problems for the community⁷⁰⁶
Washington State Attorney General's office argued that transfer of McNeil Island from federal to state hands did not change the use of the facility

⁷⁰⁴ Kit Oldham, HistoryLink.org, July 20, 2009.

⁷⁰⁵ Kit Oldham, HistoryLink.org, July 20, 2009.

⁷⁰⁶ Daryl C. McClary, HistoryLink.org, April 24, 2003.

thus there was no need for an Environmental Impact Statement
Superior Court Judge James McCutcheon agreed with the state -- February 27, 1981

McNEIL ISLAND FEDERAL PENITENTIARY CLOSES

U.S. Marshals transported the last four federal prisoners off the island -- March 2, 1981
Washington Department of Corrections (DOC) moved the first twenty state prisoners
into the newly renamed McNeil Island Corrections Center -- March 3
inmates were put to work repairing and improving the facility which had not been maintained
since the federal government had shut down the prison [1976]⁷⁰⁷
(Control of McNeil Island prison was formally turned over to DOC [July 1, 1981])

VERONICA LYN COMPTON'S TRIAL FOR ATTEMPTED MURDER BEGINS⁷⁰⁸

Veronica Lyn Compton had plotted with serial killer Kenneth Bianchi to confuse police officer
by using the same rope and copying the methods of the "Hillside Strangler"
badly planned and poorly executed, the scheme failed miserably and Compton was arrested
Compton's trial began in Whatcom County Superior Court -- March 9, 1981
to assure a fair trial, four men and eight women from Pierce County were impaneled
Victim Kim Breed claimed Compton had tried to kill her
Compton claimed it was only a stunt to gain publicity for her screenplay, *The Mutilated Cutter*,
Breed, Compton said, was in on the charade

INSURANCE INDUSTRY ATTEMPTS TO ELIMINATE WORKER COVERAGE

When the insurance industry sought legislation in Washington
to destroy the state's industrial insurance law that protected workers on the job,
union members converged on Olympia in the largest demonstration
seen to that time at the state capital -- March 1981
charter buses and cars arrived from across the state as 8,000 people gathered
(Spokane union members followed up their trek to Olympia
with the first Labor Day Parade there since [1915]
one-hundred-year-old Carpenters Union led the parade of 1,500 members
from over thirty unions accompanied by ten floats and three bands [September 1981]
following the parade, union people picnicked at Riverfront Park
(Labor Day parades were held in Spokane over the next two years)

VERONICA LYN COMPTON IS FOUND GUILTY⁷⁰⁹

After deliberating for just three hours, the jury found Compton
guilty of first-degree attempted murder with a special finding
of being armed with a deadly weapon (a ligature) -- March 20, 1981
Because of the calculated viciousness of the attack on Kim Breed
Compton was sentenced her to life with the possibility of parole

⁷⁰⁷ Daryl C. McClary, HistoryLink.org, April 17, 2003

⁷⁰⁸ Daryl McClary, HistoryLink.org, July 26, 2008.

⁷⁰⁹ Daryl McClary, HistoryLink.org, July 26, 2008.

(She was released on parole [2003] after being incarcerated for twenty-two years)

AN ATTEMPTED ASSASSINATION OF PRESIDENT REAGAN TAKES PLACE

President Ronald Reagan was leaving Washington, D.C.'s Hilton Hotel after speaking there
John Hinckley, Jr. stood in the crowd as the president walked closely past him
Hinckley fired a .22 caliber blue steel revolver six times in 1.7 seconds -- March 30, 1981
Hinckley's first bullet hit White House Press Secretary James Brady in the head
his second hit District of Columbia police officer Thomas Delahanty
in the back of his neck as he turned to protect President Reagan
Hinckley now had a clear shot at the president, but the third bullet missed the president
and hit the window of a building across the street
as Special Agent-In-Charge Jerry Parr quickly pushed Reagan into the limousine,
a fourth shot hit Secret Service agent Timothy McCarthy in the abdomen
when he spread his body over the President to make himself a target
had Parr hesitated for a moment, the president would likely have been hit in the head
the fifth shot hit the bullet-resistant glass of the window on the open side door of the limousine
the sixth and final bullet ricocheted off the armored side of the limousine
and hit the president in his left underarm, grazing a rib and lodging in his lung
it stopped within an inch of his heart
ultimately, nobody was killed in the attack,
although Press Secretary James Brady was left paralyzed
President Ronald Reagan suffered a punctured lung and heavy internal bleeding,
but prompt medical attention allowed him to recover quickly
no formal invocation of the Twenty-fifth Amendment's presidential succession took place
but Secretary of State Alexander Haig controversially stated he was "in control here"
while Vice President George H.W. Bush was returning to Washington, D.C.
(John Hinckley, Jr. was found not guilty by reason of insanity
he was released [September 10, 2016])

SPACE SHUTTLE *COLUMBIA* IS LAUNCHED

(Construction had begun on the space shuttle [1975] at Rockwell International Aviation
[now Boeing North America] in Palmdale, California)
Columbia (STS-1) was named after the American sloop *Columbia Rediviva*
which explored the Pacific Northwest under the command of Captain Robert Gray
and became the first American vessel to circumnavigate the globe [178] to [1793]
it was also named after the Command Module of Apollo 11
which landed the first astronauts on the moon [July 20, 1969]
Shuttle orbiter *Columbia* arrived at Kennedy Space Center [March 25, 1979]
where preparations for launch were begun
During preparations for a ground test, two or three workers (reports vary) were asphyxiated
while working in *Columbia's* nitrogen-purged aft engine compartment [March 19, 1981]
Columbia was successfully launched -- April 12, 1981
on the 20th anniversary of the first human spaceflight, The Soviet Unions' Vostok 1
Columbia was commanded by Gemini and Apollo veteran John Young

who had been the ninth person to walk on the Moon [1972]
Columbia was piloted by rookie astronaut Robert Crippen

SPACE SHUTTLE *COLUMBIA* RETURNS TO EARTH

After orbiting the Earth thirty-six times Space Shuttle *Columbia* landed
on the dry lakebed runway at Edwards Air Force Base, California -- April 14, 1981
it was the first time a manned *reusable* spacecraft had returned from orbit

STARBUCKS, COFFEE, TEA AND SPICE EXPANDS IN SEATTLE

A decade after Starbucks, Coffee, Tea and Spice had opened in Seattle's Pike Place Market
the company's fourth store was in operation in Seattle
founders Jerry Baldwin, Zev Siegel, and Gordon Bowker had enjoyed great success

HOWARD SCHULTZ ATTEMPTS TO JOIN STARBUCKS

Howard Schultz earned a Bachelor's of Science Degree from Northern Michigan University
he spent three years in sales and marketing with Xerox Corporation
before he became Vice Present and General Manager of Hammarplast, U.S.S.,
a Swedish maker of stylish kitchen equipment and house wares
Schultz noticed a small business in Washington State, Starbucks,
was ordering a large number of a special type of coffee maker
driven by curiosity, Schultz traveled from New York City to Seattle to learn more
during this visit Schultz immediately realized his attraction to the coffee bean culture
Howard Schultz eagerly wanted to be a part of coffee roasting world
Schultz met with company founders Jerry Baldwin, Zev Siegel and Gordon Bowker
and tried to break into the Starbucks family
he had a plan to take Starbucks across the country but the company founders
did not share Schultz's bigger picture business approach

WASHINGTON PUBLIC POWER SUPPLY SYSTEM RAISES CONSTRUCTION MONEY

In an effort to complete power Plant 4 (Hanford) and power plant 5 (Satsop)
Washington Public Power Supply System (WPPSS) sold bonds
to be repaid with profits derived from the sale of electric energy
Costs soared up from \$4.1 billion to \$12 billion
WPPSS eventually could not sell any more bonds to raise the needed funds
as cost estimates skyrocketed upward to \$23.8 billion -- May 1981
Contract between WPPSS and its member Public Utilities
stated the utilities must pay off the bonds if the nuclear power plants were not finished

WASHINGTON'S NATIVE AMERICANS FIGHT TO PRESERVE THEIR TREATY RIGHTS

Indians were constantly being forced into federal court to protect their right to salmon fishing
Seattle First National Bank provided support to groups in opposition to native rights
it was decided that Indians would boycott the bank
Colville Indians pulled \$14 million out of the bank
students at the University of Washington took up the cause and supported the boycott

this action was followed by students from multiple colleges across the state
Washington Indians contacted the National Congress of American Indians (NCAI)⁷¹⁰
a meeting of the NCAI was held in Spokane -- May 1981
during discussion of the federal law suit filed by Northwest Water Resources Committee [1980]
it was decided to fly the NCAI chairman to Anchorage, Alaska to generate support
from the Native American Cook Inlet Corporation in Anchorage, Alaska
Native American Cook Inlet Corporation removed \$80 million from Sea-First Bank
Sea-First bankers changed direction on the issue of fishing rights
as the bank came out in support of Native Americans
bankers agreed to testify against bills in Congress proposed to end the treaties introduced by
Washington's U.S. Senator Republican Slade Gorton
and Democrat Congressman Don Bonker [1980]

INTERNATIONAL POLITICS LEADS TO MURDER IN SEATTLE

Seattle had long been a haven for both unionism and immigrants from troubled countries
that was true for citizens of The Philippines
ruled by President Ferdinand Marcos and his wife Imelda
Local Filipino Americans, Silme Domingo and Gene Viernes lived in Seattle
and worked as organizers for Local 37
of the International Longshoremen's and Warehousemen's Union (ILWU)
which was focused on improving conditions for Filipinos
working in Alaskan fish canneries
Domingo and Viernes were both shot to death inside the Local 37 offices
in Seattle's Pioneer Square -- June 1, 1981
Viernes died immediately but Domingo was taken to Harborview Medical Center
where he spent twenty-four hours before he died after giving clues to medics
about the identities of the gunmen
It was immediately assumed the murders were due to a local dispute within ILWU Local 37
early suspects, Pompeyo Benito Guloy and Jimmy Bulosan Ramil knew Domingo and Viernes
had been previously dispatched by Local 37 to work in Alaska
However, further investigation by police and members of Local 37
proved the motive was more sinister
Philippine President Ferdinand Marcos and his wife Imelda had ordered the murders
in retaliation for Domingo's and Viernes' anti-Marcos activities in Seattle [1970s]

FILIPINO MURDERS IN SEATTLE GO TO TRIAL

Deaths of International Longshoremen's and Warehousemen's Union (ILWU) Local 37
members Filipino-Americans, Silme Domingo and Gene Viernes went to trial
King County Superior Court jury -- September 24, 1981
found Pompeyo Benito Guloy and Jimmy Bulosan Ramil guilty of the aggravated
first-degree murders order by Philippine President Ferdinand Marcos
Guloy and Ramil were sentenced to life in prison

⁷¹⁰ Trova Hefferman, *Where the Salmon Run*, P.182-183.

Third suspect, Fortunato “Tony” Dictado, former president of ILWU Local 37 and a supporter of Philippines President Ferdinand Marcos’s regime, also was convicted of ordering the murders [May 12, 1982] he too was sentenced to life in prison)⁷¹¹

AN UNKNOWN DISEASE GENERATES FEAR IN AMERICA

(Dr. Arno Motulsky, a medical geneticist at the University of Washington, was in the Congo, Africa looking for genetic factors that made some people resistant to malaria⁷¹² he collected blood from a Bantu man [1959] and kept the sample for decades at the University of Washington and later at the Puget Sound Blood Bank Dr. Motulsky’s samples were tested using newly available genetic amplification techniques this became the first documented human blood sample which contained the immunodeficiency virus known as HIV) [1997] Centers for Disease Control and Prevention reported that in Los Angeles, California five homosexual men had acquired a rare form of pneumonia seen only in patients with weakened immune systems -- June 5, 1981 these were the first recognized cases of AIDS It was soon discovered that if the immune system was significantly damaged by the activity of HIV, AIDS (Acquired immunodeficiency syndrome) was the result America was the first country to bring AIDS into the public consciousness⁷¹³ homophobic reaction to the illness undoubtedly contributed to the establishment of AIDS as one of the most politicized, feared and controversial diseases in the history of modern medicine -- (a reputation that stands today) (AIDS spread around the world in a deadly pandemic that has infected sixty million people and killed fifteen million [as of mid-2000])

MT. RAINIER IS THE SCENE TO AMERICA’S WORST CLIMBING ACCIDENT

Ingraham Glacier is a large glacier on the eastern flank of Mount Rainier twenty-nine climbers were attempting to summit the mountain -- June 21, 1981 when the steep face of the glacier broke off eleven members of the party were swept into the bottom of a deep crevasse This was the worst mountaineering accident in American history killed were Rainier Mountaineering Inc. guide Tom O’Brien and his clients David Boulton, Mark Ernlund, Ronald Farrell, Gordon Heneage, David Kidd, Jonathon Laitone, Ira Liedman, Henry Matthews, Craig Tippie and Michael Watts Rangers abandoned recovery attempts after determining that the use of blowtorches to melt the ice could increase avalanche risks none of the bodies were recovered

SEATTLE SETS THE MUSIC SCENE ONCE AGAIN

⁷¹¹ Jeff Stevens, Domingo and Viemes, *Radical Seattle Remembers.com*, 2010.

⁷¹² Priscilla Long, HistoryLink.org, March 3, 2003.

⁷¹³ Avert, AVERTing HIV and AIDS: <http://www.avert.org/aids-history-america.htm>

(Hip-hop culture had been sparked in the South Bronx ghettos of New York
hop culture included rap music, breakdancing, graffiti art, new slang and clothing fashion
this new culture spread across the nation (beginning in about [1978]⁷¹⁴
no active local record label had any interest in releasing discs by hip-hop performers
rappers were stuck issuing their own independent cassette tapes)⁷¹⁵
Northwest's popular music scene generally revolved around rock 'n' roll
going back to garage-rock bands from the [1960s] including the Wailers, Sonics,
Kingsmen, Paul Revere and the Raiders and native son Jimi Hendrix⁷¹⁶
but new Seattle talent quickly began to emerge -- 1981
Roosevelt High School graduate Anthony Ray took in the new hip-hop music
but he could not relate to all the violent lyrical imagery contained in national hits
coming from New York and Central Los Angeles
he applied a love for computers and technology with synthesizer-driven
New Wave sounds to forge a unique strain of hip-hop
under a new stage name: Sir Mix-A-Lot
he employed clever raps that referenced the reality of his life in the Northwest⁷¹⁷

HENRY M. "SCOOP" JACKSON REMAINS A "NEW DEAL" DEMOCRAT

U.S. Senator Jackson acted to block Reagan administration proposals he found objectionable
such as a plan to sell the Bonneville Power Administration system to private interests
he blocked Republican efforts to lease wilderness areas for oil and gas exploration
he proposed the formation of a bipartisan commission on Central America
to end the Contra (Nicaraguan counter-revolutionaries) policy stalemate
between Congress and the Reagan administration
(final report of the bipartisan commission [1984] undercutting the Reagan policy
was dedicated to Senator Jackson)

McCaw COMMUNICATIONS, INC. BECOMES A MAJOR CORPORATION

Throughout the 1980s Craig McCaw sold shares in his company to larger businesses
but in each case the McCaw brothers kept control of their company in their own hands
financial backing of these established companies enabled McCaw Communications, Inc.
to acquire a credit line of over a billion dollars

NORTHERN TIER'S PUGET SOUND PIPELINE SUFFERS A MAJOR SETBACK

Washington Energy Facility Site Evaluation Council recommended
that Governor John Spellman reject the company's application
for a Port Angeles superport and underwater pipeline -- 1981
Despite pressure from U.S. President Ronald Reagan's Administration
and many national politicians, Governor Spellman rejected the application

⁷¹⁴ Peter Blecha, HistoryLink.org, May 1, 2011.

⁷¹⁵ Peter Blecha, HistoryLink.org, April 27, 2011.

⁷¹⁶ Peter Blecha, HistoryLink.org, May 1, 2011.

⁷¹⁷ Peter Blecha, HistoryLink.org, April 27, 2011.

(As of today, no superport has been built on the Olympic Peninsula
and only tankers under 125,000 deadweight tons cross Puget Sound)

WASHINGTON TEACHERS AGAIN REFUSE TO RETURN TO THEIR CLASSROOMS

Washington Education Association (WEA) affiliates went on strike -- 1981
Evergreen School Districts teachers faced a lockout from their classrooms for a week
when the lockout was lifted, the teachers went on strike for another five days
before a professional agreement could be reached
Richland School District teachers (REA) refused to enter their classrooms for one day
before a professional agreement was reached with no court injunction being ordered

SEATTLE BUSING PLAN AGAIN COMES UNDER ATTACK

Nearly forty percent of all of the Seattle School District's students
were being bused for racial reasons -- 1981
however, waning public support gradually forced the program to be scaled back
Failure of the "Seattle Plan" was documented by the district's own data
which showed that busing disproportionately burdened children of color,
undercut academic achievement, inhibited parental involvement,
contributed to so-called "white flight,"
and did little to reduce racial isolation in the Seattle schools⁷¹⁸

STATE OF WASHINGTON OPERATES McNEIL ISLAND PENITENTIARY

McNeil Island Corrections Center had an inmate population of 391 -- September 1981
these inmates were immediately put to work fixing and improving the facility
they were paid a salary of \$50 a month⁷¹⁹
in addition to work inside the institution, the inmates had fifty-four staff houses,
several boats and tugs, seventy miles of roads and a K-5 school to repair and maintain
Superintendent William Callahan said there was enough work to keep a thousand people
busy on the island for ten years

SANDRA DAY O'CONNER -- THE FIRST WOMAN U.S. SUPREME COURT JUSTICE

(President Ronald Reagan nominated Sandra Day O'Conner
to the United States Supreme Court [July 7, 1981]
she earned her Bachelor's Degree from Stanford University
before entering law school there
she graduated from law school magna cum laude ranked third out of 102 students
even so, she had difficulty finding work as an attorney
as law firms did not hire women
she took a job as a deputy county attorney in San Mateo County, California)
Sandra Day O'Conner was confirmed unanimously by the U.S Senate -- September 21, 1981
she became first woman justice to ever serve on the U.S. Supreme Court

⁷¹⁸ Cassandra Tate, HistoryLink.org, September 7, 2002.

⁷¹⁹ Daryl C. McClary, HistoryLink.org, April 24, 2003

BOEING'S 767 AIRLINER TAKES ITS FIRST FLIGHT

America began to experience an economic recovery
airlines once again began buying Boeing aircraft
but the market for airliners had changed during the economic downturn
fuel prices had risen and environmental concerns had come to the forefront
airplanes had to be faster, quieter and more energy efficient
Boeing 767 was the first wide-body twinjet
767 served the medium to long-range market and carried about 220 passengers
like the 747, it was a wide-body plane with two aisles
but had the efficiency of the smaller airplanes
its design emphasized fuel efficiency
767 featured two turbofan engines, a conventional tail
and for reduced aerodynamic drag, a supercritical wing design
767 featured a two-crew technologically advance “glass cockpit”
cathode ray tube instrument displays rather than gauges
this simplified system, computer, and display screen reduced crew work loads
Boeing's 767 took its first flight -- September 26, 1981

PORT OF TACOMA BECOMES A MAJOR SHIPPING POINT⁷²⁰

Use of large cargo containers revolutionized the transport industry
containers insured greater safety, efficiency and lowered costs
“Intermodal” yards connected various modes of transportation: trains, trucks and ships
to further speed transport of container goods
Tacoma offered a good location for an Intermodal yard
as extensive tideflats connected with the deep waters of Commencement Bay
Port of Tacoma opened its first Intermodal yard -- October 13, 1981
the North Intermodal Yard is situated on the main port peninsula
between Terminal 7 on the Sitcum Waterway and Terminal 4 on the Blair Waterway
this was the first dockside intermodal rail yard on the West Coast
Closer to Alaska and Asia than rival California ports,
Tacoma's North Intermodal yard was capable of out-producing the Port of Seattle
Tacoma's location was also ideal for moving goods to inland cities and to the East Coast
due to its easy access to interstate highways and rail lines
North Intermodal Yard quickly established the Port's reputation
as one of the country's most modern port facilities

WASHINGTON VOTERS HAVE A SAY ON WPPSS BONDS

Washington Public Power Supply System (WPPSS) was heavily burdened with debt
Public Utility Districts (PUD) were faced with a financial crisis beyond their ability to pay
Initiative 394 provided a clear statement of public dissatisfaction
with Washington Public Power Supply (WPPSS) -- November 1981

⁷²⁰ Margaret Riddle, HistoryLink.org, August 29, 2008.

I-394 stated: **“Shall public agencies obtain voter approval prior to issuing bonds for the construction or acquisition of major public energy projects?”**

enough signatures were gathered to make the general election ballot

I-394 limiting WPPSS’s ability to take on additional debt passed with a 58.06% YES vote
(state Supreme Court later ruled I-394 unconstitutional)

SERIAL KILLER ANGELO ANTHONY BUONO, JR. STANDS TRIAL⁷²¹

Angelo Anthony Buono, serial killer Kenneth Bianchi’s cousin and accomplice
in the California “Hillside Strangler” murders went to trial
jury selection began -- November 16, 1981

This became a drawn-out process that took three months to complete
number of victims and mountains of forensic evidence to introduce
slowed the proceedings causing the case to drag on

Kenneth Bianchi, the 200th witness to testify, spent eighty days on the stand
he continued to slow the trial’s progress, proving to be a reluctant witness
as he made deliberately contradictory statements

at one point he claimed he had completely lost his memory

another time he denied committing any murders -- including those in Bellingham

WPPSS FACES A FINANCIAL CRISIS

Washington Public Power Supply System (WPPSS) board of directors
terminated construction on nuclear Plant 4 (Hanford)
and Plant 5 (Satsop) -- January 1982

because these plants generated no power and brought in no money,

WPPSS was forced to default on \$2.25 billion in bonds⁷²²

this was the largest municipal bond default in the nation’s history
financial rating of the supply system was downgraded on Wall Street
it became more difficult for WPPSS to raise funds

Nuclear Plants 1 (Hanford) and 3 (Satsop) were mothballed
in the hope construction would be resumed

(never finished, their costs were underwritten by the Bonneville Power Administration
and the power it generated from the Columbia River Dams)

Member utilities, and ultimately the rate payers, were obligated to pay back borrowed money

Tacoma paid \$40.3 million to settle its share of the debacle

that was passed along to ratepayers in [April 1983] as a fifteen percent surcharge
in some small towns where unemployment due to the recession was already high,
the obligation amounted to more than \$12,000 per customer

Clark County Public Utility District (PUD) led other agencies out of WPPSS
protest candidates were elected to local PUD district boards

Public Utility Districts and bondholders looked to the courts
to save them from a crushing bond debt

⁷²¹ Daryl McClary, HistoryLink.org, July 26, 2008.

⁷²² David Wilma, HistoryLink.org, July 10, 2003.

(this matter wound its way through courts for the next thirteen years)

BOEING DEVELOPS THE 757 NARROW-BODY TWIN-JET AIRLINER

Boeing Commercial Airplanes began construction on the 757 -- its newest mid-size jetliner this was Boeing's largest narrow-body single-aisle version of its wide-body 767 -- 1981 Boeing's 757 was intended to replace the smaller three-engine 727 on short and medium routes lighter materials and new wings were also expected to improve efficiency its focus on fuel efficiency reflected airline concerns over operating costs As development progressed, the 757 increasingly departed from its 727 origins elements of the 767, which was several months ahead in development, were adopted to reduce risk and cost, Boeing combined design work on both twinjets, resulting in shared features such as interior fittings and handling characteristics both airplanes were developed in tandem which resulted in shared design features that allowed pilots to obtain a single rating to operate both aircraft 757 featured two-crewmember glass cockpit, twin turbofan engines, a conventional tail and for reduced aerodynamic drag, a supercritical wing design Boeing's prototype 757 rolled out of the Renton factory -- January 13, 1982 and took its maiden flight [February 19, 1982] first flight suffered an engine stall after there were indications of low oil pressure test pilot John Armstrong and co-pilot Lew Wallick checked the systems and were able to restart the affected engine flight proceeded normally thereafter (Production of the 757 ended after 1,050 had been built for fifty-four customers [October 28, 2004] diminished sales and an airline industry trend toward smaller aircraft led Boeing to end production as the older 737 twinjet maintained its popularity with airlines)

MICROSOFT PURCHASES AN OPERATING SYSTEM

As personal computers became increasingly available, compatible software programs were required this, in turn, required a universal operating system Seattle Computer Products had developed a little-used operating system they called the *Quick-and-Dirty Operating System* or *Q-DOS* Microsoft purchased *Q-DOS* for \$75,000 and licensed it as its own for use on IBM's new personal computer (PC) Bill Gates modified *Q-DOS* and released a version of it as Microsoft Disk Operating System MS-DOS 1.0 was released with the IBM PC -- 1982 MS-DOS was one of Microsoft's earliest successes it became the most widely used operating system in the world (and is still used today) (Microsoft became the domineering force in the computer programming industry)

PRESIDENT REAGAN BEGINS A "SECRET WAR"

Reagan Administration began to secretly funnel millions of dollars, training and arms through the Central Intelligence Agency to support the anti-Sandinista, pro-American Contra's political agenda in Nicaragua --1982

America's involvement with the Contra movement soon became public as did disturbing reports about the behavior of the Contra soldiers it was charged in newspapers and in Congress that the Contras were little more than murderers and drug runners rumors of corruption and payoffs were commonly reported

ALASKA OIL IS REFINED IN WASHINGTON

Upper Midwest of the United States got much of its crude oil from Canada which cut back on oil exports and announced it would no longer sell oil abroad after 1982 to compensate for the loss of Canadian oil, more crude oil had to be brought in from the Middle East, Indonesia, and the newly exploited oil fields of Alaska There were already refineries in Western Washington Alaska's Northern Tier Pipeline Company proposed a pipeline from Washington to transport refined oil and gasoline to Montana and Minnesota -- 1982

MICROSOFT'S PAUL ALLEN DEVELOPS CANCER

Paul Allen was diagnosed with Hodgkin's disease, cancer of the lymphatic system -- 1982 his illness dramatically changed his life during twenty-two months of radiation treatments he began scaling back his involvement with Microsoft working part-time never married, Allen spent more than two years traveling and enjoying time with his family he also used his time to pursue his many interests including art collecting, basketball, and music an avid electric guitar player, Allen emulated his musical idol Jimi Hendrix playing in his own rock band called *The Threads* (Paul Allen's cancer was successfully treated by several months of radiation therapy however, he did not return to the day-to-day operation of Microsoft)

U.S. SUPREME COURT UPHOLDS THE SEATTLE SCHOOL DISTRICT BUSING PLAN

U.S. Supreme Court justices in a five to four ruling affirmed the rulings of two lower federal courts in declaring Initiative 350 unconstitutional as it created an "impermissible racial classification" because it allowed busing for non-racial reasons but banned busing for racial reasons -- June 30, 1982 This ruling represented a victory for the Seattle School District which had argued that it would be impossible to integrate the city's schools without the use of the tools prohibited by I-350 this ruling came at the end of the fourth year of the "Seattle Plan" when nearly thirty percent of Seattle's public school students rode buses for purposes of desegregation⁷²³

FIRST VICTIM OF THE GREEN RIVER KILLER IS DISCOVERED

Wendy Lee Coffield, sixteen, was last seen at a state receiving home in Tacoma -- July 8, 1982 she and her mother had moved around a lot

⁷²³ Cassandra Tate, HistoryLink.Org, September 5, 2002.

Wendy began to spend more time away from home
she had dropped out of her Puyallup junior high school and became a chronic runaway
with a history of petty crime
(her body was found floating under the Green River's Meeker Street Bridge
just outside of Kent by two teenage boys [July 15, 1982]
cause of her death was determined to be strangulation using the victim's own clothes)

TWO MORE YOUNG WOMEN DISAPPEAR

Seventeen-year-old Gisele Ann Lovvorn vanished -- July 17, 1982
Gisele was small, with long, thick blonde hair and blue eyes
her childhood was happy, but she grew increasingly isolated as a teenager
when she was about fourteen she began to run away from home
(her body was discovered in woods just south of Sea-Tac Airport [September 25, 1982])
Debra Lynn Bonner, age twenty-three, disappeared -- July 25, 1982
she had been raised in abject poverty and had dropped out of high school as a sophomore
(her remains were found in the Green River [August 12, 1982]
about a quarter of a mile south of where the body of Wendy Coffield was located)
police quickly linked her death that of Wendy Coffield

POLICE INVESTIGATION TURNS UP FEW CLUES TO THE MURDERER'S IDENTITY

King County Sheriff Bernard Winckoski assembled a special task force
of King County detectives to investigate the murder of Debra Lynn Bonner
whose death was soon linked with the earlier unsolved murder of Wendy Coffield
this was the largest police task force assembled since the Ted Bundy murders
less than a decade earlier
King County Police Major Robert Kraske, head of the Criminal Investigation Division,
and Detective David Reichert of the King County Major Crime Squad led the investigation
(Reichert was later elected King County Sheriff and, later still, U.S. Congressman)
King County's special task force got off to a shaky start
a huge influx of information swamped the police force in a relatively short period of time
they simply did not have the means to process the ever-increasing data and evidence
much of it was lost, misplaced or overlooked entirely
in fact, the situation got so bad that at one point police enlisted the help of volunteers
to assist in the ongoing investigation⁷²⁴
at least two young women reported being picked up by a man in a blue and white pickup truck
they said he pulled a gun on each of his victims before he attacked them
on one occasion he made reference to the recent river murders
while a partial license plate number was provided by one the victims,
there was no follow-up⁷²⁵

⁷²⁴ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

⁷²⁵ Rachael Bell, *Green River Killer: River of Death*,

FORMER BROTHERHOOD OF TEAMSTERS PRESIDENT JIMMY HOFFA DISAPPEARS

(Jimmy Hoffa had been convicted of jury tampering, attempted bribery, and fraud [1964]
after exhausting the appeal process he was sentenced to thirteen years in prison [1967]
it was not until [mid-1971] that Hoffa officially resigned the Teamsters' presidency,
as part of a pardon agreement with U.S. President Richard Nixon
Hoffa was released from prison [late-1971]
Nixon blocked Hoffa from any involvement in union activities until [1980]
Jimmy Hoffa was attempting to overturn Nixon's order and to regain union support)
Jimmy Hoffa was last seen [late July 1975] outside a suburban Detroit restaurant, *Machus Red Fox*
James Riddle "Jimmy" Hoffa" [born February 14, 1913]
was declared legally dead -- July 30, 1982

THREE MORE VICTIMS DISAPPEAR FROM THE PACIFIC HIGHWAY AREA

Marcia Fay Chapman, age thirty-one, was the mother of three children
she was last seen leaving her apartment near Pacific Highway South -- August 1, 1982
(her body was found in the Green River [August 15, 1982] about a half mile
from where Debra Lynn Bonner was murdered)
Cynthia Jean "Cookie" Hinds, age seventeen, was last seen by her father -- August 11, 1982
getting into a black Jeep near 200th and Pacific Highway South
she was an acquaintance of Wendy Coffield and Cynthia Hinds
and occasionally painted houses with Opal Charmaine Mills
Sixteen-year-old Opal Charmaine Mills lived with her parents near Kent
part of her summer was spent painting apartments with her friend Cynthia "Cookie" Hinds
Opal went missing -- August 12, 1982
she had been seen at a public phone booth near Angle Lake on Pacific Highway South

THREE OF THE GREEN RIVER KILLER'S VICTIMS ARE DISCOVERED

Robert Ainsworth slowly floated down the Green River in his rubber raft -- August 15, 1982
it was a trip he had made many times looking for collectable objects hidden in the water
He noticed a middle-aged balding man on the riverbank and a younger man sitting in a pickup truck
Ainsworth suspected the men were out fishing
when he drifted by Ainsworth was asked if he had found anything
As he continued to look for anything of interest he saw the face of a young black woman
floating just below the surface -- her body slowly moving in the current
as he attempted to snag with a pole what he thought was a mannequin, his raft flipped
to his horror he discovered it was a body
seconds later he saw another corps partially submerged in the water
Ainsworth swam toward the riverbank to where he had seen the pickup truck
it was gone as were both men
he sat down and waited
about a half hour later a man with two children on bicycles arrived
Ainsworth told them of his gruesome discovery and asked them to get the police
Both bodies were later identified as Marcia Fay Chapman and Cynthia Jean "Cookie" Hinds
During the search of the crime scene police discovered a third body

Opal Charmaine Mills had gone missing three days before

SIX BODIES HAVE BEEN FOUND IN OR ALONG THE GREEN RIVER

Police suspected all of the victims were murdered near the same location by the same person and their bodies were dumped

most of these and subsequent victims had a history of prostitution and run-ins with the law they were young -- mostly teenagers or in their early twenties

(As more bodies were discovered police concluded that a serial murderer was on the loose he was dubbed the Green River Killer)

MOUNT ST. HELENS NATIONAL VOLCANIC MONUMENT IS ESTABLISHED

President Ronald Reagan established Mount St. Helens National Volcanic Monument as a U.S. National Monument -- August 27, 1982

Mount St. Helens National Volcanic Monument was the first such monument managed by the United States Forest Service 110,000 acres was set-aside for research, recreation and education

inside the Monument, the environment was left to respond naturally to the disturbance many trails, viewpoints, information stations, campgrounds and picnic areas were established to accommodate the increasing number of visitors each year

ANOTHER VICTIM DISAPPEARS FROM PACIFIC HIGHWAY SOUTH

Terry Rene Milligan, age sixteen, disappeared from Pacific Highway South -- August 29, 1982 she was active in her church and was a brilliant student

who had dreamed of going to Yale and to study computer science

Terry became pregnant while in junior high school and had a son

she doted on her child but had a difficult time making ends meet financially

(her skeletal remains were found near Star Lake Road in Federal Way [April 1, 1984])

TEACHERS IN ONLY ONE SCHOOL DISTRICT GO ON A SHORT STRIKE

Washington Education Association (WEA) affiliate in the Steilacoom School District struck for one-half day before returning to work without a court injunction -- 1982

HOWARD SCHULTZ JOINS STARBUCKS

Howard Schultz's persistence in selling his nation-wide business plan paid off

company founders Jerry Baldwin, Zev Siegel and Gordon Bowker agreed to let him try

Howard Schultz joined Starbucks Coffee Company as director of operations and marketing when the Company had only four stores -- September 1982

rapid expansion quickly followed

THREE MORE VICTIMS OF THE GREEN RIVER KILLER GO MISSING

Mary Bridget Meehan was adopted as an infant and was raised in Bellevue the youngest of four while she had a very supportive childhood but she suffered from a hearing deficiency

her grades declined, but she loved art and displayed a great deal of talent

Mary loved animals and her friends described her as boisterous, dramatic, funny and tough

seven months pregnant at age eighteen, Mary Bridget Meehan disappeared -- September 15, 1982
she was last seen near 165th Street on Pacific Highway South
(her body was identified along Pacific Highway South [November 13, 1983])
Debra Lorraine Estes was intelligent and talented and possessed a very free spirit
at about the age of twelve she began running away from home
her parents, who owned a trucking company on the Sea-Tac Strip,
spent many days and nights searching for Debra when she would run away
using an alias, Debra reported being raped to police
she described her attacker and his vehicle
she even went to the police station to view mugshots
other witnesses confirmed her descriptions
but she could not be found when police attempted to follow-up
fifteen-year-old Debra Lorraine Estes disappeared
from the Pacific Highway South area -- September 20, 1982
(her remains were found near 348th Street in Federal Way [May 30, 1988])
Linda Jane Rule, age sixteen, she had dropped out of junior high school when her parents divorced
she became the tenth suspected victim of the Green River Killer when she disappeared
she was last seen leaving a motel room on Aurora Avenue North in Seattle
on her way to Kmart to shop for clothes -- September 26, 1982
(her body was recovered near Northwest Hospital in Seattle [January 31, 1983])

FIRST TRIDENT SUBMARINE ARRIVES AT BANGOR, WASHINGTON

USS *Ohio* was the lead boat of her class of nuclear-powered ballistic missile submarines
following her shakedown cruise, the *Ohio* shipped by way of Cape Canaveral
where she tested her missile launch systems before debarking for the Panama Canal
on her way to her home port at Bangor, Washington
anti-nuclear protest group Ground Zero tried to stop the submarine's arrival
by attempting to blockade Hood Canal
an Australian vessel, *Pacific Peacemaker*, served as the mother ship for the blockade
USS *Ohio* arrived at her home port and was loaded with nuclear weapons
and was manned by her Blue Crew (which rotated missions with the Gold Crew)
Nuclear-armed missiles destined to be placed aboard the USS *Ohio* where shipped to Bangor
from the Pantex assembly plant in Amarillo, Texas on an armored railroad train
they were painted stark white to deflect solar heating
trains that carried nuclear missile shipments across the nation
became known as "White Trains"
Armed and ready for service, the USS *Ohio* was deployed -- October 1982
on the first Trident Submarine Strategic Deterrent Patrol

GREEN RIVER KILLER STRIKES AGAIN

Denise Darcel Bush, age twenty-three, disappeared along Pacific Highway South -- October 8, 1982
her friends last saw her talking with a man who appeared to be working
on his dirty or dull green GMC pickup truck with oxidized paint
he was described as being 5'10" between twenty-nine and thirty years old

and was wearing a blue plaid shirt and boots
since she had last been seen along Pacific Highway South
she was assumed to be connected to the Green River Killer
(Denise's skull, femur and pelvis were discovered off a rural road in Tigard, Oregon
by a construction crew clearing the land [June 12, 1985]
more of Denise's remains were discovered in a wooded area
in Southgate Park Tukwila, Washington [February 1990])
Shawnda Leea Summers, age seventeen, left her Yesler Way apartment in Seattle to buy cigarettes
before she disappeared -- October 9, 1982
(her remains were discovered Date [August 11, 1983]
in a wooded area just North of Sea-Tac Airport in Tukwila)
Eighteen-year-old Shirley Marie Sherrill worked at the downtown Seattle Goodwill Store
she was last seen in Seattle's International District
talking to two men in a black truck -- 4:00 p.m. October 20
she was not reported missing until October 22
(her skeletal remains were recovered next to Denise Darcel Bush by the construction crew
clearing land off a rural road in Tigard, Oregon [June 12, 1985])

REPLACEMENT HOOD CANAL FLOATING BRIDGE REOPENS

Hood Canal Floating Bridge (officially known as the William A. Bugge Floating Bridge)
had been damaged in a violent windstorm [February 13, 1979]
replacement of the western half was designed and constructed in less than three years
using \$100 million in federal emergency funds for the project costing \$143 million
William A. Bugge Floating Bridge re-opened as a toll bridge -- October 25, 1982
(but tolls were lifted [1985] after a court ruling that the insurance settlement
constituted repayment of the construction bonds,
and since federal funds were used in re-constructing the bridge,
State Department of Transportation could not charge tolls after the bonds were retired)

STATE ELECTION SHOWS GAINS FOR BOTH POLITICAL PARTIES

U.S. Senator Henry M. Jackson was easily elected to his sixth U.S. Senate term -- November 2, 1982
Jackson was had been opposed by Seattle City Attorney Doug Jewett
who criticized the senator for his support of nuclear energy and weapons
Jackson stressed the creation of jobs and criticized the economic policies
of President Ronald Reagan Republican Administration
Washington's congressional delegation saw all incumbents reelected
while Bellevue Republican Rod Chandler was elected in the new Eighth Congressional District
In the legislature, Democrats regained control of the State Senate twenty-six seats to twenty-three
State Senator Jeannette Hayner returned to being Minority Leader
in the State House of Representatives Democrats lost one seat to the Republicans
but remained firmly in control fifty-four seats to forty-four

VIETNAM VETERANS MEMORIAL IS DEDICATED IN OLYMPIA

Governor John Spellman dedicated the Vietnam Veterans Memorial -- November 11, 1982

this monument consisted of a scroll listing the names of the state's Vietnam casualties
encased in marble
many surviving Vietnam veterans were unhappy with this memorial
they felt the enclosed scroll "entombed" the memory of their fallen comrades
Veterans soon began lobbying for a new memorial to better honor those
who had given the ultimate sacrifice
groups and individuals joined in the fundraising effort
Secretary of State Ralph Munro was very influential in rallying public and government support

DR. BARNEY CLARK RECEIVES THE FIRST ARTIFICIAL HEART

Burien Dentist Dr. Barney Clark, age sixty-one, suffered from congestive heart failure so debilitating
that he had trouble walking from his bedroom to the bathroom
doctors determined that he was too ill to be eligible for a heart transplant
this left the implant of an artificial heart as his only option
Food and Drug Administration had recently approved a new artificial heart for human implantation
known as the Jarvik 7, it was named after one of its key developers, Dr. Robert Jarvik,
who had been building and refining artificial hearts since his college student days
Jarvik 7 was state-of-the-art for its time and was the first to be designed for permanent use
it employed a heart-shaped pump that was implanted into the patient
an external pneumatic compressor, connected to the pump by tubes ran through the chest wall
and regulated blood flow
two major problems were inherent in the Jarvik 7 artificial heart:
•it required a washing-machine-sized air compressor
that left the patient virtually immobilized;
•threat of infection and associated pulmonary problems were very real
Dr. Clark was within two minutes of death when he received the Jarvik 7 heart -- December 2, 1982
he lived for 112 days tethered to an external pneumatic compressor that weighed 400 pounds
(Dr. Barney Clark passed away [10 p.m. March 23, 1983])

NEW BRIDGE OPENS OVER THE COLUMBIA RIVER AT VANCOUVER, WASHINGTON

Interstate 205 bridge touched down on the Oregon side of the Columbia River
near Portland International Airport just two miles north of an interchange with Interstate 84
Three buses loaded with VIPs crossed the new Glenn L. Jackson Bridge over the Columbia River
from Vancouver to Portland in the early morning darkness -- December 15, 1982⁷²⁶
other than construction workers, they were the first
to cross the \$175 million, 2.25-mile, eight-lane bridge
which had been under construction since [1977]
Later that day, the span, named for an Oregon State Highway commissioner, opened to all vehicles
it was the second highway bridge between Vancouver and Portland
(Interstate 5 twin bridges six miles downstream had been built [1917] and [1958])

ANOTHER GREEN RIVER KILLER VICTIM GOES MISSING

⁷²⁶ Gregg Herrington, HistoryLink.org, September 24, 2008.

Colleen Renee Brockman, age fifteen, lived in Seattle with her father and brother
she had a brief history of running away
she seemed to have a very strong desire to live on her own
but she would always eventually come home
Colleen disappeared from downtown Seattle -- Christmas Eve, 1982
(two children playing on Jovita Boulevard in Edgewood, Pierce County
discovered a skeleton later identified as Colleen [May 26, 1984])

MASSACRE IN A SEATTLE INTERNATIONAL DISTRICT GAMBLING CLUB

Wah Mee club operated illegally in a basement space on Maynard Alley South,
just south of South King Street in Seattle's International District
club's regulars included many wealthy restaurant owners -- several were among the victims
Security at the club was based in part on a system of passing through multiple successive doors,
this method had been used in similar Chinatown gambling dens for generations
and was usually quite effective
Three armed young Chinese American men entered the historic Wah Mee club -- February 18, 1983
Kwan Fai "Willie" Mak Benjamin Ng, and Wai-Chiu "Tony" Ng (not related)
used nylon cord to bind their victims, robbed each and then shot them in the head
fourteen people were left for dead in the worst multiple murder in state history
these criminals walk away with tens of thousands of dollars in cash
security system failed because Willie Mak and his accomplices
were known and trusted by the people at the club
Wah Mee Club was padlocked and never reopened
(However, one of the victims, Wai Yok Chin, survived the attack and helped convict the killers
Benjamin Ng was convicted of thirteen counts of aggravated first degree murder
he was sentenced to receive life without possibility of parole [August 1983]
Willie Mak, the leader of the gang, was sentenced to hang on the same charges [October 1983]
however, the death penalty will be removed because the jury was not asked to determine
how much of a role he had in the crime -- he remained in prison under a life sentence
Tony Ng had fled to Canada but was returned for trial
he was sentenced to seven life terms for thirteen counts of first degree robbery [April 1985])

GREEN RIVER KILLER STRIKES AGAIN LEAVING HIS VICTIMS IN A NEW LOCATION

Alma Ann Smith grew up in Walla Walla
she had a pleasant personality that her many friends wanted to be around
but she was always restless -- she often traveled to Seattle
she moved there by herself at age sixteen
Alma had spent some time at Echo Glen, a juvenile offender's facility
at eighteen, Alma vanished from South 188th Street and Pacific Highway South -- March 3, 1983
a witness described a blue pickup truck with a white man driving
about an hour later a man fitting the truck driver's description returned to South 188th Street
he attempted to "date" Alma's friend but the friend felt uneasy about him and refused
(Alma's body was discovered near Star Lake Road north of Federal Way [April 2nd, 1984]
Alma had become the Green River Killer's first known victim of 1983)

Twenty-three-year-old Delores LaVerne Williams disappeared from a Pacific Highway South bus stop near South 188th Street -- between March 8 and March 14, 1983
(her skeletal remains were recovered near Star Lake Road [March 31, 1984])

PROTESTORS BLOCK A WHITE TRAIN LOADED WITH NUCLEAR WEAPONS

Journeys of the “White Trains” were tracked and its progress was given to activists along the route
Department of Energy varied the route for security purposes
and to avoid confrontations with peace activists

White Trains were later painted in different colors in a futile attempt to fool protestors
Department of Energy [1985] began using semi-trailer rigs to ship warheads by highway
as their locations were more difficult to monitor

Approximately 2,000 thermonuclear warheads were based at Bangor
only twenty miles across the water from Seattle making Kitsap County a bigger nuclear power
than China, England, France, India, Pakistan and Israel *combined*⁷²⁷
making Kitsap County third in nuclear weaponry following the United States and Russia

To protest the nuclear arms race,
activists initiated the Tracks Campaign, or the White Train Campaign
to trace the White Trains' movements
as well as the transportation of non-nuclear missile parts across the nation -- 1983
community members across the nation watched for and logged the movement of the White Train
protesters held vigils along the tracks, which often included sat on the tracks
and physically stopped the White Trains until they were removed and arrested
Anti-nuclear weapons activists held a vigil at the Pasco train depot
as they waited for the string of fourteen white cars to arrive -- March 21, 1983
American women set up peace camps at Puget Sound, Washington and Seneca Falls, New York
to disrupt the production and deployment of Cruise missiles -- 1983

MORE BODIES ARE RECOVERED NEAR STAR LAKE ROAD NORTH OF FEDERAL WAY

Gail Lynn Mathews, age twenty-three, disappeared -- April 10, 1983
near S 216th Street and Pacific Highway South
she was last seen from across the street by her boyfriend who was waiting for a bus
he saw Gail sitting in the passenger seat of a blue or gray pickup truck
which was noticeable because it was sanded and had primer spots
when the boyfriend attempted to file a missing person's report, it was not taken
because he was not a member of her immediate family

(Gail's body was found near Star Lake Road [September 19, 1983])

Nineteen-year-old Andrea M. Childers was last seen -- April 14, 1983
she was a striking young lady with a great smile who wanted to be a dancer
she often gave dancing lessons
Andrea was last seen in Seattle at 21st and Union while she waited for a bus to South Center Mall
(her body was found in a vacant lot near Star Lake [October 11, 1989])

Sandra Kay Gabbert, age seventeen, disappeared along Pacific Highway South -- April 17, 1983

⁷²⁷ Richard Horn, *Kitsap Sun*, December 30, 1999.

an outstanding high school athlete she was described as a free spirit who was full of life
bored with school, she dropped out during her Junior year a dropped out
(her skeletal remains were recovered near Star Lake Road [April 1, 1984])

Kimi-Kai Pitsor was very adventurous as a child and seemingly too much of a hurry to grow up
when she hit her teens she started to become defiant and rebellious toward her single mother
she was last seen by her boyfriend in downtown Seattle

getting into a light blue pickup truck at the corner of 4th and Union -- April 17, 1983
at age sixteen Kimi-Kai Pitsor became the twentieth victim of the Green River Killer

her boyfriend last saw her climbing into a green pickup

(Kimi-Kai's remains were found in two separate locations

her skull was found near Mountain View Cemetery

between Federal Way and Auburn [December 15, 1983]

her body was found a short distance away in a ravine [January 4, 1984])

REAGAN ADMINISTRATION FACES ANOTHER POLITICAL CRISIS

Suicide bomber in a pickup truck loaded with explosives

rammed into the U.S. Embassy in Beirut, Lebanon -- April 18, 1983

sixty-three people, mostly embassy staff, were killed -- seventeen were Americans

eight were employees of the Central Intelligence Agency (CIA)

including chief Middle East analyst Robert C. Ames and station chief Kenneth Haas

along with several U.S. soldiers and one U.S. marine

U.S. government took no military action in response to the embassy bombing

(however, it was later reported that a covert military team entered Beirut

to gather intelligence in preparation for retaliatory strikes)

TACOMA DOME OPENS TO THE PUBLIC

Tacoma Dome, one of the largest wood domed structures in the world, cost of \$44 million to build
construction of the 152-foot-high dome involved 1.6 million board feet of lumber

(all supplied by the Weyerhaeuser company)

and enough concrete to build a sidewalk seventy miles long

roof was composed of a framework of triangular units of timber laminated and glued together

each of these prefabricated triangular units weighs 5,000 pounds -- there are 288 of them⁷²⁸

Tacoma Dome opened its doors -- April 21, 1983

owned and operated by the City of Tacoma's Public Assembly Facilities Department

it can accommodate up to 23,000 seats in a variety of configurations

first sporting event held was the "World's Toughest Rodeo" [April 29- May 1, 1983]

first musical event was a David Bowie concert [August 11, 1983]

Tacoma quickly became the music capital of the Northwest featuring such stars as

Dolly Parton, Prince, Willie Nelson, Bruce Springsteen and Neil Diamond

Tacoma Dome also became the favored venue for state and regional high school sports event⁷²⁹

⁷²⁸ David Wilma, HistoryLink.org, January 30, 2003.

⁷²⁹ David Wilma, HistoryLink.org, January 30, 2003.

FUNDING OF WASHINGTON'S PUBLIC SCHOOLS IS AGAIN IN COURT

(Thurston County Superior Court Judge Robert Doran had required that Basic Education as defined by the legislature must be fully funded by the legislature -- "Doran I" [1977])

Seattle and twenty-five other school districts in the state, parents, Washington Education Association and others filed suit against the State of Washington for its failure to pay the full cost of basic education -- especially for special needs students as demanded by Doran I Superior Court Judge Robert Doran issued his "Doran II" decision -- April 29, 1983

it read in part: **"(3) Once the legislature has established what it deems to be 100% funding for basic education, that level may not be reduced (notwithstanding an economic crisis) unless the amount appropriated was in fact in excess of 100% funding... Once a program is defined as "basic education," it becomes part of a state on-going entitlement program. The state may not reduce the funding level due to state revenue problems."**

Judge Doran specifically noted legislators must pay for basic education for special needs pupils but he delayed implementation until [July 1, 1984] to save legislators and taxpayers from the \$400 million in new costs that would be necessary

GREEN RIVER KILLER CLAIMS ANOTHER VICTIM

Marie M. Malvar, age eighteen, had grown up in a large close-knit Seattle area Filipina family her boyfriend watched as she left a store and got into a maroon pickup with a canopy at South 216th Street and Pacific Highway South -- April 30, 1983 suspicious of the driver of the truck, her boyfriend followed them in his car but a stoplight held him up it was the last time he ever saw his girlfriend

Three days after last seeing her Marie's boyfriend reported she was missing to police -- May 3, 1983

MARIE M. MALVAR'S BOYFRIEND CONTACTS THE SHERIFF'S OFFICE

Less than a week after Marie M. Malvar's disappearance, her boyfriend along with Malvar's father and brother spotted the suspicious truck near the place where he initially lost sight of it days earlier -- May 9, 1983 they followed the truck to a house located on South 348th Street and called the police when police eventually arrived at the house they spoke with the owner, Gary Ridgway, who denied having ever seen Malvar satisfied, the police left the residence and failed to pursue the matter any further⁷³⁰

(Bones discovered near Mountain View Cemetery were identified as Malvar's [September 26, 2003])

GREEN RIVER KILLER CONTINUES HIS ATTACKS ON YOUNG WOMEN

Carol Ann Christensen, a registered Blackfoot Tribe member, grew up in a large family in Hoquiam she was the mother of a five-year-old daughter and had just gotten a new job as a waitress Carol Ann left work at 2:30 p.m. and began walking home -- she had a history of hitchhiking she was due back at work later that night for another shift

⁷³⁰ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

she never made it home and never returned to work
at age twenty-one, Carol Ann went missing along Pacific Highway South -- May 3, 1983
her mother, who was caring for Carol Ann's daughter,
immediately knew something was wrong
she filed a missing person report with police
(Carol Ann Christensen's body was found by a family hunting for mushrooms
in a wooded area in Maple Valley [May 8, 1983])

ANOTHER YOUNG WOMAN FALLS VICTIM TO THE GREEN RIVER KILLER

Martina Theresa Authorlee's father was in the army stationed at Fort Lewis in Tacoma
she had a troubled childhood that included foster care and difficulties with the law
she had joined the National Guard and took six weeks of training in South Carolina
before being discharged because of a medical condition
however, she remained in contact with her family and saw them on occasion
Martina was last seen near South 188th Street and Pacific Highway South
at age eighteen she vanished on Pacific Highway South
near South 188th Street -- May 22, 1983
(Martina Theresa Authorlee's skeletal remains were located by elk hunters off of Highway 410
near Enumclaw [November 14, 1984])

GREEN RIVER KILLER STRIKES AGAIN

Cheryl Lee Wims started skipping school and eventually just stopped going
she was employed part time busing tables at a downtown Seattle restaurant
co-workers described as being quiet -- she was a good employee
Cheryl, at age eighteen, went missing -- May 23, 1983
she disappeared from the same spot as had Martina Theresa Authorlee the day before
(Cheryl was discovered north of Sea-Tac airport near Little League baseball field
[March 22, 1984] she had been murdered on her birthday)

TWO SEATTLE NEWSPAPERS ESTABLISH A JOINT OPERATING AGREEMENT⁷³¹

Seattle Times and *Seattle Post-Intelligencer* agreed to a Joint Operating Agreement -- May 23, 1983
The Times would manage printing, advertising, circulation
and most other commercial operations for both papers,
while the two newspapers remained editorially independent
Seattle Times would publish afternoon editions Monday through Friday
and morning editions on Saturday and Sunday
Post-Intelligencer would publish morning editions Monday through Saturday
Sunday edition of the Seattle newspaper would be edited by the *Times*
however, the *P-I* would provide its own an editorial section of the paper on Sunday
First issue of the *Seattle Post-Intelligencer* was printed on presses
at *The Seattle Times* -- May 23, 1983

⁷³¹ Patrick McRoberts, HistoryLink.org, January 1, 2000.

ANOTHER VICTIM IS REPORTED MISSING

Yvonne “Shelly” Antosh, age nineteen, was seen near South 141st Street and Pacific Highway South before she vanished -- May 31, 1983
(her skeletal remains was found near Lake Sawyer
off the Auburn-Black Diamond Road [October 15, 1983])

YET ANOTHER VICTIM FALL PREY TO THE GREEN RIVER KILLER

Carrie Ann Rois, age fifteen, was a beautiful, smart girl with lots of friends
she idolized Brooke Shields and dreamed of becoming a model
she played the flute in her school marching band but she never had much stability at home
as her mother married three times -- her last step-father was abusive toward her
Carrie was bounced around group homes and was in and out of the foster care system
finally she ran away from a youth shelter
she kept in touch with her mother but refused to come home
Carrie reportedly had a “strange date” -- she was driven all the way up to Snoqualmie Pass
when she returned witnesses said she appeared slightly intoxicated
vehicle she got out of was blue or gray pickup truck that was sanded and had primer spots
Carrie Ann was last seen along Pacific Highway South
sometime between May 31 and June 15, 1983 -- no one knows when she disappeared
(her partially buried body was found off Star Lake Road near Federal Way [March 10, 1985])

TWO MORE VICTIMS OF THE GREEN RIVER KILLER DISAPPEAR

Constance Elizabeth Naon, age twenty, worked full time for the Oberto Meats Company
she loved to drive her Chevrolet Camaro
she called her boyfriend from the Sea-Tac Red Lion Hotel to say she would be home soon
she disappeared from South 188th Street and Pacific Highway South -- June 8, 1983
(her partially buried skeleton was found just south of Sea-Tac Airport [October 27, 1983])
Tammie Charlene Liles, age sixteen vanished from downtown Seattle -- June 9, 1983
(Tammie’s remains were found in Tualatin, Oregon, south of Portland [April 23, 1985])

PHYSICIST SALLY RIDE BECOMES AMERICA’S FIRST WOMEN IN SPACE

Sally Ride joined NASA [1978] and became the first American woman in space
when she flew aboard Space Shuttle *Challenger* program’s seventh mission -- July 18, 1983
she was the third woman in space after two Soviet women,
Valentina Tereshkova [1963] and Svetlana Savitskaya [1982]
Sally Ride was also the youngest American at age thirty-two to enter space to that time
During the flight of the “space plane” *Challenger*
its five-person crew deployed two communications satellites
and conducted pharmaceutical experiments
Sally Ride was the first woman to use the robot arm in space
and the first to use the arm to retrieve a satellite
(Astronaut Sally Ride took her second space flight for an eight-day mission [1984]
in all she logged around 345 hours in space)

KILLINGS OF YOUNG WOMEN CONTINUES

Kelly Marie Ware, twenty-two, was a victim of a troubled family
Kelly disappeared from a Seattle Central District bus stop -- July 18, 1983
(her skeletal remains were discovered covered with trash beneath some bushes
just south of Sea-Tac Airport near South 190th Street [October 29, 1983])
Tina Marie Thompson, age twenty-two, was last seen along Pacific Highway South -- July 25, 1983
(she was found murdered near Highway 18 and Interstate 90 [April 20, 1984])
she was the thirtieth victim of Washington State's serial killer

PUBLIC POWER SUPPLY SYSTEM (WPPSS) BONDHOLDERS SUE OVER THEIR CONTRACTS

Courts in Oregon said Public Utility District (PUD) did not have had
authority to enter into construction contracts and hold PUDs liable for cost overruns
Washington State Supreme Court agreed
WPPSS defaulted on \$2.2 billion in outstanding bonds -- August 1983
40,000 investors were financially wiped out
When WPPSS defaulted on its bonds, its bond holders sued for \$7.5 billion
majority of PUDs agreed to a modest settlement -- other utilities continued to fight the suit

PUYALLUP FAIRGROUND HONORS JAPANESE AMERICAN WORLD WAR II INTEREES

Memorial dedicated to Japanese American internees sculpted by celebrated artist George Tsutakawa
was dedicated at the Puyallup Fairgrounds by Governor John Spellman -- August 21, 1983
Bronze sculpture depicts human forms with hands intertwined
it is intended to show peace among all people
Tsutakawa described his design process in an interview that year: **“I made many, many sketches, and some of them were very definitely reminiscent of the hardship. But I felt that by repeatedly reminding people of the injustice and the hardship, and the loss to the Japanese people, it was not going to improve anything; you’ll just remind them of the bad feeling, hard feelings. And instead of doing that I decided it should be a more friendly gesture of all the people gathered and in harmony.”**

(George Tsutakawa interview)⁷³²

Governor Spellman at the dedication said: **“I’ve received letters asking if I had forgotten Pearl Harbor, if I had forgotten the mothers of those who gave their lives in defense of this country. I haven’t forgotten. But all those letters reflect a common confusion: confusing war between Japan and the United States with the mass deprivation of constitutional rights solely because of their race. Their freedom was trampled on for no good reason.”**⁷³³

NUMBER OF TEACHER STRIKES IN WASHINGTON STATE LEAPS UPWARD

Washington Education Association (WEA) affiliates across the state remain off the job -- 1983
Clover Park teacher walked picket lines for twenty-one days in an effort to reach a settlement
Pierce County Superior Court issued an injunction to force teachers back to work
Cheney School District teachers struck for seventeen days

⁷³² Jennifer Ott, HistoryLink.org, August 23, 2010.

⁷³³ Robert Sadamu Shimabukuro, *Born in Seattle: The Campaign for Japanese American Redress*. P. 86.

as administrators opened classes with scabs serving as replacements
Stanwood teachers (SEA) remained out of their classrooms for twelve days
no court order was issued and class was conducted with non-union substitutes
Renton teachers (REA) struck for six days before a new professional agreement was agreed upon
no court order was issued in the strike
Sunnyside School District was struck for five days before a settlement was negotiated
without a court order being issued
Snoqualmie Valley administration kept schools open for three days during their teacher strike
Highline teachers (HEA) struck for one day before reaching a negotiated settlement
Steilacoom School District teachers held a one day strike before returning to work

DANIEL J. EVANS REPLACES U.S. SENATOR HENRY M. JACKSON

Republican Governor John Spellman appointed Republican former-Governor Daniel J. Evans
to the United States Senate to fill Senator Jackson's vacant seat -- September 1, 1983
Evans resigned as president of The Evergreen State College
and as head of the Northwest Power Planning Council

GREEN RIVER KILLER FINDS A NEW LOCATION TO HIDE HIS VICTIMS

Debbie May Abernathy, age twenty-six, disappeared from Rainier Avenue South of Seattle
she and her husband were out of money and living in the room of friends
when she left her three-year-old son at home to go to downtown Seattle -- September 5, 1983
(her body was found twelve miles east of Enumclaw off Highway 410 [March 31, 1984])

MISSING PERSON VANISHES FROM A NEW LOCATION

Tracy Ann Winston, age nineteen, left Northgate Mall about 7 p.m. September 12, 1983
she was still in school and playing sports, but she was a strong-willed teenager
her parents were very distraught because they no longer knew where she was staying
Tracy contacted them on occasion and for holidays
the last time they saw her was Mother's Day
(Tracy's remains were located near the Green River in Kent [March 27, 1986]
about a quarter of a mile from where Wendy Coffield's body was found
new DNA process was used to identify her remains [November 2, 1999])

COSTCO OPENS ITS FIRST DISCOUNT WAREHOUSE IN SEATTLE⁷³⁴

Warehouse concept was pioneered by Price Club in San Diego [1976]
Jeff Brotman and former Price Club executive Jim Sinegal founded Costco
and offered small businesses, such as restaurants and gas stations, the opportunity to buy
a limited variety of food, tires, cosmetics and other goods
at eight to nine percent over wholesale
Costco, headquartered in Issaquah, opened its first warehouse store for retail customers
it was located at 4th Avenue South in Seattle -- September 15, 1983
this first store was just a warehouse with a hot dog stand in front

⁷³⁴ David Wilma, HistoryLink.org, October 16, 2001.

items for sale included food, appliances, clothes, office supplies and other goods
at prices below general retail levels
(Costco merged with Price Club [1993]
with expansion, Costco stores featured food courts, pharmacies, optical departments,
photo processing, a mail-order business, health-care plans, home insurance
and a car-buying program for its members [1997])

WHITE SUPREMACIST GROUP IS ORGANIZED BY ROBERT JAY MATHEWS⁷³⁵

(Robert Jay Mathews, the son of a retired U.S. Air Force officer, developed an interest
in conservative politics at a young age
he joined the right-wing John Birch Society at age eleven
after he dropped out of high school in his senior year, Mathews formed the Sons of Liberty,
an anti-Communist militia dominated by survivalists
Sons of Liberty at its peak had a membership of approximately twenty-five)
(Mathews moved to Metaline Falls, Washington [1974]
he purchased sixty acres of wooded property he named “Mathews Acres”
he became increasingly interested in extreme right-wing politics
Mathews joined the National Alliance -- a white-supremacist group
he read *The Turner Diaries* by William L. Pierce
a novel about the supposed violent takeover of America by white supremacists
who then formed an elite paramilitary underground unit called “The Order”
and take control of the whole world eradicating all Jews and non-whites)
(Mathews began attending services at the Rev. Richard Butler’s Church of Jesus Christ Christian
located inside the white supremacist Aryan Nations compound in Hayden Lake, Idaho [1982]
Butler’s message combined an interpretation of Christianity mixed with Nazism
and the dream of a whites-only homeland centered in the pristine hills of North Idaho)
Robert Mathews invited eight men he felt held beliefs similar to his own
to his property in Metaline Falls -- late September 1983
this group became known as “The Order,” and sometimes as “The Silent Brotherhood”
William L. Pierce’s *The Turner Diaries* became their bible
The Order’s fundamental aim was violent overthrow of the “Zionist Occupation Government”
their name for the federal government

ANOTHER VICTIM DISAPPEARS FROM DOWNTOWN SEATTLE

Maureen Sue Feeney, nineteen, grew up with nine brothers and sisters
she worked in child development before moving to Seattle
Maureen was last seen at a downtown Seattle bus stop -- September 28, 1983
(her body was located by a juvenile detention center employee
off Interstate 90 and near North Bend [May 2, 1986])

MICROSOFT RELEASES ITS WORD PROCESSOR: *MICROSOFT WORD 1.0*

Word processing had been developed by the International Business Machine (IBM) company

⁷³⁵ Daryl C. McClary, HistoryLink.org, December 6, 2006.

to define its semi-automated typewriters which provided at least some form
of electronic editing and correction, and the ability to produce perfect originals
word processing was adapted for application to computers
to provide writing, editing, spreadsheet formatting and printing
Microsoft released *Word 1.0* -- October 1983
Microsoft made a name for itself with its operating systems, word processors
and shrewd business deals

GREEN RIVER KILLERS STRIKE ONCE AGAIN

(Mary Sue Bello, age twenty-five, had been placed in a state juvenile facility when she was thirteen
when she was released after two years she was lost to her family
she came and went as she pleased -- she quit school and was emancipated at age fifteen
when she was nineteen she became an exotic dancer in Arizona before returning to Seattle
Mary contacted the Green River Task Force on a number of occasions with tips about johns)
Mary Sue Bello disappeared from the Sea-Tac strip
she was last seen about 5 p.m. October 11, 1983
(her remains were located eight miles east of Enumclaw off Highway 410 [October 12, 1983])

SERIAL KILLER ANGELO ANTHONY BUONO, JR. IS FOUND GUILTY⁷³⁶

Kenneth Bianchi's partner-in-crime was found guilty of nine of the ten murder counts against him
lasting two years and two days [November 1981 until November 1983]
this remains the longest criminal trial in American history
jurors voted to impose life sentences without the possibility of parole
rather than the death penalty -- October 21, 1983
In addition the California judge ruled that Kenneth Bianchi did not testify "truthfully and completely"
he condemned Bianchi to life imprisonment without the possibility of parole
and ordered the serial killer sent to Washington State to serve out his life sentence there
for the killing of Western Washington University co-eds
Diane A. Wilder and Karen L. Mandic

VIOLENCE AGAIN ERRUPTS IN BEIRUT, LEBANON

After a suicide bomber attack on the American embassy in Beirut [April 18, 1983],
violence once again struck in Beirut when another suicide bomber detonated a truck
full of explosives at a U.S. Marine barracks located at Beirut International Airport
241 U.S. Marines were killed and more than 100 others were wounded -- October 23, 1983
they were part of a contingent of 1,800 Marines sent to Lebanon
as part of a multinational force
Hezbollah, militant group of Shi'a Muslims based in Lebanon and supported by Iran and Syria
took responsibility for the disastrous bombing
Hezbollah began a systematic kidnapping campaign in Lebanon
to assure the United States and others would not retaliate against the militant group
(Over the next year ninety-six hostages, mostly Americans and Western Europeans

⁷³⁶ Daryl McClary, HistoryLink.org, July 26, 2008.

from twenty-one separate nations were captured by Hezbollah
tight security measures taken by the kidnappers succeeded in preventing the rescue
of all but a handful of hostages
at least eight hostages died in captivity
some murdered; some from inadequate medical attention)

UNITED STATES LAUNCHES AN ATTACK AGAINST GRENADA

Grenada is a Caribbean island nation located 100 miles north of Venezuela
its 91,000 people saw its four-year-old government fall in a military coup
internal power struggle resulted in the murder of Prime Minister Maurice Bishop
Grenada's constitution was suspended

United States feared that Grenada would become another Cuba
U.S. Marines & Rangers were sent along with a small force from six Caribbean nations
to invade the island of Grenada in response to a request
by the Organization Of Eastern Caribbean States -- October 25, 1983
after a few days the attacking forces took control of the island
hundreds of U.S. citizens, including a large number of students, were evacuated

Grenada's military Marxist regime was deposed
in the fighting sixteen Americans were killed and seventy-seven were injured
Invasion of Grenada was controversial due to charges of American imperialism, Cold War politics,
the involvement of Cuba, the unstable state of the Grenadian government
and Grenada's status as a Commonwealth nation
media coverage outside of the United States was negative

(Following the U.S. victory, U.S. forces including military police, Special Forces
and a specialized intelligence detachment remained in Grenada after combat operations finished
they performed security missions and assisted members of the Caribbean Peacekeeping Force
and the Royal Grenadian Police Force
Grenada's Governor-General Paul Scoon formed a new government [December 1983]
U.S. Congress, using War Powers Resolution,
required the troops leave Grenada [by December 24]
democratic elections were held in Grenada [December 1984])

INVASION OF GRENADA DID NOT GO WELL

Invasion of Grenada showed problems with the U.S. government's "information apparatus,"
Time Magazine described "some disarray" three weeks after the invasion
U.S. State Department falsely claimed that a mass grave had been discovered
that held 100 bodies of islanders who had been killed by Communist forces
Major General Norman Schwarzkopf, deputy commander of the invasion force,
said that 160 Grenadian soldiers and seventy-one Cubans were killed during the invasion
Pentagon officials gave a much lower count of fifty-nine Cuban and Grenadian deaths
later reports showed an even lower count

Also of concern were problems within the military
communications among Navy, Marines, Air Force and Navy Air Force were not compatible
six Caribbean nations serving as allies only added to the confusion

lack of intelligence about Grenada made things difficult for the quickly assembled invasion force
maps provided to soldiers on the ground were tourist maps with military grids added by hand
they also did not show topography
location of units and requests for artillery and aircraft fire support
were inaccurate because the hand-drawn grids were imprecise
U.S. Navy ships providing naval gunfire and U.S. Marine, U.S. Air Force
and Navy fighter/bomber aircraft that provided close air support
mistakenly fired on and killed U.S. ground forces due to differences in maps
misdirected by wrong map coordinates, data and methods of calling for fire support

ANOTHER TEENAGER DISAPPEARS IN SEATTLE

Pammy Annette Avent, age sixteen, left home possibly going to the Rainier Valley
she disappeared that night -- October 26, 1983
Pammy's mother listed her missing four days later
for several years after her disappearance, the Green River Task Force received tips
that Pammy was living in different places around the country
all of these tips were investigated to no avail
(Pammy's remains were discovered when the Green River Killer
led police to her remains located near Highway 410 [August 16, 2003])

THE ORDER TURNS TO CRIME TO FINANCE THEIR REVOLUTIONARY EFFORTS⁷³⁷

Robert Mathews and other members of The Order robbed a Spokane video store -- October 28, 1983
when they got only \$369 Mathews decided small robberies were not worth the time and effort
In William L. Pierce's *The Turner Diaries*, The Order turned to counterfeiting, armed robberies
and other violent crimes to disrupt the American economy
Mathews and his neo-Nazis white supremacist gang decided to do the same
gang member Bruce Pierce was arrested in Yakima
for passing counterfeit \$50's at the Valley Mall in Union Gap
and for carrying a concealed weapon
Mathews worried that the longer Pierce sat in jail the greater the likelihood
he might talk to the police or another prisoner
Pierce was also making telephone calls from jail that could link him to The Order
Mathews decided to rob a bank to raise the money for Pierce's bail
Acting alone, Mathews held up the Innis-Arden branch of Citybank
north of Seattle near the King-Snohomish County line
he escaped with \$25,952 but a large portion of the cash was ruined by an exploding dye pack
that turned the bills red

SEATTLE SEES YET ANOTHER DISAPPEARENCE

Delise Louise Plager, twenty-two, vanished from a Seattle Beacon Hill bus stop -- October 30, 1983
during her teen years "Missy" landed in schools for teen offenders multiple times
she fantasized about finding her birth parents and brother and being a family again

⁷³⁷ Daryl C. McClary, HistoryLink.org, December 6, 2006.

she had her first child at sixteen and her second at eighteen
(her skeletal remains were found near Interstate 90 east of North Bend [February 14th, 1984])

KENNETH BIANCHI AND ANGELO BUONO ARE SENTENCED TO LIFE IN PRISON

Serial killer Kenneth Bianchi pleaded guilty for five of the murders in California -- October 31, 1983
he was sentenced to five life terms for the murders, one life term for the conspiracy
and an additional five-year sentence for sodomy -- all to run concurrently
(Bianchi would serve twenty to thirty-five years before being returned to Washington
to serve his two consecutive life sentences)

Bianchi's accomplice Angelo Buono was convicted of nine murders in California -- October 31, 1983
he was sentenced to life in prison with no possibility of parole
(Angelo Buono died of a massive heart attack in his cell at age 67 [September 21, 2002])

STILL THE GREEN RIVER KILLINGS CONTINUE

Kimberly L. Nelson had dropped out of school in Michigan in her junior year of high school
she moved around a lot, but kept in touch with her family
she spoke with her mother and sister regularly
she was distinctive in appearance, almost six feet tall with bleach-blond hair
at age twenty-six also Kimberly also went by the names Tina Tomson and Linda Lee Barkey
Kimberly was last seen at bus stop at South 141st Street and Pacific Highway South -- November 1
(her remains were located off Interstate 90 near North Bend [June 14, 1986])

REPUBLICAN DANIEL J. EVANS IS ELECTED TO THE U.S. SENATE IN A SPECIAL ELECTION

Dan Evans had been appointed by Governor John Spellman
to replace U.S. Senator Henry M. Jackson who died while in office two months earlier
Evans bested Democrat Congressman Mike Lowery for the U.S. Senate seat -- November 8, 1983

PIERCE COUNTY SETTLES THE INTERPRISE RACKATEERING CIVIL SUIT⁷³⁸

Pierce County lost the civil suit brought by State Liquor Control Board Agent Melvin Journey,
Night Moves tavern owner Ronald Chase
and firebombed Back Forty tavern owner E. Norman Anderson
Journey and Anderson won their civil trials -- November 15, 1983
Pierce County officials negotiated a global settlement with the plaintiffs for \$3.7 million
(ironically, Pierce County had refused to settle all three cases for \$400,000 [1981])

PAUL ALLEN RETIRES FROM MICROSOFT

Allen's share in the company he co-founded with Bill Gates made him a multi-millionaire -- 1983
He retired from the company at age thirty
but retained a thirteen percent share of Microsoft and continued to serve on its board of directors
(he continues to be Microsoft's second-largest stockholder)
As he recovered from cancer, Paul Allen used his fortune and his ideas
for a life of adventure and discovery

⁷³⁸ Daryl C. McClary, HistoryLink.org, April 5, 2011.

he spent the next two years traveling, scuba diving, yachting, skiing
and spending time with his family

PACIFIC NORTHWEST BALLET PREMIERES THE *NUTCRACKER*⁷³⁹

Kent Stowell and Francia Russell, artistic directors of the Pacific Northwest Ballet since [1977],
worked to raise professional standards at the company and at Pacific Northwest Ballet's school
The Nutcracker with music is by Peter Ilyich Tchaikovsky is by far the most popular ballet
presented in America -- Pacific Northwest Ballet performed a version [1975-1982]

Stowell and Russell offered a new version of the German story written [1817] by E.T.A. Hoffmann
Seattle's *The Nutcracker and the Mouse King* premiered -- December 13, 1983

their version went back to the original source re-introducing the story of Princess Pirlipate
children's book author and illustrator Maurice Sendak was selected to produce the sets
on the stage the Christmas tree, designed by Boeing engineers, grows to gigantic size
expanding Christmas tree presents a particularly memorable scene

ANOTHER VICTIM OF THE GREEN RIVER KILLER GOES MISSING

Lisa Lorraine Yates grew up in the Seattle area

she had been bounced from house to house and never had any real stability

Lisa, at age nineteen, was last seen in Seattle's Rainier Valley -- December 23, 1983

(three months after Lisa disappeared her remains were discovered by a soldier in a convoy
that had stopped near exit 38 off of Interstate 90 east of North Bend [March 13, 1984]
her body had been placed between two fallen logs)

KING COUNTY SHERIFF'S OFFICE INCREASED THE SIZE OF ITS TASK FORCE

Due to the increasing number of murders, it was feared the pace of killing would rapidly expand
and that more victims would be discovered

Green River task force increased in size sixfold -- December 30, 1983

(their dire prediction proved to be correct)

PART OF McNEIL ISLAND BECOMES A WILDLIFE REFUGE

Governor John Spellman signed documents drawn up by the federal General Services Administration
to extend the three year lease of McNeil Island penitentiary -- January 4, 1984

seven square miles McNeil Island were deeded to Washington State

under the terms of the agreement the state would continue operating the penitentiary

but could not permit any major development to the rest of the island

In the new agreement U.S. Fish and Wildlife Service agreed the remainder of the island

would be managed by the Washington State Game Department as a wildlife sanctuary

Washington State Department of Fish and Wildlife was given 3,119 acres, about ¾ths of the island,
for use as a wildlife refuge -- public visitation or use of the island was strictly prohibited

McNeil Island Wildlife Area also included Gertrude and Pitt Islands

McNeil Island, by far the largest of the three islands at 4,449 acres, remained largely forested
second- and third-growth forest now covers nearly three-quarters of the island

⁷³⁹ Paula Becker, HistoryLink.org, June 16, 2012.

wildlife agents generally patrol the island once a week to monitor wildlife
their boats also occasionally patrol the beaches
Washington Department of Fish and Wildlife manages all island bird, animal, fish and plant wildlife
most visible wildlife on McNeil Island is the large population of Columbian black-tailed deer
there is a heron rookery and bald eagle nesting on the islands
waterfowl, many other bird species, and small mammals also use the islands
wildlife have benefitted from previous developments of numerous pastures,
water impoundments, cereal grain fields and fruit orchards

IRAN CAN FIND LITTLE ASSISTANCE FROM THE WEST IN ITS WAR WITH IRAQ

Seven American hostages were still being held in Iran by the Hezbollah -- January 1984
these hostages were becoming as great a political liability for the Reagan Administration
as the Tehran American Embassy hostages had been for President Jimmy Carter [1979]
Iran was labeled a “State Sponsor of Terrorism” by Congress
U.S. was joined by Netherlands, United Kingdom, Australia, and Canada
few Western nations were willing to supply Iran with badly needed weapons for its war effort

DEVELOPMENT OF THE COMPUTER “MOUSE” MAKES COMPUTING PRACTICAL

One of Microsoft’s technological breakthroughs -- the computer “mouse”
made Bill Gates’ goal of a computer in every household possible
Microsoft’s mouse adapted so well to the MS-DOS operating system
that any application written to use the Microsoft standard could use any mouse -- 1984

APPLE COMPUTER PRODUCES THE MACINTOSH (“MAC”) COMPUTER

Apple Computer chairman Steve Jobs introduced its Macintosh “Mac” personal computer
in a now-famous advertisement during the third quarter of Super Bowl XVIII -- January 22, 1984
Macintosh was the replacement for the company’s Apple II computer
Macintosh was the first commercially successful personal computer that featured a “mouse”
and used images rather than text commands
Apple’s Macintosh computer went on sale -- January 24
it came bundled with two applications: MacWrite and MacPaint

KING COUNTY SHERIFF ORGANIZES A NEW GREEN RIVER TASK FORCE

Captain Frank Adamson was placed in charge of the new special task force -- January 1984
he had previously headed the Sheriff Department’s internal affairs unit
Adamson noted that the task force had been kept so busy throughout most of [1983]
processing crime scenes where skeletons were found,
and then laboring to identify the victims through hard-to-find dental records,
that comparatively little effort was being invested in finding the murderer
Captain Adamson initiated drastic changes⁷⁴⁰
he decided to relocate the task force headquarters to the Burien County precinct

⁷⁴⁰ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

which was near the airport and closer to where the crimes were occurring
to achieve more successful results in the case he divided various tasks
these were assigned to individuals within the team to facilitate
a more thorough assembly, organization and integration of vast amounts of information
twenty-two sheriff's officers were also assigned to the task force's proactive squad
to develop new strategies to monitor activity and unusual events on Pacific Highway South

GREEN RIVER KILLER STRIKES ONCE AGAIN

Mary Exzetta West was a bright girl who was very cheerful, however, her life was quite chaotic
she ended up living with her aunt in Seattle's Rainier Valley
at age sixteen she disappeared from Seattle's Rainier Avenue -- February 6, 1984
(Mary's remains were located in Seattle's Seward Park [September 8, 1985])

SEATTLE CITY COUNCIL RECOGNIZES JAPANESE AMERICANS CIVIL RIGHTS LOSSES⁷⁴¹

During World War II Japanese Americans had been fired from their city jobs because of their ancestry
City Council member Delores Sibonga introduced Ordinance 111571 to address their loss
it stated: **"...in the interest of fairness, justice and honor, The City of Seattle should
make reparation to City employees of Japanese ancestry who were terminated, laid-off or dismissed
from City employment pursuant to Executive Order No. 9066."**

it called for a payment of \$5,000 to the five employees
who had been unjustly dismissed four decades earlier
Seattle City Council passed the proposal -- March 5, 1984
Seattle Mayor Charles Royer signed the reparations ordinance -- March 6

DIALOGUE TAKES PLACE BETWEEN TRIBES AND THE STATE OF WASHINGTON

Representatives of Northwest Indians and the state government met at Port Ludlow -- March 1984
in an effort to seek common ground regarding the conservation of salmon
(talks pressed on for two months as adversaries began to find common ground
both sides recognized the need to conserve the resource)

THE ORDER ROBS THE SHORELINE FRED MEYER STORE⁷⁴²

Robert Mathews and other members of The Order traveled to the Fred Meyer store -- March 16, 1984
when an armored truck arrived to collect the weekly receipts, they robbed the guard
just as he was leaving the office with six large money bags and six coin boxes on a handcart
this time the take was \$43,345

GREEN RIVER KILLER COMMITS ANOTHER MURDER

Cindy Anne Smith, age seventeen, had moved to California with a boyfriend
but she made contact with her mother to say she wanted to come home
her mother made immediate arrangements to fly her home
Cindy spent the first few hours back in Seattle with her family

⁷⁴¹ Priscilla Long, HistoryLink.org, November 21, 2001.

⁷⁴² Daryl C. McClary, HistoryLink.org, December 6, 2006.

before she left her parents' home in Des Moines to visit her brother -- 11 a.m. March 21, 1984
at age seventeen, Cindy became the fortieth victim of the Green River Killer
when she disappeared while hitchhiking along Pacific Highway South
(Cindy's body was not discovered until three years later
when three boys stumbled across the partially buried skeletal near Highway 18
in the vicinity of Auburn's Green River Community College [June 27, 1987])

ANOTHER UNIDENTIFIED BODY IS DISCOVERED

A dog belonging to the caretaker of the Highline Little League field
brought home a human femur -- March 21, 1984
when police searched the area they discovered a set of human remains
in the wooded area behind centerfield of the westernmost field
located north of Sea-Tac Airport
Jane Doe "B10" was estimated to be around fifteen years old was believed to have disappeared
during the [spring or summer of 1983]
she was a white female 5'2" to 5'7" in height and left handed
she had a healed fracture of the skull
Repeated attempts by investigators to identify Jane Doe "B-10" have been unsuccessful
her identity remains a mystery to this day
Jane Doe "B10" was the fortieth victim of the Green River Killer

THE ORDER ROBS ANOTHER ARMORED CAR⁷⁴³

Robert Mathews and other members of The Order
pulled another armored car robbery -- April 19, 1984
after the armored car had made stops at Northgate Mall's Nordstrom, the Bon Marche
and J. K. Gill
gang made off with \$536,000, however, \$301,000 was in checks which had to be destroyed

THE ORDER COMMITS MURDER⁷⁴⁴

Robert Mathews ordered two new recruits to kill Walter Edward West,
a member of the neo-Nazi Aryan Nations who would get drunk in bars
around Hayden Lake, Idaho and gossip about The Order's exploits
West was picked up at his home and taken deep into the Kaniksu National Forest
where he was hit on the head with a hammer and shot him in the face with a rifle
his body was dumped unceremoniously into a previously prepared grave -- May 27, 1984
Ironically, The Order's first victim of terror turned out to be one of their own people

MEMBERS OF THE ORDER KILL AGAIN⁷⁴⁵

Alan Berg was a controversial Jewish talk-show host on Denver, Colorado radio station
Berg had a contentious style which he used to bait callers to get the show's phones ringing

⁷⁴³ Daryl C. McClary, HistoryLink.org, December 6, 2006.

⁷⁴⁴ Daryl C. McClary, HistoryLink.org, December 6, 2006.

⁷⁴⁵ Daryl C. McClary, HistoryLink.org, December 6, 2006.

he especially liked to agitate right-wing extremist groups
Members of The Order assembled in Denver to review plans for Alan Berg's assassination
when Berg pulled his Volkswagen Beetle into the driveway of his home
members of The Order pulled in behind him -- 9:21 p.m. June 18, 1984
as the talk-show host exited his car carrying a bag of groceries, he was shot twelve times
before the gun jammed
members of The Order fled from Denver

NORTHWEST INDIAN FISHERIES COMMISSION CHANGES ITS ORGANIZATION

Northwest tribes wrote a new constitution

they increased the number of commissioners to eight -- 1984

Puget Sound region was divided into eight areas defined by river drainages:

- Quinault, Hoh, and Quileute;
- Makah;
- Nooksack and Lummi;
- Swinomish, Upper Skagit, and Sauk-Suiattle;
- Tulalip and Stillaguamish;
- Muckleshoot and Suquamish;
- Jamestown S'Klallam, Lower Elwha S'Klallam, Port Gamble S'Klallam, and Skokomish;
- Puyallup, Squaxin Island, and Nisqually

Funding for the Northwest Indian Fisheries Commission⁷⁴⁶

initially came from the Small Tribes Organization of Western Washington and individual tribes
however, the Bureau of Indian Affairs and the United States Fish and Wildlife Service

soon provided more substantial funding that allowed the commission to carry out its mission:

- to develop programs to protect and coordinate treaty fishing rights of member Tribes;
- to provide technical advice and coordination to tribal fisheries management plans;
- to develop goodwill through public information and education projects to non-Indians

BATTLESHIP USS *MISSOURI* (BB-63) IS SCHEDULED TO RETURN TO SERVICE

President Reagan's Administration developed a program to build a 600-ship Navy
battleship USS *Missouri* was reactivated

she was towed from Puget Sound Naval Shipyard in Bremerton in Bremerton
to the Long Beach Naval Yard -- summer of 1984

to undergo modernization in advance of her scheduled re-commissioning

WASHINGTON STATE WILDERNESS ACT SETS ASIDE TWENTY-ONE ADDITIONAL AREAS

(Washington State Wilderness Act [1964] had designated three wilderness areas)

Washington State Wilderness Act of 1984 when it was signed into law by President Ronald Reagan
placed over a million more acres of mountain wilderness under federal protection -- July 3, 1984

multiple locations were designated in four separate National Forests:

- Gifford Pinchot National Forest:
-Glacier View Wilderness,

⁷⁴⁶ Jennifer Ott, HistoryLink.org, March 28, 2011.

- Indian Heaven Wilderness,
 - Mount Adams Wilderness Additions,
 - Tatoosh Wilderness,
 - Trapper Creek Wilderness,
 - Olympic National Forest:
 - Brothers Wilderness,
 - Buckhorn Wilderness,
 - Colonel Bob Wilderness,
 - Mount Skokomish Wilderness,
 - Wonder Mountain Wilderness,
 - Mount Baker-Snoqualmie National Forest:
 - Boulder River Wilderness,
 - Clearwater Wilderness,
 - Mount Baker Wilderness,
 - Noisy-Diobsud Wilderness,
 - Mount Baker-Snoqualmie and Wenatchee National Forests:
 - Glacier Peak Wilderness Addition,
 - Henry M. Jackson Wilderness,
 - Norse Peak Wilderness,
- in addition, single locations were designated in selected National Forests:
- Lake Chelan-Sawtooth Wilderness in the Okanogan and Wenatchee National Forests,
 - Pasayten Wilderness Additions in the Okanogan National Forest,
 - Salmo Priest Wilderness in the Kaniksu and Colville National Forests,
 - William O. Douglas Wilderness in the Wenatchee and Gifford Pinchot National Forests

TED BUNDY PLANS ANOTHER ESCAPE FROM PRISON

Guards at Raiford Prison in Starke, Florida found two hacksaw blades hidden in Bundy's cell
 a steel bar in one of the windows was sawed completely through at the top and bottom
 it was glued back in place with a homemade soap-based adhesive -- July 1984
 Bundy's cell was changed
 (several months later his cell was changed again after guards found a mirror)

THE ORDER ROBS ANOTHER ARMORED CAR⁷⁴⁷

Robert Mathews decided to hijack another armored car -- this time in California
 to get inside information about the best and most lucrative vehicle to rob he contacted
 Charles E. Ostrout, a supervisor at the Brink's Armored Car Service depot in San Francisco
 Ostrout selected the Brink's run to Eureka, California
 Mathews and six members of The Order stopped the Brink's armored truck on Highway 101
 and robbed the guards of more than \$3.6 million -- July 19, 1984
 but during the robbery Mathews dropped a pistol registered to a member of The Order
 FBI Agents immediately began an investigation of the crime and the criminals

⁷⁴⁷ Daryl C. McClary, HistoryLink.org, December 6, 2006.

SEATTLE'S HIP-HOP CULTURE EXPLODES ON THE SCENE⁷⁴⁸

Pacific Northwest had well-earned a global reputation for its trail-blazing rock traditions but Seattle residents had little knowledge of the vibrancy of the emerging musical movement, and even less regarding the fresh new sounds and the eye-popping breakdancing it inspired. Seattle's "underground" hip-hop enthusiasts staged *Summer Break* -- August 17, 1984 a breakdancing event at Seattle Center Exhibition Hall which gained unprecedented mainstream media coverage cosponsored by the Seattle Department of Parks and Recreation and KOMO-TV. Seattle's version of Hip-Hop was launched onto the national scene hip-hop was seen as creative and competitive.

ONE WASHINGTON SCHOOL DISTRICT FACES A TEACHER STRIKE

Longview Education Association (LEA) teachers refused to report to their classrooms for two days before an agreement was successfully negotiated without court involvement -- 1984

FBI AGENTS SUCCESSFULLY COLLECT INFORMATION ON THE ORDER⁷⁴⁹

FBI headquarters in Washington, D.C. mounted a major offensive against the militant racist gang soon forty federal agents were in rural Northern Idaho an area known for its anti-government attitudes. When word reached The Order that the FBI had been asking questions, most of the gang split into groups:

- Mathews and his cadre preferred cheap motels and safe houses;
- others preferred a mobile lifestyle moving from town to town in campers and travel trailers;
- Gary Yarborough moved his belongings from Sandpoint to a remote mountain cabin near Samuels, Idaho as an FBI airplane watched an office was rented in Tulsa, Oklahoma with an answering machine to take and receive messages so members of The Order could remain in contact with one another

U.S. EMBASSY ANNEX IN AUKAR, LEBANON IS BOMBED

Another attack took place in Lebanon when a suicide bomber exploded a truck bomb in Aukar, northeast of Beirut -- September 20, 1984. Twenty-four people, including two U.S. military personnel, were killed (according to a later report by the U.S. State Department on terrorist organizations [1999] elements of Hezbollah were "**known or suspected to have been involved**" in the bombing)

GREEN RIVER TASK FORCE SEEKS OUTSIDE HELP⁷⁵⁰

Ted Bundy sat on death row when he offered to help the task force find their killer -- October 1984 task force detective Robert Keppel flew to Florida to meet with Bundy who gave insight into the mind of a serial killer

⁷⁴⁸ Peter Blecha, HistoryLink.org, May 1, 2011.

⁷⁵⁰ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

Bundy suggested the killer likely knew some of his victims
he also noted that more victims were probably buried where other victims had been found
he placed a lot of significance in the different areas where the bodies had been left
and suggested that each cluster or spot was set closer to the killer's home

FBI AGENTS CLOSE IN ON THE ORDER⁷⁵¹

Three FBI agents in a green U.S. Forest Service truck
drove onto Gary Yarborough's remote mountain cabin property -- they were met with gunfire
They hastily retreated, but returned that evening with a search warrant -- October 18, 1984
inside the cabin, agents found a treasure trove of evidence, including documents, explosives,
gas grenades, cases of ammunition, an alarming collection of pistols, shotguns, rifles
and two Ingram MAC-10 submachine guns with silencers
also, gas masks, knives, crossbows, assault vests, radio frequency scanners
and other equipment
one of the weapons had been used to kill radio talk-show host Alan Berg
Yarborough, however, managed to escape into the woods

G.I. BILL IS CHANGED ONCE AGAIN

Congress passed the Veterans' Educational Assistance Act of 1984 -- October 19, 1984
it was often referred to as the "Montgomery G.I. Bill" (MGIB)
after Congressman "Sonny" Gillespie V. Montgomery (D-Mississippi)
MGIB expanded educational benefits to the Army National Guard and Air National Guard
active duty members who contributed \$100 per month for twelve months could receive
\$1,426 monthly as a full time student for a maximum of thirty-six months
this amount was reduced proportionally for part-time students but extended for a longer time
in addition, active duty members could invest up to \$600 more of their own toward their MGIB
for every dollar service members contributed the federal government contributed eight
active duty service members and veterans with service-connected disabilities
were also eligible for vocational rehabilitation programs

NATIONAL AND STATE ELECTION SHOWS MIXED RESULTS

Washington voters supported incumbent Republican President Ronald Reagan
and George H.W. Bush in the national presidential election -- November 6, 1984
Television networks declared Reagan the winner three hours before polls closed in twenty-six states
chairmen of both the Republican and Democratic parties criticized the networks
as they believed the news reports kept many voters home impeding voter turn-out
and negatively impacted many local races
(Reagan's electoral victory was the largest in U.S. history
525 electoral votes to thirteen for Democratic candidates
Walter Mondale and Geraldine Ferraro -- the first woman vice president candidate)
Incumbent Republican Governor John Spellman lost his reelection bid
to Pierce County Executive Democrat Booth Gardner (who served two terms [1985-1993])

⁷⁵¹ Daryl C. McClary, HistoryLink.org, December 6, 2006.

Seattle Times conducted a survey that indicated that voters favored Gardner as an expression of dissatisfaction with Spellman's four years as governor⁷⁵² Washington's five incumbent Democratic Congressmen were all reelected as were two Republican Congressmen

First District Republican Congressman Joel Pritchard chose not to run for reelection
Seattle City Council Member Republican John Miller won the open seat
(Congressman Miller held the office for four terms [1985-1993])
In the legislative races, Democrats picked up one seat in the State Senate twenty-seven to twenty-two
State House of Representatives remained divided fifty-three to forty-five in favor of Democrats
State Initiative 456 asked Congress to declare Steelhead a game fish
thus limiting the effect of the Boldt Decision which affirmed Indian treaty fishing rights
I- 456 passed with 53% voter approval
Initiative 464 asked: **"Shall the value of trade-ins of like kind property be excluded from the selling price for the sales tax computation"** -- this measure passed with a 68.95% YES vote
thus reducing sales tax income to the state

AN ANONYMOUS TIP LEADS THE FBI TO THE ORDER⁷⁵³

Seattle's FBI office received a call from a pay telephone -- December 3, 1984
in which the caller said Robert Mathews and several members of The Order were heavily armed
and hiding on Whidbey Island in a rented house at Greenbank, Washington
FBI dispatched 150 agents to the island to make sure that none of the fugitives escaped

FBI HAS THE ORDER SURROUNDED AT GREENBANK⁷⁵⁴

Agents arrested four members of the gang without incident, but Robert Mathews refused to surrender
Mathews held off the FBI for thirty-five hours
as he fired at the agents numerous times with a submachine gun
FBI fired three Starburst illumination flares into the house -- December 7, 1984
knowing it would likely catch on fire and end the standoff -- Mathews still did not surrender
Robert Jay Mathews' charred remains were found -- December 9, 1984
news reports about the siege on Whidbey Island
announced to the American public for the first time
that Mathews' White Supremacist, Neo-Nazi group, The Order,
had been conducting a war against the "Zionist Occupation Government"
Death of Robert Jay Mathews signaled the end of The Order as a viable group
FBI immediately began to hunt down and arrest every member and affiliate of The Order

PATTERNS BEGIN TO EMERGE IN THE GREEN RIVER KILLINGS

Death toll of young women had risen to forty-two -- twenty-eight bodies had been identified
while another fourteen women remain missing -- December 9, 1984
While it appeared the Green River Task Force was making few advances in the investigation,

⁷⁵² David Wilma, HistoryLink.org, October 30, 2003.

⁷⁵³ Daryl C. McClary, HistoryLink.org, December 6, 2006.

⁷⁵⁴ Daryl C. McClary, HistoryLink.org, December 6, 2006.

distinct patterns began to emerge that allowed the team to create a more accurate profile of the killer and his movements.
he seemed to have several locations where he would dispose of the bodies of his victims all but one of the bodies (Mary Bridget Meehan) were found partially buried or covered with garbage or foliage
most of the bodies had been found off isolated roads in or near illegal waste dumping areas

WASHINGTON PUBLIC POWER SUPPLY SYSTEM BEGINS GENERATING ELECTRICITY

Washington Public Power Supply System (WPPSS) -- 1984
consisted of nineteen Public Utility Districts (PUDs) and four cities
Richland, Seattle, Tacoma and Ellensburg
twenty-one municipal power plants operated in Washington
Twelve years after ground was broken for the Columbia Generating Station at Hanford
WPPSS Plant 2 was the only nuclear plant that had been completed
Plant 2 produced twelve percent of the power
supplied by the Bonneville Power Administration
at a cost of 2.3 cents per kilowatt hour -- December 13, 1984
Seattle City Light customers paid an average of 3.89 cents per kilowatt hour⁷⁵⁵
a protracted legal fight ensued over the distribution of WPPSS Plant 2 electric power
eventually, a compromise was reached
private utilities received half of the electric power supplied to PUDs
(Unfinished nuclear Plants 1 and 3 were demolished [1995])

CONGRESS STOPS FUNDING TO NICARAGUA'S CONTRAS

Congress steadily reduced U.S. assistance to the Contras
until passage of the Second Boland Amendment prohibited all U.S. agencies
from giving aid to Nicaraguan Contras -- December 1984
(Senior officials of the Reagan Administration continued to secretly arm and train the Contras
in violation of the Second Boland Amendment)

U.S.-CANADA AGREE TO A PACIFIC SALMON TREATY

During their life-cycle, salmon and steelhead from Washington State
migrated to Alaska and returned home to spawn
in the process they passed through a tangled web of political jurisdictions
regulated by federal and state statutes, tribal treaties, international treaties, county laws,
city ordinances and local land use plans and regulations⁷⁵⁶
not to mention eight dams on the Columbia River which must be conquered both directions
Alaskan and Canadian fish mingled with runs originating in Washington
most salmon and steelhead born in Washington were caught in Alaska and Canada
United States and Canada committed to agree to prevent over-fishing,
provide for optimum production, and ensure that both countries received benefits

⁷⁵⁵ David Wilma, HistoryLink.org, July 10, 2003.

⁷⁵⁶ Trova Hefferman, *Where the Salmon Run*, P. 202-203.

equal to the production of salmon originating in their waters -- January 28, 1985
(this was to go into force [March 18, 1985])
(This treaty was revised [1999] to renew both country's long-term fishing agreements
and was amended again [2002] when the Treaty included the Yukon River Salmon Agreement)

SEATTLE LOSES A BELOVED SON⁷⁵⁷

Ivar Haglund had been born in Seattle [March 21, 1905]
his Swedish father, Johan Ivar Haglund was said to have jumped ship in Port Townsend
and hidden in the woods
his mother, Daisey Maud Haglund, was the daughter of a Seattle pioneering family
who purchased Alki Point from Doc Maynard [1869]
she passed away of stomach cancer when Ivar was three years old [1908]
Ivar was raised by his father with help from Daisey's older sister Lorena and her brother Edmund
As a young man, Ivar developed his musical talent
he became known a Northwest folk music an expert and champion
he could sing more than 200 songs from memory
he taught himself to tap dance and developed a song-and-dance routine
that included bits of stand-up comedy
during the Great Depression he worked to develop an identity as a Western folk singer
While visiting his cousins, Greta and George Smith, at their aquarium in Seaside, Oregon [1938]
Ivar Haglund made a quick study of how to run and stock an aquarium
returning to Seattle Ivar sat on a stool in front of his Pier 54 aquarium
wearing his official captain's hat,
he performed songs he had written about the creatures inside in his tanks
school children visiting his aquarium were delighted by his songs and stories
Ivar opened his *Acres of Clams* restaurant [1946]
and performed on his fifteen-minute radio show *Around the Sound with Ivar Haglund*
every Sunday morning
he opened each broadcast with the first stanza of the *Old Settler's Song*:
**“No longer the slave of ambition
I laugh at the world and its shams
As I think of my happy condition
Surrounded by acres of clams.”**
Ivar was known for his sharp wit and clever puns -- both good and bad
Ivar's *Acres of Clams* was soon described as the place “Where Clams and Culture Meet”
on his menu Ivar warned husbands that they needed their wife's permission
to have more than three cups of his “Ever-Rejuvenating Clam Nectar”
his clam chowder was “food for thought” because “Seafood is Brain Food. Be wiser at Ivar's”
but the center of his advertising and his motto was simply “Keep Clam”
Ivar's *Acres of Clams* grew into two more restaurants, the *Captain's Table* and the *Broadway Ivar's*
these were later joined by Ivar's *Salmon House* on Portage Bay whose featured interior
represented an Indian Longhouse native to the Washington coast

⁷⁵⁷ Paul Dorpat, HistoryLink.org, June 20, 2000.

complete with photographs of Native American leaders, canoes hanging from the ceiling
and a view of the Montlake Cut linking Lake Washington with Lake Union
Haglund's success multiplied when Ivar's Seafood Inc. purchased fourteen fish and chip shops
Ivar Haglund sponsored his first 4th of July fireworks show over Puget Sound [1965]
[1984] show was dedicated to the 1000th anniversary of Leif Ericsson's discovery of America
it was last that Ivar would see
this annual civic treat was maintained until [2008]
At age 79, Ivar Haglund, Northwest cultural icon and good friend to the region,
died of a heart attack -- January 30, 1985

INDIANS AND STATE OFFICIALS ENTER A NEW ERA OF COOPERATION

In an effort to avoid turning to the courts to resolve disputes over fishing rights
Northwest Indian Fisheries Commission staff met with state agencies every day
to work out a plan⁷⁵⁸
Puget Sound Salmon Management Plan was developed by mutual agreement of both parties -- 1985
this plan was the first agreement of its kind in the United States
between Indian tribes and state government⁷⁵⁹
it provided a framework for fisheries management, information sharing, dispute resolution
and it established a scientific foundation for decision making
tribes worked through the commission to develop unified policies
and to help make conservation decisions
state biologists on the commission staff provided important watershed-specific information
(Northwest Indian Fisheries Commission established what was later called the "Era of Cooperation")

WASHINGTON STATE INITIATES A BLUE RIBBON COMMISSION ON SCHOOL REFORM

Governor Booth Gardner proposed a Washington State Economic Development Board
twenty-eight-members composed of a coalition of business, education, labor
and legislative representatives was selected --1985
to draft a proposal mandating curriculum demands in "core competencies"
and to develop a state-wide testing program to meet high school graduation requirements
other reforms to be investigated could include such topics as:
•"pay-for performance" for teachers and administrators,
•more school choices for parents,
•student assessments not based on standardized tests

SEATTLE GRAND JURY INDICTES THE MEMBERS OF THE ORDER⁷⁶⁰

Department of Justice built a massive conspiracy case against members of The Order
federal grand jury in Seattle returned a sweeping twenty-count indictment
that charged twenty-three members with sixty-seven separate offenses
including racketeering and conspiracy -- April 15, 1985

⁷⁵⁸ Jennifer Ott, HistoryLink.org, March 28, 2011.

⁷⁵⁹ David Wilma, HistoryLink.org, January 1, 2000.

⁷⁶⁰ Daryl C. McClary, HistoryLink.org, December 6, 2006.

FBI had seventeen of the defendants already in custody
including radio talk show host Alan Berg's killers

ANOTHER MEMBER OF THE ORDER COMES TO JUSTICE⁷⁶¹

Neo-Nazi David Tate was stopped by two Missouri state troopers
as they conducted random checks of vehicles and inspected driver's licenses
Tate opened fire on the troopers with a silenced MAC-11 submachine gun
one officer was killed and the other critically wounded -- April 15, 1985
Tate escaped but was captured five days later
(David Tate He was found guilty of assault and murder and was sentenced to life without parole
in a Missouri state prison)

CAROLYN REABER DIMMICK IS ELECTED TO THE STATE SUPREME COURT

(Carolyn Reaber earned a bachelor's degree from the University of Washington [1951]
Carolyn taught school for a year before entering the U.W. School of Law
she graduated one of only three women in her law school class [1953]
she immediately went to work as an Assistant Attorney General in Olympia [1953-1954]
Carolyn Reaber married attorney Cyrus A. Dimmick [1955]
she became deputy prosecutor for King County [1955] to 1959] and [1960[to [1962]
she entered private practice in Seattle [1959-1960]
she and Cyrus had a son, Taylor [1958] and daughter, Dana [1962]
When a vacancy on the northeast King County District Court occurred [1965],
several local attorneys urged Carolyn Dimmick to apply for the appointment
all three county commissioners were impressed with her previous record
they unanimously appointed her to the vacancy
at thirty-six she became only the third woman serving in the state judiciary
Governor Dan Evans hoped to place more women and minorities on the Washington bench
when a King County Superior Court vacancy occurred, he appointed Judge Dimmick to the post
Dimmick joined thirty-six men and two women
then serving on the King County trial bench [January 16, 1976]
When State Supreme Court Justice Charles T. Wright died in office
Governor Dixy Lee Ray interviewed Dimmick and gave her the appointment [January, 1981]
Justice Carolyn Reaber Dimmick became the first woman
to sit on the Washington Supreme Court
(she served on the State Supreme Court until [January 12, 1985])
President Ronald Reagan nominated Justice Dimmick to the federal district court
she was confirmed by the U.S. Senate -- April 17, 1985
(she assumed senior judge status -- a form of semi-retirement [November 1, 1997])

FINDING REMAINS IN OREGON ALLOWS THE FBI TO ENTER INVESTIGATION

Remains of Green River Killer victim Tammie Charlene Liles were discovered in Tualatin, Oregon
along with a second, never identified, victim -- April 23, 1985

⁷⁶¹ Daryl C. McClary, HistoryLink.org, December 6, 2006.

skeletal remains of the victims had been carefully tucked away in brush and forest foliage
to be stumbled upon by hunters, fishermen, woodcutters, dirt-bikers and mushroom pickers
It appeared the Green River Killer's victims had been kidnapped and taken across a state line
this was a federal crime and allowed the FBI to enter the investigation
FBI Agent John Edward Douglas joined forces with the Green River Task Force
he examined the crime scenes and created a profile of the Green River Killer
by attempting to describe the Green River Killer's habits and to predict his next moves

PRESIDENT REAGAN ENTERS THE HOSPITAL FOR COLON CANCER SURGERY

U.S. Vice President George H.W. Bush served as Acting President for eight hours
while President Ronald Reagan underwent colon cancer surgery -- July 13, 1985
While in the hospital President Reagan learned Iranian moderates opposed to the Ayatollah Khomeini
sought to establish a quiet relationship with the U.S. before establishing a formal relationship
after the death of the eighty-three-year-old Ayatollah
however, there appeared to be no way to take advantage of this opportunity
because Congress had declared Iran a "State Sponsor of Terrorism" barring any aid
Reagan Administration became focused on two international problems:

- how to sell and deliver arms to Iranian moderates,
- how to finance Nicaragua Contra's effort against the reigning Marxist Sandinista government
both activities had been outlawed by act of Congress

PRESIDENT RONALD REAGAN AUTHORIZES SUPPORT FOR NICARAGUA'S CONTRAS

President Reagan signed a Top Secret National Security Decision Directive (NSDD-17)
authorizing the Central Intelligence Agency (CIA) to recruit and support Contra rebels
in their fight against the Sandinista government of Nicaragua -- August 20, 1985
in defiance of Congress

TRIAL OF THE MEMBERS OF THE ORDER BEGINS⁷⁶²

Eleven defendants decided to plead guilty to all charges
several members of The Order agreed to testify as government witnesses
Trial of the remaining ten members of The Order began in Seattle's U.S. District Court
before Judge Walter T. McGovern -- September 9, 1985
two members of Order were missing from the Seattle trial
David Tate still on the run
Richard Scutari under arrest for assault and murder of a policeman in Missouri
This trial would last three months during which time 338 prosecution and defense witnesses testified
and approximately 1,500 exhibits were introduced

WASHINGTON EDUCATION ASSOCIATION AFFILIATE GOES ON STRIKE

Seattle Teachers Association (STA) composed of 3,700 teachers and staff members
refused to enter their classrooms without a new a district-wide professional agreement
Negotiation continued for twenty-five days

⁷⁶² Daryl C. McClary, HistoryLink.org, December 6, 2006.

43,500 students waited for the opening of school as teachers walked the picket line this was the largest teacher strike in the nation -- 1985
Settlement was reached between the Washington Education Association SEA affiliate and the Seattle School District -- September 28, 1985

WASHINGTON STATE CELEBRATES ITS FIRST WOMAN ASTRONAUT

(Bonnie Dunbar was born in Sunnyside and raised on a ranch in the Yakima Valley⁷⁶³
she graduated from Sunnyside High School [1967]
she received Bachelor of Science from the from the University of Washington [1971]
and Master of Science degrees in ceramic engineering from the UW [1975]
she earned her doctorate in Mechanical/Biomedical Engineering
from the University of Houston [1983])
Astronaut Bonnie Dunbar completed her first mission in space
traveling aboard the shuttle *Challenger* for a week -- November 6-13,1985
Dr. Bonnie Dunbar returned to her hometown to a hero's welcome
Sunnyside threw her a parade and gave her the keys to the city
nearby Outlook Elementary School, where she attended classes, filled display cases
with space shuttle memorabilia
students there were following an exercise regimen based on what astronauts did
(Dr. Bonnie Dunbar will fly into space four more times before retiring from NASA [2005]
including the historic docking with the Russian space station *Mir* [summer of 1995]
her last flight [January 1998] also involved a docking with *Mir*
Dunbar was the payload commander on that mission overseeing the transfer
of more than 9,000 pounds of equipment, water and other supplies
from the space shuttle to the space station
altogether, Bonnie Dunbar spent more than fifty days in space,
she traveled more than twenty million miles and orbited earth nearly 800 times)

MICROSOFT RELEASES *WINDOWS* OPERATING SYSTEM

Microsoft's MS-DOS required "text commands" to carry out functions on IBM computers
Advances in computer science by Xerox and Apple technicians
led to the development of "graphical user interface" icons rather than relying on text commands
(GUI, is commonly pronounced "gooey")
GUI made computer operations a great deal simpler
GUIs could be used in computers, hand-held devices such as MP3 players,
portable media players, gaming devices, household appliances and office equipment
In response to GUI, Microsoft launched "Windows" -- November 20, 1985
Windows dominated the world personal computer market

NEIGHBORHOOD ACTIVISTS OCCUPY SEATTLE'S ABANDONED COLMAN SCHOOL⁷⁶⁴ Colman School, located in Rainier Valley, was built [in 1909]

⁷⁶³ Cassandra Tate, HistoryLink.org, June 2, 2011.

⁷⁶⁴ Jeff Stevens, *The Common School Occupation*, Radical Seattle Remembers.com, 2010.

for many years it was a symbol for the city's African-American community
it was the first school in Seattle attended by black students
many black teachers had dedicated themselves to students there
Colman School was scheduled for demolition due to the expansion of Interstate 90 [June 1985]
many local residents felt the building should be converted into a black history museum
discussions with the Seattle School District and city government went nowhere
About forty activists entered Colman School -- November 24, 1985
through a window that had been broken earlier by vandals
abandoned building had lights but no heat and no running water
school district administrators warned the group that their occupation was illegal
but city officials refused to arrest or evict the activists for fear of bad publicity
(Four of the activists, Charlie James, Earl Debnam, Michael Greenwood and Omari Tahri
continued to occupy the school building for eight years
this became the longest act of civil disobedience in U.S. history
occupation finally ended [1993]
when the Seattle city government agreed to fund the museum)
However, the dream of an African American Museum was soon deferred
when the activists found themselves at odds with a group of local black civic leaders
who wanted to use their clout in City Hall to carry the project forward
(It would be another ten years of lawsuits and bad blood before Seattle's Urban League
was able to buy the building from the Seattle School District for \$800,000
final result of the Colman School occupation, the Northwest African American Museum
opened [March 8, 2008]
this facility also featured thirty-six apartments dedicated as affordable housing that)

TRIAL OF THE MEMBERS OF THE ORDER COMES TO AN END⁷⁶⁵

Case against The Order went to the eight women and four men of the jury -- December 17, 1985
after deliberating for almost two weeks, the jury finally reached its verdict
all ten defendants were found guilty of racketeering and conspiracy
six defendants were also convicted of additional federal crimes
all were sentenced to terms ranging from forty to 100 years in federal prison

MISINFORMATION CAN BE DEADLY

The "*Duck Club*" was an anti-Communist and anti-Socialist organization founded by Homer Brand
whose membership was composed of radical right-wing members of the John Birch Society
and *Posse Comitatus* who were opposed to the federal government
Duck Club discussions centered a mix of tax resistance with terrorism that centered on:
•Jewish banking conspiracies;
•how paper money was not worth anything because this is no longer backed by gold;
•how left wing liberal lawyers were interfering with the "social order" of the nation
sometimes the *Duck Club* members discussed the John and Sally Goldmark family
focusing on the [1962] rightwing attack launched by Ashley Holden and Albert Canwell

⁷⁶⁵ Daryl C. McClary, HistoryLink.org, December 6, 2006.

that unseated State Representative John Goldmark
Homer Brand told the members of the *Duck Club* that Goldmark
was the “regional director” of the Communist Party
he mistakenly informed his followers the Goldmarks lived in Seattle
David Lewis Rice was a follower of the right-wing Christian Identity movement
he attended meetings of the *Duck Club* and read old news clips about John and Sally Goldmark

MURDER BY MISTAKE ROCKS SEATTLE

Charles Goldmark was a Seattle civil rights attorney
David L. Rice believed Charles Goldmark was a “top Communist”
Rice regarded himself a soldier in the war against Communism
for six months he contemplated killing Goldmark
he thought the attack would bring him recognition
for striking a blow against Communists
Rice finally decided to act because he needed cash and could rob the Seattle lawyer as well
David Rice went to the Goldmark’s Seattle Madrona neighborhood home -- Christmas Eve, 1985
ten-year-old Colin, the son of Charles and Annie Goldmark, opened the door
for the twenty-seven-year-old drifter who held a small black toy pistol and a white box
after being ordered to get his parents, Colin sought out his father
Rice was confused when Charles Goldmark arrived at the door
he had expected a much older man; not the thirty-five-year-old person standing in front of him
this could not be the Okanogan Valley Communist he had heard and read about
Charles and Colin moved into the house as twelve-year-old Derek ran from the room
Rice ordered the father to call for his older son -- then all four proceeded upstairs
Rice heard the shower running
Anne had finished preparing Christmas dinner and was waiting for their expected guests
Charles was instructed to call for his wife and they all gathered in the bedroom
Rice had intended to interrogate the Goldmarks about their Communist activities
but learning of expected guests for Christmas dinner meant there was not time for that
he handcuffed the family and one by one Rice chloroformed them
using the material in the white box
next he attacked them with the sharp end of a steam iron
bashing their heads against the floor
still not yet dead, he stabbed them in the head with small filleting knife
Annie and Colin were killed outright
Charles died at the hospital and Derek lingered for thirty-seven days before succumbing
David Rice walked down stairs and out of the door
Goldmark’s first guests arrived a few minutes later
Rice was quickly apprehended after he used Goldmark’s credit card
and left written confessions in public places
(During the trial of David Rice, Homer Brand, president of the *Duck Club*,
testified he and his club members were “rabid constitutionalists”
who never advocated violence against anyone
Brand acknowledged he might have discussed a family named Goldmark with Rice,

probably in the context of what he believed to be their Communist beliefs
but he could not say for sure
if he did talk about the Goldmarks, he said he meant the late John Goldmark
and his wife Sally -- Charles Goldmark's parents
David Lewis Rice was convicted of aggravated murder and was sentenced to death,
but the conviction was overturned because his defense attorney was found to be ineffective
he had allowed the police unlimited access to his client
and did not introduce evidence of Rice's psychotic state
Rice agreed to plead guilty in exchange for avoiding the death penalty [May 1998]
he was sentenced to life in prison without possibility of parole)

TWO UNIDENTIFIED VICTIMS OF THE GREEN RIVER KILLER ARE DISCOVERED

Jane Doe "B-16" was discovered when a car went down an embankment
near Auburn's Mountain View Cemetery
when cemetery employees went to investigate the abandoned automobile
they came across human bones -- December 31, 1985
Jane Doe "B-16" was an African American 5'1" to 5'4" tall
between the ages of twenty and twenty-five
Jane Doe "B-17" was discovered at the same location -- January 1, 1986
she was a Caucasian girl 4'8" to 5'4" tall and between the ages of fourteen and seventeen

EXECUTION DATE IS SET FOR TED BUNDY

Ted Bundy, the nation's most well-known serial killer, was scheduled for execution in Florida
for the Florida State University Chi Omega convictions [March 4, 1986]
U.S. Supreme Court issued a stay-of-execution stopping the process
while his new defense attorney, Polly Nelson, worked on his appeals
for his previous murder convictions -- early in 1986

FIRST PERSONAL COMPUTER VIRUS STRIKES

Two Pakistani brothers, Basit Farooq Alvi and Amjad Farooq Alvi
launched *Brain* -- January 19, 1986
They had written this computer program to protect their copywritten medical software from piracy
it was not supposed to be malicious -- it was supposed to target copyright infringers only
however, it spread far beyond its targeted victims
this was considered to be the first computer virus for MS-DOS

U.S. SPACE SHUTTLE *CHALLENGER* SUFFERES DISASTER

NASA's second Space Shuttle orbiter *Challenger* had replaced the original shuttle *Columbia*
Astronaut Francis Richard "Dick" Scobee had been born in Cle Elum and was raised in Auburn
he graduated from Auburn Senior High School [1957] and enlisted in the U.S. Air Force
where he trained as a reciprocating engine mechanic
he attended night school for two years to earn college credit
before he received in Bachelor of Science Degree in Aerospace Engineering
this was followed by a combat tour in Vietnam

he became a test pilot and logged more than 6,500 hours flying time in forty-five types of aircraft
Dick Scobee became an astronaut [January 1978]

he first flew into space as pilot on *NASA's* eleventh space shuttle mission [April 6-13, 1984]
Scobee was selected as Commander of the *Challenger's* fifth flight -- STS-51-L
aboard as part of the crew was teacher and mother of two Christa McAuliffe
who had been selected [1985] as the first American civilian to go into space
educators and students across the nation were filled with excitement as she was scheduled
to conduct experiments and teach two lessons from space

As students in classrooms across the nation watched the preparations
launch of the *Challenger* was delayed two hours -- January 28, 1986
finally, there was liftoff as *Challenger* roared into space
seventy-three seconds into the launch the Space Shuttle disintegrated
killing the crew of seven

(U.S. Navy divers found the Space Shuttle largely intact [March 9, 1986]
but the crew compartment had been heavily damaged
bodies of all seven astronauts were still inside)

(It was later determined that an O-ring sealing a joint had failed due to a number of factors
followed by an explosion of hydrogen and oxygen that tore apart the *Challenger*
this accident led to a two-and-a-half year grounding of the shuttle fleet)

GREEN RIVER TASK FORCE'S LACK OF SUCCESS FRUSTRATES THE PUBLIC

Residents of the Puget Sound area, especially in King and Pierce counties, were acutely aware
of the lack of results coming from the Green River Task Force -- February 1986
While several suspects were taken into custody, each proved to have no connection with the murders
public anger and fear reached a boiling point
members of the media referred to the Green River Task Force as a joke

MICROSOFT ENTERS THE NEW YORK STOCK EXCHANGE

Microsoft's initial price was set at \$21.00 a share -- March 13, 1986
Bill Gates and Paul Allen became instant millionaires
Microsoft quickly grew to become the largest software company in the world
it offered hundreds of products and employed nearly 18,000 people

PAUL ALLEN BEGINS THE PAUL G. ALLEN FAMILY FOUNDATION

Paul G. Allen Family Foundation (which has given donations of more than \$1.5 billion)
works to transform individual lives and strengthen communities by supporting
arts and culture, youth engagement, community development and social change,
and scientific and technological innovation

Paul G. Allen Family Foundation has dedicated its resources to:

- help low-income individuals and families achieve long-term economic stability and success;
- help Washington State's most vulnerable residents;
- partner with public schools and school districts in Washington and Oregon
to implement sustainable, research-based improvements
that lead to measurable improvements in student achievement;

- support libraries in Washington State and Multnomah County, Oregon to help them strengthen their connections with patrons;
 - initiate the Science and Technology Program to advance promising research and technological developments that have the potential to expand knowledge, improve health and protect the environment;
 - establish the “Spirit of 12 Partners Program” in collaboration with Seattle youth service groups, the Seattle Seahawks, and The Paul G. Allen Family Foundation together they help youth organizations raise money by soliciting donations for their programs at Seahawks home games;
 - Paul Allen’s Seattle Seahawks Charitable Foundation promotes the healthy social, emotional, intellectual and physical development of youth;
 - additional Allen charitable donations and foundations have funded hospitals, AIDS programs, cancer research and forest preservation
- (Paul Allen has become one of the most generous and best-known philanthropists in America he supports and advances world-class projects and high-impact initiatives that improve the way people live, learn, work and experience the world through arts, science, education, entertainment, sports, business and technology he has pledged to leave a majority of his estate to philanthropy)

LAST MEMBER OF THE ORDER IS CAPTURED⁷⁶⁶

Richard J. Scutari, the gang’s security chief, was arrested without incident although he was armed with a .45-caliber pistol -- March 19, 1986
 Scutari pled guilty in Seattle’s U.S. District Court to racketeering, conspiracy and participating in the \$3.6 million Brink’s robbery
 he was sentenced to sixty years in federal prison

TED BUNDY RECEIVES A NEW EXECUTION DATE

New date of July 2, 1986] was announced -- Ted Bundy confessed to a full range of crimes including his need to take full possession of his victims -- including their lives
 he provided details of what he did to some victims after their deaths -- April 1986

U.S. SENATOR JOHN KERRY CHAIRS AN INVESTIGATION INTO CONTRA ACTIVITIES

U.S. Senator John Kerry (D-Massachusetts) chaired a Senate Foreign Relations sub-Committee on Narcotics and International Terrorism which began looking into Nicaragua Contra involvement in cocaine and marijuana trafficking -- April 1986
 Kerry’s staff also began their own investigations regarding illegal activities on the part of National Security Council staff member Lieutenant-Colonel Oliver North

NUCLEAR REACTOR DISASTER OCCURS AT CHERNOBYL, USSR

Chernobyl Nuclear Power Plant in the USSR state of Ukraine exploded -- April 26, 1986
 explosion and fire released large quantities of radioactive contamination into the atmosphere which spread over much of Western USSR and Europe

⁷⁶⁶ Daryl C. McClary, HistoryLink.org, December 6, 2006.

(battle to contain the contamination and avert a greater catastrophe
ultimately involved over 500,000 workers and cost an estimated 18 billion rubles
which crippled the Soviet economy)

In the aftermath of the accident, 237 people suffered from acute radiation sickness
(thirty-one died within three months)

most of the victims were fire and rescue workers trying to bring the accident under control
they were not fully aware of how dangerous the exposure to radiation in the smoke was

After the disaster,

two square miles of pine forest directly downwind of the reactor

turned reddish-brown and died -- earning the name of the "Red Forest"

some animals in the worst-hit areas also died or stopped reproducing

most domestic animals were removed from the exclusion zone,

but horses left on an island in the Pripjat River four miles from the power plant

died when their thyroid glands were destroyed due to radiation poisoning

some cattle on the same island died and those that survived were stunted due to thyroid damage

(however, the next generation appeared to be normal)

(Later investigations showed while human factors contributed to conditions that led to the disaster
the chief reasons for the accident lay in reactor construction flaws

and the design of the control rods inserted into the reactor to slow down the reaction
that were four feet shorter than necessary)

McCAW COMMUNICATIONS, INC. ENTERS THE FIELD OF CELLULAR TELEPHONES

When American Telephone and Telegraph (AT&T), the nation's huge telephone monopoly,
was broken up by a federal court a new business opportunity was created -- 1986

Federal Communications Commission (FCC) held lotteries to sell local permits
to develop new telephone companies

Craig McCaw believed that customers would be attracted to any service

that allowed them to roam freely at a reasonable cost with a minimum of trouble

Gradually Craig McCaw entered into the new and untested field of cellular telephone service

he started bidding on cellular telephone licenses

and focused on building a nationwide network of cellular phones

to build up a war chest for the increasingly expensive battles for cellular territories,

McCaw brothers sold the family's cable television business to Cooke Cablevision
(now part of Comcast) -- 1986

Craig McCaw developed a reputation for being willing

to borrow gigantic sums to bid aggressively for new properties

over the next eight years, the company invested \$77 million

McCaw's reputation for making risks pay off was established

when he purchased MCI Communications' cellular and paging operations for \$122 million

AT&T, which expected to dominate the infant cell phone industry, was shocked

to find an unknown cable television operator from the Northwest

had already acquired the licenses AT&T wanted in strategically chosen markets

McCaw could now concentrate on building a national cellular phone network

McCaw Cellular Communications emerged as the cellular telephone industry leader

REAGAN ADMINISTRATION ATTEMPTS TO RESOLVE THE HEZBOLLAH HOSTAGE CRISIS

Reagan Administration officials developed a scheme to gain support from moderate groups in Iran who were opposed to both the Ayatollah Khomeini and the kidnapers of Americans
Israel would ship weapons to Iranian moderates to gain their support so they would act as intermarries in the release of Hezbollah's American hostages still held in Iran
U.S. would replace the weapons sold by Israel and provide them additional monetary benefits
Israeli government required that the plan be approved by top federal officials
arms-for-hostages proposal divided some members of the administration
from President Ronald Reagan who was in favor
with U.S. government approval of the sale gained, Israel agreed to sell weapons to Iran
(By the time the arms sales were discovered, more than 1,500 missiles had been shipped to Iran
three hostages had been released -- only to be replaced with three new hostages)

USS *MISSOURI* (BB-63) IS PUT BACK INTO SERVICE

USS *Missouri* was re-commissioned into service -- May 10, 1986
she began her new life with an around-the-world cruise
this was the first such cruise for a battleship since President Theodore Roosevelt
sent the "Great White Fleet" [December 16, 1907-February 22, 1909]
as a demonstration of growing American military power

GRUNGE MUSIC EXPLODES ON THE SCENE IN SEATTLE

Grunge, a form of alternative rock music, began in Washington State
it was inspired by hardcore punk, heavy metal and indie rock
it featured heavily distorted electric guitars with feedback effects
lyrics focused on teenage apathy and angst
many grunge musicians were noted for their unkempt appearances
and their rejection of the business of music
Early grunge movement centered on Seattle's independent record label *SubPop* --1986
Kurt Cobain formed *Nirvana* with Krist Novoselic in Aberdeen [1987]
Cobain and Novoselic met while attending Aberdeen High School
Nirvana released its first single, "Love Buzz" [1988] on the *SubPop* record label
a month later the band began recording its debut album, "Bleach"

STELLA NICKELL CHANGES THE PACKAGING OF AMERICAN GOODS⁷⁶⁷

Heavy-equipment operator Bruce Nickell, 52, collapsed in his Auburn home -- June 5, 1986
Stella Nickell called the emergency volunteer fire department on the Kent-Black Diamond Road
but her husband died at Harborview Hospital in Seattle
an autopsy declared the cause of death to be emphysema
Six days later bank manager Sue Snow, 40, collapsed in her bathroom at home
paramedics took her to Harborview Hospital by helicopter where she died -- June 11
pathologists smelled the telltale scent of bitter almonds during the autopsy

⁷⁶⁷ Kathrine Beck, HistoryLink.org, January 28, 2004.

they determined that cyanide poisoning had killed Sue Snow
Food and Drug Administration soon announced that Extra Strength Excedrin capsules
found at Snow's home medicine cabinet contained cyanide
worried Auburn residents threw away bottles of pain-killers
they feared might be laced with poison
Extra Strength Excedrin manufacturer Bristol-Myers initiated a nationwide recall of the capsules
and immediately stopped making the product
grocers and pharmacists searched for more tainted medicine
one bottle was found in a Kent supermarket and another in an Auburn pharmacy
lot number of the bottle recovered from Sue Snow's house was publicized
Stella Nickell called police to say she had two bottles of Excedrin in her home
with the same lot number as the bottle that killed Sue Snow
(Federal Anti-Tampering Act [1983] had been passed by Congress
in response to product-tampering in Chicago which killed seven people
tampering with food or food containers was against federal law)
FBI took jurisdiction of the case
they discovered that Bruce Nickell had a \$100,000 accidental death insurance policy
that listed Stella Nickell as the beneficiary
needing to prove her husband's death was accidental
Stella Nickell poisoned bottles of Excedrin and randomly placed them on store shelves
soon two more insurance policies on Bruce's life were discovered
Stella's payoff totaled \$175,000
FBI document examiners found that Bruce's signature on the applications was forged
Stella Nickell was indicted in federal court and was found guilty -- but not of murder [May 9, 1988]
rather she was convicted of product tampering and was sentenced to ninety years in prison
in the unlikely event she is paroled she could still face state murder charges
which have not been filed to date)
In response to product tampering, the Food and Drug Administration required products be packaged
with tamper-resistant technology such as blister-packs, bottle mouth seal covers,
shrink wrap bottle covers, visible seals that must be broken to open the bottle
and taped box ends

WASHINGTON STATE LEGISLATIVE BUILDING'S DOME IS RENOVATED⁷⁶⁸

Interior rotunda of the great dome was renovated to match the exterior of the building
plaster columns were colored to match the Alaska marble used elsewhere in the rotunda
metal that looked like gold was applied to the tops of the columns
one hundred forty-eight rosettes that decorated the dome were colored to give them definition
five-ton Tiffany chandelier that hangs from the ceiling received a good cleaning -- 1986

TED BUNDY'S EXECUTION IS DELAYED ONCE AGAIN

Federal Eleventh Circuit Court of Appeals stayed Bundy's execution
and sent the Chi Omega conviction back to court for review of specific technicalities

⁷⁶⁸ J. Kingston Pierce, HistoryLink.org, April 11, 2003.

such as Bundy's mental competency to stand trial -- July 2, 1986
New execution date [November 18, 1986] was set
this time for the murder of twelve-year-old Kimberly Ann Leach

U.S. FOREST SERVICE PROTECTS THE NORTHERN SPOTTED OWL⁷⁶⁹

Northern spotted owl was regarded as an indicator species
whose numbers reflected the health of other species and the forest ecosystem
Spotted owls need old-growth forests for their habitats
(that is, 200-year-old forests that had never been logged or burned)
scientists estimated that one pair of owls needed hundreds of acres of forest habitat to survive
Northern Spotted Owls faced extinction as its habitat was radically reduced
by logging in the mature portions of the National Forests necessary for the bird's survival
Forest Service developed an environmental impact statement and a forest management plan [1984]
that required forest managers to consider owl habitat in the sales of old growth timber
this placed in jeopardy the supply of logs for logging companies and lumber mills
reduced number of logs had an economic impact in the entire forest products industry
and in dozens of communities in the Northwest
U.S. Forest Service announced that timber sales would be limited -- August 7, 1986
both the forest products industry and environmentalists responded with outrage
industry complained the measure went too far and would cost thousands of jobs,
environmentalists claimed that not enough was being done to protect the species

TWO WASHINGTON SCHOOL DISTRICTS FACE TEACHER STRIKES

Steilacoom Education Association teachers struck for fifteen days
to achieve a professional agreement acceptable to them -- 1986
teachers and administrators reached an agreement without interference by the courts
North Kitsap School District saw its (NKEA) teachers struck for five days
this strike was settled without court action

GREEN RIVER TASK FORCE REMAINS UNSUCCESSFUL

Enough information on possible Green River Killer suspects had been assembled
to permit the task force to focus on one man -- a Riverton Heights fur trapper
after a search of the man's house generated an enormous amount of news-media attention,
task force members released the man and admitted he was not the killer
Popular support and political enthusiasm for the task force greatly waned -- September 1986
by this time at least \$10 million, including federal grant money, had been expended on the effort
dozen positions were slashed from the task force by Sheriff Vern Thomas
Captain James Pompey was assigned to lead the Green River Task Force
organizationally the task force returned to existing police structure
instead of operating independently as it had under Captain Frank Adamson

GREEN RIVER KILLER REMAINS ACTIVE

⁷⁶⁹ David Wilma, HistoryLink.org, February 28, 2003.

Patricia Michelle Barczak, age nineteen, had completed a course in culinary school
she loved puppies and kittens before she disappeared
along Pacific Highway South near Sea-Tac Airport -- October 17, 1986
(her skull found by a survey crew working along Highway 18 in Auburn [February 1993])

REAGAN ADMINISTRATION'S ARMS-FOR-HOSTAGES DEAL IS EXPOSED

Lebanese newspaper, *Ash-Shiraa*, printed an exposé on the secret activities -- November 3, 1986
United States had been selling weapons to Iran in secret to secure the release
of seven American hostages held by the pro-Iranian Hezbollah in Lebanon
at the same time high ranking members of the U.S. government were accused
of funneling money raised by the weapons sales to Iran to Nicaraguan Contra rebels
both activities were illegal

This story quickly proved to be correct when a CIA airlift of guns for Nicaragua was downed
one of the men aboard the aircraft, Eugene Hasenfus, was captured by Nicaraguan authorities
he initially alleged in the Nicaraguan press that two of his co-workers worked for the CIA
(he later changed his story)

REAGAN ADMINISTRATION ATTEMPTS TO CONTROL THE POLITICAL DAMAGE

Two facts soon came to light which shocked the people of the United States:

- while probing the question of the arms-for-hostages deal, Attorney General Edwin Meese discovered that only \$12 million of the \$30 million Iranians reportedly paid for weapons had reached federal government coffers;
- CIA had (allegedly with the knowledge of President Reagan) secretly arranged for Israel to transfer weapons to Iran in violation of the law that made dealings with a "State Sponsor of Terrorism" illegal;

President Reagan went on television -- November 1986
he vehemently denied that any illegal operation had occurred
(he retracted the statement a week later, but insisted the sale of weapons to Iran had not been an "arms-for-hostages" deal)

Then-unknown National Security Council staff member Lieutenant-Colonel Oliver North revealed to federal authorities the \$22 million discrepancy in funds
he had been diverting funds from the arms sales to Iran to the Contras
with the full knowledge of National Security adviser Admiral John Poindexter
and with the unspoken blessing, he assumed, of President Reagan
North noted the scheme had been planned by three members of the National Security Council
adviser Admiral John Poindexter, advisor Robert McFarlane
and staff member Lieutenant-Colonel Oliver North

LITTLE CHANGES AS A RESULT OF THE STATE ELECTIONS

In the only change in Washington State's Congressional delegation,
Republican U.S. Senator Slade Gorton was narrowly defeated
by Seattle Democrat and former Congressman Brock Adams -- November 4, 1986
Washington's legislature remained in Democratic hands
while Republicans gained two State Senate seats, they remained in the minority by one seat

twenty-five Democrats to twenty-four Republicans
in the State House of Representatives Democrats increased their majority by eight seats
as they held a comfortable sixty-one to thirty-one vote edge

COLUMBIA RIVER GORGE SCENIC AREAS ARE PROTECTED BY CONGRESS

Columbia River Gorge supported human habitation for over 13,000 years
evidence of Folsom and Marmes people, who crossed the Bering Sea land bridge from Asia,
were found in archaeological digs
excavations near Celilo Falls, a few miles east of The Dalles, showed humans
had occupied this salmon-fishing site for more than 10,000 years
For thousands of years the Columbia Gorge provided the only navigable route through the Cascades
as it linked the Columbia River Plateau and the Pacific Ocean
American Indians traveled through the Gorge to trade at Celilo Falls
American explorers Lewis and Clark used with route to reach the Pacific Ocean [1805]
early settlers established steamboat lines and railroads through the gorge (beginning in [1850])
Union Pacific Railroad ran freights along the Oregon bank of the river
Amtrak's *Pioneer* passenger train also used the Union Pacific tracks [until 1997]
rival Burlington Northern Santa Fe Railway ran freight along the Washington side
Amtrak's passenger train, *Empire Builder*, used this route through the gorge
Columbia Gorge National Scenic Area is a canyon that stretches for over eighty miles
as the Columbia River crashes through the Cascade Mountains
canyon walls up to 4,000 feet high extends roughly from the confluence of the Columbia
with Oregon's Deschutes River down to Reed Island
(outside of today's Troutdale, Oregon)
Columbia Gorge National Scenic Area was placed under the authority
of the United States Forest Service -- November 1986

AGAIN TED BUNDY'S EXECUTION IS DELAYED

Eleventh Circuit Court issued a stay of execution -- November 17, 1986
(it was not until [mid-1988] that the Eleventh Circuit ruled against Ted Bundy)

VACANT SEAT IN THE STATE SENATE IS FILLED

Eighteenth Legislative District State Senator Alan Thompson, Democrat, resigned
to become Chief Clerk of the State House of Representatives -- November 19, 1986
Democrat Joe Tanner was appointed to fill the unexpired term for Cowlitz and Clark counties
continuing Democratic control of the State Senate by one vote

IRAN-CONTRA AFFAIR BECOMES PUBLIC

U.S. Attorney General Edwin Meese announced that profits from covert weapons sales to Iran
were illegally diverted to the anti-Communist Contra rebels in Nicaragua in violation of U.S. law
National Security Council staff member Oliver North, mastermind of the Iran-Contra operation,
was fired by President Reagan -- November 25, 1986
Oliver North's boss, National Security Advisor John Poindexter, resigned the same day

IRAN-CONTRA SCANDAL IS INVESTIGATED

President Reagan appointed former-U.S. Senator Texas Republican John Tower to head the Tower Commission composed of former Secretary of State Democrat Edmund Muskie and former National Security Advisor Republican Brent Scowcroft -- November 26, 1986 to investigate the arms-for-hostages sale of weapons to Iran and the diversion of the money to Nicaraguan Contras
Reagan denied any involvement in the scandal
Tower Commission focused on the role of the National Security Council in the Iran-Contra affair

INDIAN-STATE COOPERATION TAKES ANOTHER STEP FORWARD

Following the implementation of the Puget Sound Salmon Management Plan [1985], the Timber Fish Wildlife Agreement further developed cooperation between Washington State Native American tribes and non-Indians -- 1986 this time including environmental groups and logging companies
Timber Fish Wildlife Agreement set the ground rules for cooperative decision making it also addressed the shared goal of “economic stability and regulatory certainty” to encourage cooperative efforts for habitat protection and sustainable forest management⁷⁷⁰

PRESIDENT RONALD REAGAN TESTIFIES BEFORE THE TOWER COMMISSION

President Reagan’s Chief of Staff, Donald Regan, had previously testified before the committee he stated the U.S. government had not authorized the sale of weapons-for-hostages to Iran
However, President Reagan shocked Regan and White House counsel by admitting he had indeed approved both the sale of weapons by Israel to Iran and had agreed to replace the weapons Israel had sold -- December 2, 1986

LARRY WALSH IS APPOINTED INDEPENDENT COUNSEL TO INVESTIGATE IRAN-CONTRA

Republican Lawrence E. Walsh, attorney, former judge and former U.S. Deputy Attorney General, was appointed Independent Counsel to investigate the Iran-Contra affair by the United States Court of Appeals for the District of Columbia -- December 19, 1986
Two major difficulties confronted Walsh’s investigation:
•passage of time since the Iran-Contra events had occurred had dimmed memories,
•lack of witness recollections of specific details became apparent
Office of Independent Council carefully searched for previously unproduced documents such as notes
most of the significant Iran-Contra witnesses were reluctant to provide truthful information unless they were confronted with difficult-to-refute documentary evidence

KING COUNTY’S NEW-ELECTED EXECUTIVE TIM HILL TAKES OFFICE

Tim Hill was sworn into the county executive’s office -- January 1, 1987
constituents wanted improved police services in the unincorporated areas of the county
County Executive Tim Hill openly questioned whether the use of so many police in the unproductive search for the Green River Killer was the best use of scarce resources for a case that might never be solved

⁷⁷⁰ Jennifer Ott, HistoryLink.org, March 28, 2011.

Size of the task force was reduced by forty percent
when Task Force leader Captain Frank Adamson objected to the cuts to the task force
he was promoted and placed in charge of a precinct
Captain Adamson's replacement was Captain James Pompey
Pompey immediately began to reorganize the team and the data related to the investigation

LAST OF THE EIGHT HANFORD ATOMIC REACTORS IS SHUT DOWN

Most of the nuclear reactors had been shut down between [1964] and January 1987
they had functioned for an average of twenty-two years each before they were entombed
to allow the radioactive materials to decay
surrounding structures had been removed and buried
“B” Reactor has not been cocooned and was accessible to the public for occasional guided tours
it was listed on the National Register of Historic Places [1992]
some historians advocated converting it into a museum
(“B” Reactor was designated a National Historic Landmark
by the National Park Service [August 19, 2008])
Hanford's “N” Reactor, the last in operation, was a dual reactor built in [1963]
it produced energy for the Washington Public Power Supply System (WPPSS) electrical grid
and was a plutonium production reactor for nuclear weapons
its advanced technology was far superior to that of the first eight nuclear reactors at Hanford
“N” Reactor's state-of-the-art cooling system required significantly less Columbia River water
if there was ever a loss of cooling water,
“N” Reactor was built with an automatic safety system
that would shut down the reactor on its own without any operator action required
“N” Reactor was shut down for routine maintenance, refueling
and safety upgrades -- January 1987
it was never re-started

LEADERSHIP OF THE GREEN RIVER TASK FORCES CHANGES HANDS AGAIN

Green River Killer had been active from at least [July 1982] with no viable suspect identified
nearly all of the victims were runaways, prostitutes or women living on the streets
it was believed that at least seven bodies had not been found
but the remains four victims, yet to be identified, were being held -- early 1987
Investigators turned their focus from a suspect's possible guilt to the suspect's probable innocence
this strategy allowed investigators to quickly eliminate people under suspicion who had alibis
and instead concentrate on more probable suspects
suspects that remained under suspicion were prioritized according to their threat⁷⁷¹
category “A” was composed of those who were most closely linked to victims,
or fit the profile of the killer and his movements
categories “B” or “C” were composed of suspects less closely linked with the crimes
before they were eventually eliminated

⁷⁷¹ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

GREEN RIVER TASK FORCE RE-INTERVIEWS AN OLD SUSPECT

Gary Ridgway had been contacted by police several times in the past
he had been accused of choking a prostitute near the Sea-Tac International Airport [1980]
police had stopped and questioned him while he was in his truck with a prostitute [1982]
she later became one of the women on the Green River Killer's suspected murder list
police approached the man again [1983] in connection with the kidnapping of Marie Malvar
whose boyfriend had followed a truck to Ridgway's house
after he recognized it as the one in which he had last seen his girlfriend
Ridgway also had been picked up
for attempting to solicit an undercover police officer [May 1984]
Green River detective Matt Haney became increasingly suspicious of Gary Ridgway -- early 1987
Haney learned from Ridgway's ex-wife that he often frequented the dumpsites
where many of the Green River Killer's victim's bodies had been discovered
Unable to eliminate Gary Ridgway as suspect, he moved up to the "A" list
he was placed under police surveillance
investigators scrutinized his work record and determined that he was never at work
on the days that many of the victims had been reported as missing
several prostitutes claimed to have seen a man matching the suspect's description
regularly cruising the Pacific Highway South strip between [1982-1983]
Ridgway said he regularly drove that route on his way to work as a truck painter⁷⁷²

STATE LEGISLATURE AGAIN ADDRESSES THE SCHOOL FUNDING ISSUE

Washington's legislators passed *Schools for the 21st Century* which allowed school districts
to add ten additional school days to the school calendar for employees to plan and implement
school improvement programs including teacher and staff training -- 1987
School districts could ask tax-payers for an excess levy limited to up to ten percent of their budget
to use for local programs beyond basic education supported by the community
to increase the maximum levy amount that could be requested by each school district,
legislators added federal funding to the amount as the basis to establish the levy amount
typically about ten percent of a school district's budget
this raised the amount that could be requested from ten percent of the district's budget
to about twenty percent
To address widespread concerns that varying school taxing rates
would lead to a system of rich districts that passed their levies and poor districts that could not
legislators also passed a levy equalization bill
known as the *Local Effort Assistance Program (LEAP)* -- 1987
LEAP was to assist districts that required high tax rates to provide adequate funding
because the property tax values within the school districts were assessed at a lower rate
(creating "property poor" school districts because they lacked high tax rate industries)
however, to qualify for the *LEAP* money these "property poor" districts were required

⁷⁷² Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

to pass their local Maintenance & Operation Levy
thus districts that suffered a “double M&O levy failure” not only lost their levy funds
but they also lost the *LEAP* equalization funds as well

ANOTHER VICTIM OF THE GREEN RIVER KILLER IS DISCOVERED

Twenty-one-year-old Roberta Joseph Hayes was last seen alive
leaving a Portland, Oregon jail -- February 7, 1987
(Roberta 's remains were found four years later by a Washington Parks employee
along Highway 410 east of Enumclaw [September 11, 1991]
when the location was accurately identified by the Green River Killer)

CIA ADMITS IRANIAN FUNDS WERE DIVERTED TO NICARAGUAN CONTRAS

Director of the Central Intelligence Agency (CIA) William J. Casey,
admitted to *Washington Post* reporter Bob Woodward that he was aware
of the diversion of Iranian arms-for-hostages funds to the Contras
this admission occurred while Casey was hospitalized for a stroke -- February 1987
(William Casey died [May 6, 1987])

HUSKY STADIUM COLLAPSES⁷⁷³

Husky Stadium was undergoing renovation to add 13,700 seats at a cost of \$12.9 million
while the stadium was under construction, nine guylines (wire cables) were used
to support the structure
two of the nine new sections were close to completion when one of the forty men on the project
noticed a 28-inch diameter tube that supported the overhanging roof had buckled
all of the crew was immediately ordered off the job -- 9:00 a.m. February 25, 1987
Washington Athletic Director Mike Lude had played a major role in selling and funding the project
he was conducting a staff meeting in his office when they were distracted
by the 140-high bleachers falling to the ground
to become a gigantic 250-ton mass of twisted metal
preliminary damage estimates ranged from \$500,000 to \$1,000,000
All the workers had gotten away in time
only a cat, the ironworkers' mascot, was missing
(but a few hours later even the cat was found in the rubble alive and apparently unharmed)
Collapse of Husky Stadium was a setback
(nevertheless, the stadium addition was completed in time for the football team's first home game
as the Huskies defeated Stanford 31-21 [September 5, 1987])

TOWER COMMISSION DELIVERS ITS REPORT TO THE PRESIDENT

Tower Commission, chaired by former-U.S. Senator Texas Republican John Tower,
had interviewed eighty witnesses to the Iran-Contra scheme
two hundred page report was issued -- February 26, 1987

⁷⁷³ Greg Lange, HistoryLink.org, January 18, 2001.

it criticized the actions of Secretary of Defense Caspar Weinberger,
National Security Advisor (NSA) John Poindexter, NSA advisor Robert McFarlane,
National Security Council member Lieutenant-Colonel Oliver North and others
it was determined that President Reagan did not have knowledge
of the full extent of the Iran-Contra scheme
especially the diversion of Iranian funds for hostages to the Nicaraguan Contras
however, it was noted, the President should have had better control
of the National Security Council staff
President Reagan also was criticized in the report
for not properly supervising his subordinates or being aware of their actions

PRESIDENT RONALD REAGAN EXPRESSES REGRET OVER THE IRAN-CONTRA SCANDAL

President Reagan broadcast his regrets over national television -- March 4, 1987

he explained why he had not spoken to the American public for three months
regarding the scandal: **“The reason I haven't spoken to you before now is this: You deserve the truth. And as frustrating as the waiting has been, I felt it was improper to come to you with sketchy reports, or possibly even erroneous statements, which would then have to be corrected, creating even more doubt and confusion. There's been enough of that.”**

he then took full responsibility for the acts committed: **“First, let me say I take full responsibility for my own actions and for those of my administration. As angry as I may be about activities undertaken without my knowledge, I am still accountable for those activities. As disappointed as I may be in some who served me, I'm still the one who must answer to the American people for this behavior.”**

finally, the president stated that his previous assertions the U.S. did not trade arms for hostages were incorrect: **“A few months ago I told the American people I did not trade arms for hostages. My heart and my best intentions still tell me that's true, but the facts and the evidence tell me it is not. As the Tower board reported, what began as a strategic opening to Iran deteriorated, in its implementation, into trading arms for hostages. This runs counter to my own beliefs, to administration policy, and to the original strategy we had in mind.”⁷⁷⁴**

President Reagan's message resonated with viewers and his popularity rebounded across the nation

U.S. AIR FORCE KC-135 STRATOTANKER CRASHES AT FAIRCHILD AFB, SPOKANE⁷⁷⁵

Thunderhawks was a new aerobatics team created by the Strategic Air Command (SAC)
in an attempt to match the Air Force *Thunderbirds* and the *Navy Blue Angels* aerobatics teams
Fairchild Air Force Base near Spokane was selected as the training area for the new team
B-52 Stratofortress and a KC-135 Stratotanker took off from Fairchild -- Friday March 13, 1987
to practice aerial maneuvers for Fairchild's annual Aerospace Day [Sunday, May 17]
this fifteen minute air show was to be the debut of the new Thunderhawks
they were to demonstrate the capabilities of SAC's large aircraft
through a series of exciting routines that included a low-level refueling simulation,
high-bank turns and flybys down the runway

⁷⁷⁴ “Speech about Iran Contra” PBS. March 4, 1987.

⁷⁷⁵ Daryl C. McClary, HistoryLink.org, December 20, 2008.

KC-135 had just taken off from runway 23 in tandem with the B-52

KC-135 was executing a steep left-hand turn when it suddenly rolled from an intended 45-degree bank to almost 90 degrees -- two left engines stalled crew managed to level the aircraft, but it was flying too low and slow to recover plane crashed landed in an open area north of the flightline, behind three large hangars, narrowly missing the base's bombing and refueling squadron offices it skidded through a security fence, across an access road, and killed an off-duty sergeant aircraft traveled for another 200 yards, then hit an unmanned weather radar tower and burst into flames

Firefighters from Fairchild's crash teams were quickly on scene

they were assisted by a crash truck from Spokane International Airport four miles to the east and an entire engine company from the Spokane Fire Department it took more than three hours to extinguish the flames and hot-spots from the crash

Searchers found the bodies of five crewmen in the forward section of the blackened fuselage body of the sixth crew member was finally found tangled inside the cockpit late Friday night this discovery was not immediate because the recovery teams

were careful to safeguard the crew compartment for the Air Force accident investigators

(According to an investigation by the Air Force Accident Investigation Board

during the demonstration the KC-135 tanker with its refueling boom extended was to execute a pass at approximately 500 feet while the B-52 bomber was to follow flying lower at 200 feet

just after takeoff the KC-135 hit the wake of the B-52 and then began its 90-degree decline the aircraft was flying too low and too slow to enable a recovery)

Strategic Air Command's Thunderhawks program was disbanded at the insistence of Congress

GREEN RIVER TASK FORCES SERVES A SEARCH WARRANT

Green River Task Force had developed a long suspect list but no conclusive evidence implicated any of the men

Gary Ridgway had been identified by two witnesses who said he was seen with two of the victims task force members executed a search warrant on his home -- April 8, 1987

it was tightly packed with objects he and his fiancé had collected from dumpster diving, attending swap meets and from dump sites

where some of the Green River victims had been found⁷⁷⁶

Ridgway was taken into police custody where he passed a polygraph test

he was then asked for a saliva sample which he provided

however, DNA technology was only in its infancy

There was insufficient evidence to arrest him and Gary Ridgway was released from police custody

CONGRESS BEGINS ITS PUBLIC HEARINGS ON THE IRAN-CONTRA AFFAIR

Independent Counsel Lawrence E. Walsh conducted an investigation of Iran-Contra for five years

Walsh specifically implicated Vice President George H.W. Bush in the Iran-Contra scandal

Vice President Bush denied all knowledge of the Iran-Contra affair

⁷⁷⁶ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

saying he was “out of the loop” -- May 5, 1987
(Vice President Bush steadfastly refused to turn over his diary to investigators
this later revealed he was **“one of the few people that know fully the details”**⁷⁷⁷
even so, he repeatedly refused to discuss the incident -
he was elected President [November 1988])

ANOTHER SET BACK FOR THE GREEN RIVER TASK FORCE

Captain James Pompey died from a massive heart attack in a scuba diving accident -- May 11, 1987]
when he apparently could not get air from his tank and surfaced too quickly
After so much death in the region the public’s nerves had become raw⁷⁷⁸
this tragic event was picked up by the media and sensationalized
it was suggested the Green River Killer was actually a police officer who murdered Pompey
although there was absolutely no substantiating evidence to support the theory
one newspaper even called for an official investigation into the death of Captain Pompey
(Over the next three years, the number of officers in the task force continued to dwindle
even as it focused on a number of potentially viable suspects)

THREE MEMBERS OF ONE FAMILY ARE KILLED IN A MID-AIR COLLISION⁷⁷⁹

Two small airplanes carrying six members of the Sager family took off from Pru Field near Ritzville
for a holiday near Hayden Lake, Idaho -- May 24, 1987
three of the family flew in a Cessna 172 while three others flew in a Piper Cherokee P-28
Both airplanes flew side-by-side before the Cessna crossed in front of the Piper Cherokee
when the planes collided, the Cessna went into a nose-dive
and crashed fifteen miles east of Ritzville killing everyone on board
Piper Cherokee managed to return safely to Pru Field
(Nearly the entire population of Ritzville turned out for the memorial service for Kenneth Sager, 41,
his wife Gloria, 40, and their daughter Karla, 15,
held at the Emmanuel Lutheran Church in Ritzville four days later)

SECOND VIETNAM MEMORIAL IS DEDICATED IN OLYMPIA

Vietnam veterans had not been pleased with the original Vietnam Veterans Memorial
they felt the names of their fallen comrades etched in marble and surrounded by a scroll
“entombed” their memory
Washington State Vietnam Veterans Memorial Committee was organized to fund a second memorial
fundraising work was such a success that the \$178,000 project was funded privately
1,466 individuals, groups and corporations donated money -- most in amounts less than \$25
memorial committee returned the money that had been donated by the state government
Dedicated to 1,117 dead or missing Washington State Vietnam War veterans,
Artist Kris Snider’s memorial was unveiled on the east lawn of the Insurance Building

⁷⁷⁷ The National Security Archive. www.gwu.edu/~nsarchiv/NSAEBB/NSAEBB210/index.htm

⁷⁷⁸ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

⁷⁷⁹ Jim Kershner, HistoryLink.org, April 14, 2010.

on the west campus -- Memorial Day, May 25, 1987
site selected for the memorial was a grassy knoll under a large shade tree
an area chosen specifically because of the quiet solitude it provided
green granite wall stretches partially around a forty-five foot base
this wall represents the circle of life
the top of the wall rises and falls in a rolling course
symbolizing the highs and lows of that occur in our existence
granite wall runs unimpaired except for a large crack
in the shape of North and South Vietnam
this cut symbolizes the break in the circle of life caused by the war

Inscribed in the granite is: "Washington State Vietnam Veterans Memorial," **"To all my brothers and sisters who made it back, but never made it home. In memory of those who have died from physical and emotional wounds received while serving in the Vietnam War. We honor and recognize their pain and suffering, but above all we respect the courage of these Washington State residents. When our country called, you were there. We have not forgotten, you are not alone. You Now Rest in Glory."**

Names carved into the wall are positioned in such a way that they can be touched and read by all including children and those in wheelchairs
these names are listed chronologically by date of death from [July 1963] to [May 1975]
a small cross is engraved next to the names of those who remain missing in action
there are small holes next to all the names so that mementos may be left in remembrance
all items left are collected and placed in the state archives

PREHISTORIC COLVIS CULTURE ARTIFACTS ARE DISCOVERED IN EAST WENATCHEE⁷⁸⁰

Clovis culture referred to a small town in north central New Mexico near the Texas panhandle where many prehistoric artifact discoveries were made
prehistoric peoples across the Western portion of North America not covered by ice age glaciers made stone spear points known as Clovis points about 11,500 years ago
(no Clovis material had been recovered from the Marmes Rockshelter site [1962-1969])
While installing an irrigation sprinkler pipe through an apple orchard near the Columbia River two orchard workers, Moises Aguirre and Mark Mickles, uncovered a cache of 11,000- to 12,000-year-old prehistoric tools known as Clovis points
buried about twenty inches below the surface -- May 27, 1987
Mack and Susan Richey and Rick and Joanne Roberts jointly owned the East Wenatchee site on Grant Road in East Wenatchee
(This discovery did not receive any publicity initially, but by [1988] it had developed word-of-mouth interest)

BOEING 737 BECOMES THE MOST ORDERED AIRPLANE IN HISTORY

Boeing's 737 debuted [1967] -- it was smaller than the 707 and 727
it faced heavy competition from the Douglas DC-9 and the British Aircraft Corporation BAC-111
however, the 737 was quieter and vibrated less than other planes

⁷⁸⁰ Paula Becker, HistoryLink.org, October 3, 2006.

and could be flown with just a two-member flight crew
Orders for the Boeing 737 surpassed the 727 -- June 12, 1987
making it the most ordered commercial plane in history

TEACHERS IN TWO WASHINGTON STATE SCHOOL DISTRICTS GO ON STRIKE

Washington Education Association (WEA) led two teacher strikes
Edmonds teachers (EEA) struck for twenty-nine days -- 1987
settlement was reached on the day set for a court injunction hearing
Renton teachers (REA) struck for eight days to achieve an acceptable contract -- 1987
court involvement was not necessary to reach a successful settlement

GORDON HIRABAYASHI SUED THE U.S. OVER LOSS OF HIS CONSTITUTIONAL RIGHTS

(When Gordon Hirabayashi was a twenty-three University of Washington student,
he was ordered into a Japanese internment camp
he refused to enter the camp and was convicted of violating federal orders
his conviction was upheld by U.S. Supreme Court [June 21, 1943]
Hirabayashi spend five months in jail and three months in a prison camp
he never quit fighting the loss of his civil rights and to clear his name
following World War II and his time in prison,
Gordon Hirabayashi obtained his doctoral degree in sociology and became a professor)
More than forty years later Gordon Hirabayashi returned to court seeking redress
he charged the federal government with “government misconduct” as federal prosecutors
had intentionally concealed evidence that would have belied charges of disloyalty
made against Japanese Americans in the [1940s]
U.S Ninth Circuit Court of Appeals San Francisco ruled unanimously
that Gordon Hirabayashi had been wrongly convicted -- September 24, 1987
(Gordon Hirabayashi passed away ([January 2, 2012]
President Barack Obama issued Hirabayashi the Medal of Freedom [June 5, 2012])
Medal of Freedom is the nation’s highest civilian honor
it is presented to individuals who have made especially meritorious contributions
to the security or national interests of the United States, to world peace,
or to cultural or other significant public or private endeavors

BLACK MONDAY STRIKES THE NEW YORK STOCK EXCHANGE

(United States economy began shifting from a rapidly growing recovery
to a slower-growing expansion
which resulted in a “soft landing” as the economy slowed and inflation dropped [1986]
however, the stock market advanced significantly, with the Dow peaking at 2,722 [August 1987]
forty-four percent over the previous year’s closing of 1,895 points)
As computer technology became more advanced, the use of “program trading”
grew dramatically within Wall Street firms
in “program trading” computers performed rapid stock executions based on external factors
such as the price of related securities
Dow Jones Industrial Average dropped 95.46 points (a then record) to 2412.70 October 14, 1987

then fell another fifty-eight points the next day
When financial markets in London were unexpectedly closed due to the Great Storm of 1987,
the Dow Jones Industrial Average fell down another 108.35 points
to close at 2,246.74 on record volume -- Friday, October 16
that weekend many investors worried over their stock investments
Black Monday crash began in Hong Kong -- Monday October 19, 1987
this crash spread west to Europe where huge amounts of value was lost in a very short time
United States was hit after other markets had already declined by a significant margin
Dow Jones Industrial Average dropped by 508 points to 1,738.74 -- a 22.61% loss in one day
computers responded to falling prices with program selling
when stock brokers stopped selling in spite of the demands of computer program trading
prices began to rise and disaster was narrowly averted

STATE ELECTION EFFECTS ONLY THE STATE LEGISLATURE

Washington's Congressional delegation remained unchanged
as five Democrat and three Republican congressmen were all returned to office
In a State Senate run-off election -- November 3, 1987
Republican Linda A. Smith defeated Democrat Joe Tanner
to represent the Eighteenth Legislative District in Cowlitz and Clark counties
Republicans once again had a 25-to-24 edge in the State Senate
State Senator Jeannette Hayner returned to the Majority Leader position
she led the Senate through the 1987-[1992] sessions⁷⁸¹
(during those five years, including two more elections,
Republicans held the majority by only a single seat
it was a testament to her leadership that she kept twenty-five different caucus members
with often-divergent views tightly disciplined and united
Republicans could to stand up to the Democratic controlled State House of Representatives
and popular Democratic Governor Booth Gardner

WORLD WAR II FORT LAWTON RIOT AND MURDER CASE IS REVISITED

KING-TV reporter Jack Hamann found Italian POW Guglielmo Olivotto's headstone
in the Fort Lawton cemetery [1986]
Olivotto had been found hanged during the [May 17, 1944] Fort Lawton riot
forty-three African American defendants faced life in prison if convicted
in the largest and longest Army court-martial of World War II
two black soldiers, Luther Larkin and William Jones, were convicted of the lynching
during a riot involving U.S. soldiers and Italian prisoners of war
Jack Hamann and his wife Leslie, curious about the incident, began a four-year effort
to locate primary sources including documents and witnesses related to the case
during several weeks of research at the National Archives in College Park, Maryland
they came across General Elliot Cooke's newly-declassified report of the incident
which indicated there were very serious shortcomings in the criminal investigation

⁷⁸¹ Kit Oldham, HistoryLink.org, July 20, 2009.

After months of research Hamann produced an Emmy Award winning one-hour special program for Seattle's NBC affiliate, KING-TV --1987
which accepted the then-conventional view that Olivotto had been lynched by black soldiers during the program several questions were raised about the prosecution of the case but no substantial evidence to refute prosecutor Leon Jaworski's case surfaced (Jack Hamann continued his investigation -- the more he probed the more injustice he found)

WORLD WAR II FORT LAWTON RIOT AND MURDER CASE IS RESOLVED

Jack Hamman published *On American Soil How Justice Became a Casualty of WWII* [2005]
this was an account of his findings regarding the trial of forty-three African American defendants found guilty in the rioting and the lynching of Italian prisoner of war Guglielmo Olivotto Hammon proved that the trial of the accused soldiers was unfair
As a result of *On American Soil*, Congress was asked to reinvestigate the trial by four of the soldiers Booker W. Townsell of Wisconsin, Luther L. Larkin of Arkansas, William G. Jones of Illinois and Samuel Snow of Florida

only Snow was still alive as the others were represented by their families
Washington Congressman Jim McDermott and two other congressmen became involved after a year of deliberation, the Army's Board of Corrections of Military Records ruled that the black soldiers court-martialed in the death of Olivotto were unfairly denied access to their attorneys and to investigative records they should have their convictions overturned [October 2007]

Congressman McDermott noted: **"Rarely has a book inspired legislation in the U.S. Congress, but that is exactly what happened with Jack Hamann's *On American Soil*. I had barely finished reading it before I instructed my staff to introduce legislation directing the Secretary of the Army to re-open the cases of the African American soldiers, find the truth, and correct any injustice found. This is an important book, and I hope many more people have the opportunity to read it."**

-Congressman Jim McDermott

Eventually the convictions of twenty-eight of the black veterans were overturned an apology and honorable discharge was given to the falsely accused black soldiers at a ceremony held at Seattle's Discovery Park near the former Fort Lawton chapel [July 26, 2008]
Samuel Snow, the last of accused black soldiers, died of congestive heart failure at Virginia Mason hospital [July 27, 2008]
thirteen hours after receiving an apology and his honorable discharge from the military)

BOEING DESIGNS AND BUILDS THE INTERNATIONAL SPACE STATION

NASA selected Boeing to be the prime contractor for design and construction of the science and living modules for the International Space Station -- December 1, 1987⁷⁸²
(Boeing later would be designated overall prime contractor for the largest manned space project since the first Apollo moon landing effort [1969])
(Soviet Union began assembly of its own station, Mir, two years later [1989]
as the competition became international and a focus of American national pride
NASA's original budget of \$11 billion for the American space station quickly soared)

⁷⁸² Walt Crowley, HistoryLink.org, February 8, 2001.

CANADA-UNITED STATES FREE TRADE (CFTA) AGREEMENT IS SIGNED

Efforts to develop a U.S.-Canada Free Trade Agreement (CFTA) were very controversial and divisive members of Canada's Conservative Political Party were in support of an agreement while the Liberal Party and New Democrat Party loudly opposed the agreement they said the agreement would erode Canadian sovereignty
Canada would effectively become the "51st state" of the United States they were also concerned about how Canada's social programs would be impacted in the United States the Free Trade Agreement faced much less opposition
President Ronald Reagan put the proposed treaty on a "fast-track" which meant Congress had only a limited number of days to debate it and then had to either accept it or reject it in its entirety
Canada-U.S. Free Trade Agreement was signed by the leaders of both countries -- January 2, 1988 this agreement phased out a wide range of trade restrictions in stages over a ten year period and resulted in a great increase in cross-border trade
U.S. Polls showed that up to 40% of Americans were unaware that the agreement had been signed

SEATTLE HIP-HOP STAR, *SIR MIX-A-LOT*, EXPLODES ON THE MUSIC SCENE⁷⁸³

Sir Mix-A-Lot and KKKFX ("KFOX") *Fresh Tracks* radio DJ *Nasty Nes* Rodriguez joined local businessman and former KYAC DJ Ed Locke to form the "Nastymix" label [1985] "Nastymix" released *Sir-Mix-A-Lot's* single record, "Posse On Broadway" -- 1988 which related the humorous tale of Mix and his crew's antics while cruising Seattle's streets this became a solid breakout hit, and "**put Seattle on the rap map**" (*The Seattle Times*)

HELEN THAYER EXPLORES THE MAGNETIC NORTH POLE⁷⁸⁴

(Explorer and educator Helen Thayer first decided to undertake an expedition to the magnetic North Pole [1986]
her budget, roughly \$10,000, was scraped together by Thayer and her husband, Bill because no corporation was willing to sponsor a fifty-year-old woman traveling alone to some of the most remote regions in the world
Helen Thayer and her husband lived in the foothills of the western Cascades near Snohomish she spent two years planning and tirelessly training for her lonely expedition ten-mile runs in the mountains were supplemented by weight training, kayaking, and hiking these efforts acclimated her to the physical trials of the trip
Helen Thayer arrived at Resolute Bay, Canada where she continued her training for several days route she would be traveling was, by all accounts, thick with the dangerous Arctic creatures that would see a solo traveler plodding slowly without a sled team as an easy target in Resolute Bay locals and guides insisted that if she did not have a sled team she must at least take one dog -- not just as a companion, but to warn of and protect against approaching polar bears
she was presented with a ninety-four pound black husky mix

⁷⁸³ Peter Blecha, HistoryLink.org, May 1, 2011.

⁷⁸⁴ Kate Kershner, HistoryLink.org, June 20, 2011.

that had been trained by the Inuits to be alert to the approach of bears
Helen named him Charlie
he proved to be a lifesaver and a beloved companion on her journey
Thayer took a fifty-mile plane ride from Resolute Bay to her starting point of her 364-mile journey
there she began pulling her own sled -- March 3, 1988
her most enduring pain came from what she calls "the first lesson of her journey" on her first day
her meticulously packed sled had become jumbled from the airplane ride
before she set out she allowed some well-meaning volunteers help her re-pack
when temperatures plunged below minus 50 Fahrenheit, steady winds cut any exposed skin
as the cold intensified she struggled to find the warmest gloves she had
as she had started out with a lighter pair
knowing the placement of every item became extremely important
although she found the misplaced gloves before full blown frost bite set in,
her hands became blistered and for the entire duration of the journey
they would crack and painfully bleed and ooze
It was not long before Charlie earned his keep
on only the second day of their journey, Thayer and Charlie came across three polar bears,
each was kept at bay with Charlie's barks and growls and Thayer's flares and warning shots
Thayer's route was challenging enough
but several storms caused her to stop for two or three days at a time
as white-out conditions that camouflaged polar bears proved to be impossible to ski through
Surviving on 5,000 calories a day, Thayer used high-energy crackers, energy bars, oatmeal, granola
and peanut butter cups (both her and Charlie's favorite treat) to sustain their appetites
although she carried fuel to melt water, she avoided over-use
by treating herself to only lukewarm hot chocolate or oatmeal
Thayer carried with her a prototype GPS system to help determine coordinates,
but its alkaline batteries allowed it to be used only to check her coordinates at magnetic north
relying on sun dials and Local Apparent Noon (LAN) charts,
she was able to determine her location throughout the journey
her sled carried an odometer, but she also perfected a two-mile-per-hour pace across ice
to use in case of mechanical failure
On the nineteenth day of her journey, Helen Thayer made it to the magnetic North Pole,
north of the Wallis River on King Christian Island
she left a few personal mementos, and planted a United States flag, a Canadian flag,
and the New Zealand flag of her birthplace -- mid-March 1988

HELEN THAYER'S RETURN IS MORE DIFFICULT THAN THE OUTBOUND ADVENTURE⁷⁸⁵

Thayer's return trip to her rendezvous point proved to be the most challenging part of the journey
only a day after reaching the pole, she was confronted by a sudden storm
that not only badly cut her face with ice, but much more seriously, blew away her food supply
Seven days would be required to ski to her rendezvous point
Thayer was left with only a single daily ration of five walnuts and a pint of water

⁷⁸⁵ Kate Kershner, HistoryLink.org, June 20, 2011.

from 5,000 calories a day, she now had to survive for a week on 700 calories, total
 Charlie received daily half-rations
 most of her fuel was gone leaving her no way
 to melt the vast expanses of snow and ice around her
 On the twenty-seventh day of the expedition, Helen Thayer and Charlie
 finally made it to their rendezvous point -- March 30, 1988
 Helen Thayer became the first woman to solo to the magnetic North Pole
 she completed her 364-mile journey despite starvation and incessant danger from polar bears
 This trip becomes the basis for her [1994] book
Polar Dream: The First Solo Expedition by a Woman and Her Dog to the Magnetic North Pole
 other books about additional adventures she accomplished include:

- Three Among the Wolves: A year of Friendship with Wolves in the Wild* (2004),
- Trekking the Gobi: Desert of Dreams and Despair* [2008]

(Helen Thayer founded Adventure Classroom -- a non-profit educational program for students
 her experiences, writing and photography
 provide the basis for lectures, lessons and teaching tools
 she has lectured to more than one million students in schools across the world since 1988
 she continues to present photographic programs of exploration
 to students and to adult groups nationwide
 Helen Thayer's adventures have continued nonstop:

- she trekked 1,500 miles through Death Valley and the Mojave and Sonoran deserts [1990],
- she spent her 60th birthday on a solo walk in Antarctica [1997],
- she returned walked 1,200 miles across New Zealand to study the Maori culture [1999]

IRAN-CONTRA AFFAIR RESULTS IN INDICTMENTS OF FEDERAL OFFICIALS

Indictments were handed down to Iran-Contra participants -- March 16, 1988
 National Security Advisor John Poindexter, Nation Security Council member Oliver North,
 Air Force General Richard Secord and businessman Albert Hakim were all indicted
 on twenty-three counts
 some of the charges were dropped when the Bush Administration
 refused to release the classified documents necessary for the case

EAST WENATCHEE PREHISTORIC COLVIS CULTURE SITE IS INVESTIGATED⁷⁸⁶

Washington State University sent a team of scientists arrived to examine the site
 Peter J. Mehringer led the team of local and national authorities in Paleo-Indian Archaeology
 along with members of the Confederated Tribes of the Colville Reservation -- April 1988
 They discovered twenty-two more stone and bone tools to add to those previously discovered [1987]
 in addition to spear points, other artifacts recovered included a chopper, scrapers, blades,
 bifacial (two-edged) knives, an engraving tool and three flaked stone axes or adzes
 some of the artifacts tested positive for the presence of blood
 one knife tested positive for human blood which could indicate an accidental self-inflicted cut
 during the butchering process

⁷⁸⁶ Paula Becker, HistoryLink.org, October 3, 2006.

only five of the artifacts were removed for laboratory study

U.S. SENATOR DAN EVANS ANNOUNCES HE WOULD NOT SEEK REELECTION

Washington's Republican U.S. Senator Daniel J. Evans wrote an article

entitled "Why I'm Quitting the Senate" in the *New York Times Magazine* -- April 1988

he complained: **"I came to Washington with a slightly romantic notion of the Senate...I looked forward to the duel of debate, the exchange of ideas. What I found was a legislative body that had lost its focus and was in danger of losing its soul.**

In the United States Senate, debate has come to consist of set speeches read before a largely empty chamber; and in committees, quorums are rarely achieved. I have lived through five years of bickering and protracted paralysis. Five years is enough. I just can't face another six years of frustrating gridlock."⁷⁸⁷

BLUE RIBBON COMMISSION ON SCHOOL REFORM ISSUES THEIR REPORT

After a three-year study, Washington State Economic Development Board,

a twenty-eight-member coalition of business, education, labor and legislative representatives issued their report -- 1988

- their ideas included emphasizing "core competencies" and statewide testing for graduation;
- assessment of student progress not necessarily based on standardized tests;
- they recommended the minimum teacher salary be "raised to equal industry standards" but proposed that both teachers' and administrators' pay increases be based on "performance criteria" measured on the district level -- not by the state;
- this report also recommended the state adopt a "choice" system to allow parents greater latitude in selecting their children's schools;
- competencies, which the report said should be attained before ninth grade, included basic literacy and numeracy, critical-thinking skills, citizenship and values, science and technology, proficiency with calculators and computers, appreciation of arts and humanities and good work habits;
- each schools' curriculum should be "individualized" to allow for different teaching methods as well as to permit students to learn at their own speed each student would be required to learn a foreign language and to study other cultures;
- finally, public support for preschool programs for disadvantaged children would expand

ENDANGERED SPECIES ACT IS AMENDED TO PROTECT THE NORTHERN SPOTTED OWL⁷⁸⁸

(Endangered Species Act had passed Congress [1973])

it strengthened protections for all plant and animal species listed by the U.S. government

as threatened or endangered and required federal agencies to avoid jeopardizing their survival

it also required action be undertaken to promote the recovery of the species

consideration of economic factors to achieve the goal of recovery and delisting

was prohibited from the listing process

specific information must be included in each endangers species report:

⁷⁸⁷ *The New York Times Magazine*, April 17, 1988.

⁷⁸⁸ David Wilma, HistoryLink.org, February 28, 2003.

- description of “site-specific” management actions to make the plan as explicit as possible,
 - “objective, measurable criteria” to judge when and how well a species is recovering)
- U.S. Fish and Wildlife Service declined to list the northern spotted owl as an endangered species
 environmentalists sued the Fish and Wildlife Service to force the listing of the species -- 1988
 in the litigation, the agency admitted it had taken into account economics and politics
 in its decision not to list -- 1988
 however, by law economics and politics were not to be considered in listing a species

UNITED STATES FACES ONE OF THE WORST DROUGHTS EVER

(During the [spring] records for lowest monthly total rainfall
 and longest interval between measurable precipitation were set,
 for example, Milwaukee went fifty-five days in a row without rain)
 This drought was widespread, unusually intense and accompanied by heat waves -- summer 1988
 at its peak, the drought covered 45% of the United States
 it caused crop damage in many states estimated to be in excess of \$60 billion
 Two record-setting heat waves developed during the summer
 (exactly as they did in [1934] and [1936])
 between 4,800 to 17,000 people and an unknown number of livestock across the U.S. were killed
 many forest fires occurred in Western North America
 including the exceptionally destructive Yellowstone National Park fire
 drought-related losses in Canada added up to about 1.8 billion dollars
 Causes of the drought focused on farmers developing land which was only marginally arable
 and the pumping of groundwater almost to the point of depletion

RELIGIOUS FUNDAMENTALISM SWEEPS ACROSS AMERICA

Since the early Twentieth Century conservative members of various Protestant denominations
 have maintained a literal and personal interpretation of the Bible
 it is fundamental to conservative Christians that Biblical teachers be taken seriously
 United States Supreme Court decisions ran counter to conservative religious beliefs
 state-sanctioned prayer in public schools was prohibited in *Engel v. Vitale* [1962]
 mandatory Bible reading in public schools was prohibited
Abington School District v. Schempp [1963]
 Christian Fundamentalists began to resist perceived threats to traditional religious values
 “secular humanism,” Communism, feminism, legalized abortion and homosexuality
 were specifically identified as concerns
 teaching of evolution in schools was opposed
 creationism or intelligent design advocated as replacements in the curriculum
 fundamentalists also attacked teaching scientific theories on the origins of the universe
 Televangelists reached out to fundamentalists across the nation
 Moral Majority, founded by the fundamentalist Baptist pastor Jerry Falwell [1979]
 was the most visible example of this new trend
 Christian Coalition, headed by Southern Baptist Pat Robertson forged new alliances
 composed of moderate fundamentalists and conservative evangelicals
 an aggressive political campaign to institute Christian Fundamentalism was undertaken

Approximately one-quarter of Americans describe themselves as fundamentalists during the [1980s] they made up a large portion of the new Christian right that helped put Ronald Reagan into the White House
Washington Republicans in their state convention gave presidential hopeful Pat Robertson his only state victory over candidate George Bush -- 1988

CONCERNS ABOUT SEATTLE’S BUSING PROGRAM SPREADES ACROSS THE CITY⁷⁸⁹

While initial opposition to race-based student busing came primarily from white parents voices of dissent also were heard from tolerant groups as well -- by the late 1980s including some of the same white liberals and African Americans who had endorsed busing

Critics complained the Seattle Plan:

- unfairly burdened children of color;
- contributed to a widening achievement gap between white and minority students;
- undermined public confidence in the schools, particularly among middle-class parents;
- left some schools under-enrolled while others were over-enrolled,
- was too costly and complex

Seattle School Board members responded to the escalating criticism by replacing the Seattle Plan with a “controlled-choice” system -- 1988
this new plan allowed parents to select their children’s schools from within a prescribed cluster of schools -- if their choice maintained racial balance

INDIAN FISH HATCHERIES RECEIVES A BOOST

Tribal Fish Health Center opened in the US Fish & Wildlife Service’s Olympia office -- 1988
Olympia Fish Health Center (OFHC) center’s personnel supported fish hatchery operations
OFHC provided fish health diagnostic, certification, and troubleshooting services to Federal Hatcheries within western Washington State
it monitored fish health, helped to identify problems and provided training and disease assistance to Tribal, State and Private entities in the form of vaccines and preventive care
OFHC opened two field offices in Mount Vernon and Forks

CONGRESS PROVIDES FINANCIAL REDRESS TO INCARCERATED JAPANESE AMERICANS

Commission on Wartime Relocation and Internment of Civilians was formed to investigate the losses suffered by Japanese Americans during World War II [1980]
Following the findings of the Commission on Wartime Relocation and Internment of Civilians, Congress passed the Civil Liberties Act of 1988
this law was passed at least in part due to the acquittal of U.W. student Gordon Hirabayashi by this U.S. Court of Appeals [1987] which overturned his conviction for refusing to enter a Japanese Internment Camp during World War II
President Ronald Reagan signed Public Law 100-383 -- August 10, 1988
this granted reparations to Japanese Americans who had been interred by the United States during World War II

⁷⁸⁹ Cassandra Tate, HistoryLink.org, September 7, 2002.

legislation stated that government actions were based on
“race prejudice, war hysteria, and a failure of political leadership”
surviving internees were to receive about \$20,000 in compensation
and a presidential apology
it also established an education fund that supported efforts to educate Americans
about the wartime incarceration to help ensure it would not happen again⁷⁹⁰
Public Law 100-383 was supported by the majority of Democrats in Congress
while the majority of Republicans voted against it
(funds were approved for the U.S. Attorney General to pay out to the rest of the claimants [1999])

STATE DEMOCRATIC PARTY PRIMARY ELECTION SELECTS CANDIDATES

When U.S. Senator Dan Evans announced he would not seek reelection,
Democratic Congressman Mike Lowry resigned his seat in the U.S. House of Representatives
to run for the position -- September 1988
Democratic Congressman Don Bonker also resigned his seat to run for the same position
U.S. Representative Mike Lowry won the Democratic Primary Election to face Slade Gorton
Democrat Jim McDermott had served the Forty-Third Legislative District
in the State House of Representatives [1971-1973] and the State Senate [1975-1987]
while there he crafted and sponsored the Washington State Basic Health Plan
the first such state program in the country to offer health insurance
to the unemployed and the working poor
McDermott resigned his State Senate seat to run for the Seventh Congressional seat
vacated by U.S. Representative Mike Lowry in his bid for the U.S. Senate
Democrat Jolene Unsoeld served in the State House of Representatives
for the Twenty-second District where she had been an active advocate for open government
she pushed for open meetings and open public records
she also was concerned about nuclear power plants and costs imposed on rate payers
State Representative Unsoeld filed to run for Congressman Don Bonker’s now open
Third Congressional District seat

FIRST COMPUTER WORM DISTRIBUTED THROUGH THE INTERNET IS LAUNCHED

“Morris worm” was written by Robert Tappan Morris a student at Cornell University
this worm was launched from Massachusetts Institute of Technology (MIT) -- November 2, 1988
According to its creator, the Morris worm was not written to cause damage,
but rather to gauge the size of the Internet
however, the worm was released from MIT
to disguise the fact it had originally come from Cornell
computers could be infected multiple times -- each infection would slow the machine down
eventually to the point of being unusable
Morris worm was considered the first computer worm
it was certainly the first to gain significant mainstream media attention
(Robert Morris was tried and convicted of violating the 1988 Computer Fraud and Abuse Act [1990])

⁷⁹⁰ Jennifer Ott, HistoryLink.org, August 23, 2010.

after appeals he was sentenced to three years of probation, 400 hours of community service and a fine of \$10,000)

NATIONAL ELECTION SEES A SIGNIFICANT SHIFT ON THE POLITICAL SCENE

Conservative political Republican leaders from the far right effectively campaigned for the current Vice President and Presidential Candidate George H.W. Bush who swept forty states as he beat Democrat candidate Michael Dukakis -- November 8, 1988 to become the first sitting Vice President in 200 years, to be elected as President Washington's U.S. Senator Daniel J. Evans was replaced by Republican former-U.S. Senator Slade Gorton -- November 8, 1988 when he defeated liberal Congressman Mike Lowry by a narrow margin Gorton became the only state politician elected to both U.S. Senate seats at differing times he held both Warren G. Magnuson's (Position 2) and Henry M. Jackson's (Position 1) Two new Democratic representatives are elected to Congress in Washington state former-State Representative Democrat Jolene Unsoeld was elected to the Third Congressional seat vacated by Congressman Don Bonker in his bid for the U.S. Senate against Slade Gorton Congresswoman Unsoeld held the position for three terms [1989-1995] former-State Senator Jim McDermott was elected to the Seventh Congressional seat vacated by Congressman Mike Lowry in his bid for the U.S. Senate against Slade Gorton Congressman McDermott has served many terms in the U.S. House of Representatives In the State Legislature, Republicans regained their State Senate majority by one seat but lost two seats in the State House of Representatives giving Democrats a 63-35 majority

JUDGE ROBERT DORAN MAKES HIS THIRD RULING ON EDUCATION FUNDING

State Superior Court Judge Robert Doran issued a decision on the special education funding formula he ruled the state could fund special education based on assumptions about statewide averages which limited the state's financial obligation as long as a "safety net" was provided for school districts with above-average costs -- November 22, 1988 Washington State was obligated to spend sufficiently on special education but this judgment did not order the legislature to take any particular action

U.S. SUPREME COURT SEALS THEODORE ROBERT "TED" BUNDY'S FATE

U.S. Supreme Court denied a motion to review the federal Eleventh Circuit Court ruling that required the execution of Ted Bundy -- December 1988 new execution of [January 24, 1989] was announced With all appeals exhausted and no further motivation to deny his crimes, Ted Bundy agreed to speak frankly with investigators about his killing spree he confessed to all eight of the Washington and Oregon homicides for which he was the prime suspect he described three additional previously unknown victims in Washington and two in Oregon whom he declined to identify (if he ever knew their identities) to detectives from Idaho, Utah, and Colorado, Bundy confessed to additional homicides, including several of which the police were still unaware

he explained that in Utah he could bring his victims back to his apartment however, an ulterior motive quickly became apparent for Bundy's willingness to talk during his confessions he withheld many details, hoping the incomplete information would force yet another stay of execution

he said there were additional remains buried in Colorado but refused to elaborate this new strategy only strengthened public resolve to see him executed on schedule

U.S. SENATE SUB-COMMITTEE ISSUES A REPORT ON NICARAGUAN CONTRA ACTIVITIES

U.S. Senator John Kerry (D-Massachusetts) chaired a Senate Foreign Relations Sub-Committee on Narcotics and International Terrorism that issued its preliminary report -- December 1988 Kerry's committee stated National Security Council staff member Lieutenant-Colonel Oliver North and other senior officials in an effort to cover for their Contra operations had created a privatized network that attracted drug traffickers these officials then turned a blind eye to repeated reports of Contra drug smuggling and actively worked with known drug smugglers such as Panamanian dictator Manuel Noriega to assist the Contras it did not report that U.S. government officials ran drugs

WPPSS LAWSUIT IS SETTLED IN COURT

Washington Public Power Supply system (WPPSS) reached a \$753 million settlement with Public Utility Districts (PUDs) and their customers -- December 24, 1988 some of the PUD's approximately 75,000 bondholders would receive forty cents on every dollar invested others got as little as ten cents on the dollar

(In a later court settlement it was found that some of the bond monies for WPPSS Hanford Plant 4 and Satsop Plant 5 had been spent on Hanford Plant 1 and Satsop Plant 3 thus participants in Plants 1 and 3 also were held liable for the default Seattle's share was \$50 million, of which \$43.2 million came from insurance companies the last settlement was reached [1995])⁷⁹¹

THEODORE ROBERT "TED" BUNDY IS PUT TO DEATH

Ted Bundy lived on Florida's death row for nine years and five months shortly before his death he confessed to eight killings in Washington and two in Utah he was a suspect in none of these cases Bundy also confessed to two homicides in Oregon without identifying the victims seventeen year old Rita Lorraine Jolly disappeared from West Linn, Oregon [June 29, 1973] twenty-four-year-old Vicki Lynn Hollar disappeared from Eugene, Oregon [August 20, 1973] Ted Bundy died in the electric chair at Raiford Prison in Starke, Florida for the murder of twelve-year-old Kimberly Ann Leach -- 7:16 a.m. January 24, 1989 Bundy's remains were cremated in Gainesville, Florida his ashes were scattered at an undisclosed location in the Cascade Mountains of Washington

⁷⁹¹ David Wilma, HistoryLink.org, July 10, 2003.

Ted Bundy's biographer, Ann Rule, described him as **"... a sadistic sociopath who took pleasure from another human's pain and the control he had over his victims, to the point of their death, and even after."**⁷⁹²

He once called himself **"...the most cold-hearted son of a bitch you'll ever meet."**⁷⁹³

Polly Nelson, a member of his last defense team, agreed:

"Ted was the very definition of heartless evil."⁷⁹⁴

TED BUNDY REMAINS THE PRIME SUSPECT IN SEVERAL UNSOLVED HOMICIDES

It was believed he committed at least thirty-six murders and possibly more than 100

Bundy is the primary suspect in two unsolved cases

flight attendants Lisa E. Wick and Lonnie Trumbull, both twenty,

were bludgeoned with a piece of lumber as they slept in their apartment

in Seattle's Queen Anne Hill district [June 23, 1966] near a Safeway store

where Bundy worked at the time

Bundy denied involvement and no direct evidence implicates him

vacationing college friends Susan Davis and Elizabeth Perry, both nineteen,

were stabbed to death [May 30, 1969] near Somers Point, New Jersey

at the time, Ted Bundy attended classes at nearby Temple University

it was believed he used his pretend injury ruse as his aunt he could not travel to New Jersey

because he was wearing a leg cast due to an automobile accident

there is no record of any such accident

(Of course, it is impossible to know if or how many additional victims might be still undiscovered)

IT IS DISCOVERED THAT EVIDENCE IN THE IRAN-CORNTA AFFAIR WAS DESTROYED

At the trial of fired National Security Council staff member Lieutenant-Colonel Oliver North

it was discovered that he had destroyed, altered or hidden documents pertinent to Iran-Contra

(between [November 21] and [November 25, 1986])

During the trial North's secretary, Fawn Hall, testified -- February 19, 1989

to helping North alter, shred and remove from the White House

official United States National Security Council document

North's explanation for destroying some documents was that he wanted

to protect the lives of individuals involved in the Iran and Contra operations

during his trial North testified that on [November 21, 22, or 24],

he witnessed National Security adviser Admiral John Poindexter destroy

what may have been the only signed copy of a presidential covert-action finding

that authorized CIA participation in the [November 1985] missile shipment to Iran

also at the 1989 trial, U.S. Attorney General Edwin Meese admitted that profits

from weapons sales to Iran were made available to assist the Contra rebels in Nicaragua

FIRST OF THE IRAN-CONTRA CONSPIRATORS IS CONVICTED

⁷⁹² Ann Rule, *The Stranger Beside Me*, P. xiv.

⁷⁹³ Robert D. Hare, PhD. *Without Conscience: The Disturbing World of the Psychopath Among Us*. P. 23.

⁷⁹⁴ Polly Nelson, Polly (1994). *Defending the Devil: My Story as Ted Bundy's Last Lawyer*. P. 319.

National Security Advisor Robert McFarlane had pled guilty
to withholding from Congress information about the Iran-Contra affair
after a plea bargain he received only two years of probation -- March 3, 1989

REPLICA OF THE *LADY WASHINGTON* IS CONSTRUCTED IN ABERDEEN⁷⁹⁵

(Original ship *Lady Washington* was captained by American explorer Robert Gray ([1755-1806]
who gave the United States its earliest claim to the Pacific Northwest [the Columbia River [1792]
and for whom Grays Harbor is named)

Grays Harbor Historical Seaport Authority worked to construct a full-scale replica of the ship
that would also conform to current U. S. Coast Guard safety requirements
thoroughly researched by historians and constructed by skilled shipwrights,
this vessel was launched into the Wishkah River in Aberdeen -- March 7, 1989
during Washington's centennial celebration

(112-foot, 99-ton ship soon began touring ports around the state
thousands of maritime and history buffs came to each waterfront to tour the vessel
Lady Washington could carry up to forty-eight passengers)

(*Lady Washington* sailed on its first trip to Canada [1991] and traveled to California [1993]
where it made its movie debut in *Star Trek: Generations*

Lady Washington also appeared in other motion pictures -- most notably as the HMS *Interceptor*
in *Pirates of the Caribbean: The Curse of the Black Pearl*

Lady Washington was designated by the legislature

to be the official ship of the state of Washington [2007]

office of the Secretary of State for the state of Washington holds a mortgage on the vessel
to secure the investment of the people of Washington)

BOEING EXPANDS ITS TECHNOLOGY AND ITS SHARE OF THE MILITARY MARKET

Boeing contracted to build six prototypes of the V-22 Osprey, a tilt rotor aircraft
this innovative aircraft first successfully flew -- March 19, 1989

(Another Boeing prototype, the B-2 *Stealth Bomber*, made its maiden flight [July 1989]

(Upgrading other Boeing-made military aircraft such as the B-62 and the KC-136
advanced the company's renown throughout the world)

ENVIRONMENTAL DISASTER STRIKES PRINCE WILLIAM SOUND, ALASKA

Exxon Valdez carried approximately fifty-five million gallons of Prudhoe Bay, Alaska crude oil
she left the Alyeska Pipeline terminal at Valdez, Alaska

bound for Long Beach, California -- March 24, 1989

three hours out the *Exxon Valdez* struck Bligh Reef in Prince William Sound and ran aground
spilling somewhere between eleven and thirty-two million gallons of crude oil

this was one of the most devastating human-caused environmental disasters to that time
oil eventually covered 1,300 miles of coastline and 11,000 square miles of ocean

Prince William Sound's remote location, accessible only by helicopter, airplane and boat,
made government and industry response efforts difficult

⁷⁹⁵ Alan J. Stein, HistoryLink.org, March 5, 2009.

and severely taxed existing response plans

Several factors were identified as causes for the disaster:

- Coast Guard tanker inspections in Valdez, Alaska were not done;
- number of staff on board the *Exxon Valdez* was reduced
 - crew was half the size of the [1977] crew -- they worked 12-14 hour shifts plus overtime;
- tanker crews were not told the Coast Guard had ceased tracking ships out to Bligh reef;
- third mate failed to properly maneuver the vessel, possibly due to fatigue or excessive workload;
- Exxon Shipping Company failed to supervise the captain
 - neither a rested nor adequate number of crew were on board at the time;
- Exxon Shipping Company failed to properly maintain the radar warning system;
- Exxon Shipping Company promised, but never installed, iceberg monitoring equipment;

Exxon Valdez caused over \$300 million of economic harm to more than thirty-two thousand people whose livelihoods depended on commercial fishing

Clean-up was undertaken using high-pressure hot-water and dispersants such as detergents, wetting agents, emulsifiers and solvents to prevent settling or clumping, burning off the oil was attempted but discontinued due to unfavorable weather mechanical cleanup using booms and skimmers was not possible at first due to lack of equipment -- later thick oil and kelp tended to clog the equipment cleanup required about 10,000 workers, 1,000 boats and roughly 100 airplanes and helicopters four deaths were directly associated with cleanup efforts

Exxon Oil Company was widely criticized for its slow response to cleaning up despite the extensive cleanup attempts, less than ten percent of the oil was recovered

Both the long-term and short-term effects of the oil spill have been studied immediate effects included the deaths of some 100,000 to as many as 250,000 seabirds, at least 2,800 sea otters, approximately twelve river otters, 300 harbor seals, 900 Bald Eagles, and twenty-two orcas (killer whales) were killed

(eleven members [about half] of one resident pod disappeared in the following year)

later studies discovered reductions in population in various ocean animals, and stunted growth in pink salmon populations

sea otters and ducks also showed higher death rates in following years partially because they ingested prey from contaminated soil

and partially from ingestion of oil residues on hair and feathers due to grooming

(twelve years after, oil was still found on half of ninety-one randomly selected beaches

(some twenty years after the spill, a team from the University of North Carolina found that the effects were lasting far longer than expected)

U.S. SENATE NARCOTICS AND INTERNATIONAL TERRORISM COMMITTEE'S REPORT

U.S. Senator John Kerry (D-Massachusetts) issued a final report on the Iran-Contra affair conducted by his Narcotics and International Terrorism sub-committee -- April 13, 1989 three years after its investigation began

and six months after George Bush, Sr. was elected President of the United States

Narcotics and International Terrorism Committee confirmed the Contra-drug connection was real although the Reagan Administration, Congress, and much of the media had attempted to dismiss it

Oliver North and members of the President's Administration were accused of illegally funding and supplying armed militants without the authorization of Congress
Kerry's sub-committee report found that **"the Contra drug links included...payments to drug traffickers by the U.S. State Department of funds authorized by the Congress for humanitarian assistance to the Contras, in some cases after the traffickers had been indicted by federal law enforcement agencies on drug charges, in others while traffickers were under active investigation by these same agencies."**⁷⁹⁶

it was also reported the U.S. State Department paid over \$806,000 to known drug traffickers to carry humanitarian assistance to the Contras⁷⁹⁷

CELEBRATION HELD BY *SIR MIX-A-LOT* IN SEATTLE'S OLYMPIC HOTEL⁷⁹⁸

Success of *Sir Mix-A-Lot* and the "Nastymix" label became a cause for celebration -- April 29, 1989
this party was one for the ages: it was glamorous and fun: a Northwest music watershed moment held in the Spanish Ballroom of the posh Olympic Hotel
a truly remarkable choice for a loud, flashy hip-hop party
representatives from record sales, radio, MTV, BET, and more
were flown in at label expense from around the country
they lined the block decked out in tuxedos and furs
as cameras flashed and limos circled the street
red-leather-clad gatekeeper/toastmaster proceeded to grandly announce each guest as they entered the room

COLONEL OLIVER NORTH IS FOUND GUILTY IN THE IRAN-CONTRA AFFAIR

National Security Council member Oliver North was found guilty on three of twelve counts
he was convicted of accepting an illegal gratuity, obstruction of a congressional inquiry and destruction of documents -- May 4, 1989
but the ruling was overturned since he had been granted immunity by a federal judge

WASHINGTON STATE'S POLITICAL LEGEND DIES⁷⁹⁹

Former U.S. Senator Warren Grant "Maggy" Magnuson passed away -- May 20, 1989
he was Washington's longest serving United States Senator
he used his seniority and remarkable persuasive skills to enact legislation that profoundly affected many aspects of life for all Americans:

- he helped define twentieth-century America by increasing civil rights;
- he mandated corporate accountability;
- he funded medical research;
- he played a major role in passage of many other laws, including those that established public television, gave 18-year-olds the right to vote and created Amtrak

Born in Moorhead, Minnesota he was adopted at birth by William and Emma Magnuson

⁷⁹⁶ Selections from the Senate Committee Report on Drugs, Law Enforcement and Foreign Policy chaired by Senator John F. Kerry.

⁷⁹⁷ Alexander Cockburn and Jeffrey St Clair, *Whiteout: The CIA, Drugs and the Press*.

⁷⁹⁸ Peter Blecha, HistoryLink.org, May 1, 2011.

⁷⁹⁹ Kit Oldham, HistoryLink.org, October 14, 2003.

he was nicknamed “Maggie” when he quarterbacked his Moorhead high school football team
Magnuson never particularly liked the nickname
his family and close friends always called him Warren
Warren Magnuson followed his high school sweetheart to Seattle [1925]
and enrolled at the University of Washington
he graduated a year later and entered law school
while in college, Magnuson worked delivering ice as a member of the Teamsters Union
legendary labor leader Dave Beck and Magnuson became close allies
Warren was active in the gubernatorial campaign of Democratic activist Scott Bullitt [1928]
Magnuson became secretary (director) of the Seattle Municipal League [1930-1931]
he served as special prosecutor investigating official misconduct for King County [1932]
Warren G. Magnuson was elected to the State House of Representatives [1933-1935]
he formed close alliances with other emerging Democratic leaders
especially newly elected U.S. Senator Homer T. Bone and his campaign manager Saul Haas
Magnuson supervised passage of a bill that created a \$10 million bond issue
to hire unemployed workers on public works projects
this was one of the nation’s first unemployment relief acts
Magnuson moved on to become King County Prosecutor [1934-1936]
he won the long-held Republican position with the support of his Seattle business contacts
Magnuson was elected to the U.S. House of Representatives and served four terms [1937-1945]
when his friend Democratic Congressman Marion Zioncheck leaped to his death
Magnuson received strong union backing and the endorsement
of the Washington Commonwealth Federation, a left-wing alliance of liberal Democrats
that included many Communist Party members
while in Congress during World War II he served for several months
on the aircraft carrier USS *Enterprise*
during World War II he secured millions of dollars in appropriations
for the Puget Sound Naval Shipyard in Bremerton -- then the state’s largest employer
he sponsored bills that created the National Cancer Institute
and the Alaska International Highway Commission
U.S. Representative Magnuson combined hard work with a flamboyant bachelor lifestyle
he was known for his hard drinking -- which rarely seemed to affect him,
he frequented racetracks and loved poker games,
he lived in first-class hotels, the Olympic in Seattle and the Shoreham in Washington, D.C.,
he spent time in Hollywood, Las Vegas, and New York City
he enjoyed the company of many women
and was linked in the press with various Hollywood starlets
When U.S. Senator Homer T. Bone was appointed to the U.S. Court of Appeals,
Congressman Warren G. Magnuson ran for the open U.S. Senate seat [1944]
Senator Magnuson served six terms (thirty-six years)
he chaired the Commerce Committee for many years
he was a key member of the powerful Appropriations Committee
which he eventually chaired
he became President Pro Tempore of the U.S. Senate

the highest office a U.S. Senator can attain

Magnuson's personality was a key to his remarkable ability to move legislation smoothly unlike many politicians, he lived by the rule "**Never hold a grudge.**"⁸⁰⁰

as today's opponent could be a needed vote tomorrow

Magnuson's power in Washington, D.C., was enhanced by his close friendships with many of the eight presidents he served under:

- he regularly played poker with Roosevelt and his successor, Harry S. Truman,
- the night before John F. Kennedy was inaugurated, Magnuson was the only guest to stay at the home of the newly elected president,
- Magnuson was closest to Lyndon B. Johnson beginning from the time they served together on the House Naval Affairs Committee

President Johnson took the time from his duties to be Magnuson's best man [1964] when Maggy married Jermaine Peralta, a widow with a young daughter who worked at the Olympic Hotel jewelry store

Magnuson changed the face of Washington State with his U.S. Senate legislation:

- he supported construction of dams on the Columbia River to provide both public hydroelectric power and water to irrigate the arid Columbia Basin eight federally subsidized dams were built on the Columbia [by 1954], he reorganized the Northwest's electric power structure
- he was the individual most responsible for the Northwest economy and its quality of life:
 - he funded restoration of the Pike Place Market,
 - he insisted the route of Interstate-82 be shifted closer to the Tri-Cities of Richland, Kennewick, and Pasco,
 - he saw that highway spurs were built to the Tri-cities and to downtown Tacoma,
 - he assured that federal highway funds were appropriated for roads serving the submarine base that U.S. Senator Henry Jackson convinced the Pentagon to locate at Bangor,

U.S. Senators Magnuson and Jackson served together for twenty-eight years they gave Washington State one of the most powerful Senate duos in American history "Scoop and Maggie" brought a steady stream of contracts for leading state employers especially Boeing together they used their legislative skill and seniority to win Washington State an unprecedented share of federal funds

U.S. Senator Warren Grant Magnuson is credited with an amazing array of Congressional legislation he secured appropriations for two World's Fairs, preserved the Pike Place Market, replaced the West Seattle Bridge and provided disaster relief after Mt. St. Helens erupted he funded Health Care and Research which resulted in creating the National Cancer Institute and the National Institutes of Health -- the world's largest medical research facilities he established the National Health Service Corps which provided funds for doctors to serve communities lacking medical care as Chairman of the Senate Commerce Committee, he championed consumer protection including:

- Safe Drinking Water Act, Fair Credit Advertising Act, Door-to-Door Sales Act

⁸⁰⁰ Shelby Scates, *Warren G. Magnuson*. P. 6.

and laws that required warnings on cigarettes,
 •he regulated automobile safety and required manufacturers to live up to their warranties,
 •he set standards for children’s toys,
 •Flammable Fabrics Act protected children by requiring that sleepwear be flame resistant,
 •Magnuson guided through the Commerce Committee the Fair Packaging and Labeling Act
 which originated the requirement that all food products be accurately labeled
 with their ingredients and quantity
 at the request of President Lyndon Johnson, Senator Magnuson shepherded through
 a deeply divided Congress the most controversial section of the 1964 Civil Rights Act
 Title II outlawed racial discrimination in public accommodations such as hotels,
 restaurants, transportation facilities and theaters
 Senator Magnuson was able to eliminate the “Chinese exclusion” provisions
 of U.S. immigration laws that dated back to the anti-Chinese agitation in the [1880s] -- 1965
 he was also the leading, and at times almost the only, Congressional advocate
 of normalized relations and trade with Communist China
 he argued that hundreds of millions of people could not be written off
 simply because of their form of government -- trade and contact, not isolation,
 was the best means to influence China

Senator Magnuson derived personal satisfaction from his work to protect the marine environment
 Maggy and his staff drafted and got Congress to pass the Marine Mammal Protection Act [1972]
 MMPA played a central role in preserving local seal, sea lion, sea otter and whale populations
 when the MMPA came up for reauthorization [1977] he attached an amendment to it
 that prohibited construction of new oil ports in state waters east of Port Angeles
 effectively banning supertankers from Washington waters

U.S. Senator Warren G. Magnuson’s achievements are commemorated in Warren G. Magnuson Park
 located along Lake Washington on the former Sand Point Naval Air Station property
 that the senator acquired for Seattle
 and Warren G. Magnuson Health Sciences Center
 at the University of Washington Medical Center that he did so much to fund
 however, his most lasting legacy lives on in the laws that continue to promote health care,
 prohibit discrimination, make products safer, protect the marine environment and much more

Senator Magnuson explained his success in a television interview: **“I had no trouble explaining my case to other senators. I didn’t have any feuds. It was never a matter of wheeling and dealing. When you are through with an issue you don’t hold a grudge. There’s always another day. If you play it that way, they [colleagues] respect you. You must be courteous. After all, you’re among people who have to live together ten months out of the year. But, so many hold grudges.”**⁸⁰¹

Presidential candidate (then Senator) Eugene McCarthy summed up the senator:
“Maggie is the most loved man in the Senate.”⁸⁰²

MCNEIL ISLAND PENITENTIARY PROVES VERY EXPENSIVE TO OPERATE
 Department of Corrections performed a study -- 1989

⁸⁰¹ Shelby Scates, *Warren G. Magnuson*. P. 217.

⁸⁰² Shelby Scates, *Warren G. Magnuson*. P. 217.

which revealed that McNeil Island was one of the most expensive prisons in the state to operate⁸⁰³
its island location added to the cost, but the main reason was the prison's small size

McCAW CELLULAR BECOMES ONE OF THE BEST KNOWN BRANDS IN THE BUSINESS

Craig McCaw bid \$3.5 billion to purchase LIN Broadcasting, a national cell phone network -- 1989

McCaw had previously acquired licenses in the markets he needed to consolidate his system

Wall Street looked with horror at the company's gargantuan debt,

but Craig McCaw knew he could resell individual cellular licenses to any regional buyer
at a profit

McCaw Cellular now dwarfed its competitors making it almost impossible

for a serious competitor to enter the field

McCaw also entered the fields of television broadcasting and specialty publishing

NORTHERN SPOTTED OWL IS PLACED ON THE ENDANGERED SPECIES LIST⁸⁰⁴

(Fish and Wildlife Service had declined to list the Northern Spotted Owl

as an endangered species [1987] and was sued by environmental groups

during litigation it was disclosed that the agency had used economic and political considerations

in making its decision -- a situation specifically prohibited by law

thus the decision was ordered to be reconsidered)

Fish and Wildlife Service agency announced the bird would be listed -- June 1989

(northern spotted owl was officially listed as an endangered species [June 23, 1990])

SEATTLE SCHOOL DISTRICT INTEGRATION PROGRAM REMAINS CONTROVERSIAL

Seattle School District's "Controlled Choice" system was attacked by anti-busing city leaders

who filed Initiative-34 -- June 15, 1989

I-34 was authored by City Attorney Doug Jewett

who opposed student busing for integration purposes

I-34 proposed that six percent of the city's revenue be used to improve neighborhood schools

in exchange for an end to mandatory desegregation busing in the Seattle School District

(enough signatures were gathered to place anti-busing initiative on the [November] ballot)

SEATTLE CITY COUNCILMAN NORM RICE ENTERS THE SEATTLE MAYOR'S RACE

Norm Rice had three times been elected to the Seattle City Council [1979], [1983], and [1987]

he was the second African American councilman after Sam Smith (first elected [1967])

Rice filed as a mayoral candidate in the last twenty minutes of the last day filing day -- July 28, 1989

he had been motivated to run by the anti-busing initiative, I -34, filed in Seattle

which had been written by City Attorney and mayoral candidate Doug Jewett

THREE HISTORIC JAPANESE CASTAWAYS ARE REMEMBERED⁸⁰⁵

Japanese Boy Scouts financed a memorial to three nineteenth-century Japanese sailors

⁸⁰³ Daryl C. McClary, HistoryLink.org, April 24, 2003.

⁸⁰⁴ David Wilma, HistoryLink.org, February 28, 2003.

⁸⁰⁵ Cassandra Tate, HistoryLink.org, July 6, 2009.

believed to be the first Japanese to arrive in what is now Washington State [1833]

this seven foot tall two-ton granite monument bears a likeness of three sailors

it is located at Fort Vancouver National Historic Site just west of the visitor's center

this monument was dedicated -- August 1, 1989

Sailors of the fifty-foot *Hojun Maru* left their home port of Onoura, Japan [October 11, 1832]

bound for Edo (Tokyo) with a cargo of rice and porcelain

sometime after making a call at the port of Toba south and east of Tokyo [early November 1832]

Hojun Maru was hit by a typhoon, stripped of its rudder and mast and driven off to sea

crew had rice from the cargo and fish from the sea to eat

they were able to collect rainwater and to desalinate seawater for drinking

but they had no access to Vitamin C

by the time the ship ran aground near Cape Flattery [January 1834]

all but three of the crew had died -- probably of scurvy

Survivors were three young men, Iwakichi, 28; Kyukichi, 15, and Otokichi, 14,

“Three kichis” as they were called all were from the village of Onoura in the township of Mihama

on the opposite side of the island of Honshu from Tokyo

they were found by a group of Makah Indian seal hunters and briefly held as slaves

when word of their capture reached Hudson's Bay Company Chief Factor John McLoughlin

he had them ransomed and brought to Fort Vancouver

“Three kichis” stayed at Fort Vancouver for about five months where they learned a little English

McLoughlin arranged to send them to Hudson's Bay headquarters in London [November 1834]

he thought the British government could use the men to establish trade relations with Japan

After a brief stay in London, all but one day was confined to their ship, all three sailors

were sent the rest of the way around the world to the southern China port city of Macao

after a six-month journey from London they arrived [June 1835]

they were handed over to a German missionary and linguist in Macao

Two years later in the hope of opening trade with Japan an American merchant, Charles W. King,

attempted to return the “Three kichis” to Japan on one of his ships

but his ship was twice greeted with cannon fire,

first when it sailed into Edo Bay

then when it approached Kagoshima Bay

he gave up and returned to Macao

“Three kichis” lived the rest of their lives as exiles

TWO SCHOOL DISTRICTS IN WASHINGTON STATE EXPERIENCE STRIKES

Washington Education Association (WEA) led two teacher strikes -- 1989

Bellingham teachers (BEA) struck for twelve days before school opened

no court injunction was sought by district administrators

Moses Lake Education Association (MLEA) members were locked out of their classrooms

by school district administration for two days before school opened

U.W. PROFESSOR HANS G. DELUNELT RECEIVES THE NOBEL PRIZE FOR PHYSICS⁸⁰⁶

⁸⁰⁶ Dave Wilma, HistoryLink.org, December 27, 2001.

University of Washington Professor Hans G. Dehmelt and Wolfgang Paul of Bonn University received the Nobel Prize for Physics for their work on isolating individual electrons and ions and making exact measurements of them -- October 12, 1989
German-born Dehmelt became a University of Washington professor [1955]
and a United States citizen [1961]
he said his interest in atomic particles went back to the age of ten
when he was an amateur radio operator

SEATTLE ELECTS ITS FIRST AFRICAN AMERICAN MAYOR⁸⁰⁷

Norm Rice, a ten-year member of the Seattle City Council,
defeated Seattle City Attorney Doug Jewett
in a hotly contested campaign for mayor -- November 7, 1989
by a vote of: 99,699 to 75,446
Rice was motivated to run for the position by the successful signature gathering campaign of I-34
which was an effort to stop mandatory desegregation school busing
Ironically, in the same election, I-34 narrowly passed: 71,286 - 70,159
(Norm Rice devoted much of his first term to strengthening city support for Seattle Public Schools,
promoting human rights, and to revitalizing the downtown economy
(he easily won re-election [1993])

TWO MORE GUILTY PLEAS ARE RECEIVED IN THE IRAN-CONTRA AFFAIR

Air Force General Richard Secord entered a plea bargain of guilty
to making false statements to Congress regarding the Iran-Contra Affair
this was one of the twenty-three counts brought against him in an indictment
he received two years of probation -- November 8, 1989
Businessman Albert Hakim plead guilty to stealing government property -- November 21, 1989
this was one of twenty-three counts regarding the Iran-Contra Affair
he will receive two years of probation and a \$5,000 fine

⁸⁰⁷ Walt Crowley, HistoryLink.org, January 1, 2000.

1990-1999

SEATTLE TELEVISION PERSONALITY JIM LEWIS “SHERIFF TEX” DIES

One of America’s original cowboy stars, “Texas” Jim Lewis was the host of one of the Northwest’s first television children’s shows TV was still in its infancy (there were an estimated 6,500 TV sets in the Pacific Northwest [1951] Seattle’s KING-TV was busy casting a wide net seeking talent worthy of being broadcast Jim Lewis could tell jokes (and tall tales), sing songs, demonstrate rope tricks, introduce furry animals, work a puppet and improvise endless silly skits he was just what television at the time was looking for in a host⁸⁰⁸ “Texas” Jim had developed a unique musical contraption, the “Hootin’ nanny,” which featured a crazy assemblage of assorted brass automobile horns, percussive clackers, whining hand-crank sirens, two washboards, a gun that fired blanks, etc. Sheriff Tex’s Safety Junction debuted live three days a week [November 1951] Lewis entertained viewers with his guitar and also brought on other local musical talents one week later it was a daily live broadcast -- it ran for seven years Sheriff Tex featured puppets, rope tricks, old movies and advice to kids about safety Lewis’s fabled Wild West temper, propensity for ribald humor and habit of blasting his smoky, blank-firing .44 pistol all played a role in KING TV’s decision to retire Safety Junction Sheriff Tex moved on to Tacoma’s KTVW there he hosted the Sheriff Tex Show for a while he relocated the program to Vancouver B.C., [1958] where it aired for several more years it was syndicated for broadcast in five languages “Texas” Jim Lewis was honored by the Western Swing Society [1985] for devoting fifty-five years to the entertainment business, a career that included everything from vaudeville to performing in country-western bars and in forty-two Hollywood movies Jim Lewis, “Sheriff Tex” passed away -- January 23, 1990

1990 CENSUS SHOWS URBAN GROWTH⁸⁰⁹

Total population of Washington State was 4,866,692: up 17.77 percent -- 1990 is, an increase of Washington continued to draw population from other states and countries these immigrants were more heavily concentrated in the urban areas population distribution remained predominantly white
White: 4,308,937 (88.5 percent)
Asian/Pacific Islander: 210,958 (4.3 percent)
Black or African American: 149,801 (3.1 percent)
other races: 115,513 (2.4 percent)
American Indian or Alaska Native: 81,483 (1.7 percent)

⁸⁰⁸ Peter Blecha, *Lewis, Texas" Jim (1909-1990): Seattle's pioneering 1950s kiddie-TV show host*, Essay 8657, HistoryLink.org, July 24, 2008.

⁸⁰⁹ John Caldbick, *1990 census: Populations grow in urbanized areas and decline in rural areas; Washington state continues to draw population from outside its borders; females live longer than males*, Essay 9412, HistoryLink.org, May 1, 2010.

note: 214,570 people of Hispanic/Latino extraction who may be of any race
 were counted both in their racial group and as a separate, multi-racial group

Total number of households in Washington was 1,872,431

1,029,627 married couples represented 55% of all households

married couple households with children: 475,264 (25% of all households)

average family size was 3.06 persons

male households living alone: 212,023 (11% of all households)

female households living alone: 264,297 (14% of all households)

female households (no spouse present) living with children: 115,430 (6.2% of all households)

largest group living in poverty was women with children but with no spouse present

Largest counties in population were:

King (1,507,305), Pierce (586,203), Snohomish (465,628), Spokane (361,333), Clark (238,053),
 Kitsap (189,731), Yakima (188,823), Thurston (161,238), Whatcom (127,780)
 and Benton (112,560)

Counties showing the greatest percentage increase in population were:

Snohomish (27.4 percent), Island (27.2 percent), San Juan (22.9 percent),
 Jefferson (22.6 percent) and Kitsap (22.4 percent)

Ten largest cities in Washington were: Seattle (516,259), Spokane (177,165), Tacoma (176,664),
 Bellevue (86,872), Everett (69,974). Federal Way (first year counted as separate city 67,449),
 Yakima (54,843), Bellingham (52,179), Vancouver (46,380) and Kennewick (42,152)

76% of Washington's total population, 717,948 people lived in urban areas

Washington has a highly educated population:

21% of all Washington residents fifteen years and older earned at least a high school degree

19.7% had earned a bachelor's degree or higher

almost 5% of the population held a Master's Degree, Professional school degree, or Doctorate

TWO NEW CITIES COME INTO EXISTENCE IN WASHINGTON STATE

(Proposals to incorporate the Federal Way area as a city dated back as far as [1955]⁸¹⁰
 voters rejected ballot requests in [1971], [1981], and [1985]
 because many residents believed the area's rapid growth had been left unchecked
 by the King County Council, success was finally achieved [March 14, 1989])
 City of Federal Way in south King County was incorporated -- February 28, 1990
 more than 300 people attended a celebration held at the Sportsworld Lanes bowling complex
 it featured a large birthday cake, a baby grand piano, champagne toasts, speeches
 and a congratulatory letter from President George Bush

(Pacific Highway South in South King County had long been the scene of criminal activities
 spectacular growth in air travel brought millions of dollars in commerce
 to the area around Sea-Tac International Airport⁸¹¹
 hotels, parking lots, restaurants, catering companies, and related businesses
 generated tax revenues that went to King County but services to the area

⁸¹⁰ Kit Oldham, *City of Federal Way incorporates on February 28, 1990*, Essay 4213, HistoryLink.org, June 30, 2003.

⁸¹¹ David Wilma, *City of SeaTac incorporates on February 28, 1990*, Essay 7689, HistoryLink.org, March 15, 2006.

such as fire protection and law enforcement were inadequate
local community leaders filed a petition for incorporation signed by 850 voters [January 1988]
sixty percent more than was needed to place the matter into consideration
residents near Sea-Tac International Airport narrowly voted by mail to incorporate
as the city of SeaTac [March 14, 1989]
SeaTac officially became a city -- February 28, 1990
with a celebration involving a student poster contest, a three-and-a-half-foot ice sculpture,
the Tyee High School Band and the Seattle Christian School Choir

WASHINGTON TEACHERS GO ON A ONE-DAY STRIKE

An idea for a widespread walkout began in Everett [spring 1989] when about 2,500 teachers met
they gave legislators a failing grade for their lack of support toward public education
since then conflict between Governor Booth Gardner and the Washington Education Association
developed over salaries

teachers wanted \$611 million set aside in the state budget for pay raises

Governor Gardner proposed the money be spent on teacher training, school construction,
early childhood education and education reform

More than 200,000 students missed one day of school because of a walkout

as at least 13,000 teachers and school employees who walked off their jobs

to protest inadequate salaries -- February 13, 1990

about thirty school districts, all in Western Washington, were involved

every Puget Sound district with the exception of Fife School District was closed for the day
many teachers explained the state's inadequate support of schools was forcing them
to leave the profession or work under undesirable conditions

Governor Gardner was scheduled to address a rally of thousands in the Capitol Rotunda

teachers were bused in from as far away as Kelso and Mount Vernon

Fife was the only Puget Sound school district to remain open during the walkout

but administrators said the district's action

“in no way implies a lack of support”⁸¹² for its teachers

principals and substitutes filled in for the 100 teachers who struck

about forty of the district's 2,100 students marched in front of Fife High School

and the neighboring district administration building carrying signs that read

“No school, no future,” and “There's no sub for a real teacher”

STATE LEGISLATURE EXPANDS McNEIL ISLAND CORRECTIONS CENTER

Legislators appropriated \$392 million to expand the McNeil Island Corrections Center -- 1990

to build two new 1,000-bed prisons -- first phase was begun at a cost of \$90 million

(Washington's Department of Corrections built a total of five new medium-security residential units,
each housing 256 inmates, and a sixth segregation unit with 129 one-man cells⁸¹³

boosting the corrections center capacity from about 800 to 1,300 inmates

⁸¹² Joe Haberstroh, Ron Judd, Mary Cronin, Margaret Bakken, *The Seattle Times*, *4,000 Teachers Strike For The Day*, February 13, 1990.

⁸¹³ Daryl C. McClary, *McNeil Island Corrections Center, 1981-present*, Essay 5239, HistoryLink.org, April 24, 2003.

construction was completed [1993]
original cellblock was demolished and was replaced with an inmate services building
housing a hospital, educational center, recreation room, hobby shop, music room [1994]
and gymnasium)

GREEN RIVER KILLER STRIKES AGAIN

Marta Reeves, age thirty-six, lived apart from her estranged husband and four children
her husband last heard from Marta when she called and asked for money -- March 5, 1990
Marta's husband received her driver's license in the mail a month later
no fingerprints were able to be taken from the license
her husband reported her missing and police began looking for her to no avail
(Marta's remains were discovered by mushroom pickers close to Highway 410
in the vicinity of Enumclaw [September 20, 1990])

HISTORY OF THE PUYALLUP INDIAN RESERVATION⁸¹⁴

Territorial Governor and Superintendent of Indian Affairs Isaac Stevens
negotiated the Medicine Creek Treaty with the Nisqually and Puyallup Tribes [1854]
these Native Americans gave up their claims to vast portions of land in Washington Territory
in exchange for a small reservation along the Nisqually River, Puyallup River
and the land along Commencement Bay, hunting and fishing rights
and promises of cash payments
Indian War in Eastern and Western Washington followed treaty the [1855-1956] negotiations
in response to Indian grievances President Franklin Pierce expanded the Puyallup reservation
to 18,060 acres
Tacoma grew slowly [1860s] and [1870s]
but the arrival of the transcontinental railroad [1883] spurred settlement in the region
Puyallup Indian reservation land became prime real estate
Congress passed the Dawes Severalty Act [1887] that authorized the President of the United States
to survey Indian tribal land and divide it into allotments for individual Indians
this led to manipulation and disarray as greedy developers and con artists s
old the Indians' land away from them
by [1934] the Puyallup Tribe held only thirty-three acres including the tribal cemetery
when the Puyallup River was placed into a channel [1894-1895], twelve acres of former riverbed
was left high and dry
this land was occupied by the Port of Tacoma [1950] but not paid for
Native Americans began to assert their Indian Treaty fishing rights using acts of civil disobedience
as well as bringing legal actions [beginning in the 1960s]
they also demanded their rights to reservation land -- especially land dishonestly taken from them
Puyallups sued [1978] to regain title to the twelve acres used by the Port of Tacoma
U.S. Supreme Court [1984] let stand a lower court ruling in favor of the tribe
Puyallup Indians received a \$77 million judgment for their loss

⁸¹⁴ David Wilma, *Puyallup Tribe of Indians accepts a \$162 million settlement for lost land on March 25, 1990*, Essay 7969. HistoryLink.org, October 21, 2006.

Puyallups next sued the Union Pacific Railroad to reacquire 160 acres of former reservation land along Commencement Bay and the Puyallup River

also named in this suit was the Port of Tacoma and the Burlington Northern Railroad

it was also noted that the entire city of Fife, Interstate 5 and part of downtown Tacoma were all located on Indian land taken but not paid for

Because the original ownership of the land was in question

all titles to land on the original 18,060 acres of reservation were called into question

because of this disputed ownership, buying and selling property on the original reservation was very difficult

Fearing an unfavorable judgment in court, the Port of Tacoma, Tacoma and Fife chose to negotiate efforts to reach a settlement with the Puyallup Indians ran for two years [1985-1987]

Tribal Council signed off on two settlement proposals raising intense feeling among Puyallups tribal members voted to reject both deals -- they were not willing to sell their birthright

seeking a better settlement offer, the Puyallup Tribe sent eviction letters

to dozens of farmers and landowners on 270 acres that lay inside the reservation boundaries

As chairman of the U.S. House Committee on Indian Appropriations,

Congressman Norm Dicks asked U.S. Senator Daniel K. Inouye (D-Hawaii) to enter the case as Chairman of the Senate Select Committee on Indian Affairs

Inouye got talks started again

PUYALLUP TRIBE ACCEPTS A \$162 MILLION FOR LOST RESERVATION LAND⁸¹⁵

Negotiations with the Puyallup Indians were successfully completed

Puyallup Indians abandoned their claim to about 18,060 acres

of their Commencement Bay reservation -- March 25, 1990

In return they were to receive \$162 million in cash, real estate and economic development programs

900 acres of waterfront property, a trust fund, a payment of \$20,000 per tribal member,

employment opportunities and a subsidy to improve the Blair Waterway

including a new bridge

it was the second largest settlement between U.S. government and Indians in American history

money came from the state and federal governments, corporations and municipalities

This settlement freed property titles and allowed for development of the Port of Tacoma

first signature on the agreement was that of Tacoma Mayor Karen Vialle

whose great grandfather had witnessed the signing of the [1855] Medicine Creek Treaty

that first established the Puyallup Reservation

GROWTH MANAGEMENT ACT IS PASSED BY THE STATE LEGISLATURE⁸¹⁶

Traditionally, zoning and land-use regulation was the domain of local rather than state government

Washington's Legislature first authorized counties and cities to engage in land-use planning

and to adopt zoning controls [1937] -- but that legislation made planning and zoning optional

An increased in the significance of the environmental movement [1970s]

⁸¹⁵ David Wilma, *Puyallup Tribe of Indians accepts a \$162 million settlement for lost land on March 25, 1990*, Essay 7969. HistoryLink.org, October 21, 2006.

⁸¹⁶ Kit Oldham, *Washington Legislature enacts Growth Management Act on April 1, 1990*, Essay 7759, HistoryLink.org, May 14, 2006.

led progressive Republican Governor Dan Evans to seek passage of landmark laws like the State Environmental Policy Act (SEPA) modeled on the National Environmental Policy Act sponsored by Washington U.S. Senator Henry Jackson [1969] and the Shoreline Management Act [1971]

however, state legislative efforts to enact a State Land Planning Act failed so federal environmental regulations co-existed

with the older [1937] optional state and local planning and zoning efforts

Progress toward protecting the environment was slow in the late [1980]:

- commuters in King County and around Puget Sound sat in gridlocked traffic;
- farms continued to disappear as open space and wildlife habitat was lost;
- surface water runoff and pollution threatened salmon streams;
- voters who previously welcomed new development began demanding that politicians take action to protect their environment and their quality of life

WASHINGTON'S LEGISLATORS PUTS ENVIRONMENTAL PROTECTIONS INTO PLACE

State legislators give final approval to Washington's Growth Management Act (GMA)

on the last day of a special legislative session -- April 1, 1990

this law was part of a growth management "revolution" triggered by voter frustration over the effects of rapidly increasing development, especially in King County and the surrounding central Puget Sound area

after vetoing some provisions Governor Booth Gardner signed the bill into law three weeks later

GMA (and almost annual subsequent amendments) transformed Washington's land-use regulations it required the largest and fastest growing counties

to conduct comprehensive land-use and transportation planning in an effort to concentrate new growth in compact "urban growth areas,"

and to protect natural resources and environmentally critical areas

GMA required heavily populated counties and those with a rapid growth rate to adopt growth-management comprehensive plans

and to implement them through "development regulations"

thirteen "planning goals" were established to guide preparation of local plans and regulations local governments were to:

- direct most growth into urban areas,
- require adequate transportation facilities for new development,
- protect natural resource lands and environmentally critical areas,
- encourage economic development,
- protect property rights

However, GMA was a political compromise at best -- many of the details were left unaddressed

GMA was amended or revised by almost every legislative session since its first adoption:

- planning goals were often "mutually competitive,"
- legislators added numerous provisions (dubbed "GMA II") to the Act [1991],
- other decisions were left to the courts

U.S. FOREST SERVICE PLANS TO HARVEST TREES IN COLVILLE NATIONAL FOREST⁸¹⁷

Harvesting of the national forests was extremely controversial
and was made more so by proposed efforts to save the northern spotted owl's habitat
Negotiations regarding the taking of trees from the Colville National Forest had been rancorous
but it appeared there was an agreement among environmentalists, the Forest Service
and timber interests -- April 3, 1990
environmentalists and the Forest Service signed the agreement
to allow 80 million board feet of lumber to be harvested annually
an attorney for Boise Cascade Corporation said he would sign that morning
but he backed out thus voiding the agreement

ANOTHER GUILTY PLEA IS TAKEN IN THE IRAN-CORTRA AFFAIR

National Security Advisor John Poindexter plead guilty to five counts of conspiracy, perjury,
obstruction of justice, defrauding the government and alteration and destruction of evidence
he is the first Reagan government official to be sentenced to prison
with a sentence of six months -- April 7, 1990

ANOTHER EFFORT IS MADE TO HARVEST THE COLVILLE NATIONAL FOREST

U.S. Forest Service representatives placed a completely new proposal for consideration on the table
rather than allowing the harvest of 80 million board feet of lumber per year
timber companies could take 123 million board feet each year
Environmental groups filed an appeal of the Forest Service's plan
in a hearing, an environmental attorney called the plan a "joke"
he said that 123 million board feet a year would destroy the forest in ten years
(U.S. Forest Service rejected the environmentalists' appeal [1991]
environmentalists had no option but to sue)

NORTHERN SPOTTED OWL IS PLACED ON THE ENDANGERED SPECIES LIST⁸¹⁸

U.S. Fish and Wildlife Service declared the Spotted Owl a threatened species -- June 23, 1990
because the owl lives in old-growth forests logging these areas became off-limits for logging
Logging industry leaders estimated up to 30,000 of 168,000 jobs in the state would be lost
estimates by the U.S. Forest Service predicted a similar number
Controversy regarding the status of the northern spotted owl
pitted individual loggers and small sawmill owners against environmentalists
bumper stickers appeared that read:
"Kill a Spotted Owl—Save a Logger"
"I Like Spotted Owls—Fried"
Protests grew violent in some areas
courts entered the dispute with alternating decisions to resume or halt timber sales being issued

⁸¹⁷ Jim Kershner, *Seven environmental groups file a lawsuit seeking to block a U.S. Forest Service plan to log 123 million board feet of timber annually in the Colville National Forest on February 13, 1992*, Essay 9784, HistoryLink.org, March 28, 2011.

⁸¹⁸ David Wilma, *U.S. Forest Service protects the northern spotted owl by limiting timber sales on August 7, 1986*, Essay 5319, HistoryLink.org, February 28, 2003.

losing side appealed nearly every decision

NEGOIATIONS REGARDING THE COLVILLE NATIONAL FOREST HARVEST BROKE DOWN⁸¹⁹

Environmentalists, the U.S. Forest Service and timber interests could not reach an agreement on the intensity of logging to be allowed in the Colville National Forest -- July 1990
Representatives of the timber industry blamed the breakdown on “radical preservationists”

GOODWILL GAMES OPENS IN SEATTLE⁸²⁰

Cable television tycoon Robert Edward “Ted” Turner III decided to sponsor an international sporting event
he was troubled by the political boycotts of the Olympics by the U.S [1980] and by the U.S.S.R. [1984]
Turner wanted something that would bring the peoples of the world together
First Goodwill Games was held in Moscow [1986]
Turner lost \$26 million backing the venture, but was undeterred about pursuing another
Seattle sports promoter Bob Walsh created the Seattle Organizing Committee to bring the Goodwill Games to Seattle
Seattle’s committee won the bid from Turner for the 1990 games [June 19, 1986]
Walsh began putting together a \$180 million production
corporations were solicited for sponsorships and governments were asked to cooperate and to provide additional resources

Principal venue was at the University of Washington in Husky Stadium and the Edmonson Pavilion
King County Aquatics Center was constructed in Federal Way
Seattle residents were recruited to host Soviet visitors in their homes

Goodwill games began -- July 20, 1990

opening ceremony took place in Husky Stadium -- July 21
former President Ronald Reagan and President George Bush sent a video
organizers neglected, however, to invite Seattle Mayor Norm Rice
(Walsh publicly apologized later)

As an athletic competition, the seventeen-day games were established as a world-class event:

- records were set and there were no untoward incidents;
- Husky Stadium got a new track;
- Edmonson Pavilion got a new floor;
- Federal Way got a new aquatics center;
- Space Needle got a 600-pound faux gold medallion for a while

Financially, the Goodwill Games were a bust -- of the 3,500 athletes expected,

2,300 from fifty-four countries appeared to compete in twenty-one sports events

held in Western Washington, Spokane and the Tri-Cities

competitions did not draw the spectators that were promised -- throngs of tourists did not appear

⁸¹⁹ Jim Kershner, *Seven environmental groups file a lawsuit seeking to block a U.S. Forest Service plan to log 123 million board feet of timber annually in the Colville National Forest on February 13, 1992*, Essay 9784, HistoryLink.org, March 28, 2011.

⁸²⁰ David Wilma, *Ted Turner’s Goodwill Games open in Seattle on July 20, 1990*, Essay 5658, HistoryLink.org, February 25, 2004.

hotels had vacant rooms and restaurant business was down by thirty percent or more
City of Seattle had to accept from the event vendor \$141,000 in unsold tickets
as payment for fire protection and emergency medical services
Ted Turner personally lost \$44 million

EVENTS IN THE PERSIAN GULF RAPIDLY ELEVATE THE CONCERNS OF WORLD LEADERS

Tensions among Middle Eastern neighbors had long run high
anti-American sentiments in Iran, Pakistan and Afghanistan were countered
by pro-American feelings in Jordan Lebanon, Iraq, Turkey and Saudi Arabia
of course, pro- and anti-Americans factions exist in opposition to the policy of each nation
Arab control of Middle Eastern oil added to tensions both internally and externally
Iraq accused Kuwait of stealing oil from Iraq's oil field near the Iraqi-Kuwaiti border -- 1990
Iraq led by President Saddam Hussein invaded Kuwait -- August 2, 1990
which immediately triggered fears that the world's price of oil,
and therefore control of the world economy, was at risk
Iraqi invasion and occupation of Kuwait was universally condemned by world powers
United Nations Security Council ordered a global trade embargo against Iraq -- August 6
United States launched Operation Desert Shield began -- August 7
as U.S. troops arrived in Saudi Arabia request of its monarch, King Fahd

GULF WAR QUICKLY EXPANDS AS THE UNITED STATES RESPONDS TO THE CRISIS

President Saddam Hussein proclaimed the annexation of Kuwait -- August 8, 1990
Kuwait became the ninetieth province of the nation of Iraq
during the Iraqi occupation, about 1,000 Kuwaiti civilians were killed
and more than 300,000 Kuwaiti residents fled the country
United States dispatched two naval battle groups to the Gulf built around
aircraft carriers USS *Dwight D. Eisenhower* and USS *Independence* to the Gulf
battleships USS *Missouri* and USS *Wisconsin* were also sent to the region
to establish a naval blockade in the Persian Gulf
sixty-three U.S. Air Force F-15s landed in Saudi Arabia -- August 8
and immediate began round the clock patrols of the Saudi-Kuwait-Iraq border
forty-eight Air National Guard F-16s joined flying 2,000 combat missions
and dropping four millions pounds of munitions
United States established a naval blockade of Iraq -- August 12
(Military buildup continued until 543,000 troops were stationed in the region [September 14]
much of the material was airlifted or carried to the staging areas via fast sealift ships)

KING COUNTY RESTRICTS DEVELOPMENT IN ENVIRONMENTALLY SENSITIVE AREAS⁸²¹

King County had lost two-thirds of the wetlands it had when created [1850s]
wetlands play a critical environmental role by acting as giant sponges
to soak up stormwater and prevent flooding and by providing habitat for wildlife of all kinds

⁸²¹ Kit Oldham, *King County limits development in environmentally sensitive areas on August 29, 1990*, Essay 7886, HistoryLink.org, August 14, 2006.

their ongoing loss led to worsening floods and declines in fish and animal species
similarly, clearing and building on steep slopes caused greater erosion and flooding
at times this resulted in damaging landslides
also, development near streams further depleted the region's historic salmon population
and other wildlife

King County had initially enacted a sensitive areas ordinance [1979]

but the original measure was based on project-by-project negotiations with developers
it did not set general standards or procedures for enforcement

An ordinance was proposed to impose stricter regulations

it would bar most construction in wetlands and on streambanks and steep slopes
and require buffer strips between development and these sensitive areas

this proposal was controversial from the start

many developers, builders, and property owners, particularly in rural areas of the county,
denounced the ordinance as going too far

they said it denied them use of their property without compensation

environmental activists were concerned the proposal was not strong or enforceable enough

King County residents demanded more input

hearings on a proposed Sensitive Areas Ordinance stretched out for over a year

Council members approved a 105-page Sensitive Areas Ordinance

by a vote of 8-1 --August 29, 1990

King Count's Sensitive Areas Ordinance overlapped with the state Legislature's
enactment of the Growth Management Act (GMA) [April 1, 1990]

environmental activists successfully stated their case

Republican council member Paul Barden said: **"A lot of people feel they have an unconditional right to do what they want with their property ... But I have fashioned the rule of 75: No one who owns**

land today owned it 75 years ago, and our responsibility to our children and grandchildren is such that we have to turn over that real property to them in usable form."⁸²²

fellow Republican council member Brian Derdowski noted: **"I don't believe people should be compensated for doing something they have no right to do ... They have no right to pollute or damage other property ... so there is no right to compensation. Property rights are not absolute."**⁸²³

SEVERAL SCHOOL DISTRICTS IN WASHINGTON STATE FACE STRIKING TEACHERS

Washington Education Association (WEA) affiliates again walked picket lines -- 1990

- Mukilteo teachers (MEA) struck for thirty-two days in defiance of a court injunction;
- Lake Washington School District teachers (LWEA) went on strike for ten days
no court order was issued during the strike'
- University Place Education Association (UPEA) members stayed out for eight days
no court order was issued during the strike;
- Yakima teachers (YEA) struck for one day in defiance of a court injunction;
- Castle Rock staff members walked off the job for one day

⁸²² *The Seattle Times*: "Council Oks Protection For Sensitive Areas," August 30, 1990.

⁸²³ *The Seattle Times*: "Council Oks Protection For Sensitive Areas," August 30, 1990.

they returned to work without a court order being issued

PRESIDENT GEORGE H.W. BUSH CALLS FOR A “NEW WORLD ORDER”

In a nationally televised speech before a joint session of Congress -- September 11, 1990
President George H.W. Bush addressed the crisis in the Middle East
he stated he saw this as an opportunity for a “New World Order”
he threatened to use military force to remove Iraqi soldiers from Kuwait

SEATTLE TRANSIT TUNNEL OPENS FOR SERVICE

Construction on the 1.3 mile tunnel under downtown Seattle had begun [March 6, 1987]
it was completed on schedule three and a half years later⁸²⁴
Transit tunnel was designed to help relieve bus traffic on downtown Seattle streets
and, at some future date, to accommodate light rail trains
dual-mode buses (diesel and electric) were used to reduce downtown pollution
while allowing the buses to operate on suburban routes
five stations serve the transit tunnel: Convention Center, Westlake Center, University Street,
Pioneer Square and International District/Chinatown Tunnel Station
Metro held a Grand Opening -- September 14, 1990

ANOTHER UNIVERSITY OF WASHINGTON PROFESSOR SHARES A NOBEL PRIZE

E. Donnall Thomas, M.D. received the honor for forty years of bone marrow transplant research⁸²⁵
much of which was conducted at the Seattle-based Fred Hutchinson Cancer Research Institute
Dr. Thomas developed bone marrow transplant protocols
to help treat leukemia, lymphomas, and other blood-related diseases
bone marrow produces red and white blood cells
therapy required the destruction of the patient’s diseased marrow with drugs or radiation
healthy marrow was then rebuilt through the transfusion of donor marrow cells
(or, more recently, by marrow-growing “stem cells”)
Dr. Thomas shared the prize -- October 8, 1990
with Joseph E. Murray, M.D. of Boston who developed related therapies
to retard tissue rejection in organ transplants

U.S. GOVERNMENT APOLOGIES TO FIVE JAPANESE AMERICANS⁸²⁶

United States government officially apologizes to five Japanese Americans, ages 100 and over,
who had been unjustly incarcerated during the internment of West Coast Japanese Americans
during World War II in a ceremony held in Seattle’s Nisei Veterans Hall -- October 14, 1990
Harry Nakagawa (100 years old), Kichisaburo Ishimitsu (103), Uta Wakamatsu (102),
Shoichiro Katsuno (105), and Frank Yatsu (107) each receive, by way of redress,

⁸²⁴ Walt Crowley, *Bus service begins in downtown Seattle transit tunnel on September 15, 1990*, Essay 2702.
HistoryLink.org, September 15, 2000.

⁸²⁵ Walt Crowley, *E. Donnall Thomas named co-recipient of Nobel Prize in Medicine on October 8, 1990*, Essay
2001, HistoryLink.org, December 29, 2001.

⁸²⁶ Priscilla Long, *Government apologizes and awards redress checks to Japanese American centenarians in Seattle
on October 14, 1990*, Essay 3646, HistoryLink.org, November 28, 2001.

a \$20,000 check as required by the Civil Liberties Act [1988]
Nisei Veterans Hall was packed with joyful and tearful celebrants
crucial impetus and essential organizing for the redress bill had come from people in Seattle

STATE VOTERS HAVE THEIR SAY

Voters made no change in the make-up of the State House of Representatives and State Senate
Republicans maintained their one vote majority in the State Senate
while they picked up five seats in the State House of Representatives
still leaving Democrats with a fifty-eight to forty majority
Two Initiatives were considered by the voters of the state
Initiative 518 proposed to increase the state minimum wage from \$2.30 to \$3.85
I-518 passed 2,354,454 For and 414,926 Against
Initiative 547 proposed to add to environmental protection through land use and development fees
I-547 failed by a vote of 327,339 For and 986,505 Against

LAKE WASHINGTON'S LACEY V. MURROW FLOATING BRIDGE IS HIT BY DISASTER

Lacey V. Murrow I-90 Floating Bridge needed resurfacing and was to be widened
in order to meet the necessary lane-width specifications for the Interstate Highway System⁸²⁷
it was decided to use high-pressure water to remove the sidewalks on the bridge deck
in preparation for constructing additional lanes on the bridge
water from the removal process was considered contaminated under environmental law
it could not be allowed to flow into Lake Washington
engineers decided the pontoons could be used to temporarily store the contaminated water
watertight doors for the pontoons were removed in preparation
Lacey V. Murrow Floating Bridge was hit by a large storm -- November 22, 23 and 24, 1990
some of the open pontoons filled with lake and rain water
workers saw the bridge was about to sink and started pumping out the pontoons -- November 24
local news cameras were poised and ready to show post-Thanksgiving TV viewers
a once-in-a-lifetime telecast of the demise of the historic I-90 span
Lacey V. Murrow Floating Bridge sank when one pontoon filled and dragged the rest under water
because they were cabled together there was no way to separate the sections under load
contaminated water was dumped into the lake along with tons of bridge material
Fortunately, no one was killed or hurt since the bridge was closed for renovation
because the sinking took some time it all was captured on film and shown on live television

UNITED NATIONS AUTHORIZES MILITARY INTERVENTION IN IRAQ

United Nations Security Council passed UN Security Council Resolution 678 -- November 29, 1990
which authorized the military intervention in Iraq if that nation did not
withdraw its forces from Kuwait and free all foreign hostages by [January 15, 1991]

HOWARD SCHULTZ LEADS STARBUCKS COFFEE

⁸²⁷ Alan J. Stein, *Lacey V. Murrow Memorial Bridge (Lake Washington Floating Bridge) sinks on November 25, 1990*, Essay 2002, HistoryLink.org, January 1, 2000.

Howard Schultz, with the help of local investors, purchased the Starbucks Company franchise -- 1990
Starbucks Coffee turned a profit for the first time
Starbucks became the first privately held corporation in North America
to offer stock options to eligible full and part-time employee-partners
Starbucks grew to become the leading retailer, roaster and brand of specialty coffee in the world
the company became the exclusive supplier of coffee for Nordstrom stores nationwide
other alliances included Barnes & Noble, Starwood Hotels & Resorts, Westin Hotels,
Marriott Hotels, Horizon Airlines, United Airlines and a number of leading grocery chains
Starbucks joined forces with Pepsi Cola when Howard Schultz
developed, produced and distributed new bottled Frappuccino coffee drinks
Starbucks also developed a line of premium ice creams
produced through a partnership with Dreyer's Grand Ice Cream

BOEING RECEIVES A CONTRACT TO BUILD A NEW AIR FORCE ONE

Boeing 707 had been used by United States presidents as their flying office for almost thirty years
when President John F. Kennedy boarded the first Boeing Air Force One aircraft, SAM 26000
Boeing's 747-200B aircraft replaced the older presidential airplanes -- 1990
Air Force One has three decks, like a regular Boeing 747
its 4,000 square feet of floor space is reconfigured for presidential duties
its lowest deck is mostly cargo space to carry luggage and onboard food supplies
there are three entrances to the airplane -- two on the lower and one on the main deck
typically the president boards and deplanes from the front main deck entrance
while journalists and other passengers enter and exit at the lower rear door
main passenger area is located on the second deck
facilities for the press and other passengers are like an ordinary airliner's first-class cabin
front of the aircraft is referred to as the "White House"
president's executive suite includes a lavatory and shower, vanity and double sink
sleeping quarters feature two couches that can be converted into beds
a private office, or the president's "Oval Office aboard Air Force One"
includes a 50-inch plasma screen television which can be used for teleconferencing
there is an area along the corridor for two Secret Service agents
there are separate quarters located in the aft area of the main deck
for guests, senior staff, Secret Service and security personnel and the news media
office areas are equipped with eighty-seven telephones and nineteen televisions
a medical annex is also onboard which includes a fold-out operating table,
emergency medical supplies and a well-stocked pharmacy
every flight is staffed by a doctor and a nurse
meals are prepared in two galleys that together they can feed up to 100 people at a time
President gets his own menu
guest for meals sit near the center of the aircraft outside of the "White House"
upper deck contains the cockpit and communications equipment
there are also secure and non-secure voice, fax and data communications facilities
Air Force One can fly 7,800 miles, roughly one-third the distance around the world, without refueling
but it can be refueled during flight from a tanker aircraft

protocol dictates the aircraft must fly preceded by an aerial convoy of several cargo transports which carry the helicopters, motorcade vehicles and other equipment required by the presidential entourage

MALCOLM STAMPER, THE MAN WHO BUILT THE 747, RETIRES FROM BOEING

Malcolm Stamper was the longest serving President in Boeing history when he retired -- 1990 because of the success of the 747 Boeing seemed to face no serious threat either from McDonnell Douglas or from European upstart Airbus

Stamper predicted the company would remain "Number 1" for the foreseeable future

In addition to the presidency of Boeing, Stamper served on boards of directors of Nordstrom, Chrysler, Travelers Insurance, Pro Air, the Seattle Art Museum and the Smithsonian Institution

Immediately after retiring, Malcolm Stamper started a children's book publishing company with his wife and his daughter

he also founded a Boston charity that distributed free books to hundreds of thousands of children

U.S. NAVAL BLOCKADE LAUNCHES AN ATTACK ON IRAQ

Battleship USS *Missouri* was moved to the Strait of Hormuz in the Persian Gulf -- January 3, 1991

Missouri prepared to launch Tomahawk Land Attack Missiles and to provide naval gunfire support as required

ANTI-WAR PROTESTORS BEGIN DEMONSTRATIONS IN SEATTLE⁸²⁸

Army reservists were called to active duty across the nation

security measures against terrorism were upgraded

Approximately 1,500 people gathered at Seattle's Gas Works Park -- January 12, 1991

to protest the impending war

In downtown Seattle -- January 14

almost 2,500 anti-war protesters marched to protest the Gulf War build-up

two-dozen people were arrested for stopping traffic on the Interstate 5 freeway

OPERATION DESERT STORM (ALSO KNOWN AS THE FIRST GULF WAR) BEGINS

(United Nations had set a [January 15, 1991] deadline for Iraq to withdraw unconditionally from Kuwait [November 8, 1990] -- that date passed without effect

President George H.W. Bush won congressional approval to launch an attack)

initial conflict to expel Iraqi troops from Kuwait began with an aerial bombardment

early in the morning of January 17, Baghdad time [January 16 U.S. time]

U.S.-led coalition forces launched the most devastating air assault in history

against military targets in Iraq and Kuwait

USS *Missouri* fired her first Tomahawk missile at Iraqi targets -- 01:40 a.m. January 17

(followed by twenty-seven additional missiles over the next five days)

⁸²⁸ David Wilma, *Anti-war protesters march against the Gulf War on January 14, 1991*, Essay 3337, HistoryLink.org, June 6, 2001.

IRAQ DUMPS CRUDE OIL INTO THE PERSIAN GULF

Shelling by USS *Missouri* and USS *Wisconsin* led to the Iraqi belief that the United States would launch an amphibious assault in Iraq or Kuwait
In an effort to defend against U.S. Marine forces coming ashore about 400 million gallons of crude oil were dumped into the Persian Gulf by Iraq -- beginning January 23, 1991
this caused the largest offshore oil spill ever to that time

KUWAIT OIL FIELDS ARE SET AFIRE

Retreating Iraqi forces set 700 Kuwait oil wells on fire as part of a scorched earth policy -- January-February
land mines were placed around the oil wells making military clean-up necessary before the fires could be put out
Fires burned out of control because of the dangers of sending in firefighting crews about six million barrels of oil were lost each day for approximately ten months causing widespread pollution
(these oil fires were linked with what was later called Gulf War Syndrome)

HARRIETTE (Hiahl tea) SHELTON WILLIAMS DOVER PASSES AWAY

Native American activist and leader Harriette Dover long served the Indian community she Tulalip Reservation's Boarding School [1911-1922]
there she suffered the indignities shared by all Native children who attended such schools subjected to harsh discipline, she was beaten for speaking her native language she was forced to leave school for two years after showing signs of tuberculosis after eleven years she completed the sixth grade
Harriette graduated from Everett High School [1926]
Harriette's dream of going to college was abandoned when she met and married Francis Williams he was a Klallam Coastal Salish Native American who lived in Tacoma and worked as an Assistant Engineer on a steam-powered ferryboat that made a daily roundtrip from Seattle-to-Port Angeles-to-Victoria, B.C.
they married [July 1926] and moved to Seattle's Queen Anne Hill
Harriette assisted her father in challenging the federal government in an historic lawsuit [1927] to honor the many promises it had broken regarding the original [1855] Point Elliot Treaty this treaty had resulted in the Tulalip Reservation being initially established [1856] when the U.S. government forced various tribes to relocate and cohabitate on rocky land that had apparently never been the site of any tribe's permanent village an uneasy but enduring alliance was generated among the tribes sharing the land
Chief William Shelton's lawsuit was heard in Seattle's Federal Courthouse [1927]
this case was lost as was the appeal heard in San Francisco's Federal Appeals Court [1928]
Harriette and Francis Williams had a son as Wayne (Squil Quittue) Williams was born [1928]
family life became difficult when Francis transferred to the Mukilteo-to-Whidbey Island run home was established at Columbia Beach in Clinton, Washington [1935]
however, the Washington State Ferry system replaced the old steam-driven ships with new diesel-powered models -- Francis was laid off

he drifted around not checking in for many months at a time
Harriette ended up moving back to Tulalip and staying with her parents
Almost a year after the death of her father, Chief William Shelton, Harriette was elected
to serve on the Tulalip Tribes' seven-member Board of Directors (Tribal Council) [March 1939]
during her fourteen years on the board she became tribal chairwoman
finding work was difficult for Indians like Harriette
jobs in local cafes and stores in Everett and Marysville did not exist for Native Americans
Harriette took employment as a domestic servant for well-to-do white families
Harriette next took on a job stringing wiring in airplanes at Boeing's plant in Seattle [1942-1945]
after a failed attempt to reconcile, Harriette divorced Francis Williams
she took a position as postmaster of the Tulalip Reservation's U.S. Post Office
Harriette met a younger white man, George Dover, who stopped in while he was visiting his parents
who lived in a modest home on forested land leased from the tribes
they married [1950] and had a son William Dover who joined his half-brother, Wayne
Harriette (Hiahl-tsa) was active in community life over the ensuing years
in addition to serving on the Tribal Board of Directors she helped agitate and shame
Marysville Public School District into constructing a new school on the reservation
when the school opened [1959] she served as its first PTA president
Harriette joined the Everett Business and Professional Women's Club
she became a member of Everett's Church Women United group
as a freelance writer she contributed numerous essays published by the Seattle Post-Intelligencer
she earned a degree at Everett Community College while in her seventies
Most significantly, however, Harriette spent many years
studiously collecting and protecting scores of Coast Salish artifacts
she shared information about them and their historic importance
with tribal and non-tribal groups via displays and lectures both on and off the reservation
in the [1970s] she helped revive the ancient [and once outlawed] First Salmon Ceremony
which welcomed the arrival of each spring's new run of revered fish
Hiahl-tsa, the loving daughter of Siastenu (mother) and Wha-cah-dub (father) worked with
academic linguists to help save her people's Lushootseed language from extinction
there were reportedly only seventeen surviving elders of the Tulalip tribes
who still spoke Lushootseed when she died -- February 6, 1991

OPERATION DESERT STORM GROUND ASSAULT BEGINS

After a series of failed diplomatic negotiations, United States escalated its operations
in the Middle East as Operation Desert Shield was replaced by Operation Desert Storm
thirty-four nations joined in a coalition in the effort to remove Iraqi forces from Kuwait
U.S.-led coalition troops began their advance into Iraqi territory -- February 23, 1991
this war marked the beginning of live news on the front lines of the fight carried by CNN

KUWAIT IS QUICKLY LIBERATED FROM IRAQ CONTROL

Ground campaign cease-fire was declared 100 hours after it had begun -- February 26, 1991
aerial and ground combat had been confined to Iraq, Kuwait, and the border with Saudi Arabia
however, Iraq launched Scud missiles against coalition military targets in Saudi Arabia

and against Israel
ten Washington men died in the conflict
Residents of Kuwait City celebrated an end to their occupation
resistance groups set up headquarters to control the city

USS *MISSOURI* COMPLETES ITS MISSION IN THE PERSIAN GULF

Battleship USS *Missouri* fired 759 sixteen-inch projectiles while bombarding Iraqi forces and launched twenty-eight Tomahawk cruise missiles
During the campaign, *Missouri* was involved in a friendly fire incident with the U.S. frigate *Jarrett* when two rounds from *Jarrett's* Phalanx gun struck the *Missouri*
there were no casualties aboard the battleship
With combat operations out of range of the battleship's weapons,
Missouri went on patrol -- February 26, 1991
(USS *Missouri* completed its patrol in the northern Persian Gulf and sailed for home [March 21])

CAUSALTIES MOUNT IN OPERATION DESERT STORM

U.S. forces launched a "bulldozer assault" against a large and complex Iraqi trench network
anti-mine plows mounted on tanks and combat earthmovers
simply plowed over and buried alive the defending Iraqi soldiers -- February 24-26, 1991
U.S. commanders estimated thousands of Iraqi soldiers surrendered thus escaping live burial
Many Iraqi forces in a column of about 1,400 vehicles began leaving Kuwait on the main highway north of Al Jahra -- night of 26-27, February 1991
these vehicles and the retreating soldiers were attacked leaving ten miles of highways strewn with debris -- this became known as the "Highway of Death"

OPERATION DESERT STORM COMES TO AN END

It was announced by Saudi Arabian sources that Iraqi forces were in "full retreat" from Kuwait
Iraqi Prisoners of War reached more than 30,000 (and would climb to 63,000)
President George H.W. Bush declared a suspension of offensive combat -- February 27, 1991
he laid out conditions for a permanent cease-fire to take effect the next day
Kuwait Emir (leader) was restored to power
Kuwait paid the coalition forces \$17 billion for their war efforts

OPERATION DESERT STORM LEAVES THE MIDDLE EAST UNSETTLED

Relations between the United States and Iraq remained tense following the Gulf War
Iraq's ethnic and religious divisions, together with the brutality of the conflict,
laid the groundwork for postwar rebellions against Iraq's President Saddam Hussein
U.S. government urged Iraqis to rise up against Saddam -- but then did nothing to assist the rebellions
Iraqi military forces suppressed revolutionaries in the southern and northern parts of the country
this created a humanitarian disaster on the borders of Turkey and Iran
Saddam, having survived the immediate crisis in the wake of defeat, was left firmly in control of Iraq
U.S. officials continued to accuse Saddam of violating the terms of the Gulf War's cease fire
by developing weapons of mass destruction and other banned weaponry

UNITED NATIONS IMPOSES CONDITIONS ON IRAQ TO ASSURE PEACE

United Nations Security Council -- April 3, 1991

passed a Cease Fire Agreement to be imposed on Iraq that called for:

- destruction or removal of all Iraqi chemical and biological weapons;
- ending all research, development, support and manufacturing facilities capable of building ballistic missiles with a range greater than 150 kilometers;
- closure of all building ballistic missile repair and production facilities;
- recognition of Kuwait as an independent country,
- Kuwaitis who were missing were to be accounted for and returned of Kuwaiti property;
- Iraq must end its support for international terrorism

United Nations Security Council also created a special commission, UNSCOM, to inspect Iraq's chemical, biological and nuclear facilities

Iraq was required to turn over all biological and chemical weapons to Unscm for destruction

TEACHERS IN THIRTY-SIX SCHOOL DISTRICT GO ON STRIKE

Demanding increased state funding 20,000 teachers went on strike -- April 18, 1991

teachers demanded over the next two years a ten percent raise and improved retirement packages, more money for classroom supplies, additional school construction for smaller class sizes, special consideration for schools in low-income or urban areas and a school-based decision-making process

they vowed to stay out as long as it would take leaving 316,000 students without schools

State Superintendent of Public Instruction Judith Billings offered a three-part plan to end the strike:

- a blue-ribbon commission be created by Governor Booth Gardner to recommend proposals for future education funding;
- the State Senate would drop its plan to add \$66 million to the \$260 million contingency fund;
- school districts would be given the authority to apply a second-tier property tax levy for non-basic education programs

Governor Booth Gardner and the members of the State Legislature said lack of money kept them from meeting the demands of the striking school employees

TEACHERS RALLY IN OLYMPIA

During the teacher strike several days of rallies were held in Olympia

to present the teachers' concern to legislators

using speeches, chants and protest songs, teachers made their case for more education funding

classes were too crowded; books and materials were too old and salaries were too low

teachers carried signs criticizing Governor Booth Gardner and the Legislature

"If you can read this, thank a teacher," "If you find this difficult to read ask a legislator"

"THIS is next year"

State Patrol officially estimated the turnout at 12,000 to 13,000 -- the largest rally in state history

Governor Booth Gardner, the national chairman of the Education Commission of the States,

said the strike helped to focus attention on education -- but was not a winning strategy

he noted, "**There is no success in what's going on today.**"

he said he hoped the rally would encourage the public to “...take a few minutes out from what they’re doing and reflect on why the strike is occurring . . . and then I hope this ends.”⁸²⁹

Governor Gardner proposed a seven-week “cooling-off period” before he called a special session a resolution to start a special session passed the State Senate 48-0

but House Speaker Joe King said he did not know
when the House might take action on the proposal
it would need a two-thirds majority vote to pass

As a result of the pressure teachers applied during the walkout Governor Gardner advocated a “blue-ribbon committee” to discuss future education spending

SEATTLE’S “GRUNGE SOUND” SPREADS ACROSS THE NATION AND AROUND THE WORLD

Nirvana featuring Aberdeen’s Kurt Cobain and Krist Novoselic

faced competition from other Seattle bands such as

Pearl Jam featuring Eddie Vedder (vocals) and Seattle’s Stone Gossard (guitar),

Alice in Chains which featured local musicians

guitarist and songwriter Jerry Cantrell who attended Spanaway High School in Tacoma,

drummer Sean Kinney from Liberty Senior High School in Issaquah

lead vocalist Layne Staley who was a student at Meadowdale High School in Kirkland

Soundgarden’s singer Chris Cornell attended Seattle’s Shorewood High School

he was joined by Seattle-born lead guitarist Kim Thayil and bassist Hiro Yamamoto

Nirvana’s “Nevermind” and *Pearl Jam*’s “Ten” boosted the popularity of alternative rock -- 1991 they made grunge the most popular form of hard rock music at the time

SEATTLE’S CORCODILE CAFÉ & LIVE BAIT LOUNGE OPENS FOR BUSINESS⁸³⁰

Crocodile Café & Live Bait Lounge located in downtown Seattle opened -- April 30, 1991

known by locals as “the Croc,” it featured a restaurant/liquor/bar/mosh-pit

where local grunge bands performed including fabled top local rock bands

Nirvana, *Pearl Jam*, and *Mudhoney* as well as touring groups

Beastie Boys, *Cheap Trick*, *Green Day*, *Los Lobos*, *R.E.M.* and *The Strokes*

Croc became an internationally recognized icon of the “grunge rock” era

and one of the town’s most beloved live music venues

In spite of its notoriety, the Crocodile Café & Live Bait Lounge had been experiencing

financial, staffing and other difficulties for many year

it abruptly and sadly closed down [December 16, 2007]

WASHINGTON TEACHERS RETURN TO THEIR CLASSROOMS

Washington Education Association (WEA) urged its members to suspend the largest teacher strike in state history with the understanding it could resume at any time if warranted

WEA President Carla Nuxoll was upbeat as she noted local union presidents were willing to suspend the strike because of their belief House and Senate Democrats

⁸²⁹ Mark Matassa, *Seattle Times*, April 20, 1991.

⁸³⁰ Peter Blecha, *Seattle’s Crocodile Cafe & Live Bait Lounge opens its grungy doors for business on April 30, 1991*, Essay 8443, HistoryLink.org, December 28, 2007.

would fight for a larger education budget even if it means tapping the state's emergency contingency fund

Teachers participating in the largest multi-district strike in Washington State's history returned to the classroom without gaining a commitment to meet their demands from either the legislature or Governor Booth Gardner

When asked if the WEA gained anything in nearly two weeks of picketing and protests Senate Majority Leader Jeannette Hayner seemed unimpressed: "I don't see how," she said but later the Walla Walla Republican conceded "a number of positive things" had come from the strike like teachers observing how hard lawmakers work

"But as far as what comes out of the budget, I don't think they'll have any impact."⁸³¹

House Speaker Joe King, D-Vancouver said his strategy was to ignore the teachers and get on with the Legislature's other work

House Minority Leader Clyde Ballard, R-East Wenatchee, argued against calling for an immediate special session because to do so would encourage other groups to emulate the WEA

"I'm very concerned with the amount of intimidation that's been put on this Legislature to break out of the norm and do things in a different manner."⁸³²

Washington State's Legislature adjourned without addressing the WEA's demands for higher salaries, smaller class sizes, better books and supplies and more local control of schools when lawmakers were to reconvene to again work on the budget,

no one had promised there will be more money on the table than there was in mid-March when the House and Senate budgets were first proposed

Martin Flynn, spokesman for the Senate Republican caucus, said teachers were big losers they went back to school without securing any of the budget items they had demanded including raises of ten percent over the next two years and an education budget at least \$100 million larger than proposed by Senate Republicans who made the Legislature's best offer

"A couple of days ago it was a hundred million bucks. Now it's just 'stick around'"⁸³³

Flynn said, referring to the teachers' request that lawmakers remain in session this week in the end, even that request was not granted

Teachers in three school districts refused to end their walk-out and remained on strike one more day Central Kitsap, Puyallup and Fife

GOVERNOR'S COMMISSION ON EDUCATION REFORM AND FUNDING (GCERF) IS NAMED

When the State Legislature failed to adopt statewide education reform legislation, Governor Booth Gardner by executive order created the Governor's Commission on Education Reform and Funding (GCERF) GCERF was charged with developing a long-term plan to significantly improve student performance

⁸³¹ Mark Matassa, *Seattle Times*, April 20, 1991.

⁸³² Mark Matassa, *Seattle Times*, April 20, 1991.

⁸³³ Mark Matassa, *Seattle Times*, April 20, 1991.

LOGGING IN NATIONAL FORESTS STOPS BECAUSE OF THE NORTHERN SPOTTED OWL⁸³⁴

National Audubon Society and the Sierra Club Legal Defense Fund challenged in federal court whether the U.S. Forest Service's [1986] Forest Management Plan was inadequate to protect the Northern Spotted Owl

U.S. District Court Judge William Dwyer ruled in favor of the environmental groups -- May 23, 1991 he ordered the Forest Service to halt more than 75 percent of its planned timber sales thus blocking the harvest of 2 billion board feet of old growth forests comprising twenty percent of Washington state land until the agency developed a final plan to protect the threatened species

Judge Dwyer rejected arguments about the economic consequences of stopping timber sales he wrote: **"The timber industry no longer drives the Pacific Northwest's economy. Job losses in the wood-products industry will continue regardless of whether the northern spotted owl is protected. The argument that the mightiest economy on Earth cannot afford to preserve old-growth forests for a short time, while it reaches an overdue decision on how to manage them, is not convincing today."** (*The Seattle Times*)

Most Northwest timber sales simply stopped -- loggers and mill hands were laid off logging industry workers blamed environmentalists and the spotted owl for their unemployment environmentalists blamed mechanization and log exports for the loss of jobs

RESPONSE TO THE SUSPENSION OF TIMBER SALES IS QUICK IN COMING⁸³⁵

Endangered Species Act had led to increasing anxiety in the forest industry Olympic National Forest employees learned that staffing might be reduced by half because the timber harvest had declined by more than ninety percent Forks, Washington shut down to protest logging restrictions because of the northern spotted owl business, except city offices and banks, closed -- even the schools suspended classes almost one-third of the residents traveled en masse to Olympia to take part in a rally protesting critical habitat protections for the northern spotted owl -- May 23, 1991 there they joined timber industry workers from other Northwest timber towns

GREEN RIVER TASK FORCE IS ALL BUT DISBANDED

Only one investigator, Tom Jensen, remained on the Green River "Task Force" -- July 1991 no killer had been identified after nine years of investigation, forty-eight victims, more than 750 three-ring binders full of facts, the accumulation of thousands of suspects and the expenditure of \$15 million -- \$200,000 in computer time (Green River killer case remained dormant for ten years)

LONG SLOW COLLAPSE OF THE UNION OF SOVIET SOCIALIST REPUBLICS (USSR)

In the [1970s], a Communist-led revolution in Afghanistan began as Soviet forces entered the country at the request of a new Afghan government this occupation dragged on for years without achieving meaningful political results

⁸³⁴ David Wilma, U.S. Forest Service protects the northern spotted owl by limiting timber sales on August 7, 1986, Essay 5319, HistoryLink.org, February 28, 2003.

⁸³⁵ Julie Van Pelt, *Town of Forks shuts down to protest owl restrictions on May 23, 1991*, Essay 8395, HistoryLink.org, December 6, 2007.

it drained the economic resources of the Union of Soviet Socialist Republics (USSR)
Soviet Union's Chernobyl Nuclear Power Plant in the Ukraine on the Black Sea exploded [1986]
this posed an immediate and serious threat to the safety of republics within the Soviet Union
this disaster involved over 500,000 workers at a cost of an estimated eighteen billion rubles
which also crippled the Soviet economy

Communist-dominated government of the Soviet Union began to experience
politically independent pressures from the peripheries of the USSR in the Baltic region
Estonia demanded political autonomy [1987]

this independence movement was later followed by demands from Lithuania and Latvia
Baltic independence efforts were a serious challenge to USSR President Mikhail Gorbachev's policy
of government transparency, open discussion and accountability (glasnost)

Gorbachev did not want to crush the participants

but it became apparent their efforts could lead to the collapse of the Soviet Union
South of the Soviet Union the satellite Trans-Caucasus region joined the independence movement
as the Armenian-populated autonomous region in the Republic of Azerbaijan demanded
that they be granted the right to secede and join the Republic of Armenia
with whose population they were ethnically linked
massive demonstrations were held [1988]

Gorbachev's government refused to allow the population of secede -- war broke out
Nationalist movements emerged in the republics of Georgia, Ukraine, Moldova, Byelorussia
and the Central Asian republics of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan
and Uzbekistan

USSR's Communist Central Government was considerably weakened by these movements
they could no longer rely on the cooperation of government figures in the republics

REVOLUTION SWEEPS THROUGH THE UNION OF SOVIET SOCIALIST REPUBLICS (USSR)

In a last-ditch effort to save the Soviet Union then floundering under the impact
of the political movements which had emerged in the peripheries of the USSR

Soviet Union Vice President Gennady Yanayev and seven Soviet hard-liners
attempted a coup to overthrow the government -- August 19, 1991

USSR President Mikhail Gorbachev was placed under house arrest while vacationing in the Crimea
it was announced on state television that Gorbachev was very ill
he would no longer be able to govern

Citizens of the Soviet Union went into an uproar

massive protests were staged as more than 100,000 people rallied
outside the Soviet Union's parliament building in Moscow

in protest of the coup that deposed President Mikhail Gorbachev
other demonstration took place in Leningrad and in many other Soviet major cities
when the coup organizers tried to bring in the military to quell the protestors,
soldiers themselves rebelled -- they would not fire on their fellow countrymen

After three days of massive protest, the coup organizers surrendered

they realized that without the cooperation of the military they did not have the power
to quell the entire population of the country

Over the next two weeks Soviet satellite states declared their independence

Estonia August 20, followed by Latvia August 21, Ukraine August 23, Belarus August 25,
Moldova August 27, Azerbaijan August 30, Kyrgyzstan and Uzbekistan August 31

GOVERNMENT OF THE FORMER UNITED SOVIET SOCIALIST REPUBLIC (USSR) DISSOLVES

Congress of People's Deputies of the Soviet Union dissolved itself -- September 5, 1991

it was replaced by the Supreme Soviet of the Soviet Union and State Council of the Soviet Union
Leningrad, Russia's second largest city, restored its former name of Saint Petersburg -- September 6
More Soviet satellite states declared their independence

Republic of Macedonia September 8, Tajikistan September 9, Armenia [September 21]

Kazakhstan [December 16]

(However, [August 19, 1991] remained the most popular date to mark the fall of the Soviet Empire)

SEATTLE'S FREDERICK & NELSON DEPARTMENT STORE CLOSES

Frederick & Nelson, Seattle's premier department store, had been located in downtown Seattle
at 5th Avenue and Pike Street since [1918]

Frederick & Nelson filed for bankruptcy -- September 16, 1991

all five stores in the chain closed laying off 1,800 employees⁸³⁶

(Nordstrom purchased the location and opened a new downtown store [1998])

CELL THERAPEUTIC, INC. (CTI) INCORPORATES IN SEATTLE⁸³⁷

Cell Therapeutic, Inc., Seattle's newest biotech startup company, incorporated -- September 1991
(for the first seven months it existed it was known as Combined Therapeutics, Inc.)

this company was launched to explore a series of promising drugs and techniques

aimed at combating the harmful side effects of chemotherapy treatment

its leaders had first met while working at Seattle's Fred Hutchinson Cancer Institute

CTI established its goal and motto as "Making Cancer More Treatable"

CTI focused on improving already approved cancer treatment drugs

by making them more easily absorbed within cancerous cells

all while making it easier for patients to tolerate treatment

CTI recruited Dr. E. Donnall Thomas who won the [1990] Nobel Prize in medicine

for pioneering dose-intensive chemotherapy

CTI raised more than \$1.5 billion in investments

bio-pharmaceutical research, based on scientific testing and governmental reviews,

could be both volatile and cash-intensive

testing processes are typically long and arduous involving a decade or more of testing

supported by many millions of dollars of shareholders' funds

hopes and dreams might be dashed or resurrected depending on the outcome of the treatments

⁸³⁶ David Wilma, *Frederick & Nelson, Seattle's premier department store, goes out of business on May 31, 1992*, Essay 3839, HistoryLink.org, May 30, 2002.

⁸³⁷ Peter Blecha, *Seattle's newest biotech startup, Cell Therapeutics, Inc., incorporates in September 1991*, Essay 9360, HistoryLink.org, March 15, 2010.

SPOKANE IS HIT BY A SERIES OF WILDFIRES⁸³⁸

Gale force winds gusting to sixty-two miles per hour uprooted trees -- October 16, 1991
power lines were knocked down in the Spokane area
energized wires ignited dry grass and brush
First alarm was received at 8:45 a.m. near Spokane International Airport
within three hours every firefighting resource in Spokane County
was committed to battle ninety-two blazes that had broken out
Firefighters had to make decisions regarding which structures to save
and which to leave to the flames
some residents were evacuated ahead of flames
many more rushed to remove dry brush and leaves from around homes built near open lands
Spokane's 350,000 people were surrounded on three sides by fire -- October 19
Spokane County Commissioners and the Spokane City Council declared a state of emergency
Diligence of the firefighters and volunteers paid off as the fire was contained -- October 20
however, a second wind storm struck the area with gusts to fifty-two miles per hour -- October 21
contained fires began to flare up
more than 4,000 firefighters were called in from around Washington and Idaho
after six days they managed once again to control the fires
Two people were killed
Katherine Conyers, age 39, was killed while fleeing the fire
Joseph Upchurch, 26, a construction-company employee battling the blaze
was killed when a front-end loader overturned and crushed him in Kootenai County, Idaho
This disaster demonstrated the hazards of urban encroachment on open land
(Washington State Legislature passed a law [1992] expanding the mobilization of resources,
during large fires including the National Guard
this law also provided for the reimbursement of agencies called in to assist in large fires
and for agencies whose own resources were exhausted)

STATE VOTERS WRITE NEW STATE LAWS

Washington narrowly approved Initiative 120, the Reproductive Privacy Act⁸³⁹ -- November 5, 1991
sponsored by the Pro-Choice Washington Coalition, I-120 went to the state legislature
with more than 242,000 signatures -- the most ever gathered for a petition to that time
I-120 unequivocally declared, **“The state may not deny or interfere with a woman’s right to choose to have an abortion prior to viability of the fetus, or to protect her life or health.”**
this measure also provided that the state pay for voluntary abortions for women
who would be eligible for state-funded maternity services
when the state legislature failed to act on the initiative, it was sent to the voters
Initiative 120 passed by a thin margin of 4,222 votes, out of 1,509,402 cast
Washington voters considered Referendum 42 sent to them by the legislature
this referendum proposed a statewide 911 emergency telephone system

⁸³⁸ David Wilma, *Spokane wildland fires kill two and destroy 114 homes beginning October 16, 1991*, Essay 5490, HistoryLink.org, July 28, 2003.

⁸³⁹ Cassandra Tate and Kit Oldham, *Washington voters support legal abortion while rejecting term limits and aid in dying on November 5, 1991*, Essay 7824, HistoryLink.org, July 2, 2006.

to be funded by a tax on telephone lines
R-42 passed by a significant margin 901,854 For and 573,241 Against
Six other ballot measures all failed
including legislative term limits and legalized “aid in dying” for the terminally ill patients

KING COUNTY VOTERS CHANGE THE PURPOSE OF SEATTLE’S METRO⁸⁴⁰

(Metro had been created in King County to develop a regional water quality system [1958]
this was expanded to include a county-wide bus system [1972])
(In response to a lawsuit filed to challenge the agency’s expansion
U.S. District Court Judge William Dwyer ruled [September 6, 1990]
that Metro’s governing Council failed to meet the constitutional standard
of “one person, one vote” as some Metro Council members
effectively represented many more people than others)
Negotiations among Seattle, King County and suburban officials to change the Metro Charter
were rancorous -- when an agreement was finally reached
King County Council rejected a portion affecting their election
county council members placed their proposed Charter amendments on the ballot
over the protests of city officials)
Proposed Metro Charter amendments narrowly passed -- November 5, 1991
but the merger failed to muster the required majority outside of Seattle as required
(final package of Charter amendments prevailed [November 3, 1992])

ANOTHER INDICTMENT IS DELIVERED IN THE IRAN-CONTRA AFFAIR

Duane Clarridge, chief of CIA covert operations, was convicted
on two counts of perjury -- November 26, 1991
but he was pardoned by President George H.W. Bush before he sentencing

SEATTLE ART MUSEUM (SAM) OPENS IN DOWNTOWN

Seattle Art Museum (SAM) was the result of a [1986] voter approval of a special \$29.6 million levy
another \$25.4 million was provided through private gifts⁸⁴¹
SAM opened in downtown -- December 5, 1991
located at 1st Avenue and University Street the \$64 million structure
contained 155,000 square feet
new galleries displayed African art, Northwest Native American art, modern art, photography
and Northwest artists
third and fourth floors displays of Japanese, Korean, and Islamic art opened [January 31, 1992]
Visiting collections are displayed to provide an opportunity to witness
some of the world’s greatest art

UNITED SOVIET SOCIALIST REPUBLIC (USSR) COMES TO AN END

⁸⁴⁰ Cassandra Tate and Kit Oldham, *Washington voters support legal abortion while rejecting term limits and aid in dying on November 5, 1991*, Essay 7824, HistoryLink.org, July 2, 2006.

⁸⁴¹ David Wilma, *Seattle Art Museum opens downtown on December 5, 1991*, Essay 3540, HistoryLink.org, September 5, 2001.

As the world watched in amazement, the Soviet Union disintegrated
Soviet Union President Mikhail Gorbachev resigned -- December 25, 1991
most of the republics had already seceded
Soviet Union's largest, most populous
and economically developed republic, the Russian Soviet Federative Socialist Republic,
officially changed its name to the Russian Federation
Cold War comes to an end as the Supreme Soviet, the highest legislative body in the USSR,
formally dissolved the Soviet Union into fifteen independent nations -- December 26

FBI STOPS A PLANNED ATTACK IN SPOKANE⁸⁴²

An Aryan Nations terrorist group headed by white supremacist Richard Butler
had been well-established in nearby Hayden Lake, Idaho since the [1980s]
however, a portion of this group was no longer satisfied with Butler's leadership
they felt he was only a propagandist and not an activist
White supremacists and skinheads plotted to firebomb the Jewish Temple Beth Shalom in Spokane
and carry out assassinations of civil right activists Marshall Mend and Bill Wassmuth
An FBI informant leaked word of the plot -- February 1, 1992
months before it was scheduled to be carried out
immigration officials scuttle the plot by deporting two of the skinheads to Italy and Canada

WASHINGTON STATE LEGISLATURE CREATES AN EDUCATION REFORM COMMISSION

State legislators passed Substitute Senate Bill (SSB) 5359 -- 1992
this created the "Commission on Student Learning" (CSL) which was to identify
"Essential Academic Learning Requirements" (EALRs) and to:

- develop strategies to assist teachers in helping students master these learning objectives,
- develop a statewide student assessment system to measure
both individual student and collective school performance,
- establish a "certificate of mastery" that would demonstrate high school graduates
were proficient in these basic subjects
- recommend the time and support schools and districts would need to meet the objectives

Terry Bergeson (later State Superintendent of Public Instruction)
was hired to be the CSL staff director to lead the effort to increase the demands on the State
to produce enhanced student academic performance outcomes

AN EFFORT IS MADE TO BLOCK TIMBER HARVEST IN COLVILLE NATIONAL FOREST⁸⁴³

Seven environmental groups filed a lawsuit to block a U.S. Forest Service plan
to log 123 million board feet of timber annually in the Colville National Forest
this was a significant increase over the historic average of 80 million -- February 13, 1992
environmentalists believed this would destroy the forest
However, the lawsuit never came to court

⁸⁴² Jim Kershner, *Jewish Community of Spokane*, Essay 8640, HistoryLink.org, July 4, 2008.

⁸⁴³ Jim Kershner, *Seven environmental groups file a lawsuit seeking to block a U.S. Forest Service plan to log 123 million board feet of timber annually in the Colville National Forest on February 13, 1992*, Essay 9784, HistoryLink.org, March 28, 2011.

Spokane's Congressman Tim Foley, who was Speaker of the U.S. House of Representatives, represented the area containing the Colville National Forest
he proposed legislation to include Eastern Washington forests in the new plan being written to provide extensive environmental safeguards for Western Washington forests
but when the plan passed Congress Eastern Washington was not included
Forest Watch, a volunteer organization, was begun to better inform grass-roots organizations about how to successfully appeal timber sales
Forest Watch achieved remarkable success
harvest in the Colville National Forest never reached the 123 million board feet of timber as proposed by the U.S. Forest Service
in fact, the harvest did not stay at the 80 million board feet annual harvested before 1992 (eventually the harvest in the Colville National Forest fell to 15 million board feet annually)

U.S. SENATOR BROCK ADAMS IS A SUCCESSFUL POLITICAL FIGURE

(Brock Adams had served the 7th Congressional District as its U.S. representative [1964-1978]
he rose to be chairman of the U.S. House Budget Committee
he was an outspoken critic of the Vietnam War
he supported AIDS research
he opposed restarting a Hanford reactor to process bomb-grade plutonium at a time when “down-winders” (residents living east of Hanford) were raising the issue of past nuclear contamination
he was regarded by many as a gifted, often brilliant politician
U.S. Speaker of the House, Washington Congressman Tom Foley, called him **the “Golden Boy” and “the young prince of politics”** [*The Seattle Times*])
(President Jimmy Carter nominated Brock Adams to serve in his Cabinet in the post of Secretary of Transportation [January 23, 1977-July 20, 1979]
he was credited with almost single handedly restructuring the East Coast railroad system
he also helped establish Amtrak, the national passenger rail service
he challenged the automobile industry to make dramatic changes in design including increased fuel efficiency and mandatory air bags)
Brock Adams retired as Secretary of Transportation to take up lobbying in Washington, D.C.)
(Brock Adams ran for the U.S. Senate
he defeated incumbent Republican U.S. Senator Slade Gorton [1986]
while he was in office an accusation was made by a twenty-six year old family friend⁸⁴⁴ who was working in Washington, D.C. as an aide in the U.S. House of Representatives she stated she had been drugged and molested by Senator Adams
Adams admitted the young woman spent the night in his home while his wife was out of town but he said the allegations of were “politically inspired”
and were **“created out of whole cloth by people who hated me”** [Los Angeles Times])
Office of the United States Attorney declined to prosecute
but the story dogged Adams for the next three years and placed his re-election in doubt

⁸⁴⁴ David Wilma, *Senator Brock Adams quits race for re-election to the U.S. Senate, following allegations of sexual misconduct, on March 1, 1992*, Essay 5740, HistoryLink.org, September 25, 2004.

however, U.S. Senator Brock Adams formally announced his bid for re-election to the U.S. Senate in spite of the rumors -- February 1992

U.S. SENATOR BROCK ADAMS WITHDREW FROM REELECTION⁸⁴⁵

The Seattle Times published a story detailing allegations from eight different women -- March 1, 1992 that Adams had sexually harassed and even drugged and raped as far back as the early [1970s] *Times* also noted other women made similar allegations but refused to sign statements
Seattle Times reported interviews with “dozens of people” who supported the claims
After the story ran, Adams immediately announced that he would not run for re-election (he left the U.S. Senate [January 1993])

USS *MISSOURI* (BB-63) AGAIN ENTERS RETIREMENT

After visiting Australia the USS *Missouri* was decommissioned -- March 31, 1992
she was the last battleship to serve on active duty
in the 21st Century, there are no battleships in the United States Navy

USS *MISSOURI* (BB-63) RETURNS TO BREMERTON

USS *Missouri* (BB-63) under tow arrived at the Puget Sound Naval Shipyard in Bremerton for deactivation and storage at the Puget Sound Naval Shipyard -- April 12, 1992
several months of work included the installation of dehumidification machinery
“Mighty Mo” was moored at the Naval Inactive Ship Maintenance Facility on Sinclair Inlet where she had been kept for thirty years
USS *Missouri* generated competing requests from organizations in Bremerton, Washington and California’s Long Beach and San Francisco before the Navy awarded her to Hawaii’s Pearl Harbor
during ceremonies to commemorate the fiftieth anniversary of the Japanese attack there (Today, the “Mighty Mo” is open for visitors in Pearl Harbor as the Battleship *Missouri* Memorial, not supported with government funding, it remains a fitting memorial to the people and events reflecting our nation’s legacy of duty, honor, strength, resolve and sacrifice)

CONSTITUTIONAL AMENDMENT XXVII REGULATES CONGRESSIONAL PAY

Amendment XXVII to the Federal Constitution was passed by Congress and approved by the required three-quarters of the states -- May 7, 1992
“No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of representatives shall have intervened.”

SEATTLE’S PREMIER DEPARTMENT STORE CLOSES

Frederick & Nelson was founded as a furniture store [1891]
it later expanded to sell other types of merchandise
it was acquired by Chicago’s Marshall Field’s & Company [1929]

⁸⁴⁵ David Wilma, *Senator Brock Adams quits race for re-election to the U.S. Senate, following allegations of sexual misconduct, on March 1, 1992*, Essay 5740, HistoryLink.org, September 25, 2004.

Frederick & Nelson expanded to ten stores in Washington and Oregon [1980]⁸⁴⁶
Frederick & Nelson filed for bankruptcy [September 16, 1991]
it went out of business laying off more than 1,800 employees -- May 31, 1992
Frederick & Nelson's building at 5th and Pike Street in downtown Seattle
became the flagship store of the Nordstrom chain

END OF THE STRATEGIC AIR COMMAND (SAC)

Following the collapse of the Union of Soviet Socialist Republics and the end of the Cold War,
SAC was eliminated in a major reorganization of U.S. Air Force commands -- May 31, 1992
(Today, the Strategic Air and Space Museum, formerly the SAC Museum near Ashland, Nebraska
serves as a reminder of the Strategic Air Command's heritage)

U.S. SECRETARY OF DEFENSE IS INDICTED IN THE IRAN-CONTRA AFFAIR

Caspar Weinberger, Secretary of Defense, was indicted on two counts of perjury
and one count of obstruction of justice in the Iran-Contra Affair -- June 16, 1992

WASHINGTON STATE BUYS THE EAST WENATCHEE PREHISTORIC COLVIS CULTURE SITE

Mack and Susan Richey donated all of the recovered Clovis artifacts
and sold the thirty-five square-meter East Wenatchee site
to the Washington State Historical Society for \$250,000 -- July 1992
It was stipulated in the sales contract that no archaeological work could take place for fifteen years
(that moratorium expired [June 1, 2007])
but no new scientific digging has since taken place on the East Wenatchee site)

KING COUNTY APPROVES AN URBAN GROWTH PLAN⁸⁴⁷

Voter anger over increasing traffic congestion, pollution, suburban sprawl, loss of open space
and other consequences of unchecked growth led to action by the state legislature
Legislators passed the [1990] Growth Management Act (GMA) with major additions [1991]
this Act directed the state's large and fast-growing counties and the cities within those counties
to agree on countywide planning policies and to prepare comprehensive plans
that would guide growth and development
and regulate land uses in their respective jurisdictions
one of the GMA's primary requirements was for each county to work with its cities
to channel almost all new growth into compact "**urban growth areas**"
to prevent sprawl, save tax money by sending growth where government services
such as sewer, water, and transit already existed and preserve rural areas
urban growth was defined as intensive use of land that required government services
incompatible with agriculture and other rural or natural resource uses
incorporated cities automatically became part of urban-growth areas
urban growth was allowed only inside the urban-growth area

⁸⁴⁶ David Wilma, *Frederick & Nelson, Seattle's premier department store, goes out of business on May 31, 1992*, Essay 3839. HistoryLink.org, May 30, 2002.

⁸⁴⁷ Kit Oldham, *King County sets urban-growth boundary on July 6, 1992*, Essay 7873, HistoryLink.org, August 2, 2006.

unincorporated land could not be part of an urban-growth area
 unless it was next to territory “**already characterized by urban growth**” [1991 Laws]
 Growth Management Planning Council composed of fifteen King County and city officials
 developed policies for the county based on the state’s Growth Management Act (GMA)
 these policies proposed to move about fifty square miles of urban growth area
 away from Woodinville, Redmond, Kent, Renton and Auburn
 development in these areas would become limited
 Duvall, Skykomish, Carnation, Snoqualmie, North Bend and Enumclaw
 became islands of development surrounded by rural (thus protected) land
 Conflicting public opinions focused on the King County Planning Council’s proposal:

- advocates for controlling growth were angry so little rural land to be protected was included;
- many rural residents and property-rights activists bitterly denounced the rural development limits
 they claimed the proposal would reduce property values and deny them use of their land;
- rural residents on both sides of the growth-control/property-rights debate also resented
 their lack of representation in developing the urban boundary
 and countywide planning policies
 all fifteen members of the Planning Council represented Seattle or other cities;
- some urban residents also were not pleased
 residents in Federal Way and other areas that incorporated in part to control their growth
 ironically automatically became targets for additional growth by virtue of incorporating

Despite the outcry from all sides, the King County Council
 approved the urban-growth boundary and other planning policies
 as proposed by the King County Growth Management Planning Council -- July 6, 1992
 opponents of the policies attempted to force a voter referendum on the issue
 but they failed to gather the signatures necessary to do so
 rural anger over the planning policies and other development restrictions
 and a feeling that rural concerns were ignored helped fuel an (unsuccessful) movement
 to create a new Cedar County out of eastern King County

IRAQ CONTINUES TO DEFY THE WORLD

UNSCOM (United Nations Special Commission) inspectors had reliable information
 that the Iraqi Ministry of Agriculture contained archives related to illegal weapons activities
 Iraq refused to allow United Nation’s UNSCOM inspectors into the site
 in violation of the [1991] United Nations’ cease-fire agreement with Iraq
 UN inspectors remained outside of the Ministry of Agriculture building for seventeen days
 until their safety was threatened by Iraq’s President Saddam Hussein -- July 6-23, 1992
 UNSCOM inspectors left when and the UN Security Council seemed unwilling
 to support a threat of their own to use force to complete the inspection -- July 29

TEACHERS IN TWO WASHINGTON SCHOOL DISTRICTS GO ON STRIKE

Two Washington Education Association (WEA) affiliates voted to strike
 to achieve an acceptable professional agreement -- September 1992

- Pateros School District faced a six day strike
 which was successfully resolved without court action;

- Kennewick Education Association (KEA) members struck for two days before returning to their work assignments without court interference

LONGACRES PARK RACETRACK CLOSES

(Longacres Park was founded for horse racing enthusiasts [1933] by Joseph Gottstein
 pari-mutuel betting on horseracing had been newly legalized in the state of Washington
 (pari-mutuel betting is a system where, after deducting management expenses,
 winners divide the total amount bet in proportion to the individual sums they wagered)
 Longacres became the first track to operate successfully under the new legislation

Crowds of race fans anticipated the yearly competition at Longacres
 elegant grandstands were frequently filled to capacity,
 thoroughbred race horses performed well on the track's springy clay track,
 annual Longacres Mile race was the premier event each year
 on the final day of racing each year fans were admitted free of charge
 eventually betting options were added:

- exacta betting (pick two to finish first and second in a race);
- trifecta betting (pick which horse will finish first, second and third in a race);
- daily double betting (pick top two horses in a race predesignated by the track)

Boeing purchased the 215-acres Longacres site in the heart of "Boeing Country"
 about eighty year-round Longacres employees and some 600-700 seasonal employees
 were put out of work

After fifty-nine years of operation, the final race was run -- September 21, 1992
 there was no commentary during the running to allow the record crowd of 23,258⁸⁴⁸
 to listen unimpeded to the pounding horses' hooves
 emotionally charged fans of thoroughbred racing, many in tears,
 flooded out of the stands after the last race concluded
 many scooped up handfuls of the track's dirt for as a souvenir

TWO UNIVERSITY OF WASHINGTON PROFESSORS WIN THE NOBEL PRIZE FOR MEDICINE

Edmond H. Fischer and Edwin G. Krebs of the University of Washington School of Medicine
 received the Nobel Prize for Medicine for describing how organic phosphate works
 as a switch to activate proteins and regulate various cellular processes⁸⁴⁹ -- October 12, 1992
 Fischer was a professor in Biochemistry
 Krebs was a professor in Pharmacology and Biochemistry
 together they shared \$1.2 million

Scientists worldwide have drawn on their work for a vast spectrum of research on cellular processes
 which helped researchers better understand such things as diabetes, Alzheimer's disease,
 how the rejection of transplanted organs is prevented, why certain cancers develop,
 and how the body mobilizes sugar to produce energy

⁸⁴⁸ Paula Becker, *Longacres Park racetrack closes on September 21, 1992*, Essay 7470, HistoryLink.org, September 8, 2005.

⁸⁴⁹ David Wilma, *Edmond H. Fischer and Edwin G. Krebs are named recipients of the Nobel Prize for Medicine on October 12, 1992*, Essay 3660, HistoryLink.org, December 27, 2001.

U.S. SECRETARY OF DEFENSE IS RE-INDICTED IN THE IRAN-CONTRA AFFAIR

New charges filed against Secretary of Defense Caspar Weinberger indicated that President H.W. Bush may have known of the Iran-Contra operation -- October 30, 1992

ELECTION MAKES SWEEPING CHANGES IN WASHINGTON STATE

Presidential race consisted of three main candidates -- November 3, 1992

incumbent Republican President George H.W. Bush and Vice President Dan Quayle
Democratic challenger Arkansas Governor Bill Clinton and Al Gore
Independent Party businessman Ross Perot and James Stockdale

Clinton took 43% of the popular vote while Bush received 37.5% and Perot 18.9%

Clinton swept the Electoral votes 370 to 168 to 0 respectively

In the race for governor, Democratic Congressman Mike Lowry defeated

Washington State Republican Attorney General Ken Eikenberry (52.16% to 47.84%)

Washington's Congressional Delegation underwent a change

Democratic U.S. Senator Brock Adams did not run for reelection after eight women gave statements alleging that Adams had committed various acts of sexual misconduct
Adams denied the allegations, but his popularity statewide was weakened

he decided not to seek reelection rather than risk losing his seat to a Republican
State Senator Democrat Patty Murray was elected to the open seat in the U.S. Senate

she defeated Republican Congressman Rod Chandler for the position

Murray had begun in politics as a citizen-lobbyist for environmental and educational issues

she said she was once told by a state representative that she could not make a difference

because she was just a "mom in tennis shoes" -- which became her campaign theme

she successfully ran for the State Senate [1988] and served one term

before moving to the U.S. Senate

Washington's U.S. House of Representatives delegation saw Democrats take every seat but one

Republican Jennifer Dunn was elected in the 8th Congressional District

composed of rural King and Pierce counties

Democratic members of Congress were composed of:

incumbents Al Swift (2nd District), Norm Dicks (6th District),

and Jim McDermott (7th District)

newly-elected members included Maria Cantwell (1st District), Jay Inslee (4th District)

and Mike Kreidler (9th District)

In the legislative races, Democrats picked up four State Senate seats to gain a 28-21 majority

Democrats increased their State House of Representatives seats by seven

achieving a 65-33 majority

Washington voters also approved Initiative 573 by a vote of 1,119,985 For and 1,018,260 Against
this measure initiated term limits for elected officials

(I-573 was declared unconstitutional by U.S. District Judge William L. Dwyer

because it wrongly attempted to add qualifications for congressional candidates beyond those stipulated in the U.S. Constitution -- age, citizenship and residency in the state [1994])

SEATTLE FAULT ZONE IS DESCRIBED FOR THE FIRST TIME

Geologist Robert Bucknam discovered [in the late 1980s] that Restoration Point

had been thrust out of the water sometime less than 1,500 years ago
 in fact, British Captain George Vancouver first noted this abnormal point of land [1792]
 Bucknam teamed with U. of W. paleo-botanist Estella Leopold and Eileen Hemphill-Haley
 they began to study marsh, peat, and beach deposits from Bainbridge Island
 which revealed a rapid change in elevation as one site dropped below sea level
 and a corresponding site popped out of the water
 evidence came from diatoms (single-celled organisms that secrete complex skeletons)
 humus, peat and charcoal
Science, a prestigious journal, first published five papers
 on the Seattle Fault Zone -- December 4, 1992
 previously undescribed, the fault is a several mile wide area of weakness in the Earth's crust
 running from about Issaquah, under Seattle's stadiums through West Seattle's Alki Point,
 across Bainbridge Island's Restoration Point to Hood Canal on the Olympic Peninsula
 roughly 1,100 years ago a massive earthquake tore across the Seattle landscape⁸⁵⁰
 Additional evidence was presented in four other papers
 data was investigated from as far away as the Olympic Mountains
 where five, large rock avalanches had dammed streams
 these avalanches created lakes that held submerged trees
 snags collected from three of the lakes, Jefferson, Lower Dry Bed, and Spide
 indicated that an earthquake occurred between 1,000 and 1,300 years ago
 Geologists in Seattle also examined a layer of fine sediment in Lake Washington
 that had been deposited by multiple subsurface landslides
 which could have been set in motion only by an earthquake
 organic matter in the sediments was dated at 1,117 years ago
 analysis of Douglas fir trees from Seattle gave a date for the last movement of the Seattle fault
 at about 1,100 years ago
 initial evidence came from three groves, which a fault-induced landslide
 had carried from their original habitat on the shores of Lake Washington
 to their present resting place ninety feet underwater
 one stand slid off the southeast corner of Mercer Island
 another settled on the west side of the island, across from the south end of Seward Park
 third slumped between Holmes Point and North Point north of Kirkland
 radiocarbon dating placed the event between 1,000 and 1,300 years ago
 Researchers also analyzed the trees' annual growth rings
 they determined that the firs all died in the same year and season
 one Douglas fir log showed signs of having been carried by a tsunami to the beach
 Radiocarbon dating put the tree's death at between 850 and 1,350 years ago
 they compared their tree ring data with a Douglas fir trees found at West Point on Magnolia Bluff
 all of the trees died within a half year or less of each other (between 900 and 928 AD)
 Combining all the various lines of evidence, researchers concluded that about 1,100 years ago
 land south of the Seattle Fault line shot up twenty feet during a magnitude 7.5+ earthquake

⁸⁵⁰ David B. Williams, *Seattle Fault Zone is first described in Science on December 4, 1992*, Essay 9388, HistoryLink.org, April 5, 2010.

area north of the Seattle Fault dropped at least three feet
geologists also concluded that this earthquake occurred less than ten miles beneath Seattle
such a shallow earthquake has the potential for significant damage
rock could be thrust twenty feet out of Puget Sound
(today, ground ruptures could sever natural gas, liquid fuel, sewer, and water supply pipelines
all of which cross through the Seattle Fault zone)

Since the publication of the five papers, geologists have continued to study the Seattle Fault Zone
they found several additional fault strands and learned that it has moved many times in its history
they cannot predict when it will move again -- but they know that it will⁸⁵¹

IRAN-CONTRA DEFENDANT JOHN POINDEXTER IS FOUND NOT GUILTY

Conviction of National Security Advisor John Poindexter was overturned as the U.S. Supreme Court
upheld a lower court ruling that overturned his conviction on all five counts -- December 7, 1992

RESULTS OF THE IRAN-CONTRA SCANDAL INVESTIGATION BY A SPECIAL PROSECUTOR

Fourteen people were charged with criminal offenses by Independent Counsel Lawrence E. Walsh
two people were pardoned before trial
one case was dismissed when the Bush Administration declined to declassify information
necessary for the trial
eleven people were convicted
two of these convictions were overturned on appeal
former National Security Advisor John Poindexter
and National Security Council member Lieutenant-Colonel Oliver North
Independent Counsel Lawrence E. Walsh chose not to re-try Poindexter or North

PRESIDENT GEORGE H.W. BUSH ISSUES PARDONS IN THE IRAN-CONTRA CONVICTIONS

After his reelection bid had been lost Bill Clinton [November 1992]
President H.W. Bush pardoned everyone indicted in the scandal
Before Secretary of State Caspar Weinberger's trial
that attempted to tie then Vice President George H.W. Bush to the Iran-Contra Affair could begin
President H.W. Bush pardoned Weinberger -- December 24, 1992
this essentially halted the legal proceedings against Weinberger
as well as against Bush himself, who could have been called to testify before Congress
as a former member of the Reagan Administration when he was Vice President
President Bush will also pardon:
chief of CIA covert operations Duane Clarridge -- seven counts of perjury and false statements
CIA Chief of Covert Operations Clair George -- two charges of perjury
National Security Adviser Robert McFarlane -- withholding evidence
Assistant Secretary of State Elliott Abrams -- withholding evidence
Chief of the CIA's Central American Task Force Alan Fiers -- withholding evidence
Thus no trial was held on charges filed by Independent Counsel Lawrence Walsh

⁸⁵¹ David B. Williams, *Seattle Fault Zone is first described in Science on December 4, 1992*, Essay 9388, HistoryLink.org, April 5, 2010.

WASHINGTON STATE HANGS A MURDERER⁸⁵²

U.S. Supreme Court had invalidated death penalty laws [1972]
but Washington voters passed an initiative in favor of the death penalty [1975]
legislators passed a law that conformed to United States constitutional guidelines [1977]
that had been established by the U.S. Supreme Court
Westley Allen Dodd was convicted and sentenced to death by a Clark County jury
for molesting and stabbing to death two young brothers [1989]
he confessed to raping a child and documented in a diary more than fifty crimes against children
Dodd dropped his appeals and asked to be hanged
American Civil Liberties Union (ACLU) opposed hanging as a method of execution
ACLU sued to stop the execution
Washington State Supreme Court upheld the state law
For the first time in for thirty years in the United States a legal hanging took place
Washington State executed Westley Allen Dodd at the state penitentiary in Walla Walla
just after midnight -- January 5, 1993

TACOMA LANDMARK SMOKESTACK IS DEMOLISHED⁸⁵³

ASARCO plant began as a lead-refining company, the Ryan Smelter, built [1888]
two years later it became Tacoma Smelting and Refining Company,
under the ownership of William Rust who modernized and expanded the facility
Rust sold the plant [1905] to the American Smelter and Refining Company (ASARCO)
which converted the plant for copper smelting and refining [1912]
Landmark American Smelter and Refining Company (ASARCO) smokestack in Tacoma
was considered an engineering marvel when it was constructed [1917]
built of two-and-a-half million bricks and approximately 5,000 tons of mortar
it stood 571 feet tall making it the largest smokestack in the world
Port of Tacoma granted a thirty-year lease of harbor land to ASARCO
to allow for an extensive plant expansion [1920s]
however, an earthquake damaged the smokestack and necessitated repairs
ASARCO's stack was reduced to 562 feet in height [1937]
ASARCO operated the smelter at the Ruston site until its closure due to weak copper markets
and a need for pollution control [1985]
ASARCO had been one of Pierce County's largest employers
Tacoma's permeating sulfur smell was referred to by locals as "the smell of money"
once a sign of prosperity, the ASARCO smokestack over the years
became a symbol of environmental pollution
it even attracted daredevils, from local youths to Greenpeace protestors, to climb it
structurally it had become unsafe -- many of its bricks were loose and in danger of falling
ASARCO's sixty-seven acre smelter site was listed as one of the country's most polluted sites

⁸⁵² David Wilma, *Washington resumes the death penalty by hanging Westley Allan Dodd on January 5, 1993*, Essay 5554, HistoryLink.org, September 25, 2003.

⁸⁵³ Margaret Riddle, *The ASARCO smokestack -- once the world's largest -- is demolished at the company's old copper smelter in Ruston, north of Tacoma, on January 17, 1993*, Essay 8744, HistoryLink.org, August 26, 2008.

contaminated by arsenic and lead

Environmental Protection Agency (EPA) called for an eight-stage cleanup that included:

- demolishing structures, excavating soil and slag from the most contaminated locations,
- disposing of the contaminates in prepared landfills,
- plugging or removing surface water drainage,
- capping the project area,
- protecting the site from erosion,
- continuing monitoring the impacts of pollution on groundwater and marine sediments,
- integrating cleanup with future land use plans

ASARCO's 562-foot-tall smokestack came down -- January 17, 1993

some who gathered to watch had been plant employees or knew people who had worked there
they expressed nostalgia at the event

but most who witnessed the demolition saw it as a festive and well photographed occasion

local stores even sold sweatshirts commemorating the event

souvenir hunters hoped to collect bricks after the demolition

but fear of arsenic and lead contamination caused the bricks to be buried

Only days after the smokestack's demise, ASARCO faced fines from the EPA

for being late with a draft plan for future site cleanup

this was only the beginning of the legal hassles

(Work crews began demolishing the last remaining landmark of the copper smelter in Ruston,
the old ASARCO Fine Ores Bins Building [May 25, 2004]

plans had been approved for a billion dollar condominium project called "Point Ruston"
construction of the first building commenced [May 2008])

PRESIDENT GEORGE H.W. BUSH ORDERS AND ATTACK ON BAGHDAD, IRAQ

Just three days before leaving office President George H.W. Bush

ordered a Tomahawk cruise missiles attack

on the Zaafaraniya Nuclear Fabrication and Industrial Complex in a Baghdad suburb

this factory had been identified as capable of manufacturing nuclear weapons

in the attack, a stray missile hit the Al-Rashid Hotel in Baghdad which housed

U.S. military officials and support staff but no one was injured -- January 17, 1993

INAGUARAL DAY STORM RAVAGES PUGET SOUND⁸⁵⁴

On the day that President Bill Clinton was sworn into office -- January 20, 1993

a wind storm with gusts in excess of ninety-four miles per hour hit the Puget Sound region

Inaugural Day Storm had been predicted the day before by the U.S. Weather service

as a strong low-pressure rainstorm from the southwest moved north of Seattle

Winds and falling trees knocked out major transmission lines and other power cables

until more than 600,000 customers lost power

both Lake Washington Floating bridges were closed to traffic for a time

Governor Mike Lowry declared a state of emergency

⁸⁵⁴ David Wilma, *Inaugural Day storm ravages Puget Sound on January 20, 1993*, Essay 2886, HistoryLink.org, December 12, 2000.

members of the State National Guard were called out to assist with relief efforts
Red Cross opened fifteen shelters in the region

Six people died as a result of the storm:

- Patrick Moon, age 36, Kent, was struck by a tree as he was working to clear limbs that blocked the Maple Valley Highway;
- Martha Babos, 53, Redmond, was struck by a tree while walking from her house to her garage;
- an unidentified 53-year-old man in Coalfield near Newcastle died of a heart attack while he was clearing downed trees;
- Charles D. Rolen, 19, Lynnwood, was killed when a tree fell on his car in Snohomish County;
- Jeffrey Paulus, 3, Port Orchard, was struck by a falling tree;
- Edwin Lackman, 32, Port Orchard, was electrocuted after a tree hit a power line near Gorst

There were many injuries, including fifteen people treated for carbon monoxide poisoning they had attempted to barbecue food with charcoal indoors or had run automobiles to stay warm while their power was out

State officials counted 167 homes destroyed and 770 damaged
Bellevue alone reported 100 homes destroyed and \$1.5 billion in damage
electrically powered sewage treatment systems failed
raw sewage flooded streets and waterways increasing health risks

Five days after the storm, tens of thousands of customers in King, Pierce, and Snohomish counties were still without electricity

Seattle City Light took the unprecedented step of asking for help from other utilities
thirteen crews from BC Hydro, Eugene Water & Electric Board,
Chelan County Public Utility District and Grant County Public Utility District
traveled to Seattle to work with forty City Light crews

hardest hit utility was Puget Sound Power & Light, which had 500,000 customers in the dark with most of them in hard-to-serve rural areas

Only the [1962] Columbus Day storm exceeded the violence of the Inaugural Day Storm

E. COLI CONTAMINATION KILLS THREE CHILDREN⁸⁵⁵

477 Washingtonians, most of them children and most of them in Western Washington, reported to hospitals complaining of severe stomach cramps and bloody diarrhea during -- January-February 1993

(thirty-eight people reported symptoms in one single day [January 19, 1992])

Some children had to be placed on dialysis after their kidneys failed
some survivors lost organs such as colons and gall bladders which were damaged
(children who survive *E. coli* illness often developed kidney problems in ten to fifteen years)
ultimately, three children died, a two-year-old girl from Snohomish County,
a two-year-old boy from Tacoma, and a 16-month-old boy from Bellingham
these children died of heart failure brought on by kidney disease

Source of the Western Washington contamination was found to be
consumption of undercooked hamburger or being exposed to infected persons

⁸⁵⁵ David Wilma, *Food contamination by E. coli bacteria kills three children in Western Washington in January and February 1993*, Essay 5687, HistoryLink.org, April 8, 2004.

infected meat was traced to Jack in the Box Restaurants
and to its meat supplier, Von's in California

GOVERNOR'S COUNCIL ON EDUCATION REFORM AND FUNDING ISSUES ITS REPORT

Governor's Council on Education Reform and Funding (GCERF) had been assigned
to lay the groundwork for a major education-reform effort [1991]

After two years of study GCERF reported its initial findings -- 1993

- standardized tests currently in use did not encourage students to demonstrate their ability to write and reason, or to display mathematical and scientific thinking behind their answers;
- students were tested against each other "on a grade curve" rather than measuring the mastery of the material being learned by each student

GCERF members made five recommendations:

- more funding for standards and assessments,
- additional teacher professional development time,
- a mentor teacher program,
- establishment of a new account to provide rewards and assistance based on school performance,
- revision of the school funding formula by the [1997-1998] school year

LOCAL TELEVISION PERSONALITY DON McCUNE PASSES AWAY⁸⁵⁶

Don McCune, alias Captain Puget, hosted a local television children's program

he began his entertainment career as a radio disc jockey [1943]

he worked with famed Seattle Rainiers baseball broadcaster Leo Lassen

he also did live, big-band broadcasts from Seattle's famed *Trianon Ballroom*

McCune asked a young waterfront balladeer named of Ivar Haglund,

(later famous for his *Ivar's Acres of Clams* restaurants)

to sing his tunes about the Northwest on the radio

Don spent five years on radio in Fairbanks, Alaska [1952-1957]

KOMO-TV held auditions for a new children's program called "The Captain Puget Show"

Don McCune won the job

Captain Puget sang sea chanteys and songs about the Pacific Northwest

(some which he learned earlier from Ivar Haglund) as well as taking kids

on short filmed adventures around the Northwest

he was awarded the National Sylvania Award

for the best locally produced children's show in the nation [1958]

Don McCune's "Captain Puget Show" ran for nine years [1957-1966]

fans fondly called him Captain Puget for the rest of his life

McCune took up a new series for KOMO-TV which he called "Exploration Northwest"

half hour adventures were filmed in Alaska, Yukon Territory, British Columbia, Washington,

Oregon, Idaho and Montana

Don went on all the film excursions, wrote the scripts and narrated the show

which featured activities ranging from skin-diving to skydiving and every topic in between

Don's show ran for twenty-one years

⁸⁵⁶ Linda McCune, *McCune, Don (1918-1993) -- TV's Captain Puget*, Essay 3468, HistoryLink.org, July 30, 2001.

it won twenty-six Emmy Awards for excellence in production
KOMO-TV also assigned Don to host another series called "Challenge" [1962-1977]
this show featured an inter-faith dialogue among a rabbi, priest and minister
who took turns leading the discussions on pertinent moral issues of the day
Don's job to write an introduction for the discussion and introduce it on camera
before turning it over to the panel
On his 74th birthday, after a bit of indigestion, he was diagnosed with cancer of the pancreas
he died -- March 27, 1993

upon hearing of his death KOMO-TV viewers flooded the station switchboard with calls
KOMO responded in less than one week by producing a half hour special
the life of Don McCune entitled "Looking Back"
Don rests in the pioneer cemetery in Woodinville, Washington
his gravestone reads, "Smooth Sailing ... and Bye For Now,"
his familiar slogan from the Captain Puget Show

STATE LEGISLATORS PASS ADDITIONAL SCHOOL REFORM LEGISLATION

Recommendations of the GCERF Commission resulted in passage of House Bill 1209
that amended the state's [1977] "Basic Education Act"
with the addition of the "Education Reform Act" -- 1993
however, most of the GCERF recommendations were not fully implemented by the legislature
Washington State's new Education Reform Act required the state schools
use an assessment system that must become "criterion-referenced" -- no such test existed
math goals must be assessed using a test that was not gender biased
and not biased toward persons with different learning styles, racial or ethnic backgrounds
methods to address the unique needs of "highly capable" and "gifted" students
must be considered by the new assessment system

PART OF McNEIL ISLAND CORRECTIONAL CENTER BECOMES AN HONOR CAMP

State legislators established the 200-bed Work Ethic Camp at McNeil Island Corrections Center
building restrictions were lifted to permit the construction of the new facility
this Work Ethic Camp was one of only six of its kind in the nation -- 1993
Work Ethic Camp provided a sentencing option for targeted offenders of both genders
only nonviolent offenders who would otherwise go to prison for sixteen to thirty-six months
were eligible for the four month intensive program
budgeted at over \$5 million, the Work Ethic Camp included:

- construction of a 200-bed housing unit;
- a multi-purpose building for administration and classrooms;
- a new covered physical training area;
- expansion of the existing kitchen, dining hall and visiting facilities;
- construction of a replacement control room

KUWAIT REPORTS IRAQI PLOTS TO ASSINATE FORMER PRESIDENT GEORGE H. W. BUSH

President George H.W. Bush visited Kuwait to attend a ceremony commemorating the allied victory
in the Persian Gulf War and Kuwait's release by Iraq --April 14-16, 1993

United States officials learned from Kuwait's government that terrorists had attempted to assassinate President Bush during his visit
Kuwaiti authorities had arrested seventeen suspects and captured physical evidence
two Iraqi nationals, caught with smuggled hashish and alcohol inside Kuwait,
confessed to driving a car-bomb into Kuwait on behalf of the Iraq Secret Service

McCaw Cellular Communications Goes Global

McCaw Cellular Communications, the nation's largest provider of wireless communication services, in another breath-taking effort announced it would offer digital cellular service to the nation of Colombia
in a closed auction, Craig McCaw was officially assigned cellular licenses for the Bogota region which included fifteen million potential customers
and Coast Regions of Colombia that included
another seven and half million possible customers
After winning the license, McCaw immediately assigned cellular engineering experts from its Seattle and South Florida operations to begin design and construction on the system
two Colombian systems were engineered, constructed, and completed
in less than three months
partnerships in cellular systems in Hong Kong and Western Mexico soon followed
McCaw Cellular also provided telephone service for commercial and private aircraft

HUMAN-CHIMPANZEE COMMUNICATION STUDIES⁸⁵⁷

Roger Fouts was hired as a part-time research assistant at the University of Nevada [1967] to assist in teaching an infant chimpanzee, Wasco, to use American Sign Language
this experiment became known as Project Wasco
Washoe is the first chimpanzee to communicate using American Sign Language
when Washoe was shown an image of herself in the mirror and asked what she was seeing, she replied: **"Me, Washoe"**⁸⁵⁸
Washoe enjoyed playing pretend with her dolls which she would bathe and talk to
she would act out imaginary scenarios⁸⁵⁹
Washoe experienced an identity crisis when she was first introduced to other chimpanzees⁸⁶⁰
she was shocked to learn that she was not human
she gradually came to accept that she was a chimpanzee
and to enjoy associating with other chimps
when new students came to work with Washoe, she would slow down her rate of signing
for the novice speakers of sign language -- this had a humbling effect on many of them⁸⁶¹

⁸⁵⁷ Paula Becker, *Washoe and family move into the Chimpanzee and Human Communication Institute at Central Washington University (Ellensburg) on May 7, 1993*, Essay 7622, HistoryLink.org, January 27, 2006.

⁸⁵⁸ Van Lawick-Goodall, Jane, "The Behavior of Chimpanzees in the Natural Habitat." 2010.

⁸⁵⁹ Juan-Carlos Gomez and Beatriz Martin-Andrade, "Fantasy Play in Apes", 2005.

⁸⁶⁰ Deborah Blum, "The Monkey Wars" P. 15-16. 1995.

⁸⁶¹ Roger S. Fouts "Forward" in Franklin D. McMillan's *Mental Health and Well-Being in Animals*. 2008.

Eventually Dr. Fouts, his wife Dr. Deborah Fouts (an experimental psychologist) their three children, Wasco, her adopted son Loulis and another chimpanzee, Moja, moved to Central Washington University in Ellensburg [1980]

Fouts chose Central in Ellensburg over prestigious institutions like Yale

because at Central he would not be required to use the chimpanzees for biomedical research into the prevention and treatment of diseases

Washoe, Loulis, Moja, and later Moja's foster siblings Dar and Tatu were housed

in a four-room, 3,600-square-foot primate laboratory in Central's psychology building

this facility was woefully inadequate -- its small space allowed no freedom of movement

its third floor location denied the chimpanzees access to the outdoors

structural problems resulted in leaking water and noise control was inadequate

access to the chimpanzees was not possible because there were no facilities for visitors

Roger and Deborah Fouts founded *Friends of Washoe* [1981]

to fund their research into how chimpanzees acquire language

efforts also were undertaken to fund a new home for the chimpanzees

Congressman Frank "Tub" Hansen (D-Moses Lake) advocated in Congress for \$1.5 million

Governor Booth Gardner and Central Washington University President Dr. Donald Garrity

also were vocal supporters of the proposed facility as was University trustee Ron Dotzauer ethnologist Jane Goodall, well known for her efforts to bring attention to chimpanzee behavior,

also became an active advocate for the Fouts' work

following her effort to lobby the Washington State legislature

ninety percent of the \$2.3 million needed was provided by the state

Washoe and her family members moved into their newly constructed home,

the Chimpanzee and Human Communication Institute,

at Central Washington University -- May 7, 1993

Project Washoe continued at Central Washington University for more than twenty-five years

Washoe learned approximately 350 words of American Sign Language

she also taught her adopted son Loulis some American Sign Language

using similar teaching methods, several other chimpanzees were later taught 150 or more signs

which they were able to combine to form complex messages

(Washoe died in Ellensburg [October 30, 2007])

her obituary in *The New York Times* [November 1, 2007] reported that she

"died in bed at age 42, surrounded by staff members and other primates who had been close to her.")

A SECOND GCERF COMMISSION IS NAMED BY THE NEW GOVERNOR

Newly-elected Governor Mike Lowry named a second

"Governor's Council on Reform and Funding" II (GCERF II) which was composed of educators, business leaders, legislators, parents and community members

GCERF II was to lay the groundwork for a major state-wide education-reform initiative

to be submitted to the voters of the state -- 1993

PLOT TO ASSASSINATE FORMER-PRESIDENT GEORGE H.W. BUSH IS INVESTIGATED

Representatives of the FBI, Central Intelligence Agency, and others in the Department of Justice

investigated the allegations and evidence

they reported that it was highly likely that the Iraqi Government originated the plot
and more than likely that President Bush was the target -- June 2, 1993

additionally, based on past Iraqi methods and other sources of intelligence,

CIA independently reported there was a strong case that Iraq President Saddam Hussein
directed the plot against Bush

UNITED STATES RESPONDS TO THE IRAQI THREAT TO THE FORMER PRESIDENT

President Bill Clinton ordered a cruise missile attack on Iraqi intelligence headquarters
in the Al-Mansur district, Baghdad, in response to the attempted (mid-April) assassination
of former President H.W. George Bush in Kuwait

News reports in Baghdad claimed between six and eight people were killed and twelve others killed
U.S. Ambassador to the United Nations Madeleine Albright
addressed an emergency session of the Security Council
she provided evidence to support the attack

PACIFIC NORTHWEST NATIONAL LABORATORY LAYS PLANS TO ENHANCE RESEARCH

Pacific Northwest National Laboratory, the research and development contractor at Hanford,
was located in Richland

William R. Wiley, the director of the Pacific Northwest National Laboratory,
long dreamed of creating a state-of-the-art research laboratory
that would research the world's greatest environmental, health and energy challenges
he felt that such challenges could only be resolved with research at the molecular level
combined with a dedicated study of the physical and life sciences
there were many laboratories across the country that did one thing well
or that contained one powerful piece of scientific equipment

Wiley felt these resources should be combined into one facility to guarantee success
Gradually, support and enthusiasm for the lab grew among universities and the scientific community

Wiley recruited several prominent scientists to form a core team
to study initial projects and to recruit other leading scientists

Richland was chosen for the location of a new facility -- 1993

Pacific Northwest National Laboratory initially spent \$8.5 million
to establish a base laboratory in an existing building

promotional teams were sent throughout the Pacific Northwest as Wiley championed his cause

ADDITIONAL WORK IS COMPLETED ON A NEW BONNEVILLE LOCK

Despite its world record size when it was built [1938] the lock at Bonneville Dam
eventually became the smallest of the seven locks on the Columbia and Snake rivers

Bonneville Lock was replaced by a wider (eighty-six foot) and longer (675 foot) version -- 1993

this new structure, Cascade Locks, was built on the Oregon side of the Columbia

it takes nine to thirteen minutes to fill or empty

the old lock is still present but it is no longer used

ONLY ONE SCHOOL DISTRICT FACES A STRIKE

Washington Education Association (WEA) affiliate in Soap Lake
refused to return to their classrooms
after eight days on strike the administration and staff
reached an acceptable professional agreement
no court order was issued to force the staff back to work -- 1993

IRON GOAT TRAIL OPENS TO HIKERS⁸⁶²

Nearly seven years in the making, the Iron Goat Trail opened in the Cascades -- October 2, 1993
trains had once run between the towns of Scenic and Wellington
but the old line was abandoned [1929]

Built along the route once used by the Great Northern Railway, the four-mile long Iron Goat Trail
commemorated the Great Northern Railroad's mascot: Rocky the Great Northern Goat
opening ceremony was held at the Martin Creek Trailhead, located off U.S. Highway-2
about six miles east of Skykomish to mark the 100th anniversary
of completion of the Great Northern Railway line

First phase of a joint construction project was undertaken by Volunteers for Outdoor Washington,
U.S. Forest Service and Washington State Department of Transportation [1987]
but the route had been neglected for sixty years buried deep in the forest
first it had to be found

Volunteers for Outdoor Washington (VOW) tackled the project
workers began marking and clearing a walking path that allowed access to the area
cost of the trail's first phase was \$750,000

Next stage of the project, actual trail construction, began [1992]
volunteers built a 2.4 mile Upper Grade trail
and a 1.2 mile long Lower Grade trail with a 2.2 percent grade
retaining walls, culverts, bridges, and water barriers were built
along with spur trails connecting the upper and lower paths
this was slow work that took two years to complete
(today, the Iron Goat Trail is barrier-free and wheelchair accessible)

One dedication plaque was placed at the Martin Creek Trailhead that read:

IRON GOAT TRAIL
NO 1074 OCTOBER 2, 1993
DEDICATED TO:
THOSE WHO TOILED 100 YEARS APART BUILDING A TRANSPORTATION
ROUTE THROUGH THIS PORTION OF THE MIGHTY CASCADE MOUNTAIN RANGE
IRON GOAT TRAIL PLANNED,
CONSTRUCTED & MAINTAINED
IN PARTNERSHIP
MT. BAKER-SNOQUALAMIE NATIONAL FOREST (USFS)
VOLUNTEERS FOR OUTDOOR WASHINGTON (VOW)
SUPPORTERS

STATE VOTERS APPROVE CHANGES IN STATE LAW AND CITY LEADERS

Three proposed initiatives were presented to the voters for their approval

Initiative 593 proposed that **“Criminals who are convicted of ‘most serious offenses’ on three occasions be sentenced to life in prison without parole.”**

I-593 was approved by a vote of 1,135,521 For and 364,567 Against

Initiative 601 imposed a limit on state spending-increases based on the combined rate of inflation and population growth

I-601 was narrowly approved 774,342 For and 737,735 Against

Initiative 602 was a companion tax-cutting measure that called for the immediate rollback of most state taxes resulting in steep budget cuts -- I-602 was strongly defeated

Voters in cities across the state were in an anti-incumbent mood

mayors of Spokane, Tacoma, and Everett, as well as King County Executive Tim Hill lost their elections

an exception to this movement was Seattle Mayor Norm Rice

DEVELOPMENT OF TRADE ENHANCES THE ECONOMIES OF NATIONS

Our nation prosperity and economic growth rests in large part on our ability to sell goods and services which we produce for use by consumers around the world

We trade because our domestic market alone, although it is large,

has only a limited capacity to use products which American companies and workers make

96% of the world’s population and nearly four-fifths of the world economy

lies outside of the United States

we must be able to export to others to enable our farmers to sell their crops profitably

and for our manufacturing companies to produce efficiently

and invest additional resources into research and development

when we are able to sell the goods, services and farm products we produce to foreign consumers
we increase sales and profits for American companies and farms
we create jobs for American workers as more employees are needed
to meet increased demands

imports also provide consumer benefits for America's workers and families
when countries abroad sell their products to us, the variety and quality of goods available
to consumers and businesses increases and the prices of goods decline due to competition
grocery stores display a broad choice of imported and domestic foods on their shelves

Millions of American jobs depend on our ability to import goods from around the world
higher-paying jobs concentrated in high-skill fields raised living standards for Americans
dock workers unload containers in U.S. ports every day
truck drivers transport imported goods to distribution centers and points of sale
retailers stock clothes, shoes and accessories from other countries,
in addition to our own products, to satisfy consumer demand

TRADE THROUGHOUT THE WORLD HAS NOT ALWAYS BEEN FREE-FLOWING

By eliminating tariffs and other barriers to trade in goods and services
trade can ease the task of providing people with clean air, clean water, and improve public health
and yield direct benefits to the environment such as clean coal technology,
waste-water treatment and pollution monitoring equipment

by reducing trade barriers in energy technologies, nations could produce more energy
with fewer emission of greenhouse gases

Trade Barriers impede economic growth and development

as seen during the Great Depression [1930s]

when nations increased tariffs on trade in response to the growing financial crisis
countries limited the importation of other nation's products with tariff walls
this resulted in fewer jobs and less economic growth for everyone

UNITED STATES DEVELOPS TRADE AGREEMENTS

Painful economic lessons learned during the Great Depression [1930s]

prompted the United States and other countries to reverse their positions on trade restrictions

After World War II, trade barriers began to be eliminated as international trade negotiations

created a more open and fair world economy -- raising production and living standards worldwide

Most international trade agreements are bi-literal -- agreements between two nations

these set the terms and conditions under which the mutual exchange of goods is to be conducted

U.S. trade relations with Europe began in Colonial times and continued on to Lend-Lease

begun during World War II to allow America to arm and feed Great Britain [1941]

Regional integration of trade, limited to a single geographic area of the world,

expanded the number of nations that were involved in trade agreements

Marshall Plan after the war provided American aid to rebuild European economies [1947]

General Agreement on Tariffs and Trade (GATT) [1948] was the beginning of several rounds

of tariff reductions that resulted in a 90% drop in industrial tariffs

and the reduction or elimination of various other barriers to trade

Association of Southeast Asian Nations (ASEAN), formed by Brunei, Cambodia, Indonesia,

Laos, Malaysia, Myanmar, The Philippines, Singapore, Thailand and Vietnam began to negotiate among themselves [1967]

UNITED STATES CONGRESS PASSES THE NORTH AMERICAN FREE TRADE AGREEMENT

Canada-United State Free Trade Agreement [1988] was expanded in a new agreement
Mexico was added to the trading partnership to form the North American Free Trade Agreement
this created a trilateral trade bloc in North America
North American Free Trade Agreement (NAFTA) passed Congress with a bi-partisan vote
NAFTA was signed into law by President Clinton -- November 8, 1993

ASIAN-PACIFIC ECONOMIC COOPERATION (APEC) LEADERS MEET IN SEATTLE

World trade would provide the broadest agreement possible -- it became the goal for "World Traders"
(establishment of the Asia-Pacific Economic Cooperation [APEC] had been proposed
by Australian Prime Minister Bob Hawke who called for
more effective economic cooperation among nations across the Pacific Rim [1989])
U.S. President Bill Clinton, after discussions with the Australian Prime Minister,
invited government leaders from the Pacific Rim to a summit meeting -- November 17, 1993
purpose of this meeting was to develop a spirit of community
and advance trading cooperation

First annual APEC session was held in a Native American-style long house
on Blake Island in Puget Sound -- November 17-19, 1993
leaders from Australia, Brunei, Darussalam, Canada, Indonesia, Japan, Republic of Korea,
Malaysia, New Zealand, Republic of the Philippines, Singapore, Thailand
and the United States discussed ways to increase regional cooperation
salmon was served and the November rains held off
some leaders at the meeting called for continued reduction of barriers to trade and investments
they envisioned an Asia-Pacific community willing to promote prosperity
through cooperation in trade and investment by Pacific Rim countries
President Clinton summarized the unique session by declaring,
"We agreed that the Asian-Pacific region should be united, not divided." (*Seattle Times*)
as a direct result of this and successive meetings APEC experienced remarkable growth
(Seattle was selected for APEC's permanent United States headquarters [1996])

NORTH AMERICAN FREE TRADE AGREEMENT IS APPROVED BY CANADA AND MEXICO

Legislative bodies of Canada and Mexico passed NAFTA -- November 17-22, 1993
the new agreement became law in each nation (to go into effect [January 1, 1994])
Agricultural provisions of the U.S.-Canada Free Trade Agreement (in effect since [1989])
were incorporated into the new NAFTA trade agreement
under these provisions all tariffs affecting agricultural trade between the U.S. and Canada
were to be removed by [January 1, 1998]
with a few exceptions for items covered by tariff-rate quotas
NAFTA resulted in a great increase in U.S-Canadian cross-border trade
Under NAFTA, many non-tariff barriers to agricultural trade between the U.S. and Mexico
were immediately eliminated

others were to be phased out over periods of five to fifteen years
this allowed for an orderly adjustment to free trade with Mexico
to go into effect [January 1, 1994]
with full implementation beginning [January 1, 2008]⁸⁶³
Mexico and Canada reached a separate two-party NAFTA agreement
dealing with access to imported and exported agricultural products
most tariffs were eliminated either immediately or over five, ten, or fifteen years
NAFTA Committee on Agricultural Trade provided a forum for the U.S., Canada and Mexico
to consult regularly on trade issues and other matters related to the agreement

ASIAN-PACIFIC ECONOMIC COOPERATION (APEC) BECOMES A REALITY

APEC Secretariat, based in Singapore, was established to coordinate the organization's activities
Asian-Pacific Economic Cooperation (APEC) has ten working groups and two standing committees:

- Committee for Trade and Investment (CTI) is largely responsible
for development of "Action Plans" of APEC members;
- ten working groups are primarily responsible for providing information and analysis of issues;
- Economic Committee (EC) is primarily responsible for providing information and analysis
on issues not easily handled by one of the ten working groups

Mexico and Papua New Guinea were accepted in APEC as new members -- November 1993

it was decided Chile would become a full member the next year [1994]

since then, Peru, Russia and Vietnam have become members

(APEC currently has a membership of twenty-one partners with a population of over 2.5 billion

and accounts for forty-seven percent of world trade worth nineteen trillion US dollars

it has helped to reduce tariffs and other barriers to trade in the Asia-Pacific region

it also worked to ensure the efficient movement of goods, services and people in the region

by developing economic policies and cooperation)

TACOMA CITY COUNCIL ADDRESSES THE [1885] CHINESE RELOCATION INCIDENT⁸⁶⁴

(Chinese residents in Tacoma were rounded up and forced aboard a freight train bound for Portland

this reprehensible act had been preceded by months of mass meetings featuring bigoted talk

newspaper articles during that time fanned the flames of hatred

on the day after the Chinese were forced to leave their houses [November 3-4, 1885]

their homes and possessions were burned to the ground)

Tacoma City Council approved the Chinese Reconciliation Resolution

(Resolution 32415) -- November 30, 1993

to make amends for the expulsion of the entire Tacoma Chinese community

by the mayor and other leading citizens [November 3, 1885]

As part of the reconciliation process, a Chinese Commemorative park and international pavilion

was built at the former State National Guard site on Commencement Bay

not far from the location of the early Chinese settlement

⁸⁶³ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 1, Essay 9183, HistoryLink.org, October 13, 2009.

⁸⁶⁴ Priscilla Long, *Tacoma City Council approves Chinese Reconciliation Resolution on November 30, 1993*, Essay 4132, HistoryLink.org, January 14, 2003.

(groundbreaking for the pavilion took place [August 19, 2005])

NORTH AMERICAN FREE TRADE AGREEMENT (NAFTA) GOES INTO EFFECT

Implementation of the North American Free Trade Agreement (NAFTA) began -- January 1, 1994

it removed most of the barriers to trade and investments among Canada, Mexico and the U.S.

agricultural provisions of the U.S.-Canada Free Trade Agreement (CFTA) were incorporated

(Canada has been a steadily growing market for U.S. agriculture

Canada imports close to three-fourths of all U.S. sales

of fresh and processed fruits and vegetables, snack foods and other consumer foods)

Canada and Mexico are the second and third largest export markets for U.S. agricultural products

all barriers to agricultural trade between the two nations and the U.S. were removed

with the exception of tariffs which were to be phased out over fifteen years

these two markets combined import more American goods

than Japan and the European Union

U.S. exports to Mexico have increased faster than imports from Mexico

although agricultural trade has increased in both directions under NAFTA

NORTH AMERICAN FREE TRADE AGREEMENT (NAFTA) GENERATES CONCERNS⁸⁶⁵

Concerns intensified as the United States and other nations negotiated individual trade agreements

approval of the North American Free Trade Agreement (NAFTA)

by the U.S., Mexico and Canada aroused controversy in all three countries:

- dramatic uprisings took place in the Mayan communities of Mexico;
- in the U.S. and Canada unions bitterly denounced NAFTA
for accelerating the flow of jobs to low-wage, non-union factories in Mexico;
- in Canada the proposed trade agreement forced the election of a new prime minister

McCAW CELLULAR COMMUNICATIONS IS SOLD TO AT&T

McCaw brothers sold McCaw Cellular Communications to AT&T for \$12.6 billion -- 1994

in the process, Craig McCaw himself became one of AT&T's largest shareholders

but he refused to sit on the Board of Directors because he cannot stand long meetings

Away from the office, Craig McCaw is an avid aviator who routinely pilots his own jet

he remained active in environmental and civic affairs in his home state of Washington

and invested millions of dollars in a campaign

to convert a run-down industrial district of Seattle into a vast urban park

PARTNERSHIP FOR LEARNING (PFL) IS LAUNCHED TO FURTHER REFORM EDUCATION

Washington State Legislators recognized the efforts to raise expectations for all students

would require a much higher level of community support and engagement -- 1994

Boeing CEO Frank Shrontz and Lieutenant-Governor Joel Pritchard were respectively named

chair and president of the "Partnership for Learning" (PFL)

PFL immediately began a comprehensive program to help build public awareness and understanding

⁸⁶⁵ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 1, Essay 9183, HistoryLink.org, October 13, 2009.

of the need for higher educational standards and greater student achievement
to ensure the success of Washington's young people
in the workplace and the society of the future

TACOMA CITY LIGHT DEVELOPS THE WYNOOCHEE RIVER FOR POWER⁸⁶⁶

Large-scale hydroelectric projects like the Nisqually and Cowlitz projects
raised environmental concerns [1970s]
shortage of good sites that were not developed meant that no more big dams would be built
U.S. Army Corps of Engineers built a flood-control dam
on Grays Harbor County's Wynoochee River in the Olympic Mountains [1972]
needing to generate additional electricity for its customers,
Tacoma City Light looked at existing flood control and irrigation dams
to see if any were suitable for adaptation
one source was close to the water system -- a turbine was inserted into a city water pipe
it generated enough electricity for 300 homes
Even so, Tacoma City Light invested \$25 million in a new generating station
about a quarter mile downstream from the Wynoochee Dam and took over operation of the dam
Army Corps of Engineers retained control of water releases during heavy rains
Wynoochee River generated thirty megawatts of electricity
enough to power 2,600 homes -- 1994

STATE FUNDING FOR PUBLIC SCHOOLS IS AGAIN REDUCED

Corporate lobbying for billions of dollars in tax breaks and other benefits began
these corporate benefits resulted in reduced funding to the state's public schools
local school districts again were forced to slash their operating budgets
until Washington's school funding was ranked near the bottom nationally

BILL AND HELEN THAYER CONDUCT THEIR STUDY OF ARCTIC ANIMALS⁸⁶⁷

Snohomish County residents Bill and Helen Thayer set out for the Arctic Circle
to conduct a study into the behavior of the Arctic gray wolf and other animals -- April 1, 1994
they were accompanied by their husky-mix dog, Charlie, whose great-great-grandfather
was an Arctic gray wolf
Thayers' planned to study Arctic wildlife habitat in two parts:
during the summer they would live near a wolf den and attempt to study food-sharing habits
among wolves and other land-bound animals like ravens and grizzlies;
•in the winter, they would travel to the cold-weather ground of the wolves and observe
similar behavior among polar bears and foxes
Bill and Helen found a wolf den just across the Arctic Circle
Charlie proved to be a remarkable go-between for his pack of humans and the wolves
showing submission by lying down paws forward and avoiding eye contact,

⁸⁶⁶ David Wilma, *Tacoma City Light taps Wynoochee River for power in 1994*, Essay 5151, HistoryLink.org, January 30, 2003.

⁸⁶⁷ Kate Kershner, *Helen and Bill Thayer set out for a year in the Arctic Circle to study the gray wolf on April 1, 1994*, Essay 9850, HistoryLink.org, June 30, 2011.

seven wolves in the pack allowed the Thayers to camp 100 feet from the entrance of their den
Thayers witnessed the ordinary lives of wolves; their playful games included tug-of-war and chase
they were also witness to new additions to the wolves' family as two new pups were born
showing their ease with the humans, the wolves brought the pups out of the den
within weeks of birth
Aerial poachers were a threat to the wolves and the Thayers saw the wolves showing their pups
how to listen and watch the sky for danger
Thayers witnessed the wolves and Charlie embark on a neighborly relationship
when one of the pups would cross into Charlie's territory to play, t
he dog would gently lead it back to where one of the wolves
would "pick up" their wayward off-spring
also, after a hunt, the wolves would leave an offering of meat for Charlie
(Thayers skied north to observe polar bears hunting for seals that winter
Thayers lived mostly eating fat -- they left the meat for wolves and foxes to eat
this kind of food-sharing mimicked what they had seen in the summer months
as the wolves made a caribou kill and later shared the carcass with grizzlies and ravens)
(Helen Thayer wrote of their experiences in her book *Three Among the Wolves* [2004]
their experiences helped form the basis for parts of Thayer's Adventure Classroom program,
a nonprofit organization formed to educate young people via the Thayers' travel experiences)

KURT COBAIN, STAR OF THE ROCK BAND *NIRVANA* COMMITS SUICIDE⁸⁶⁸

Kurt Cobain, well-known Grunge Rock guitarist from Aberdeen was found dead -- April 8, 1994
an apparent victim of a self-inflicted shot gun wound to the head at age twenty-seven [April 5]
he had written such hits as "Smells Like Teen Spirit" and "Heart-Shaped Box"
and had risen to stardom with the Seattle-based band *Nirvana*
Cobain was survived by his wife and fellow performer Courtney Love and daughter Frances Bean
Thousands of bereaved fans gathered for a memorial vigil at Seattle Center
surviving members of *Nirvana* dissolved the band and pursued their own careers and causes

EVERETT BECOME A U.S. NAVY HOMEPORT

Everett was selected from among thirteen ports as the ideal location for the new homeport
Congress approved the first funds for construction [October 2, 1986]
U.S. Navy awarded the \$56 million construction contract for the 1,620-foot long
aircraft carrier pier
official ground breaking ceremony was conducted [November 9, 1987]
three Navy ships participated in the formal opening of the new pier [June 1992]
U.S. Navy acquired a fifty-two acre site located off 136th Street in Smokey Point
second ground breaking ceremony was held [August 30, 1993]
there a Naval Station Everett Support Complex composed of a commissary, exchange, thrift shop,
family service center, education offices, bachelor officer quarters, craft shop/gear issue,
chapel and religious education center, auto hobby shop, ball fields and courts,

⁸⁶⁸ Clark Humphrey, *Kurt Cobain: Seven Years Later -- a Reflection by Clark Humphrey*, Essay 3263, HistoryLink.org, May 10, 2001.

and fleet parking for personnel assigned to deployed Everett-based ships
and a fifty-room Navy Lodge
Naval Station Puget Sound personnel and over 1000 guests attended the official dedication ceremony
as Naval Station Everett opened -- April 8, 1994

NORTHWEST FOREST PLAN FURTHER PROTECTS THE NORTHERN SPOTTED OWL

Clinton Administration adopted a new Northwest Forest Plan -- April 13, 1994
it provided a series of federal policies and guidelines
governing land use on Pacific Northwest federal land
in areas ranging from Western Washington to Northern California
its original intent was to protect habitat critical for the northern spotted owl
but the plan was expanded to include much broader habitat protection goals
President Clinton's Northwest Forest Plan provided for five major goals:

- never forget human and economic dimensions of the issues;
- protect the long-term health of forests, wildlife, and waterways;
- focus on scientifically sound, ecologically credible, and legally responsible strategies and implementation;
- produce a predictable and sustainable level of timber and non-timber resources;
- ensure that federal agencies work together

Clinton's Northwest Forest Plan applied predominantly to National Forests
however Bureau of Land Management lands, National Parks, National Wildlife Refuges
and military bases were also covered

NORTHWEST FOREST PLAN GOES TO FEDERAL COURT

Northwest Forest Plan was highly controversial
it called for greatly decreased timber yields within National Forests
to levels less than a fourth of those in the [1980s]
in an effort to preserve seventy percent of the federally owned old-growth forests
in addition the plan provided for restoration of watersheds damaged by logging operations
this policy was blamed by some for large-scale job losses in timber-dependent communities
Timber interests and environmentalists both objected to the plan
they filed suit in federal court to stop implementation of the plan -- April 1994

WASHINGTON STATE CONDUCTS AN EXECUTION⁸⁶⁹

Charles Rodman Campbell, age thirty-nine, was put to death
for the [1982] murders of a mother, her eight-year old daughter and a neighbor -- May 27, 1994
he had previously been convicted of raping the mother while holding a knife to the baby's throat
Under state law, Campbell had a choice of hanging or lethal injection -- which he refused to make
in that case the state imposed hanging
Charles Rodman Campbell refused to cooperate with the execution
pepper spray had to be used to remove him from his cell

⁸⁶⁹ David Wilma, *State of Washington conducts its last execution by hanging on May 27, 1994*, Essay 5555, HistoryLink.org, September 26, 2003.

he was strapped to a board
it took prison officials ninety seconds to place a hood over his head
and to fix the noose before the trap was opened
(Legislature amended state law and lethal injection became the authorized method of execution
unless the defendant chooses hanging [1996])

CIVIC LEADER AND ACTIVIST MARY MAXWELL GATES PASSES AWAY⁸⁷⁰

Mary Maxwell grew up in Seattle's North End and graduated from Roosevelt High School
where she was class valedictorian and a star forward on the girls' high school basketball team
She received a degree in education from the University of Washington [1950]
while at the UW, she met law student William H. ("Bill") Gates Jr. and they married
William Gates took a job as a Bremerton Assistant City Attorney [early 1950s]

Mary Gates taught junior high school there
Gates family moved to Seattle where William practiced law
Mary involved herself in a wide array of civic activities in Seattle:

- she volunteered as a lecturer at the Museum of History and Industry and served on boards
for the Seattle-King County United Way, KIRO, Inc., Washington Gives
and Leadership Tomorrow;
- she was the first woman president of King County's United Way
the first woman to chair the national United Way's executive committee
United Way established a national award in her name for **"exemplary projects"**
this represented Gates' emphasis on cooperation between staff and volunteers;
- she was the first woman to be a director of First Interstate Bank of Washington;
- Mary joined the Board of Trustees at Children's Orthopedic Hospital [1972]
she worked on a variety of committees before heading up the board's
legislative affairs committee -- she lobbied officials in Olympia and Washington, D.C.
on issues that affected the hospital and children
when the Children's Hospital Foundation was organized [1985] Mary chaired that board;
- Governor Dan Evans appointed Mary Gates to the University of Washington Board of Regents
she led a movement on the board to cut, and then divest, the University's investments
in South Africa to pressure the government there to change
its racist and oppressive system of apartheid;
- First Interstate Bank named Mary Gates to its board of directors [1993]

William and Mary Gates had three children who grew up in Seattle's Laurelhurst neighborhood
Kristianne "Kristi" Gates Blake was born [1954]

Kristi lives in Spokane where she devotes time to the Junior League,
Spokane Community College Foundation and Spokane United Way

William H. ("Bill") Gates III was born [1955]

Bill attended Lakeside School where he developed an interest in computers
he attended Harvard, but dropped out in his junior year [1975]
he joined with Lakeside classmate Paul Allen
to found what became the Microsoft Corporation

⁸⁷⁰ David Wilma, *Gates, Mary Maxwell (1929-1994) and family*, Essay 7188, HistoryLink.org, January 1, 2005.

(today Bill Gates is one of the world's richest men
as a was Paul Allen before his death [October 15, 2018])
Bill's mother, Mary Gates, influenced him to become
one of the highest-profile contributors to United Way
he started a gift-matching program at Microsoft
Elizabeth ("Libby") Gates Armintrout was born [1964]
Libby serves on the Board of Trustees for University Child Development School,
on the advisory board of the Carlson Leadership and Public Service Center at the UW
she volunteers for the Make-a-Wish Foundation
and for the Seattle Schools Fund for Excellence
Mary Maxwell Gates died of breast cancer at age sixty-four -- June 10, 1994

MURDEROUS RAMPAGE IN SPOKANE COUNTY⁸⁷¹

Dean A. Mellberg, age twenty, arrived at the Fairchild Air Force Base hospital
from downtown Spokane in a taxicab -- 2:45 p.m. June 20, 1994
Although considered a part of the military base, the hospital and psychological services unit annex
were situated outside of the security fence
several hundred yards from any base security checkpoint
hospital complex was bordered on two sides by base housing
Mellberg, dressed entirely in black, carried a large duffel bag containing a MAK-90 assault rifle
with a 75-round drum magazine
he entered the hospital annex, took the rifle out of the bag and walked directly to an office
shared by Captain Alan W. London, age forty, chief of psychological services at Fairchild,
and Major Thomas E. Brigham, age thirty-one, the base psychiatrist
he shot each once in the chest
Mellberg turned and walked down the hallway opened doors and shot at anything that moved
He left the annex and entered the main hospital firing randomly as he went
he entered the hospital cafeteria and sprayed the area with bullets wounding five people
and killing eight-year-old Christin F. McCaren
Leaving the cafeteria, he moved into the hospital parking lot
there he focused on thirty-nine-year-old Anita L. Lindner who was trying to flee the grounds
she was struck by five rounds from Mellberg's assault rifle
she was the only victim hit more than once
Senior Airman Andrew P. Brown, age twenty-five, with the 92nd Air Force Security Police Squadron,
was patrolling the base's housing areas on a bicycle
when he received an emergency call on his two-way radio
he pedaled a quarter-mile to the scene and, while still some seventy yards away,
he spotted Mellberg shooting at scores of panic-stricken people in the parking lot
Brown dismounted his bicycle and ordered the gunman to drop his weapon
Mellberg turned and shot at him
Brown dropped into a combat crouch and returned fire with his 9mm semiautomatic pistol

⁸⁷¹ Daryl C. McClary, *Dean A. Mellberg shoots and kills four people and wounds 22 at Fairchild Air Force Base hospital on June 20, 1994*, Essay 8767, HistoryLink.org, October 1, 2008.

he fired four rounds at Mellberg; two missed, one hit him in the shoulder
and one struck him between the eyes instantly ending the homicidal rampage
in less than ten minutes twenty-six people had been shot and Mellberg lay dead
drum magazine in Mellberg's MAK-90 still held nineteen rounds
In the chaotic aftermath of the shootings, reports of the number of casualties varied
seriously wounded victims were taken by ambulance and helicopter to Spokane-area hospitals
the few victims with minor injuries were treated at Fairchild AFB hospital and released
final tally was five people killed, including Mellberg, and twenty-two people wounded
however, the following day, shooting victim Michelle Sigmon, age twenty-five,
who was five months pregnant, miscarried after the trauma of being wounded
Air Force officials immediately investigated Mellberg's military service history
Dean A. Mellberg had a history of mental problems
during his twenty-two months in the Air Force
in basic training he was unable to get along with the other recruits
an Air Force psychiatrist recommended he be discharged
instead he graduated and was sent to Colorado's Lowry AFB
where he trained in aircraft maintenance
Mellberg was stationed at Fairchild AFB from [April] through [September 1993]
where complaints about his behavior led to another psychological referral
base psychologists Captain Alan W. London and Major Thomas E. Brigham
both considered Mellberg dangerous and recommended his discharge
Mellberg was sent to the Wilford Hall Medical Center, Lackland AFB, San Antonio, Texas,
for further psychological evaluation and treatment
after four months of psychoanalysis, doctors determined he had serious mental problems
he was unfit for military service and they recommended he be discharged
Mellberg was returned to duty after U.S. Representative David Lee Camp (R-Michigan)
at the request of Mellberg's parents intervened in his behalf
after being refused as position at Mountain Home AFB in Idaho,
Mellberg was sent to Cannon AFB near Clovis, New Mexico
he lasted five weeks before he ran into trouble once again
and the base commander ordered him undergo another psychiatric evaluation
this time he was found to be deranged and was honorably discharged
Dean A. Mellberg returned to Fairchild Air Force Base to take revenge
Senior Airman Andy Brown was awarded the Airman's Medal for heroism
he also received an award from the International Police Mountain Bike Association
citizens of Spokane honored Brown with a certificate of appreciation
U.S. Air Force presented him with the Colonel Billy Jack Carter Award
which is given annually to the person **"who makes the most significant contribution in
protecting Air Force people and resources"**
Andy Brown eventually left the Air Force and joined the U.S. Border Patrol

CEILING TILES FALL FROM THE ROOF OF SEATTLE'S KINGDOME

Roof the Kingdome had presented problems from the beginning [1976]
leaks were discovered in the roof two months before the stadium opened

several attempts at repairs had either made the situation worse or had to be redone
King County decided to strip off the old roof coating and replace it [1993]
sandblasting failed to get all of the old material off
pressure-washing resulted in seepage through the roof
As the Mariners were on the field doing pregame warm-ups one half hour before the gates opened
four twenty-six pound ceiling tiles fell -- July 19, 1994
as a result, the Kingdome was closed
(Mariners were forced to play their last twenty games of the 1994 season on the road
however, the season was shortened by a Major League Baseball strike)
(Seahawks played their preseason and three regular-season home games
at nearby Husky Stadium)
(Kingdome held a reopening ceremony the weekend of [November 4-6, 1994]
and the Seahawks returned to the stadium for the remainder of the regular season game
repairing the roof ultimately cost \$51 million
two construction workers lost their lives in a crane accident during the repair
falling ceiling tiles, loss of life and expensive repairs motivated plans to replace the stadium)

WEANTCHEE NATIONAL FOREST IS HIT BY A DEVASTATING FOREST FIRE⁸⁷²

More than 135,000 acres of the Wenatchee National Forest burned for thirty-three days
lightning storms started a number of fires along Tyee Creek
about twenty miles north of Wenatchee -- July 24, 1994
Tyee Creek region had originally been covered with ponderosa pine with its fire resistant thick bark
this pine was harvested and Douglas fir, less resistant to fire, grew in its place
aggressive fire suppression policies of the U.S. Forest Service, the State of Washington
and private timberland owners since the [early 1900s]
resulted in a buildup of brush on the forest floor
135,000-acre Tyee Creek fire was one of the largest forest fires in Washington in the 20th Century
thirty-five homes and cabins were destroyed
but many more are saved by firefighters and prevention strategies by homeowners
(it was rivaled only by the [1902] Yakolt Burn which destroyed 238,920 acres)
other fires in the region on Hatchery Creek and Rat Creek consume another 40,000 acres
More than 2,775 firefighters worked on the fire lines
and approximately 1,000 Marines from Camp Pendleton, California were added to the effort
This fire and others across the nation caused the deaths of thirty-five firefighters --1994
U.S. Forest Service's policy of aggressive fire suppression was brought under question

WASHINGTON STATE SCHOOL DISTRICTS FACE THREE STRIKES

Washington Education Association (WEA) affiliates in three school districts went on strike -- 1994
Concrete Education Association (CEA) members remained on strike for sixteen days
before an acceptable professional agreement was negotiated under a court injunction
Bremerton (BEA) teachers refused to return to their classrooms for sixteen days

⁸⁷² David Wilma, *Tyee Creek Fire burns 135,000 acres for 33 days north of Wenatchee, beginning July 24, 1994*, Essay 5492, HistoryLink.org, July 29, 2003.

although a court injunction was granted to end the strike, the teachers defied the court order
Federal Way teachers of the FEA closed schools for six days before reaching an agreement

HOMEPORT EVERETT RECEIVES ITS FIRST U.S. NAVY SHIPS

USS *Ingraham* (FFG-61) and USS *Ford* (FFG-54) arrived in Everett
as the first of seven ships to be assigned there -- September 3, 1994
USS *Paul F. Foster* (DD-964) arrived at the naval station [November 22, 1995]
on that same date, the Navy officially announced the assignment of USS *David R. Ray* (DD-971),
USS *Callaghan* (DD-994), and USS *Chandler* (DDG-996) to Naval Station Everett
David R. Ray arrived [July 29, 1996] and *Callaghan* and *Chandler* both arrived [September 27]

GRAIN GROWNING FARMERS FACE A RAILROAD SHIPPING CRISIS

In the early [1990s], a national shortage of rail hopper cars made it difficult and expensive
for Washington state farmers to get their grain harvests to market⁸⁷³
transcontinental railroads were earning more money hauling grain
from the Midwest to ports in the Pacific Northwest
than they could with shorter distance trips within Washington
this reduced the supply of empty grain cars available for Eastern Washington grain shippers
This problem was addressed through a joint effort by the Port of Walla Walla,
Washington State Department of Transportation (WSDOT), the Blue Mountain Railroad
and four Walla Walla area grain co-ops which purchased and repaired
twenty-nine used rail hopper cars at a cost of \$763,000
to be used on "Washington Grain Trains"
Wheat and barley were collected from grain elevators in Southeast Washington
and hauled to grain-export facilities in deepwater ports
along the Columbia River and Puget Sound
once the trains were in service, their income was used to acquire an additional sixty-five rail cars
Washington's Grain Trains are operated by the Washington State Department of Transportation,
and the ports Walla Walla, Moses Lake and Whitman County
grain was hauled to grain-export facilities in Portland, Vancouver, Washington, Kalama,
Tacoma and Seattle
short line railroads such as the Blue Mountain Railroad, the Columbia Basin Railroad
and the Palouse River and Coulee City Railroad were involved
they made enough profit to upgrade their infrastructure and attract new business
(Washington's Grain Trains operated at no cost to taxpayers
this program expanded to ninety-four hopper cars [2003]
it served more than 2,500 cooperative members and farmers
in one of the most productive grain-growing regions in the world
grain elevators were served in Waitsburg, McCoy, Schrag, Spangle, LaCrosse, Prescott,
Willada, St. John, Thornton, Plaza, Rosalia, Endicott, Oakesdale, Palouse
and Fallon, Washington)

⁸⁷³ Charles Hamilton, *Washington grain train begins rolling in the fall of 1994*, Essay 7530, HistoryLink.org, October 30, 2005.

REPUBLICAN REVOLUTION SWEEPS ACROSS AMERICA

Congressional races across the nation experienced a “Republican Revolution” -- November 8, 1994 as Georgia Representative Newt Gingrich lead the Republican Party in taking control in both the U.S. House of Representatives and the U.S. Senate for the first time in forty years election results in the middle of President Bill Clinton’s first term showed a fifty-four seat swing from Democrats to Republicans in the U.S. House of Representatives Evangelicals of the “Religious Right” became a significant voting bloc in the Republican Party 27% of all voters identified themselves as a born-again or evangelical Christians Republican U.S. House candidates outpolled Democrats among white evangelicals by a massive fifty-two points, 76% to 24% (U.S. House of Representatives elected its new Speaker of the House -- Newt Gingrich)

WASHINGTON VOTERS SHAKE UP STATE GOVERNMENT

Washington’s Fifth Congressional District U.S. Representative Democrat Tom Foley of Spokane served as Speaker of the U.S. House of Representatives in a shocking election race, Speaker of the U.S. House of Representatives Foley lost his bid for reelection to Republican congressional candidate George Nethercutt Nethercutt campaigned on the need for change he pledged that if he was elected he would serve only three terms (that pledge was later rescinded and he was reelected to five terms) (last time the U.S. Speaker of the House had lost an election was 134 years before when Whig William Pennington was defeated before the Civil War [1860]) Washington voters had failed to return to office the two highest officers in government Democrat Warren G. Magnuson, President Pro Tempore of the U.S. Senate [1979] Democrat Tom Foley, Speaker of the U.S. House of Representatives [1994]

Republicans captured seven of Washington State’s nine congressional seats in the 1st Congressional District Maria Cantwell was defeated by Rick White (52%-48%) in the 2nd Congressional District Democrat Al Swift retired and replaced by Jack Metcalf in the 3rd Congressional District Democrat Jolene Unsoeld lost to Linda Smith (53%- 45%) in the 4th Congressional District Democrat Jay Inslee was defeated by Doc Hastings (53%-47%) in the 5th Congressional District Democrat Tom Foley lost to George Nethercutt (51%-49%) in the 6th Congressional District Democrat Norm Dicks won reelection (58%-42%) in the 7^h Congressional District Democrat Jim McDermott won reelection (75%-25%) in the 8^h Congressional District Republican Jennifer Dunn won reelection (76%-24%) in the 9^h Congressional District Mike Kreidler was defeated by Randy Tate (52%-42%) only Democrats Norm Dick and Jim McDermott remained in office

State legislative races showed the same trend toward Conservative Republican politics Democrats in the State Senate lost three seats but managed to maintain a one vote majority Republicans in the State House of Representatives gained twenty-eight seats to establish a sixty-one to thirty-seven majority which great to sixty-three seats when two State Representatives switched their affiliation from Democrat to Republican Tom Campbell [November, 31, 1995] and Dave Mastin[[July 7, 1995] State House of Representatives members elected Wenatchee’s Clyde Ballard

Speaker of the House

State voters also passed Referendum 43 referred to them by the state legislature

R-43 allowed a sales tax on cigarettes, liquor and pop syrup to be used to fund

violence reduction and drug enforcement programs -- 947,847 For and 712,575 Against

KING COUNTY RE-ADDRESSES GROWTH MANAGEMENT ISSUES⁸⁷⁴

In an effort to prevent sprawl and uncontrolled growth,

King County Council approved a new Comprehensive Growth Management Plan

to guide and regulate growth and land development in King County -- November 18, 1994

As required by the legislature-passed Growth Management Act [1990],

King County Council considered and adopted development regulations

Growth Management Plan Phase II, as it was known, set strategies and requirements:

- they strengthened zoning provisions directing urban and rural land use, economic development, housing and protection of the natural environment;
- they provided additional protections and limitations on development for environmentally critical areas
 - use of natural resource lands (forest, agriculture and mining) was regulated;
- they implemented special regulations governing shorelines;
- energy and telecommunications facilities and services were addressed as was transportation;
- parks, recreation and open space, and cultural resources all received attention;
- they developed guidelines to implement and enforce the policies outlined in Plan II

Fourteen urban centers were created to take the bulk of new growth

WILLIAM H. GATES FOUNDATION IS ESTABLISHED

Bill and Melinda Gates consolidated their giving into the William H. Gates Foundation

that concentrated on Third World health care, online learning and education

and community needs in the Pacific Northwest

with an initial stock gift of \$94 million -- December 1994

William H. Gates Sr. managed the new foundation

(Bill Gates III reorganized the family foundations into the Bill & Melinda Gates Foundation [2000])

this is the largest philanthropic foundation in the world with assets of \$21.8 billion [in 2000])

NORTHWEST FOREST PLAN IS RULED TO BE LEGAL

U.S. District Court Judge William Dwyer ruled -- December 21, 1994

that the Northwest Forest Plan complied with the [1976] National Forest Management Act

and was therefore to be enforced

in Washington, Oregon, and Idaho more than 226 lumber, plywood, veneer, and pulp mills⁸⁷⁵

closed from [1988] to [1995]

INDIAN TREATY RIGHTS REGARDING SHELLFISH ARE ADDRESSED

⁸⁷⁴ Kit Oldham, *County Council approves King County's Growth Management Act Comprehensive Plan on November 18, 1994*, Essay 7874, HistoryLink.org, August 2, 2006.

⁸⁷⁵ David Wilma, *U.S. Forest Service protects the northern spotted owl by limiting timber sales on August 7, 1986*, Essay 5319, HistoryLink.org, July 24, 2003.

U.S. District Court Judge Edward Rafeedie ruled that Washington State treaty tribes retained to the right harvest shellfish even on private property -- December 1994
this placed Indians in conflict with private property owners
and shellfish companies who operated many of the most productive shellfish beds⁸⁷⁶
Northwest Indian Fisheries Commission supported the tribes involved with the case
(programs to assist the tribes in harvesting shellfish according to the terms of a settlement
were achieved and signed by all parties [2007])

WORLD TRADE ORGANIZATION (WTO) IS ORGANIZED

Occasionally trade disputes arise
having a set of rules to hold countries accountable for their trade actions assures that disputes
will be heard by impartial experts and that the defending government
will not be able to destroy the resolution process
World Trade Organization (WTO) was established -- January 1, 1995
to supervise and liberalize international trade by reducing barriers to trade
among the United States and other member nations
WTO replaced the General Agreement on Tariffs and Trade (GATT) (established in [1948])
WTO provided a framework for negotiating and formalizing trade agreements
and initiated a dispute resolution process
WTO's Director-General leads a staff of over 600 people in Geneva, Switzerland
who represent 135 member nations
WTO's top decision-making body, the Ministerial Conference,
meets at least once every two years
between meetings, the General Council, which includes representatives from each member,
meets several times a year at the Geneva, Switzerland headquarters
specialized committees, working groups and working parties
deal with particular agreements or issues such as trade laws, membership applications
and regional trade agreements
Trade Policy Review Body meets on a regular schedule to examine members' trade policies
and to settle disputes
In this way, the lowering of tariffs and trade barriers as a result of the WTO Agreements
expanded the marketplace for corporations and the variety selections for consumers

FOUR SEATTLE FIREFIGHTERS ARE KILLED FIGHTING A BLAZE⁸⁷⁷

Seattle Fire Department responded to a five-alarm fire at Pang International Foods, Inc.,
a frozen Chinese food facility housed in a wooden warehouse
in Seattle's International District built in [1908] -- 7:00 p.m. January 5, 1995
Response to the blaze continued to grow until more than 100 men and women were on the scene
firefighters did not have accurate plans for the structure
a floor over a hidden basement collapsed

⁸⁷⁶ Jennifer Ott, *Northwest Indian Fisheries Commission*, Essay 9786, HistoryLink.org, March 28, 2011.

⁸⁷⁷ David Wilma, *Four firefighters die in Pang arson fire in International District on January 5, 1995*, Essay 3820, HistoryLink.org, May 22, 2002.

four firefighters were killed in the accident:

- Lieutenant Gregory M. Shoemaker, age 43;
- Lieutenant Walter D. Kilgore, age 45;
- firefighter James T. Brown, age 25;
- firefighter Randall R. Terlicker, age 35

An investigation revealed the fire was set by the owner, Mary Pang's son Martin Pang in order to collect insurance and to clear the property for development (Martin Pang fled to Brazil and could not be extradited for murder after three years of legal and diplomatic wrangling, Pang was returned to Seattle where he pleaded guilty to four counts of manslaughter he was sentenced to thirty-five years in prison Pang's ex-wife and an FBI informant shared a \$36,000 reward posted for his arrest and conviction)

Problems with the Seattle Fire Department's training and safety programs had been exposed Fire Department officials had learned of Martin Pang's plans weeks in advance battalion chiefs had been alerted to prepare for it -- but they did not intervene firefighters were sent into the building even though no lives were threatened survivors of the dead men filed lawsuits charging the City of Seattle with negligence they won their cases with awards ranging from \$450,000 to \$5.6 million in the one case that went to trial, the jury held the Fire Department seventy-five percent responsible for the tragedy arsonist Martin Pang was twenty-five percent responsible

PUGET SOUND REGION COMMUTER TRAIN BEGINS DEMONSTRATION RUNS⁸⁷⁸

Regional Transit Authority began a public demonstration of its commuter train service between Everett, Seattle, Kent and Tacoma -- January 28, 1995

“Try Rail” trains completed a total of seventy-six weekday rush hour trips and thirty-two special excursions

“Try Rail” also carried Seattle Sonics fans to and from nine games held in the Tacoma Dome while Seattle's Key Arena was unavailable to the National Basketball Association these demonstration runs attracted more than 35,000 riders [through March 16, 1996] but failed to sway enough voters to pass the regional transit plan

CRAIG McCAW BECOMES FASCINATED WITH SATELLITE COMMUNICATIONS

Craig McCaw's interest began when he explored putting satellites into orbit above the Indian Ocean and western Pacific Ocean to provide Asia with cellular telephone service McCaw joined with California businessman Ed Tuck to develop a plan

Tuck was a pioneer in using satellites to help sailors, recreational boaters and others to determine their exact location using a handheld transmitter

Craig McCaw decided to investigate the possibility of developing a series of communication satellites Tuck suggested using satellites in low orbits for the global telephone system

⁸⁷⁸ Walt Crowley, *Regional Transit Authority commuter train begins demonstration runs on January 28, 1995*, Essay 2719, HistoryLink.org, January 1, 2000.

this would overcome the disruptive signal lag known as “latency” problem
that plagued calls which relied on stationary satellites in high orbits
Tuck appeared to be right, it would be necessary to develop satellites that could fly close to Earth
and send light signals from a satellite antenna to another satellite or to an antenna back on earth
Craig McCaw decided to investigate the possibility of developing a series of low-flying satellites
he conceived of digital bits of information which would be attached to a light signal
but even the speed of light would not completely overcome the latency problem
Craig McCaw and Ed Tuck put seed money into the communication project
they paid a small team of engineers to tinker with the idea of a global satellite network
McCaw hired Russ Daggatt, an attorney and international negotiator
to investigate how a satellite system could make money
McCaw knew it must do more than just carry telephone messages
Daggatt envisioned a high speed network linking computers around the world
which could log onto the Internet or send data, graphics and videos
across oceans and continents quickly and cheaply

GRAIG McCAW LAUNCHES A NEW COMPANY TO RESEARCH SATELLITE COMMUNICATION

McCaw Cellular’s Craig McCaw, California businessman Ed Tuck and attorney Russ Daggatt
began to implement a system to make money using a network of satellites
Craig McCaw established Calling Communication, Inc. and led the communication project
to find a way to pass information between Earth and a series of low-flying satellites
Calling Communication, Inc. and McCaw Cellular Communications president Craig McCaw
convinced Microsoft Chairman Bill Gates to join him in the satellite venture
each partner put up \$5 million in seed money
David Patterson, Calling Communication, Inc. engineer, calculated
it would require 840 satellites flying in twenty-one orbits about 620 miles apart
at a distance of 435 miles above the Earth (the Space Shuttle flies at about 180 miles out)
an additional eighty satellites would be needed in case some broke down or hit space junk
thus it would be necessary to construct in excess of 900 satellites
which was more than all the satellites already in space
cost of each refrigerator-sized satellite was estimated at \$6 million
if they could be mass-produced
it was estimated the complete system would cost \$9 billion
Calling Communication, Inc. envisioned their satellite system
would serve as a gateway to the world-wide Internet
and would provide access to the information highway for rich and poor nations alike

GROWTH MANAGEMENT ACT COMES UNDER ATTACK STATEWIDE

Several states had adopted laws protecting the right to develop private property in the early 1990s
but in Washington the Democratic-controlled legislature sided with supporters
of growth management and environmental protection controls
Washington’s political scene changed when Republicans swept to victory in the [1994] election
as the national and state House of Representatives came under Republican control
and the State Senate came with one vote of becoming Republican

Protecting “property rights” became the centerpiece of the Republican political agenda known statewide as the “Contract With Washington”

Industry groups such as the Building Industry Association of Washington (BIAW) and some rural landowners complained that they were forced to pay or suffer property value reductions to provide environmental benefits to the general public

Building Industry Association, realtors, developers and other industry groups contributed more than \$200,000 to the Initiative 164 campaign to block implementation of the [1990] Growth Management Act restricting development in rural areas

paid signature gatherers were hired to collect the 181,667 signatures necessary to put I-164 on the ballot

I-164 supporters submitted around 232,000 signatures to the Washington Secretary of State but hundreds turned out to be forged and more than 48,000 were invalidated for other reasons nevertheless, the remaining valid signatures were 2,600 more than required to send the measure to the Legislature

to either pass into law or place on the [November] 1995 ballot

Republican-controlled State House of Representatives quickly passed I-164, but the Senate, where the Democrats clung to a 25 to 24-vote majority, balked

Democratic leaders argued that the bill was so vaguely worded that it raised many legal issues and could require taxpayers to pay billions of dollars to developers they urged that voters be allowed to decide the issue

however, several conservative Democrats supported the property-rights measure with twenty-five votes needed to bring I-164 out of committee to the senate floor

two Democratic senators joined twenty-three of the Senate’s twenty-four Republicans to pass I-164 on to the Senate floor

Once on the floor the full Senate passed I-164 by a 28 to 20 vote -- April 18, 1995 with six Democrats supporting the initiative and two Republicans opposed

property rights had won over growth management and environmental protection unless opponents to I-164 gathered at least 90,843 signatures in support of a referendum to block the law which would then take effect only if it was approved by voters

Even before the Senate action, the League of Women Voters, Common Cause, environmental groups, and others opposed to I-164 had been preparing a campaign to oppose the measure if the Legislature sent it to the ballot

Following the Senate vote, environmental groups had ninety days to gather at least 90,843 signatures to prevent I-164 from becoming law

GOVERNOR’S COUNCIL ON REFORM AND FUNDING II (GCERF II) ISSUES IT REPORT

After eighteen months were spent on research and discussion an agreement was reached on a plan to transform the public schools, liberate teachers and raise student achievement -- 1995

Washington State’s new academic standards were based on four state “learning goals:”

- read with comprehension, write with skills and communicate effectively and responsibly in a variety of ways and settings;
- know and apply the core concepts and principles of mathematics; social, physical and life sciences; civics and history; geography; arts; and health and fitness;
- think analytically, logically and creatively and integrate experience and knowledge

- to form reasoned judgments and solve problems;
- understand the importance of work and how performance, effort and decisions directly affect future career and educational opportunities

Assessment of student progress was identified as the key element in education reform examinations were written for third through eighth grades and high school sophomores in addition to multiple choice and problem-solving questions

students were required to complete charts and write essays to explain their answers

third and sixth graders were to be tested in reading and mathematics

fourth and seventh graders were to be tested in reading, math and science

high school assessment test was to be given in tenth grade and covered all learning goals

WASHINGTON STATE LEGISLATURE CHANGES SPECIAL EDUCATIONAL FUNDING

Legislators made changes to the Special Education funding portion

of the [1993] Education Reform Act -- 1995

when the “Washington’s Special Education Safety Net” was enacted

Under this legislation almost \$40 million in state and federal safety net funds were to be distributed to school districts that could demonstrate a financial need in one of three categories:

- to maintain the same level of educational spending as the year before due to changes in the state funding formula -- state money was to be used
- service delivery costs to students with more severe disabilities or delivery costs that were higher than the state’s average -- state was money to be used
- students who have unexpectedly high program costs -- federal money was to be used

After the first year of implementation two issues regarding the program became apparent:

- all or part of the safety net funds should be regarded as a permanent or transitional assistance under the new special education formula,
- the safety net should provide assistance for immediate problems or potential problems

SEATTLE’S HOPE HEART INSTITUTE ADVANCES HEART SURGERY⁸⁷⁹

Surgeons prefer to use a segment of vein taken from elsewhere in a patient’s body

when it is necessary to create a detour around a natural artery that was clogged with plaque

when a natural artery was not available vessels made of synthetic fabric

were used as substitute grafts

Dr. Lester R. Sauvage, founder of the Hope Heart Institute in Seattle, was a pioneer in the development of artificial blood vessels

(Sauvage graft made of Dacron [1971] is still widely used in cardiovascular surgery today)

Endothelial cells (thin, flat cells that form the interior layer of the entire circulatory system)

were long known to accumulate inside arteries -- even artificial arteries

there they played a crucial role in the healing process

Where these cells came from was a matter for medical speculation

most scientists believed artificial arteries were porous enough

to allow cells to be absorbed from nearby tissue

⁸⁷⁹ Cassandra Tate, *Hope Heart Institute scientists announce the source of “healing cells” in artificial arteries in May 1995*, Essay 7770, HistoryLink.org, May 23, 2006.

others thought these cells moved into the graft from the two ends of the natural blood vessel
Hope Institute scientists Qun Shi and Moses Hong-De Wu began to look more carefully
at the source of the Endothelial cells
they discovered that both theories were wrong -- in fact, the cells came from the bloodstream
these findings were published in *Journal of Vascular Surgery* -- May 1995
in this case proving a scientific theory was incorrect resulted in a major medical advancement
Dr. William P. Hammond, associate medical director of the Hope Heart Institute
and scientists at the Fred Hutchinson Cancer Research Center in Seattle
speculated that bone marrow which produces other blood cells
could also be the actual source of the endothelial cells
experiments with dogs proved this was, indeed, the case

SEATTLE MARINERS THREATEN TO LEAVE SEATTLE

(King County owned the Kingdome, a massive concrete building, which had opened [1976]
with the National Football League's Seattle Seahawks as its primary tenant
Kingdome was designed as a multi-purpose stadium but was better suited for football)
Seattle Mariners owners complained about the Kingdome
almost from the time Seattle's major league baseball team began playing [1977]
they wanted a new stadium and public money to help build it
Mariners' Kingdome lease was due to expire [1996]
the team's owners were not inclined to renew it and threatened to leave town
(Seattle Mariners had hired manager Lou Piniella during the [1992-1993] offseason
Piniella had led the Cincinnati Reds to victory in the [1990] World Series)
Seattle's 1995 season began slowly and seemed to go nowhere into mid-summer
despite a talented lineup they were third in the four team American League West division
center fielder Ken Griffey, Jr. their best player, had been out of action since May
when he ran full-speed into the Kingdome's centerfield wall to make a catch
and broke his right wrist

BOEING INTRODUCES THE 777

Boeing's board of directors authorized production of the 777-300 -- June 26, 1995
777 was the first entirely new Boeing airplane in more than a decade
it was larger than all other twinjet or trijet airplanes but smaller than the 747
it brought twin-engine economic advantage to medium- and long-range markets
Boeing 777 was the first jetliner to be completely digitally designed
using three-dimensional computer graphics
throughout the design process, the airplane was "preassembled" on the computer
thus eliminating the need for a costly, full-scale mock-up
Boeing's 777 was the widest, most spacious airplane in its class
it could carry more than 300 people
its greater payload and range capability resulted in lower operating costs to airlines
its standard equipment included many features that were optional on other airliners
several innovations such as improved airfoil technology, advanced flight deck design,
enhanced passenger comfort and increased interior flexibility also were included

(Boeing delivered its first 777 to Cathay Pacific Airways [June 1998])

ENVIRONMENTAL GROUPS OPPOSE ALLOWING UNLIMITED DEVELOPMENT

League of Women Voters, Common Cause, environmental groups and others opposed to I-164 began a campaign to gather enough signatures in ninety days to refer I-164 to the voters and thus override the action of the legislature when they voted the proposal into law. This campaign turned out to be the most successful in the state's history; it more than doubled the previous record number of signatures for a referendum: they delivered more than 230,000 signatures to Washington's Secretary of State on July 22, 1995 -- a day before the deadline to submit their petitions. This successful signature drive placed the former I-164 on the [November] ballot which was listed as Referendum 48.

EFFORTS ARE MADE TO SAVE THE SEATTLE MARINERS

Responding to the Mariners' threat to leave town, state legislators passed a financing plan that raised sales tax in King County from 8.2 to 8.3 percent. King County Council approved a plan that required voter approval -- late July 1995 polls suggested it had little chance of passage.

SEATTLE MARINERS BEGIN TO WIN BASEBALL GAMES

Mariners were ten games behind the division-leading California Angels -- fan interest was dwindling. General manager Woody Woodward asked the Mariners' owners for money to spend on additional talent. San Diego pitcher Andy Benes was added. Two weeks later speedy outfielder Vince Coleman came to the team. Ken Griffey returned to the lineup healed and healthy after his wrist injury. With two outs in the bottom of the ninth inning, Griffey hit a game-winning home run against the New York Yankees' best relief pitcher, John Wetteland -- August 24, 1995. That win was a turning point as the Mariners won six of their next eight games. They finished the month with team records for victories and runs scored. California Angels' lead in the Western Division had been cut in half. Griffey, right fielder Jay Buhner, designated hitter Edgar Martinez, first baseman Tino Martinez and third baseman Mike Blowers provided hitting power. Coleman and second baseman Joey Cora added speed and energy. Catcher Dan Wilson was a solid presence behind the plate. Starting pitchers Randy Johnson and Andy Benes and relief pitcher Norm Charlton were a potent combination.

ONE SCHOOL DISTRICT IN WASHINGTON FACES A STRIKE

Fife Education Association, an affiliate of the Washington Education Association, struck -- 1995 teachers walked picket lines for thirty-seven days in defiance of a court injunction that attempted to force them back to work. Finally, an acceptable professional agreement was negotiated and students returned to school.

SUPPORT FOR A NEW SEATTLE MARINERS' STADIUM COLLAPSES

Mariners had gained support by being in a pennant race for the first time in their history
but it wasn't quite enough as the stadium-financing plan was defeated -- September 19, 1995
when King County voters did not support a ballot measure
what would have funded construction of a new baseball-only stadium for the Mariners
had lost by less than one percent of the vote

SEATTLE MARINERS ARE IN THE AMERICAN LEAGUE WEST RACE

Mariners moved into a tie for first place with the California Angels -- September 21, 1995
Mariners had a day to rest before starting a three-game series with Oakland
more than 150,000 attended those games as the Mariners won all three
Seattle was two games ahead of the Angels
after a day off it grew to three games when L.A. lost
California Angels staged a late charge in the season's final week
they caught the Mariners on the last day of the regular season
since there was a tie for first place the two teams were forced to play an extra game
to determine the division championship

SEATTLE MARINERS PLAY A SINGLE PLAY-OFF GAME WITH LOS ANGELES

Winner would fly that night to New York to start the playoffs the next day against the Yankees
more than 52,350 fans showed up at the Kingdome to see the winner-take-all game
much of the city and region watched on television or listened on radio -- October 2, 1995
Seattle's Randy Johnson was in a pitcher's duel with California's Mark Langston, a former Mariner
Seattle held a one run lead in the seventh inning when the Mariners loaded the bases
a single into right field by Luis Sojo easily scored two more runs
when Langston attempted to relay the throw from right field he threw past the catcher
Sonjo scored an inside the park homerun -- the noise from the fans was deafening
Mariners went on to win 9-1
they made the American League playoffs for the first time in nineteen years

SEATTLE MARINERS WIN THE AMERICAN LEAGUE DIVISION PENNANT⁸⁸⁰

In the series with the New York Yankees, the Mariners held their own
after six games the series was tied three-three
In the decisive seventh games of the series 57,411 fans filled the Kingdome
seventy-eight percent of Western Washington households
watched on television -- October 8, 1995
New York Yankees took a 4-2 lead into the eighth inning
when Griffey made it 4-3 with his fifth home run of the series
a bases-loaded walk by Yankees pitcher David Cone tied the score at 4-4
With the game tied, six foot ten inch pitching ace Randy Johnson entered the game as a reliever
he had volunteered to pitch with only one day's rest

⁸⁸⁰ David Wilma, *Seattle Mariners win the American League West pennant on October 2, 1995*, Essay 3420, HlstoryLink.org, July 2, 2001.

he retired the Yankee's three best hitters in order
Yankees took a 5-4 lead in the eleventh inning as the home fans feared the worst
Joey Cora safely bunted for a single; Griffey also singled and advanced Cora to third
Edgar Martinez, the American League 1995 batting champion, hit a line drive into leftfield
Cora scored easily as Griffey went to third and continued on for home
Griffey beat the throw and gave Seattle a 6-5 victory
he was mobbed by teammates as Kingdome fans exploded in celebration
Griffey's smile at the bottom of the pileup said it all:
the Mariners were going to play for the American League championship

INTEREST IN A NEW STADIUM FOR THE SEATTLE MARINERS RESURFACES

With attendance on the rise, Mariners owners postponed their decision to leave town
Seattle Mariners owners met with Governor Mike Lowry and state legislative leaders
as the team prepared to face the Cleveland Indians for the American League title
Governor Lowry called a special session of the legislature to deal the stadium issue
State legislators struggled with the decision regarding a new stadium
before they authorized a tax package to fund a \$320 million stadium
taxes would increase in King County on food and drinks sold at restaurants, bars, and taverns
and on car and truck rentals and on tickets sold at the new stadium
this proposal was approved by the King County Council
This time voter approval was not required -- a source of rancor among those who opposed the stadium
Washington State created a Public Facilities District (PFD) to own and operate the proposed stadium
and to oversee its construction
Mariners officials and PFD fought from the beginning over countless design details
Mariners officials the King County Council argued over the terms of the team's lease
council members were concerned about the Mariners' insistence that the ballpark be ready
for the start of the [1999] season and team frustrations boiled over

SEATTLE MARINERS FACED THE CLEVELAND INDIANS

American League championship and a chance to play in the 1995 World Series was on the line
but after their epic struggle with the New York Yankees
where the teams hit a combined record twenty-two home runs, eleven each,
the American League Championship Series was anticlimactic
Cleveland Indians eliminated the Mariners four games to two -- October 10-17, 1995
After the final out, even though its team had lost, the crowd of roughly 58,000
lingered to cheer what the Mariners had accomplished
Seattle P-I sports writer Art Thiel wrote in *Out of Left Field*,
his book chronicling the team's rise from obscurity

McCAW COMMUNICATIONS REQUIRES PART OF THE ELECTROMAGNETIC SPECTRUM

To pass information between Earth and his satellites, Craig McCaw needed access
to part of the electromagnetic spectrum
lower end of the electromagnetic spectrum carries
signals used for pagers and cellular telephones AM and FM radio signals,

and UHF and VHF television
middle section of the spectrum carries microwaves, radar, television satellites
and the “Ka” band
high end of the spectrum carries Gamma rays, X-rays, ultraviolet, visible and infrared light
Only the “Ka” band, about halfway up the spectrum, could carry lots of information
and also was available for use by Craig McCaw if he could acquire the necessary permission
Craig McCaw knew he had to get both the United States and the United Nations
to set aside the critical piece of electromagnetic spectrum: the “Ka” band
this project was kept secret as plans were initiated to enter this new field of technology
McCaw filed plans with the Federal Communication Commission (FCC)
to acquire a portion of the “Ka” band of the electromagnetic spectrum
Problem with using the “Ka” band is that signals get broken up by rain, trees, or buildings
scientists planned to attempt to counter the problem of signal break-up by designing a network
to send signals from the earth and back at steep angles thus cutting down on interference
also, since satellites move, the company would need many of them over the entire globe

CRAIG McCAW BEGINS TO LOBBY THE WORLD

Craig McCaw announced to the public his futuristic scheme to dot the heavens
with a mind-boggling 840-satellite network for voice and data communications
McCaw filed plans with the U.S. Federal Communication Commission (FCC)
to acquire a portion of the “Ka” band of the electromagnetic spectrum
no one had ever secured permission from regulators around the world
to use the broad swath of high-frequency radio spectrum needed for such communications
United Nations International Telecommunications Union (ITU) is the agency
that controls international use of radio waves
ITU’s 1,200 delegates filed into a Geneva, Switzerland meeting hall -- October 23, 1995
by early the next morning ITU had agreed to set aside
most of the electromagnetic spectrum (“Ka” band) that Craig McCaw needed

VOTERS DECIDE THE ISSUE OF GROWTH MANAGEMENT VS PROPERTY RIGHTS

Referendum 48 asked voters whether the property-rights law passed by the Legislature
should be approved or rejected
both sides spent heavily in the ensuing campaign
Washington State Farm Bureau joined developers, Realtors and other supporters
they spent more than \$1.1 million in support of the measure
opponents countered with \$800,000 contributed by environmental groups,
wealthy individuals and small donors
opponents focused much of their attack on the fact that Referendum 48 was so vague
and potentially far-reaching that its effects would only be known after years of litigation
supporters of R-48 attempted to counter that opponents exaggerated the measure’s reach
In the end, voters solidly rejected the effort to limit growth management
Referendum 48 was defeated -- November 7, 1995
by 59.6 percent (796,869 votes) to 40.6 percent (544,788 votes)

OLDEST CONTINUOUSLY OPERATING SAWMILL IN THE NATION CLOSES

Puget Mill Company's Port Gamble sawmill, the oldest continuously operating sawmill in the U.S., permanently closed and the machinery was sold -- November 30, 1995
(it had begun operation [September 1853])

Company town of Port Gamble had once been home to 250 mill employees and their families
it had a church, hotel, medical clinic, schools, social clubs, theater, store, post office
and even a mortuary and cemetery
design and architecture of the community reflected the original owners' New England roots
elm trees planted from New England cuttings lined the streets
narrow front-gabled houses had lapped or tongue-and-groove siding
Port Gamble continued to operate as a tourist destination

U.S. FOREST SERVICE CHANGES ITS AGGRESSIVE FIRES SUPPRESSION POLICY⁸⁸¹

U.S. Government agencies responsible for wildfire policies, Forest Service, National Park Service, Bureau of Land Management, and the Fish and Wildlife Service,
developed a new National Fire Plan which was adopted -- December 18, 1995

Under this new program local land managers developed fire management plans
that included "prescribed burning:" the planned, controlled burning
of brush and other built-up fuel
timber on state-owned and privately owned lands blackened by the [1994] Tyee Creek Fire
was salvaged to recover the economic benefit and to remove potential fuel for other new fires
Forest Service offered timber from its lands for sale,
but that process took so long that much of the wood had lost its value
also buyers could not afford to comply with the environmental guidelines on logging operations

MARJORIE EDWINA PITTER KING, WASHINGTON'S SECOND BLACK LEGISLATOR, DIES⁸⁸²

Marjorie King was one of the state's first African American businesswomen
she operated M and M Accounting and Tax Service for nearly fifty years
Born in Seattle [1921] she was one of three sisters raised in Seattle's Central Area
political activity was an important part of life in the Pitter family
Edward Pitter, Marjorie's father, helped establish the Colored Democratic Club
he was honored as Democrat of the Year [1963]
Marjorie Allen Pitter, her mother, was once of the founders
of the Colored Woman's Progressive Democratic Club of King County
Marjorie and her sisters passed out literature, attended rallies and campaigned for candidates
Marjorie graduated from Garfield High School and attended the University of Washington
she entered the College of Economics and Business where she had many negative experiences
she felt that she was ignored by some professors and she also witnessed racial slurs
she was frequently on academic probation because of low grades

⁸⁸¹ David Wilma, *Tyee Creek Fire burns 135,000 acres for 33 days north of Wenatchee, beginning July 24, 1994*, Essay 5492, HistoryLink.org, July 29, 2003.

⁸⁸² Mary T. Henry, *King, Marjorie Edwina Pitter (1921-1996)*, Essay 8828, HistoryLink.org, November 2, 2008.

she transferred to Howard University in Washington, D.C. for her senior year [1942]
however, she dropped out of school that year to work at the Pentagon during World War II
she never graduated

Marjorie married John T. King -- (they would have two sons, Walter and Edward)
Marjorie returned to Seattle [1944] with John to raise their family
She established her successful business in the basement of her home
located just around the corner from her parents
her clients came from various places including Mexico and Alaska and some could not pay
she would help people who could not read or write English and even wrote letters for them

As an adult Marjorie King became prominent in the Democratic Party
she took a leading role in organizing youth activities
she received a letter from Eleanor Roosevelt [1946]
thanking her for organizing a group of young Seattle Democrats

Marjorie served as chairwoman of the 37th District (Central Seattle) Democratic Party,
she was treasurer of the Washington State Federation of Democratic Women, Inc.,
and on the rules, credentials and platform committee of the King County Democratic Party
she attended the [1964] National Democratic Convention
where she battled to seat the Mississippi Freedom Party delegation
at the [1968] Democratic Convention in Chicago she was tear-gassed during the riots

Thirty-seventh State Representative Democrat Ann T. O'Donnell met an untimely death [1965]
naming her successor resulted in two Democratic Party activists vying for the position
Democratic County Executive Board recommended Marjorie King
King County Commissioners named her to the position

Marjorie King became the second African American to serve in the state legislature [1965]
(William Owen Bush represented Thurston County in the first state legislature [1889])
Marjorie King ran for election to the Thirty-seventh State House of Representatives seat
she was defeated by the rival who opposed her
when she received the appointment to the position

Marjorie Pitter King died -- January 28, 1996

SEATTLE-TACOMA INTERNATIONAL AIRPORT'S (SEA-TAC) MASTER PLAN IS ADOPTED⁸⁸³
(Sea-Tac International airport's first two parallel runways were built only 800 feet apart
thus only one could be used when cloud cover was lower than 5,000 feet
or when pilot visibility fell below five miles
this condition prevailed approximately forty-four percent of the time
and resulted in flight delays and higher costs for airlines and their passengers
Port of Seattle and Puget Sound Regional Council publicly studied the problem [1989-1992])
Federal Aviation Administration [FAA] and Port of Seattle formally issue
a seven-volume, 5,500-page Final Environmental Impact Statement -- February 1, 1996
for planned Sea-Tac Airport improvements including a controversial third runway
this Environmental Impact Statement gave the Port of Seattle a green light to begin

⁸⁸³ Walt Crowley (with research by Daryl McClary and Paula Becker), *FAA and Port of Seattle publish a Final Environmental Impact Statement for proposed Sea-Tac International Airport improvements, including a third runway, on February 1, 1996*, Essay 4205, HistoryLink.org, March 21, 2003.

detailed planning and engineering and to apply for needed state and federal permits
Critics and opponents of the third runway, including Sea-Tac-area cities, institutions
and environmental groups formed the Airport Communities Coalition
to challenge the Final Environmental Impact Statement's findings
collectively and individually they filed administrative and legal appeals to stop the project
(Washington State Supreme Court largely cleared the way for construction [May 2004]
after having spent \$15 million over ten years to block the expansion of Sea-Tac Airport
Airport Communities Coalition dropped litigation against the third runway)

ASOTIN COUNTY IS HIT BY MAJOR FLOODING⁸⁸⁴

Heavy snow and cold struck Asotin County [during late January 1996]
but the weather turned warm and wet -- early February
Asotin County was hit by a series of mild Pacific storms
that caused heavy rain to fall on a frozen snowpack
combination of rain and snowmelt was too much for some of the county's rivers and streams
Asotin Creek began flooding the town of Asotin, Washington -- February 7, 1996
western end of the town of Asotin was flooded as Asotin Creek topped its levee
at Asotin High School ducks were reported swimming on the football field
aggressive sandbagging by high school students limited flood damage to the town
Asotin Park was not as fortunate as picnic shelters were filled with water and debris
playground equipment was destroyed and a blanket of boulders was left in the wake
Grande Ronde River in extreme southeastern Asotin County near the Washington-Oregon border
began to flood -- February 7
tiny town of Rogersburg, Washington just south of the Grande Ronde was evacuated
as the Grande Ronde reached flood stage
Rogersburg was stranded for at least three days as access to the town was limited to boats
State Route 129, the main north-south artery through Asotin County, was closed by slides
from Anatone, Washington south to Enterprise, Oregon
Buford Creek completely washed away a 300-yard section of the highway
at the bottom of Rattlesnake Grade
Snake River Road just west of Hellar Bar near Rogersburg
was flooded to a depth of three feet
to the west, a two-mile section of Troy River Road which paralleled the Grande Ronde River
was washed out between State Route 129 and Troy, Oregon
this was the area of greatest flood damage
Floodwaters peaked in Asotin County -- February 8-9, 1996
numerous other Asotin County and state roads were damaged and closed for several days
After the rain had stopped, the rivers retreated fairly quickly -- February 10
rivers returned to their banks and the cleanup began -- February 11
however, some portions of the Grande Ronde River remained flooded near Rogersburg
President Bill Clinton approved a federal disaster declaration for Asotin County

⁸⁸⁴ Phil Dougherty, *Major flooding strikes Asotin County on February 7, 1996*, Essay 7629, HistoryLink.org, January 27, 2006.

as well as numerous surrounding counties in Oregon and Idaho
damage to county roads was estimated at \$3.2 million in Asotin County,
but this figure did not include damage to state roads or private property
most of the damage was repaired within six months
with the exception of Asotin Park, which remained closed [through August 1997]

IRAQ AGAIN DENIES ACCESS TO UNITED NATIONS INSPECTORS

UNSCOM (United Nations Special Commission) inspectors demanded access to five sites in Iraq
teams were allowed to enter and inspect only after delays of up to seventeen hours -- March 1996
this was a violation of the United Nation's [1991] cease-fire agreement with Iraq

SEATTLE SONICS WITH THE WESTERN CONFERENCE CHAMPIONSHIP⁸⁸⁵

Seattle's professional basketball team made an impressive showing during the playoffs
they defeated the Sacramento Kings three games to one in the best of five series
Seattle went on to sweep the defending-champion Houston Rockets in the second round
Sonics next faced the Utah Jazz for the Western Conference and a trip to the finals
Seattle jumped to a three game to one lead before the Jazz roared back to tie the series
Seattle took game seven in one of the most exciting series of the 1996 playoffs
Seattle was alive with Sonic-mania -- June 2, 1996

Seattle's Sonics went to the NBA finals to face the Chicago Bulls
which featured Michael Jordan, Scottie Pippen and Dennis Rodman
Chicago won the first two games at home (90-107 and 88-92)
Seattle took the next two games at home (86-107 and 78-89)
Chicago took the deciding game in Chicago (75-87)

STARBUCKS EXPANDS INTO THE OVERSEAS MARKET

Howard Schultz, the visionary behind Starbucks, expanded his business beyond the U.S. border
Starbucks opened its first international store in Tokyo, Japan -- summer 1996
(since then, Starbucks Coffee International continued its expansion
reaching into another dozen international markets
Starbucks has over a hundred stores in Japan and the United Kingdom alone)
Starbucks became the leading retailer, roaster and brand of specialty coffee in the world
with more than 2,800 retail locations in North America, the United Kingdom, the Pacific Rim
and the Middle East
Starbucks coffee also is served in Singapore, the Philippines, Thailand, Taiwan, New Zealand,
Malaysia, Kuwait, South Korea, Lebanon and Beijing, China
agreements to open more stores were signed in Shanghai, Hong Kong and Australia
Starbucks employs more than 40,000 people in over 3,300 stores around the world
it serves ten million customers a week
average coffee-loving customer will visit a Starbucks location eighteen times a month
While rapid expansion marked Starbucks's history, the company remained committed
to the value of individuality as each store has a different layout

⁸⁸⁵ Dan Johnson, *Seattle SuperSonics* -- Part 2, Essay 3112, HistoryLink.org, March 6, 2001.

with a decor that matches the surrounding neighborhood
Starbucks' policy of opening in office buildings, hotels and outdoor kiosks
was aimed at invigorating other businesses in the area

REMAINS OF KENNEWICK MAN ARE DISCOVERED ALONG THE COLUMBIA RIVER

Will Thomas, 21, and Dave Deacy, 19, both of West Richland
were attending the annual hydroplane race near Kennewick -- July 28, 1996
before the race they were wading along the bank of the Columbia River at Columbia Park
when Thomas stepped on something that was round shaped buried in the mud
Thomas reached into the water to retrieve his find -- he saw that it had teeth
Thomas and Deacy stashed the skull in the bushes -- they wanted to go watch the hydro races
after the races they retrieved the skull and put it in a bucket
they showed their find to a Kennewick police officer
a search found a nearly complete skeleton scattered nearby
complete with a stone spear point driven into the hip⁸⁸⁶
it was determined that the skull was old -- possibly that of an early homesteader
Forensic anthropologists soon determined that the remains were very old
somewhere between 5,650 and 9,510 years old
and they were the most complete ancient skeletons ever found in North America
scientific speculation grew regarding links between these artifacts and the ancient Clovis Culture
This discovery triggered a nine-year legal clash among scientists, the American government
and Native American tribes who claimed Kennewick Man as their ancestor
this long dispute made Kennewick Man an international celebrity
(United State Court of Appeals for the Ninth Circuit ruled that a cultural link
between any of the Native American tribes and the Kennewick Man was not genetically justified
initiating further scientific study of the remains [February 2004]
scientists from around the U.S. convened in Seattle for ten days to study the remains [July 2005])

SEATTLE-TACOMA (SEA-TAC) AIRPORT MASTER PLAN IS UPDATED⁸⁸⁷

Plans to add a third runway at Seattle Tacoma International Airport (Sea-Tac) were in place
Sea-Tac Airport Master Plan Update formalized an aggressive program -- August 1, 1996
public education and public involvement, technical advisory panels, a newsletter,
a unique "Sea-Tac University" program and planning forums were called for
Port of Seattle Commission approved \$8.1 million for the beginning of the property acquisition
approximately 400 homes, additional businesses and apartment buildings were to be purchased
all of the land to be acquired lay along the Airport's western border in the City of SeaTac
port commissioners created an Acquisition Communications Program to assist residents
living within the area of land needed for the new runway with property sales and relocation
residents also had the services of an impartial Ombudsman program

⁸⁸⁶ Jim Kershner, *Two hydroplane racing fans discover the skull of Kennewick Man on the bank of the Columbia River on July 28, 1996*, Essay 8503, HistoryLink.org, February 28, 2008.

⁸⁸⁷ Paula Becker (with research by Daryl McClary and Walt Crowley), *Port of Seattle Commission adopts Sea-Tac International Airport's Master Plan Update, including a third runway and enhanced noise criteria, on August 1, 1996*, Essay 4206, HistoryLink.org, March 11, 2003.

during the acquisition process
(Construction on the 8,500-foot runway began [2004] and was completed four years later
at a total cost of just over \$1 billion -- it opened [November 20, 2008])

WASHINGTON STATE HISTORY MUSEUM OPENS IN TACOMA⁸⁸⁸

Idea of a museum in Tacoma first came from state legislator Dan Grimm (D-Puyallup)
he collaborated with other Tacoma-area legislators such as Brian Ebersole, Lorraine Wojahn,
Ruth Fisher, Art Wang, Marilyn Rasmussen, Ken Madsen, and Peter von Reichbauer
to have legislators approve \$34 million in state general obligation bonds
led by City Councilman Tom Stegner, Tacoma donated two-and-a-half acres on Pacific Avenue
Museum Director David Nicandri built a statewide constituency for the project
he raised \$6 million from government agencies, trusts and local businesses
big donors included Boeing, the National Endowment for the Humanities, Key Bank,
M. J. Murdoch Charitable Trust, Ben B. Cheney Foundation,
McEarchern Charitable Trust, Weyerhaeuser and the Forest Foundation
Architects Charles Moore and Andersson designed the 106,000 square foot museum
that housed a five-eighths scale electricity transmission tower, a 270-seat amphitheater,
museum shop and a café
Washington State History Museum opened to the public -- August 10, 1996

BRIEF HISTORY OF THE PORT OF TACOMA

Tacoma's shipping [beginning in 1853] took place along Ruston Way
and along the mouth of the Thea Foss Waterway near the downtown
which opens into Commencement Bay and is connected with the larger Puget Sound
Tacoma shipping revolved around lumber carried to San Francisco for sale
Northern Pacific Railroad established its western terminus in Tacoma
along the shore of Commencement Bay [1873]
where fifty ships could tie-off in the deep water of the Thea Foss Waterway
miles of tideland waterfront were available for expansion of the port facilities
Tacoma's Eleventh Street Bridge (or City Waterway Bridge) opened [1913]
this 1,748-foot steel truss vertical lift drawbridge crossed the Thea Foss Waterway
and linked the city with its slowly-developing new waterfront
Pierce County citizens voted [November 5, 1918] to develop a new Port of Tacoma
located on 240 acres of undeveloped tidelands across the Thea Foss Waterway from the city
Pierce County voters approved both a master plan for the port and a \$2.5 million bond issue
to fund land purchases and construction [May 1919]
plans for Pier 1, an 800-foot-long, 160-foot-wide pier supported by creosoted pilings
were ready by the end of the year
Pier 2 was under construction when negotiations with the Milwaukee Road
for a second waterfront railroad connection were completed

⁸⁸⁸ David Wilma, *Washington State History Museum opens in Tacoma on August 10, 1996*, Essay 7892, HistoryLink.org, August 10, 2006.

new Port of Tacoma was ready to officially enter the commercial shipping business [1920]⁸⁸⁹
first ship to be served by the port's new facilities was the *Edmore* [1921]
Expansion of the Port of Tacoma facilities began with development of its open land [1953]
this area became known as the Port Industrial Development District
\$1.24 million Industrial Waterway Drawbridge opened [1953]
to provided northeast Tacoma with a link to downtown
it also provided a 150-foot-wide opening for vessels to pass through
(later the drawbridge was re-named in honor of former Port Commissioner Archie Blair)
Tacoma Port Commission hired a major engineering firm to prepare a detailed
comprehensive development plan for the Port Industrial Development District [1955]
that included extension and widening of the Hylebos Waterway
and the extension of the Blair Waterway
(also named after Port Commissioner Archie Blair)
Tacoma's Eleventh Street Bridge (or City Waterway Bridge) was rebuilt [1957]

PORT OF TACOMA EXPANDS ITS FACILITIES

Tacoma's Port Industrial Development District was ideal for newly developed container shipping
deep waterways allowed for ocean-going ships
while open land allowed for containers to be transferred to trucks for overland shipping
Hylebos Waterway was extended more than a mile [1960s]
dredge material was used to create more than 1,600 acres of land for industrial development
Puyallup Tribe negotiated with various governmental bodies concerning its traditional lands
located around the tideflats and Commencement Bay [1980]
Blair drawbridge over the Blair Waterway provided serious problems for the Port of Tacoma
over the years cargo ships had become much larger
increased traffic through the narrow passage under the bridge led to all too frequent collisions
(from [1976] to [1988] eight accidents were recorded -- in the last incident a freighter
attempted to pass to under in high winds and collided with the bridge [1988]⁸⁹⁰)
Tacoma tideflats now had a great deal of room for expansion
Port of Tacoma officials and state transportation officials began holding public meetings
to discuss the changes along Blair Waterway -- September 1995
demolition of the bridge was seen as a logical way to remove the impediment to progress
residents of northeast Tacoma objected to the Blair Bridge being torn down
before an alternate route was in place as the span was essential for emergency vehicles
to arrive at hospitals in a timely manner
port commissioners themselves were split on the issue
eventually, it was agreed to delay the demolition of the Blair Bridge
until the new route that looped around the tideflats was in place

WASHINGTON VOTERS MAKE SELECTED CHANGES IN THEIR GOVERNMENT

⁸⁸⁹ Priscilla Long, *Tacoma's Blair Bridge is closed and demolition begins on January 23, 1997*, Essay 8638, HistoryLink.org, June 7, 2008.

⁸⁹⁰ Priscilla Long, *Tacoma's Blair Bridge is closed and demolition begins on January 23, 1997*, Essay 8638, HistoryLink.org, June 7, 2008.

Washington voters supported Democrat Bill Clinton in his bid for reelection against Republican challenger Bob Dole -- November 5, 1996

King County Executive Democrat Gary Locke became the first Asian American in the nation to win the governor's office

(Lock's term began sixteen years of consecutive Democrats in the governor's office the longest one-party control in the state's history)

Washington's Congressional delegation remained in Republican hands as did the Congress after the [1994] "Republican Revolution"

only one Washington congressional seat changed hands as Democrat Adam Smith defeated Republican Randy Tate in the Pierce County 9th Congressional District

all other incumbents won reelection

Legislative races saw Republicans pick up two seats and the majority in the State Senate with a 26-23 edge

Republicans lost six seats in the State House of Representatives but maintained their majority with fifty-six seats to forty-six for the Democrats

Only one state ballot issue was passed by the voters

Initiative 655 made it a gross misdemeanor to use bait or dogs to hunt bears, cougars, bobcats or lynx

I-655 passed by a vote of 1,387,577 For and 815,385 Against

other ballot measures to implement school vouchers, charter schools, slot machines on tribal lands and ballot notices of candidates who did not support term limits all failed

SOUND TRANSIT IS APPROVED BY KING, PIERCE AND SNOHOMISH COUNTY VOTERS

In a second effort to begin a regional transportation system (after the failure of the [1995] effort) King, Pierce and Snohomish county voters passed tax increases of \$3.9 billion what had been a failed dream since [1958] had finally received voter approval

First Sound Transit "Sounder" commuter train connected Seattle and Tacoma [September 18, 2000] almost ninety-eight years to the day after electric interurban cars had first linked the two cities

Sounder runs were to be extended north to Everett and south to DuPont

virtually retracing the region's original interurban rail system operating six decades earlier

Sound Transit's three county transportation plans feature:

- "Sounder" commuter North Line linking Everett, Mukilteo, Edmonds and Seattle using standard gauge railroad track already in place:
- "Sounder" commuter South Line links Seattle, Tukwila, Kent, Auburn, Sumner, Puyallup, Tacoma Dome, South Tacoma and Lakewood using standard gauge railroad track already in place:
- "Link Line 1" commuter trains using light rail track connects University of Washington with stops through Seattle to SeaTac Airport and Angle Lake;
- "Line T" (formerly the Tacoma Link light rail) connects stops within the city;
- expanded HOV (High Occupancy Vehicle) lanes are added to Interstate-5 and Interstate-405;
- Express Bus service connects major transit stations in the three counties

Future Sound Transit plans call for:

- Sounder South Line stations in Tillicum and DuPont (serving Joint Base Lewis-McChord) ;

- Link Line 1 would extend from Angle Lake to Federal Way, Fife and Tacoma with -future stops at Seattle’s Ballard, South Lake Union and Lower Queen Anne;
- Link Line 2 is planned to serve Mercer Island, Bellevue, Overlake and Redmond;
- Link Lines 1 and 2 would serve Northgate, Shoreline, Mountlake Terrace and Lynwood;
- Link Line 3 connects West Seattle with downtown and Lynwood via Paine Field to Everett;
- Link Line 4 connects Bellevue, Issaquah and Kirkland to downtown Seattle;
- Link Line T is eventually to connect Tacoma Community College with downtown Tacoma

CONGRESS PASSES A LAW TO PROTECT NATIVE AMERICAN ARTIFACTS⁸⁹¹

Congress passed the Native American Graves Protection and Repatriation Act -- November 16, 1996
 this law addressed the rights of descendants, Indian tribes and Native Hawaiian organizations
 to human remains, funerary objects, sacred objects and objects of cultural patrimony
 it required museums and archives to generate an inventory
 of the traditional Native American items they held

This act caused a dispute over the nature of a 9,000-year-old skeleton known as Kennewick Man
 that had been found along the Columbia River [July 28, 1996]

(Secretary of the Interior Bruce Babbitt decided [September 25, 2000]

that the remains of Kennewick Man are “culturally affiliated” with Native Americans
 he ordered them turned over to five tribes in eastern Washington

a Federal magistrate judge in Portland rejected the Interior Department’s findings

he ordered that scientists be permitted to examine the remains [August 30, 2002]

a panel of judges for the Ninth U.S. Circuit Court of Appeals [February 4, 2004]

upheld the Portland judge’s decision, ending the legal battle, but not the controversy)

SEATTLE SCHOOL DISTRICT ENDS MANDATORY BUSING

(U.S. Supreme Court had ruled in *Brown v. Board of Education* [1954] that school districts
 might have to send children outside their neighborhoods to desegregate schools
 even if there was no intention to discriminate in housing

Seattle School Board voluntarily adopted a busing plan to avoid litigation [September 1968]

Seattle became the largest U.S. city to voluntarily desegregate)

Seattle School Board voted unanimously to end mandatory busing in elementary schools

for the purpose of racial desegregation -- November 20, 1996⁸⁹²

end of forced busing was seen by the school board as a way to improve neighborhood identity
 and to increase parental involvement and “customer satisfaction”

board members also hoped to stem the flow of white families leaving the district and the city
 and, they believed, the change would also provide a significant financial saving

(Two years later the board dismantled the last remnants of the “Seattle Plan,” [November 4, 1998]

this ended race-based busing of students in middle and high schools [1999-2000] school year)

STAMPEDE PASS RAILROAD LINE OVER THE CASCADE MOUNTAINS REOPENS

⁸⁹¹ David Wilma, *Congress passes Native American Graves Protection and Repatriation Act on November 16, 1990*, Essay 5603, HistoryLink.org, November 6, 2003.

⁸⁹² David Wilma, *Seattle School Board votes to end mandatory busing for desegregation in elementary schools on November 20, 1996*, Essay 3127, HistoryLink.org, March 22, 2001.

(Northern Pacific Railroad's Stampede Pass first connected Auburn to Cle Elum [1888]
Burlington Northern Railroad [successor to the Northern Pacific] ended service
over the seventy-eight mile line connecting Auburn with Cle Elum and Eastern Washington
to save money [1983] -- but the railroad did not abandon the right of way
Burlington Northern sold 350 miles of Eastern Washington trackage
to the Washington Central Railroad but since the line was not in use
efforts were made to build a hiking trail along the route
Tacoma opposed making the line into a hiking trail because it crossed the city's watershed
Washington State Legislature approved \$5.2 million to buy the tunnel and tracks
but the Burlington Northern declined to sell [1991])
Increases in traffic through the Ports of Seattle and Tacoma demanded more trains
than the lines over Stevens Pass and along the Columbia River could handle
Seattle's and Tacoma's increased importance in time-sensitive trans-Pacific shipping
and the increased use of containerized freight made reopening the Stevens Pass line feasible
Burlington Northern Santa Fe (successor to the Burlington Northern)
merged with the Washington Central Railroad and made improvements to the Stevens Pass route
old tunnel was refurbished with greater height and new snow sheds were built
improved communications facilities were added along the route⁸⁹³
Stevens Pass handled up to twenty-five trains a day
Auburn and citizen groups protested the reopening of the Stevens Pass line
because it cut through Auburn with grade-level crossings forcing traffic to stop to wait
creating delays for motorists and problems for emergency vehicles
it was anticipated some motorists would have to wait as long as thirty-five minutes
for long trains to pass
in addition, the railroad proposed to reopen an intermodal yard in Auburn where containers
would be transferred to trucks adding up to 3,000 truck trips a day in Auburn
by federal law, the railroad was required to pay no more than five percent
of costs for road improvements to mitigate traffic problems
and the railroad did not have to comply with local environmental ordinances
Auburn, Kent, and Yakima sued the railroad citing, among other things, that rail traffic
would impair the city's ability to comply with air pollution regulations
(U.S. Supreme Court [1999] refused to hear the matter, leaving the cities
with a lower court decision that cities could not exercise authority over the interstate carrier)
Burlington Northern Santa Fe Railroad resumed regular train service across Stampede Pass
using the refurbished Steven Pass tunnel and the seventy-eight mile route connecting
Auburn with Cle Elum and Eastern Washington⁸⁹⁴ -- December 5, 1996

BOEING COMPANY ACQUIRES ROCKWELL INTERNATIONAL CORPORATION

Boeing Company acquired Rockwell's Aerospace and Defense businesses -- December 7, 1996
Rockwell provided expertise in space transportation, launch systems, rocket engines,

⁸⁹³ David Wilma, *Burlington Northern Santa Fe Railroad reopens Stampede Pass line on December 5, 1996*, Essay 7364, HistoryLink.org, July 29, 2005.

⁸⁹⁴ David Wilma, *Burlington Northern Santa Fe Railroad reopens Stampede Pass line on December 5, 1996*, Essay 7364, HistoryLink.org, July 29, 2005.

power systems, satellites, missiles, missile defense
Rockwell was renamed Boeing North American, Inc.
this transaction was valued at about \$3.1 billion
this move created one of the strongest aerospace and defense operations in the world
with a combined revenues of \$8.7 billion [1995]
Boeing North American, Inc. operated as a subsidiary of the Boeing Company
responsible to Boeing Defense and Space Group which was headquartered in Kent
Boeing Defense and Space Group has major operations in Alabama, California, Florida,
Kansas, Pennsylvania, Tennessee and Texas
Boeing North American had 21,000 employees, -- 13,000 of them in Southern California
Boeing North American headquartered in Seal Beach, California maintained its operations
throughout Southern California as well as Alabama, Florida, Georgia, Iowa, Louisiana,
Mississippi, Ohio, Oklahoma, Texas and Australia
Boeing Company, along with its subsidiary Boeing North American, Inc.,
grew to 145,000 employees involved in commercial airliner design and production
along with aerospace and defense programs

STARBUCKS COFFEE PRACTICES GOOD STEWARDSHIP

Howard Schultz insisted Starbucks adopt an environmental mission statement
this pledge committed Starbucks to buying only coffee that has been grown organically
Starbucks also takes an interest in the farming communities that harvest coffee beans
as the company has built schools, health clinics and safe coffee processing facilities
Howard Schultz, President of Starbucks was once again the recipient
of the International Humanitarian Award for CARE for his vision and leadership
in developing an innovative partnership between Starbucks and CARE
to support people in coffee origin countries -- December 1996
Howard Schultz has led the company through many accomplishments
he laid the groundwork for globalization while fulfilling his long-term commitment
to give back to his employees/partners and the communities in which they work
he has received many other awards for his effort to improve the world:

- Business Enterprise Trust Award for courage, integrity and social vision in business;
- International Humanitarian Award for CARE for his vision and leadership in developing
an innovative partnership between Starbucks and CARE to support people
in coffee-origin countries;
- Jerusalem Fund of Aish HaTorah for individuals making significant contributions
to improving the lives of people around the world;
- National Leadership Award from AIDS Action
for philanthropic and educational efforts to battle AIDS

FIRST WORLD TRADE ORGANIZATION (WTO) CONFERENCE IS HELD

First WTO Ministerial Conference took place in the Republic of Singapore -- December 9-13, 1996
When compared to the General Agreement on Tariffs and Trade (GATT) (established in [1948]),
WTO made two key changes:

- GATT had focused largely on trade in manufactured goods

but WTO was given additional authority to address other economic sectors
such as services, intellectual property and agriculture;
•unlike GATT, WTO was provided the legal authority to require changes
in national laws and regulations deemed by WTO to violate trade agreements

MANAGEMENT OF THE SEATTLE MARINERS WITHDRAW FROM THE STADIUM PROJECT

Mariners' owners announced they would withdraw from the stadium project -- December 14, 1996
Washington's U.S. Senator Slade Gorton had been a key figure in originally landing the team
and in finding buyers willing to keep them in Seattle -- he now jumped into the fray

BOEING COMPANY ANNOUNCES IT WILL BUY McDONNELL DOUGLAS CORPORATION

Boeing was predominantly a commercial aircraft builder
Boeing won roughly sixty percent of all new commercial aircraft orders -- 1996
Airbus Industrie, the European consortium that sold its first jet [1974],
had grown to become a formidable competitor behind Boeing
it won about thirty-five percent and the new airplane orders
leaving McDonnell Douglas with about five percent of the new orders
bulk of McDonnell Douglas's business was in the military field
Boeing corporate leaders were concerned with the severe cyclical swings
that affected commercial airplane manufacturing business which was currently on an up-swing
but the future was uncertain
Boeing hoped to better compete in military contracts
McDonnell Douglas was a major American aerospace manufacturer and defense contractor
but defense spending was drastically shrinking
in a surprise announcement Boeing said it would purchase McDonald Douglas Corporation
for \$13.3 billion -- December 16, 1996
this announcement signaled that aircraft manufacturing
would increasingly be a competition among nations

SEATTLE MARINERS REACH AN AGREEMENT TO BUILD A STADIUM

Senator Gorton and Seattle Mayor Norm Rice pressed for a resolution of the construction issues
terms of a twenty-year lease were settled -- December 23, 1996
Mariners agreed to delay the stadium opening from [April 1999] to [July 1999]
and to pay for any cost overruns
county council and the Public Facilities District (PFD) agreed to all other team demands
two members of the PFD resigned in protest to the agreement
that they thought favored the team's owners

WASHINGTON'S LEGISLATURE GREETES ITS FIRST LATINA REPRESENTATIVE⁸⁹⁵

Democrat Phyllis Gutierrez Kenney was appointed to the Washington State House of Representatives
from the Forty-Sixth Legislative District comprised of Greenwood, Northgate, Lake City

⁸⁹⁵ Kate Kershner, Phyllis Gutierrez Kenney is appointed to the Washington State House of Representatives on January 5, 1997, Essay 9878, HistoryLink.org, August 2, 2011.

and Laurelhurst in King County -- January 5, 1997
she brought a strong record of activity supporting education issues and migrant rights with her
Born to migrant farm workers from Mexico, Kenney grew up in Wapato, Washington
she worked in the fields with her family from the age of five
after moving to the Tri-Cities [1955], Kenney helped establish the Farm Worker Health Clinics
and the Educational Institute for Rural Families
State Representative Phyllis Kenney
was elected to the State House of Representatives in her own right [November 1998]

EVERETT BECOMES HOMEPORT FOR THE USS *ABRAHAM LINCOLN*

To complete the complement of ships at Naval Station Everett,
Nimitz-class super aircraft carrier USS *Abraham Lincoln* (CVN-72) made a change of homeport
from Puget Sound Naval Shipyard at Bremerton to Everett -- January 8, 1997
USS *Fife* (DD-991) and USS *Rodney M. Davis* (FFG-60)
arrived in Everett as part of the carrier fleet
There are about 6,000 Sailors and Civil Service personnel assigned to Naval Station Everett
Naval Station Everett is home to one nuclear-powered aircraft carrier, two destroyers,
three frigates and a Coast Guard buoy tender

TACOMA OPENS A NEW CABLE-STAY BRIDGE ON STATE ROUTE 509⁸⁹⁶

Route 509 was built so the Port of Tacoma could develop Blair Waterway in the middle of the port
Blair Waterway drawbridge [built in 1953] was old and too-narrow to carry the necessary traffic
and by dredging the waterway which ran parallel to Thea Foss Waterway
expansion of Blair Waterway and closing of the bridge enabled the Port of Tacoma
to undertake major improvements and expand the port facilities
Route 509 was constructed to loop around the Tacoma tideflats
Tacoma's Thea Foss Waterway became the location of a new \$165.3 million cable stay bridge
which opened -- January 22, 1997
Tacoma's new bridge which linked Interstate 5 to downtown Tacoma
sported twin 180-foot cable stay towers
cable stay bridges differ from suspension bridges
cable stay bridges have cables running from a tower at an acute angle to the bridge deck
suspension bridges feature vertical cables running from a horizontal main cable
Support from Congressman Norm Dicks assured the unique design would be adopted
this bridge was one of only thirteen such bridges in the nation
Tacoma offered to pay for any additional costs of the new bridge
but the project came in under budget

CONSTRUCTION OF THE NEW SEATTLE MARINERS' STADIUM BEGINS⁸⁹⁷

Ceremony to mark the beginning of construction was held -- March 8, 1997

⁸⁹⁶ David Wilma, *Cable-stayed bridge over Tacoma's Thea Foss Waterway opens on January 22, 1997*, Essay 5150, HistoryLink.org, January 30, 2003.

⁸⁹⁷ Glenn Drosendahl, *Safeco Field, the Seattle Mariners' long-sought stadium, opens on July 15, 1999*, Essay 9565, HistoryLink.org, January 30, 2003.

thousands of fans brought their own digging tools to participate in the groundbreaking
at the 19.5 acres site south of the Royal Brougham Way between 1st and 4th Avenues South
Construction schedule was fast for any stadium -- let alone one with a movable roof
making on-time completion more difficult were more than 10,000 change orders
most of them made by the Mariners
by the time the ballpark opened, mistakes, change orders and cost overruns
added more than \$90 million to the tab
final total of \$517.6 million was a record for a U.S. stadium at the time
as was the shortness of its twenty-seven-month construction schedule
an eventual \$380 million was paid with taxes in King County on food and drinks
sold at restaurants, bars and taverns, on car and truck rentals
and on tickets sold at the new stadium
team's owners paid an initial \$45 million plus the cost overruns
they received \$40 million from a Seattle-based insurance company
to name the stadium "Safeco Field"

TACOMA BUILDS CLICK! CABLE NETWORK⁸⁹⁸

When telecommunications was deregulated, Tacoma City Light studied ways to direct its assets
City Light used high-speed data lines to manage its power generation and distribution systems
installing a new fiber-optic system would cost \$15 million
for another \$30 million City Light
could also provide commercial telecommunications services
improvements could be paid for in part by offering residents cable television
Tacoma City Light proposed a \$65-million plan
after hearings and neighborhood meetings the Tacoma City Council approved the proposal
to develop Click! Network for customers in Tacoma -- April 8, 1997
Tacoma was the largest city to build and run its own cable system
this move placed Tacoma in competition with privately owned cable companies
(after costs soared to \$89 million the system was launched [July 1998]
600 miles of cable had been installed
11,000 Tacoma residents subscribed to Click! Network cable television [end of 1999]
downtown businesses and residents also used the high-speed data services
Click! Network was credited with helping bring new businesses to Tacoma)

TACOMA'S ELEVENTH STREET BRIDGE BECOMES THE MURRAY MORGAN BRIDGE

Washington State Transportation Commission changed the name of Tacoma's Eleventh Street Bridge
(also known as the City Waterway Bridge) to the Murray Morgan Bridge -- April 16, 1997
to honor the local historian
Washington State Transportation Commission wanted to tear the bridge down
but City of Tacoma convinced the state to transfer ownership of the historic bridge to the city
(Tacoma developed a plan to rehabilitate the bridge)

⁸⁹⁸ David Wilma, *Tacoma City Council approves Click! Network on April 8, 1997*, Essay 5149, HistoryLink.org, January 30, 2003.

but the process remained largely unfunded)

PORT OF TACOMA'S EXPANSION PROJECT IS SUCCESSFUL

Port of Tacoma signed a thirty-year lease with Hyundai Merchant Marine
for a new \$100 million, sixty-acre terminal on the upper Blair Waterway -- April 1997
(this terminal opened [May 1999])
(Port of Tacoma and Evergreen America signed an agreement
involving an enormous expansion of Evergreen
along with a move from the mouth of Blair Waterway to its head [January 2003])⁸⁹⁹

STATE ROUTE 520 BRIDGE ACROSS LAKE WASHINGTON IS IN NEED OF REPLACEMENT

Governor Albert D. Rosellini Bridge (or the Evergreen Point Bridge) was originally built in [1940]
Numerous studies commissioned by the state legislature attempted to discover
how to provide for the vastly increased demand for cross-lake transportation
in addition to expanding the bridge, tunnel crossings north and south of the bridge
were investigated by traffic engineers

After years of studies the current bridge was found to be inadequate
and the problem remained unresolved:

- four lane capacity could not carry the necessary vehicle traffic;
- large number of high-strength cables anchored the bridge
but they could prove to be inadequate during storms
bridge had to be closed in high winds and was unsafe during an earthquake;
- weight of various reinforcements over the years caused the bridge rides
about one foot lower in the water than it did originally;
- additional cables were added and much of the bridge was replaced using lighter materials
but the danger remains unacceptable to the State Department of Transportation

Governor Albert D. Rosellini Bridge was deemed to be beyond repair -- 1997

WASHINGTON STATE IMPLEMENTS NEW STUDENT LEARNING STANDARDS

Public school students had long been individually assessed to determine their educational progress
Washington had used two tests to measure student competency:

- Measurement of Student Progress* (MSP) was used in grades 3-8,
- High School Proficiency Exam* (HSPE) was used in high school

these were replaced by the Washington Assessment of Student Learning (WASL) examination

WASL examinations were to compare students to an established standard

rather than against the performance of their peers

subjects to be tested periodically throughout the students K-12 schooling

included Reading, Writing, Listening, Math, Science, Social Studies, Arts, Health and Fitness

these tests were to be phased in over time

not all of these subjects would be high school graduation requirements,

but they were intended to help measure school performance (rather than student performance)

⁸⁹⁹ Priscilla Long, *Tacoma's Blair Bridge is closed and demolition begins on January 23, 1997*, Essay 8638, HistoryLink.org, June 7, 2008.

WASL examinations were first administered during the 1996-1997 school year
fourth grade students were assessed in reading, writing and mathematics
in addition to providing the correct answer to objective math questions
pupils were required to provide logical explanations of their thinking processes
also a section of the test assessed the listening skills of the students -- spring 1997

HOWARD SCHULTZ CREATES THE STARBUCKS FOUNDATION

Schultz created The Starbucks Foundation to generate hope and opportunity
in communities where the company does business -- spring 1997
Starbucks sponsored literacy programs, Earth Day clean-ups and regional AIDS walks
Starbucks Foundation was initially funded by Schultz's profits
from his book: *Pour Your Heart Into It, How Starbucks Built a Company One Cup at a Time*
Starbucks Foundation currently focuses on raising awareness for literacy causes
as it provides grants to organizations throughout North America that promote literacy

CRAIG McCAW SAVES NEXTEL COMMUNICATIONS

Nextel was burdened by debt and continually lost hundreds of millions of dollars a year
it was also burdened by the poor quality of its Motorola two-way radio equipment
Nextel was searching for billions of dollars to build service in the cities where it had licenses
In yet another breath-taking venture, Craig McCaw decided to acquire control of Nextel
unlike other cellular phone systems, Nextel grew out of the radio dispatch sector
so it could easily tie many users into a single conversation
McCaw relied in part on a commitment from Motorola to improve the equipment
if he became involved
Nextel Communications was purchased by Craig McCaw -- 1997
since that takeover the company became a leading provider of wireless communications
which served thousands of communities
Nextel's customer base more than doubled under McCaw's leadership
(it currently serves ninety-six of the top 100 U.S. markets)
Nextel Communications branched out into foreign markets
wireless operations and investments have developed in Canada, Mexico, Argentina, Brazil,
the Philippines, Peru, Japan, Shanghai and China
since Craig McCaw had taken over Nextel the company's capital increased by \$36 billion
its stock was up 600 percent
Microsoft decided to invest \$600 million to develop Nextel Online, an Internet service
to provide Nextel business customers with telecommunication and Internet service
throughout the United States and Europe
Craig McCaw and his fellow investors saw a gain in their investment of \$3.4 billion

MICROSOFT'S WINDOWS 95 AND OTHER PROGRAMS COME UNDER CIBER ATTACK

Several Microsoft operating system programs came up attack -- June 7, 1997
when what became known as WinNuke was launched
this malicious computer virus caused the target computer to lock up and crash
while the data on the computer's hard drive was not damaged or changed

any unsaved data was lost
Several variations of WinNuke soon appeared forcing Microsoft to release a security patch
(eventually, a New Zealand company, SemiSoft Solutions, created a small program
that blocked WinNuke without having to install the official patch

OWNER OF THE SEATTLE SEAHAWKS THREATENS TO SELL THE FRANCHISE⁹⁰⁰

Seahawks' owner California businessman Ken Behring
threatened to sell or move the Seahawks [1996]

Growing up in the Northwest, Microsoft co-founder Paul Allen's passion for football
was kindled attending University of Washington football games with his father
he later developed a fondness for the Seattle Seahawks, his hometown NFL team
Paul Allen, who owned the Portland Trailblazers basketball team,
pledged to acquire the team if a new stadium could be built
to replace the inadequate Kingdome

Local government officials put a stadium funding plan into place

Governor Gary Locke and the State Legislature crafted a proposal for a Public Stadium Authority
to fund a new stadium through various special taxes chiefly levied in King County
Metropolitan King County Council voted 9-3 to approve a new stadium for the Seahawks
this commitment convinced Allen to complete his purchase of the team for \$194 million
from owner Ken Behring of California

Paul Allen also guaranteed to cover any construction cost overruns
Allen formed Football Northwest to acquire and run the football team
under the direction of former Seattle Supersonics and Portland Trailblazers
executive Bob Whitsitt

SPECIAL ELECTION IS HELD TO FUND A NEW SEAHAWKS STADIUM⁹⁰¹

Referendum-48 election financed by Paul Allen was voted on statewide -- June 17, 1997
although only seven counties voted in favor, the plan narrowly passed with a 50.8 favorable vote
strong support from Seattle and its suburbs proved to be just enough for a \$300 million
funding package for a new Seahawks Stadium to replace the Kingdome
Paul Allen also committed \$100 million of his own funds to the new stadium
First & Goal was formed by Paul Allen after voters in Washington State approved the proposal
to build a new football stadium and exhibition center
First & Goal served as the developer and operator of Seahawk Stadium & Event Center
it was the private partner in the development
along with the public partner, the Public Stadium Authority

PAUL G. ALLEN PURCHASES THE SEATTLE SEAHAWKS

Paul Allen saved professional football in Seattle when the purchase was completed -- June 30, 1997
along with the purchase came a new multi-functional stadium and exhibition hall

⁹⁰⁰ Walt Crowley, *Washington voters approve funding for new Seahawks Stadium on June 17, 1997*, Essay 3582, HistoryLink.org, September 22, 2001.

⁹⁰¹ Walt Crowley, *Washington voters approve funding for new Seahawks Stadium on June 17, 1997*, Essay 3582, HistoryLink.org, September 22, 2001.

Paul Allen was closely involved in the stadium design process
he emphasized the importance of an open-air venue with an intimate atmosphere
that resulted in a modern facility with views of the skyline of downtown Seattle
Seahawk Stadium can seat 67,000 people
crowds at the stadium are notoriously loud during Seahawks games
this noise has significantly contributed to the team's home field advantage
Seahawk Stadium opened to fans -- noon July 19, 2002
hundreds waited in line for as long as two hours to get a first tour of the facility
Seahawk Stadium serves as the home of the Seattle Seahawks of the National Football League
and Seattle Sounders FC of Major League Soccer
in addition to a playing field, the complex also includes the Event Center with the WaMu Theater,
a parking garage and a public plaza
this venue also hosts concerts, trade shows and consumer shows along with sporting events
(Former Seahawks Stadium was also designed for soccer
Seattle Sounders [founded in 1994] also played in the stadium [beginning in 2003]
as a member of the United Soccer Leagues [USL]
name of the stadium was changed from Seahawks Stadium to Qwest Field [June 23, 2004]
when telecommunications carrier Qwest acquired the naming rights
Seattle Sounders FC became a Major League Soccer [MLS] expansion team [2009]
Qwest Field hosted the [2010] tournament final for the U.S. Open Cup
won by the Seattle Sounders FC
name was changed again [June 2011] when Qwest was acquired by CenturyLink
CenturyLink Field hosted the [2011] tournament final for the U.S. Open Cup
again won by the Seattle Sounders FC
new attendance records for MLS were set in both [2010] and [2011])

ISSUES RAISED BY THE NEW STUDENT STANDARDS ARE ADDRESSED

Members of the Commission on Student Learning (CSL) created by the legislature [1993]
had written the "Essential Academic Learning Requirements" (EALRs)
CSL members convened a task force -- July 1997
commission members were to address two concerns related to accountability:

- develop an assistance program for schools and school districts
not meeting the new standards;
- develop an awards program to provide incentives to educators to help students
achieve the new assessment goals

BOEING MERGES WITH McDONNELL DOUGLAS⁹⁰²

In a \$13 billion stock-swap, The Boeing Company Boeing merged with McDonnell Douglas
to create the world's largest aerospace enterprise with 220,000 employees -- August 1, 1997
with this merger Boeing retained its position as the number one builder of commercial aircraft
and jumped to the number one position in defense contracts as well

⁹⁰² Walt Crowley, *Boeing merges with McDonnell Douglas on August 1, 1997*, Essay 3121, HistoryKLink.org, March 21, 2001.

Boeing Company would have more than 220,000 employees

Boeing's Phil Condit was named chairman and CEO for the new corporation

McDonnell Douglas' former president Harry C. Stonecipher

became president and chief operating officer

Boeing and McDonnell Douglas formed a new organization with three primary divisions:

- Boeing Commercial Aviation Group,
- Space & Defense Systems,
- Shared Services Group

Merged company retained the formal name of The Boeing Company with its headquarters in Seattle manufacturing facilities operated in three major locations: St. Louis, Missouri,

Southern California and the Puget Sound area

By adding McDonnell Douglas, Boeing solidified itself

as the number one commercial airline company

and rose to the number one position in defense based on the strength of McDonnell Douglas

IRAQ CREATES ANOTHER CRISIS FOR THE UNITED NATIONS' WEAPONS INSPECTORS

Members of the United Nations UNSCOM weapons inspection team flying over Iraq in a helicopter

were attacked by an Iraqi military officer accompanying them as they took photographs

of unauthorized weapons movements in Iraqi military vehicles -- September 13, 1997

these weapons were scheduled to be inspected

While waiting for access to a site, UNSCOM inspectors witnessed and videotaped Iraqi guards

moving files, burning documents and dumping waste cans into a nearby river -- September 17

SEATTLE MARINERS ONCE AGAIN WIN THE AMERICAN LEAGUE PENNANT⁹⁰³

Seattle Mariners enjoyed a ninety-win season as against seventy-two losses

They met the Baltimore Orioles for the American League Championship -- September 23, 1997

but missed a trip to the World Series when Baltimore won the series three game out of four

CRISES IN IRAQ CONTINUES

UNSCOM (United Nations Special Commission) inspector Dr. Diane Seaman

caught several Iraqi men sneaking out the back door of an inspection site with log books

for the creation of prohibited bacteria and chemicals -- September 25, 1997

Iraq said it would begin shooting down American U-2 surveillance airplanes

used by UNSCOM inspectors -- September 29

THREE JAPANESE SAILORS STRANDED IN WASHINGTON COAST ARE REMEMBERED

Makah tribal members joined a delegation from Japan in commemorating three sailors

who had been shipwrecked near Cape Flattery [January 1834]

there sailors, Iwakichi, 28; Kyukichi, 15, and Otokichi, 14, all from the city of Mihama, Japan

had been found by Makah seal hunters

Mihama sent a delegation to the coast of Washington

⁹⁰³ Dave Wilma, *Seattle Mariners win the American League West pennant on September 23, 1997*, Essay 3421, HistoryLink.org, July 2, 2001.

led by Mayor Koichi Saito -- September 29, 1997

(Saito had visited the Makahs once before when he was presented with five fragments of Japanese-made pottery thought to have come from the sailors' wrecked ship to be displayed in a temporary exhibit in Japan)⁹⁰⁴

this visit by the Japanese delegation was sponsored by descendants of the sailors and Mihama businessmen as a good will mission to provide for cultural exchanges and to commemorate the "three ichis"

At a ceremony held in the Makah Museum, the five fragments of Japanese-made pottery were returned to the Makah people

CRAIG McCAW FOUNDS TELEDESIC

Teledisic was founded to build a commercial constellation of low orbiting satellites for Internet service

McCaw and a leading group of U.S. investors such as Bill Gates, Paul Allen, Boeing and Motorola and international investors provided \$1.2 billion for the company's financial restructuring

Prince Alwaleed Bin Talal agreed to invest \$200 million in Teledesic

Craig McCaw personally took over Teledesic, a subsidiary of McCaw Cellular

Teledesic headquarters was constructed in Bellevue, Washington

this plain looking building located in the back half of a warehouse abutting a railroad line in an industrial section of town does not portray its significance

(However, the proposed communication system was scaled back

from an 840-satellite system to a 288-satellite network

it was later further scaled back in complexity and number of satellites

as the projected market demand continued to decrease

Teledesic officially suspended its satellite construction work [2002])

SCIENTIFIC RESEARCH TAKE A MAJOR LEAP FORWARD IN RICHLAND⁹⁰⁵

Red-brick Environmental Molecular Sciences Laboratory is located

at the north end of George Washington Way in Richland

construction of the 200,000-square-foot building cost \$230 million

there is space for about 270 staff members and eighty individual laboratories

Environmental Molecular Sciences Laboratory opened -- October 1997

scientists have a huge array of scientific equipment available for their use

including the world's most powerful nuclear magnetic resonance spectrometer

and the most powerful parallel computer ever built by IBM

that renders computer modeling and records results of laboratory research

Environmental Molecular Sciences Laboratory's resources are available to private researchers

as long as any results are published in the public domain

researchers who publish privately for profit pay fees to reimburse the lab

since it is publicly funded through taxes

⁹⁰⁴ Cassandra Tate, *Makah tribal members join delegation from Japan in commemorating three shipwrecked Japanese sailors on September 29, 1997*, Essay 9074, HistoryLink.org, July 16, 2009.

⁹⁰⁵ Elizabeth Gibson, *Wiley Environmental Molecular Sciences Laboratory is dedicated in Richland on October 16, 1996*, Essay 5678, HistoryLink.org, April 15, 2004.

Environmental Molecular Sciences Laboratory (EMSL) has had many successes:

- scientists are proud of the cellular observatory
where they study how cells respond to various stimuli;
- EMSL invented several new products, including new devices that detect yellow fever;
- EMSL scientists working with Motorola developed the next generation of semiconductors;
- EMSL scientists have patented more than thirty new scientific instruments;
- resident researchers have received more than 100 prestigious research and development awards

WASHINGTON VOTERS LIMIT PROPERTY TAX INCREASES

Referendum 47 from the state legislature proposed to place a limit on property tax increases at 106% of the previous property tax

R-47 passed by a vote of 1,009,309 For and 579,620 Against -- November 5, 1997

BILL GATES IS THE MOST SUCCESSFUL BUSINESSMAN IN THE WORLD

Bill Gates exerts an enormous influence on how the world processes information

many of Microsoft's stockholders are now millionaires

Gates himself is the richest man in the world

BILL AND MELINDA GATES FOUNDATION IS DEDICATED TO IMPROVING THE WORLD

Bill and Melinda Gates Foundation focused on education as it addressed American illiteracy

one in five students cannot read and grasp the contents of what they have read

Gates Foundation focused a great deal of attention on American education -- 1997

- it undertook an initiative to provide American libraries access to the Internet by providing grants, installing computers and software and providing training and technical support;
- Gates Foundation invested more than \$250 million in grants
to create new small schools, reduce student-to-teacher ratios,
and to divide up large high schools through the "schools-within-a-school" mode;
- Gates Millennium Scholars program, administered by the United Negro College Fund,
was provided \$1.5 billion for scholarships to high achieving minority students;
- NewSchools Venture Fund received \$30 million to help manage more charter schools
which aim to prepare students in historically underserved areas for college and careers;

Universities also received funding from the Bill and Melinda Gates Foundation

which contributed \$20 million to the University Scholars Program

to endow a scholarship program at Melinda Gates' alma mater, Duke University [1998]

full scholarships are provided to about ten students in each undergraduate class

and one member attending each professional school

medicine, business, law, divinity, environment, nursing and public policy

as well as to students in the Graduate School pursuing doctoral degrees in any discipline

graduate and professional school scholars serve as mentors to the undergraduate scholars

who are chosen on the basis of financial need

and potential for interdisciplinary academic interests

this program features seminars to bring these scholars together

for interdisciplinary discussions and an annual spring symposium organized by scholars

Bill and Melinda Gates Foundation provides a series of scholarships to deserving students:

- Gates Cambridge Scholarships donated \$210 million to help outstanding graduate students living outside of the United Kingdom study at the University of Cambridge [2000] approximately 100 new students are funded every year;
- Texas High School Project aimed to increase and improve high school graduation rates in Texas as the foundation committed \$84.6 million to a project which focused its efforts on high-need schools and districts statewide with an emphasis on urban areas and the Texas-Mexico border [2003]
- William H. Gates Public Service Law Program [2003] awards five full scholarships annually to the University of Washington School of Law scholars commit to working in relatively low-paying public service legal positions for at least the first five years following graduation

Bill and Melinda Gates Foundation has also provided support for projects in the Pacific Northwest
Discovery Institute received a pledge of \$9.35 million over ten years [2003]
to study regional transportation issues

Gates Foundation announced a \$122 million initiative
to send hundreds of the District of Columbia's poorest students to college [2007]

Bill and Melinda Gates Foundation joined forces with the Eli and Edythe Broad Foundation
in pledging a joint \$60 million to create Strong American Schools [2008]

a nonprofit project responsible for running an initiative and information campaign
aimed at encouraging presidential contenders to include education in their campaigning

Strong American Schools was to focus on three goals:

- agreeing on American education standards,
- providing effective teachers in every classroom,
- giving students more time and support for learning

Carnegie Mellon University received \$20 million for a new Computer Science building
at the Carnegie Mellon School of Computer Science

it was named the Gates Center for Computer Science when it opened [September 22, 2009]

Cornell University's Faculty of Computing and Information Science

received \$25 million from the Gates Foundation for a new Information Science building
to be named William H. Gates Hall

it will be part of the newly planned Information Campus at Ithaca, New York [2011]

Gates Foundation announced a \$3.5 million initiative to launch a multi-platform service

to deliver professional development videos for teachers over the Internet, public television,
cable and other digital outlets

more than 13,500 teachers and educators have joined the community
to share ideas, lesson plans and teaching methods [2011]

Washington State Achievers program encourages schools to create

cultures of high academic achievement while providing scholarship support
to select college-bound students [2012]

UNITED STATES REACTS TO IRAQ'S NON-COMPLIANCE WITH UN INSPECTIONS

Incidents where Iraq officials threatened UNSCOM (United Nations Special Commission) inspectors,
attempted to hide and destroy documents related to weapons of mass destruction
and dumped cans of nuclear material into a nearby river [1997]

led to the United States Senate passing Resolution 71 urging President Bill Clinton to
**“take all necessary and appropriate actions to respond to the threat posed by
Iraq’s refusal to end its weapons of mass destruction programs”** -- February 1, 1998

STARBUCKS ENTERS A JOINT VENTURE WITH EARVIN “MAGIC” JOHNSON

Starbucks signed an agreement to form a 50/50 joint venture partnership
with basketball star Earvin “Magic” Johnson to develop Starbucks coffee locations
in under-served inner city neighborhoods throughout the United States -- February 1998
Starbucks has opened sixteen stores under this partnership agreement

WORLD TRADE ORGANIZATION (WTO) FACES OPPOSITION⁹⁰⁶

World Trade Organization (WTO) could overrule the laws of individual countries
its dispute resolution system was legally binding on all members nations
one country could challenge another country’s laws or regulations
as being in violation of trade rules
this dispute would be heard by a panel of three designated experts
with an appeal possible to an WTO Appellate Body
if a violation was found to have occurred, the country in violation was required to either:

- implement the WTO decision by changing its regulations,
- pay compensation to the complaining country,
- be subject to retaliatory tariffs on goods, services and products the offender produced

WTO’s dispute settlement process relied on unelected bureaucrats
who served on the expert and appeal panels -- they met behind closed doors
only the disputing parties could participate in the dispute resolution process
but made decisions by WTO could affect many other interests
developing countries complained that the WTO favored multi-national corporations
over the interests of their communities
many leaders in Europe feared that WTO would lead to dismantling their social safety net
and environmental and consumer protections

In one case that was notorious among critics, WTO ruled in favor of several countries
that had challenged the U.S. endangered species regulations restricting imports of shrimp
caught using methods that killed endangered sea turtles

In another case environmentalists and food safety activists in the U.S. and Europe were angered
when a challenge by the U.S. and Canada resulted in a WTO ruling
against a European Union regulation that prevented the importation of beef
from cattle treated with bovine growth hormone

UNITED STATES GOVERNMENT SUES MICROSOFT CORPORATION⁹⁰⁷

Microsoft decided to “bundle” its Internet browser, called *Explorer*,

⁹⁰⁶ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 1, Essay 9183, HistoryLink.org, October 13, 2009.

⁹⁰⁷ Cassandra Tate, *United States sues Microsoft Corporation on May 18, 1998*, Essay 2297, HistoryLink.org, June 1, 2002.

into its Windows operating system that powered ninety percent of the world's personal computers
After a three-year investigation the U.S. Department of Justice and attorneys generals of twenty states
sued Microsoft Corporation for violating the Sherman Antitrust Act -- May 18, 1998

Attorney General Janet Reno charged the company blocked competition
by developing a "chokehold" on the market for Internet software
and illegally used its monopoly power to limit consumer choice
she contended that combining the browser with the operating system
gave Microsoft an unfair advantage over competitors
Microsoft claimed that when it put new functions into the its operating system
it created better products that benefitted consumers and lowered the price

WASHINGTON STATE'S STUDENT ASSESSMENT (WASL) PROGRAM IS EXPANDED

In addition to fourth graders the Washington Assessment of Student Learning (WASL) examination
was given to more students
during the 1997-1998 school year fourth and seventh graders took the WASL examination
during the 1998-1999 school year the high school WASL examination was administered

WORLD TRADE ORGANIZATION (WTO) MEETS IN GENEVA

Second World Trade Organization (WTO) Ministerial Conference was held
in Geneva, Switzerland -- May 18-20, 1998

Members discussed the effectiveness of WTO during its brief history
successes were celebrated

however, concerns also were addressed:

- explosion of the technology revolution and the impact of electronic commerce;
 - development of beneficial scientific advances;
 - compliance with the WTO dispute settlement system;
 - how to achieve the ultimate goal of a rule-based global system of free trade
as the main element of a strategy for global development and security;
- equally important was the task of expanding WTO's 132 nation membership
there were thirty-one applicants for WTO membership accounting for 11% of world trade
these represented important under-developed markets for U.S. goods and services
nearly one-third of U.S. economic growth was based on increased exports to the world

President Bill Clinton called for a new round of trade negotiations to further reduce trade barriers
and expand exports of U.S. services, agricultural goods
and manufactured products -- May 18, 1998

he also called for a WTO trading system that would support environmental protection
and maintain important labor standards

while it was true that each WTO member nation remained free
to set its own levels of environment, health and safety protections,

WTO agreements provided that safety standards must be maintained at a high level
finally, President Clinton invited WTO members to the United States

to attend the Third [1999] WTO Ministerial conference
this was an opportunity for the United States to show leadership in setting the trade agenda
for the next century much as we had done after World War II

WORLD TRADE ORGANIZATION (WTO) DISCUSSIONS LEAD TO PROTESTS

Multilateral Agreement on Investment (MAI) resulted from several WTO discussion groups to develop multilateral rules that would ensure international investments between nations would be governed in a more systematic and uniform way
MAI drew widespread criticism from concerned groups and developing countries who believed that the agreement would make it difficult to regulate foreign investors
Thousands of protestors demonstrated in Geneva against the WTO and its policies
activists successfully campaigned against the Multilateral Agreement on Investment (MAI)
France announced it would not support the agreement -- effectively preventing its adoption

WASHINGTON STATE'S STUDENT ASSESSMENT PROGRAM IS EXPANDED

Washington Assessment of Student Learning (WASL) examination was given to more students during the [1997]-1998 school year fourth and seventh graders took the WASL examination during the 1998-[1999] school year the high school WASL examination was administered

USS *MISSOURI* (BB-63) DEPARTS FROM BREMERTON FOR THE FINAL TIME

U.S.S. *Missouri* (BB-63) played a historic role during World War II both in battle and in peace she served as the location for Japan's formal surrender to the Allied Powers in Tokyo Bay [September 2, 1945]
Missouri was reactivated during the Korean War [October 25, 1952-April 6, 1953] and returned to duty in the Gulf War against President Saddam Hussein's Iraqi troops she provided naval support fire and Tomahawk missile attacks [January 17- March 21, 1991]
After her deployment in the Middle East, USS *Missouri* returned to Bremerton and was stationed at the Inactive Ship Maintenance Facility in the Puget Sound Naval Shipyard where for thirty-six years [1954-1984] and [1992-1998] she received thousands of visitors
USS *Missouri* was decommissioned for the final time [March 31, 1992]
Tugboats carefully guided the "Mighty Mo" away from the Inactive Ship Maintenance Facility at Bremerton's Puget Sound Naval Shipyard -- May 23, 1998
Missouri was towed by the Seattle-based salvage tugboat *Sea Victory* up the Columbia River to Astoria, Oregon for a fresh-water hull cleaning and a last farewell before departing the Pacific coast for the twenty-two day 2,639 mile journey across the Pacific to join the USS *Arizona* (BB-39) as a war memorial and museum [June 22, 1998]

UNITED STATES CONGRESS CONFRONTS THE ISSUES POSED BY IRAQ

In an effort to prevent foreign companies from helping Iran to develop and build new missiles, members of the U.S. House of Representatives passed the Iran Missile Proliferation Sanctions Act (IMPSA) -- June 9, 1998
IMPSA was designed to close loopholes in existing counter-proliferation laws and to impose sanctions on foreign companies that provided missile technology to Iran this measure was particularly aimed at preventing Russia from continuing to provide support to Iran for its ballistic missile programs

AMERICAN VETERANS' MEMORIAL IS DEDICATED IN SEATTLE

Garden of Remembrance, a privately funded memorial outside the Benaroya Hall performing center was underwritten by Patsy Bullitt Collins and the Boeing Company⁹⁰⁸
it was dedicated -- July 4, 1998
this monument, located along the 2nd Avenue side of the building,
lists the names of Washingtonians who died in military service during World War II
and subsequent conflicts (up to the present day)

SPECIAL COMMITMENT CENTER IS MOVED TO McNEIL ISLAND

(Special Commitment Center was created [1990] by the passage of the Sexual Predator Law rather than being released following the end of their prison term,
chronic and violent sex offenders could be civilly [not criminally] committed
after a court had determined they were “mentally abnormal”)
Washington State legislature authorized moving the Special Commitment Center
from the Monroe Corrections Center to McNeil Island⁹⁰⁹ -- 1998
Special Commitment Center, located within the McNeil Island corrections center’s secure perimeter
provided long-term, specialized mental health treatment for sex offenders
it operated under the control and direction of the Department of Social and Health Services

DEATH OF PATRICIA YELLOWROBE BECOMES MURDER

Native American Patricia Yellowrobe, age thirty-eight, disappeared -- August 5, 1998
her body was found in a vacant lot on Des Moines Way South near Highway 99 -- August 5
an autopsy report originally stated she had died of acute intoxication
(however, the Green River Killer later confessed to her death
Patricia Yellowrobe may had been the killer’s last victim)

ONE WASHINGTON SCHOOL DISTRICT EXPERIENCES A STRIKE

Washington Education Affiliate (WEA) in Lake Stevens School District went on strike -- 1998
for thirteen days negotiations on a professional agreement were conducted
before a settlement was reached without court interference

SEATTLE SYMPHONY GETS A NEW HOME⁹¹⁰

Benaroya Hall was made possible in part by a \$15 million gift from the Benaroya family
it is located at 3rd Avenue and Union Street
\$118 million facility was designed by Seattle’s LMN architectural firm
with acoustics designed by Dr. Cyril Harris
Benaroya Hall featured the 2,500-seat Mark Taper main stage
and the 540-seat Illsley Ball Nordstrom recital hall

⁹⁰⁸ David Wilma, *Benaroya Hall opens as new home of Seattle Symphony on September 12, 1998*, Essay 3531, HistoryLink.org, September 5, 2001.

⁹⁰⁹ Daryl C. McClary, *McNeil Island Corrections Center, 1981-present*, Essay 5239, HistoryLink.org, April 24, 2003.

⁹¹⁰ David Wilma, *Benaroya Hall opens as new home of Seattle Symphony on September 12, 1998*, Essay 3531, HistoryLink.org, September 5, 2001.

After the opening ceremony -- September 12, 1998
Benaroya Hall's first performance took place that afternoon
Gerard Schwartz conducted the Seattle Symphony in Mozart's last three symphonies

MAKAH INDIANS GO WHALING FOR THE FIRST TIME IN MORE THAN SEVENTY YEARS⁹¹¹

Makah whaling tradition dated back thousands of years
they hunted several varieties of whale, but concentrated on twenty to thirty-five ton gray whales
these animals made the longest migration of any mammal traveling 5,000 miles
from Alaska's Bering Sea to the coastal lagoons of Baja California
their twice-yearly migrations brought thousands of gray whales
past the Makah hunting grounds off Cape Flattery every [spring] and [fall]
Makahs agreed to the Treaty of Neah Bay [1855] written by Territorial Governor Isaac Stevens
they gave up many thousands of acres of land -- all of their territory except for a small reservation
centered around Neah Bay and Cape Flattery
but the Makah insisted on retaining the rights to whale and fish
both were central to their culture
Commercial whaling nearly wiped out whale populations
but after the gray whale was removed from the Endangered Species List [1994]
Makahs announced they would resume whaling
United States government supported their right to take five whales each year
this decision ignited worldwide controversy
animal rights activists bitterly denounced the Makah
but other groups from the United States government to advocates for indigenous rights
supported the tribe's right to hunt gray whales
First Makah whale hunt in seven decades was cleared to begin -- October 1, 1998
Makah whalers were again free to hunt gray whales from their ancestral lands
around Cape Flattery on the Olympic Peninsula
Makahs planned to hunt in the traditional fashion -- by harpooning whales from a cedar canoe
manned by eight paddlers prepared according to the traditional rituals
only change was the use a powerful .50-caliber rifle to kill the whale instantaneously
after it was harpooned to avoid the prolonged death when only harpoons were used
More than 350 groups from twenty-seven countries opposed the tribe's plan
most opponents conceded that taking only five whales per year
would not threaten the gray whale population but they condemned the precedent it would set
some feared other indigenous peoples with a whaling traditions would try to follow suit
or that U.S. support for the Makah hunt would weaken efforts to end commercial whaling
one of the most vocal critics of the Makah was the Sea Shepherd Conservation Society
which had gained notoriety by using its fleet to attack whaling ships at sea
Sea Shepherd threatened to physically disrupt the Makah hunt
among other organizations opposing the hunt
was the Progressive Animal Welfare Society (PAWS)
and the Humane Society of the United States

⁹¹¹ Kit Oldham, *Makah Whaling*, Essay 5301, HistoryLink.org, February 26, 2003.

however, some of the most prominent environmental and conservation groups including Greenpeace and the Sierra Club both decided not to oppose the Makah whale hunt Protestors vowed to stop the Makah from killing any gray whales reporters hoping to cover the action descended on Neah Bay, the principal town on the reservation however, there was no hunt that fall as the whaling crew continued to prepare and practice

STATE ELECTION LEADS TO TRUMOIL ONCE AGAIN

Washington's Congressional delegation saw the election of two new U.S. Representatives Democrat Jay Inslee defeated incumbent Republican Rick White in the First Congressional District Democrat Brian Baird in the Third Congressional District replaced Congresswoman Linda Smith who resigned her position to run for governor with the shift in two seats from the Republicans to the Democrats the delegation was split six Democrats to three Republicans Composition of the state legislature was changed by local elections -- November 3, 1998 in the State Senate, Democrats picked up four seats to gain a twenty-seven to twenty-two majority in the State House of Representatives Democrats gained seven seats to throw the House into a tie with no majority both political parties had to share power State Representatives were forced once again to elect co-Speakers of the House East Wenatchee State Representative Clyde Ballard remained the Republican leader but he was forced to share the Speakership with Seattle Democrat Frank Chopp who was elected co-Speaker by his party

State voters enacted new laws

Initiative 200 prohibited racial and gender preferences by state and local government I-200 passed with 1,099,410 in favor and 788,930 Against Initiative 688 proposed to increase the state minimum wage from \$4.90 per hour to \$5.70 I-688 passed by a vote of 1,259,470 For to 644,764 Against Initiative 692 proposed the use of medical marijuana in the state I-692 passed by a vote of 1,121,851 For to 780,631 Against Referendum 49 was a proposal from the state legislature to reduce the motor vehicle excise tax when annual license plates were purchased R-49 was passed by the voters 1,056,786 For and 792,783 Against

WASHINGTON PUBLIC POWER SUPPLY SYSTEM (WPPSS) CHANGES ITS NAME

Washington Public Power Supply System (WPPSS) was renamed Energy Northwest -- November 1998 consultants advised the WPPSS board of directors that the old name was **"hurting business opportunities"** (*The Seattle Times*) however, this name change not go seamlessly as WPPSS was forced to settle a \$260,000 lawsuit

filed by another organization that had been using that name already⁹¹²
Energy Northwest membership includes twenty-eight public power utilities
including twenty-three of the State's twenty-four public utility districts
Energy Northwest functions as a municipal corporation -- similar to a town or city
it can issue public bonds to raise the financial capital necessary
to build additional power generating and other public utility facilities
two boards govern its operation -- a board of directors and an executive board
board of directors includes a representative from each member utility
executive board has eleven members:

- five representatives from the board of directors,
- three gubernatorial appointees,
- three public representatives selected by the board of directors

Energy Northwest's solar, hydro, wind and nuclear projects
deliver nearly 1,300 megawatts of electricity to the Northwest power grid

ANACORTES REFINERY IS HIT BY AN EXPLOSION AND FIRE⁹¹³

(Shell Oil Company constructed a refinery on March Point near Anacortes [1953]
Texaco opened a second refinery south of the Shell refinery
originally to supply West Coast markets with Canadian crude oil [1958]
Shell and Texaco created the joint venture called Equilon [1988]
however, regulations prohibited two Shell locations in such close proximity to each other
Tesoro Petroleum bought the original Shell refinery [1998]
former Texaco refinery became known as the Equilon Refinery
it was the largest employer in Anacortes with about 375 employees
and 100 contract workers with an annual payroll of \$27 million
it refined 143,000 barrels of Alaskan North Slope and Canadian crude oil per day
producing gasoline, jet fuel, diesel fuel, propane, petroleum coke and sulfur)
March Point was hit by a powerful Pacific storm with gusts to sixty mph -- November 23, 1998
downed trees hitting power lines caused power outages throughout the region
Equilon Puget Sound Refinery in Anacortes completely lost power for about two hours
which interrupted refining operations
Refinery workers always considered shutdown and restarting operations
to be two of the most dangerous times in a refinery's operation
due to the power outage, the delayed coking unit needed to be restarted
delayed coking unit consisted of two huge pressurized stainless steel drums six stories tall
coking process is a sixteen-hour cycle during which crude oil,
heated to 925 degrees Fahrenheit, is pumped into the steel coking drums
intense heat and pressure "crack" the oil molecules, producing vapors
that are siphoned off the top and piped elsewhere for further processing
remaining material crystallizes into a charcoal-like substance called petroleum coke

⁹¹² David Wilma, *Washington Public Power Supply System (WPPSS)*, Essay 5482, HistoryLink.org, July 10, 2003.

⁹¹³ Daryl C. McClary, *Explosion and fire at the Equilon Puget Sound Refinery in Anacortes kill six refinery workers on November 25, 1998*, Essay 5618, HistoryLink.org, November 20, 2003.

which has other industrial uses
stainless steel coking drum is injected with steam and water during the cooling process
once the drum is cooled, the process is turned over to a specialty contractor
the coking drum is unsealed at the top and bottom and the coke residue is cut
with a high-pressure water drill and removed
coking drum is then resealed and prepared for another cycle

After the electrical storm, Equilon plant managers decided to let the coking drum
cool naturally for thirty-seven hours before opening it
Department of Labor and Industries estimated that 236 days would have been required
for the air temperature to cool the drum enough to remove the material
Equilon plant managers issued a “safe work permit” anyway
that authorized the coking drum to be opened -- November 25, 1998
sensors measured the temperature near the drum wall
but could not measure the heat at the core

Workers, wearing oxygen masks, unbolted and safely removed the top head of the coking drum
bolts holding the bottom head in place were removed
an hydraulic lift began to lower the head
from the bottom of the coking drum -- 1:30 p.m. November 25
workers expected to find a congealed mass of crude oil residue,
but the unit was far hotter than anyone thought -- immediately, a pocket of hot liquid fuel
broke through the crust of cooled residue and poured from the drum
when exposed to oxygen, the superheated oil exploded into flames
engulfing two refinery workers operating the lift
burning oil spewed over the second level of the unit and onto four workers below

Witnesses said they heard an explosion and saw a large plume of black smoke rise from the refinery
this was followed immediately by a ball of fire which rose several stories high
within a few minutes, the refinery’s “wildcat whistle” sounded signaling an emergency
blast from the whistle was felt several blocks from the refinery
electrical power to the neighborhood was knocked out

Anacortes city officials saw a huge cloud of black smoke drifting toward them
worried that the smoke was toxic they rushed to schools and businesses
and advised people to remain inside
Skagit County Department of Emergency Services determined the smoke was not toxic
and the notifications were stopped

While battling the blaze, Puget Sound Refinery firefighters attempted several times
to search for survivors but were driven back by the intense heat
When the fire was finally extinguished and the smoke cleared,
firefighters discovered that six refinery workers had perished in the explosion

Washington State Department of Labor and Industries immediately dispatched three investigators
to inspect what was the worst industrial accident since the Department of Labor and Industries
began enforcing the Washington State Industrial Safety and Health Act (WISHA) [1973]
investigation into the deadly mishap lasted six months before it was concluded
that the accident was caused by a cascading series of mishaps and errors
and could have been prevented

(Enterprises of Houston, the owner of the refinery, approached the Department of Labor and Industries and asked to negotiate a settlement Equilon, agreed to a record \$4.4 million settlement [May 26, 1999]:

- \$1.1 million fine;
- \$1 million donation to the Fallen Worker Scholarship Fund established on behalf of Equilon employees' families;
- \$1 million to establish a Worker Safety and Health Institute at a state institution;
- \$350,000 donation to the City of Anacortes Fire Department to purchase a new fire engine;
- \$350,000 for an independent safety audit of the refinery;
- Equilon also agreed to fix all identified deficiencies at the refinery

in the agreement, the Department of Labor and Industries agreed:

- not to classify the two violations issued to the Equilon Puget Sound Refinery as “willful” the most serious classification which implied negligence
- instead, the violations were designated “unclassified” with no admission of guilt or wrongdoing by the company

(Equilon reached a settlement with the families of the six men killed in the accident [January 19, 2001]
Equilon and their insurers paid \$45 million into a trust fund for the families of the six victims in a written statement to the court, Equilon Enterprises accepted responsibility for the accident)

SEATTLE SUFFERS A TRAGIC BUS ACCIDENT⁹¹⁴

Seattle Metro bus driver Mark McLaughlin, 44, traveling along southbound Route 359 express route, was shot twice by a passenger as the bus was crossing the Aurora Bridge -- November 27, 1998
Metro's bus crossed two lanes of oncoming traffic and crashed through the bridge railing
it plunged down fifty feet before landing first on the roof of an apartment building
and then tumbling to the ground
in addition to the driver, passenger Herman Liebelt, 69, died as a result of the accident
thirty-two passengers were injured
had the bus traveled a few hundred yards further along the bridge
it would have dropped an additional 160 feet into the waters of the ship canal
Silas Garfield Cool, 43, originally of New Jersey, was the shooter
he turned his .38 automatic handgun on himself with deadly effect
no clear motive for the shooting could be determined although there were signs
that Cool had been experiencing emotional problems and had become severely withdrawn

CO-SPEAKERS OF THE STATE HOUSE OF REPRESENTATIVES LEAD THEIR CAUCUSES⁹¹⁵

Both co-Speakers were elected into their leadership positions by voice votes -- January 11, 1999
this was only a formality as both caucuses had already selected their leader
Republican Clyde Ballard and Democrat Frank Chopp were presented the gag two-handed gavel

⁹¹⁴ Patrick McRoberts, *Metro bus plunges off Seattle's Aurora Bridge after driver is shot on November 27, 1998*, Essay 734, HistoryLink.org, December 3, 1998.

⁹¹⁵ Kit Oldham, *Clyde Ballard and Frank Chopp are elected co-Speakers of the state House of Representatives on January 11, 1999*, Essay 9085, HistoryLink.org, July 20, 2009.

previously presented to co-Speakers Republican Duane Berentson and Democrat John Bagnariol Under the rules adopted by Ballard and Chopp, as under their co-Speaker predecessors, control of committees was evenly divided
no bill could come to the floor unless both parties approved
as a result, few controversial measures passed
most legislation enacted in 1999 and [2000] had substantial bipartisan support
including patient rights protections and increased unemployment benefits
passing a state budget became an exception to the cooperation enjoyed by both political parties
(Chopp, whose low-key, inclusive leadership style was praised by Democratic colleagues, managed to garner two Republican votes to pass a budget bill
over the objections of Ballard and most Republicans)

STATE SUPERINTENDENT OF INSTRUCTION BECOME RESPONSIBLE FOR THE WASL
Washington State Office of Superintendent of Public Instruction was given the duty
to further develop the Washington Assessment of Student Learning (WASL) examination
Commission on Student Learning (CSL) members who were originally responsible
for writing “Essential Academic Learning Requirements” (EALRs) was dissolved -- 1999
only the testing programs for third and sixth graders in reading and mathematics
and fourth and seventh graders were in reading, math and science had been addressed

HISTORYLINK.ORG IS LAUNCHED⁹¹⁶

Historians Walt Crowley and Paul Dorpat discussed the idea of creating a new encyclopedia
of Seattle and King County history
to update Clarence Bagley’s three volume *The History of King County* [1929]
Crowley had written ten books on Seattle history
Dorpat had published three volumes of his popular “Now and Then” column in *The Seattle Times*
along with other local history books
it was decided rather than a (very large) book,
an online encyclopedia would better serve the public
Walt Crowley founded History Ink, the non-profit company behind HistoryLink.org [1997]
Patsy Bullitt Collins provided \$20,000 in seed money to launch a demonstration site [1998]
writers and editors along with the website’s technical staff were brought on board [1998]
staff members worked feverishly over the next few months to achieve a “soft launch”[1998]
based on the success of the demonstration site more than more than \$135,000 was raised
HistoryLink.org officially went on line with about 300 articles -- January 17, 1999
there was no other regional encyclopedia like it online
new essays were being added almost daily
(HistoryLink expanded its reach and began documenting the history of the entire state [2003]
HistoryLink.org has become the largest and most comprehensive state encyclopedia in the nation)

⁹¹⁶ Alan Stein, *HistoryLink.org is launched on January 17, 1999*, Essay 10141, HistoryLink.org, July 5, 2012.

FEDERAL GOVERNMENT IDENTIFIES ENDANGERED AND THREATENED SALMON⁹¹⁷

Under the federal Endangered Species Act, the Federal Government was provided the authority to regulate what could and could not be done on public and private land that impacted threatened and endangered species habitats that supported salmon could not be disturbed almost all large-scale construction and real estate development projects could be impacted U.S. Government's listing of "**endangered**" and "**threatened**" salmon came out -- March 16, 1999 Upper Columbia River Spring Chinook Salmon were listed as "**endangered**" listed as "**threatened**" were: Puget Sound Chinook, Lower Columbia River Chinook, Lake Ozette Sockeye, Hood Canal Summer Chum, Lower Columbia Chum, Mid-Columbia Steelhead, Upper Willamette River Chinook and Upper Willamette River Steelhead these listing affected three million residents of Washington and Oregon who lived in drainage areas that impact the habitats of the listed species

MAKAH INDIANS GO WHALING AGAIN⁹¹⁸

First Makah whale hunt in more than seventy years took place off Ozette village -- May 10, 1999 as numerous gray whales passed by on their spring migration When whalers in their hand-carved canoe, *Hummingbird*, approached the whales speedboats and Zodiacs from the protest group Sea Defense Alliance tried to stop them protestors threw things at the canoe and fired fire extinguishers twice harpooner Theron Parker threw his harpoon at a whale but missed Whalers hunted again but did not harpoon a whale -- May 15 each time a protest boat entered the 500-yard "**exclusion zone**" established by the Coast Guard around the canoe it was detained Sea Shepherd's ship *Sirenian* left the area to pick up replacement boats There were no protest boats around -- morning of Monday, May 17, 1999 after praying together, the Makah whalers paddled the *Hummingbird* off Cape Alava near Ozette with TV cameras broadcasting live from a helicopter overhead, whalers approached a thirty-foot gray whale as the whale surfaced, Theron Parker thrust a harpoon into it a second harpoon from the support boat that accompanied the canoe struck the whale which was then shot and killed with the .50-caliber rifle only then did Sea Shepherd's *Sirenian* arrive on the scene blasting its horn in protest After the whalers prayed in their canoe, crewmember Donnie Swan, a diver, attached additional lines to the whale which was towed back to Neah Bay by a Makah fishing boat *Hummingbird*, accompanied by canoes from visiting tribes, brought the dead whale to the beach

⁹¹⁷ David Wilma, *Department of Interior lists nine salmon runs as Endangered Species on March 16, 1999*, Essay 5334, HistoryLink.org, March 1, 2003.

⁹¹⁸ Kit Oldham, *Makah Whaling*, Essay 5301, HistoryLink.org, February 26, 2003.

SALMON RECOVERY PLAN IS AGREED UPON⁹¹⁹

An agreement among private timberland owners, tribes, state and federal government agencies resulted in the state Salmon Recovery Plan which was signed into law -- June 7, 1999
Under these rules some eleven million acres of privately owned timberland that could negatively impact streams that supported the threatened and endangered runs of salmon must be protected
in the fifty-year Salmon Recovery Plan, loggers could continue to operate if they built roads and culverts to protect streams, avoided unstable hillside and left a buffer zone around streams
One major part of this legislation noted that if logging operators complied with the state rules they were shielded from enforcement under the federal Endangered Species Act

OLYMPIC PIPELINE EXPLOSION KILLS THREE BOYS IN BELLINGHAM⁹²⁰

Olympic Pipe Line Company pumped gasoline through a sixteen-inch pipeline from the refinery in Ferndale south to terminals in Seattle and Portland
When a pressure relief valve failed, a pressure surge led to a catastrophic rupture in the line where it crossed Whatcom Falls Park in Bellingham -- June 10, 1999
spill occurred about 150 feet from the Whatcom Falls water treatment plant and pumping station that added chlorine to water pumped from Lake Whatcom -- Bellingham's main water supply
277,200 gallons of highly volatile gasoline was pumped into Whatcom Creek which flowed through downtown Bellingham into Bellingham Bay
an Olympic Pipeline field worker who happened to be in the Whatcom Creek area called the company's command center in Renton to report a strong odor of gasoline -- 4:35 p.m.
local residents and businesses called the Whatcom County 911 Dispatch Center to report a strong odor of gasoline in the vicinity of Whatcom Creek at about the same time
Bellingham's Fire Department Hazardous Materials Teams was sent to investigate -- about 4:45 p.m.
they found large amounts of gasoline flowing down Whatcom Creek toward Bellingham Bay
water in the creek was pink with gasoline and the fumes overwhelming
Bellingham Fire Department and Police Department immediately began an evacuation
barricades were set up to cordon off the area
Bellingham Fire Department notified Olympic Pipe Line
there was gasoline flowing down Whatcom Creek toward the city
gasoline had also entered Hanna Creek at its confluence with Whatcom Creek
Gasoline vapors exploded creating a river of fire about a mile and a half from Interstate 5 -- 4:55 p.m.
massive fireball sent a plume of smoke 30,000 feet into the air
which was visible from Anacortes to Vancouver B. C.
dense black smoke caused the closure of Interstate 5 for more than an hour
all of the windows were shattered and the doors were blown off
the Whatcom Falls water treatment plant and pumping station in the explosion

⁹¹⁹ David Wilma, *Forests and Fish Agreement results in Salmon Recovery Plan on June 7, 1999*, Essay 5324, HistoryLink.org, February 28, 2003.

⁹²⁰ Daryl C. McClary, *Olympic Pipe Line accident in Bellingham kills three youths on June 10, 1999*, Essay 5468, HistoryLink.org, June 11, 2003.

in addition to damaging the station's five huge water pumps,
the blast also damaged chemical feeding equipment
for all practical purposes the pump station had been destroyed
all of the control systems and even the fire extinguishers melted in the fire
fortunately, the tanks holding toxic chlorine were undamaged
Eighteen-year-old Liam Gordon was fly fishing in Whatcom Creek when the rupture occurred
he was overcome by noxious fumes and fell into the creek
where he drowned prior to the explosion
Two other victims, Roosevelt Elementary schoolmates Wade King, age ten, and Stephen Tsiorvas, ten
were playing north of the Hanna and Whatcom creek confluence when the explosion occurred
both boys survived the blast but suffered second and third degree burns
over ninety percent of their bodies
they were found immediately and flown to the intensive-care burn unit
at Harborview Medical Center in Seattle where, tragically, they died the following day
The inferno, estimated to have reached 2,000 degrees Fahrenheit, caused a high-voltage power line
and two electric substations to be shut down disrupting electrical service
to about 58,000 Bellingham customers for several hours
but most of the collateral property damage was caused by explosions which broke windows
and leveled a house on Valencia Street near Whatcom Creek
however, the fire was mostly contained in and along the creek bed
leaving the greenbelt charred and blackened
Fearing the fire would continue flowing down Whatcom Creek through downtown Bellingham,
police officers began to evacuate businesses in the city
gasoline entered the city's sewer system -- vapors were at explosive levels for an hour
U. S. Coast Guard, concerned the fuel could ignite dock pilings and vessels,
closed Bellingham Bay for a one-mile radius from the mouth of Whatcom Creek
Astonishingly, the explosion and fire caused no additional deaths -- injuries were few
firefighters managed to get the major blazes under control by 6:30 p.m.
black smoke had largely dissipated by 7:00 p.m.
authorities were astounded that the damage was so light
(In the aftermath of the pipeline disaster
parents of Wade King and Stephen Tsiorvas filed a wrongful-death lawsuit
in Whatcom County Superior Court naming the Olympic Pipe Line Company,
the Equilon Pipeline Company and three Olympic employees
as defendants [July 28, 1999]
in an out-of-court settlement, Olympic and Equilon agreed to pay \$75 million
to the families of Wade King and Stephen Tsiorvas)
(A criminal investigation was begun by a federal grand jury in Seattle [September 2001]
this resulted in a seven-count indictment against Olympic Pipe Line and Equilon Pipeline
five felony violations the Hazardous Liquid Pipeline Safety Act
and two misdemeanor violations of the Clean Water Act
included in the indictment were three Olympic employees, a vice-president/manager,
a supervisor, and the controller at the time of the accident)
(After a three-year investigation the National Transportation Safety Board [NTSB]

ruled [October 8, 2002] that the Olympic pipeline explosion was caused by a cascading series of events rather than a single catastrophic failure of the fuel pipe:

- NTSB cited damage caused by IMCO General Construction Company while conducting [1994] excavation work at nearby Whatcom Falls Water Treatment Plant,
- Olympic Pipe Line Company failed to identify or repair the damage,
- a faulty computer system failed to respond to repeated indications that pressure was building up inside the pipeline,
- a faulty pressure relief valve had failed,
- employees of the Olympic Pipe Line Company were not adequately trained)

(Olympic Pipe Line pleaded guilty in U. S. District Court to one felony count under the Hazardous Liquid Pipeline Safety Act and two Clean Water Act misdemeanors [December 11, 2002] Equilon Pipeline entered no-contest pleas to the same violations under the plea agreement, the companies agreed to pay a record \$112 million to settle all federal criminal fines and most of the civil claims against them this was the first time a pipeline company had been convicted under the [1979] Hazardous Liquid Pipeline Safety Act)

SAFECO FIELD OPENS FOR SEATTLE MARINERS' FANS⁹²¹

Seattle's long-sought baseball-only field with retractable roof saw its opening day -- July 15, 1999 after 22-½ years of playing their home games on artificial turf and five years of fighting for a new stadium, the Mariners were treated to real grass and blue skies -- not to mention a huge clubhouse and cedar-lined dugout when the gates opened, more than 40,000 fans saw and heard the Seattle Symphony Orchestra play "Thus Sprach Zarathustra," the theme from the movie *2001: Space Odyssey* while the roof silently and majestically rolled opened play-by-play broadcaster Dave Niehaus, who had been with the team since its inception, donned a tuxedo and threw out the ceremonial first pitch

Safeco Field was inspired by ballparks built earlier in Baltimore, Cleveland and Denver [1990s] new home of the Mainers cost one-half billion dollars

Safeco combined nostalgic touches such as a red brick exterior and a hand-operated scoreboard with modern touches such as restaurants, wide concourses and a giant video screen in centerfield

Fans could see downtown Seattle over the left field wall, Elliott Bay and the Olympic Mountains were apparent from the terrace atop the leftfield grandstand

fans had great views of the field from nearly every seat on the building's three levels in addition to traditional hot dogs, foods ranging from full sit-down dinners to sushi, clam chowder and fruit kabobs were available

baseball patrons expressed great relief that, unlike the Kingdome, there were enough restrooms

Most tickets were relatively affordable -- \$5 in the bleachers to \$32 for box seats

⁹²¹ Glenn Drosendahl, *Safeco Field, the Seattle Mariners' long-sought stadium, opens on July 15, 1999*, Essay 9565, HistoryLink.org, September 11, 2010.

but Safeco Field also had nearly 1,000 seats that required a charter license fee of \$12,000 to \$20,00 for twenty years -- not including tickets
it also had a section behind home plate called the Diamond Club,
where seats with parking and a pre-game buffet cost \$195
most importantly, it had sixty-nine catered and furnished luxury suites
priced from \$94,000 to \$164,000 a season
(Attendance for its first two seasons topped 6.6 million -- best in the major leagues
by the end of [2002] the Mariners had paid off their \$100 million line of credit for cost overruns,
and payment on the public debt was running ahead of schedule
some of that payback was driven by the action on the field -- but a good share
could be attributed to the sheer attractiveness of the ballpark

PORT GAMBLE IS DESIGNATED AN HISTORIC TOWN⁹²²

Port Gamble traces its origins to [1853] when Andrew J. Pope, William C. Talbot, Charles Foster, Josiah Keller and Puget Mill Company built a sawmill at Teekalet on Hood Canal
Renamed Port Gamble [1868] the town was owned by Puget Mill Company
to house the workers at its sawmill -- but was not an incorporated city
Port Gamble was home to generations of sawmill workers employed by Puget Mill
and its successor companies: McCormick Lumber, and Pope and Talbot
National Park Service included Port Gamble on its Register of National Historic Places [1966]
because it was one of the few remaining examples of the company town in the West
Pope and Talbot created Pope Resources [1985] to handle its property holdings
and leased back from Pope Resources the town and the mill site
Pope and Talbot closed its sawmill [1995]
Port Gamble became the responsibility of Pope Resources
with no mill workers to house, Pope Resources planned to redevelop the town
to take advantage of its scenic and strategic location on Hood Canal
because the town was never incorporated as a city, it was technically “rural”
and subject to limitations that would have blocked Pope Resources’ plans
Kitsap County Commissioners declared Port Gamble a Rural Historic Town
laying the groundwork for development of the old company town -- July 21, 1999
this new designation allowed a mix of uses -- industrial, commercial and residential
while preserving the historic character of the community

FEDERAL GOVERNMENT RECOGNIZES THE SNOQUALMIE TRIBE⁹²³

Some 600 adults and 450 children had been working to gain federal status since [1952]
when the *Congressional Record* listed the Snoqualmies as an unrecognized tribe
U.S. District Judge George Boldt’s decision granted recognized tribes
their treaty fishing rights [1974]
but denied this right to the Snoqualmies along with the Samish, Duwamish, Snohomish

⁹²² David Wilma, *Kitsap County Commissioners declare Port Gamble a Rural Historic Town on July 21, 1999*, Essay 5510, HistoryLink.org, August 15, 2003.

⁹²³ Priscilla Long, *Federal government recognizes the Snoqualmie Tribe on October 6, 1999*, Essay 2458, HistoryLink.org, January 1, 2000.

and Steilacoom tribes because they were unrecognized tribes at the time of the [1855] treaty that established Indian Reservations in Washington Territory
Federal government recognized the Snoqualmie Tribe [August 1997]
but this status was challenged by the Tulalip Tribe [December 1997] **“on the grounds that the Tulalip Tribes are the true successor of Snoqualmie culture and that Snoqualmie sovereignty may cut into territory they regard as their own.”** [*The Seattle Times*, October 7, 1999]
Federal government rejected the Tulalip Tribes’ appeal
Snoqualmie Tribe was formally recognized -- October 6, 1999
federal status meant the United States recognized the Snoqualmies as a sovereign government which made the tribe eligible for numerous federal programs and possibly a reservation
Snoqualmie Tribe began to draft a constitution and elect tribal leaders

BOEING SEA LAUNCH PUTS ITS FIRST SATELLITE INTO ORBIT⁹²⁴

Boeing-led Sea Launch Company successfully launched its first satellite into orbit from a floating platform in the Pacific Ocean -- October 9, 1999
Russian-Ukrainian rocket carrying a DirecTV I-R satellite
blasted off from a converted Norwegian drilling platform -- 8:28 PDT
and was placed into orbit one hour later
(nineteen more Sea Launch missions were planned through [2003])

SEATTLE’S UNION STATION REOPENS AS SOUND TRANSIT HEADQUARTERS⁹²⁵

Union Station was built [in 1911] as the Oregon & Washington Railroad Station to serve the Union Pacific Railroad and later the Milwaukee Road
Passenger rail service was consolidated into nearby King Street Station by Amtrak [1971]
Union Station was vacated except for occasional special events held in its vast barrel-roofed waiting room
Downtown Seattle Transit Tunnel’s International District Station opened [1990]
Union Station was considered for use as part of a “multi-modal” (rail, light rail and bus service) transportation center in the core of the city
Sound Transit, a regional transportation agency, and a \$3.9 billion rail and bus plan was approved by the voters of King, Pierce and Snohomish counties [November 5, 1996]
Sound Transit Board agreed to locate its executive offices in Union Station [June 19, 1998]
Union Station re-opened with a gala benefit celebration -- evening, October 16, 1999

MICROSOFT FACES MAJOR CHANGES IMPOSED BY A FEDERAL COURT

U.S. Department of Justice filed an anti-trust complaint against Microsoft at the urging of manufacturers of alternative operating systems and Internet browsers who alleged that the Redmond-based company employed illegal and unfair tactics to limit competition and control prices
U.S. Department of Justice and several states believed that Microsoft used its Windows monopoly

⁹²⁴ Walt Crowley, *Boeing Sea Launch puts first satellite in orbit on October 9, 1999*, Essay 1731, HistoryLink.org, October 11, 1999.

⁹²⁵ Walt Crowley, *Seattle’s Union Station re-opens as Sound Transit headquarters on October 16, 1999*, Essay 7751, HistoryLink.org, May 4, 2006.

to eliminate competitors

much of the controversy focused on the “bundling” of Microsoft’s Internet Explorer with new editions of the Windows operating system

Justice officials said consumers would be harmed because of the reduced competition

and limited number of choices of operating systems that would become available

some critics of the company suggested that Microsoft could control

both commerce and content on the global computer network

Trial was held in U.S. District Court in Washington, D.C. [October 19, 1998] until [June 24, 1999]

District Court Judge Thomas Penfield Jackson issued a harsh finding against Microsoft

he stated that Microsoft had used its monopoly powers to strangle competition

and to hurt consumers -- November 5, 1999

in his 207-page opinion he stated: **“Viewed together, three main facts indicate that Microsoft enjoys monopoly power. First, Microsoft’s share of the market for Intel-compatible PC operating systems is extremely large and stable. Second, Microsoft’s dominant market share is protected by a high barrier to entry. Third, and largely as a result of that barrier, Microsoft’s customers lack a commercially viable alternative.”**⁹²⁶

Federal Judge Jackson ordered that Microsoft be broken up into two parts:

Microsoft applications and Microsoft operating systems

Microsoft’s Bill Gates appealed the decision

federal court of appeals unanimously reversed the breakup of Microsoft [June 28, 2001]

they ruled that the software giant violated antitrust laws but that the trial judge

had engaged in “serious judicial misconduct” by making derogatory comments

about the company during and after the trial

immediately after this appeals judgment, Microsoft stock surged \$3.82 a share to \$74.96

An agreement between the company and the suing states was later reached

WORLD TRADE ORGANIZATION (WTO) GENERATES CONCERNS AROUND THE WORLD

Most governments around the world and leading multinational corporations supported WTO

in the United States substantial bipartisan support for new trade agreements

was pushed by national political leaders in both the Republican and Democratic Parties

politicians, corporations, trade economists and other advocates for free trade

argued that eliminating protective tariffs and other trade laws or regulations

that restricted international trade would promote economic growth

and help reduce poverty by creating new jobs -- especially in the developing world

Seattle and Washington State were more dependent on international trade

than almost any other part of the United States

Seattle and Washington State were more dependent on international trade

than almost any other part of the United States

Virtually all of Washington state’s political and business leaders supported WTO and “free trade”

which they argued benefited society by promoting economic growth⁹²⁷

⁹²⁶ Walt Crowley, *Federal Judge Thomas Penfield Jackson declares Microsoft a monopoly on November 5, 1999*, Essay 1987, HistoryLink.org, November 7, 1999.

⁹²⁷ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 1, Essay 9183, HistoryLink.org, October 13, 2009.

leadership of the state from Governor Gary Locke and state political leaders
to Seattle Mayor Paul Schell and city leaders unanimously lined up
in favor of free trade and the World Trade Organization (WTO)
Washington's largest corporations, including Boeing, Microsoft and Weyerhaeuser,
all major exporters, strongly supported free trade and WTO
state agricultural producers also were heavily dependent on international markets
On the other hand, labor unions and environmentalists were among WTO's most vocal critics
Teamsters and the International Longshoremen's and Warehousemen's Union (ILWU)
saw free trade as a threat to the labor union movement and to their members
labor history told of struggles and strikes in advocating for their members and their rights
environmental activists also expressed concern for the apparent disregard for the environment
from their beginnings conservationists advocated for the creation of national forests and parks
direct action had been used to save old growth forests, wild rivers and endangered species
unions and environmental groups united in their opposition to WTO
they shared similar demands that standards for environmental protection and workers' rights
must be incorporated into trade agreements and enforced by the WTO
workers complained that manufacturing jobs had shifted
to countries with lower wages and fewer workers' rights
environmentalists objected when local environmental protections were struck down by WTO
as violations of free trade agreements

Even among leaders committed to free trade, there were sharp differences:

- issues regarding the promotion of genetically engineered crops surfaced;
- farm subsidies were of concern as free trade critics denounced the "globalization" of agriculture
as being devastating to small farmers and destabilizing to developing rural communities
when cheap imports from corporate agricultural producers flooded their markets;
- protecting intellectual property extended beyond elimination of tariffs on manufactured goods;
- WTO agreements and rules did not address unfair labor practices such as child labor
and restrictions on union organizing

Free trade advocates answered these concerns by arguing that WTO focused exclusively on trade
labor standards were better addressed by other organizations

labor unions countered that "trade" agreements that protected intellectual property
also should protect workers' rights

it appeared that WTO favored corporate interests over social and environmental concerns

Opposition to the WTO may have united unions and environmentalists

but WTO divided them from Democratic Party advocates for free trade

like President Bill Clinton, Governor Gary Locke and Seattle Mayor Paul Schell

Clinton tried to bridge the gap by calling on WTO to address worker and environmental concerns
in the upcoming negotiations

he introduced clauses into trade agreements to protect American workers

he also required trade partners to adhere to environmental practices and regulations

PROTESTORS OF THE WORLD TRADE ORGANIZATION (WTO) PLAN THEIR ATTACK

Planning for anti-WTO demonstrations by local, national and international organizations
began months in advance of WTO's Third Ministerial Conference

Some activist groups focused on opposition to WTO policies -- especially those related to free trade activists of the successful [1998] campaign against Multilateral Agreement on Investment (MAI) were convinced that WTO would be used by transnational corporate influencers as a forum to advance the global corporate agenda to the detriment of worldwide civil society and especially the interests of third-world countries
other anti-WTO groups were motivated by pro-labor, anti-capitalist, or environmental agenda

MICROSOFT CORPORATION IS FOUND GUILTY OF CREATING A MONOPOLY⁹²⁸

U.S. District Court Judge Thomas Penfield Jackson issued his findings -- November 5, 1999
he stated that Microsoft's dominance of the personal computer operating systems market constituted a monopoly and that Microsoft had taken action to crush threats to that monopoly
Microsoft immediately appealed the decision
(Judge Jackson followed-up his ruling by ordering that Microsoft be broken into two separate unit
one to produce the operating system
second to produce other software components)
(U.S. Federal Appeals Court reversed Judge Jackson's order to breakup Microsoft [June 28, 2001]
rather it was ruled the software giant had violated the Sherman Antitrust Act but Judge Jackson had engaged in "**serious judicial misconduct**" by making derogatory comments
about the company during and after the trial
immediately after this appeals ruling was in place, Microsoft stock surged from \$3.82 to \$74.96)

SEATTLE IS ANNOUNCED AS THE HOST CITY FOR THE 1999 WTO CONFERENCE

Seattle was to host the Third WTO Ministerial conference --1999
activists for a variety of causes laid plans to make their voices heard
as they sought to reform, not abolish, WTO
President Clinton openly encouraged WTO opponents to come to Seattle
and make their views known
Seattle officials led by Mayor Paul Schell repeatedly stated that the city would welcome
not only the WTO conference but also all who came to protest peacefully against it
Activist organizations, among them the Sierra Club, Friends of the Earth, Global Trade Watch,
and national and international "non-government organizations" (NGOs) made preparations
NGOs were especially concerned with labor issues, the environment and consumer protection
environmental activists, student groups, religiously-based groups like Jubilee 2000
and radicals dedicated to the destruction of property were involved in the early planning
they mobilized large numbers of protestors
big labor unions including the AFL-CIO and The Brotherhood of Teamsters
argued that WTO should not start another round of trade negotiations
until labor and environmental issues had been addressed
AFL-CIO, with cooperation from its member unions, organized a large permitted rally
and a march from Seattle Center to downtown scheduled to take place
on the opening day of the conference

⁹²⁸ Cassandra Tate, *United States sues Microsoft Corporation on May 18, 1998*, Essay 2297, HistoryLink.org, June 1, 2002.

an alliance consisting of Teamster members and environmentalists was formed
 “teamsters and turtles” joined in planning protest activities
 organizers from up and down the West Coast came together in a loose coalition
 they were called the Direct Action Network (DAN) composed of Earth First,
 Ruckus Society, Rainforest Action Network, and People’s Global Action⁹²⁹
 other, more radical groups, planned to go beyond permitted demonstrations
 and attempt to physically shut down the WTO meeting through nonviolent direct action
 Protestors expressed concern regarding the fairness of global trading and corporate-led globalization
 Direct Action Network (DAN) organizers coordinated efforts to block access
 to the Washington State Convention and Trade Center where WTO conferees would meet
 organizers trained protestors in the time-honored strategy of civil disobedience
 including preparation for the likelihood of arrest
 many of the protestors prepared to use plastic pipes, duct tape, bicycle locks , etc.
 to fasten themselves together making it harder for police to remove them
 performance art and street theater were a big part of the direct action plans
 artists prepared giant puppets, huge balloons, drumming and music performances
 large banners carried anti-WTO messages
 DAN organizers adopted action guidelines that called for no property destruction
 weapons, violence, drugs and alcohol were all prohibited
 Some of the protestors were more interested in taking direct action to disrupt the WTO meetings
 including confrontational tactics, civil disobedience and acts of vandalism
 they ignored the restrictions imposed by DAN
 they planned to disrupt meetings by blocking downtown streets and intersections
 to prevent delegates from reaching the Washington State Convention and Trade Center
 those bent on rioting were estimated to number about 100 out of a crowd of 40,000
 they were commonly referred to as “anarchists”⁹³⁰
 many were from Eugene, Oregon where they had gathered (that summer)
 for a music festival
 they were prepared to join in the destruction
 they listed large corporations such as Nike, the Gap, McDonald’s, Starbucks and banks
 because, they contended, these businesses had committed “corporate crime”

WORLD TRADE ORGANIZATION (WTO) MEETINGS BEGIN IN SEATTLE

Trade ministers from over 160 countries met in the city of Seattle
 to engage in a broad range of trade topics -- November 30, 1999-[December 3, 1999]
 Goals of the World Trade Organization (WTO) were controversial
 Helene Cooper of the *Wall Street Journal* [July 16, 1999] warned of an impending
“massive mobilization against globalization” being planned
 for the Seattle WTO conference

⁹²⁹ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 2, Essay 9213, HistoryLink.org, November 13, 2009.

⁹³⁰ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 2, Essay 9213, HistoryLink.org, November 13, 2009.

London *Independent* newspaper [July 17] savaged the WTO: **“The way it has used [its] powers is leading to a growing suspicion that its initials should really stand for World Take Over. In a series of rulings it has struck down measures to help the world’s poor, protect the environment, and safeguard health in the interests of private—usually American—companies.”**

according to Ronnie Hall, trade campaigner at Friends of the Earth International, **“The WTO seems to be on a crusade to increase private profit at the expense of all other considerations, including the well-being and quality of life of the mass of the world’s people.”**

PROTESTORS MAKE THEIR APPEARANCE IN SEATTLE

Hundreds of activists arrived in the deserted Seattle streets near the convention center
they took control of key intersections -- early in the morning November 30, 1999
Over the next few hours groups of marchers began to converge
on the Washington State Convention and Trade Center area from different directions
these included a student march from the north
and “citizens of the developing world” who marched in from the south
some demonstrators held rallies and others held teach-ins in downtown Seattle
at least one group staged an early-morning street party
Control of the intersections, plus the sheer numbers of protesters in the area,
prevented WTO delegates getting from their hotels to the Convention Center
it also had the effect of cutting the police into two forces
police who formed a cordon around the convention center were cut off from the city
Police outside of the area eventually tried to break through the protesters’ lines in the south
Seattle Police Department and King County Sheriff’s officers fired pepper spray, stun grenades,
tear gas canisters and eventually, rubber bullets at protesters at several intersections
in an attempt to reopen the blocked streets and allow WTO delegates
through the blockade set up at 6th Avenue and Union Street
the crowd threw the police back
Black-clad anarchists began smashing windows and vandalizing storefronts
these actions produced some of the most famous and controversial images of the protest
additional protesters pushed dumpsters into the middle of intersections and lit them on fire
tires on police vehicles were deflated
non-anarchists joined in the property destruction
all of the commercial activity in downtown was disrupted
Organized labor’s permitted late-morning rally and march through downtown
drew more than 35,000 marchers from the Seattle Center rally organized by the AFL-CIO
though the intended route had them turning back before they reached the convention center,
some ignored the marshals and joined the crowds of protesters in downtown
in what had become a street-carnival-like scene
much of downtown remained festive as thousands of upbeat protestors
filled streets and sidewalks chanting and waving signs and banners⁹³¹
Huge number of demonstrators, even the lowest estimates put the crowd at over 40,000,

⁹³¹ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 2, Essay 9213, HistoryLink.org, November 13, 2009.

dwarfed any previous demonstration in the United States by any of the organizations generally opposed to economic globalization
Seattle police did not react immediately because they had been convinced by labor union organizers who had told them during the protest-permit process that peaceful organizers would control activists who might vandalize property

SEATTLE POLICE LOSE CONTROL IN DOWNTOWN

Situation in downtown Seattle became even more complicated -- around noon Tuesday, November 30 WTO opening ceremony was canceled
but enough delegates had made it to the Convention Center to get the negotiating sessions underway
WTO negotiations were quickly overshadowed by the massive and controversial street protests that took place outside the hotels and the Washington State Convention and Trade Center
Seattle police were eventually overwhelmed by the mass of protesters downtown many of them had chained themselves together and blocked intersections
it took police much of the afternoon and evening to clear the streets

SEATTLE MAYOR PAUL SCHELL DECLARES A STATE OF EMERGENCY⁹³²

With President Bill Clinton due to arrive that night, Mayor Schell was under intense pressure from federal officials to declare a state of emergency and impose a curfew on most of downtown
With many protestors heading home, Mayor Schell set a (7:00) curfew -- 3:30 p.m. November 30 police did not wait for the curfew hour
large squads in riot armor and gas masks, backed by armored vehicles, began sweeping through downtown using concussion grenades, rubber bullets and tear gas to force remaining protestors and bystanders alike off the street -- 5:00
Enforcing the curfew even before it officially began, Seattle Police officers began following several hundred protestors as they retreated up Denny Way toward Seattle's ultra-liberal Capitol Hill neighborhood -- infuriated Capitol Hill residents joined the protests

MAYOR PAUL SCHELL IMPOSES A "LIMITED CURFEW"⁹³³

Soon after President Clinton arrived in Seattle -- early morning hours of December 1, 1999
Mayor Schell issued another emergency order and established a "limited curfew" (usually referred to as a "no protest zone") for twenty-five blocks of downtown
protestors were not allowed to enter until the WTO conference had ended [December 3]
Governor Locke called in the National Guard; other law enforcement agencies sent support, before daylight on Wednesday, troops and officers lined the perimeter of the no protest zone
Police surrounded and arrested several groups of would-be protestors and more than one bystander -- Wednesday, December 1
(over the next few days more than 600 people were arrested
more than 500 people were jailed)

⁹³² Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 2, Essay 9213, HistoryLink.org, November 13, 2009.

⁹³³ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 2, Essay 9213, HistoryLink.org, November 13, 2009.

Throughout the day, police used tear gas to disperse crowds although a permitted demonstration organized by the Steelworkers Union was held along the waterfront
During the day President Clinton spoke to WTO officials and critics, but he was unable to address delegates at the Director General's Reception planned for Wednesday evening
as the event was canceled so that lagging negotiations could continue

SEATTLE POLICE OVER-REACT TO THE RIOTING

Crisis in Seattle escalated that evening -- Wednesday, December 1, 1999
several hundred protesters voted to again march toward Capitol Hill -- about 7:00 p.m.
when the marchers reached Capitol Hill's Broadway around 7:45
they met another large group already demonstrating in the area
some 500 protesters marched up and down Broadway in defiance of police orders -- 8:00
Capitol Hill was the scene of a new spectacle
riot-clad Seattle Police, King County Sheriff's officers and camouflage-clad National Guardsmen
invaded the most densely populated West Coast urban neighborhood north of San Francisco
large crowds of appalled Capitol Hill residents joined with the protesters
chants of "Go home! We live here!" were heard above the fray
SPD, King County deputies and National Guardsmen attacked -- around 9:00 p.m.
tear gas, flash bombs and rubber bullets were unleashed against protesters and residents alike
riot squad members sprayed mace into the crowd and at specific activists
and made mass arrests
one deputy approached two young women sitting in a car at Broadway and Republican Street
they were videotaping the confrontations
he ordered the driver to roll down her window
when she complied he drenched both women with pepper spray -- all caught on tape
skirmishes between protestors and police and National Guardsmen were frequent
protest activities became known as the "Battle of Seattle"
or the "Battle in Seattle" (which became the title of a movie about the event)

SEATTLE POLICE CHANGE THEIR TACTICS⁹³⁴

Even though demonstrations, including some peaceful civil disobedience, continued for two days,
officers essentially abandoned the use of chemical irritants and "less lethal munitions"
they made very few additional WTO-related arrests -- beginning Thursday, December 2
Police officials attributed the new approach to changed circumstances
(for instance, President Bill Clinton left town early on Thursday)
but it also followed severe condemnation of earlier police tactics
by a variety of groups and community leaders -- especially those on Capitol Hill
Most of Thursday's and Friday's numerous protests were aimed at city officials and police
they remained peaceful and even recaptured something of the festive atmosphere of Tuesday
Downtown merchants, usually supporters of Mayor Schell, blasted his administration
merchants estimated vandalism damage to commercial businesses cost them \$2.5 million

⁹³⁴ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 2, Essay 9213, HistoryLink.org, November 13, 2009.

and \$17 million in lost sales at the start of the critical holiday shopping season
huge size of the protest pushed the city \$3 million over its estimated police budget of \$6 million
partly due to city cleanup and police overtime bills
Civil liberties groups and thwarted protestors accused the city and police of violating free speech
church, civil rights and other groups along with individual citizens
denounced the indiscriminate use of tear gas and conduct that they called police brutality
they said some officers beat people with nightsticks and handcuffed passersby
and they deliberately pepper-sprayed people in the face at point-blank range
Police officers complained bitterly that they were not properly prepared or equipped, lacked backup,
and had been forced to work excessive hours under dangerous conditions without rest or food
Outrage felt by Capitol Hill residents and anti-WTO protestors
led to demands for police accountability
and the filing of charges against the City of Seattle for civil rights violations
there were calls from all sides for Mayor Paul Schell and Police Chief Norm Stamper to resign

WORLD TRADE ORGANIZATION (WTO) MEETING IS COMPLETELY DISRUPTED

World Trade Organization (WTO) failed to agree on many issues
it did not adopt any resolutions as negotiation meetings were cancelled
To many in North America, anarchist and radical circles, Seattle's riots, protests and demonstrations
were seen as a success
prior to the "Battle in Seattle," there was almost no mention of "anti-globalization" in the media
protest events were seen as having forced the media to report *why* people around the world
would oppose the World Trade Organization (WTO)

SEVERAL INVESTIGATIONS INTO THE WTO EVENTS ARE UNDERTAKEN⁹³⁵

In the week following the WTO conference, several groups studied the crisis:

- Seattle City Council established a WTO Accountability Review Committee,
- Seattle Police Department did its own study,
- Mayor Schell hired R. M. McCarthy and Associates, a consulting firm, to conduct another study,
- American Civil Liberties Union (ACLU) of Washington also prepared a report

All reports agreed that the city had not prepared adequately
but they disagreed over subsequent events
police department and the McCarthy reports argued that under the circumstances
police made an appropriate, restrained response to lawless, violent protestors
ACLU concluded that lack of adequate preparation caused the city to over-react
both the ACLU and the City Council stated that police should have been better prepared
to arrest those engaging in civil disobedience
widespread use of chemical irritants often inflamed the situation
and unnecessarily harmed peaceful protestors and bystanders

⁹³⁵ Kit Oldham, *WTO Meeting and Protests in Seattle (1999)* -- Part 2, Essay 9213, HistoryLink.org, November 13, 2009.

SEATTLE POLICE CHIEF NORM STAMPER RESIGNS⁹³⁶

In his resignation announcement, Police Chief Norm Stamper took full responsibility for the unrest which closed the Central Business District and disrupted World Trade Organization (WTO) talks in Seattle [November 30-December 3, 1999]

Several investigations had been opened into police misconduct during the demonstrations Stamper said he hoped that his resignation would “depoliticize” the job of Seattle Chief of Police Chief Stamper served his last day [February 18, 2000]

AFTERMATH OF THE WTO RIOTS IS EXPENSIVE FOR SEATTLE⁹³⁷

Within weeks after the WTO conference, city prosecutors dropped the charges filed against almost all of those arrested many of the victims then filed class-action lawsuits challenging the legality of the no protest zone they sought compensation for wrongful arrest some of the people injured by rubber bullets, pepper spray, or tear gas also sued Seattle settled with protestors who claimed injuries and those arrested outside the no protest zone but the city fought the claims of those arrested inside the zone (U.S. District Judge Marsha Pechman found [December 29, 2004] that police had no probable cause when they arrested 157 protesters in downtown Seattle during the WTO conference thus violating their Fourth Amendment Constitutional rights Ninth Circuit Court of Appeals ruled [June 1, 2005] that the Seattle no protest zone was constitutional as written but that those arrested could recover damages if they proved that the order was enforced in an unconstitutional manner in their cases in a subsequent trial, U.S. District Judge Pechman determined [January 31, 2007] that the mass arrest of some 200 people at Westlake Center was illegal members of the jury concluded that the illegal arrests were based on city policy which made the city liable Seattle settled with the individuals arrested outside of the no-protest zone it paid protestors a total of \$250,000, cleared their records and promised to improve police training)

⁹³⁶ Dave Wilma, **Norm Stamper resigns as Seattle Police Chief on December 6, 1999, in wake of WTO unrest**, Essay 2144, HistoryLink.org, January 1, 2001.

⁹³⁷ Kit Oldham, *WTO Meeting and Protests in Seattle (1999) -- Part 2*, Essay 9213, HistoryLink.org, November 13, 2009.

2000+

2000 CENSUS SHOWS POPULATION GROWTH IN EVERY COUNTY IN WASHINGTON

Total population of Washington State in 2000 was 5,894,143

an increase of 1,027,474 (21.11 percent) from the [1990] count of 4,866,669

Every county in the state experienced a rising population

Washington's largest counties were King (1,737,034), Pierce (700,820),

Snohomish (606,024), Spokane (417,939), Clark (345,238), Kitsap (231,969),

Yakima (222,581), Thurston (207,355), Whatcom (166,814) and Benton (142,475)

Washington's fastest-growing counties with the most new residents were King (229,729),

Snohomish (140,396), Pierce (114,617), Clark (107,185) and Spokane (56,606)

Washington's five fastest-growing counties by percentage of population were

Clark (45 percent), San Juan (40.3 percent), Grant (36.3 percent),

Franklin (31.7 percent) and Pend Oreille (31.6 percent)

Washington's cities with a population in excess of 50,000 people were Seattle (563,374),

Spokane (195,629), Tacoma (193,556), Vancouver (143,560), Bellevue (109,569),

Everett (91,488) Federal Way (83,259), Kent (79,524), Yakima (71,845),

Bellingham (67,171), Lakewood (58,211), Kennewick (54,693), Shoreline (53,025)

and Renton (50,052)

Women barely outnumbered men in Washington,

2,959,821 (50.2 percent) to 2,934,300 (49.8 percent)

Between [1980] and 2000, Washington's median age increased from 29.8 years to 35.3 years

Washington's classification by race showed the vast majority were Caucasian

White: 4,821,823 (81.8 percent)

Black or African American: 190,267 (3.2 percent)

American Indian or Alaska Native: 93,301 (1.6 percent)

Asian: 322,335 (5.5 percent)

Native Hawaiian or Other Pacific Islander: 23,953 (0.4 percent)

Other races: 228,923 (3.9 percent)

Hispanic/Latino people who may be of any race, were counted

both in their racial group and as a separate, multi-racial group

2000 Hispanic/Latino population of 441,509 (7.5 percent of the state population)

this population had increased by 105 percent in the preceding ten years

Total number of households in Washington was 2,271,398

(an increase of 398,967 over [1990])

1,499,127 married couples represented 52% of all households

married couple households with children: 541,636 (23.8% of all households)

average family size was 3.07 persons

male households living alone: 91,088 (4.1% of all households)

female households living alone: 224,618 (9.9% of all households)

female households (no spouse) living with children: 146,920 (6.5% of all households)

Washington has a highly educated population:

24.9% of the state's population held high school diplomas

8 % of the population earned and Associate degree

18.4% hold a Bachelor's degree
6.3% have a Master's degree
3% have earned a Doctorate or professional degree

BOEING MAKES SEVERAL DARING MOVES

Boeing was focused on manufacturing commercial aircraft and government information and communications systems including:

- classified government program opportunities,
- new space-based air traffic management systems,
- movement of broadband information on and off mobile platforms,
- integrated military battlefield and defense systems

Boeing purchased Hughes Electronics Corporation's space and communications business for \$3.75 billion in cash

Boeing became the giant of the Aerospace industry -- January 12, 2000
its annual revenues approached \$10 billion

Boeing's space and communication revenues and earnings increased by more than a third

Boeing anticipated the space and communications market would grow to \$120 billion annually

Boeing also acquired a leading supplier of electronic components for satellites, as Hughes Electron Dynamics became part of the Boeing company

Spectrolab, a premier provider of solar cells and panels for satellites, also was purchased

Sepctrolab became part of the newly-founded Boeing Satellite Systems under the Boeing Space and Communications led by President Jim Albaugh which was headquartered in El Segundo, California

BILL AND MELINDA GATES FOUNDATION – THE RICHEST PHILANTHROPIC TRUST

Bill and Melinda Gates announced a gift of \$5 billion in Microsoft stock to their namesake foundation based in Seattle -- January 24, 2000

this contribution raised the Bill & Melinda Gates Foundation endowment to \$21.8 billion and made it the largest transparently operated philanthropic trust in the world

William H. Gates Foundation was merged into the Bill and Melinda Gates Foundation

Bill and Melinda Gates Foundation aims to promote greater social equity in four areas: global health, education, public libraries, and support for at-risk families in Washington and Oregon

HANFORD REACH NATIONAL MONUMENT IS ESTABLISHED

Hanford Reach National Monument was proposed where plutonium production at the Hanford Nuclear Reservation had been established as part of the top-secret Manhattan Project to build the world's first atomic bombs [1943]

plutonium from Hanford was used in the bomb that destroyed the Japanese city of Nagasaki [1945]

federal government eventually built nine nuclear reactors at the Hanford site that produced the plutonium used in two-thirds of the nation's total nuclear arsenal

atomic reactors produced so much toxic waste that the 586-square-mile

nuclear reservation became the most polluted place in the Western Hemisphere when Hanford was shut down [1991] it was the target of the most complicated, challenging and expensive environmental cleanup effort in history

Because the area was so large and was kept free of people for so long, it had become a valuable wildlife refuge and home to eagles, black-crowned night herons, prairie falcons, long-billed curlews, a profusion of overwintering waterfowl, coyotes, deer, and other species that survived in the shadows of reactors and processing plants it also includes numerous archaeological and historic sites, among them ceremonial, hunting and burial grounds used by Native Americans for thousands of years⁹³⁸

Designation of Hanford Reach National Monument was not easy several previous efforts to preserve the area through congressional action had failed Washington's Democratic U.S. Senator Patty Murray introduced legislation to designate Hanford Reach as a National Wild and Scenic River [1995]

Washington's Republican U.S. Senator Slade Gorton led the opposition to that bill two years later, Senator Murray and Congressman Norm Dicks introduced companion bills in the U.S. Senate and the U.S. House of Representatives again seeking to designate the Reach as a Wild and Scenic River

U.S. Senator Gorton again led the opposition he argued that local officials were better equipped than the federal government to manage the Hanford Reach and its environs

a coalition of Indian tribes and conservationists continued to press for federal protection U.S. Senator Patty Murray asked that the area be set aside as a national monument -- 2000 under the [1906] Antiquities Act that allowed presidents to act to safeguard areas of national historic and scientific interest without congressional consent undammed "Hanford Reach" of the of the Columbia River stretches for fifty-one miles from below Priest Rapids Dam to Richland

President Bill Clinton established the 195,000-acre Hanford Reach National Monument to protect the last free-flowing stretch of the Columbia River and to preserve one of the largest undeveloped blocks of shrub-steppe grasslands left in Washington State -- June 9, 2000

SEATTLE HYDROPLANE *MISS FREEI* BREAKS THE WORLD WATER SPEED RECORD⁹³⁹

Enumclaw native Russ Wicks drove the hydroplane *Miss Freei* (U-25) sponsored by Internet service provider Freei to a world speed record for a propeller driven boat -- June 15, 2000

Miss Freei covered the mile-long straightaway course at the north end of Lake Washington at 205.494 miles-per-hour shattering the thirty-eight-year-old record

Miss Freei, owned by Dr. Ken Muscatel, was built at Friday Harbor, Washington on San Juan Island [1999]

6,600-pound boat was twenty-eight feet long and fourteen feet wide

⁹³⁸ Cassandra Tate, *Hanford Reach National Monument*, Essay 7438, HistoryLink.org, August 17, 2005.

⁹³⁹ Greg Lange and Charles Hamilton, *Miss Freei breaks hydroplane world speed record on Lake Washington on June 15, 2000*, Essay 2504, HistoryLink.org, June 21, 2000.

its safety canopy used to protect the driver was taken from an F-16 fighter jet
propeller driven boat was powered by a 3,000-horsepower turbine engine
taken from a military Chinook helicopter
at full speed the hydroplane threw up one ton of water in a 200-foot-long rooster tail
that reached forty feet into the air

WILLIAM KENZO NAKAMURA RECEIVES A CONGRESSIONAL MEDAL OF HONOR⁹⁴⁰

Nakamura grew up in Seattle's International District, graduated from Garfield High School,
and attended the University of Washington

during the summers worked in a salmon cannery at Union Bay, Alaska
his studies were interrupted when he and his family were forced to move
to the Minidoka Relocation Center (Internment camp) [1942]

William Kenzo Nakamura enlisted in the army

he became a member of one of the most highly decorated regiments in U.S. history
the 442nd Regimental Combat Team, 34th "Red Bull" Division, U.S. 5th Army
Private 1st Class Nakamura's platoon was caught in intense machine gun fire
from a German machine gun unit

by himself he crawled toward the fire throwing hand grenades

his action halted the fire long enough for his platoon to escape

Nakamura escaped injury, only to die later the same day [July 4, 1944]

when again he approached machine-gun fire in order to draw it away from his comrades
he was the first Army volunteer from Minidoka Relocation Center to be killed in action

Japanese World War II veteran William Kenzo Nakamura of Seattle

was posthumously presented the nation's highest military honor

by President Bill Clinton -- June 21, 2000

Nakamura and twenty-one other war heroes had been denied Medals of Honor

at the time of their bravery because of their Asian ancestry

(King County Council passed a resolution asking Congress to name Seattle's federal courthouse
in honor of Private 1st Class William Kenzo Nakamura [September 19, 2000]

Congress renamed the Seattle federal courthouse at Madison Street and 5th Avenue
in his honor [November 2001])

EXPERIENCE MUSIC PROJECT (EMP) OPENS AT SEATTLE CENTER⁹⁴¹

Experience Music Project (EMP) grew out of Microsoft co-founder Paul Allen's admiration
for the music of Seattle-born revolutionary rock guitarist Jimi Hendrix

who exploded on the international scene at the [1967] Monterey Pops Festival

as a teen, Allen attended Hendrix's triumphant hometown concert [1968]

as an adult, Allen collected rock 'n' roll artifacts including a shard of the guitar
that Hendrix obliterated during his historic Monterey performance

⁹⁴⁰ Priscilla Long, *William Kenzo Nakamura receives Medal of Honor for World War II heroism in a ceremony on June 21, 2000*, Essay 2767, HistoryLink.org, August 18, 2000.

⁹⁴¹ Walt Crowley, *Experience Music Project (EMP) opens at Seattle Center on June 23, 2000*, Essay 5424, HistoryLink.org, March 15, 2003.

Paul Allen, co-founder of Microsoft, opened his museum and education center -- June 23, 2000
designed by Frank O. Gehry, the \$80 million building was inspired
by Seattle-born rock guitarist Jimi Hendrix [1942-1970]
Gehry's design featured an undulating ensemble of multi-colored surfaces
and volumes which some critics compared to a guitar after Jimi Hendrix was done with it
EMP and its collection of 80,000 rock artifacts ultimately cost \$240 million when it opened
and attracted 800,000 visitors in its first year of operation

WASHINGTON STATE'S UNIQUE SYSTEM OF SELECTING POLITICAL CANDIDATES

Primary Elections were held to allow political parties to narrow the field of candidates seeking office

There are several types of Primary Elections:

“Closed Primary” elections required a candidate file by political party
before the election voters must register as a member of a specific political party
at the primary election voters receive only their political party's ballot
their selection is limited to the candidates running for that political party

“Semi-Closed Primary” elections allow voters registered by political party
and receive only their party's ballot of candidates as in the Closed Primary
but voters unaffiliated with a specific political party can also vote
independent voters make their party selection inside the voting booth

“Semi-Open Primary” elections allow voters registered by political party
receive only their party's ballot of candidates as in the Closed Primary
but voters unaffiliated with a specific political party can also vote
independent voters make their party selection inside the voting booth

or publicly by registering with any political party on election day

“Blanket (sometimes called Open) Primary” elections allowed all voters to select
from all candidates for an office regardless of their identified political party affiliation
sometimes voters “cross over” and vote for the weakest candidate
of the opposite party to give their own party the advantage in the general election

“Caucuses” and “Conventions” select “presidential and vice-presidential candidates”

“Political Party Caucuses” for each of Washington's forty-nine Legislative Districts
are held in people's homes and public buildings
all participants must be registered members of the political party holding the caucus
attendees discuss their party's “presidential and vice-presidential candidates”
members also write suggestions for the state's “political party platform”
identifying official party positions on a variety of political issues
delegates and alternates are elected to the “County Political Party Convention”
based on their selection of a presidential and vice-presidential candidate
and their position on political party platform issues

“County Political Party Convention” is held next

political party delegates discuss the presidential and vice-presidential candidates
who will receive their party's nomination and identify a candidate or candidates
delegates address “political party platform” issues offered to the body as resolutions
these debates result in the official “County Platform”

“State Political Party Convention” is held

here political party delegates select the “presidential and vice-presidential candidates” who will receive the state’s twelve electoral votes
delegates also write the official “State Party Platform” identifying specific issues important to the members of that political party in Washington
delegates to “National Political Party Convention” are selected to represent the state
National conventions are held by all major political parties
to nominate a party’s candidate for U.S. President and Vice President
who run together as a team in the General Election
national convention delegates also write a “party platform”
identifying the official party positions on a variety of political issues
on which the party’s candidates will run

U.S. SUPREME COURT RULES SOME PRIMARY ELECTIONS UNCONSTITUTIONAL

Washington voters had used the “Blanket Primary” system to select candidates who would run in the [November] General Election
voters did not register to vote by political party in Washington State
candidates would select a political party with which to be affiliated
even if the party did not want them
all of the candidates, regardless of political party affiliation, appear on the ballot
with this system voters in the Primary Election could vote for a candidate from any political party
Blanket primary elections were ruled unconstitutional by the United States Supreme Court
in *California Democratic Party v. Jones* because it required political parties
to associate with candidates they did not endorse -- June 26, 2000
(for instance neo-Nazis or Communists could run as Republicans or Democrats)

SOUND TRANSIT BEGINS COMMUTER RAIL OPERATIONS⁹⁴²

Sound Transit’s first *Sounder* commuter train
departed from Tacoma -- 6:20 a.m. September 18, 2000
(almost ninety-eight years to the day after electric interurban cars
had first linked the two cities virtually retracing interurban rail system
that was launched [September 25, 1902] and ended [December 30, 1928])
it crossed the Puyallup and Kent valleys using Burlington Northern-Santa Fe tracks
bound for Seattle’s King Street Station -- 335 passengers arrived on time fifty minutes later
Sounder trains were designed to carry more than 1,000 passengers on each run
Sounder runs were eventually to be extended south to DuPont and north to Everett
Other elements of the \$3.9 billion transportation system included “Link” light rail service
between Seattle and Tacoma, “Sound Express” buses
and expanded “High Occupancy Vehicle” (HOV) lanes
this service duplicated the previous Seattle-Tacoma interurban rail system
(Sounder service expanded to provide four round trips per day
Lakewood, Tacoma, Puyallup, Sumner, Auburn, Kent and Tukwila to Seattle in the South [2012])

⁹⁴² Walt Crowley, *Sound Transit inaugurates Sounder commuter rail service between Tacoma and Seattle on September 18, 2000*, Essay 2672, HistoryLink.org, September 20, 2000.

and Everett, Mukilteo and Edmonds to Seattle in the North [2003])

SEATTLE KOREAN COMMUNITY LEADER ROCKY KIM IS KILLED⁹⁴³

Seattle's Korean community suffered a great loss with the death of Youngsu "Rocky" Kim found shot to death at his West Seattle gas station and minimart -- October 30, 2000 when a customer and an employee reporting for work found the front door locked and the lights off at 8:20 a.m.

Rocky Kim was a very popular businesses owner and community leader

Kim helped found the Korean American Grocers Association of Washington [1988] he served as its president several times

he also established the Washington Association of Korean American Convenience Stores, to advocate Korean merchants' concerns

Northwest Asian Weekly named him "Korean-American Man of the Year" [1993]

Korean American Professionals Society gave him their "pioneer award" [1996]

Kim served on the boards of numerous social service and cultural agencies such as the Asian Counseling and Referral Service

and the Korean American Professional Society

WASHINGTON VOTERS MAKE SOME CHANGES IN THEIR GOVERNMENTS

Washington voters preferred Democrat Al Gore

to Republican George W. Bush who won the presidency

when a controversial U.S. Supreme Court decision awarded Bush Florida's electoral votes

Voters in Washington strongly supported

incumbent Democratic Governor Gary Locke -- November 7, 2000

In the race for U.S. Senator, voters narrowly elected Democrat Maria Cantwell

over incumbent Republican U.S. Senator Slade Gorton

Cantwell joined Democrat Patty Murray in the U.S. Senate

making Washington the third state with two women U.S. Senators

Congressional election results showed only one change in Washington's delegation

Second Congressional District was an open seat

after U.S. Representative Republican Jack Metcalf honored his pledge

to retire after three terms in office

Snohomish County Councilmember Democrat Rick Larsen was elected

at the same time in the Fifth Congressional District, Congressman George Nethercutt

who had pledged to only serve only three terms [1994] changed his mind and was reelected

State legislative races saw Democrats lose two State Senate seats

but retain a 27-22 seat majority

State House of Representatives remained tied 49-49 with Democrat Frank Chopp

and Republican Clyde Ballard continuing to share the Speaker of the House position

Washington voters also enact new laws -- November 7, 2000

•Initiative 713 made trapping with body-gripping traps and use of some poisons illegal

I-713 passed by a vote of 1,315,903 For and 1,093,587 Against

⁹⁴³ Carey Giudici, *Korean Americans in King County*, Essay 3251, HistoryLink.org, May 31, 2001.

- Initiative 722 limited property tax increases to no more than 2% per year
I-722 passed by a vote of 1,295,391 For and 1,022,349 Against
- Initiative 728 proposed construction of additional school facilities, class size reduction , expansion for learning programs and teacher training
to be funded by existing property taxes state budget reserves and lottery proceeds
I-728 passed by a vote 1,714,485 For and 675,635 Against
this was the greatest voter approval in the history of Washington State (72%)
however, the funding source was not identified
(legislators later decreased the funding amounts)
- Initiative 732 demanded an annual cost-of-living salary adjustment be granted to public school teachers and district employees, and community and technical college employees
I-732 passed by a vote of 1,501,261 For and 89,301 Against (63% approval)
however, the funding source was not identified
(legislators later decreased the funding amounts)

MEMBERSHIP IN THE STATE HOUSE OF REPRESENTATIVES REMAINS TIED

Although a membership tie in the House was a novelty it began to seem commonplace for the second straight election, voters in November 2000 chose forty-nine Republican Representatives and forty-nine Democratic Representatives as a result, Representatives Clyde Ballard and Frank Chopp were re-elected as co-Speakers in 200 that year's session provided less cooperation and more frustration as the state House of Representatives failed to reach agreement on the issue many members identified as the most important -- transportation funding

SEATTLE NEWSPAPER WORKERS GO ON STRIKE⁹⁴⁴

Seattle Times and the *Post-Intelligencer* were owned separately but operated under a joint operating agreement
The Seattle Times and the *Seattle Post-Intelligencer* maintained separate newsrooms with the *Times* handling advertising, production and circulation for both papers
Seattle Times and the *P-I* negotiated jointly with their unions

Pacific Northwest Newspaper Guild Local 82

represented 900 *Seattle Times* news, advertising, and circulation workers and 130 news and business department employees at the *Seattle P-I*

Times Guild members sought:

- wage increases of approximately \$2 an hour spread over three years;
- an end to a two-tier wage structure in which suburban employees were paid less than those who worked downtown;
- *P-I* Guild members demanded changes in their pension plan;
- finally, Local 82 wanted an increase in the number of employees required to join the Guild

⁹⁴⁴ Dave Wilma, *Pacific Northwest Newspaper Guild strikes The Seattle Times and the Seattle Post-Intelligencer beginning on November 21, 2000*, Essay 2945, HistoryLink.org, January 17, 2001.

Seattle Times offered fifty-five cents an hour over six years and no change in pay structure
Pacific Northwest Newspaper Guild Local 82 rejected a final contract offer
from the *Times* and the *P-I* -- November 21, 2000
Picket lines were established around both newspapers' buildings
Teamsters Local 174 which represented approximately eighty *Times* truck drivers
joined the strike
Teamsters Local 763, which represented 180 other drivers reached a settlement and did not strike
During the strike *Seattle Times* and *P-I* continued to publish
smaller editions of their newspapers using management employees
and replacement workers who remained on the job
these editions were delivered free to subscribers for a time
Pacific Northwest Newspaper Guild Local 82 began publishing its own *Seattle Union Record*
named after a labor newspaper published from [1899] to [1928]
during the strike, the new *Union Record* produced eighteen tabloid print editions and a Website
Seattle Mayor Paul Schell issued an order in support of the striking workers
prohibiting city workers and department heads from granting interviews
or providing information to reporters from the *Seattle Times* or the *P-I*
replacement newspaper workers and managers working as reporters
were not granted press credentials but they were allowed to attend news conferences
Schell later softened his stand to a personal refusal to grant interviews to replacement workers
U.S. Senator Patty Murray provided the assistance of a federal mediator
all sides of the labor dispute met in Washington, D.C. in an effort to achieve a settlement

SEATTLE NEWSPAPER STRIKE COMES TO AN END⁹⁴⁵

Pacific Northwest Newspaper Guild Local 82 settled with the *Seattle Post-Intelligencer*
for a \$3.30 an hour raise phased in over six years -- December 28, 2000
Seattle Times workers stayed out on strike pending resolution of issues
regarding the retention of replacement workers and the rehiring of strikers
Local 82 settled with the *Times* -- January 9, 2001

TWO VACANCIES AGAIN TIES THE STATE HOUSE OF REPRESENTATIVES

Because state House of Representative members serve two-year terms,
the tie created in the [2000] election would normally have lasted
until the regular [2002] House election
but two Snohomish County House seats became vacant in 2001
Democrat Patricia Scott Of the 38th Legislative District died -- January 7, 2001
Republican Renee Radcliff of the 21st Legislative District surprised colleagues
by resigning midway through her term -- January 10, 2001
Republican Joe Marine was appointed to the vacant seat --January 10, 2001
Snohomish County activist Democrat Jean Berkey
was appointed to Patricia Scott's seat -- January 25, 2001

⁹⁴⁵ Dave Wilma, *Pacific Northwest Newspaper Guild strikes The Seattle Times and the Seattle Post-Intelligencer beginning on November 21, 2000*, Essay 2945, HistoryLink.org, January 17, 2001

Political leadership of the State House of Representatives remained tied
Democrat Frank Chopp and Republican Clyde Ballard
continued to share House Speaker duties

NISQUALLY EARTHQUAKE SHAKES SOUTHERN PUGET SOUND

Olympia was rocked by a 6.8 magnitude earthquake -- 10:54 a.m. February 28, 2001
legislators, government workers, visiting school children and other tour groups
flooded out of the capitol and other buildings -- the state Senate was in session
this was one of the largest recorded earthquakes in Washington state history
and lasted approximately forty-five seconds
its epicenter was Anderson Island, about eleven miles northeast of Olympia
This quake caused some property damage in Seattle and surrounding areas
although there were no reports of deaths directly from the earthquake, local news outlets
reported there was one death from a heart attack at the time of the earthquake
about 400 people were injured
Nisqually earthquake caused approximately \$305 million of insured losses
and a total of \$2 billion worth of damage in the state of Washington
which was declared a natural disaster area by president George W. Bush
most of the property damage occurred very near the epicenter
or in unreinforced concrete or masonry buildings,
air traffic control tower at Sea-Tac Airport was heavily damaged,
one buttress splintered under the dome of the capitol building in Olympia
but serious harm to the building and its magnificent dome was prevented
by the original builders' superior craftsmanship
and previous earthquake-resistance work

BOEING ANNOUNCES IT WILL MOVE ITS COMPANY HEADQUARTERS

Boeing had been a financial mainstay in the Seattle area since its incorporation
as the Pacific Aero Products Company in [1916]
When company chairman and chief executive, Philip M. Condit announced
Boeing was moving its headquarters to a new location
people in Washington state were stunned -- March 21, 2001
Condit said he sought a **“leaner corporate center”** that would give Boeing
greater **“flexibility to move capital and talent to the opportunities that maximize
shareholder value.”**⁹⁴⁶
Boeing said it had no plans to move its giant commercial aircraft unit
which manufactures the Boeing 737, 747 and 767 out of the Seattle area
Boeing insisted the impact on the Seattle economy would be modest
as only about 500 jobs were scheduled to be moved to the new headquarters

TECHNOLOGY HELPS A NEW GREEN RIVER TASK FORCE

Almost twenty years after the first known Green River murder,

⁹⁴⁶ Sam Howe Verhovek with Laurence Zuckerman, *The New York Times*, March 22, 2001.

Detective Dave Reichert, who had become the sheriff of King County,
began renewed investigations into the murders

it was a case he refused to let go of and he remained determined to find the killer
this time the task force had technology on their side⁹⁴⁷

King County Sheriff Reichert formed a new task force team, consisting of six members -- April 2001
including DNA and forensic experts and a couple of detectives

DNA technology had advanced considerably over the past fifteen years
it was not long until the task force grew to more than thirty younger detectives
many of whom had been teenagers when the killings first began⁹⁴⁸

all the evidence from the murder examination was re-examined
this group had computers to help create profiles based on the old evidence
some of the forensic samples were sent to the labs

PAUL ALLEN FOUNDS VUCLAN INC.

Microsoft co-founder Paul Allen created Vulcan Inc.

his investment and management company headquartered in Seattle [1986]

Investments were made in such enterprises as:

- more than 140 media companies including:
 - Charter Communication* provides cable television, high-speed Internet and telephone services to more than 4.7 million customers in twenty-five states,
 - DreamWorks Animation SKG*, an animation studio that creates animated feature films, television programs, and online virtual works including *Shrek*, *Madagascar*, *Kung Fu Panda* and *How to Train Your Dragon*,
 - Oxygen Network*, a cable television channel marketed toward women,
 - Rose City Radio Corporation* which owns several radio stations, including: KXTG-AM and KXJM-FM in Portland, Oregon,
 - The Spring News* and *Sporting News Radio* which delivers innovative closed-circuit broadcasts to spectators attending premier sporting events,
 - museums, theatres and galleries:
 - Seattle Cinerama Theater is one of only three movie theaters in the world still capable of showing three-panel Cinerama films,
 - The Hospital studios and gallery is a private club in London, England that provides a creative arts venue which houses a television studio, music studio, screening room, restaurant and art gallery, members include novelists, journalists, artists, producers, musicians and film makers,
 - Experience Music Project (EMP) and Science Fiction Museum and Hall of Fame in Seattle is a critically acclaimed interactive museum of music, popular culture and science fiction,
- Allen, a longtime rock music fan with his own band, funded the purchase of many Jimi Hendrix artifacts including the guitar Hendrix played at Woodstock,

⁹⁴⁷ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

⁹⁴⁸ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

- Living Computer Museum located south of downtown Seattle
is a collection of restored vintage timesharing computer equipment,
 - Flying Heritage Collection in Everett, Washington
is an assemblage of rare World War II aircraft restored to flying condition,
 - Paul Allen donated \$18 million to build a new library
at the University of Washington that was named after his father: Kenneth S. Allen,
 - medical research facilities:
 - University of Washington Medical School received millions of dollars for specific research,
 - Fred Hutchinson Cancer Research Center has received millions of dollars
for early cancer detection,
 - Internap Network Services Corporation in Atlanta, Georgia [1996]
enables route-optimized delivery of content over the Internet including cloud computing,
 - Allen Institute for Brain Science in Seattle, [2003]
is dedicated to accelerating the understanding of how the human brain works,
 - Allen Spinal Cord Atlas [2008] conducts research to unlock
mysteries of the spinal cord and how it is altered during disease or injury
seven brain atlases have been published free -- these are available for public use online,
 - Washington State University Paul G. Allen School for Global Animal Health [2008]
works to enhance and expand Washington's global health impact
Washington State University has become a leading center for global health activities,
 - PTC Therapeutics in South Plainfield, New Jersey, [2009]
is a pharmaceutical company concentrating on treating genetic disorders;
 - Stratolaunch Systems in Huntsville, Alabama [2011]
is a space transportation venture specializing in "air launch to orbit"
research and development,
 - Paul Allen is also involved in space exploration with the Allen Telescope Array [2007]
ATA is a group of telescopes operated by the University of California, Berkeley
that combine their signals and provide a resolution equivalent to that
of a telescope with a diameter equal to the total area of all of the telescopes,
ATA will be used for astronomical observations
and a simultaneous search for extraterrestrial intelligence,
- Vulcan Capital, the investment arm of Allen's Vulcan Inc., ventures include:
- real estate such as 505 Union Station and Union Station (Seattle),
Sammamish Park Place, South Lake Union in Seattle
and numerous other projects across the nation;
- Paul Allen has channeled funds into entertainment and sporting ventures:
- he purchased the National Basketball Association's *Portland Trailblazers* for \$70 million [1988]
Allen often flies the team to games in his private jet;
 - he also was instrumental in the development and funding of their entertainment complex
the \$262 million *Rose Garden*;
 - he purchased the Seattle Seahawks National Football League team [1997]
when former owner Ken Behring threatened to move the Seahawks to Southern California;
 - Allen played a large part in the development of the new Seahawks' stadium,
CenturyLink Field (now Lumen Field) although it was funded largely by tax revenue

INDIANS AGAIN SUE THE STATE OF WASHINGTON⁹⁴⁹

Indians were joined by the federal government in filing suit against Washington State
suit asked the court to order the state to repair culverts running under state roads
if they blocked salmon from reaching spawning grounds -- 2001
Washington planned to repair the culverts -- but over a long period
to spread the tremendous cost over decades
tribes were concerned the salmon populations would be extinct
before the culvert repairs could make a difference
Northwest Indian Fisheries Commission staff helped the tribes coordinate their case
and provided expert testimony during the trial
(Judge Ricardo S. Martinez handed down a summary judgment in the case,
known as the *U.S. v. Washington Culverts Case*, in favor of the tribes [2007])

TWO WASHINGTON STATE SCHOOL DISTRICTS GO ON STRIKE

Prosser School District was struck by its teacher for one day -- September 2001
no court order to return to work was issued
Hoquiam School District was struck by its teachers for fourteen days
no court order to return to work was issued

FIRST REAL BREAK IN THE GREEN RIVER KILLINGS CASE TAKES PLACE

King County Sheriff Dave Reichert received news from the crime labs
that reduced the hardened detective to tears -- September 2001
there was a DNA match found from samples taken from the victims and Gary Ridgway⁹⁵⁰

BOEING FACES MAJOR CHANGES

Boeing has gone through a process designed to tie various branches of the company
more closely together
Boeing announced plans to move its corporate headquarters from Seattle to Chicago [March 2001]
new Boeing World Headquarters offices opened -- September 4, 2001
Boeing also merged the company's space, defense, government, intelligence
and communications divisions into one business unit
called Integrated Defense Systems headquartered in St. Louis, Missouri

DEMOCRATS TAKE THE MAJORITY OF THE STATE HOUSE OF REPRESENTATIVES

Because State Representatives serve two-year terms membership normally would remain tied
but as required by the state constitution a special election was held -- November 1, 2001
to fill the two seats that had been filled by appointment [January 2001]

In the special election

Democrat Jean Berkey was narrowly elected to the 38th Legislative District seat she had held

⁹⁴⁹ Jennifer Ott, *Northwest Indian Fisheries Commission*, Essay 9786, HistoryLink.org, March 28, 2011.

⁹⁵⁰ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

Mukilteo Mayor Democrat Brian Sullivan narrowly defeated Republican Joe Marine in the 21st Legislative District giving Democrats a 50-48 majority and giving Democrats control of the State House of Representatives

With their new majority, House Democrats elected Frank Chopp as the sole Speaker of the House at the start of the 2002 session

Frank Ballard retired at the end of his term following that session (Democrats increased their majority in the State House of Representatives over the next several elections)

Frank Chopp remained the longest serving Speaker of the House and one of the most powerful politicians in the state until [2020])

GARY RIDGWAY IS CHARGED WITH AGGRAVATED MURDER

Gary Ridgway, a married man from Auburn, worked for a computer company at the time of his arrest

he was stopped on his way home from work by Green River Killer task forces members

He was arrested four counts of aggravated murder -- November 30, 2001⁹⁵¹

Gary Ridgway was jailed without bail

Worried that DNA could confuse a potential jury, the lead detective wanted more evidence

he interviewed Ridgway's ex-wives and old girlfriends and discovered

Ridgway had taken one girlfriend for picnics

in various areas he had used to cluster the bodies of his victims.⁹⁵²

MURDER CHARGES ARE FILED AGAINST GARY RIDGWAY

King County Prosecutor Norm Maleng filed aggravated first-degree murder charges against Ridgway in the deaths of Marcia Chapman, Opal Mills, Cynthia Hinds and Carol Ann Christensen

these were cases in which there was a DNA match with Ridgway⁹⁵³ -- December 5, 2001

GARY RIDGWAY HAS HIS FIRST DAY IN COURT

Gary Leon Ridgway's family hired defense attorney Anthony "Tony" Savage, a giant bear of a man who vehemently opposed the death penalty and spent a large part of his career fighting against it

Superior Court Judge Brian Gain appointed a defense team for Gary Ridgway -- December 16, 2001

Tony Savage was joined by public defenders Todd Gruenhagen and Mark Prothero and private attorney Michele Shaw, two investigators and several legal staff members

Judge Gain ordered the county to provide almost \$300,000 for "expert services," which could include work such as DNA analysis (*Seattle PI*)

Defending the man charged with four Green River slayings would cost King County nearly \$1 million even before the case went to trial

⁹⁵¹ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

⁹⁵² Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

⁹⁵³ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

(Gary Leon Ridgway plead not guilty [December 18])

GARY LEON RIDGWAY LEADS A TROUBLED LIFE

Had been born in Salt Lake City, Utah [February 18, 1949] to a domineering mother
and a truck driving father who was away from home a great deal

When Gary was eleven, the family moved from Utah to Washington State

Ridgway was a poor student, suffering from a below average I.Q. of 82 and dyslexia
at age sixteen he led a six-year-old boy into the woods

where he stabbed the child through his ribs and into his liver

(later the boy said Ridgway walked away laughing)⁹⁵⁴

Just out of high school, twenty-year-old Gary Ridgway

decided to join the Navy rather than get drafted

he also married his first steady girlfriend, Claudia Barrows, before going to Vietnam

Claudia, alone and nineteen-years-old, began dating while Ridgway was in Vietnam

in less than a year the marriage ended

Ridgway married Marcia Winslow and the couple had a son [1973]⁹⁵⁵

during the marriage Ridgway became a religious fanatic, proselytizing door-to-door,
reading the Bible aloud at work and at home,

he insisted Marcia follow the strict preaching of the church pastor

Marcia struggled with accepting Ridgway's relationship with his mother⁹⁵⁶

who controlled their spending and made the final decisions on their purchases

she went as far as buying Ridgway's clothing

Gary's mother also accused Marcia of not properly taking care of their son

Knowing Ridgway would never defend her, Marcia was left on her own

to try to control her domineering mother-in-law

Seven years into the marriage the couple divorced

later Marcia claimed that Ridgway placed her in a chokehold during one of their fights⁹⁵⁷

Body of Wendy Lee Caulfield was discovered [July 8, 1982]

Gary Ridgway worked as a truck painter for Kenworth Truck Company in Renton at the time

Ridgway owned many trucks during that time, one, a 1977 black Ford F-150,

allegedly was connected with some of the victims

FEDERAL GOVERNMENT ESTABLISHES ITS OWN EDUCATION STANDARDS

United States Congress changed the [1965] Elementary and Secondary Education Act

to support "standard-based education reform" on the premise that setting high standards
and establishing measurable goals would improve individual outcomes in education

this became known as "No Child Left Behind" (NCLB) -- January 8, 2002

NCLB required the states to develop an assessment of students' basic skills

although each state could develop its own standards, federal school funding required

⁹⁵⁴ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

⁹⁵⁵ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

⁹⁵⁶ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

⁹⁵⁷ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

these assessments be given to all students at all grade levels
NCLB expanded the federal government's role in public education
through annual student testing, recording annual academic progress and report cards,
evaluating teacher qualifications
and changing the basis of federal funding of education
Schools with a high percentage of students from low-income families were to receive
Title I federal funding if these students failed to meet "Adequate Yearly Progress"
they must receive free tutoring, offer after-school programs
or offer eligible children the chance to transfer to higher-performing local schools
NCLB imposed a system of incentives and penalties on educators
that sometimes motivated schools, school districts and states to manipulate test results
states that imposed high student standards
and did not demonstrate annual improvement suffered
states that accepted low student standards achieved their student educational goals
but at a cost to their students

WASHINGTON STATE FACES CONTINUING FINANCIAL PROBLEMS

Mounting fiscal pressures created by a stalled economy, rising unemployment rates,
a state budget deficit and an ever-growing transportation problem compounded financial needs
State legislators responded by reducing the state budget by approximately \$48.8 million
public school funding as the largest part of the state's budget took the greatest losses -- 2002

EDUCATION INITIATIVE FUNDS ARE INCLUDED IN THE NEW STATE BUDGET

295 school districts across the state reported how they had spent Initiative 728 money
to reduce class size, expand teacher training and build facilities
during the 2001-[2002] school year

thus displaying school district administrators' priorities:

- 53.3% was used to reduce class size,
- 14.4% was placed in reserve by school districts,
- 14.3% was used for professional development,
- 11.2% was used to expand learning opportunities for students,
- 3.7% went to improvements in facilities,
- 2.0% was categorized as "other,"
- 1.1% was allowed for early assistance for pre-kindergarten⁹⁵⁸

Initiative 732 provided for \$318 million of state general funds
to support cost-of-living raise raised for public education employees
however, a controversy emerged as to whether or not public school employees
was to be defined as funded by the state or must include staff members
who were employed in federal and local programs
filing a lawsuit to limit the employees eligible kept Initiative 723 from being implemented

⁹⁵⁸ Office of the Superintendent of Public Instruction, *Washington's Initiative 728: Examining the first year of implementation*.

ALTERNATIVE TESTING IS INCORPORATED INTO THE WASL EXAMINATIONS

Washington Assessment of Student Learning (WASL) testing of students' educational progress attempted to raise the standards demanded for class credit
higher demands resulted in increased frustration for students, parents and teachers
great numbers of students failed to meet the demands
Concerned parents and teachers demanded an alternative to the WASL examination
Washington Alternate Assessment System (WAAS) Portfolios
were incorporated as an alternative – 2002
portfolio assessment provided an alternative to the WASL examination
in fourth and seventh grades for students with significant cognitive disabilities

WASHINGTON STATE CAPITOL BUILDING IS RENOVATED

While work was in progress to upgrade the earthquake protection for the state capitol of major concern was the safety of the 26,000-metric ton dome held in place by gravity
the 6.8-magnitude [February 2001] Nisqually earthquake
caused the sandstone support columns to shift up to three inches
rendering the dome unsafe
a second extensive renovation of the capitol campus was begun -- 2002
this would replace the capitol's heating and cooling system, remove asbestos,
modernize electrical systems and repair damage caused by the Nisqually Earthquake
(when work was completed [2004] the capitol building and its dome were made safe [2003])

SEVERAL BOEING DIVISIONS REMAIN BASED IN THE PACIFIC NORTHWEST

Boeing Commercial Airplanes products included the 717, 737, 747, 757, 767, and 777 jetliners
and the Boeing Business Jet Division remained headquartered in the Pacific Northwest -- 2002
Boeing's Commercial Division began to build two new longer range jetliners,
the 747-400ER (extended range) and the 777-300 ER
Boeing Capital Corporation, the leasing and lending financial services arm of the company,
remained based in Renton
Boeing's global communications network which provides high-speed Internet, entertainment
and data services to mobile platforms is based in Seattle
Boeing Air Traffic Management which develops solutions for air traffic control and air operations
continues to be located in Bellevue
America's Chicago-based aviation giant that had evolved from combining rival companies
Boeing, Douglas, McDonnell and North Americans under the Boeing name
serves customers in more than 145 countries had operations in twenty-six states
and employees in more than sixty countries
Boeing is now a vast global enterprise building the future of flight on Earth and beyond

WASHINGTON STATE TEACHERS SUE TO RECEIVE A COST OF LIVING PAY RAISE

Washington Education Association which represented the state's teachers sued the state legislature
to force payment of the Cost of Living adjustments granted by the states' voters
with passage of Initiative 732 [in 2000] -- 2002
State Supreme Court justices ruled that all school employees must be funded

regardless of whether their salary was paid by the school district, state,
or federal governments

TWO WASHINGTON STATE SCHOOL DISTRICT FACE TEACHER STRIKES

Issaquah School District teachers struck for twenty days -- September 2002
when a court injunction was entered to end the strike the teachers voted to defy the order
however, the strike was settled before the first contempt of court order could be issued
forcing the strikers to go to jail
Snohomish School District teachers struck for twenty-one days
no court order was issued and the contract issues were negotiated to a successful resolution

GOVERNOR LOCKE SUSPENDS THE EDUCATION INITIATIVES APPROVED BY THE VOTERS

Democratic Governor Gary Locke proposed to suspend indefinitely the education mandates
demanded by voter approved in Initiative 728 and Initiative 732
as he claimed the necessary funds were not available -- December 20, 2002

TEACHERS HOLD THE LARGEST RALLY IN THE HISTORY OF THE STATE

Washington Education Association which represents the states' school employees
called for a **"day of action"** -- January 14, 2003
Rallies were held in Spokane, Kennewick and the largest protest rally in Olympia's history
which was attended by about 20,000 school district employees, students, parents,
administrators and school supporters to demand legislators up-hold the voter-approved
Initiative 728 [passed in 2000] that proposed construction of additional school facilities,
and a reduction of school class size
and Initiative 732 [passed in 2000] which funded cost of living pay adjustments
Schools in about 100 school districts were closed
many districts cancelled school willingly in support of their teachers
some students attended the rally
busloads of protestors began to arrive in Olympia by midmorning
some wore blue rain ponchos that read "Keep the Commitment"
by noon the Olympia's main street leading to the Capitol campus was clogged with people
Democratic Governor Locke refused to speak to the teachers directly

NEW STATE BUDGET CUTS FUNDS TO THE PUBLIC SCHOOLS

Funding for the state's public schools took a hit at all levels -- 2003
in addition, voter passed Initiative 728 reduce class sizes, extend learning programs,
expand teacher training and construct facilities would not be funded
nor would voter approved Initiative 732 to provide cost-of-living pay increases
to school employees

MAJOR CHANGES TO THE WASL TAKE PLACE

Listening testing was discontinued from the WASL examination after 2003
Science was added to the Washington Assessment of Student Learning (WASL) examination
tenth grade students were assessed in four subjects: reading, writing, math and science

in addition, eighth grade students also began testing but only in science -- 2003
(science testing in fifth grade began during the 2003-[2004] school year)

EAST HALF OF THE HOOD CANAL FLOATING BRIDGE IS REPLACED

Washington's Hood Canal Floating Bridge (officially the William A. Bugge Floating Bridge)
had been sunk by a [1979] windstorm

Repairs were undertaken -- 2003

east-half floating portion of the bridge, the east and west approach spans,
the east and west transition spans and the west-half electrical system were replaced
at a total cost of \$471 million paid for with state, federal
and Washington Department of Transportation funds
this project would require the bridge to close to traffic for five weeks
to allow for the old pontoons of the east-half to be cut away
and new pontoons floated into position, cabled together
and connected by cables to large anchors on the sea floor
transition spans and center draw span were also replaced during this closure

Pontoons and anchors for the bridge could not be built at the bridge site due to space limitations
different sites were evaluated -- Port Angeles graving dock was chosen
for its accessibility to water and land as well as the work force
before the land for construction could be purchased the National Historic Preservation Act
required archaeologists to perform a review of the historical site

“there was no evidence of historic properties or cultural resources”⁹⁵⁹

Within the first two weeks of construction of the pontoons and anchors for the bridge,
Native American artifacts were found at an ancestral burial ground
from an ancient village called Tse-whit-zen
all work at the site stopped and a government-to-government consultation process began
among the Lower Elwha Klallam Tribe, Washington State Department of Transportation,
Federal Highway Administration, Army Corps of Engineers
and the State Historical Preservation Office

Washington State Department of Transportation agreed to donate the site
to the Lower Elwha Klallam tribe, rebury all remains uncovered
and pay \$2.5 million in damages [August 14, 2006]

Governor Locke and State Transportation Secretary Douglas MacDonald announced that
Washington State Department of Transportation would stop pontoon and anchor construction
at the Tse-whit-zen site in Port Angeles [December 21, 2004]

Many construction sites to build the pontoons and anchors for the bridge were investigated
but the best option to be found was in Tacoma at Concrete Technology
(Hood Canal Floating Bridge, officially the William A. Bugge Floating Bridge
reopened [June 3, 2009])

PAUL ALLEN REACHES FOR THE FUTURE

Microsoft co-founder along with Bill Gates was estimated

⁹⁵⁹ National Historic Preservation Act Re-evaluation Consultation, Federal Highway Administration

to be the world's fourth wealthiest citizen worth \$21 billion -- 2003
He remained dedicated to developing new business and investment opportunities
he envisioned a "wired world" in which computers and related technology
would serve as the primary source of communication and information-gathering,
to achieve this goal Allen founded *Asymetrix*, which produced applications
that allowed both programmers and non-programmers to develop their own software
Vulcan Ventures, Allen's investment firm, then focused on the technology
Allen also invested in numerous companies, including Ticketmaster, America Online,
Egghead Software and Darwin Molecular Corporation, a pharmaceutical company
other investments focused on cable television, wireless modems, and Web portals
Allen plowed millions into brain research, space travel, and other ambitious, high-concept ventures
his most recent efforts include:

- SpaceShipOne -- the first privately-backed effort to successfully put a civilian
in suborbital space,
- Stratolaunch Systems -- an innovative airborne launch system that will
use the largest aircraft to ever be manufactured and will provide orbital access
to space with greater safety, cost-effectiveness and flexibility

GARY RIDGWAY FACES THREE MORE COUNTS OF AGGRAVATED MURDER

Paint samples matched with paint spray used at the Kenworth Truck Company in Renton
where Ridgway worked
Gary Ridgway was charged in the aggravated first-degree murder in deaths
of Wendy Lee Coffield, Debra Estes and Debra Bonner -- March 27, 2003
Ridgway pled not guilty to the charges
At the time forty-nine young women were listed as victims of the serial killer

UNIDENTIFIED HUMAN REMAINS ARE AGAIN DISCOVERED

Jane Doe "B-20" was discovered at a site off the Kent Des-Moines Road -- August 3, 2003
location of the skeletal remains was explained by Gary Ridgway
he described her as white, sixteen to twenty years old, skinny
with brownish blond shoulder length hair
he could not remember if he had killed her in 1982 or 1983 but it could have been
"as far back as the seventies"
DNA from the remains did not match the bones with any of the official Green River victims

GARY RIDGWAY CONTINUES TO COOPERATE WITH INVESTIGATORS

Gary Ridgway, the Green River Killer, knew he would face execution -- he did not want to die⁹⁶⁰
in a plea bargain, he agreed to provide complete, truthful and candid information
concerning the crimes that he had committed in King County
and answer all questions during interviews conducted by the detectives prosecuting attorney
in exchange for a life sentence -- King County Prosecutor Norm Maleng agreed to the offer
For months detectives methodically interviewed Ridgway

⁹⁶⁰ Charles Montaldo, crime.about.com/od/serial/a/Gary-Ridgway.htm

gathering the details of each of the murders he committed
sometimes he killed his victims inside his house, other times he would kill them in the woods
Ridgway took them to locations where he had left several of the bodies
he disclosed how he killed each one and the evidence he left to throw off police
Detectives and search crews found human skeletal remains in a wooded area
near Highway 410 east of Enumclaw -- August 16, 2003

GREEN RIVER KILLER GARY RIDGWAY CONFESSES TO KILLINGS WITHOUT BODIES

Kase Ann Lee was victim number seven of the Green River Killer

Kase Ann, age sixteen, was last seen by her husband who gave her \$20 to go to a nearby grocer
to buy ground beef and other supplies for their dinner [August 28, 1982]
she left their apartment on South 208th Street in what is now Sea-Tac, Washington
without making it to the store she and vanished
when Kase did not return that night, her husband phoned her mother
who then called the Sheriff's office and filed a missing persons report
Gary Ridgway confessed to strangling Kase Ann Lee to death [2002]
but he could not recall the location of her remains

Keli Kay McGinness was victim number thirty

Keli's parents divorced when she was almost three years old
her mother, a talented singer and owner of several restaurants in Washington and Oregon
remarried -- her step-father was a teacher
at age of thirteen while babysitting, Keli was gang-raped by a group of drunken boys
she was too afraid to testify and soon after ran away from home for good
Keli her two children at home and last seen standing by the street
on South 216th Street and Pacific Highway South (about 7:30 p.m. [June 28, 1983])
Gary Ridgway admitted to killing Keli Kay McGinness by strangulation
but her remains have never been found and he is uncharged for her murder at this time

Patricia Anne Osborn, age nineteen, was the thirty-first victim of the Green River Killer

she grew up with a single mom with whom she was very close
but when she hit her teenage years she began to rebel and experiment with drugs
she always maintained contact with her mother with frequent phone calls and birthday cards
Patricia Anne was last seen in the area of North Aurora Avenue in Seattle [October 20, 1983]
headed to a nearby restaurant -- was never seen again
Ridgway told police he remembered picking up and killing a woman in that area at that time
but he did not recall where he left her remains
with no evidence against him, he remains uncharged to date in Patricia's murder

WASHINGTON STATE TEACHER STRIKES CONTINUE

Lake Stevens' teachers called a strike to protest the failure of the school district
to provide an acceptable contract -- 2003
this strike lasted for fourteen days and was settled without court-ordered action
Marysville School District teachers struck for a record setting forty-nine days -- 2003
Marysville Teacher Association members cited three points
that could not be resolve through contract negotiation:

- Marysville School District wanted to shift from local pay schedule to the state schedule;
- Marysville School District wanted to add to workdays without added pay;
- Marysville School District resisted union demands for increase

locally supplemented pay and health care benefit contributions

Governor Gary Locke appointed a fact-finding team that chastised both sides

it recommended the teachers return to work and continue negotiating -- this was rejected
an investigation by retired State Supreme Court Justice Robert Utter

and former state legislator (and later Congressman) Denny Heck supported the teachers
after a court injunction forced the teachers back into their classrooms the district superintendent
and three school board members had been replaced

and the two incumbent board members were under fire from the public

GARY RIDGWAY ENTERS A GUILTY PLEA

Ridgway pled guilty to forty-eight charges of aggravated first degree murder -- November 2, 2003
each committed in King County

He also confessed to moving body parts to Oregon to throw off the investigation
and to having sex with six of the bodies after he had killed them

GARY RIDGWAY AVOIDS THE DEATH PENALTY

Gary Leon Ridgway, age fifty-four, avoided the death penalty in King County -- November 5, 2003
by confessing to the murders of forty-eight women,
most of whom were murdered in [1982-1984]

for his cooperation in locating the missing bodies and describing his crimes

Ridgway received forty-eight life sentences with the possibility of parole

however, because some of the victims were buried and possibly killed in Oregon

and other areas outside of King County, Ridgway could face the death penalty there

Families of the victims were angry and legal scholars were confused

they had been led to believe that prosecutors would seek the death penalty⁹⁶¹

legal scholars wondered, if a man who premeditatedly murders forty-eight women

does not get the death penalty then who would

(Gary Ridgway is currently at the Washington State Penitentiary in Walla Walla

FULL EXTENT OF GARY RIDGWAY'S CRIMES ARE NOT KNOWN

In the released video tapes taken as Ridgway detailed the murders to investigators -- 2003

he confessed once to killing sixty-one women and in another tape he said it was seventy-one

But at the conclusion of the interviews, Ridgway could only recall forty-eight murders

all of which he said occurred inside King County

in an effort to avoid the death penalty in other jurisdictions

he refused responsibility for seven victims previously attributed to the Green River Killer

GARY RIDGWAY CLAIM RESPONSIBILITY FOR FOUR SETS OF UNIDENTIFIED REMAINS

⁹⁶¹ Rachael Bell, *Green River Killer: River of Death*,
www.trutv.com/library/crime/serial_killers/predators/greenriver/routine_2.html

While Gary Ridgway will claim responsibility for four sets of unidentified remains -- 2003 he will not enter pleas to seven deaths previously attributed to the Green River Killer however, he remains a suspect in those deaths:

Amina Agisheff, age thirty-six last seen leaving her Seattle apartment [July 7, 1982]

her remains were found near Highway 18 and Interstate 90 [April 18, 1984]

Kassee Ann Lee, sixteen, was last seen at her south King County home at 11:30 a.m.

by her husband [August 28, 1982] at her south King County home by her husband

her remains have not been found

Rebecca T. Marrero, twenty, was last seen [December 3, 1982]

at the Western Six Motel on Pacific Highway South

her remains have not been found

Tammie Charlene Liles, sixteen, was last seen in downtown Seattle [June 9, 1983]

her remains were found in Tualatin, Ore., south of Portland [April 23, 1985]

Keli K. McGinness, eighteen was last seen on Pacific Highway South [June 28, 1983]

her remains have not been found

Patricia Anne Osborn, nineteen, was last seen on Aurora Avenue North

in Seattle [October 20, 1983]

her remains have not been found

and one final set of unidentified remains

(There still an unsettling aspect to the case as Ridgway went into a killing frenzy [1982-1984] and then stopped completely, until he murdered once more [1990] and then once again in [1998] this does not fit the pattern of a serial killer

occasionally when there is a great deal of police activity they slowed down

but not really stop)

OTHER VICTIMS OF THE GREEN RIVER KILLER CONTINUE TO BE DISCOVERED

Gary Ridgway is suspected of murdering other women although no charges have been filed -- 2003

Unidentified Female, age 13-24, disappeared [1973-1993]

her remains were found [August 2003]

Unidentified White Female, 14-18, disappeared sometime [December 1980- January 1984]

her remains were found [January 2, 1986]

Amina Agisheff, age thirty-five, disappeared [July 7, 1982]

her remains were found [April 18, 1984]

Kristi Lynn Vorak, age thirteen, disappeared [October 31, 1982]

her remains have not yet been found

Rebecca "Becky" Marrero, age twenty, disappeared [December 3, 1982]

her remains were found [December 21, 2010]

Kelly McGinness, age twenty-two, disappeared [June 28, 1983]

her remains have not yet been found

Angela Marie Girdner, age sixteen, disappeared [July 1983]

her remains were found [April 22, 1985]

Patricia Ann Leblanc, age fifteen, disappeared [August 12, 1983]

her remains have not yet been found

Kassee Ann Lee (Woods), age eighteen, disappeared [August 28, 1983]

her remains have not yet been found
Patricia Osborn, about nineteen, disappeared about [October 20, 1983]
her remains have not yet been found
Rose Marie Kurrana, sixteen, disappeared [August 26, 1987]
her remains were found [August 1987]
Marta Reeves, age thirty-six, disappeared [March 5, 1990]
her remains were found [September 20, 1990]
Darci Warde, age sixteen, disappeared [April 24, 1990]
her remains have not yet been found
Cora McGuirk, age twenty-two, disappeared [July 12, 1991]
her remains have not yet been found
April Dawn Buttram, age sixteen, disappeared [August 18, 1983]
her remains were found [August 30, 2003]
Patricia Yellowrobe, age thirty-eight, disappeared [January 1998]
her remains were found [August 6, 1998]

RENOVATION OF THE STATE CAPITOL BUILDING IS COMPLETED

After the [2001] Nisqually Earthquake the three-year rehabilitation and earthquake-repair project was completed -- 2004

This \$120 million project added modern heating and cooling, plumbing, fire protection and state-of-the-art wireless technology systems, while maintaining historic features it also repaired earthquake damage, improved accessibility, added new public space, and made additional seismic and security upgrades
more than eighty percent of the construction waste was recycled
8,000 tons of wood, concrete, paper, bricks, dirt, metal and drywall
renovated Legislative Building is comprised of more than 173 million pounds of stone, brick, concrete and steel
it is the fourth tallest masonry dome in the world, rising 287 feet high
144 solar panels were placed atop the fifth-floor roof of the building
this is the largest array of solar panels on a capitol in the United States

WASHINGTON STATE EDUCATION ASSOCIATION PASSES A SPECIAL DUES ASSESSMENT

Delegates attending the Washington Education Association's annual state convention -- May 2004 voted in increase in their union dues to launch a legal battle over inadequate school funding
this money was used to form a coalition of parents, school district and education supporters that sued the state legislature to adequately fund the public schools
(this case ultimately reached the State Supreme Court [in 2010])

U.S. NAVY DEVELOPS NAVAL BASE KITSAP ON THE KITSAP PENINSULA

This base resulted from the merger of the former Naval Station Bremerton with Naval Submarine Base Bangor -- 2004
Naval Base Kitsap is the third-largest Navy base in the United States and the largest naval organization in Navy Region Northwest
it is composed of installations at Bremerton, Bangor, and Keyport, Washington

Naval Base Kitsap is the home base for the Navy's fleet throughout West Puget Sound
it provides base operating services including support for both surface ships
and Fleet Ballistic Missile and other nuclear submarines stationed at Bremerton and Bangor
it is one of the U.S. Navy's four nuclear shipyards and is one of two nuclear-weapons facilities
it also has the only West Coast dry dock capable of handling a Nimitz-class aircraft carriers
and houses the Navy's largest fuel depot

WASHINGTON STATE GENERAL ELECTION RESULTS

Democrats retained control of the state's congressional delegation -- November 2, 2004

Democratic Senator Patty Murray easily defeated

Republican U.S. Representative George Nethercutt to become only the fourth senator
from the state to win a third consecutive term Democrat;

National House of Representatives election saw six Democrats and three Republicans elected

- Democrat Jay R. Inslee was elected in the First Congressional District;
- Democrat Rick Larsen was elected in the Second Congressional District;
- Democrat Brian Baird was elected in the Third Congressional District;
- Republican Doc Hastings was elected in the Fourth Congressional District;
- new comer Republican Cathy McMorris was elected in the Fifth Congressional District;
- Democrat Norman Dicks was elected in the Sixth Congressional District;
- Democrat Jim McDermott was elected in the Seventh Congressional District;
- new comer Republican Dave Reichert was elected in the Eighth Congressional District;
- Democrat Adam Smith was elected in the Ninth Congressional District

Democrat John Kerry won the state's eleven electoral votes

but lost the national presidential election to Republican George W. Bush

BALLOT ISSUES DREW A GREAT DEAL OF VOTER ATTENTION

Two initiatives to the people were overwhelmingly approved by the voters -- November 2, 2004

Republican and Democratic parties joined forces to attack Initiative 872

sponsored by the Washington State Grange

and approved by nearly sixty percent of the voters

Initiative 872 established a top two primary election to replace the popular "Blanket" primary
which the federal courts invalidated [in 2003] at the urging of the political parties

"blanket primary" elections had been adopted in Washington in [1935]

with support of the Washington State Grange

it allowed a voter to select candidates from different political parties

with the highest vote-getter in each party for a particular office

advancing to the general election

thus the Democrat and Republican with the most votes for an office advanced

regardless of the party affiliation of the voter -- voters could "cross over"

Republicans quickly joined by the Democrats filed suit and won an injunction

against the top two primary before it could be used in the [2005] election

three years later the United States Supreme Court reversed the lower courts

and allowed the primary system enacted by I-872 to proceed [March 2008]

Washington's first top two primary was held [August 19, 2008]

Initiative 297 was intended to clean up the Hanford nuclear site
it received more “Yes” votes than any initiative in the state's history, with sixty-nine percent
but within days of the vote the federal government brought a lawsuit to overturn I-297
which prohibited the U.S. Government from sending out-of-state nuclear waste to Hanford
until existing waste there was cleaned up
U.S. District Judge Alan McDonald [in 2006] ruled that I-297
violated the supremacy clause of the United States Constitution
(under which federal law pre-empts state regulation)
and commerce the clause (forbidding state interference with interstate commerce)
that ruling was affirmed by the Ninth Circuit Court of Appeals [2008]
and the State Attorney General's office chose not to appeal to the Supreme Court
ironically, on the same day that I-872 was finally implemented

CLOSEST EVER GOVERNOR’S RACE IS DECIDED

Washington State’s governor’s race was the closest in the nation’s history -- November 2, 2004
as Democratic Attorney General Christine Gregoire
virtually tied with Republican former State Senator Dino Rossi
with about two percent of the voters favored Libertarian Ruth Bennett
when all thirty-nine counties completed their initial vote count [November 17, 2004]
Rossi had a lead of 261 votes, with 1,371,414 to 1,371,153 for Gregoire
and 63,346 for Libertarian Bennett
because the leading candidates were separated by fewer than 2,000 votes
state law required a machine recount of the ballots
in that count, Rossi gained 1,070 votes but Gregoire gained 1,289 votes
whittling Rossi's lead to only forty-two votes
although Republican Secretary of State Sam Reed certified that result [November 30]
state law allowed any candidate or party to request an additional recount if they paid for it
this payment would be refunded if the recount changed the outcome
Democrats requested and paid for a manual (hand) recount
this was completed [December 23, 2004]
it showed that Gregoire had won by 129 votes, as she picked up another 919 votes
while Rossi’s total increased by only 748 votes
final results were: Gregoire 1,373,361 votes (48.8730 percent);
Rossi 1,373,232 votes (48.8685 percent); and Bennett 63,465 votes (2.2585 percent)
Secretary of State Reed granted Gregoire a certificate of election,
State Legislature approved the election results
and Gregoire was sworn in as governor [January 12, 2005]
Even before Gregoire took office, Republican leaders challenged the election results in the media
and in a lawsuit filed in Chelan County asserting that hundreds of convicted felons voted illegally
(Washington law requires felons to have their civil rights restored before they can vote)
they charged many other irregularities particularly in the Democratic stronghold of King County
After a trial lasting two weeks Superior Court Judge John Bridges rejected the Republican claims
Bridges ruled the King County errors were significant
but not the result of fraud or intentional manipulation

no evidence was presented, except in five instances, that showed which gubernatorial candidate (if any) the 1,678 illegal votes identified were cast since the Democrats introduced declarations from four felons that they voted for Rossi (and one who voted for Bennett), Bridges deducted those votes from the official totals, Governor Gregoire was left with a final margin of 133 votes the closest in any gubernatorial election in United States history

LEGISLATORS CREAT THE “WASHINGTON LEARNS STEERING COMMITTEE”

Washington State’s Legislature passed SB (Senate Bill) 5441 -- April 18, 2005

this created the “Washington Learns Steering Committee” to develop a final report providing long-term recommendations for creating a world-class, learner-focused, seamless education system for Washington

this transformation of the entire education system required sustained participation by state and local governments, by parents, caregivers, teachers and community members, by business and private enterprise, by every level of educational institution, and by students themselves

the goal of the “Washington Learns Steering Committee” was to develop a new education system **“that will excite learners, invigorate teachers and impress employers”**⁹⁶²

Members of the Washington Learns Steering Committee included:

- the governor who chaired the steering committee;
- the director of the office of financial management;
- two members from the house of representative -- one appointed by each major caucus;
- two members from the senate -- one appointed by each major caucus;
- four citizens appointed by the governor;
- the chairs of each of three advisory committees:
 - superintendent of public instruction shall chair the “Advisory Committee on K-12”
 - chair of the “Advisory Committee on Early Learning” shall be the nongovernmental co-chair of the newly-created “Washington Early Learning Council”
 - chair of the “Advisory Committee on Higher Education” shall be selected by the governor from a list of three names submitted:
 - by the higher education coordinating board,
 - by the state board for community and technical colleges
 - and the council of presidents

(With an abundance of politicians represented there seemed little room at the table for students whose lives were impacted by the proposed changes in the “new education system,” administrators and teachers who would implement the new system or parents who would see firsthand the results of the educational innovation)

WASHINGTON STATE IMPLEMENTS NEW PRIMARY ELECTION LAWS

State legislators passed two sets of new primary election laws -- April 24, 2005 with the governor to make the final choice

One system: the “nonpartisan Blanket” Primary Election system or “Top Two” system

⁹⁶² Engrossed Second Substitute Senate Bill 5441 as passed April 18, 2005

all candidates for office run against each other without regard to political party affiliation
top two candidates receiving the most votes moves to the General Election ballot
thus a candidate from each political party may be selected
as could two candidates from the same party
this system was advocated by Republican Secretary of State Sam Reed
Another system, the “Open Primary” was offered as an alternative choice
voters select the ballot for one of major political parties
and vote for one of the candidates listed by their party running for each office
while the ballot for the other political party is never seen
each party’s candidate who received the most votes for an office
would run against the other party’s candidate in the General Election
Washington’s Democratic Governor Gary Locke vetoed out nonpartisan blanket primary option
leaving the Open Primary as the election system to select candidates for the General Election
In response Initiative 872 was filed by the Washington State Grange
to implement the “nonpartisan Blanket” Primary Election system [2004]
advocates of the Open Primary system sued in federal court to stop the Initiative

STUDENTS FAILING THE WASL CREATES SERIOUS PROBLEMS

When a high percentage of high school sophomores failed the high-stakes WASL examinations
educators and legislators faced a crisis
students who failed could not receive a high school diploma
It was decided that juniors and seniors who had failed the WASL as sophomores
would be allowed to retake the WASL examination -- May 2005

CONVICTIONS IN THE FORT LAWTON CASE ARE OVERTURNED

U.S. Rep Jim McDermott (D-WA) introduced HR 3174 -- July 1, 2005
demanding that the United States Army reopen the [1944] Fort Lawton case
this bill, with dozens of co-sponsors, remained in the House Armed Services Committee
until the chairman of that committee, U.S. Rep. Duncan Hunter (R-California)
received a letter from constituent Julianna Hamann -- author Jack Hamann’s mother
Jack Hamann and his wife Leslie wrote a book about the [1944] riot and lynching at Fort Lawton
based on General Elliot Cooke’s newly-declassified report to the Army Inspector General
On American Soil: How Justice Became a Casualty of World War II [2006]
After the House Armed Services Committee staff vetted the book,
Rep. McDermott and Rep. Hunter agreed [June 8, 2006]
to exercise a Congressional privilege allowing them to insist that
US Army Board for Correction of Military Records (ABCMR) review the convictions
ABCMR ruled unanimously [October 26, 2007] that Leon Jaworski committed an “egregious error”
in his prosecution of the Fort Lawton case
particularly by refusing to make General Cooke’s Report available to the defense
ABCMR called the trial “fundamentally unfair,”
convictions of all twenty-eight of the Fort Lawton defendants were overturned
they also ordered that defendants be issued retroactive honorable discharges
in addition, the surviving defendants or the estates of those who have since died

were entitled to “all rights, privileges and property lost as a result of the convictions,”
including “all due pay and allowances”

U.S. Representative Jim McDermott introduced HR 5130 in the House [January 23, 2008]

which authorized the US Army to pay interest on the Fort Lawton awards

Sen. Bill Nelson (D-FL) introduced companion bill S 2548 in the Senate

these bills were approved by the Armed Services Committees of both houses

and were supported by testimony from Secretary of the Army Pete Geren

who called Private Samuel Snow’s small check “a travesty of justice”

U.S. Army had located two living defendants [summer 2008]

Samuel Snow of Florida and Roy Montgomery of Illinois

plus the families of ten others who had since died

King County Executive Ron Sims and Seattle Mayor Greg Nickels organized a tribute

to the Fort Lawton defendants and their surviving families [July 26, 2008]

which was held at Seattle’s Discovery Park near the former Fort Lawton chapel

this featured a dinner, parade, formal military ceremony

and a Catholic mass honoring the memory of Guglielmo Olivotto

at the military ceremony, Assistant Army Secretary Ronald James offered a tribute,

including an apology and the presentation of belated honorable discharges

During the morning of the Seattle military ceremony, Samuel Snow became ill

only hours later, his family brought his honorable discharge to his hospital bedside,

where he held it to his chest and smiled broadly

that same evening, he died of heart failure, with his wife and son at his side

he received a burial with full military honors

Duncan Hunter National Defense Authorization Act

was signed by President George W. Bush signed [October 14, 2008]

this bill included legislation authorizing the army to add tens of thousands of dollars interest
to the Fort Lawton veterans’ awards

“WASHINGTON LEARNS STEERING COMMITTEE” GIVES ITS FINAL REPORT

Members of the “Washington Learns Steering Committee” reported a set of ten-year goals -- 2006

1. Parents will be their children’s first and best teachers, and will have the support they need to help their children “learn to learn” in their first years of life.
2. Families will have access to high-quality, affordable child care and early education programs staffed by providers and teachers who are adequately trained and compensated.
3. All children will enter kindergarten healthy and emotionally, socially and cognitively ready to succeed in school and in life.
4. All students will transition from third grade with the ability to read well and do basic math, and with the ability to actively participate in a learning environment.
5. All students will transition from eighth grade with demonstrated ability in core academic subjects, citizenship skills and an initial plan for high school and beyond.
6. All students will graduate from high school with an international perspective and the skills to live, learn and work in a diverse state and a global society.
7. All students will complete a rigorous high school course of study and demonstrate the abilities needed to enter a post-secondary education program or career path.

8. All Washingtonians will have access to affordable post-secondary education and workforce training opportunities that provide them with the knowledge and skills to thrive personally and professionally.
9. Washington will have a well-trained and educated workforce that meets the needs of our knowledge-based economy.
10. Academic research will fuel discoveries and innovations that allow Washington businesses to compete globally.

STATE LEGISLATORS MAKE A COMMITMENT TO FUND EDUCATION

Any new funding structure was missing from the “Washington Learns Steering Committee” report but it advocated tying the funding structure to academic performance requirements rather than the current system of funding a set number of hours of instruction

Newly-elected Governor Chris Gregoire set an agenda for the state legislature that called for more money for schools as a “down payment” on continued increases in education spending for the state’s schools -- 2006

Washington Education Association (WEA) representing school employees launched a “Living Wage Campaign” to elevate the pay of Educational Service Employees (non-certified staff members)

FEDERAL NO CHILD LEFT BEHIND TESTING IS REQUIRED IN WASHINGTON SCHOOLS

Federal updates to the No Child Left Behind (NCLB) laws required testing in reading and math -- 2006

third graders were tested for the first time

fifth graders were tested in science for the WASL and in reading and math for NCLB

eighth graders were tested in science for the WASL and in reading and math for NCLB

WASL TESTING RESULTS RAISE CONCERNS

About half of tenth graders did not pass the math section of the 2006 WASL examination scores also fell across the board in other grade levels

as many unrelated schools and districts recorded abrupt drops in their testing results some educational leaders, including the President of the Washington Education Association, believed the lack of transparency in examination scoring procedures was reason enough to drop the WASL as a graduation requirement

other education leaders such as Superintendent of Public Instruction and former WEA President Terry Bergeson believed it would be a mistake to step away from high graduation standards however, it was apparent some adjustments must be made

Many parent and teacher groups had protested against the WASL since its inception noting unreasonable student expectations and resisting the requirement that students with severe learning disabilities must take the test

Qualifications of those scoring the test were challenged by some educational activists

WASL examinations were developed and originally graded by practicing teachers soon scorers were only required to have a bachelor’s degree and minimal testing training each student’s examination was assessed by multiple scorers

only a little more than fifty-five percent agreement on any given score was expected

inconsistencies in scorers' evaluations of answers
undermined the legitimacy of the WASL examinations' results
delegates at the 2006 Washington State PTA convention unanimously voted to **“oppose any efforts to use a single indicator for making decisions about individual student opportunities such as grade promotion, high school graduation, or entrance into specific educational programs.”**⁹⁶³

SEATTLE SUPERSONICS ARE SOLD

Seattle SuperSonics (commonly referred to as the “Sonics”) was the professional basketball team based in Seattle that represented the Pacific Northwest in the National Basketball Association
Howard Schultz chairman and CEO of Starbucks sold the Seattle SuperSonics -- July 18, 2006
after failing to reach an agreement with the city of Seattle over publicly funding an expansion of the city's Key Arena at a cost of \$220 million
Key Arena was remodeled [1995] but was the National Basketball Association's smallest arena
local buyers for the basketball team could not be found so Schultz agreed to sell
to an ownership group in Oklahoma City headed by Clay Bennett for \$350 million
this sale was approved by the by other basketball franchise owners [October 25, 2006]
contingent on the new ownership make a good faith effort
to secure a new arena lease somewhere in the Greater Seattle area

ADJUSTEMENTS ARE MADE TO THE WASL TESTING PROGRAM

WASL testing and Washington Alternate Assessment System (WAAS) Portfolio alternatives were put into place to provide students additional opportunities to meet the demands established for student learning
Washington Alternate Assessment System (WAAS) Portfolios was expanded in addition for grade four and seven students with significant cognitive disabilities could substitute portfolios in third, fifth, sixth, seventh and eighth grades -- 2006
also it was decided some students could take the WASL examination below their grade level
Washington Alternate Assessment System (WAAS) Developmentally Appropriate (DAW) WASL became the designation of this alternative testing program
Conversely, ninth grade students could attempt the high school required WASL examination early -- 2006
this option was intended for gifted or advanced students who had met WASL subject requirements
Also, WASL summer and fall re-test sessions were introduced to provide students another opportunity to meet Washington state Legislature's tenth grade graduation requirements

BILL AND MELINDA GATES FOUNDATION WORKS TO IMPROVE LIFE WORLD WIDE

Bill Gates announced he would begin to transition out of a day-to-day role with Microsoft allow him to devote more time to working with the foundation -- June 15, 2006
Warren Buffett, then the world's richest person, pledged to give the Gates Foundation approximately \$1.5 billion -- June 25, 2006

⁹⁶³ Washington State PTA Board Positions and Resolutions

Bill and Melinda Gates Foundation will give hundreds of millions of dollars in the next few years to programs aimed at encouraging saving by the world's poor

Bill and Melinda Gates Foundation quickly became a major influence upon global health foundation gives approximately \$800 million every year -- an amount that approaches the annual budget of the United Nations World Health Organization (193 nations) research into prevention of diseases has been emphasized:

- Global Alliance for Vaccines and Immunization,
- Children's Vaccine Program,
- University of Washington Department of Global Health targeted three areas:
education and global access to higher education, Pacific Northwest and global health
- HIV/AIDS research, Global TB Vaccine Foundation,
- Aeras Global Tuberculosis Vaccine Foundation,
- Visceral Leishmaniasis Research to eradicate the second-largest parasite killer after malaria,
at both the Hebrew University of Jerusalem and The Institute for One World Health

Bill and Melinda Gates Foundation supports local enrapture efforts:

- Financial Access Initiative provided micro financing in impoverished countries worldwide,
- Pro Mujer provided micro financing in Latin America,
- Grameen Foundation provided microloans to five million families attempting to escape poverty

Bill and Melinda Gates Foundation supports agricultural development around the world:

- International Rice Research Institute to support higher crop yields,
- Alliance for a Green Revolution in Africa to enhance agricultural science
and small-farm productivity in Africa

Bill and Melinda Gates Foundation also support specific charities which address global issues: these charities include:

- CARE international,
- International Rescue Committee,
- Mercy Corps,
- Save the Children,
- World Vision

This is only a portion of the work undertaken by the Bill and Melinda Gates Foundation other significant projects focus on world issues such as water, hygiene and sanitation response to specific natural disaster like earthquakes, floods and hurricanes is immediate Gates Foundation also has focused on specific issues needing to be addressed in the United States

Bill and Melinda Gates Foundation is valued at more than \$30 billion more than a billion dollars a year is given away

“JOINT TASK FORCE ON BASIC EDUCATION FINANCE” IS CREATED BY LEGISLATORS

In an effort to follow-up on the final report of the Washington Learns Steering Committee State Legislators passed E2SSB (Engrossed Senate Substitute Bill) 5627

which created the “Joint Task Force on Basic Education Finance” -- 2007

Members of the Task Force were to review the current definition of “basic education” and its funding formulas and develop a new definition and funding structure

to finance the report of the Washington Learns Steering Committee report and current law

Joint Task Force on Basic Education Finance was composed of fourteen members:

- eight legislators,
- Superintendent of Public Instruction Randy Dorn,
- a representative of the Governor’s Office or the Office of Financial Management,
- four members appointed by the Governor

(a chair with experience in finance and knowledge of the K-12 funding formulas,
and three members with significant experience with K-12 finance issues)

Washington Institute for Public Policy (WSIPP) was to provide research support
Joint Task Force on Basic Education Finance was further instructed that its report must include:

- recommendations for at least two, but not more than four, options for revising K-12 funding with one option to be a redirection and prioritization within existing resources based on research-proven education programs;
- final report must include a timeline for phasing in the new funding structure and a projection of the expected effect of the investment made under the new funding structure

OTHER CHANGES IN THE WASL ALTERNATIVE TESTING PROGRAM TAKES PLACE

In addition to WASL and WAAS-DAW WASL testing and WAAS-Portfolio assessment,
WAAS-DAW2 was also introduced to allow a student with some form of disability
to take their on-grade WASL -- but have it graded on a lower scale
(this alternative was renamed “WASL-Basic assessment” -- 2007
WAAS-DAW and WASL-Basic examination could also be taken during summer
autumn retesting was limited to special education students attempting to retake the WAAS-DAW
or WAAS-Portfolio assessments

Governor Chris Gregoire officially called for the delay of the math and science
sections of the WASL test -- May 8, 2007

students in the Class of [2008] would have to pass only the reading and writing sections
Washington Alternate Assessment System (WAAS) Developmentally Appropriate WASL (DAW)
was updated to limit the test to eleventh and twelfth grades only -- 2007
if passed the examination would count toward a student’s graduation eligibility
in the eyes of the state, but the test could no longer be counted toward fulfilling
federal requirements to meet Adequate Yearly Progress for federal Title I funding
Ninth grade students were no longer allowed to attempt the science portion of the WASL

SCHOOL LEVIES BECOME EASIER TO PASS

Washington Education Association (WEA), the union representing school employees in the state
successfully lobbied the Legislature to change the state’s constitution
to remove the super-majority requirement that sixty percent of the voters voting
must approve “maintenance and operation” levies to fund local school programs -- 2007
this constitutional change had been approved by the voter [November 2006]
only a simple majority of the voters voting must grant approval for a school levy to pass

SCHOOL STRIKES CLOSE TWO LOCAL DISTRICTS

Bethel School District staff went on strike for three days over compensation -- September 2007
Shoreline School District employees struck for one day to point out financial mismanagement

and increases in class size their school district -- late September

SEATTLE BUS TUNNEL IS RETROFITTED AS A TRAIN TUNNEL

Seattle's bus tunnel under the city first opened [September 1990]

Fifteen years later the tunnel was closed for upgrading and retrofitting [September 2005]

so that it could be used by both buses and Sound Transit's Central Link light rail trains

buses were dual-powered operating as diesel buses on city streets

and as trolleybuses in the tunnel using electricity from overhead wires

this retrofit was part of the Sound Transit light rail project approved by voters in [1996]

although rails were included when the tunnel was first built,

they were not adequately insulated to prevent stray electric current from trains

from corroding nearby utility lines

because this required removal of the original rails, Sound Transit took the opportunity

to lower the tunnel roadway to allow level train boarding

After two years Seattle's Metro Bus Tunnel reopened -- Monday, September 24, 2007

TEAM OWNER CLAY BENNETT TAKES STEPS TO MOVE THE SEATTLE SUPERSONICS

Clay Bennett and his ownership group of the Seattle Supersonics proposed a new arena

be constructed in Renton at a cost \$500 million to the state's taxpayers [February 12, 2007]

state legislators refuse to make the commitment

Bennett asked that an arbitrator be appointed to address breaking the team's lease of the Key Area

this proposal was ruled to be illegal by a Superior Court judge in Seattle

who stated the lease would remain in place until it expired [2010]

when this decision was appealed to federal court, U.S. District Court Judge Ricardo Martinez

also ruled the Key Area must remain in place

Clay Bennett gave a deadline of two days to arrange public financing of a new arena

when this deadline was reached Bennett announced the team would be moved to Oklahoma City

this announcement was made one day after the Super Sonics' home opener -- October 31, 2007

SEATTLE IS GRANTED A FRANCHISE FOR MAJOR LEAGUE SOCCER

Major League Soccer (MLS) began selling franchises to cities across America [1994]

Seattle was considered a viable location for a professional team

as were more than thirty other cities

Adrian Hanauer, owner of the United Soccer League's (USL) Sounders, a rival to MLS soccer

was interested in acquiring a soccer team for Seattle

however, the lack of a soccer-only stadium in Seattle dimmed their prospects

in spite of a strong soccer fan base

when franchise cities were named Seattle was not among those selected

Seattle Seahawks owner Paul Allen worked with the city to build a new football stadium for his team

with the possibility of a soccer team being co-tenant [1996]

Another obstacle to Seattle's acquiring a soccer team franchise surfaced when Major League Soccer

moved from league-operated teams to investor-owned teams [2000]

wealthy individuals would need to commit before Seattle could gain a team

When Major League Soccer announced additional teams would be added [2003]

Adrian Hanauer was in discussions with MLS making Seattle a strong contender but it was announced Seattle failed to acquire an expansion franchise [2004] Hanauer announced that he would not be able to secure an expansion team without the help of more investors willing to cover the increasing MLS franchise fees which had grown beyond \$10 million Hanauer joined with Hollywood producer Joe Roth to make a \$30 million bid for an expansion franchise [2007] Paul Allen whose company Vulcan Sports & Entertainment owned Qwest Field (CenturyLink Field/Lumen Field) became part of the ownership joined in the ownership of the Seattle Sounders FC TV personality Drew Carey also joined in the effort to purchase a team for Seattle Seattle was awarded a Major League Soccer (MLS) franchise making it the fifteenth team in the league -- November 13, 2007 fans chose the "Sounders" name through an online poll [2008] making the "Seattle Sounders FC" the third Seattle soccer club to share the name ("FC" in the name stands for Football Club) Microsoft was announced as the team's sponsor in a five-year arrangement would \$20 million as part of the agreement Xbox 360 and Xbox Live brands appears on the Sounders FC jerseys and throughout the stadium

SEATTLE SUPERSONICS ARE MOVED TO OKLAHOMA CITY

Team owner Clay Bennett's group gave the City of Seattle one day to accept an offer of \$26.5 million to buy out the Seattle SuperSonics' Key Arena lease this was rejected by the city Microsoft CEO Steve Ballmer promised his investment group would provide half of the \$300 million necessary to renovate Key Arena if the other half was provided by the city and county government state legislators did not give the necessary approval for the county to provide the funds Seattle sued the National Basketball Association -- but to no avail Team and community morale was low at the beginning of the Supersonics 2008 season talks with the City of Seattle for a new arena had broken down Sonics got a franchise player with second overall pick in the NBA draft with Kevin Durant however, with the Ray Allen trade the Sonics did not have much talent to assist their rookie they lost their first eight games under Coach P.J. Carlesimo on the way to a 3-14 record in the first month of the season Durant would live up to expectations, as he led all rookies in scoring at 20.3 points-per-game and won the Rookie of the Year however, the Seattle Supersonics posted a franchise worst record of 20-62 This would be the final season in Seattle as the was sold and relocated to Oklahoma City -- 2008 they would become the "Oklahoma Thunder" -- February 15, 2008

U.S. SUPREME COURT RULES NONPARTISAN OR TOP TWO PRIMARY CONSTITUTIONAL

United States Supreme Court in *Washington State Grange v. Washington State Republican Party* ruled that Washington's Initiative 872 was constitutionally permissible -- March 18, 2008

because unlike the earlier “blanket primary” long used in Washington
it officially disregards party affiliation -- candidates only state their “party preference”

MATHEMATICS PORTION OF THE WASL EXAMINATION IS DROPPED

Governor Chris Gregoire removed the mathematics portion of the tenth grade WASL examination
due to low pass rates and heated debate over its long list of problems -- March 26, 2008
but students would have to pass the mathematics WASL examination until [2011]
when the test was to be replaced by end-of-course exams in algebra and geometry [2014]

WASHINGTON USES ITS NEW PRIMARY ELECTION SYSTEM FOR THE FIRST TIME

Washington voters participated in the first “nonpartisan” or “two party” Primary Election
to select candidates to appear on the November General Election ballot -- August 19, 2008
Primary Election is used to select candidates for the [November] General Election
voters did not declare a party affiliation
candidates are not required to state a political party preference
two candidates receiving the most votes in the Primary Election
qualify for the General Election
candidates must also receive at least one percent of the votes cast in the race
to advance to the General Election. Other rules apply to judicial races

SCHOOL EMPLOYEES IN BELLEVUE GO ON STRIKE

Bellevue School District was struck for thirteen days -- September 2008
as teachers protested a proposed district requirement for mandatory, pre-scripted,
minute-by-minute daily lessons downloaded from the district “**curriculum web**”
district administrators threatened to use a court injunction to force teacher’s back to classes
but parents and community members attacked the proposal in a public hearing
teachers used a web-based strike communications system to elicit support from parents
You Tube videos were used to share personal accounts of the issues at stake
and indicated why the school district’s plan hurt student learning
State-wide efforts to reform school funding continued
Washington ranked forty-fifth in the nation in per-pupil spending
Washington’s class sizes were the forty-sixth largest in the nation

JOINT TASK FORCE ON BASIC EDUCATION FINANCE ISSUES ITS FINAL REPORT

Members of the Joint Task Force on Basic Education Finance were charged with
reviewing the current definition of “Basic Education” and develop a new funding structure
Several changes in the basic education requirements were proposed -- January 14, 2009

- high school graduation requirements increase from nineteen to twenty-four credits,
- early learning be provided for all pre-school children from low-income families,
- sufficient funds for additional time and resources for struggling students will be provided

Two changes in teacher compensation were proposed:

- a new career ladder for teachers be put into place,
- mentoring of new teachers by master teachers be funded,
- peer reviews be performed by master teachers who have no conflicts of interest

Funding proposals were delivered by the Joint Task Force on Basic Education Finance:

- Initiative 728 that proposed construction of additional school facilities, reducing school class size, expansion of learning programs and teacher training be implemented,
- Initiative 732 providing cost-of-living increased to educators be implemented but not as a basic education requirement,
- all school districts be required to use a new common fiscal accounting and budgeting system,
- local school levies remain as part of the way Washington funds public education beyond the basics

SEATTLE'S "SOUNDERS FC" BECOMES A HUGE SUCCESS

Seattle Major League Soccer (MSL) franchise sold all 22,000 season ticket packages in the first year giving the team the most season ticket holders in the MSL

Sounders FC played their first home match to a sold-out crowd -- March 19, 2002

32, 523 fans watched their team defeat the New York Red Bulls 3-0

Seattle was the first MSL team to win its first three matches -- without giving up a point

Sounders sold out every home game during its first season and set new MLS records

for average match attendance and the most season tickets sold in the league

66,848 fans attended a friendly match with Barcelona, Spain [August 5, 2009]

this was a state record for soccer attendance

but this record was later broken when 67,052 attended

as Seattle hosted England's Manchester United

Sounders FC became only the second MLS expansion team in league history

to win the U.S. Open Cup tournament in its first season

as they defeated D.C. United 2-1 on the road in Washington, D.C.

(they became the first team in almost three decades to repeat as U.S. Open Cup champion

they did it in front of the largest crowd to ever witness an Open Cup Final

in the history of the 97-year-old tournament [201])

MASSIVE EDUCATION REFORM LAW PASSES THE LEGISLATURE

As a result of the report of the Joint Task Force on Basic Education Finance

legislators passed ESHB (Engrossed Substitute House Bill) 2261

signed into law -- May 19, 2009

ESHB 2261 changed the State's basic education laws:

- Washington's "Program of Basic Education" was redefined
funding amounts and methods needed to fully support it were also redefined
- it included enhancements to Washington State's education system:
 - increased instructional hours;
 - increased high school diploma requirements;
 - developed a new transportation funding formula;
 - added all-day kindergarten to Basic Education definition;
- in addition it required:
 - all school districts report allocated funds and expenditures on a prototype school model;
 - biannual review of the State of Washington's education system's capacity

by the Office of the Superintendent of Public Instruction was required;
-Basic Education definition would be periodically updated by a “Quality Education Council”
Governor Chris Gregoire vetoed out two additional portions of the bill passed by the legislature:
•designation of Early Learning for disadvantaged students three- and four-year-old children
as a basic education retirement for state funding;
•develop of a “highly capable student” safety net structure as a “Basic Education” requirement
Full implementation of ESHB 2261 was delayed until [2018]

LEGISLATURE CUTS SCHOOL FUNDING

State legislators passed House Bill 2261, an education reform bill
but two major problems were identified regarding the legislation:
it delayed actual funding of education reform for at least nine years [until 2018]
it eliminated the [1977] Basic Education Act establishing minimum teacher-student ratios
(fifty certified teachers per one thousand students)
new minimum standards to be funded by the state were only vaguely outlined
and thus adjustable by future legislatures
House Bill 2261 cut over one billion dollars in public school funding
after a partial veto removing early learning programs for three and four-year olds
and funding programs for highly capable students from Basic Education was
Governor Chris Gregoire signed the bill into law -- May 19, 2009
Because of announced cutbacks in school funds
ninth graders were not be allowed to take any portion of the high school WASL – 2009

LOCAL SCHOOL DISTRICTS SUFFER A FINANCIAL CRISIS

Teachers around the state had been angry since the [2003] decision by Governor Gary Locke
and the Legislature not to fully fund Initiative 732
which guaranteed cost-of-living pay adjustments to educators
Faced with a continuing deep economic recession and a drop in state revenues,
legislators again cut school district budgets resulting in employee layoffs across the state
many teachers were hired back but non-certified service employees were greatly impacted
as hours and jobs were slashed

KENT SCHOOL EMPLOYEES GO ON STRIKE

Negotiations between teachers and the Kent School District began [April 2008]
discussions regarding compensation, workload and work-schedule issues stalled
amid a statewide financial crisis that forced school districts across Washington to cut budgets
Kent School District officials declared they had reached an impasse
this is the first step toward calling for mediated talks
talks with the help of a mediator broke down and a second round of mediation was attempted
Kent’s 1,700-member union scheduled a strike vote if no agreement was reached
More than 1,500 (86%) of the district’s 1,700 teachers
voted to go on strike beginning August 27, 2009
class size and time with students were the central issues under dispute rather than salary
district officials said there was not enough money to reduce class size

School District officials filed for a court injunction to force the teachers back to the classroom negotiations between the school district and its staff continued during the strike
King County Superior Court Judge Andrea Darvas ruled the strike illegal -- Tuesday September 1
Judge Darvas urged both sides to bargain over the weekend
and ordered teachers to return to their classrooms September 8
many Kent teachers expressed concerns about defying the court order
they could face fines or even be arrested for disobeying the order
at a general membership meeting, Kent teachers voted to defy the court order
and remain on strike with 74% approval -- September 7, Labor Day
Judge Darvas imposed a \$200 a day fine on teachers who did not report to work -- September 11
Kent Education Association also faced a \$1,500 a day fine if the strike continued
all fines were to be retroactive to [September 8] the day Darvas ordered the schools opened
Teacher negotiators responded with a proposal to the school district
that was \$200,000 less than the district proposal of \$10.500 provided the district lower class size
Kent School District superintendent stated the district respected and valued its teachers
but was constrained financially and could not meet the class size demand
Negotiations continued and a tentative agreement on a two-year contract
was announced on the seventeenth day of the strike -- September 17, 2009
class loads were capped at twenty-nine in grades K-3; thirty-two in grades 4-6
in the expired contracts these caps had been thirty-one and thirty-four respectively
however, grades 7-12 had no class load cap which angered some secondary teachers
in addition, after school meetings were limited to no more than eight a month

SCHOOL EMPLOYEE STRIKES IN WASHINGTON STATE REFLECT STAFF FRUSTRATION

There had been about ninety school employee strikes in Washington since the early [1970s]
but the two most recent strikes, in Bellevue [2008] and Kent, 2009, focused public attention
on teachers' professional concerns such as the negative effect on students of school funding,
educational reform, testing changes in curriculum and class size
these became central in the collective bargaining of new contracts with school districts
part of the frustration faced by professional educators was the realization local school districts
were virtually powerless to address these concerns without adequate funding from the state

EDUCATION ACTIVISTS SUE THE STATE OF WASHINGTON

Two Washington families and the Network for Excellence in Washington (NEWS)
(a statewide coalition of 430 community groups, school districts and education associations)
filed suit in superior court to establish Washington was in violation of its constitution [2007]

ARTICLE IX EDUCATION SECTION 1 PREAMBLE. It is the paramount duty of the state to make ample provision for the education of all children residing within its borders, without distinction or preference on account of race, color, caste, or sex.

this became known as the McCleary Case -- *McCleary v. State of Washington*
McCleary trial was held in King County Superior Court Judge John Erlick's courtroom
for thirty-five days -- August 31-October 21, 2009
during the trial, the State cross-examined many of the education witnesses
asking if they would fund education at the expense of other worthy state services

such as health care, nutrition services and transportation needs
Judge Erlick ruled the witnesses, and even the Legislature, could not make that decision
that decision had been mandated by the State Constitution

JUDGE JOPHN ERLICK DELIVERED HIS VERDICT IN THE McCLEARY CASE

Judge Erlick delivered his final ruling in *McCleary v State of Washington* -- February 4, 2010
virtually every point had been proven by McCleary and the others

Judge Erlick declared that Washington State was in violation of its constitutional mandate:

- Funding for basic education is inadequate and undependable:
the Court noted **“ample”** funding means **“considerably more than just adequate,”**
and funding must be accomplished through **“dependable and regular tax sources”**
- Local governments bear too much responsibility:
Washington’s reliance on local property taxes to support basic education,
instead of broader, statewide taxes, **“fails to provide the ‘ample’ funding”**
required by the Constitution
- Recently-enacted reforms show promise
legislators had recently enacted two laws, House Bills 2261 and 2776,
“which if fully funded, will remedy deficiencies in the K-12 funding system.”

King County Superior Court Judge John Erlick ruled the Constitutional mandate is the responsibility
of the State Legislature and directed the State:

- to determine the cost of amply providing for basic education for all children in the state;
- to comply with the Constitutional mandate to provide stable and dependable funding
for the cost of that education

Judge Erlick’s decision was appealed to the State Supreme Court

WASL TESTING IS REPLACED IN WASHINGTON STATE WITH “AUTHENTIC ASSESSMENT”

To address concerns that only mathematics, science, reading and writing were being assessed
and were therefore stressed in the curriculum to the detriment of other subjects,
classroom based assessments known as “authentic assessment” were piloted by the state
students no longer were required to take the WASL starting in 2010

Fifth Graders became the group to be tested

they were asked to sight sing from sheet music while being videotaped

they are also expected to compose on demand a theme using blank staff paper
and perform it on an instrument

they must interpret a piece of visual art by creating and performing an original dance

the student has twenty minutes to create and rehearse their dance,

and must describe two ideas, images, or feelings and explain why he or she
chose that movement or movement phrase

dances must be performed in bare feet or appropriate dancing shoes

they also were required to assess their social studies achievements

students broke into five different groups such as tobacco growers and producers

“Should Representative Smith vote for a bill that does not allow smoking in public places”

could be a question placed before the groups

different groups try to persuade Smith to vote their way

Smith then votes and the group work is completed
finally, the fifth graders were asked write up a four or five paragraph persuasive essay
giving their own opinion of whether or not they liked Representative Smith's choice
other Arts assessments might include theatre and the visual arts

WASHINGTON CLOSES THE McNEIL ISLAND CORRECTIONAL CENTER

Washington Governor Christine Gregoire decided to close the McNeil Island Correctional Center
cutting approximately \$8.6 million per year from the Washington state budget -- December 2010
However, the Department of Social and Health Services continued to operate
the Special Commitment Center, which housed some 300 residents, in the middle of the island⁹⁶⁴
most inmates and staff members were transferred to other correctional facilities
leaving a handful of personnel and trustees behind for decommissioning

GREEN RIVER KILLER'S VICTIM NUMBER FORTY IS DISCOVERED

Rebecca Marrero, age twenty, disappeared from Pacific Highway South [December 3, 1982]
she was found near Mountain View Cemetery -- December 20, 2010
twenty-eight years after she went missing
Gary Ridgway was charged with her death [February, 2011]

McNEIL ISLAND SPECIAL COMMITMENT CENTER CLOSES

McNeil Island, the oldest prison facility in the Pacific Northwest,
officially closed its doors for the last time -- April 1, 2011
it had been in operation for 136 years
and was the last remaining island-based penitentiary in the nation

STATE LEGISLATORS AGAIN FACE A BUDGET CRISIS

Realities of difficult economic times for the state
and the demands of the McCleary case to fund education presented a crisis to the legislature
budget cuts of \$4 billion were proposed in the House of Representatives and the Senate
in an effort to bridge an anticipated \$5.3 billion shortfall
(Two Initiatives to increase school funding had been passed by the state's voters [November 2000]:
•Initiative 728 proposed construction of additional school facilities, a reduction of class size,
expansion for learning programs and teacher training to be funded by existing property taxes
state budget reserves and lottery proceeds
•Initiative 732 demanded an annual cost-of-living salary adjustment be granted
to public school teachers and district employees
and community and technical college employees
these two measures had been repeatedly suspended during difficult fiscal times)
House Bill 1131 to suspend initiatives I-728 and I-732 was introduced [January 13, 2011]
this Bill was brought to the House Floor
and passed by a vote of 71-25 with two excused [May 9]

⁹⁶⁴ Daryl C. McClary, *McNeil Island Corrections Center, 1981-present*, Essay 5239, HistoryLink.org, April 24, 2003.

State Senators took up the proposal [May 10]
this Bill was brought to the Senate Floor [May 24]
and passed by a vote of 21-17 with five excused
Governor Chris Gregoire signed the Bill into law -- June 7, 2011
Initiatives I-728 and I-732 were permanently eliminated

NEW STATE FUNDING FORMULA FOR THE PUBLIC SCHOOLS GOES INTO EFFECT

Legislators had passed forty-nine different bills to reform education since [2008]
but did not fund even their own definition of “Basic Education”
State legislators had slashed more than \$800 million from the budgets
for K-12 school, pre-school and after-school programs since [2009]
teachers increasingly felt compelled to purchase supplies for their students and classrooms
using their own money without reimbursement
students from struggling homes sometimes were given money for lunch and school supplies
Under the new funding structure for the state’s public schools which was effective September 1, 2011
general apportionment formula would follow the prototypical school model
prototypes illustrated a level of resources to operate a school of a particular size
with particular types and grade levels of students
allocations to school districts were based on actual “full-time equivalent” (FTE) students
enrolled in each grade in the district, adjusted for small schools
and reflecting other factors in the state’s biennial budget
Under Substitute House Bill 2776 the Legislature designed a funding formula
that allocated funding in three primary groups:
schools, district-wide support, and central administration
new prototypical model applied staff ratios and an assumed class size for each school type:
elementary, middle, and high school
each prototype has a theoretical number of students and designated levels of staffing
however, pay for teachers was cut by 1.9%
but it was left to local school districts to impose the pay cut

TEACHERS IN TACOMA GO ON STRIKE

Teachers in Tacoma began the school year without a contract September 1, 2011
negotiations continued but the issues of teacher pay, class size
and district policies regarding transferring of teachers to other schools remained unresolved
salary negotiations were very difficult as the state legislature in its state budget
had imposed a 1.9% pay cut for teachers but to local school districts who to impose the cuts
when no progress toward a new contract was made eighty-seven percent of Tacoma teachers
voted to strike the 28,000-student district -- September 12, 2011
Tacoma School District attorneys said public employees cannot strike in Washington
they immediately sought a court injunction to force the 1,900 teachers back into their classrooms
by filing a lawsuit that had been drawn up in advance
Superior Court Judge Bryan Chushcoff issued a temporary restraining order
demanding teachers return to work and ordered both sides back to the negotiation table
“as soon as practical” -- September 14

a hearing on a permanent injunction to end the strike was scheduled for [September 27] Tacoma teachers returned to the picket line in defiance of the court order -- September 15 negotiations with the assistance of a state mediator were begun but ended in no progress Talks were begun again when Governor Chris Gregoire summoned both sides to her office for a last-ditch round of bargaining by school district and teacher association negotiators:

- it was agreed a joint panel of teacher and school officials would meet to set new teacher evaluation standards to be used in transferring teachers to other schools seniority (teaching experience) would be a factor to determine teaching reassignments;
- teachers dropped their demand for lower their student-to-teacher ratio;
- district administrators dropped demands for a salary cut but teachers lost one day's pay;
- an amnesty clause guaranteed that union members' participation in the strike would not be a factor in staff performance evaluations

this agreement was reached: -- September 21, 2011
fifty-seven schools in Tacoma resumed classes -- September 22, 2011

WASHINGTON STATE SUPREME COURT RULES ON SCHOOL FUNDING

Case of *McCleary v. State* had been decided in Superior Court Judge John Erlick's courtroom when the verdict was delivered the court had found state funding of the public schools was inadequate to meet the legislative definition of basic education [February 2010] that decision was appealed by the state directly to the State Supreme Court After hearing the appeal the Supreme Court delivered a unanimous decision -- January 5, 2012 the decision of the court upheld the claims of the defendants who sued the state:

- Article IX, section 1 of the Washington State Constitution makes it the paramount duty of the State to amply provide for the education of all children within its borders;**
- The legislature must develop a basic education program geared toward delivering the constitutionally required education, and it must fully fund that program through regular and dependable tax sources;**
- The State has failed to meet its duty under article IX, section 1 by consistently providing school districts with a level of resources that falls short of the actual costs of the basic education program;**
- the judiciary will retain jurisdiction over the case to help ensure progress in the State's plan to fully implement education reforms by 2018;**
- This court intends to remain vigilant in fulfilling the State's constitutional responsibility under article IX, section 1**

Washington State Supreme Court justices then noted **“What we have learned from experience is that this court cannot stand on the sidelines and hope the State meets its constitutional mandate to amply fund education. Article IX, section 1 is a mandate, not to a single branch of government, but to the entire state....”**

LEGISLATORS RESPOND TO THE RULING OF THE STATE SUPREME COURT

Legislators responded to the ruling by threatening to cut education funding even beyond the \$2.6 billion already cut in recent years
(but the budget they passed did not cut education for the first time in three years)

LEGISLATORS ESTABLISHED THE “WASHINGTON STUDENT ACHIEVEMENT COUNCIL”

Legislators created a cabinet-level state agency -- July 1, 2012

this agency was to provide strategic planning, oversight, and advocacy to support increased student success and higher levels of educational attainment in Washington

“Washington Student Achievement Council” stated as its goal:

“We advance educational opportunities and attainment in Washington. In pursuit of our mission, the Washington Student Achievement Council:

- Leads statewide strategic planning to improve educational coordination and transitions;
- Supports Washingtonians through the administration of financial aid, a college savings plan, and support services;
- Advocates for the economic, social, and civic benefits of postsecondary education”

STATE LEGISLATORS INCREASE PUBLIC SCHOOL FUNDING

Washington’s legislature increased funding for the public schools – 2013-[2015]

enough to cover approximately 66.4% of the actual costs

leaving 33.6% of local school district budgets to be met from other sources

however, the State Supreme Court justices said legislators

were not moving toward full funding fast enough

the court ordered a complete funding plan be submitted to them by the end of April 2014

showing how they would meet the 2018 full funding deadline established by the court

legislators failed to meet the demand saying they could not come to an agreement on a plan

STATE SUPREME COURT FINDS THE LEGISLATURE IN CONTEMPT

Washington Supreme Court retained jurisdiction in the *McCleary v. Washington* School funding case brought to be court by families of students and a coalition that includes school districts, unions and other support groups

Washington Supreme Court justices required annual progress reports from the legislature that indicated what steps were implemented to meet the full funding requirements imposed by the Supreme Court

Legislators failed to provide the court

“a complete plan for fully implementing its program of basic education”

by the 2017-2018 school year

Washington State Supreme Court unanimously found the state legislature in contempt of court in the *McCleary v. State* school funding case

because the state was not meeting its **“paramount duty”** under the state constitution to amply fund public education -- September 11, 2014

“‘[C]ontempt is the means by which a court enforces compliance with its lawful orders when they are not followed’ read the five-page order signed by Chief Justice Barbara Madsen. ‘If the contempt is not purged by adjournment of the 2015 legislature, the court will reconvene and impose sanctions or other remedial measures’.”⁹⁶⁵

however, the justices will wait to impose sanctions until after the 2015 legislative session to give the legislature time to **“purge the contempt”**

⁹⁶⁵ Austin Jenkins, KPLU, *News for Seattle and the Northwest*, National Public Radio digital network.

but it was noted in the order signed by Chief Justice Barbara Madsen: **“On the date following adjournment of the 2015 session, if the State has not complied with the court’s order, the State shall file in the court a memorandum explaining why sanctions or other remedial measures should not be imposed...”**

this court ruling asserted that justices can punish the Legislature in the future and would not hesitate to do so

Governor Jay Inslee called the Supreme Court’s order an **“unprecedented action...in a critical moment in our history. No one should be surprised, yet no one should minimize the court’s order. I urged lawmakers to act this year and agree with the court that we must do more to adequately fund education, which I believe is both a constitutional and moral obligation. If we are to succeed now we will need the help of everyone in Washington state, not just 147 lawmakers, as we rise to the challenge to avoid the court’s pending sanctions.”**⁹⁶⁶

ABOUT THE AUTHOR

I was born in Western Washington and raised in a small village on the shore of the Salish Sea. My professional life was dedicated to teaching primarily Washington State History and United States History at the junior high school level. Of course, I coached for several years. I was active in my local education association serving as president, treasurer and negotiator representing teachers. I also was active in local and state politics. After retiring from teaching I was elected Washington State Senate Sergeant-at-Arms for two four-year terms.

I began *Searchable Pacific Northwest History* as a lecture series to supplement the Washington State History textbooks available for junior high student use. I discovered that an understanding of the present is predicated on an understanding of our past.
